WARNING

Every effort has been made to ensure that the information contained in this is correct. However, it will be clearly understood that this book is intended as a guide only, th nformation cannot be *Guaranteed* correct and that final responsibility must (as alwa with the Shipmaster.

At certain ports, items of navigational routeings and aids have been include means of general guidance only. Shipmasters should have in mind that full and due r e MUST ALWAYS be made to corrected charts of the area, to the appropriate Notices to Ma and all or any other navigational notices, warnings or amendments issued by proper Au s and/or navigational aid services.

The sketch maps are for general assistance and must not be used for navigation oses. In particular, the shapes of buoys should be disregarded since these are indicated by v symbols which may be consequent upon local usage and without resemblance to internati applied symbols.

PLANS

All plans, unless otherwise stated, are reproduced by kind permission of the Port Aut

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in rm or by any means, electronic, mechanical, photo-copying, recording or otherwise without the prior permission of the hers.

Shipmasters, Shipowners or Managers, Port Authorities, Administrators and Agents, are earnestly requested to assist our work in up-dating the Guide *by providing written comment, information, amendments or corrections, plus additional details of any ports or terminals, to the following address:*

SHIPPING GUIDES LIMITED,
SHIPPING GUIDES HOUSE,
75 BELL STREET,
REIGATE,
SURREY,
RH2 7AN,
ENGLAND

All communications will be acknowledged and will be most useful, since it is only by this means that the *Guide* will remain of great value to the user and will be up to date and thoroughly professional in content.

N.B. PLANS, DIAGRAMS, DRAWINGS AND SKETCHES: As you will note, this 1991/92 edition of "Guide to Port Entry" contains over two thousand nine hundred port plans and mooring diagrams that have been reproduced from plans and drawings very kindly sent to us by numerous Port Authorities, Agents and shipboard personnel. We hope that the special plan section will prove interesting and useful.

Presently however, the special plan section is to an extent incomplete, since there are many ports and mooring facilities for which we have not yet received the necessary plans for reproduction purposes. We are anxious to secure plans, diagrams, drawings or sketches of ports and facilities not presently shown in our special plan section, and therefore request that Port Authorities and/or Agents at the places concerned be kind enough to pass us this data together with the necessary permission for reproduction. We would also be very grateful if ship's officers calling at ports not already covered in our special plan section, could find it possible to provide us with diagrams or sketches of the facilities which would be suitable for reproduction in our later editions and/or which might be re-drawn as required by our own art department prior to reproduction.

Democratic Republic of Madagascar

ANTSIRANANA (Diego Suarez): 12.14 S. 49.26 E.

DOCUMENTS:

Documentation on Arrival:

Customs:
2 Crew Lists.
2 Personal Effects Lists.
2 Stores Lists (Bonded).

Immigration/Police:
4 Crew Lists and inspection of vessel and Seamen's Book.

Port Health:
1 Vaccination List and inspection of Derat Certificate.

Agents:
3 Crew Lists.
Ship's Register to be lodged ashore.
Clearance from Last Port.

Documentation on Departure:

An Official from the Port and the Agent visit and will wish to see:

For a Liner:
Load Line Certificate.
Safety Equipment Certificate.
Derat Certificate.

For a Cargo Ship:
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Equipment.
Derat Certificate.
Ship's Register (held by the Agent).

After checking all these an Outward Clearance Certificate will be presented. One is then free to leave the Port, the Agent having given an undertaking that all Port dues have been paid.

APPROACHES/PILOTAGE: Tides run fast in the Orangea Pass, but seem to follow the pattern as per the Admiralty Pilot. Until experience is gained it should only be taken in the hours of daylight. There are numerous natural transit marks available to the navigator, all very clearly described in the 'Pilot'. For this reason it would be essential to take this in fine visibility. Pilot can be taken at Cape Mine but this can be difficult and dangerous in the S.E. Trade season and ships are advised that they can proceed on into the Bay right up to Port Antsiranana Point.

Harbour is large and commodious but subject to very strong N.E. winds from May to October, width of entrance 300 m. Tidal current in Roads, which may attain 3 knots. HWST 2.36 m., LWST 3.56 m., HWNT 1.63 m., LWNT 0.99 m. Pilotage compulsory for vessels of 150 n.r.t. and more. For obtaining Pilot, ETA must be sent 24 hours in advance including ship's characteristics. Course to steer: From Lat. 12° 13′ 09″ S., Long. 49° 26′ 00″ E. Entrance 275° thence beacons in line heading 230°.

ANCHORAGE: There are many splendid anchorages available in this vast Bay. Vessels can anchor 2 cables off the N.W. corner of the wharf at Antsiranana (Diego Suarez).

RESTRICTIONS: No entry for vessels or crews from: Formosa, South Africa and South Korea.

MAX. SIZE: No restriction except max. draft alongside 11 m.

HEALTH: Yellow fever/cholera certificates required for vessels coming from African/Indian countries. Pratique is automatic for vessels entering after calling at another port in the same country.

RADIO: Radio station is "Diego Radio".

VHF: Harbour Master's Office does not have VHF. Navy have VHF Channel 16.

TUGS: Three small tugs available (belonging to Navy and require 24 hours' notice).

BERTHING: Ocean Vessel Wharf: Length 300 m., max. depth 11 m. HW.

Coaster Quay Wharf: Length 60 m., max. depth 4.20 m.

With Pilot, vessel can come alongside day or night.

CRANES: Two port cranes, only used for small coasters. 1×5 tons and 1×2 tons.

STEVEDORES: Advise before 0700 hrs. in order to commence the same day and before 1700 hrs. in order to commence next day at 0600 hrs. with maximum gangs.

Working Hours: 0700 – 1100 hrs., 1300 – 1700 hrs. Overtime Working: 0600 – 0700 hrs., 1100 – 1300 hrs., 1700 – 0600 hrs. No half shifts.

MEDICAL: Difficult to find medicines. In case of serious illness hospital facilities available.

TANKERS: See "Berthing". Discharging rate 200 cu.m.p.h. with flexible hose. Loading rate 30 – 50 t.p.h., depending on ship.

FRESH WATER: Available.

FUEL: Not available.

CONSULS: French Consul.

REPAIRS: All types of deck and engine repairs can be carried out.

DRYDOCK: *Shipmaster's Report:* 1975.

Length overall	199.05 m.	653.00 ft.
Subdivided into sections	128.96 m. 70.09 m.	424.00 ft. 229.00 ft.
Breadth at Bottom	28.40 m.	93.00 ft.
Breadth at Coping	36.60 m.	120.00 ft.
Depth at sill and blocks at MHWS	10.42 m.	34.40 ft.

Yard Services: Nothing was too much trouble for any of their staff attending this ship. Power was a bit of a problem but they did everything to help. Fire mains, fresh water, cranes were all good. Toilets and shower-rooms were more than adequate especially after we were given our keys and had them cleaned.

Workshops: A modern well equipped yard with every conceivable service from an iron foundry to upholstery shops. A clean, well kept set of shops including the building of small craft. The Engineers of this ship were very favourably impressed with the shops and technical services.

From time to time, the yard meet with certain material supply difficulties to satisfy full needs for ship repairs. It is recommended that Owners interested in docking their vessels at this yard study this matter before contracting.

Firms Address: Societe d'Exploitation pour la Construction et la Raparation Navale, B.P. 135, Antsiranana, Madagascar. Tel: General Manager (Home) 221-70, (Office) 226-84, Central 212-65 and 222-98. Telex: 93 103. Cables: Secren, Diego Suarez.

GANGWAY/DECK WATCHMEN: Trade Union on the spot can supply.

OPENING/CLOSING HATCHES: Usually by ship's crew.

SURVEYORS: There is no Lloyd's Surveyor in the country. Often when required Lloyd's Representative flies up from Durban. Sometimes it is agreed that the resident Bureau Veritas Surveyor will subsititute. M. Ralibera Henri in Tananarive is the principal B.V. Surveyor in Madagascar. M. Ralibera received agreement from his head office in Paris to act as non-exclusive surveyor of N.K., N.V. and local insurance company.

CUSTOMS ALLOWANCES: (Tobacco/wine, spirits) Quantity permitted to be held out of bond is only for the personal consummation of each crew member.

CARGO GEAR: Load/discharge effected by ship's gear, no heavy lift cranes available.

REPATRIATION: For crew changes Entry-Visa is required and repatriation can be carried out according to Harbour Master's Certificate and Immigration permission.

AIRPORT: AirMad Services are available each day to connect with the international Air France flights to Orly from the local airfield about 8 miles from the town.

TIME: Local time is GMT plus 3 hours.

HOLIDAYS: Sunday, but can be worked on overtime from 0600 hrs. to 1400 hrs.

New Year's Day, Commemoration of 29th March 1947, Easter Sunday and Monday, May 1st, Ascension Day, Whit Monday, Independence Day (June 26th), Assumption BV Mary (August 15th), All Saints' Day (November 1st), Christmas Day, Anniversary of the Democratic Republic of Madagascar (December 30th). No work possible on these holidays. Overtime rates for all other holidays.

TELEPHONES: No telephones placed on board.

SERVICES: Facilities for compass adjusting, radar and radio repair by Secren (see "Drydock").

BANKS:

Bankin'Ny Indostria (BNI), Angle Rue de France et Rue Colbert, B.P. 4., Antsiranana, Madagascar. Tel: 221-46, 221-52.

Banky Fampandrosoana Ny Varotra (BFV), (Banque Nationale Pour Le Commerce), Rue Richelieu, B.P. 18. Tel: 211-89.

Bankin'Ny Tantsaha Mpamokatra (BTM), (Banque Nationale Pour Le Developpement Rural), Rue Richelieu, Antsiranana, Madagascar.

STORING: Local stores can be delivered directly on board even during loading/discharging, by the ship chandler. Agent will arrange Customs formalities.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

SPECIAL PORT REGULATIONS: See "Restrictions".

REGULATIONS: Any repair work involving even small temporary repairs only with Harbour Master's permission. Using vessel's lifeboat subject to Harbour Master's and Customs permission. Landing of foreign currency is strictly prohibited. Possession of local currency must be justified.

DELAYS: None.

AUTHORITY: Service Provincial de la Marine Marchande, au Port, P.O.Box 109, Antsiranana, Madagascar. *Tel:* 211-33.

AGENT: SCAC Transport International, Box Poste 384, Antsiranana, Madagascar. Tel: Antsiranana 21327 and 21549. Telex: 93102. Cables: Freight Antsiranana.

FORT DAUPHIN: 25.02 S. 47.02 E.

DOCUMENTS:

Manifest of Cargo for discharge.
Manifest of Cargo in transit.
Ship's Stores List.
List of Passengers Landing.
Crew List.
Franchise Certificate (for mail-carrying vessels).

PILOTAGE: The port is an open roadstead and pilotage not required.

ANCHORAGE: In depths of 8 m. Vessels anchoring are charged with port dues.

RESTRICTIONS: Port is normally used by coastal trading vessels. In case of liners handling cargo exceeding 150 tons, special permission required which is obtained by Agent.

HEALTH: Pratique should be requested from the Health Department, Tel: 36.

RADIO: Fort Dauphin Radio, call sign 5RD, between 0400 and 1630 hrs. GMT on following frequencies: 458, 500, 2182 and 2712 kHz.

TUGS: None available.

BERTHING: There are no berths alongside. Vessels work cargo at anchorage.

There is a crane on the dock with a capacity of 3 tons.

STEVEDORES: Arranged by the Fort Dauphin Lighterage Company. Advance notice of ETA required to arrange gangs. Average loading/discharging rate is 10 tons per hold per hour.

MEDICAL: 2 hospitals available in the town.

TANKERS: 1 buoy berth for tankers.

FRESH WATER: No water barge. Only small quantities can be supplied in emergency.

FUEL: Not available.
CONSULS: France.
REPAIRS: Only facilities available for repairing lighters.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Opening and closing hatches carried out by stevedores.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per man. No alcohol.
REPATRIATION: No facilities for effecting crew changes.
AIRPORT: Situated 5 km. from the port, 3 regular flights per week.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Days on which work is normally carried out with overtime payment: Easter; Ascension Day; Whitsun; Assumption; Christmas.

Official holidays on which work can be arranged by special permission: 1st January; 1st May; 26th June (Independence Day); 30th December; Festival of the Republic.
FIRE/POLICE/AMBULANCE: Police Tel: 49; Fire 19; Ambulance 36.
SHORE LEAVE: Not permitted.
AUTHORITY: Service des Ports' Phares et Balises, Tananarive.
AGENT: SCAC Transport International, BP 425, Tananarive, Madagascar. Tel. 20631. Cables: "Freight Tananarive". Telex 22251. Fax: 233730.

MAHAJUNGA (Majunga): 15.44 S. 46.20 E.

DOCUMENTS:
- List of Crew Members.
- List of Passengers.
- Customs Documents.
- Health Documents.
- Manifests.
- Bills of Lading.
- Ship's papers.

Certificates: See "Toamasina".
PILOTAGE: Vessels requiring Pilot must apply by cable to Mahajunga Harbour Master's office at least 24 hours before arrival. Pilot embarks at Narcissus buoy.
ANCHORAGES: Indicated to Ship's Master by cable from Mahajunga Harbour Master's office.
RESTRICTIONS: Ships can enter day and night. Max. draft allowed 10 m.
MAX. SIZE: No restriction except for max. 10 m. draft.
HEALTH: Pratique automatic when vessel comes from a Madagascar port. Pilot is health agent.
RADIO: Radio Mahajunga.
STEVEDORES: Vessel informs Agent by telegraph 24 hours in advance of number of gangs needed.
MEDICAL: Hospital available.
TANKERS: 1 berth, max. draft 10 m.
FRESH WATER: Unlimited drinking water.
CONSULS: French and Greek Consulates.
REPAIRS: Minor repairs only.
CUSTOMS ALLOWANCES: See "Toamasina".
REPATRIATION: All facilities available.
AIRPORT: Served by regular airlines; 7 km. from town.
TIME: GMT plus 3 hours.
HOLIDAYS: Catholic and official holidays. Commercial transactions possible on public holidays.
POLICE/FIRE/AMBULANCE: Police 24–85; Fireman 13; Hospital 29–15.
AUTHORITY: Harbour Master.
AGENT: SCAC Transport International, B.P. 256, Mahajunga. Tel. 22387 and 22008. Telex: 62710. Cables: Freight Mahajunga.

PORT ST.LOUIS: 13.05 S. 48.50 E.

SHIPMASTER'S REPORT: August 1990.

CHARTS: B.A. Chart No. 3873 and French Chart No. 5404.
DOCUMENTS:
- Clearance from last Port.
- 1 Health Declaration.
- 1 Vaccination List.
- 7 Crew Lists.
- 4 Personal Effects Declarations.
- 2 Stores Lists.
- 1 Passenger List.
- 1 Arms and Ammunition List.
- 1 Narcotics List.
- 1 Parcel List.
- 4 Cargo Manifests.

PILOTAGE/APPROACHES: The port is an open roadstead and pilot is not available and also not required.

The approach to the anchorage with radar presents no difficulties. At night time without a radar, however, it is difficult, because of the non-existence of any buoys or lighthouses.
ANCHORAGES: As per Port Control's advice, the vessel anchors in position 13° 04.6′ S., 48° 45.7′ E., about 3.5 miles off the closest shore line, in about 9 m. of water. The holding ground is soft mud and sand, vessel did not drag.
RESTRICTIONS: No information available.
MAX. SIZE: No information available.
HEALTH: Pratique is normally granted after doctor visits the vessel.
RADIO: All local W.T. stations are reported to be inoperative. Cape Town Radio (ZSC) was used to relay ETA messages, which seemed to have arrived in time.
VHF: Channel 16 is used by Port Control and agents.
RADAR: No port radar services available.
TUGS: There are 3 small tugs of about 500 h.p., used for towing the barges to the anchored vessel. One tug is permanently under repair.
BERTHING: No berthing. There are two small tide bound jetties of 100 m. length each, which are used to load and unload the barges.

It is said that there are 12 barges, but 7 barges are in a very bad state of repair. The capacity of each barge is about 100 tons.
CRANES: It is said that there is 1 crane of 20 tons, and 2 cranes of 3.5 tonnes, on the jetties. One crane is under repair.
BULK CARGO FACILITIES: No facilities. Export products are raw sugar and molasses. Sugar is brought to the vessel in bags, hauled aboard with slings and nets, and poured into the holds through openings between hatch covers or pontoons, by cutting the bags.
STEVEDORES: Available in sufficient numbers at all times and on very short notice. Stevedores in port work in two shifts (0600 hrs. – 1800 hrs. and 1800 hrs. – 0600 hrs.).
MEDICAL: It is said that there is a hospital with all facilities.
TANKERS: No information available.
DENSITY: 1025.
FRESH WATER: It is said that fresh water can be supplied by barge. The cost is about U.S.$ 3.00 per ton.
FUEL: No information available.
CONSULS: There are no consuls locally.
REPAIRS: No information available.
DRY DOCKS: None.
SURVEYORS: None available.
GANGWAY/DECK WATCHMEN: Not compulsory, and also not necessary.
HATCHES: Opening and closing of hatches is normally carried out by crew.
CUSTOMS ALLOWANCES: No restrictions, stores are not sealed. 1 Customs Officer stays on board.
CARGO GEAR: Ship's gear is used.
REPATRIATION: There is a small local airport at Sirama, 7 km. away from Port St.Louis, which is connected with daily flights to Antsiranana (Diego Suarez), 134 km. away, and from there via the international airport of the Capital.
AIRPORT: See "Repatriation".
TIME: Local time is GMT plus 3 hours.
HOLIDAYS: See "Antsiranana" (Diego Suarez).
POLICE/AMBULANCE/FIRE: No information available.
EMERGENCY CO-ORDINATING CENTRE: No information available.
TELEPHONE: No information available.
SERVICES: No information available.
BANKS: Banque Tantsaha Mpamokatra BTM at Sirama.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: ID cards are not issued.
REGULATIONS: No particular or unusual regulations.
DELAYS: Delays are normally caused when tugs cannot bring barges, due to the tide bound jetty. Also tugs are not powerful enough. Due to the delays, an average loading rate of about 750 tons per working day (2 gangs) was experienced.
GENERAL: 6 persons are accommodated on board. Since most stevedores are also staying on board, a fire burning portable stove for feeding the stevedores, as well as a portable water tank, is put on board. Tugs and barges are in a poor state. Robberies were not reported.
AUTHORITIES: See "Antsiranana" (Diego Suarez).
AGENT: Local Agent: Direction d'Etablissement at Sirama.

Main Agents: Societe Siramamy Madagascar, Rue de Belgique, Boite Postale 1633, 101 Antananarivo, Madagascar. Tel: 252.35. Telex: 22372. Cables: Sirama Antananarivo.

TOAMASINA (Tamatave): 18.08 S. 49.22 E. **(See Plan)**

DOCUMENTS:

Merchant Marine Department:
- Safety Certificates.
- Crew List.
- Passengers List.
- 1 Full Set Cargo Manifest.

Health:
- International Maritime Certificate of Health.
- List of Passengers Disembarking.
- Transit Passengers List if any.
- Derat Certificate.
- Crew List.

Immigration:
- List of Passengers Disembarking (required on arrival and before ship's departure).
- Transit Passenger List if any.
- 4 Copies Crew Lists.

Customs:
- Ship's Register.
- 3 Stores Lists.
- 3 Crew Effects Lists.
- 3 Crew Lists.
- 5 Full Sets Cargo Manifests.
- 3 Lists Passengers Disembarking and Transitting if any.

Port:
- 4 Full Sets Cargo Manifests.
- 4 Dangerous Cargo Lists.

Agents:
- 2 Full Sets Cargo Manifests.

Certificates: Safety Certificates (3), Derat or Exemption Certificate, Register, Load Line Certificate.

PILOTAGE: Compulsory. Telegraphic address: Porttave Toamasina. Telex: 55619 Port Mg. Ships advise Agents hour of ETA. Pilots informed by Agents. Due to the extension of breakwater, the South Pass is closed to deep-sea ships, except small coastal vessels. For large vessels, the pilot boat waits on the East Pass on line 277° True or range approximately 3.3 miles S.S.E. of Prunes Island Lighthouse.

The pilot boat is fitted with a small portable VHF set (Channels 16, 12, 9 and 6) but its effective range is only about 5 miles.

ANCHORAGES: No special anchorage. If no berth available on ship's arrival, Pilots put ships at best anchorage, according to draft and length of ship, between Reef and shore.

Acts of piracy have taken place at the anchorage.

RESTRICTIONS: Ships enter and sail day and night any time. Max. tide only 3 ft. However, tankers berth in daytime only between 0500 hrs. and 1500 hrs.

MAX.SIZE: For Roads, max. length about 200 m. (concerns only passenger ships). For cargo vessels max. length 180 m.; max. draft 31 ft. 2 in. (9.5 m.).

For tankers, max. LOA 230 m., max. beam 31 m., max. draft 12.20 m. in salt water. Distance from stern to manifold 110 m.

HEALTH: Quarantine message sent to Agents who inform Health Service. "Q" flag must be hoisted during daytime or red over white light at night time if health satisfactory. Master presents Maritime Declaration of Health. Health Officer and Immigration board at Quarantine Anchorage.

RADIO: Toamasina Radio, call sign 5RS.

VHF: Toamasina Radio – Channels 16, 26 and 27.

TUGS: 1 tug of 1,750 h.p. available to assist berthing. One tug 200 h.p. for towing fresh water barge.

BERTHING: 4 berths for deep-sea ships and 2 berths for coastal ships. Ships moored at berth in order of arrival and according length and draft. Mooring has to be very strong, due to swell that may sometimes enter harbour when S.E. trade winds are strong, or if cyclone in vicinity. Swell is so dangerous that ships have to go to anchorage or put to sea until weather improves.

CRANES: Mobile crane of 45 tons available.

STEVEDORES: ETA to Agents must give hatches, tonnages, and all information about cargo.

Working hours: 1st shift 0700 – 1400 hrs., 2nd shift 1400 – 2100 hrs. On Sundays there is one shift 0700 – 1400 hrs. at overtime rates.

MEDICAL: Preferable to inform Agents in advance. All hospital facilities available.

TANKERS: 1 refinery imports crude oil and exports fuel and refined oils. Tankers moored using anchors forward, and moorings aft.

Diameter of lines 12 in. No slop discharge facilities. If tanks are to be washed, slops must be discharged outside harbour.

Shipmaster's Report: A brief description of the berthing manoeuvre is as follows:

About 350 m. from the berth, let go starboard anchor and swing around to starboard with the assistance of a tug, slacking the cable all the time. As vessel completes swing, let go Port anchor, then slack down both anchors. Vessel usually finishes up with about 9 shackles on each anchor. Aft, vessel secures with 4 lines from the starboard quarter to the buoy and 4 lines from the port quarter to the quay. The mooring operation takes about 2.5 hours and unmooring about 1.5 hour.

Facilities:

1. One 12 in. rubber hose, connected always from the starboard side. You can expect 4-5 hours for connecting up the hose and about 2-3 hours for disconnecting.
2. The shore tanks are situated about 5 km. from the vessel, and have a total storage capacity of about 100,000 cu.m. The tanks are located about 4 m. above sea level, the heights of the tanks being approximately 13 m.
3. The main pipe-line is 20 in. diameter by 5 km. long.
4. Maximum back pressure permitted is 6-7 kg. However, in view of the length and size of the line it is very difficult to obtain such a pressure, even with all 3 pumps going all out. Understand from the refinery Superintendent that maximum back pressure so far attained was 4 kg. The back pressures are monitored by gauges fixed on the manifold and on the quay.
5. The maximum draft permitted at the Tanker mooring is 40 ft. Fully laden tankers arriving can berth only in daylight hours. However, 24 hour sailing is possible.
6. The cargo discharging operations are as follows: The main pipe-line is kept constantly filled with bunker fuel and has a capacity of approximately 1,000 cu.m. After connecting up vessels commence discharge of their crude. The bunker fuel in the line is thus pushed back and stored in a separate tank ashore. The vessel then continues to discharge her full cargo. After completing discharge, all tanks are inspected and a dry certificate obtained. The refinery then pushes back the pipe-line crude (1,000 cu.m.) and about 1,200 cu.m. of bunker fuel, which must be stored on the ship in separate tanks. Thereafter, the vessel must discharge all crude, and finally the bunker fuel.

   Thus the pipe-line is constantly kept filled with bunker fuel.

   The drawbacks to the vessel are obvious. 3 individual stripping operations are involved viz. stripping the crude during completion of discharge, stripping of pipe-line crude stored in the ship and stripping of the bunker fuel.

   Note: Capacity of shore pumps (when transferring oil back to ship) is 800 t.p.h.
7. Communications: A telephone is installed aboard for contact between ship and shore. This however, never seems to be at its best when you need it most. Other difficulties are the language barrier (French being spoken). Notwithstanding, the slow rate of discharge obtainable, helps to offset in part the lack of communications.
8. Out-turn quantities: It is understood that these are checked by sounding shore tanks.
9. Bunkers are available on 24 hours notice. Range Redwood 1,000–1,500 seconds.
10. Diesel oil is available, however, as the supply barge has been out of commission for sometime now, supply cannot be depended upon.
11. Fresh Water available.
12. Connection and disconnection of the cargo pipe-line is undertaken by the refinery personnel.

DENSITY: 1023.5.

FRESH WATER: Delivered by water-boats at rate of about 100 t.p.h.

FUEL: Available alongside. Gas oil and diesel oil at 70 t.p.h. Fuel oil at 110 t.p.h.

FIRE PRECAUTIONS: 1 fire-boat stationed near tankers.

CONSULS:

Denmark Tel: 2615 Great Britain Tel: 2680
Netherlands Tel: 2632 Norway Tel: 2549
France Tel: 2721 Sweden Tel: 2136

REPAIRS: Only small repairs possible.

GANGWAY/DECK WATCHMEN: Recommended. Very low cost.

OPENING/CLOSING HATCHES: Booms always operated by crew. If hatches are Macgregor type, by crew; otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes. Wine/Spirits, 1 opened bottle.

REPATRIATION: Possible, arranged by Agents.

AIRPORT: Served by regular airlines. 1 flight a day by Air Madagascar to Tananarive and 4 to 6 flights a week from Tananarive to Africa and Europe.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: 13 holidays per year. Cargo work cannot be arranged on holidays but can be on about every second Sunday.

TELEPHONES: 2 connections at 2 berths used for passenger ships, but may be requested by other ships.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Only seaman's papers required.

DELAYS: Not fixed. When all berths occupied, ships wait at anchorage.

GENERAL: Small tugs and lighters for ships operating on roads. One port launch for crews of ships at anchor.

DEVELOPMENTS: New quay recently constructed.

AUTHORITY: Societe d'Exploitation du Port de Toamasina, B.P. 492, Republic of Malagasy. *Tel:* 321-55/56, 327-60/68/69/71. *Telex:* 55619 Port Mg and 55623 Port Mg. *FAX:* 33558.

AGENT: SCAC Transport International, Rue du Capitaine-Shoel, BP 411, Toamasina, Madagascar. Tel. 5320-48; 5320-49; 5326-80; 5326-81. Telex: 55610/55611/55628. Fax: 532910. Cables: "Freight Toamasina".

NOTES

Please also advise Shipping Guides Ltd.

Madeira

FUNCHAL: 32.38 N. 16.55 W. (See Plan)

DOCUMENTS:

Maritime Declaration of Health.
5 Crew Lists.
12 Lists of Passengers Finally Landing.
5 Lists of Passengers in Transit.
1 List of Stores and Provisions, including Deck and Engine Stores.
1 List of Contents of Shops on board.
6 Copies of Manifest of Cargo for Discharge.
2 Copies of each B/Lading of Cargo for Discharge.
1 Copy of Manifest of Cargo in Transit.
1 List of Passengers Finally Landing, visaed by Portuguese Consul at original port.

All other entry and clearance documents are arranged by the Agents.

PILOTAGE: Vessels should radio their ETA to Agents who order Pilot. 24 hours' notice requested. Pilot launch flies "H" flag during day. Exhibits bright white light over red at night. To request Pilot on approach by day fly international "G" flag, or give 2 long and 1 short blast on whistle. At night flash 2 long 1 short. For vessels berthing alongside Pilot boards in bay; for vessels anchoring Pilot does not board but pilot launch indicates where vessel should anchor. Pilot boat equipped with VHF, Channel 16 (calling) and Channel 6 (working).

ANCHORAGE: Permitted anchorage within 800 m. – 900 m. East from end of breakwater or 300 m. – 500 m. South of breakwater within a limit of 400 m. from shore.

RESTRICTIONS: None.

MAX. SIZE: No limit to size of vessels which can anchor, but all anchorage positions should be indicated by pilot launch. For vessels berthing alongside quay max. permissible length 990 ft. max. draft 36 ft. Oil carriers discharge at buoys at Praia Formosa 3 miles to West of Funchal. Max. length of oil tankers than can berth at oil discharge buoys 665 ft. max. draft 36 ft.

HEALTH: Free Pratique may be arranged by Master sending wireless message addressed "Port Doctor Funchal" – "Request Free Pratique arriving . . . from . . . sailing to . . . number passengers . . . landing . . . number passengers in transit . . . number of crew . . . all well. Master".

In event suspected disease or fever on board Master should wireless either Port Doctor direct or to ship's Agents, who will inform Port Doctor. The Master will then be instructed what further action he is to take.

When vessel other than of national flag arrives after calling at another port in same country usual procedure applies, i.e. Masters' radio for Free Pratique or Pratique granted by Doctor visiting in bay.

RADIO: Maderia Radio Station, call sign "CUB" 500 kHz. Same station normally used by Agent when communicating with vessel.

TUGS: Two tugs each of 1,000 h.p. – 1,100 h.p. (bollard pull 18 tons) are available.

N.B. Vessels up to 2,000 gross tons are not obliged to use tugs.

Vessels of between 2,000 and 15,000 gross tons are obliged to use 1 tug. Vessels over 15,000 gross tons are obliged to use 2 tugs.

BERTHING:

Quay No. 1	Length 139 m., depth 6 m.
	Length 41 m., depth 7 m.
	Length 19 m., depth 8.5 m.
Quay No. 2	Length 425 m., depth 11 m.
Quay No. 3	Length 347 m., depth 11 m.

CONTAINER FACILITIES: Container Terminal: Length 260 m. Depth 7.0 m.

Equipment:
1 Crane, 25 tons at 20 m.
1 Crane, 30 tons at 30 m.
1 Mobile Crane, 22 tons at 20 m.
1 "Travelift" of 45 tons capacity.
4 Container Handling Cranes with extendable spreaders for 20 ft., 30 ft. and 40 ft. containers.

STEVEDORES: When ships require labour, Agents must be notified before 1600 hrs. on working days and on Sundays and holidays before 1100 hrs., after these hours labour not available for last minute engagement. On Christmas Eve work stops at noon, even if ships loading or discharging. No labour available Christmas Day, New Year's Day or Easter Sunday.

Grain cargoes can only be worked from 0800 hrs. to 2000 hrs. daily, including Sundays, and a maximum of 4 gangs only can be worked simultaneously.

Bulk cargoes such as potash and fertilisers need to be bagged on board. Receivers supply the bags – and this generally applies to grain. Bulk cement, clinker and granulated plaster is discharged by grabs.

MEDICAL: Advance notice is required by Agents for any medical attention required. Hospital facilities available. No inoculations required.

TANKERS: Diameter of connection of discharge lines 8 in. into pipelines of 12 in. diameter for black fuel and 10 in. diameter for white fuel. 1 anchorage buoy berth with max. draft of 36 ft.

DENSITY: Salt water.

FRESH WATER: Available at all berths. Order through Agent. Approximate delivery rate 60 t.p.h.

FUEL: Fuel oil available from 3,500 seconds Redwood 1 to 200 seconds Redwood 1. Also marine diesel and gas oil. 12 hours' minimum notice required.

FIRE PRECAUTIONS: At discharging buoys usual non-smoking precautions.

REPAIRS: Repair yard available which can carry out most engine repairs on board except removing or replacing main engines. Hull work limited to removing riveting or replacing hull plates above water line, electric and oxy-acetylene welding. Most electrical work can be effected but notice required in regard to materials necessary. Foundry where castings can be made up to one ton weight.

DRY DOCKS: None.

CONSULS:

Austria	21057	Monaco	20041
Belgium	20255	Netherlands	20317
Brazil	20355	Norway	20541
Costa Rica	24888	Panama	20091
Denmark	22031	Peru	21375
Dominican Republic	21057	Spain	20535
Finland	20596	Sweden	20121
France	21445	Switzerland	22101
Germany F.R.	20338	United Kingdom	21221
Greece	20824	United States	23309
Guatemala	20824	Uruguay	20535
Italy	23890	Venezuela	24050

GANGWAY/DECK WATCHMEN: Gangway watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and Spirits: Moderate supplies allowed for personal use during ship's stay.

CARGO GEAR: No specific local safety regulations. Vessels discharging must provide strops, slings and nets. Lifts over 5 tons must be effected by ship's gear.

10 mobile cranes are available.
1 crane – 6 tons at 12 m., 3 tons at 24 m.
3 cranes – 5 tons at 20 m.
3 cranes – 3 tons at 12 m.
1 crane – 15 tons at 13 m.
1 crane – 45 tons at 3 m.
1 crane – 20 tons at 3 m.

A floating crane is available which can lift up to 27 tons from the water line up to 8 m. This same crane can lift up to 20 tons from the water line to 12 m.

REPATRIATION: Limited facilities for crew changes. Necessary repatriations can be made.

AIRPORT: At Santa Cruz, 20 km. East of Funchal. Service between Funchal and Lisbon operated by national airline TAP, 19 flights weekly Funchal/Lisbon/Funchal.

TIME: GMT maintained throughout year.

HOLIDAYS: New Year's Day (totally unworkable); Easter Sunday (totally unworkable); Municipal Holiday (local) (workable, 50% overtime); Camoes Day (workable, 50% overtime); Corpus Christi (workable, 50% overtime); Assumption (workable, 50% overtime); Proclamation of the Republic (workable, 50% overtime); All Saints (workable, 50% overtime); Independence of Portugal (workable, 50% overtime); The Immaculate Conception (workable, 50% overtime); Christmas (totally unworkable).

Workers' Day, Portugal Day and Good Friday are also totally unworkable.

Saturday is an ordinary working day. December 24 (workable up to 1500 hrs. only).

POLICE/AMBULANCE/FIRE: Police 22022; Ambulance 22122; Fire 21163.

SHORE LEAVE: All crew visiting shore must be in possession of special Landing Card, plus Identity Cards, Discharge Books or Passports, which must be shown to Immigration Officer at gangway. Crew Landing Cards must be stamped by Immigration Officer before crew can proceed ashore.

IDENTIFICATION CARDS: Required.

GENERAL: There is a marina for 200 craft with depths between 3 m. and 6 m.

AUTHORITY: Capitania do Porto do Funchal, 9000 Funchal, Madeira.

Direccao Regional dos Portos da Madeira, Av. Arriaga, 50. 9000 Funchal, Madeira. *Postal Address:* Apartado 246, 9003 Funchal. *Tel:* 21041/2. *Telex:* 72290 Dipmad P. *Contact:* Duarte Nuno da Silva Gomes, Director.

NOTES

Please also advise Shipping Guides Ltd.

Malaysia

BINTULU, Sarawak: 03.16 N. 112.59 E. (See Plan)

PORT LIMITS: Following the arc of a circle with a radius of 10 nautical miles radiating from Tanjong Kidurong Point in position Lat. 03° 16.1′ N., Long. 113° 03.20′ E.

Fairway Buoy: Lat. 03° 16.35′ N., Long. 112° 59.0′ E.

DOCUMENTS: The required documents are:

4 copies Last Port Clearance/Shipping Arrival Report.
1 original Maritime Declaration of Health.
6 copies Crew List.
4 copies Voyage Memorandum.
6 copies Passenger List.
3 copies Vaccination/Cholera List.
3 copies Personal Declaration.
1 original Bonded Stores List, Ex-Customs.
5 copies Provisions List.
3 copies Engine Stores List.
3 copies Arms and Ammunition List.
3 copies Transit Manifest.

PILOTAGE: Pilotage is compulsory and available day and night.

Notification of Arrival: 24 hours notice of ETA required.

LNG/LPG/Ammonia vessels to give 72 hours notice.

Pilot Boarding Ground: Lat. 03° 18.0′ N., Long. 112° 58.5′ E.

VHF: All vessels shall contact Port Control by VHF Channel 12 at least 3 hours before arrival at the Pilot Boarding Ground or as soon as VHF contact can be established.

APPROACHES: The approach channel is a dredged channel 5.7 km. long, 240 m. wide with a depth of 15.0 m. at Chart Datum and is provided with leading lights and buoys. All navigational aids are reliable. For prominent points refer to B.A. Chart 2100. Current runs at 2 knots and tidal range is 2.2 m.

ANCHORAGE: Depth at anchorages varies from 12.0 m. to 26.0 m.

There are different anchorages within the Bintulu Port water limits:

Areas	Depths
(a) General Cargo Anchorage	5.0 m. – 22.0 m.
(b) Waiting Anchorage	24.0 m. – 28.0 m.
(c) Gas Tanker Anchorage	24.0 m. – 26.0 m.
(d) Petroleum Anchorage	21.0 m. – 25.0 m.
(e) Explosives Anchorage	7.0 m. – 21.0 m.

RESTRICTIONS: Depth at General Cargo Wharf is 10.5 m. Depth at Bulk Cargo Wharf is 13.5 m. Depth at LNG Jetty is 15.0 m.

No berthing after sunset at LNG Jetty.

MAX. SIZE: Max. draft for general cargo vessels is 10.0 m.

HEALTH: Maritime Declaration of Health to be completed on arrival in accordance with International Sanitary Convention, 1944.

VHF: Receiving channels used within Bintulu Port are as follows:

Channel 12 – Working channel.
Channel 14 – Port Operations.
Channel 16 – International calling.
Port offers 24 hours service.

Vessels are required to establish contact with Port Authority Control Tower, call sign "Mike Kilo" (MK) on Channel 12 for pilots, etc., at least 3 hours before the expected time of arrival and departure from the port.

TUGS: Use of tugs is compulsory and depends on the size/length of the vessel:

Particulars of 3 Steerable Thruster Tugs:

LOA:	37 m.
Length of Design Waterline:	35.5 m.
Breadth (moulded):	11.0 m.
Depth (moulded):	4.20 m.
Main Engines:	MWM TBD 441 V12 2×1,956 h.p. @ 900 RPM each. Engine couple to Liaaen CP compass thruster type TCN 92/68-230.
Auxilliary Engines:	3×MWM D232V8 85KW/415V/50 HE.
Speed	13.5 knots.
Bollard pull:	42 tonnes.

Particulars of 2 Twin-Screw Tugs:

LOA:	27 m.
Length of Design Waterline:	26.5 m.
Breadth (moulded):	8.00 m.
Main Engines:	2×MWM TBD 440-6. 2×929 HP @ 900 RPM.
Auxilliary Engines:	2×MWM TD 232 V8.
Speed:	11.5 knots.
Bollard pull:	23 tonnes.

BERTHING: 3 berths with a total length 514.5 m. for general cargo.

1 berth of 270 m. for bulk cargoes.
1 Ro/Ro Ramp of 25.5 m.
1 LNG Jetty for LNG vessels only.
1 Jetty for petroleum products.

The wharf apron for the General Cargo Wharf is 24 m. and for the Bulk Cargo Wharf it is 30 m. The depth alongside the General Cargo Wharf is 10.5 m. and alongside the Bulk Cargo Wharf it is 13.5 m.

CRANES: 1 Gottwald mobile crane with 100 tonnes lifting capacity and 2 mobile cranes with 30 tonnes lifting capacity at 10 m. radius.

STEVEDORES: Stevedores and cargo handlers are obtainable from the Port Authority Traffic Department.

TANKERS: There is a Petroleum Jetty which could accommodate vessels of 30,000 d.w.t. With the present depth of 9.0 m. it can only accommodate vessel of 10,000 d.w.t. However, the area can be dredged further to accommodate 30,000 d.w.t. vessels.

Also see "Bintulu Terminal".

DENSITY: Average 1009 – 1025.

FRESH WATER: Available at berth. No limitation as to vessel's requirement. Rate approximately 35 – 40 tonnes per hour.

FUEL: High speed diesel available. Price varies from time to time. The supply is by bunker barge and tank trucks at all berths. Other fuel as well as marine lubricants can be obtained through suppliers.

REPAIRS: Deck and engine not attended. Minor repair facilities exist.

SURVEYORS: Kinabalu Adjusters and Surveyors Sdn. Bhd., Mr. Mathews G. Ingan. Tel. 086-34620. Kinabalu Adjusters and Surveyors Sdn Bhd., includes insurance for cargo and cargo claims, etc.

Class survey – available by special arrangement.

GANGWAY/DECK WATCHMEN: Usually ship's crew and ship's gangway.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.

CUSTOMS ALLOWANCES:

25 sticks cigarettes per day per man.
1 quart beer/stout/wine per day per man.
One-eighth quart spirit per day per man.
8 sticks cigars per day per man.
1 oz. tobacco per day per man.

CARGO GEAR: Cargo gear is available for loading/discharging, etc., for heavy lifts up to 100 tonnes.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Distance 20 km., served by Malaysian Airline System (MAS).

TIME: Local time is GMT plus 8 hours.

HOLIDAYS:

(a) First Day of Chinese New Year.
(b) First Day of Hari Gawai (1st June).
(c) First Day of Hari Raya Puasa.
(d) National Day (31st August).
(e) Christmas (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Connecting points available at berth.

BANKS:

1. Bank Bumiputra Malaysia Bhd., Bangunan BDA, Bintulu. Tel: 086-31320.
2. Bank Utama Malaysia Bhd., Jln. Sommerville, Bintulu. Tel: 086-31133.
3. Hock Hua Bank Bhd., 23 Jln. Sommerville, Bintulu. Tel: 086-31433.
4. Malayan Banking Bhd., 24 Jln. Abang Galau, Bintulu. Tel: 086-31635.
5. Standard Chartered, 89 Jln. Keppel, Bintulu. Tel: 086-31272.
6. Malayan United Bank Bhd., 186 Taman Sri Dagang, Bintulu. Tel: 086-32393.

DELAYS: Vessels generally berth on a "first come first served" basis, irrespective of day or night. No delays experienced so far at Bintulu Port.

SHIP SUPPLY SERVICE: Pau Chiong Tai is the local ship chandler. Prices are reasonable.

SHORE LEAVE: Shore leave is normally allowed up to 1800 hrs., according to Immigration bye-law.

GENERAL: The port is an "all weather port" and the most modern port in Sarawak. When a vessel is within the port limits, extra precautions must be taken to avoid oil spillages, etc.

When vessel is lying at berth no rubbish should be thrown overboard.

The Port Safety Officer will board vessel, under normal circumstances, to inspect the ship prior to loading.

Preventive measures must be taken to avoid the risk of fire whilst at Bintulu Port Authority's wharf.

AUTHORITY: Bintulu Port Authority, P.O. Box 296, 97007 Bintulu, Sarawak, Malaysia. *Tel:* 51001/5 (5 lines). *Telex:* Biport Ma 73179. *FAX:* 086-52929. *Contact:* En. Ramli Abu Samah, General Manager.

BINTULU TERMINAL: 03.16 N. 113.04 E. (See Plan)

LOCATION: The single buoy mooring is positioned at Lat. 3° 20′ N., Long. 113° 01′ E. and can accommodate tankers with max. SDWT of 320,000 tonnes.

DOCUMENTS:

Last Port Clearance.
9 Crew Lists
3 Malaysia Crew Lists (Provided on arrival).
2 Copies General Stores Lists.
1 Shipping Arrival Report (Provided on arrival).
1 Application for Clearance (Provided on arrival).
5 Passenger Lists.
3 Narcotics Lists.
3 Arms and Ammunitions Lists.
2 Crew Personal Declaration Lists.
2 Vaccination Lists.
3 Copies Inward Manifest ("Nil" Manifest required).
International Maritime Health Form, provided by Agent.

Note: If vessel from an infected port of which the state of health is suspect, the Medical Officer may board in order to inspect crew and relevant international medical certificates.

PILOTAGE: Bintulu Port Authority Pilot, Loading Master, assistant and surveyors board at pilot boarding and disembarking position Lat. 03° 22.0′ N., Long. 112° 58′ E. Derrick to be rigged on starboard side prior to arrival. The regulation pilot ladder should be rigged well aft on the lee side. Prior to moving to berth mooring equipment is loaded onto vessel's forecastle.

Loading Master and about 4 shore personnel including Agent remain on board during loading operations.

ANCHORAGES: A petroleum anchorage bounded by the following co-ordinates has been established:

Lat. 03° 24.4′ N., Long. 112° 57.3′ E. Thence to position
Lat. 03° 21.3′ N., Long. 112° 59.6′ E. Thence to position
Lat. 03° 22.0′ N., Long. 113° 02.4′ E. Thence to position
Lat. 03° 26.0′ N., Long. 113° 01.2′ E. Thence along the limits of the port to position Lat. 03° 24.4′ N., Long. 112° 57.3′ E.

Use of ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

RESTRICTIONS: Berthing/unberthing is carried out night and day.

MAX. SIZE: The minimum water depth in the manoeuvring area is 62 ft. and the max. permissible draft 52 ft. Max. distance bow to centre manifold 590 ft.

DEPARTURE ROUTE: For deep draft vessels the following departure routes (approaching – opposite course) are recommended:

North-West Route:

From SBM steer 304° to position: Lat. 3° 51′ N., Long. 112° 14′ E.

Along this route 2 navigational light buoys have been laid both South Cardinal:

1. Parsons Shoal (Beting Tugau) position: Lat. 3° 52′ 22″ N., Long. 112° 16′ 06″ E.
2. South Acis Shoal (Beting Likau) position: Lat. 3° 35′ 50″ N., Long. 112° 39′ 36″ E.

North-East Route:

From SBM steer 015° to position: Lat. 3° 35′ 25″ N., Long. 113° 05′ 25″ E., which is marked by East Cardinal light buoy (Beting Nabau).

Onward course 042° to position: Lat. 3° 52′ N., Long. 113° 20′ E.

The N.N.E.'ly tip of the Cochrane Bank is marked by an East Cardinal light buoy (Permating Payong) in position: Lat. 3° 51′ 38″ N., Long. 113° 18′ 06″ E.

A 36 in. gas trunk line has been laid to the North and East of the SBM.

HEALTH: See "Documents".

RADIO: Vessels are required to advise SSB/Respective Agents of their ETAs 72 hours and again 36 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Bintulu Terminal on VHF Channel 18.

W/T traffic should be passed through Singapore Radio, Kuching or Miri Radio.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM. Please advise.

AAA ETA and draft at Bintulu SBM.
BBB Customs and Health requirements.
CCC Is vessel equipped with bow chain stopper, Smit Brackets and large central Panama Chock. (This information required from unknown vessels only.)
DDD Are manifold connections as per OCIMF specifications.
EEE Rig starboard derrick to maximum SWL (minimum acceptable 7 tons).
FFF Have 2×16 in. diameter manifold connections ready on starboard side.
GGG Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA Based on your ETA . . . present intention is to berth you on arrival.
BBB Pilot will board at the boarding area of 2 miles diameter in the following position: Lat. 03° 22′ N., Long. 112° 58′ E.
CCC Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival at Bintulu Terminal on VHF Channel 18 or 16.
DDD Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE After having established radio contact on VHF you will receive further instructions.

VHF: Bintulu Port Control operates on VHF Channels 12, 14 and 16 and Bintulu Terminal on Channel 18, ships should inform Bintulu Port Control on Channel 12 and Bintulu Terminal on Channel 18 of their ETA at least 3 hours before arrival at pilot boarding point or as soon as VHF contact can be established. Bintulu Port Authority requires every vessel whilst underway within port limits and in the approaches thereto to maintain continuous watch on Channel 12.

TUGS: Tugs available. The Port Authorities make it compulsory for tankers to use a tug for berthing/unberthing.

BERTHING:

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×12 in. × 150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotating Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 150 ft.

(ii) 10 in. circumference polypropylene pick-up rope with spliced eyes of 2 ft. on each side. Length 45 ft.

(iii) Pick-up support buoy.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connection and remains at the vessel until the completion of loading.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least 1 hour early to check and make sure that the hoses are not fouled. The mooring craft proceeds to the vessel to disembark the Berthing Master and offload the mooring gear.

During the approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range the vessel's bow is approximately 115 m. from the SBM i.e. 70 m. to go to the final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (marker buoy just outboard of the fairlead). The special shackle on the nylon snotter is then connected to the triangle plate or alternatively the chain is secured in the bow stopper and the inner mooring is then fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle and mooring is carried out by ship's crew.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

LOADING:

Cargo Loading Operation: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Hoses: 2×16 in. diameter floating hose strings of 810 ft., in length are connected to the turntable. The strings terminate in a 16 in. diameter rail hose for direct connection to the tankers starboard manifold. The last 3 units of the 16 in. diameter tail hoses are electrically discontinuous, such that stray currents from the crude carriers are not carried on to the buoy.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker' manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Bintulu Crude is loaded at Bintulu Terminal. The quantities loaded are checked by the terminal at frequent intervals and vessels are requested to verify the shore figures.

The terminal is capable of giving maximum loading rates of up to 7,000 cu.m.p.hr. and a maximum back presssure at 120 p.s.i. at the terminal end. The Berthing Master also acts as Loading Master and as the terminal's representative he will attend to all cargo formalities (SSB Forms, Safety Check List, etc.).

Prior to and during loading operations the following procedure will apply:

(a) A joint inspection is carried out by ship and terminal representative to ensure all requirements on the Safety Check List have been complied with.
(b) The methods of communication between ship and shore are clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactory.
(c) Ship and shore to confirm readiness to start cargo loading operations.
(d) Commencement of loading to be at slow rate.
(e) Lines and hoses are checked and faults rectified. Launch to patrol around vessel to check for oil leakages into the sea.
(f) When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
(g) Lines, hoses and the water around the vessel are again checked.
(h) Ship and shore figures are to be compared every 3 hours and discrepancies investigated.
(i) At least 15 minutes notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Suspension of Loading Operation: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

BALLAST: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

DENSITY: Varies between 1020 and 1025.

FRESH WATER: Can be supplied by water boat.

FUEL: Not available.

REPAIRS: No facilities available.

TIME: GMT plus 8 hours.

GENERAL:

Weather: All the SBMs concerned are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into 3 and the terminology used is consistant with that of South East Asia. These 3 types are:

(1) S.W. Monsoon (June-October).
(2) N.E. Monsoon (December-March).
(3) Transitions between the Monsoons.

Persistant bad weather occurs during the N.E. Monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. Monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

AGENT: See "Sibu".

DULANG

KERTEH TERMINAL: 04.34 N. 103.28 E. (See Plan)

PORT LIMITS: The port area is enclosed between Latitudes 4° 30′ N. and 4° 37′ N. and between Longitudes 103° 26.8′ E. and 103° 33′ E.

LOCATION: The Kerteh Port Marine Terminal is situated off the East Coast of Peninsular Malaysia in the South China Sea approximately 13 miles South of Kuala Dungun.

The marine facilities consist of 3 single buoy moorings located in a 20 square mile Restricted Area which extends about 5 miles from the coast.

One CALM operated by Petronas Penapisan (Terengganu) Sdn. Bhd. (PP(T)SB), suitable for vessels ranging from 15,000 d.w.t. – 35,000 d.w.t. or partially loaded vessels ranging from 15,000 d.w.t. – 35,000 d.w.t. or partially loaded vessels up to 85,000 d.w.t. (limited by loaded draft of 11.1 m.) is used for loading refined products from the Petronas Refinery.

Two SALMs, operated by Esso Production Malaysia Inc. (EPMI) are used for loading crude oil from the Terengganu Crude Oil Terminal (TCOT).

DOCUMENTS: Masters are required to prepare documents prior to arrival in port such as:

Last Port Clearance.
Ship's Certificate.
Manifests (List of Cargo onboard).
12 Crew Lists.
2 Stores Lists.
2 Personal Effects Lists.
2 Lists of Narcotics.
1 Vaccination List.
1 List of Arms/Ammunition.

Boarding and Duty Personnel: Tankers will be boarded, normally on arrival, by Mooring Masters, Loading Operators, Customs, Agents, Surveyors and Petronas Representatives. They will usually stay onboard till the vessel's departure and should be provided with meals and suitable accommodation. However, alcoholic beverages should not be offered to shore personnel, nor should vessel's personnel consume alcoholic drink during the vessel's stay at the terminal. A very serious view is taken of the matter which is an important aspect of vessel and terminal safety.

PREPARATIONS: Vessels should prior to arrival prepare:

(a) *Pilot Ladder:* Safely and securely rigged a combination of pilot ladder with 2 side ropes and ship's accommodation gangway, so arranged that personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder. Vessels with less than 15 ft. freeboard need only rig the pilot ladder with 2 side ropes. Air operated pilot hoists are not acceptable. A light heaving line should be ready to take the Mooring Masters' and Loading Operators' equipment onboard.

(b) *Derricks:* Derrick to be rigged on port side.

(c) *Bow Arrangements:* Vessels should be prepared to be moored to the SPM's, with pick-up ropes, Smit Brackets, chain stoppers or wire snotters on the bow.

(d) *Reducers:* The port side manifold is to be prepared for either 12 in. (PP(T)SB) or 16 in. (TCOT) hoses.

PILOTAGE: Two Mooring Masters normally board tankers at pilot station from a launch or tug. During the N.E. monsoon period (November-March) vessels may be requested to pick-up personnel at a position off Tanjong Berhala about 20 miles S.E. of the terminal area.

Masters should ensure that the Malaysian Flag together with the appropriate International signals are displayed for a vessel approaching port.

NAVIGATION: *Charts:* U.S. 71024, B.A. 770, B.A. 1374, B.A. 2660 (a), B.A. 2414, B.A. 3543 and Mal 6441 (Kerteh Port approach chart. Published by the Royal Malaysian Navy).

Approaches: Approaching the anchorage area from the N.E. – S.E. quadrant, there are no outlying dangers.

Pulau Tenggol, a steep-to 900 ft. high island, situated 20 miles N.E. of the terminal area, and Bukit Labohan, a 1,200 ft. high hill just South of the terminal, are excellent radar targets, easily identified.

The Kerteh Port Marine Control is equipped with a radar-based vessel tracking and traffic management computer system, and will advise vessels when VHF contact has been established.

CAUTION:

(i) Beware of the presence of fishing craft as normally they do not show any lights at night.
(ii) The refinery flare and gas plant flare are visible at a great distance, but should not be relied upon for position fixing purposes as they may not be burning at all times.
(iii) Vessels should give all structures and working vessels a wide berth and not approach closer than 2 miles.

Restricted Area: The Restricted Area is bounded by imaginary lines connecting the following points:

1. Lat. 4° 34′ N., Long. 103° 28′ E.
2. Lat. 4° 37′ N., Long. 103° 31′ E.
3. Lat. 4° 32′ N., Long. 103° 33′ E.
4. Lat. 4° 33′ N., Long. 103° 28′ E.

Vessels should under no circumstances enter the Restricted Area without the service of the Mooring Master.

NAVIGATION AIDS: In addition to the navigational aids noted on the Navigation Charts, the following Navigational Lights and buoys are placed:

1. Kerteh Port Sea Buoy:

Position	Lat. 4° 32′ N., Long. 103° 34′ E.
Shape	Pillar
Colour	Red and white vertical stripe
Light Characteristic	Fl. (W) every 10 secs.
Visibility	8 nautical miles
Radar Reflector	8 nautical miles

2. Paton Bank Buoy:

Position	Lat. 4° 32′ 41″ N., Long. 103° 31′ 27″ E.
Shape	Can
Colour	Red
Light Characteristic	Fl. (R) 5 secs.
Visibility	8 nautical miles
Radar Reflector	8 nautical miles

3. Tg. Labohan Light:

Position	Lat. 4° 31′ 18″ N., Long. 103° 28′ 18″ E.
Characteristic	Fl. (W) 4 secs.
Visibility	15 nautical miles

4. Danger Line Buoys:

These buoys are 1,000 m. apart and indicate the 15 m. (50 ft.) Admiralty Chart Datum line.

Shape	Pillar
Colour	Yellow
Light Characteristic	N1 – Fl. Y 4 secs. N2 – Gp. Fl. Y (3) – 5 secs. N3 – Gp. Fl. Y (4) – 10 secs.
Visibility	2 nautical miles

Positions as follows:

B-4 Danger Buoy N1	Lat. 4° 33′ 33.7″ N., Long. 103° 28′ 46.7″ E.
B-3 Danger Buoy N2	Lat. 4° 34′ 06.5″ N., Long. 103° 28′ 38.3″ E.
B-2 Danger Buoy N3	Lat. 4° 34′ 35.9″ N., Long. 103° 28′ 29.1″ E.

5. Refinery SBM:

Position	Lat. 4° 34′ 32.2″ N., Long. 103° 29′ 02.1″ E.
Colour	Orange with white superstructure.
Light Characteristic	White, Fl. Letter U (· · –) every 15 secs.
Visibility	2 nautical miles

6. SALM No. 1:

Position	Lat. 4° 34′ 21.9″ N., Long. 103° 30′ 18.1″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Fl. Letter U (· · –) every 7.5 secs.
Visibility	2 nautical miles

7. SALM No. 2:

Position	Lat. 4° 33′ 26.5″ N., Long. 103° 30′ 45.4″ E.
Colour	Yellow with black vertical stripes
Light Characteristic	White, Fl. Letter U (· · –) every 15 secs.
Visibility	2 nautical miles

The above buoys with the exception of the SBM and SALM's are subject to shift position and should not be relied upon for navigational purposes.

When approaching the Terminal, Kerteh Port Marine Control will advise if the above buoys are in position.

ANCHORAGE: The Anchorage area is 4 miles square bounded by Lat. 4° 30.0′ N. and Lat. 4° 32′ N., and Long. 103° 32.0′ E. and Long. 103° 34.0′ E.

Vessels are strictly prohibited to anchor in any position, whether inside or outside the Restricted Area other than in the designated Anchorage Area. Crude and gas pipe-lines and a telephone cable are laid in the vicinity and are not shown on all charts.

During severe weather conditions it is not advisable to anchor as holding ground is poor and vessel should slowly steam 5 to 10 miles off the coast, and remain within VHF radio range.

In the event VHF radio contact cannot be established, Masters are advised not to anchor but keep to seaward of the Anchorage Area and the Restricted Zone. Contact will then be made by the Terminal's Support Craft.

ACCEPTANCE CRITERIA:

PP(T)SB: (Product).

I-*SPM Limitations:*

- (i) SPM is designed to handle vessels of 15,000 to 35,000 d.w.t. However, partially loaded vessels up to 85,000 d.w.t. can also be accommodated up to a maximum draft of 11.1 m.
- (ii) SPM is equipped with 2 mooring hawsers fitted with 2 in. diameter chafing chains which requires Panama leads with minimum diameter of 16 in. Bollards with snotter wires and bow shackles (See III-(x)) can be used as an alternative to secure the chafing chains.
- (iii) Maximum loading rate of 20,000 bbls.p.h.
- (iv) Minimum flow rate of 3,100 bbls.p.h. is acceptable for initial loading and topping-off operations. The operation at this flow rate should not exceed 15 minutes.
- (v) Maximum loading temperature 75°C.
- (vi) Maximum allowable working pressure of hoses 225 p.s.i. (15.8 kg./sq.cm.).
- (vii) Weather Limitation: Vessels to stop loading when wind speed reaches 22 knots. When wind speed reaches 36 knots and 10 ft. swell, vessel to disconnect hose and be ready to vacate berth. However, final decision to vacate the berth lies with the Mooring Master at the scene.

II-*Port Limitation Ex-Kerteh Refinery-Safe-Dimensions of Vessel:*

	Vessel Data	
	Min.	*Max.*
Size	15,000 d.w.t.	85,000 d.w.t.
Length	163 m.	265 m.
Width	20 m.	38 m.
Loaded Draft	8.8 m.	11.1 m.

III-*Tanker Requirements:*

- (i) The tanker must be able to handle the hose rigging on the port side and must be able to lift and swing safely 5 ton over and above the ship's rail. Hose has to be lifted to a height of 15 ft. – 20 ft. above ship's rail.
- (ii) The tanker must have sufficient clear deck area adjacent to the cargo manifold. Distance from manifold to ship's rail should be a minimum of 12 ft. Free area around centreline of manifold must be 36 in. as the end of the rail hose near the loading flange has a 30 in. diameter.
- (iii) Tanker must have 12 in., 150 p.s.i. ASA (or ANSI) manifold flange connection on port side to fit on a 12 in. Camlock coupling loading/discharge hose.
- (iv) Tanker must have sufficient chain falls and rigging gear to secure the loading hose.
- (v) Product tankers must be able to receive water plug of 300 bbls. in a segregated tank or clean slop tank prior to commencement of loading. The water plug to be pumped back on completion of the loading.
- (vi) On arrival all tankers must have adequate segregated or clean or permament ballast for safe manoeuvring at all times (i.e. Propeller, must be adequately submerged without excessive trim).
- (vii) Refinery cannot receive slop or oily ballast.
- (viii) Minimum 10 ton capacity port side derrick required.
- (ix) Tanker's crew are responsible for mooring, hose connection and unmooring.
- (x) Mooring of product tankers at Kerteh SPM: (PPTSB)

  All product carriers proposing to use the SPM facilities at Kerteh or other SPMs, should have available onboard in case of requirement the following:

  2×12 m.×54 mm. dia. (for tankers up to 40,000 d.w.t.) or 2×12 m.×64 mm. dia. (for tankers above 40,000 d.w.t.) wire rope bridles (fibre core) with a thimbled eye at one end and a soft eye on the other end.

  2×50 ton safe working load bow shackles.

  2×100 m.×30 mm. messenger lines.

The Loading Operator, who is responsible for the loading operations, will inspect the ship on arrival to ensure the ship's compliance to Kerteh Terminal's requirements for final acceptance.

Note: There are no ballast receiving facilities and ballast pumped overboard must be absolutely clean.

TCOT: (Crude)

Tankers between 40,000 and 250,000 d.w.t. can be accepted at the TCOT SALMs provided they:

1. Re: Mooring equipment, etc. comply with "Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings", published by OCIMF 1978, particularly Section 6.1 to 6.5. i.e. in brief:
   - (i) Tankers of under 100,000 d.w.t. to have bow mooring arrangement suitable for connecting a single 54 mm. (2.125 in.) chain.
   - (ii) Tankers between 100,000 and 150,000 d.w.t. to have bow mooring arrangements for connecting a single 76 mm. (3 in.) chain.
   - (iii) Tankers over 150,000 d.w.t. to have bow mooring arrangement for connecting 2×76 mm. (3 in.) chains.
   - (iv) Bow fairleads for 54 mm. chain to measure at least 400 mm. (16 in.) in diameter, and bow fairleads for 76 mm. (3 in.) chain to measure at least 600 mm.×450 mm.
   - (v) All tankers to have bitts, bollards, bow stoppers of minimum SWL:

Under 100,000 d.w.t.:	1×100 tonnes.
100,000 – 140,000 d.w.t.:	1×200 tonnes.
Over 150,000 d.w.t.:	2×200 tonnes.

     with adequate forward winch heaving capacity for heaving up corresponding chain system with buoy.

     Note: It is recommended that all tankers calling at this terminal be fitted with approved bow stoppers for safe and efficient mooring and unmooring operations.
   - (vi) Tankers with one bow stopper to prepare one self-stowing drum and tankers with 2 bow stoppers to prepare 2 self-stowing drums to accommodate 1 or 2 × 150 m. (10 in. circumference) pick-up ropes.

     Note: Warping drum not to be used to heave up chain system on board to prevent backlash.
2. Have 1×16 in. standard ANSI-B 16.5, BS 1560 Series 150 or equivalent flange ready at port side manifold, with bitts, straps, tuggers, etc. ready for connecting 1×16 in. over-the-rail hose to the manifold. The connecting 16 in. manifold flange shall be fitted to a spool piece of minimum length 200 mm. to allow sufficient space to connect the camlock coupling of the hose end. Port side manifold arrangement to comply with OCIMF "Standard for Oil Tanker Manifolds and Associated Equipment" – page 17.

   SWL of port side derrick to comply with ISGOTT (Appendix C.10.2 weight of hose strings) for single buoy moorings i.e.:

   Minimum SWL 10 tonnes for port side derrick is required.
3. Maximum vessel loaded draft at SALM-1 is 17.4 m. (57 ft.).

   Maximum vessel loaded draft at SALM-2 is 20.4 m. (67 ft.).
4. Have on arrival adequate clean or segregated ballast for safe manoeuvring and be able to limit freeboard by loading crude and discharge segregated/clean ballast simultaneously.

During the N.E. monsoon season (November-March), vessels must arrive with forward draft not less than 5.50 m., adequate ballast or cargo onboard to have propeller covered and with no more than 6 ft. trim by the stern. Vessels with only CBT system on board must be able to retain ballast or to load and discharge simultaneously without any risk of pollution or cargo contamination.

NOTE: There are no ballast receiving facilities and ballast pumped overboard must be absolutely clean.

HEALTH: Radio Pratique should be requested through a local shipping Agent.

RADIO: All radio traffic to be channelled through Singapore Radio. Vessels to maintain radio watch on the same station.

- (a) Cables for Petronas to be addressed to PP(T)SB, Kerteh. Telex: Petref MA 51326 and copy to "International Marketing, Petronas", Kuala Lumpur. Telex: Petron MA 30032 or MA 30696.
- (b) Cables for EPMI to be addressed to TCOT, Kerteh. Telex: MA 51384 with copies to Essosupply Kuala Lumpur MA 30621.

Singapore Radio works on the following frequencies:–

Call Sign	*Transmit (kHz)*	*Receives (kHz)*	*Watch (GMT)*	*Remarks*
9VG4	2182	2182	0000–2400	Call, replay and safety
9VG87	4125	4125	0000–2400	
9VG88	6215.5	6215.5	0000–2400	
9VG89	8780	8257	0000–2400	Common calling frequencies
9VG90	13162.9	12392	0000–2400	
9VG91	17294.9	16522	0000–2400	
9VG5	2760	2527	0000–2400	Working frequencies for passing of radio telegrams
9VG60	4369.8	4075.4	0000–2400	
9VG63	8728.2	8204.3	0000–2400	
9VG67	13156.6	12385.8	0000–2400	
9VG52	2780	2685	On demand	Connection to telephone system
9VG61	4376	4081.6	On demand	
9VG62	6509.5	6203.1	On demand	
9VG64	8762.3	8238.1	On demand	
9VG65	8790.2	8266.3	On demand	
9VG66	13147.3	12376.5	On demand	
9VG68	17270.1	16497.2	On demand	
9VG69	17356.9	16584	On demand	
9VG70	22630.1	22934.1	On demand	

Traffic lists will be transmitted on the following listed frequencies, except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively.

Transmit (kHz)	*Receives (kHz)*	*Time (GMT)*
2760	2527	0005, 0405, 0805 and 1205
8728.2	8204.3	
2760	2527	1605
4369.8	4075.4	

Approximate geographical location of Singapore Radio Station is Lat. 01° 20′ N., Long. 103° 40′ E.

Notice of Arrival:

Upon departure from last port or immediately after having received instructions to proceed to Kerteh Port Marine Terminal, Master is requested to cable to either EPMI (if scheduled to load crude) or to PP(T)SB (if scheduled to load product) the following:

AAA	Vessel name, previous name (if any), call sign and flag.
BBB	ETA, date and local time (GMT + 8 hours).
CCC	Master's name.
DDD	G.r.t., n.r.t., d.w.t., s.d.w.t. and Light Displacement Tonnages.
EEE	Last discharge port and intermediate ports.
FFF	Next discharge port and intermediate ports.
GGG	Number of crew.
HHH	Number of passengers.
III	Grade and Quantity of cargo on arrival, previous cargo and cargo to be loaded at Kerteh Marine Terminal and loading rate per manifold.
JJJ	Whether previous cargo or any cargo on board has high H_2S contents and H_2S concentration in tank vapour spaces.
KKK	Malaysian light dues receipt number and date.
LLL	Arms on board.
MMM	Deballasting time prior loading if any or whether vessel is able to load and deballast simultaneously.
NNN	Arrival drafts.
OOO	Any leaks which could cause pollution or affect loading.
PPP	Pratique Granted: Place/Date. If any sickness on board or of clean bill of health.
QQQ	Confirm inert gas system operational and whether all cargo tanks in inert atmosphere on arrival.

All vessels loading at Kerteh Port Marine Terminal for the first time are to include the following *additional* information:

RRR Length overall and bow to centre of manifold distance.
SSS Size of port manifold flange and confirm that 2×12 in. (150 p.s.i.) ASA flanges are available for product tankers on port side manifold or confirm that 1×16 in. 150 ASA flange is available for crude tankers on port side and able to connect camlock couplings.
TTT Confirm that combination of gangway and pilot ladder ready on arrival. Only pilot ladder is required if freeboard is less than 15 ft.
UUU If loading products, is vessel fitted with 2-valve separation for parcels?
VVV Is vessel fitted with segregated ballast tanks?
WWW Is vessel diesel or turbine powered?
YYY Confirm that vessel can moor to an SPM and indicate what bow connection equipment is available. (See "Berthing").
ZZZ What is SWL of port side derricks for hose hoisting.

Updated ETA to be reconfirmed 72, 48, 24 and 12 hours prior arrival.

VHF: When within range, vessels should contact Kerteh Port Marine Control initially on Channel 16 for berthing instructions and assignment of working channel.

Working Channels are: 9, 18, 21, 69 and 73.

The language of the Terminal is *English*.

Arrival Procedures: Masters should endeavour to establish contact with Kerteh Marine Control as soon as they are within VHF radio range.

Instructions thereafter will be given for further approach procedures.

RADAR: Marine control tower has radar.

TUGS: A tug and mooring launch will be in attendance during mooring operation.

SBM: One tug of 2,600 h.p. and 2 launches.

SALMs: Two tugs, 3,500 h.p. and 800 h.p.

Note: Tugs are time chartered to suit size of tankers.

BERTHING: *Petronas Penapisan (Terengganu) Sendirian Berhad (PP(T)SB) SPM:* The Catenary Anchor Leg Mooring (CALM) is located in 60 ft. of water in position Lat. 04° 34.5′ N., Long. 103° 29′ E. It is designated for 85,000 d.w.t. tankers on restricted draft. The SBM is fitted with 2 mooring hawsers and 2 strings of loading hoses, one for loading black oil and one for loading clean products.

CAUTION: The SBM is only a distance of 1 nautical mile from the beach. The bottom shelves from the SPM for a distance of approximately 5 cables (900 m.) to a Danger Line of 3 buoys in 50 ft. A.C.D. of water.

When the SBM is at maximum excursion, i.e. 2 mooring chains tight on the weather side, no vessels, such as tugs or standby boats, can approach this SBM closer than 50 ft. Otherwise, they will foul the anchor chain.

Therefore the terminal insists that vessel engines and crew are at all times on standby whilst moored to this SBM.

TCOT SALMs: SALM 1 is located in 85 ft. of water in position: Lat. 04° 34.4′ N., Long. 103° 30.3′ E. It is designed for fully loaded 140,000 d.w.t. tankers.

SALM 2 is located in 92 ft. of water in position: Lat. 04° 33.5′ N., Long. 103° 30.7′ E. It is designed for fully loaded 250,000 d.w.t. tankers with certain limitations.

Both SALMs are fitted with a single hawser system terminating in a 3 in. chafing chain. Vessels over 150,000 d.w.t. will be moored at SALM 2 and a second hawser, also terminating in a 3 in. (76 mm.) chain, will be fitted.

Berthing and Mooring: Prior to berthing the Mooring Master will discuss with the Master the berthing and mooring operations and ascertain that the vessel is fully manoeuverable. He will also inspect the vessel's ballast to ensure that only clean ballast is carried and its disposal overboard will be safely carried out simultaneously with the loading of cargo.

The second Mooring Master will discuss with the Officer on the bow the mooring operation and will via the Officer supervise the mooring operation performed by the vessel's crew.

After ensuring that the manoeuvring area is clear of other traffic and weather and sea conditions are suitable, the vessel will be manoeuvred for the approach to the mooring buoy. The heading of the vessel will normally be such that she will have the wind ahead but tidal effects may have to be taken into account. A tug of suitable power and a mooring launch will be in attendance. During the final approach, the mooring launch will pick up a messenger line from the vessel's bow and maintain station approximately 300 ft. ahead of the vessel. When the mooring launch reaches the end of the mooring system's pick-up line, the vessel's messenger line will be made fast and the vessel's crew will heave in the slack as the vessel moves closer to the mooring buoy.

When the pick-up line is on board the crew will commence heaving on this line the chafing chain is on board and secured.

The Refinery *SBM is fitted with 2×2 in. diameter chafing chains* which require *Panama Leads with a minimum diameter of 16 in.* It is the vessel's responsibility to ensure that the 2 chafing chains on the Refinery SBM are brought on board in equal lengths in order to share the load equally between the 2 mooring hawsers which are seperate and not mated or secured together in any way.

The crude oil *SALMs are fitted 1×3 in. diameter chafing chain,* which requires a Panama Lead with a minimum diameter of 16 in. Vessels greater than 150,000 d.w.t. will be berthed at SALM No. 2 and two chain mooring systems will be connected.

Chafing chains will be connected to or bow stoppers. An alternative connecting system will be used when vessels are not fitted with the connections mentioned above. Bollard with 6 m. long×64 mm. diameter snotter wire and bow shackles can be used as an alternative to secure the chafing chain.

HOSES: *Connection Hoses:* Once the vessel is moored, the floating hose(s) will be towed alongside and connected to the vessel's port manifold.

Connecting and disconnecting of hose(s) will be the responsibility of the vessel's crew.

While vessels are moored, it is imperative that a careful watch is maintained on the mooring systems and cargo hose.

Main engines should be kept on standby and should be ready for immediate use in the event the vessel starts to ride up on the mooring buoys.

On the Refinery SBM the floating hose strings are 12 in. ASA on the rail and have a total length each of 230 m. Camlock couplings are fitted.

On the crude SALMs 1 floating hose string terminates in 16 in. ASA flange on the rail and is fitted with butterfly valve – lock arrangements with camlock. (Also see "Radio" – SSS).

LOADING: *Loading Rate:* Prior to the commencement of loading operations, an agreed upon oil transfer plan must be established. This will include commencement, maximum and topping off loading rates and emergency stop procedures.

Maximum loading rate at the Refinery SBM will be approximately 20,000 bbls.p.h. through each hose and at the crude SALM, approximately 45,000 bbls.p.h. Vessels take maximum flow, with due regard to safety, in order to expedite turn around time. Care should be taken not to overload. Topping up rate for products is between 2,100 – 3,800 bbls.p.h.

Vessels with or without permanent ballast tanks should retain ballast onboard until the vessel has taken sufficient cargo to be manoeuvrable, after which simultaneous loading and deballasting operations could commence. Such practice improves turnaround time and keeps the windage area down to acceptable levels. Vessels with excessive deballasting time may incur considerable delay in berthing.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution. Both the Refinery and TCOT will automatically stop pumping when back pressure reaches 220 p.s.i.

Electrical Storms: Loading will be suspended when severe Electrical Storms are in the near vicinity to prevent the possibility of cargo gases igniting.

SAFETY/FIRE/POLLUTION:

General: A Ship/Shore Safety and Pollution Check List is used at the terminal and all operations closely follow recommendations in the International Safety Guide for Oil Tankers and Terminals.

Fire: In the event of fire onboard: Immediately stop loading, advise the Mooring/Loading Master onboard and prepare to disconnect hoses and evacuate the berth. A well-equipped tug is standing by and may assist under the Mooring Master's guidance. In case of VHF communications failure sound 10 short blasts on the ship's whistle.

Pollution: The terminal is located in an extremely pollution sensitive area, a short distance from high amenity beaches with a valuable and vulnerable marine life. It is therefore imperative that all pollution of the sea is avoided. Master will be held liable for all clean-up-costs and third party claims and Owners promptly advised in case of pollution.

Deballasting: Ballast water pumped overboard should not contain oil or mixture containing oil (a mixture with an oil content of 100 parts or more in 1 million parts of the mixture) in accordance with the Section 27(1) of the Environmental Quality (Amendment) Act, 1985 (See "Below") with regard to Malaysian waters and Section 10(1) of the Exclusive Economic Zone Act, 1984 (See "Below") with regard to the exclusive economic zone.

Vessels ballast tanks will be carefully inspected. Vessels with dirty or doubtful ballast water will not be accepted unless analysis of water samples for oil content show otherwise.

Oil Spills: Should an overflow or hose leak occur during loading; immediately advise shore to stop loading and retain oil onboard and clean-up or recover oil.

The stand-by tug is equipped with spill-booms, skimmers and oil spill dispersant spraying booms. However, spraying of chemicals should only be done as a last resort after clearance from the relevant Authorities has been obtained.

Garbage Disposal: Dumping of garbage overboard, of whatever kind, is strictly forbidden.

Appendix:

SECTION 10(1), EXCLUSIVE ECONOMIC ZONE ACT, 1984

If any oil, mixture containing oil or pollutant is discharged or escapes into the exclusive economic zone from any vessel, land-based source, installation, device or aircraft, from or through the atmosphere or by dumping:

(a) the Owner or Master of the vessel, if the discharge or escape is from a vessel;
(b) the Owner or occupier of the place on land, if the discharge or escape is from land;
(c) the Owner or person in charge of the installation or device, if the discharge or escape is from an installation or a device; or
(d) the Owner or Pilot of the aircraft, if the discharge or escape is from an aircraft,

shall each be guilty of an offence and shall be liable to a fine not exceeding 1,000,000 ringgit.

SECTION 27(1), ENVIRONMENTAL QUALITY (AMENDMENT) ACT, 1985

No person shall, unless licensed, discharge or spill any oil or mixture containing oil into Malaysian waters in contravention of the acceptable conditions specified under Section 21.

NOTES: (i) SECTION 21, ENVIRONMENTAL QUALITY ACT, 1974

The Minister, after consultation with the Council, may specify the acceptable conditions for the emission, discharge or deposit of wastes or the emission of noise into any area, segment or element of the environment and may set aside any area, segment or element of the environment within which the emission, discharge or deposit is prohibited or restricted.

(ii) SECTION 2, ENVIRONMENTAL QUALITY ACT, 1974

"Mixture containing oil" means a mixture with such oil content as may be specified by the Minister or, if such oil content is not specified, a mixture with an oil content of one hundred parts or more in one million parts of the mixture.

MEDICAL: No doctor or clinic available, however in emergencies, exceptions may be permitted for humanitarian reasons.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
REPAIRS: Not possible.

Note: Vessels are strictly prohibited to carry out hot work or repairs of any kind which could cause fire hazard *or* immobilise engine at the berth or within the port area except at the designated anchorage area, with the approval of Terminal Superintendent or Representative.

SURVEYORS: Trident Malaysia Sdn. Bhd., Straits Trading Building, Lebuh Pasar Besar, Kuala Lumpur. Tel: 03-926410. Telex: MA 39551.

Caleb Brett Malaysia Sdn. Bhd., Room 301, 3rd Floor, Bangunan Yayasan Selangor, Jln. Bukit Bintang, Kuala Lumpur. Telex: MA 30579.

CUSTOMS ALLOWANCES: Usual allowance for ports in Malaysia.
REPATRIATION: Not possible.
TIME: GMT plus 8 hours.
WEATHER: The seasonal weather patterns are broadly divided into three types and the terminology used is consistent with that of S.E. Asia. These three types are:

1. S.W. Monsoon (May to September): Winds are generally from the South or S.W. during this period and can reach gale force in local squalls.
2. N.E. Monsoon (November to March): Intermittent bad weather occurs during this monsoon and high sea and swell conditions can persist for extended periods.
3. Transition Periods (April and October): Winds are generally variable during the monsoon transition periods but may freshen in the late afternoon and early evening with the sea breeze effect. Occasionally, local gale force squalls may occur but these are generally of short duration.

CAUTION: The severe squalls often occur suddenly without warning. It is therefore important whether at anchor or moored that an alert deck watch is kept.

Refer to China Sea Pilot – Volume 1 for further meteorological information.

TIDES AND CURRENTS: *Currents:* The tides off Kerteh vary widely, with periods of only one HW and one LW each lunar day, there are also marked inequalities in times and heights of high and low waters.

The tides at Kerteh are on average 30 minutes earlier than the standard Port of Tanjung Gelang but there are wide variations.

The ocean currents off the Kerteh Coast are the result of the monsoon wind pattern, setting South during the N.E. Monsoon and North during the S.W. Monsoon. The average currents are:

January	1.0 knot	180°
April	0.5 knots	170°
July	1.0 knot	010°
October	0.5 knots	variable

Combination Tide and Current: The strength of the current is dependent on the strength of the monsoon wind and when winds are strong the current can increase to 2 knots or more.

Thus in the N.E. Monsoon the combination of current and flood tide can produce a South running stream of 3 knots or more, and with a very weak North running stream. The same occurs in reverse during the S.W. Monsoon.

CAUTION: When at anchor it should be noted that with the tidal streams and currents in "conjunction" they can exceed 3 knots in strong winds and as the holding ground is not good, it is important that a very careful check is kept on the ship's position at all times.

EMERGENCY CO-ORDINATING CENTRE: Contact Marine Control Tower on VHF Channel 16 or other assigned working Channels, 9, 69 and 73. Tel: 09-871 277 Control Room. Telex: MA 51384.
SHORE LEAVE: No shore leave.
GENERAL: *Language:* The language of the Terminal is English.
Mail: (a) Mail for tankers loading at PPTSB or Petronas cargoes at TCOT should be addressed to the ship's Agent.

(b) Mail for personnel on incoming crude tankers loading an Esso cargo may be sent to EPMI's Kuala Lumpur Office marked for the attention of the "TCOT Marine Superintendent" for transmission to the vessel when it arrives at Kerteh Port Marine Terminal.

Personnel: Only authorised personnel are permitted to board vessels while berthed.
Provisions: Not available.
Ballast: No dirty ballast or slop disposal.
Terminal: The Kerteh Port Marine Terminal is located off-shore and the only means of transportation available to the shore is by marine support craft to Tanjong Berhala Supply Base situated 24 miles to the S.E. As such, the terminal can offer no logistical support to the vessels calling at the Kerteh Port.

AGENT: See "Port Kelang".

KOTA KINABALU (including Sapangar Bay), Sabah: 05.59 N. 116.00 E. (See Plan)

PORT LIMITS: Gaya Bay and waters to the S.W. bounded by a line joining Tanjong Aru and the Northern point of Pulau Gaya thence a line to Gaya Head including rivers entering same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS:

Documents to be produced on arrival:
Port Clearance from Last port.
6 copies Inward Cargo Manifests.
2 copies Hatch List, *or* 1 copy Stowage Plan.
9 copies Crew Lists.
9 copies Passenger Lists.
2 copies Bonded Stores Lists (incl. Arms and Ammunition Lists).

In addition, the Master has to complete a Shipping Arrival Report Form and a Maritime Declaration of Health Form.

Notes: (a) If vessel arrives from any port outside those declared infected.

(b) These 2 copies (Inward Cargo Manifests) must be certified by the Master as follows: "I hereby certify that to the best of my knowledge and belief this manifest is complete and correct. . . . .Master".

To be Supplied to Ship before Departure:
1 set Agents Outward Manifests.
2 copies Passenger Lists for Immigration.*
1 copy Passenger Lists for Customs.*
1 set Manifests for Customs.*

*To be supplied by Agent.

If vessel departs to a port outside Sabah, 2 copies outward crew list are also required for Immigration.

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Not compulsory. Pilot normally available between 0600 hrs. and 1800 hrs. only. Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit. Marine Department Tel. 52213.

ANCHORAGES: (Also see "Health")
Special Anchorages and Prohibited Areas

(1) *Prohibited Anchorage:* No vessels shall anchor as to swing within 3,000 ft. of the F.R.G. Light on the N.N.E. end of the Authority Wharf in approx. position Lat. 05° 59′ 51″ N., Long. 116° 04′ 30″ E. Vessels under 150 ft. in length may anchor within this area, East of a line joining the F.R.G. Light and Gueritz Shoal Light Beacon.

(2) *Prohibited Area:* Except with the previous permission in writing of the Authority, no logs or timber shall be allowed to lie afloat within the area – Eastward of a line drawn in a 172° direction from Grieve Reef Beacon.

(3) *Explosives and Dangerous Goods Anchorage:* Vessels having explosives and Dangerous Goods on board shall anchor within a line drawn from a position in Lat. 06° 01′ 21″ N., Long. 116° 05′ 45″ E. thence in a 360° direction for 6.5 cables thence in a 270° direction for 10 cables thence in a 180° direction for 6.5 cables thence in a 090° direction for 10 cables to the starting point.

(4) *Dangerous Petroleum Anchorage:* A vessel having dangerous petroleum on board shall anchor within a line drawn from a position in Lat. 06° 00′ 42″ N., Long. 116° 05′ 45″ E. thence in a 270° direction for 10 cables thence in a 360° direction for 6.5 cables thence in a 090° direction for 10 cables thence in a 180° direction for 6.5 cables to the starting point.

(5) *Quarantine Anchorage:* A vessel which is required to proceed to a Quarantine Anchorage shall anchor within an area bounded by a radius of 3 cables from a position in Lat. 06° 01′ 34″ N., Long. 116° 03′ 46″ E.

RESTRICTIONS:

1. Entering. Vessels with dangerous cargo such as benzene are not allowed to stay alongside wharf or to berth after 1800 hrs. Vessels arriving from any port within hours of day-light not allowed to berth until they see the signals at the Customs House directing them. This applies equally to vessels arriving on schedule as well as unscheduled vessels and any infringement of these regulations can have very serious consequences.

Master of ship not sailing within 48 hours after port clearance to report to Harbour Master reason for not sailing, and, if so required obtain a fresh port clearance.

2. Shifting. The Authorities must be informed prior to shifting.

3. Immigration. No person may leave ship before clearance has been given by Customs/Immigration Officers.

4. Currency. No restriction on amount of currency which can be brought into this State but max. amount allowed to be taken out is MAL$100. Foreign exchange must be conducted through recognised banks.

MAX. SIZE: Max. size at general cargo berths is 20,000 d.w.t.

HEALTH: (Also see "Regulations"). *(a)* Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board unless vessel comes from infected port. Instead, Maritime Declaration of Health to be filled out and handed to Boarding Officer of Health Department who will require 1 copy of Crew List and 1 copy of Passenger List. Vessels should cable Agent prior arrival advising last port of call and whether vessel is healthy. Pratique normally cabled to ship but if unreceived, vessel need not proceed to Quarantine anchorage unless coming from infected port.

(b) Vessels arriving from ports outside the State will anchor until boarded by Authorities unless previously instructed by telegram to come alongside.

RADIO: Singapore Radio recommended. (Also see "Health"). Local radio call sign "Control K.K.".

Berthing Application: Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, amount of water, Pilot requirements. Vessels given berth on first come, first served basis.

Tankers: As much notice of arrival as possible is essential.

(a) If first port in Sabah and communication is difficult send message through Singapore Radio.

(b) If to be second or subsequent port in Sabah ensure that Agent/Installation Representative in the previous port gets an accurate ETA before vessel's departure so that this can be passed on by telephone.

VHF: Port Control on VHF Channels 12 and 16 (office hours only).

To reach the Agents directly during office hours contact 9WH26 on VHF Channel 26. The call charges will be reversed by 9WH26 which is an unofficial telecommunications VHF station.

TUGS: Tug 280 h.p. available to assist vessels berthing and unberthing without a Pilot at inner berth. Ship's lines used.

BERTHING:

Berth No.	*Berth Length* (m.)	(ft.)	*Depth* (m.)	*Capacity* d.w.t.
1	137	450	9.45	20,000
2	107	350	9.45	20,000
3	107	350	9.45	20,000
4	122	400	7.62	5,000
5	113	370	5.79	3,000
6	92	300	5.79	4,000
7	122	400	7.62	7,000
8	122	400	6.88	18,000
9	92	300	6.88	4,000
10	122	400	7.5	5,000
11	122	400	5.5 – 6.8	700
12	98	322	5.5 – 6.8	2,000

Note: The Old Wharf was closed to berthing and operations with effect from 31st December, 1987.

Ro-Ro: Facilities available at the Fast Erect Jetty.

CARGO: (Also see "Berthing".)

1. Tally: The Agent can provide tally clerks at ship's expense.

2. Inward cargo: Ship's responsibility ceases as soon as consignees take delivery ex-sling.

3. Transhipment cargo: Transhipment cargo handles via Port Authority Godown.

4. Outward cargo: All cargo is brought to the ship alongside wharf either by tractors and trailers.

5. Special cargo regulations:

(a) Dangerous Cargo: Vessels carrying explosives as cargo: All vessels arriving at, or remaining within the limits of, any port with explosives on board shall fly the gunpowder flag at the foremast.

No vessel having explosives on board shall, without the permission in writing of the Harbour Master, come or remain within 500 yards of the shore or any other vessel:

Provided that such a vessel may, with the written permission of the Harbour Master, come and remain within such limit where:

(i) such explosives are wholly and exclusively of Class V (Fulminate) or Class VI (Ammunition) or both such classes in the second schedule; and

(ii) the total quantity of such explosives does not exceed two thousand pounds; and

(iii) such explosives are carried in a properly constructed magazine duly certified as such by a British Board of Trade Surveyor or by an officer fulfilling similar functions appointed by a Government of any British possession or the vessel has a certificate from one of Her Majesty's Inspectors of Explosives or from an Officer fulfilling similar functions appointed by the Governments of Singapore, the Federation of Malaysia or Hong Kong and approved by the Governor that all the explosives on board such vessel have been properly stored and the Master of such vessel further certifies in writing that no other dangerous cargo is carried by the vessel; or where:

(iv) such explosives are wholly and exclusively explosives of one or any of Class III (Nitro-compound), Class IV (Chlorate mixture) or Class VII (Firework); and

(v) the total quantity of such explosives does not exceed three thousand pounds.

No such explosive shall be landed, shipped or transhipped between sunset and sunrise without the previous permission in writing of the Harbour Master. Any Master of a vessel offending against the provisions of this section shall be liable to a fine of MAL$1,000.

(b) Livestock: Pigs or cattle may not be loaded or discharged on any wharf without permission of the S.P.A.

CARGO HANDLING FACILITIES: *Cargo Handling Equipment:*

Equipment	*Manufacturer*	*No. of Unit*
Forklifts	Mitsubishi FD20	2
	Mitsubishi FD30	12
	Toyota 3FD30	56
	Komatsu FD30-8	8
	Toyota 3FD60	4
	Toyota FD190	2
	Toyota FD250	1
Towing Tractors	Chamberlain	8
	Toyota TD20	25
	Toyota 42-3TD20	6
Trailers (5,000 kg.)	Hargill (Volvo)	30
	T.S. Engineering	18
	Besi Asia Engineering	21
Trailers (20,000 kg.)	Hargill Malaysia	6
	Rumpun Hijau	2
Trailers (30,000 kg.)	Wagon Engineering	2

Pallets, Pallet Bridles, Wharf Net Slings, Car Slings and Lorry Sling are also available for hire.

Storage Facilities:

Godown 1: 6,693 sq.m.
Godown 2: 8,366 sq.m.
Godown 3: 4,648 sq.m.
Godown 4: 2,789 sq.m.
Godown 5: 2,882 sq.m.

Container Yard (bitumen)	9,880 sq.m.
Container Yard (Concrete)	9,250 sq.m.
Open Storage Area 1 (between bridges)	6,420 sq.m.
Open Storage Area 2 (opposite canteen)	6,770 sq.m.
Open Storage Area 3 (behind Godown 3)	6,330 sq.m.
Open Storage Area 4 (behind Godown 4)	2,700 sq.m.
Wharf Deck Storage Area (Northern extensions)	2,700 sq.m.
Ideal for sawn timber (7 days' free storage)	16,500 sq.m.

STEVEDORES: Stevedores provided by SPA; labour supplied for working in ships' holds and on ships' winches (if required). For cargo delivered direct ex-wharf consignee provides wharf labour; cargo for Sabah Ports Authority godown labour provided by Sabah Ports Authority.

Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 tons per gang hour for conventional traffic (excluding vehicles) and 40 tons per gang hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3×4 hour periods namely:

1st Period	0730 – 1130 hrs.
2nd Period	1300 – 1700 hrs.
3rd Period	1800 – 2200 hrs.

Work outside these hours is by prior application.

MEDICAL: Medical Officer of Health: Medical Services Department, Tel. 54303. Vaccination and inoculation (incl. Yellow Fever) can be arranged via Agent at any time during working days. In case of death on board, Agent and Harbour Master as well as the Police to be informed.

TANKERS: The port operates on a "first come-first served" basis in allocating the jetty but palletised vessels will get priority. Port Rules state that no other vessel allowed alongside when tanker discharging A-class products. As cargo vessels stop discharging at 2200 hrs., tankers are normally allowed to discharge A-class cargo until the following morning at 0600 hrs.

Berth is timber piled with concrete deck jetty, continuous 650 ft. by 40 ft. wide. Maximum displacement allowed – 13,000 tons. Maximum draft allowed – 22 ft.

Vessels berth either port or starboard side alongside according to the weather and tidal conditions prevailing at the time of berthing. Tankers berth on the outer side of the jetty only.

Fresh water available from wharf only. Vessels to provide hoses. Advance notice of requirements advisable. Rate 25 t.p.h.

Shore Line System:

(a) For Mogas, 1,440 ft.×8 in.

(b) For Jet A.1/Kerosene 1,450 ft.×8 in.

(c) For Gas oil/Light Fuel Oil, 1,380 ft.×8 in. hoses used to connect ship and shore.

(d) For Bitumen, 1260 ft.×8 in.

Sapangar Bay Oil Terminal: *Location:* 06° 05′ 10″ N., 116° 07′ 19″ E.

Pilotage: Pilotage at Sapangar Bay Oil Terminal is optional. Vessel's Master is advised to contact the Marine Department at Kota Kinabalu with any enquiries. Pilot boarding and anchorage position is at the Petroleum Anchorage at Lat. 06° 01′ 00″ N., Long. 116° 05′ 15″ E.

Navigational Aids: 5 channel markers with flashing lights are provided at Sapangar Bay. Three of the markers have red flashing lights and two have green flashing lights. The location of all the markers are as follows:

Marker No.	*Location*		*Light*
1	6° 4′ 39.5″ N.	116° 6′ 6″ E.	Red
2	6° 5′ 15″ N.	116° 6′ 46″ E.	Red
3	6° 5′ 30″ N.	116° 7′ 19″ E.	Red
4	6° 5′ 19″ N.	116° 7′ 34″ E.	Green
5	6° 4′ 39″ N.	116° 7′ 5.5″ E.	Green

Jetty Head: The jetty head/main berth is located at Lat. 06° 05′ 10″ N. and Long. 116° 7′ 19″ E.

Restrictions: Berthing and unberthing possible daily between 0600 hrs. and 1800 hrs.

Max. Size: 30,000 d.w.t. Max. draft 36 ft. Max. LOA 815 ft.

Radio/VHF: Radio/VHF facilities not available, terminal uses Kota Kinabalu Marine Tower facilities only.

Tugs: Tugs not available. Shipping Agents are required to contact Marine Department or private company.

Berthing: Length of jetty head 82.32 m. Depth alongside 12.2 m. Tidal rise 2.3 m.

Pipe-lines: There are a total of 8 common users' pipe-lines and 1 single user pipe-line between the jetty head and the individual user's boundaries.

Discharge pipe-line – common users	*Max. discharge rate*
10 in. dia. Gasolene (Premium and Regular)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Diesel (DE 1)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Jet A-1 (DPKE)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Domestic Kerosene (DKE)	500 t.p.h. at 150 p.s.i.g.
10 in. dia. Light Fuel Oil (LFO)	500 t.p.h. at 150 p.s.i.g.
3 in. dia. LPG (V)	500 cu.m.p.h. at 150 p.s.i.g.
6 in. dia. LPG (L)	500 cu.m.p.h. at 150 p.s.i.g.
Discharge pipe-line – Single users	
10 in. dia. Bitumen (B)	500 t.p.h. at 150 p.s.i.g.
Bunkering pipe-line – Common users	
6 in. dia. Diesel (DE 2)	200 t.p.h. at 150 p.s.i.g.

Bitumen and bunkers handled through hoses and all other products by marine loading arms.

Security: The Authority provides its own security personnel.

Fire Fighting Facilities: 2 Tower Fire Monitors are available at the Jetty Head which are capable of delivery of sea water or foam at 1,350 u.s.g.p.m. each. The monitors are hydraulic powered and electrically controlled remotely at the foam making plant about 150 ft. behind the jetty head.

Medical: Medical facilities only available at Menggatal town about 11 km. from Sapangar Bay.

Fresh Water: Fresh water is available at the jetty head at a pumping rate of about 50 tonnes per hour.

Slop Facilities: Not available.

Authority: Sapangar Bay Oil Terminal, Pejabat Pengurus Terminal, P.O.Box No. A/150, Teluk Sapangar, 89357 Inanam. Tel: (088) 411069, 411079, 411090. Telex: Saport MA80074. Contact: Terminal Manager.

DENSITY: Average 1020.

FRESH WATER: Can be supplied from wharf. Supply rate is 20 tons per hose per hour.

FUEL: Not available.

CONSULS: Denmark, Indonesia, Japan and United Kingdom.

REPAIRS: Some private firms and workshops undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: See "Labuan" and "Sandakan".

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ship's gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays but not for Hari Raya Puasa, Chinese New Year and Christmas Day. Also see "Sandakan".

POLICE/AMBULANCE/FIRE: Police/Fire, Tel: 088-54111. Hospital, Tel: 088-54911.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

TELEPHONES: Available.

SHORE LEAVE: Crew members allowed ashore after inspection by Immigration Officer.

IDENTIFICATION CARDS: Not required.

REGULATIONS: *(a)* Arrival and Departure:

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

(c) Priority. First come first served.

DELAYS: Due to weather conditions only.

GENERAL: Ship Chandlers: All kinds of stores and provisions available.

Recreation facilities. Two cinemas in town which show English films frequently. Three tennis courts available and football matches may be arranged. Sports Club is next to town Padang, about half a mile from wharf and golf and yacht clubs situated on beach at Tanjong Aru, 4 miles from town.

Surveyor: Harrisons & Crosfield (S) Ltd. are Lloyd's Sub-Agents and can arrange a surveyor provided prior warning is given.

Fumigation: No facilities.

AUTHORITY: Sabah Ports Authority, Head Office, P.O.Box 1430, SPA Headquarters Building, Kota Kinabalu, Sabah, Malaysia. *Tel:* Kota Kinabalu 56155, 55233, 52140. *Telex:* Saport MA 80074. *Contact:* General Manager.

Ship's Articles	–	–	Orig.	–	Orig.	–

Note: Numerals indicate number of copies.
'Orig.' indicates original
'R' indicates on request
'P.C.' indicates photocopy

Identification documents should be arranged in the same sequence as Crew List.

PILOTAGE: Pilotage is compulsory. Ships should advise their ETA at least 24 hours in advance by telegram or telex Portku Ma 50350, marked for the attention of Marine Manager. ETA Pilot Boarding Station (Tanjung Gelang Lt. Ho 305°×3.9 miles) is to be reported to Port Control by VHF Channels 12 or 16 at least 2 hours in advance.

Pilot boats are painted international orange with white superstructure and the word "Pilot" written in black letters. Ships awaiting Pilot should display international code flag signals and sound or flash "G", if specifically requested by the port. Adequate anchorage is available. Pilot Boarding Station: Lat. 03° 55′ 33″ N., Long. 103° 29′ 30″ E.

Ships are expected to come up to the Pilot Boarding Station for the Pilot, provide a good lee for the pilot boat and rig the pilot ladder, manrope and light (at night) in accordance with IMO requirements (SOLAS 1977) and to be clear of all discharges and outlets and all outboard fittings which might foul the pilot boat.

During very bad sea conditions small vessels may be requested to follow the pilot boat and to pick up the Pilot inside the enclosed harbour.

Arriving/Departing vessels are required to produce Port Clearance to the Pilot for verification.

APPROACH CHANNEL: A straight 220 m. wide channel aligned on 311°(T) leads from Pilot Boarding Station to Harbour Entrance. Length of this channel is 4.8 km. The dredged length (6.5 cables) is marked by 3 pairs of light buoys. Leading lights mark the centre line of the channel with minimum depth of 12.6 m. During N.E. monsoons underkeel clearance (allowance) of 3.5 m. is required.

The following navigational aids are available within the port approaches:

Designation	*Lat. (N.)*	*Long. (E.)*	*Light Characteristics*
Channel Buoys:			
No. 1	3° 57′ 02″	103° 27′ 57″	Fl. G. 5 secs.

No. 3	3° 57′ 26″	103° 27′ 29″	Gp.Fl. (2) G.10 secs.
No. 4	3° 57′ 03″	103° 27′ 36″	Gp.Fl. (2) R.10 secs.
North Breakwater Lt.	3° 58′ 11″	103° 26′ 37″	Gp.Fl. (4) G.Ev 12 secs.
South Breakwater Lt.	3° 58′ 05″	103° 26′ 25″	Gp.Fl. (4) R.Ev 12 secs.
Front Transit Lt.	3° 58′ 56″	103° 25′ 59″	Fl. Amber 4 secs.
Rear Transit Lt.	3° 58′ 57″	103° 25′ 36″	Fl. Amber 4 secs.
Tg. Gelang Lt. Ho.	3° 57′ 49″	103° 26′ 19″	Gp.Fl. (3)W. 10 secs.

Tidal streams: – During HW, direction is Southward and during LW, direction is Northward. Tidal range is 3.5 m. at springs.

ANCHORAGES: Reserved anchorages are available for ships carrying general cargo, explosives and petroleum products, suspect or unhealthy ships and men-of-war (B.A. Chart No. 1379). Pilotage is compulsory except for men-of-war. Drafts of up to 11.5 m. can be accommodated safely.

RESTRICTIONS: The port is open 24 hours but is subject to occasional restrictions due to weather or other similar constraints. Passage of ships drawing more than 11 m. is subject to tide.

MAX. SIZE: Max. LOA permissible 228 m.

		Restriction	
Berth	*LOA* (m.)	*Draft* (m.)	*Displacement* (tons)
Nos. 1 to 4	200	11.2	45,500
Palm Oil Berth (Outer)	180	11.5	54,400
Palm Oil Berth (Inner)	125	8.0	8,000
Mineral Oil Berth	125	8.0	8,000
Ro-Ro ramp (Berth No.4)	150	6.5	Liveload 360 tons

HEALTH: Healthy vessels are brought to berth. Suspect or infected vessels are taken to Quarantine Anchorage to await clearance from Port Health Authorities. Automatic health clearance is not granted.

RADIO: All communication must be routed through Penang Radio, which provides telegram, telex and telephone facilities.

VHF: 24 hour watch is maintained on VHF Channel 12 and 16 by the Port Control, additional operational channel is Channel 20.

At least 2 hours before arrival at pilot station, following particulars are to be conveyed by VHF: Name, official number, nationality, g.r.t., n.r.t., LOA, Summer d.w.t., deepest arrival draft and arrival displacement, quantity and commodity of cargo onboard and dangerous cargo, if any. Last port of call, last port clearance number and date, ETA pilot station and special berthing requirements, if any.

Ships sailing are required to confirm their readiness by displaying "Pilot Required" signals and VHF report to Port Control at least 2 hours in advance.

Tugs and pilot boats work on Channel 12 but can switch over to other channels if required.

TUGS: The port operates 2 tugs of 2,800 b.h.p. Ropes are used from the ship or the tug as demanded by situation. Tug operations on VHF Channel 20.

BERTHING: Total quay wall length is 725 m. divided into 4 berths numbered from seaward. Berth Nos. 1, 2 and 3 handle general cargoes of all types and are provided with transit sheds and apron width of 25 m. Berth No. 4 handles container and Ro-Ro cargoes.

Cranes are not provided at the berths. See "Equipment".

Quay bollards live load: 75 tons per bollard.

EQUIPMENT: The port has adequate numbers of forklifts, tractor heads, trailers for handling general cargo and a limited number of containers. 5 mobile cranes, 1×90 tons, 1×20 tons and 3×5 tons are available.

BULK CARGO FACILITIES: Bulk cargoes can be handled for direct delivery at any of the berths and conveyor system is likely to be provided in future.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 4 (length 225 m.) is designed for container handling and other cargoes requiring open storage with priority berthing for container carriers. A container handling crane is proposed in future. Ro-Ro ramp (stern ramp) is fitted at the end of Berth No. 4.

Ro-Ro cargoes can also be handled by vessels fitted with side ramps.

TANKERS: Palm Oil Berth (POB) and Mineral Oil Berth (MOB) handle bulk edible oils (250-300 t.p.h.) and petroleum products (200 t.p.h.) respectively. Loading hose diameters are 10 in. for crude palm oil, 8 in. for refined palm oil and 6 in. for petroleum products.

DENSITY: 1025.

FRESH WATER: Available at all berths at a rate of 25 t.p.h. Water barge supply not available.

FUEL: Vessels up to 177 m. length, subject to max. draft 9.0 m., can bunker at Mineral Oil Berth for diesel. Diesel can also be supplied through road tankers at all general cargo berths. Bunkering facilities for Heavy Fuel Oil are not available to date.

SURVEYORS: Caleb Brett maintain an office in Kuantan. Other surveyors may be contacted in Kuala Lumpur, Port Kelang or Singapore.

HATCHES: Mechanical hatch covers must be operated by ship's crew. Stevedores handle 'lift and place' type covers including beams, if any.

AIRPORT: Airport handling domestic flights is 41 km. (25 miles) from the port and international connections are available at Subang Airport, Kuala Lumpur and Singapore. It is also possible to drive to Subang Airport (5 hours) and Singapore Airport (7 hours). Taxis and buses operate at frequent intervals.

CUSTOMS ALLOWANCES: Cigarettes, tobacco, wine and liquor allowed by Customs per day as follows:

i) Spirits/Liquor – 0.125 qt. per person per day or;
Wine – 1 qt. per person per day or;
Beer/Stout – 1 qt. per person per day.
ii) 25 cigarettes per person per day or;
8 cigars per person per day or;
1 oz. tobacco per person per day or;
1 oz. snuff per person per day.

CARGO GEAR: Normal cargo handling gear is provided by stevedores but ships have to provide heavy lift and special cargo gear.

REPATRIATION: Facilities are available.

TIME: GMT plus 8 hours.

HOLIDAYS: Port is closed for Chinese New Year, Aid il Fitri, National Day (31st August), Deepavali and Christmas Day (25th December) – total 5 days. Overtime is payable for work on Sundays and public holidays. Vessels are handled during "Port Closed Days" on request.

POLICE/AMBULANCE/FIRE: Fire and ambulance assistance is provided by the Port Fire Department, telephone 433200 ext. 333, or 433282. Nearest Police Station is at Beserah, telephone number 587222.

TELEPHONES: Public telephone available in Port Area. International telephone calls possible at Telecom Office, Kuantan Town (25 km.).

BANKS: Bank Bumiputra Sdn. Bhd. operates a branch in Kuantan Port providing full banking facilities.

STORING: Ships' stores can be taken over the wharf. Lorries can go alongside except at dolphin berths where they have to park about 100 m. away. Forklifts are available. Shore gangs may be used with prior arrangement.

SHORE LEAVE: Ship's crew are permitted to land and are required to carry their passports.

REGULATIONS: No special regulations.

DELAYS: Average time from pilot station to berth is 1.5 hours. Minimal delay may be experienced in commencement of cargo loading due to Customs and Immigration formalities, normally 30 minutes.

GENERAL: *Signals:*

Significance	*By Day*	*By Night*
1. Immigration and Customs (for ships not carrying passengers)	International Code Signal "25"	Two all-round green lights, in vertical line, 2 m. apart seen all round the horizon at a distance of at least 3 km.
2. Immigration and Customs (for ships carrying passengers)	International Code Signal "34"	Two all-round green lights, in vertical line, 2 m. apart seen all round the horizon at a distance of at least 3 km.
3. Quarantine (vessel is healthy requests Pratique)	International Code Signal "Q"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
4. Quarantine (vessel requires health clearance)	International Code Signal "QQ"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
5. Quarantine (vessel is infected)	International Code Signal "QL"	Two all-round lights in a vertical line 2 m. apart, the top of which is red and the bottom white, seen all round the horizon at a distance of 3 km.
6. Request Police Assistance	CB 3	Two all-round lights in a vertical line 2 m. apart, the top light being red, and the lower light white, seen all round the horizon at a distance of at least 3 km.
7. Port is closed and vessel not allowed to enter the breakwater mouth	Answering Pennant	Two all-round lights in a vertical line 2 m. apart, the top of which is green and the bottom red, seen all round the horizon at a distance of 5 km.

Supplies: Small quantities of provisions are available in Kuantan Town. General stores can be arranged through Ship Chandlers/Agents. Bonded Stores are not available.

DEVELOPMENTS: Construction of 4 additional berths under Phase II development is expected to commence in 1990/1992.

AUTHORITY: Kuantan Port Authority, P.O. Box 161, 25720 Kuantan, Pahang, Malaysia. *Tel:* (09) 433200 (10 lines). *Telex:* Plara Ma 50234. *FAX:* 09-433866. *Contact:* Dato Tik Mustaffa, General Manager. Abdul Aziz Yaakub, Traffic Manager. Captain Ibrahim Lambay, Harbour Master.

AGENT: Pesaka Jardine Shipping Agencies East Coast Sdn. Bhd., Lot 4, Tingkat 3, Bangunan Perdagangan, Lembaga Pelabuhan Kuantan, 25720 Kuantan. Tel: (09) 433509. Telex: MA50363. Cables: "Jarship Kuantan".

Associated with Jardine Shipping Agencies.

KUCHING, Sarawak: 01.34 N. 110.21 E. (See Plan)

DOCUMENTS:

Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Kuching Port Authority, 3 copies for Customs, 1 copy for Port Health Officer.

List of Ship's Stores (2 copies for Customs).

List of Ammunition (3 copies for Customs).

Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

Manifests (3 sets for Customs, 5 sets for Kuching Port Authority, 1 set for Health Inspector).

Ship Stowage Plan (2 copies for port).

Customs: Permit to go alongside a legal landing place or an ocean-going vessel within the port limits is required by Customs 24 hours prior to berthing.

Certificates: Ship's should possess all relevant certificates on board in case required for reference.

PILOTAGE: Pilotage services are provided by the Marine Department. Application for pilots could be made by giving at least 24 hours' notice of arrival by telegram to "Shipping Kuching" or telex to MA 70933. Vessels are requested to report to Marine Signal Station/Biawak Signal Station on Channel 20 at least 2 hours before arrival and listen on the above channel for information on pilotage and berthing information.

The pilot station is at one mile North East of Tanjong Po Lighthouse at Latitude 1° 44.2′ N., Longitude 110° 31.8′ E. During the North East Monsoon (October to March) the station is moved to the Embang and Senari Leads 1° 39.3′ N., 110° 31.3′ E (Admiralty Chart 1822).

APPROACHES: The Channel from the pilot station to the Wharf is buoyed and is restricted by the presence of two bars. The outer bar, hard sand bottom, lies about 2 miles East South East of Tg. Po, has a depth of 5.2 m. above Chart Datum and the inner bar which lies approximately one nautical mile East by South of Tg. Muara Tebas, has a depth of 5.1 m. above Chart Datum.

Recent survey indicates that shoaling has occurred in certain parts of the river. Vessels drawing more than 5.0 m. (especially during the N.E. Monsoon, October to March) on account of the swell, are advised to ensure an under-keel clearance of at least 2.0 m. when approaching and crossing the bars.

ANCHORAGES: The existing Explosives Examination Anchorage is shifted temporarily to the bay opposite Tanjong Renard owing to the wreck at Kampong Sijingkat and is bounded by the following co-ordinates:

(i) 1° 36.60′ N. 110° 27.54′ E.
(ii) 1° 36.60′ N. 110° 27.35′ E.
(iii) 1° 35.70′ N. 110° 27.75′ E.
(iv) 1° 35.26′ N. 110° 27.62′ E.
(v) 1° 35.05′ N. 110° 27.62′ E.

Vessels loading logs under pilotage may anchor at the prohibited anchorage which is bounded by the following co-ordinates:

(i) 1° 35.10′ N. 110° 27.22′ E.
(ii) 1° 35.10′ N. 110° 26.55′ E.
(iii) 1° 35.35′ N. 110° 26.55′ E.
(iv) Along the coast of Batu Blat to the explosive and dangerous goods anchorage at Lat. 1° 34.69′ N., 110° 24.63′ E.
(v) Across the River to Tanjong Bako at 1° 34.55′ N., 110° 24.86′ E.
(vi) Along the coast to Tanjong Bako, Tanjong Buaya, Tanjong Sedup and the White Disc Beacon at 1° 34.86′ N., 110° 27.22′ E.

Vessels drawing less than 4.0 m. draft may anchor at Beting Tanju which is bounded by the following co-ordinates:

(i) 1° 35.55′ N. 110° 27.46′ E.
(ii) 1° 35.10′ N. 110° 27.22′ E.
(iii) 1° 35.10′ N. 110° 26.55′ E.
(iv) 1° 35.35′ N. 110° 26.55′ E.

The Explosive and Dangerous Goods Anchorage is 16 miles from the pilot station and is suitable for one vessel of not more than 100 m. in length.

RESTRICTIONS: Tide restriction and max. draft 5.18 m. at high tide. Not advisable to enter port at Tanah Puteh at night.

MAX. SIZE: Max. permissible length overall for vessel entering port at Tanah Puteh is 100 m. and max. draft 5.18 m. Max. overall length for oil carriers proceeding to oil installation at Baiwak Wharf, Pending Point is 110 m., and max. draft 6.4 m. At Pelabuhan Datuk Sim Kheng Hong (Pending), the LOA of ship permissible is 150 m. with a max. draft of 7.62 m.

RADIO: ETA cable to ship's Agent can be sent to Department of Telecommunications, Kuching. Code words, Kuching Radio.

VHF: All ships equipped with the Hague Plan Radio Equipment and within 40 km. to 50 km. of the Kuching Port will be able to establish communications on the following channels:

Channel No. 16 – Safety, calling and distress: A 24 hour listening watch is maintained on this channel by the Syarikat Telekom Malaysia in Kuching. (Call sign: Kuching Exchange).

Channels No. 24 and 26 – Public Correspondence: All ships after having established initial contact with the Syarikat Telekom Malaysia on Channel 16 can communicate with telephone subscribers on this channel.

Channel No. 20 – Port Operations: A 24 hour listening watch is maintained on this channel by the Marine Department, Kuching. (Call sign: Marine Signal). For pilotage, river traffic control and berthing information.

Channel No. 18 – Port Operations: A 24 hour listening watch is maintained on this channel by the Kuching Port Authority (Call sign: Kuching Port Control). For berthing and unberthing, loading and unloading of cargoes.

TUGS: 2 × 1,000 h.p. and 1 × 164 h.p. 3 mooring boats available.

BERTHING: Application for berth must be made by Agents at least 24 hours before berthing.

Tanah Puteh Terminal 244 m. wharf of the deck on piles with shore-bridge type with 13,600 sq.m. of covered storage space and 14,864 sq.m. of open storage space, depth at lowest water 5.18 m.; at *Pending Terminal* 613 m. marginal wharves, depth at lowest water 8.53 m. with 26,800 sq.m. covered storage space and 26,743 sq.m. of open storage. Feeder Container Services are available but ship must provide lift-on/lift-off gear for ship/shore and vice versa operations. Ro/Ro ramp, pontoon (40 m.×25 m.) and berth located at Eastern end of Pending Terminal.

Shore based container handling equipment: 1×42 tonne front loader with telescopic spreader. 2×35 tonne front loaders with 20 ft. and 40 ft. spreaders. 4 prime movers. 6×20 ft. trailers. 6×40 ft. semi-trailers.

CRANES: *Cargo Handling Equipment:* 21 units towing tractors; 58 units forklift trucks (4,000 – 18,000 lbs.); 31 units trailers (3 – 20 tons); 2 units 35 ton mobile cranes.

STEVEDORES: Normal port operating hours are as follows:

(a) Discharging and loading of cargoes, First shift, weekdays including Saturdays and Sundays 0730 – 1200 hrs.; 1300 – 1530 hrs.; Second Shift, 1530 – 1700 hrs., 1730 – 2300 hrs., Fridays, First Shift, 0730 – 1130 hrs.; 1430 – 1530 hrs.

(b) Delivery of Cargoes/Receiving of export cargoes, Monday to Thursday 0730 – 1200 hrs., 1300 – 1645 hrs., Fridays 0730 – 1130 hrs. – 1430 – 1645 hrs. Saturdays 0730 – 1145 hrs.

Arrangements can be made for delivery of perishable cargo during the weekends and public holidays provided prior approval of the Customs Department is obtained.

Tractor/trailer trains are used for transfer of cargoes within the port area while forklift trucks are used for stacking palletised/unitised cargoes and storage pallets.

Cargo handlers who are stevedores as well as longshoremen working under a fully integrated gang system are employees of the Authority. The Authority receives gang orders daily between 1400 hrs. and 1500 hrs. on normal working days and between 1000 hrs. and 1030 hrs. on the days preceding Sundays and public holidays. Gang orders are placed on a shift basis.

MEDICAL: Necessary for Agents to receive advance notice of required medical attention at least 24 hours before arrival. Hospital facilities available. Crew should possess Cholera inoculation and Vaccination Certificates.

TANKERS: Tankers berth at Biawak Oil Jetty for discharge of their oil. Diameter of pipe-line 6 in. Two tankers can berth at a time and max. draft is 6.4 m.

Berthing carried out near to the time of High Water. Starboard side alongside using port anchor. No berthing during darkness. Unberthing on flood tide. Mooring boat required, supplied by Kuching Port Authority.

Shorelines:

Mogas and Avgas	Single 8 in. discharging line.
Gasoil	Single 8 in. discharging line.
Jet A1	Single 8 in. discharging line.
Bitumen 80/100	Single 8 in. discharging line.
LPG	Single 4 in. discharging line, 3 in. vapour line.
Light F.O.	Single 6 in. discharging line.

DENSITY: 1008.

FRESH WATER: Available and can be supplied to vessel alongside Authority's Wharf by hose about 25 t.p.h.

FUEL: High-speed diesel fuel oil can be supplied to vessel by making arrangement with either Shell or Esso Oil Installation at Biawak.

CONSULS: Indonesia.

REPAIRS: Minor repairs to vessels only.

DRY DOCKS: Not suitable for sea-going vessels. Coastal vessels up to 220 ft. long.

GANGWAY/DECK WATCHMEN: Usually available. Ship should also provide own watchmen.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 1 oz. tobacco or 25 cigarettes or 8 cigars permitted for each crew member daily. Up to three days ration in port. Wines and/or Spirits, 0.125 qt. bottle of spirits or 0.25 qt. of beer or 1 qt. of wines is permitted for each crew member daily. Up to 3 days' ration in port.

CARGO GEAR: Ship provides own gear especially for handling heavy lifts, vehicles, etc. Rope slings, pallets and safety nets, etc., will be provided by the Authority.

REPATRIATION: Facilities available.

AIRPORT: Airport about 10 km. from port at Tanah Puteh. It is served by MAS which operate daily flights to Kuala Lumpur, Singapore and Kota Kinabalu.

TIME: Local time GMT plus 7.5 hours.

HOLIDAYS: Port work can be arranged on all official holidays on overtime rates except Chinese New Year Day, Hari Raya Puasa Day, International Labour Day (1st May), Dayak Festival Day (1st June), and Christmas Day, during which the port at Tanah Puteh and Pending will be closed.

POLICE/AMBULANCE/FIRE: For emergency call, Tel: 999 is applicable to all these three services. Individual call: Central Police Station Tel: (082) 22181; General Hospital Tel: (082) 57555; Fire Station Tel: (082) 21033.

SHORE LEAVE: Crew members are allowed ashore provided permission is granted by Immigration Department.

IDENTIFICATION CARDS: Required.

REGULATIONS: Refer to Sarawak Merchant Shipping Ordinance and Kuching Port Authority's Ordinance and Bye-laws.

DELAYS: At present ships can normally secure a berth within 24 hours of arrival if tide is right.

AUTHORITY: Kuching Port Authority, P.O.Box 530, 93710 Kuching, Sarawak, Malaysia. *Tel:* Headquarters and Pending Terminal – 082-482144 (10 lines). Tanah Puteh Terminal 082-333122 (5 lines). *Telex:* 70420 MA Kuport. *FAX:* 082-481696, 334776. *Cables:* Kuport, Kuching. *Contact:* The General Manager.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Lot 8235, Section 64, No. 7, 1st Floor, 2 1/2 Miles Jalan Pending, 93450 Kuching, Sarawak, East Malaysia. Tel: (082) 334268, 334287. Telex: MA70207 Jarship. Cables: "Jarship Kuching". Fax: (082) 331471.

Associated with Jardine Shipping Agencies.

KUNAK, Sabah: 04.41 N. 118.15 E. **(See Plan)**

Sabah Government Requirements

(a) Customs will treat port as sufferance wharf as defined in Section 2 of Customs Ordinance (Cap. 33), with control from Lahad Datu. Agent will be required to make application to Customs for sufferance facilities in respect of each vessel, on appropriate form. Officer-in-Charge of Customs, Lahad Datu will arrange to send a supervising officer with ship; this officer will attend vessel's inward and outward Customs clearance. Transport, food and shelter of Customs Officer are for vessel's account, though it is envisaged that his transport can be concurrent with boarding and departure of the Pilot, i.e. per Marine Department launch.

(b) Immigration requires that vessel shall be cleared inwards and outwards in Lahad Datu. As Marine Department launch will be required to run mooring lines at Kunak, it will not be available to transport Immigration Officer who will *not* accompany vessel. His transport will therefore be a matter for Agent to arrange.

(c) Medical will grant Pratique by radio by Medical Officer, Lahad Datu: whose right to carry out full inspection is not affected thereby. This will only be exercised, it is anticipated, when vessel has called at an infected port within prescribed period. Radio messages should therefore give this information, e.g. "Malay Maru Hongkong Twentieth Tokyo Thirtieth Manila Second All Well Request Pratique Master".

(d) Marine Dept. In the case of a vessel arriving from foreign ports will ultimately place a Pilot on board in Lahad Datu, if requested.

(i) Pilot will receive vessel's arrival report and sight her last port clearance. Pilotage will commence at any such point on route as Master may request, at rates laid down in the Merchant Shipping (Fees) Regulations, 1961. The Pilot launch carrying berthing crew will arrive in advance of vessel at Kunak and assist in making fast.

(ii) As there is no accommodation available at Kunak, the Pilot it is hoped, can be accommodated on board ship during her stay.

(iii) Return to Lahad Datu will follow as in sub-para (i) with the Pilot issuing Port Clearance on completion of Immigration formalities.

(iv) Requests for Pilot should be made *at least* 24 hours in advance to Marine Sandakan via Sandakan Radio, 9WHZ1. Initially this service will be offered from Sandakan, and ships proceeding Kunak from there will retain the Pilot on board. Ships from foreign ports will be served by air; charges to their account. There is now a Pilot based at Tawau, who will berth vessels at Kunak.

For information the port limits of Lahad Datu are "a line drawn from Tanjong Melandong on the South-west point of Darvel Peninsula to the most Westerly point of Sakar Island and thence to the mainland, etc." From this it can be seen that large vessels need not enter the narrow waters of the inner bay.

BERTHING: 1. Wharf consists of:

(a) A raised cement platform 30 ft.×30 ft. on wooden piling.

(b) Three lazy piles with rubber fendering situated 20 ft. from the front edge of the platform and 125 ft. in each direction from the centre of the platform.

(c) Two cement mooring dolphins 20 ft.×20 ft. situated 350 ft. each side of the platform and 50 ft. from the rear edge of the platform.

(d) A metal jetty approach 10 ft. wide×350 ft. long.

(e) A coral bund 24 ft. wide at the base and approximately 16 ft. wide at the top.

(f) Mooring Buoy placed 600 ft. off head of jetty.

2. Depth of water alongside: Minimum depth of water outside the lazy piles is in excess of 35 ft. datum.

3. Bulk oil will be pumped from installation along a metal pipe via coral bund and metal jetty. At a point approximately 15 ft. before cement platform the pipe bifurcates and the two terminals are situated two-thirds the way along each side of platform. To these terminals will be attached a flexible steel hose for connection with ships. Hose will be provided by shippers, and is 400 ft. long if required.

4. Pumping capacity. Maximum overall rate of pumping palm oil will be 100 t.p.h. Palm oil pipe is of 6 in. diameter.

AUTHORITY: Francis Lee Fah Hin, Port Manager, Tawau.

LABUAN, Sabah: 05.17 N. 115.15 E. **(See Plan)**

Island of Labuan is 12 miles long and 7 miles wide lying off N.W. coast of Borneo at entrance at Brunei Bay. It is part of State of Sabah and is only 4.5 miles from mainland and some 77 miles from the State Capital of Kota Kinabalu.

DOCUMENTS:

(a) On arrival, when vessel has arrived from ports outside Sabah, Health Officer, Boarding Officer, Customs and Immigration or their representatives will board vessel. Agent cannot board until ship has been cleared.

(b) Health Officer will require Maritime Declaration of Health duly completed together with 1 copy of Passenger List and 1 copy of Crew List whenever vessel's last port of call has been outside State of Sabah.

(c) Boarding Officer will require 1 copy of Shipping Arrival Report, 1 copy of Passenger List and 1 copy of Crew List. He will also inspect various Certificates such as Load Line, Life Saving Equipment, etc.

(d) Following is summary of documents required:

	Customs	*Immigration*	*Boarding Officer*	*Agent*	*M.O.*
Passenger List	2	2	1	1	1
Crew List	2	2	1	1	1
Stores List	2	—	—	1	—
Maritime Declaration of Health	2	—	—	—	1

(e) To be supplied before Departure:
Manifests as necessary.
Master's copies of Bills of Lading.
Port Clearance.
Customs Clearance.
Certificate of *(a)* Buoys and Lights Dues and *(b)* Port and Harbour Dues.

PILOTAGE: Pilot available if adequate notice given but pilotage not compulsory. Vessels normally berth between 0600 hrs. and 1800 hrs., unberthing at any hour, day or night, provided that notice of such movements received between 0800 hrs. and 1600 hrs.

ANCHORAGES: Good anchorage for large vessels in a least depth of 5.75 fathoms South and S.E. of Beacon No. 6.

Quarantine: Vessels arriving from an unhealthy port should proceed to Quarantine Anchorage for Pratique. This anchorage is bounded on North by a line drawn 090° from Harbour Shoal Beacon to Eastern Harbour Limit; South by a line drawn between S.W. point of Papan Island and Enoe Beacon; on West by Eastern Boundary Limit of Explosives Anchorage (as under). If vessels arriving from healthy port and healthy themselves, they need not proceed to Quarantine Anchorage.

Explosives: No vessels having explosives on board may come or remain within 500 yards of shore or of any other vessel; such vessels shall fly Gunpowder Flag at foremast, and should anchor in Explosives Anchorage which is within a line drawn from Enoe Beacon to Harbour Shoal Beacon thence in 090° for 6 cables thence in 180° direction until it joins line between S.W. point of Papan Island and Enoe Beacon.

Dangerous Petroleum: A vessel having dangerous petroleum on board shall anchor within a line drawn from Harbour Shoal Light Beacon in a 360° direction for 2,500 ft., thence in a 090° direction for 3,600 ft., thence in a 180° direction to join Northern Boundary Limit of Explosives Anchorage.

Prohibited Anchorage: No vessel shall anchor within 2,000 ft. from the light of Southernmost dolphin of Liberty Pier.

TUGS: One tug, 750 b.h.p., twin screw, available to assist with berthing and unberthing.

BERTHING: 1. Wharves:

(a) Liberty Wharf: A permanent concrete wharf, measuring 800 ft. with dolphins 100 ft. off each end – least depth of water is 28.5 ft.

(b) Victoria or Small Ships' Wharf (marked on Chart as H. & C.'s Wharf): A wooden structure – length 270 ft. with min. depth of 12 ft. No longer usable except by kumpits. No vehicles allowed on wharf.

(c) New Shell Installation Wharf: Concrete jetty 170 ft. long with 2 dolphins at each end with a total length between of 700 ft., least depth of water 31 ft.

Shore Lines:

1. For Mogas 8 in. × 1,200 ft.
2. For D.P. Kero 8 in. × 1,250 ft.
3. For Gasoil 8 in. × 1,350 ft.
4. For Fuel Oil 8 in. × 1,350 ft.

8 in. hoses used to connect ship and shore.

(d) Brown & Root Jetty: A timber decked jetty with following dimensions:
Length of main jetty – 160 ft., width 40 ft.
Length of causeway – 476 ft., width 22 ft.
Least depth alongside approximate 28 ft.
Max. load (proven) – 800 lb./sq.ft.
Max. single approximate 100 short tons.

2. Buoys: No mooring buoys in Labuan.

3. Monsoons: N.E. monsoon prevails from December to April and S.W. monsoon from middle of May to middle of October. Harbour is well sheltered from both monsoons.

4. Flags and Berthing Signals:

(a) When entering port vessel should fly Signal Letters, Mail Flag if applicable, and "G" flag if requiring Pilot, and also Quarantine Flag.

(b) Berthing Signals: Following berthing signals will be used at Labuan and will be displayed from Flagstaff in Harbour Office in vicinity of Liberty Wharf, Victoria Harbour. A red and white chequered flag and International Code numbered pendant will indicate berth number allocated. Berth numbers have been allocated as follows:

(c) Berth and Pendant No.

1. Esso Wharf.
2. LCT. Landing Ramp.
3. Victoria Wharf (small ships) S.E. Section.
4. Old Liberty Wharf (inner section).
5. Old Liberty Wharf (outer section).
6. New Liberty Wharf (inner section).
7. New Liberty Wharf (outer section).
8. Brown & Root Jetty.
9. Shell Installation Jetty.
10. Anchor.

On receipt of berthing signal, vessel should acknowledge in the usual manner with the answering pendant and proceed to berth.

(d) Tidal Signal: A tidal signal consisting of a cone and ball is hoisted in conjunction with berthing signal showing state of tide at berth indicated. A cone point down signifies flood tide (West-going), a cone point up ebb tide (East-going), a ball slack water.

(*e*) Facilities: Max. single load without special precautions on Old Liberty Wharf is 25 tons and New Liberty Wharf is 650 lbs./sq.ft. i.e. 180 tons four axle vehicles. Any load over this figure will require to be distributed over two or more panels of 10 ft. by 10 ft. each according to weight. However, special arrangements must be made prior to discharge, and Agent should be consulted in advance.

RESTRICTIONS: Tides. Subject to diurnal inequalities but usually one HW and one LW a day. Average HW is 6.5 ft. and LW 3 ft. above datum of soundings.

Clearance: Port is open from 0600 hrs. to 1800 hrs. although vessels can be cleared later than 1800 hrs. on application provided they are sighted from Papan Lighthouse at 1800 hrs.

HEALTH: See "Regulations" and "Anchorages".

RADIO: Information required before ship's arrival. ETA Labuan, with as much prior notice as possible. Number of gangs required. Quantity of fresh water required. Whether Pilot required for berthing.

Labuan has no radio facilities and messages are received via Kota Kinabalu, Miri, Singapore, etc.

Port VHF Service operates on Channels 16 and 12, between 0530 hrs.and 2400 hrs.

Also see "Tankers" – Communications.

BULK HANDLING FACILITIES: Rancha Rancha Industrial Estate: One jetty for iron ore carriers up to 150,000 d.w.t. nearing completion. Unloading rate 2,000 t.p.h.

CARGO: 1. Inward: Inward cargo is tallied out of ship on to wharf or into lighter. Damaged cargo is surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge is carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of shortlanded cargo, reasonable proof must be given to Customs that the cargo has not been landed. A shortlanded Memo certified by the Chief Officer is usually accepted as proof.

2. Transhipment: After discharge of cargo from the 1st carrier, transhipment cargo is placed under supervision of Customs, unless it is possible to arrange direct transhipment into small coastal vessel. Customs do not accept responsibility for cargo in Customs Bond.

3. Refrigerated: Only small quantities of refrigerator cargo loaded or discharged.

4. Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from the police prior to arrival of cargo, and harbour and police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

STEVEDORES: Supplied by contractors as arranged by Agent. Working hours 0800 – 1200 hrs., 1300 – 1700 hrs. Working outside these hours on Sundays and Public holidays is overtime.

MEDICAL: Hospitals. Not possible for Government Medical Officer to visit ships but patients can be sent to Cottage Hospital. Four 1st class beds, 10 2nd class beds, 46 3rd class beds. Two private clinics, Dr. Chan Clinic and Dr. Wong Clinic, are located in town.

Dentist. A Government Dental Clinic, located in Cottage Hospital area. In addition, a dentist is available in town.

TANKERS: *Labuan Terminal (Shell):* The SBM is positioned at Lat. 5° 15′ 59″ N., Long. 115° 07′ 08″ E. designed for tankers with max. s.d.w.t. 320,000, but presently fitted for a max. B/CM of 520 ft.

The minimum water depth in the manoeuvring area is 84 ft. and the max. permissible draft 74 ft.

Pipe-lines and Cargo Hoses: A 48 in. submarine/land pipe-line connects the SBM with the storage tanks on shore. Beneath the SBM, the pipe-line terminates in a manifold (PLEM) for connecting the underwater hoses of the buoy. The PLEM is fitted with 2 non-return, non-slam 'mockveld' valves to eliminate potential leakage and surge pressure being built up from shore to the SBM.

Two underwater hoses, each 120 ft. in length, connect the SBM to the PLEM with a lazy 'S' configuration. Each string consists of 4×30 ft. lengths of hose.

One 20 in. diameter floating hose string of 700 ft. length is connected to the turntable. The string terminates in 1×16 in. and 1×12 in. diameter rail hose for direct connection to the tanker's starboard manifold. The 12 in. hose is connected to the forward and the 16 in. hose to the aft manifold line. The last 3 units of the tail hoses are electrically discontinuous, in order that stray currents from the crude carriers are not carried on to the buoy. Max. B/CM 520 ft.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM. Please advise.

AAA ETA and draft at Labuan SBM.
BBB Customs and Health requirements.
CCC Is vessel equipped with bow chain stopper, Smit Brackets and a large central Panama Chock? (This information required from unknown vessels only.)
DDD Are manifold connections per OCIMF specifications?
EEE Rig starboard derrick to maximum SWL (minimum acceptable 7 tons).
FFF Have 16 in. and 1×12 in. manifold connections ready on starboard side.
GGG Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmittted to the Master.

AAA Based on your ETA . . . . present intention is to berth you on arrival.
BBB Pilot will board at the boarding area 2 miles W.S.W. of SBM in the following position:
Latitude: 05° 15′ 00″ N.
Longitude: 115° 04′ 00″ E.
CCC Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Labuan Terminal on VHF Channel 16 with Channel 14 as a working channel.
DDD Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE After having established radio contact on VHF you will receive further instructions.

Mooring Operation: Vessels are programmed for day and night berthing. Use of the ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises 2×12 in. circumference×150 ft. nylon double braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotation Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with a 3 in. diameter chafing chain.

The pick-up assembly consists of:

(i) 10 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 450 ft.
(ii) 10 in. circumference polypropylene pick-up rope with spliced eyes 2 ft. on each side. Length 45 ft.
(iii) Pick-up support buoy.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connection and remains at the vessel until the completion of loading.

Pilotage: Pilotage is compulsory within port limits for the size of vessels calling at the SBM. The Pilot will board at the boarding area 2 miles W.S.W. of the SBM for both arriving vessels and the vessels which have be anchored there awaiting berth.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least one hour early to check and make sure that the hoses and mooring ropes are not fouled. The mooring craft proceeds to the vessel to disembark the Berthing Master and offload the mooring gear.

During the approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range, the vessel's bow is approximately 115 m. from the SBM, i.e. 70 m. to go to the final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger pick-up rope and chafing chain are hove on board until the chafing chain is in position in the fairlead (marker buoy just outboard of the fairlead). The special shackle on the nylon snotter is then connected to the triangle plate or alternatively the chain is secured in the bow stopper and the inner mooring is then fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle and mooring is carried out by ship's crew.

Cargo Loading Operations: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into a enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker's manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered onto the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker's side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafe and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessel's side.

Loading Procedure: Labuan Crude is loaded at Labuan Terminal. The quantities loaded are checked by the terminal at frequent intervals (3 hours) and vessels are requested to verify the shore figures.

The terminal is capable of giving maximum loading rates of up to 7,000 cu.m.p.hr. and a maximum back pressure of 120 p.s.i. at the terminal end. The Berthing Master also acts as Loading Master and as the Terminal's Representative he will attend to all cargo formalities (SSPC forms, safety check list, etc.).

Prior to and during loading operations the following procedure will apply:

(a) A joint inspection is carried out by ship and Terminal Representative to ensure that all requirements on the Safety Check List have been complied with.
(b) The methods of communication between ship and shore are clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactorily.
(c) Ship and shore to confirm readiness to start cargo loading operations.
(d) Commencement of loading to be at a slow rate.
(e) Lines and hoses are checked and faults rectified. Launch to patrol around the vessel to check for oil leakages into the sea.
(f) When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
(g) Lines, hoses and the water around the vessels are again checked.

(h) Ship and shore figures are to be compared every 3 hours and discrepancies investigated.

(i) At least 15 minutes' notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Ballast: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

Suspension of Loading Operations: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings. The mooring and hose connection equipment is then transferred to the mooring launch.

Communications: Vessels are required to advise SSPC/Respective Agents of their ETA's 72 hours and again 36 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco, Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Labuan Terminal on VHF Channel 14.

Weather: All the SBM's concerned are positioned in the open sea. The weather in the region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of S.E. Asia. These three types are:

(1) S.W. Monsoon (June-October)
(2) N.E. Monsoon (December-March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome times of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

FRESH WATER: Only available in small quantities (usually 30 tons maximum) and at restricted hours.

FUEL: Bulk furnace oil and high speed diesel usually available but 48 hours' notice of requirements must be given.

FIRE PRECAUTIONS: In case of fire, the Harbour Master, OCPD, and Agent should be telephoned immediately. A mobile gas turbine fire pump is available.

CONSULS: None.

REPAIRS: Marine Department operates engineering workshops at Labuan.

DRY DOCKS: Marine Department has 3 Slipways in Labuan which are capable of slipping vessels of 60 tons, 200 tons and 500 tons displacements.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

POLICE/AMBULANCE/FIRE: Medical Officer 224; Asst. Commissioner of Customs 201; OCPD 400; Police Station 297; Hospital 222.

REGULATIONS: *(a)* Arrival and departure.

1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessels shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

GENERAL: *Surveyors:* Harrisons & Crosfield are Lloyd's Sub-Agents in Labuan and may appoint a surveyor as necessary.

Ship Chandlers: Fresh fruits, vegetables and fish available and price list can be obtained from ship chandler through Agent. Cold storage with limited supplies.

Recreation Facilities: If owners pay a monthly subscription to the Labuan Recreation Club, ship's crew are automatically members. Football and cricket, etc., can usually be arranged on application to Agent. Two cinemas in town which show American, English, Chinese, Malayan and Indian films.

Good beaches all round island, however, it is strongly recommended that bathers should remain in shallow water. It is not considered safe to bathe from the ship.

Victoria Hotel situated in town. All rooms air-conditioned and have private bathrooms or showers attached. Lodging house accommodation available in town for Chinese Crew members.

A newly constructed 12 storey Labuan Hotel is situated in the town. All rooms air-conditioned with bathroom attached.

A nine-hole golf course situated about 1 mile away from town.

DEVELOPMENTS: See "Bulk Handling Facilities".

AUTHORITY: Harbour Master.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Lot No. 17, 2nd Floor, Jalan Bunga Dahlia, WDT No. 81, 87009 FT. Labuan. Tel: (087) 413568/9. Telex: MA85065. Cables: "Jarship Labuan". Fax: (087) 413580.

Associated with Jardine Shipping Agencies.

LIMBANG, Sarawak: 04.48 N. 115.05 E.

Limbang is the principal town of the Fifth Division and is situated 8 miles above the entrance of the Limbang River. There is an anchorage for ocean-going steamers 5 miles below the Limbang Bar Buoy with a least depth of 26 ft.

Depth on Bar. The least depth reported on the bar is about 2 ft. with a highest rise of 12 ft. The channel is marked by stakes with red/white and black/white top markers and a flashing light buoy Fl.1 sec. at the entrance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

PILOTAGE: Pilot available at Muara Port, Brunei. No pilot available locally.

REPAIRS: Siong Hing Shipyard Company, Limbang, Sarawak.
SURVEYORS: Cargo inspectors available. Local marine surveyor available.
BANKS: Malayan Banking Berhad and Kongming Bank Bhd.
STORING: See "Prelims".

LUMUT, Malaya: 04.14 N. 100.38 E.

SHIPMASTER'S REPORT:

DOCUMENTS:
Customs:
4 Crew Lists.
2 Report of Arrival – Appendix "A".
1 Passenger List ("Nil" certificate required).
2 Dutiable Stores Statements.
5 Inward Manifests (prepared by Agent).
1 Personal Effects List.
1 List of Cargo in Transit.
1 Lists of Arms and Ammunition ("Nil" certificate required).
Last Port Clearance.
2 Copies Loading Manifests.
3 Outward Manifests (prepared by Agent).
1 List of Narcotics ("Nil" certificate required).
Immigration:
2 Crew Lists.
1 Passenger List.
All Passports and Seaman's Books.
Boarding Office (Port Authority):
2 Reports of Arrival.
2 Crew Lists.
Register, Load Line, Derat Certificate.
Radio, Safety Equipment and Safety Construction Certificates.
Port Health:
2 Vaccination Lists (Cholera).
2 Health Forms.
Derat Certificate.
All International Health Certificates (Yellow Books).
Traffic Control Officer:
1 Crew List.
1 Passenger List.
1 Arms and Ammunition List. ("Nil" certificate required).
1 Narcotics List.

Clearance of vessel carried out on arrival at Lumut Anchorage or berth before loading or discharging is allowed. Usually Customs', Immigration, Traffic Control Officer, Health will come together on board and Free Pratique issued by Health Officer.

PILOTAGE: Pilot boarding position Lat: 4° 10′ 50″ N., Long. 100° 35′ E., which is 1 mile South of Pangkor Island S.E. Point light. Berthing and unberthing will only be carried out during daylight hours and at slack water or beginning of flood tide. Pilot comes from Penang for berthing and unberthing. Pilot leaves vessel at Hospital Rock on departure. Pilot launch painted blue with white superstructure and named "King Miller". Pilot rates: Launch fee M$400 in and out minimum M$750 – maximum M$2,800, depending on d.w.t. of vessel.

ANCHORAGE: Just inside harbour limits, 7 cables South of S.E. Point Light in about 12 fathoms. Bottom said to be sand and shells and reputed good holding ground.

MAX. SIZE: Max. length on grain berth 575 ft.

Max. draft into port 30 ft. 6 in. salt water on Spring tides. This is due to a bar at the entrance of Dindings River and a rather sharp turn around buoy of 125° to miss rocks marked by unlit buoy. (Lloyd Rocks, B.A. Chart 792 vicinity of River Passage).

HEALTH: See "Documents".

RADIO: *ETAs:* Sent through Penang or Singapore Radio to Flourmill Lumut, Flourmill Kuala Lumpur and ship's Agents. 72, 24 and 12 hours notice required. Agents will keep Flourmill Lumut and Pilots informed. Authorities like 5 days notice of a vessel's impending visit. Telex: MA 44285 Miller.

VHF: There are VHF communications in the port with pilot boat on Channel 12.

Reporting System of Merchant Vessel When Entering and Leaving Port of Lumut

1. Every Master of a merchant vessel when coming to Port of Lumut shall advise the Port Officer of Lumut as follows:
   (i) One hour before the arrival of the vessel to the Pilot Station (i.e. one nautical mile due South East Point Lighthouse) the following particulars:
   The name and the nationality of the vessel and the Master.
   The arrival draft.
   The gross and nett tonnage of the vessel.
   The nature of the cargo.
   The next and last port of call.
   (ii) When arriving at the Pilot Station and when the Pilot is on board.
   (iii) When the vessel is passing abeam of Dinding Buoy.
   (iv) When the vessel is at anchor or berthing at the jetty/wharf.
2. The same procedure is also applied to vessel when leaving the Port of Lumut.
   (i) To advise the Port Officer of the sailing time of the vessel one hour before the departure.
   (ii) When the Pilot is on board.
   (iii) When the vessel is passing abeam of Dinding Buoy.
   (iv) When the Pilot is away and when the vessel is abeam of South East Point Lighthouse.
3. The working hours of Port Office of Lumut are as follows:
   Monday to Friday: 0800 hrs. – 1615 hrs.
   Saturday: 0800 hrs. – 1245 hrs.
   The office is closed on Sunday and Public Holidays.
4. Calling: Marine Department Lumut
   or "Lumut Mardep".
   VHF Channel 16.

TUGS: There are no tugs at Lumut – nearest Penang (small) and Singapore (large).

BERTHING: Port side to at Malayan Flour Mill Private Wharf in position Lat: 4° 16′ N., Long: 100° 39.5′ E., ship's head in. Depth of water at wharf is 32 ft. 6 in. A modern wharf supporting two movable discharging elevators. Conveyor belt runs under wharf.

South side of dock is used by coastal tankers and has 20 ft. of water. Dock is of concrete construction with heavy wood and steel girder fendering which is rubber mounted. End of wharf has a separately fendered concrete construction which is fitted with rubber shock absorber.

STEVEDORES: Mill employs own stevedores and work continues throughout 24 hours. No cargo work on Sundays and Public Holidays unless requested by either party when the overtime charges will be borne by the said party. Discharge rate is about 118 m.t.p.h. with 2 suckers (wheat). Reported to be about 100 m.t.p.h. with corn.

MEDICAL: Doctor in Lumut and Sitiawan (7 miles from Lumut). Local hospital usually has large queue, therefore better to attend private doctor. Private doctor may be called onboard if necessary.

DENSITY: About 1022 ozs/cu. ft. at berth. Water is brackish both at anchorage and berth.

FRESH WATER: Available at berth, arranged through Flour Mill at $7.00 per ton during working hours. 24 hours' notice required.

FUEL: By arrangement and brought to ship in road tankers. Cargo cannot be discharged while bunkering as the trucks are not able to pass under the grain discharger (Agent informs that one weeks' notice required for bunkers). Fuel and diesel supplies come from Mobil Oil Depot at Batu Undan about 1.5 miles from mill.

REPAIRS: Minor repairs only at mills workshop, firms can be called in from Kuala Lumpur or Singapore or Ipoh.

SURVEYORS: Trident Malaysia Sdn. Bnd. in Penang.

GANGWAY/DECK WATCHMAN: Private wharf and protected area - no shore watchman required on board - only ship's watchman for ropes and safety. Shore mill patrol is armed with shotgun.

REPATRIATION: Can be arranged but make sure travel documents, i.e. passports are valid and air tickets are ready.

AIRPORT: Nearest local airport is Ipoh and then fly or by road to Kuala Lumpur International Airport. Ipoh is about 1 hour's drive and Kuala Lumpur 4 hours drive.

EMERGENCY CO-ORDINATION CENTRE: Harbour Master, Penang or Port Kelang.

TELEPHONE: On berth and in Flour Mill entrance hall during office hours only.

BANKS: The Chartered Bank, Jalan Lumut, Sitiawan, Perak; Malayan Banking Berhad, Lumut, Perak; Bank Bumiputra Malaysia, Lumut, Perak. Money Changer at Malaysia Raya Restaurant.

STORING: See "Prelims".

1. Yes, both.
2. Yes.
3. Yes.
4. Yes.
5. Prior approval must be obtained.
6. No.

SHORE LEAVE: Local leave only, except with special permission and pass. Boats to be laid on by ship for crew shore leave to Lumut and this is about a 20 minute boat ride to shore. Charges – $25 per trip. A boat from the anchorage may be laid on. Boat service is run by Mr. Loo Chong Lin/Mr. Loo Yean Lai – Titi Panjang Road, Lumut – They can usually be found on waterfront by Customs office. Also to Sitiawan about 7 miles from Lumut. To Ipoh 52 miles by taxi $6.00 per person one way. Special Immigration pass is required and can be arranged through Agent.

GENERAL: The Flourmill is situated on the N.E. side of Lumut about 40 miles by road and 20 minutes by launch from Lumut town. There is a good canteen at the Flourmill which serves Chinese and Muslim foods, soft drinks and beer. Ship's personnel are allowed and welcome to use these facilities.

There are 3 reasonable hotels in Lumut, Dindings Hotel which has only 3 rooms air conditioned, The Rest House which is not air-conditioned and Lumut Country Resort, a 3 star hotel with 40 air-conditioned rooms. If possible book in advance especially on Saturdays, Sundays and Holidays.

At Pangkor Island there are good hotels; Sea View Hotel, Beach Hut Hotel, Pan-Pacific Resort with 100 air-conditioned rooms and Pangkor Laut Resort, both are of International Standard. At Teluk Batik 10 chalets available, about 5 miles from Lumut town.

Football matches can be arranged and Customs, Flourmill etc. are all very keen to play ships visiting the port. Hire of the football pitch which is in the centre of town and very good is only $5.

A soya bean mill has been completed and is in production and using the same wharf for discharge of their cargoes.

Customs: Allowances very small – 75 cigarettes per man for 3 days and one bottle of spirits for 8 men every 3 days. Customs office is on shore near to ferry berth. One and sometimes two, Customs men remain on vessel throughout and accommodation is to be provided for them.

Immigration: No immigration if from Malaysian ports but clearance required when from foreign.

Tide: Ebbs for 5.25 hours on berth. Tides times are based on Port Kelang – difference is minus 1 hr. 40 min. Rise and fall about 2 m. – see Admiralty Tide Tables and Admiralty N.P. 214, Malacca Strait and Southern Approaches to Malacca Strait. Atlas of Tides and Tidal Streams.

Provisions/Stores: Bonded items, beer and cigarettes and fresh provisions available but advisable to give 24 hours notice as some of the items come from outside Lumut. Fruit and vegetables are available in season from local supply and are reputed to be reasonably priced. Some fruit and vegetables imported and may be expensive. Chandlers can be arranged by Agent.

Laundry; Arranged by Chandler (see above), takes about three days as is done by hand.

Charts: BA 1009 Perak River & Approaches when approaching from South and BA 792 Dinding River & Approaches with inset covering flour mill wharf.

AUTHORITY: Malayan Flour Mills Berhad, Jalan David Sung, Batu Undan, Lumut, Perak, Malaysia. *Telex:* Miller MA 42285. *Cables:* Flourmill Lumut, Perak, Malaysia. *FAX:* 05-912296. *Contact:* Raja Toran Shahriman, Chief Administration Officer.

Port Office, Marine Department, 32200 Lumut, Perak. *Tel:* 05-935477. *FAX:* 05-613260. *Contact:* Meor Abd. Manap, Deputy Port Officer.

MALACCA (Tanjong Bruas), Malaya: 02.13 N. 102.09 E. (See Plan)

DOCUMENTS:

1. *Malacca Port Authority*

(a) Ship's arrival advice 72 hours prior to arrival stating estimated time of arrival and date.

(b) Ship's Manifest 48 hours prior to arrival with particulars of cargo.

(c) Berth and stevedore application for ship's working arrangement.

(d) Dangerous Goods Declaration (if any).

(e) Passenger List (if any).

2. *Harbour Master's Office*

(a) "Report of Arrival of Vessel" on prescribed form obtainable from Harbour Master's Office on arrival.

(b) One copy Passenger List, specifying names and nationalities.

(c) Port Clearance from last port and copy of Manifest of Cargo to be discharged.

(d) List of all arms and explosives on board.

(e) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port produce to Port Officer the Certificate of Registry and ship's Articles.

3. *Immigration Authorities*

(a) Crew List (3 copies).

(b) Passenger List (3 copies).

(c) Produce all Passengers Passports/Visas.

(d) Produce all Seaman's Cards/Books.

(e) Fill embarkation/disembarkation card obtainable from Immigration Department on arrival.

4. *Port Health*

(a) Crew List showing last date of vaccination.

(b) Passenger List, showing the last date of vaccination.

(c) Produce all Seamen's and Passengers' vaccination cards.

5. *Customs Department*

(a) Crew List (2 copies).

(b) Passenger List (2 copies).

(c) Personnel Effects List (2 copies).

(d) Cargo Manifests (4 copies).

(e) Last Port Clearance.

(f) Bonded Stores List (2 copies).

(g) Full and correct statement of dutiable goods carried as ship's stores (2 copies).

(h) Customs Form CD 15 obtainable from Customs Department on arrival.

APPROACHES: Approachable from all directions as port is located in an open-sea area. Harbour open all year round.

PILOTAGE: Pilotage service is compulsory for vessels entering or leaving port limits and during berthing/unberthing. Vessels to give Malacca Port Authority 12 hours' notice. Vessels from West take Pilot 2.75 miles W.S.W. of Tanjong Kling and vessels from East take Pilot 5 miles S.S.W. of Tanjong Kling. Pilot on VHF Channels 12 and 16.

ANCHORAGES: Located approximately 1 mile – 1.5 miles off the Malacca River mouth with depth of 3 fathoms – 6 fathoms. No specific prohibited anchorage.

TUGS: One 800 b.h.p. twin-screw tug available to assist with berthing and unberthing operation and emergencies.

BERTHING: One 'T' shaped jetty of 170 m. length, capable of accommodating one vessel of 125 m. LOA on the seaward side and one vessel of 65 m. LOA on the inner side at any one time. Least depth alongside is 9.0 m.

Storage Areas: 4 modern covered warehouses with a total storage area of 10,800 sq.m. for dry bulk and break bulk cargo. Two tank farms of 6,543 tonnes storage capacity for liquid bulk cargo.

STEVEDORES: Privatised stevedoring companies working on a two-shift basis with cargo discharging capacity per day of 1,500 tonnes for dry-bulk and 1,000 tonnes for breakbulk.

MEDICAL: Modern Government and private hospitals readily available in the town centre. There are private clinics in the vicinity of the port area.

FRESH WATER: Available from elevated water tank of 50,000 gallons capacity through pipelines.

FUEL: Supply by road tankers with advance notice.

REPAIRS/DRY DOCKS: None.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars, 8 in number per man per day, or Tobacco, 1 oz. per man per day, or snuff, 1 oz. per man per day.

Wine and/or Spirit: Spirit, 0.125 quart per man per day, or wines, 1 quart per man per day, or beer or stout, 1 quart per man per day.

HOLIDAYS: *Port Closed Days:* Chinese New Year, Hari Raya Puasa (1 Syawal), Deepavali, National Day and Christmas Day.

AIRPORT: Batu Berendam, 15 km. from port, catering mostly for domestic flights.

AUTHORITY: Malacca Port Authority, Tanjung Bruas Port, Tanjung Kling, 76400 Melaka, Malaysia. *Tel:* 06-511766, 511216. *Contact:* Chua Yew Liang, Port Manager.

MIRI, Sarawak (incl. Lutong, Kl. Baram, Kl. Niah & Kl. Suai): 04.26 N. 113.55 E. (See Plan)

Miri Roads is an open roadstead in a shallow bay, bounded at North by Tanjong Baram and at South by Tanjong Lobang.

PORT LIMITS: All navigable waters up to the high water mark and all land from the high water mark to the land boundary within the following limits:

Inner Limit:

Batang Baram within the high water lines, from the line delineating the Coastal High Water Line at the river mouth, upstream to the geographical parallel across the river at Lat. 3° 45′ 00″ N.

Outer Limit:

(i) From a point on the Coastal High Water line on the Sarawak/Brunei International Boundary, Lat. 4° 00′ 18″ N., Long. 114° 36′ 27″ E. (approx.)

(ii) Thence along the Coastal High Water Line in a generally Southwesterly direction to a point on the Miri/Bintulu District Boundary, on the N.E. bank of Sungai Selungun, Lat. 3° 35′ 19″ N., Long. 113° 20′ 18″ E. (approx.)

(iii) Thence along a line drawn in a 324° direction to its intersection with the limit of the Sarawak Territorial Sea, Lat. 4° 48′ 30″ N., Long. 113° 20′ 18″ E. (approx.)

(iv) Thence Northeasterly along the boundary of Sarawak Territorial Sea to its intersection with the International Boundary between Sarawak and Brunei on the Continental Shelf, Lat. 4° 48′ 36″ N., Long. 113° 57′ 12″ E. (approx.)

(v) Thence along the same International Boundary to the initial point defined in Clause (i) above.

DOCUMENTS: (a) Health. Vessels exempted from inspection (see "Health") should deliver to Berthing Master on arrival, a Declaration of Health, Last Port Clearance and 2 Crew and Passenger Lists.

(b) Inward Clearance (also see "Anchorage"). All vessels calling Miri Roads for passengers or cargo must be cleared by Immigration and Customs and, if necessary, by Port Health.

Inward Clearance effected only between 0600 hrs. and 1800 hrs. and following signals must be shown: if passengers carried, flags "3" and "4"; if no passengers carried, flags "2" and "5"; if Free Pratique requested, flag "Q".

Following papers will be required on arrival for inward clearance:

Port Health:

Declaration of Health.
1 Crew List.
1 Passenger List, inward and through.

Customs Boarding Officer:

As above, if not boarded by Health Officer, and 2 Inward Cargo Manifests.

(c) Outward Clearance. All vessels will be issued a Port Clearance by Customs Officer after the application has been verified by Port Officer at their respective office. Papers required are 2 Outward Manifests, 2 Crew Lists and, if any embarked, 2 Outward Passenger Lists.

APPROACHES: The loom of gas flares on Seria Oilfields 30 miles N.E. of Miri are a general guide at night but should not be used as a bearing because flares movable within area of oilfield and liable to be extinguished at any time. Following bearings exist. By night, three lighthouses:

(a) *Tanjong Baram:* Lat. 04° 35′ 47″ N., Long. 113° 58′ 25″ E., white single light 680,000 candle power, visibility 17 miles, elevation 120 ft. in grey steel lattice tower, group flash 3 every 20 secs.

(b) *Lutong:* Lat. 04° 28′ 30″ N., Long. 113° 59′ 46″ E., white single light, 13,500 candle power, visibility 10 miles, elevation 80 ft. in grey steel lattice tower, group flash 2 every 10 secs.

(c) *Tanjong Lobang:* Lat. 04° 21′ 48″ N., Long. 113° 57′ 36″ E., white single light 20,150 candle power, visibility 18 miles, elevation 155 ft. in grey steel lattice tower, 60 ft., flash 1 every 10 secs.

By day, above lighthouses difficult to distinguish and following may be used for day-time bearings:

(a) Lutong radio mast F.R 210 ft., position Lat. 04° 26′ 25″ N., Long. 113° 59′ 54″ E.

(b) Tanjong Lobang radio masts as marked on chart.

PILOTAGE: No official Pilot stationed at Miri but Shell Company provide Berthing Masters to moor vessels at their Lutong Moorings (see "Tankers").

ANCHORAGE: For tankers, please refer to "Tankers". For cargo, passengers or clearance, the outer area within an area to Northward of Lat. 04° 25′ 42″ N., Eastward of Long. 113° 55′ E. and Southward of Lat. 04° 23′ 42″ N. It is recommended that vessels of less than 5 m. draft may anchor close inshore directly opposite Miri River Mouth, but caution must be exercised as sudden squalls and swell up to 1.5 m. can occur, for which allowance should be made. For logs at Kl. Baram it is recommended that vessels anchor close inshore S.W. of Baram River Mouth, but caution must be exercised as sudden squalls and swells up to 2 m. can occur, for which allowance should be made. Extra caution must be exercised not to intrude the prohibited anchorage area at the further end of S.W. of Baram River Mouth and the numerous submarine gas lines around the area. For logs at Kuala Niah and Kuala Suai it is recommended that vessels anchor close inshore directly opposite Niah River Mouth and Suai River Mouth, but caution must be exercised as sudden squalls and swell up to 1 m. can occur, for which allowance should be made.

Cargo usually worked into or from wooden lighters or steel dumb barges ranging from 30 tons – 300 tons capacity. Swell often restricts work to landward side only and swell or wind often make it difficult to work Hatch No. 1 in some vessels. Accommodation ladder should be lowered on landward side to enable shore personnel to board.

Prohibited Anchorage and Berthing Area. From *(a)* Lat. 4° 30′ 54″ N., Long. 113° 56′ 19″ E. in a 090° direction to the shore; and from *(a)* to *(b)* in Lat. 4° 27′ 30″ N., Long. 113° 47′ 01″ E., thence in a 090° direction to the shore.

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine Signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

Free Pratique granted without health inspection to vessels calling to lift bunkers only at Lutong Moorings, provided ship healthy. Vessels with unclean bill of health or vessels which have not declared themselves healthy in their arrival notice telegram are subject to normal Port Health inspection procedure. Therefore of utmost importance that arrival notice is sent not less than 24 hours before arrival and contains all information requested (see "Radio") in order to prevent unnecessary delay.

RADIO: Miri Radio, call sign 9 WW21, frequency 500 kHz, operates at following hours local time: 0800 – 0830, 0900 – 0930, 1200 – 1230, 1600 – 1630. Present station has a limited range and if difficulty is experienced making contact or contact outside the above hours, vessels should pass messages through other stations, such as Kuching Radio or Singapore Radio, or through other ships in close vicinity of Miri.

Arrival notice must be telegraphed at least 24 hours before arrival and should contain following information:

All vessels
- *(a)* expected time of arrival (local time GMT plus 8 hours);
- *(b)* name of last port of call and next port of call, if not previously advised;
- *(c)* whether or not ship is healthy.

For bunkers
- *(d)* quantity of bunkers required, in long tons at least 48 hours' notice is required;
- *(e)* provisions or medical attention required, if any.

For cargo
- *(f)* tonnage to discharge, if any;
- *(g)* number of gangs required to load;
- *(h)* number of winchmen required to load.

Passengers
- *(i)* number of passengers to disembark.

Also see "Tankers" – Communications.

VHF: Vessels arrived at the anchorages and wishing to contact their local/abroad Agents should contact "Miri Control" by Channel 16 which will be subsequently transferred to either Channel 25 or 27 for through calls. "Miri Control" operates 24 hours daily.

BERTHING: Cargo vessels – see "Anchorage", oil carriers – see "Tankers".

MEDICAL: Treatment of urgent cases available on shore subject weather conditions. Early notice should be telegraphed of medical requirements.

TANKERS: There are 4 Single Buoy Moorings at Miri Terminal which are in the following positions:

SBM No. 1	Lat. 04° 28′ 21.9″ N. Long. 113° 56′ 20.8″ E.	Max. SDWT: 30,000 tonnes Max. draft: 37 ft. Min. water depth in manoeuvring area 40 ft.
SBM No. 2	Lat. 04° 28′ 48.9″ N. Long. 113° 56′ 33.0″ E.	Max. SDWT: 75,000 tonnes Max. draft: 37 ft. Min. water depth in manoeuvring area 40 ft.
SBM No. 4	Lat. 04° 30′ 15.5″ N. Long. 113° 56′ 26.3″ E.	Max. SDWT: 100,000 tonnes Max. draft: 39 ft. Min. water depth in manoeuvring area 42 ft.
SBM No. 5	Lat. 04° 26′ 49″ N. Long. 113° 53′ 48″ E.	Max. SDWT: 125,000 tonnes Max. draft: 56 ft. Max. loading rate: 2,700 cu.m.p.h. Min. water depth in manoeuvring area 66 ft.

The riser platform acts as a distributing point where all the valves to the SBMs are located and is positioned at Lat. 04° 29′ 33″ N., Long. 113° 56′ 37″ E.

Pipe-lines and Cargo Hoses:

SBM No. 1: Operational for the export of refined products only.

The connection between the distribution platform and the SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 2 × 8 in. and 1 × 6 in. diameter hose strings of 5 lengths each for direct connection to the tanker's starboard manifold. An additional 6 in. diameter self-floating hose string of 17 lengths is connected to the turntable.

The total length of the hose strings is 544 ft. allowing a maximum distance from ship's bow to manifold of 330 ft.

The maximum permissible draft is 37 ft.

SBM No. 2: Operational for the export of crude oil and fuel oil.

The connection between the distribution platform and the SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 8 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of the hose strings is 634 ft. allowing a maximum distance from ship's bow to manifold of 400 ft.

The maximum permissible draft is 37 ft.

SBM No. 4: Operational for the export of crude oil and fuel oil.

The connection between the distribution platform and SBM consists of 3 × 12 in. and 1 × 6 in. diameter pipe-lines/underbuoy hoses.

2 × 12 in. and 1 × 6 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 5 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of the hose strings is 648 ft. allowing a maximum distance from ship's bow to manifold of 450 ft.

The maximum permissible draft is 39 ft.

SBM No. 5: Operational for the export of crude oil only. The connection between the distribution platform and SBM consists of 2 × 16 in. and 2 × 16 in. diameter pipe-lines/underbuoy hoses.

2 × 16 in. and 2 × 16 in. diameter hose strings are connected to the turntable and joined together with buoyancy tanks, terminating in 27 lengths of hose for direct connection to the tanker's starboard manifold.

The total length of hose strings is 814 ft. allowing a maximum distance from ship's bow to manifold of 560 ft.

The maximum permissible draft is 56 ft.

Information Required Prior to Arrival: Standard message to Masters of vessels calling at SBM.

Please advise:

AAA	ETA and draft at Miri SBM
BBB	Customs and Health requirements
CCC	Is vessel equipped with bow chain stopper, Smit Brackets and a large central Panama Chock? (this information required from unknown vessels only)
DDD	Are manifold connections as per OCIMF specifications?
EEE	Rig starboard derrick to maximum (minimum acceptable 7 tons)
FFF	Have 2 × 12 in. manifolds ready on starboard side.
GGG	Be advised that vessel must maintain full readiness to manoeuvre during stay at SBM.

Berthing Instructions: After ETA advice one of the following messages will be transmitted to the Master.

AAA	Based on your ETA ....present intention is to berth you on arrival.
BBB	Pilot will board at Pilot anchorage area at the following coordinates: Lat. 04° 25′ N., Long. 113° 54′ E. Lat. 04° 27′ N., Long. 113° 56′ E.
CCC	Confirm ETA at least 48 hours in advance. When within range you are required to confirm your ETA 3 hours prior to arrival to Miri Terminal on VHF Channel 18 with Lutong Radio.
DDD	Please keep us advised of any changes in your ETA. Onus of ETA confirmation rests with vessel.
EEE	After having established radio contact on VHF you will receive further instructions.

Mooring Operation: Vessels are programmed for day and night berthing. Use of ship's anchors is strictly prohibited except in extreme emergency. The anchors must never be released or brought anywhere near the entire length of the submarine pipe-line nor closer than 350 m. radius from the SBM. Both anchors should be secured prior to berthing operations.

Floating Mooring Rope Assembly: The buoy to tanker mooring comprises of 2×15 in. circumference×150 ft. single braided ropes. At the buoy end, the hawsers are joined to the pad eyes of the Rotating Mooring Arm with heavy duty shackles. Each hawser of the dual floating mooring hawser is fitted with 50 ft.×1.5 in. diameter chafing wires.

The pick-up assembly consists of:
- (i) 8 in. circumference polypropylene messenger rope with spliced eyes on each side. Length 150 ft.
- (ii) 8 in. circumference polypropylene pick-up rope with tail-end spliced directly to chafing wire.
- (iii) Pick-up support buoy.
- (iv) 50 ft.×1.5 in. diameter chafing wire.

Mooring Craft: A mooring launch will be in attendance. The launch is used to send the messenger end of the mooring ropes to the vessel. On completion of mooring the launch picks up the hoses for connecton and remains at the vessel until the completion of loading.

Pilotage: Pilotage is compulsory within port limits for the size of vessels calling at the SBM. The Pilot will board at the Pilot anchorage area for both arriving vessels and the vessels which have been anchored there awaiting berth.

Mooring Procedure: Before the arrival of the tanker, the Berthing Master has to go to the SBM at least one hour early to check and make sure that the hoses and mooring ropes are not fouled. The mooring craft then proceeds to the vessel to disembark the Berthing Master.

During the vessel's approach the mooring boat tows the port mooring rope around the buoy so that it is out of the way when the starboard inner one is being worked on. The starboard inner rope is then run out to its full length.

When the end of the messenger is within range, the vessel's bow is approximately 115 m. from the SBM, i.e. 70 m. to go to final secured position. The approach speed at this point should not exceed 0.5 knots.

As the vessel slowly closes in on the buoy the messenger, pick-up rope and chafing wire are hove on board until the chafing wire is in position in the fairlead (marker buoy just outboard of fairlead). The chain stopper is secured to the chafing wire, while the eye is put on the ship's bollard to make fast.

While the inner mooring rope is being tended to, the mooring boat clears the (port) outer mooring rope from the buoy. This rope is then hove on board and connected in the same way as the inner one.

The vessel should have 2 mooring ropes ready on the forecastle, and mooring is carried out by ship's crew.

Cargo Loading Operation: Throughout the vessel's stay at the SBM, the Berthing Master will remain on board to co-ordinate ship/shore operations and one launch will remain at location as a safety precaution.

Connecting Hoses: Hose connection is carried out by ship's crew.

The hoses are lifted and connected one at a time. The forward or 'inner' hose is tended to first. The derrick runner is hooked into an enlarged link in the hose lifting chain and the hose end is then lifted out of the water until sufficient length is available for direct connection to the tanker's manifold. The weight of the hose in this position is transferred to the hose hang-off chain and the hose end is then lowered on to the deck. The blank flange is removed and the hose connected to the vessel's manifold. After connecting, the hoses are supported at the tanker side by flat webbing slings hung from the derrick runner in order to maintain a reasonable radius of bend. They are also suitably lashed to the hose bar of the side rail to reduce movement caused by sea conditions. In seas exceeding 5 ft., the floating hose strings become lively and require attention. Excessive movement of the hoses will result in chafing and strain on the flanges in way of the manifold. This can be reduced to a minimum by a suitable suspension of the hoses from the derrick runner backed up by rope lashings at the side rails or hose bars. Such preventive measures depend largely on the construction and layout of the tanker in the manifold area, also on the distance of the manifold from the vessels' side.

Loading Procedure: Miri Light Crude and refinery products are exported from the Miri Terminal. The quantities loaded are checked by the terminal at frequent intervals and vessels are requested to verify the shore figures.

The shore maximum back pressure is 180 p.s.i. The Berthing Master also acts as Loading Master and as the Terminal's Representative. He will attend to all cargo formalities (SSB forms, Safety Check List, etc.).

Prior to and during loading operations the following procedure will apply.

a. A joint inspection is carried out by ship and terminal representative to ensure all requirements on the Safety Check List have been compiled with.
b. The methods of communication between ship and shore is clearly established and understood. This includes procedures for normal and emergency stops of cargo loading operations. Test calls are made to ensure the system is operating satisfactorily.
c. Ship and shore to confirm readiness to start cargo loading operations.
d. Commencement of loading to be at slow rate.
e. Lines and hoses are checked and faults rectified. Launch to patrol around the vessel to check for oil leakages into the sea.
f. When the ship confirms receipt of cargo, test the emergency trip. After the test is completed start pumping and gradually increase to agreed loading rate.
g. Lines, hoses and the water around the vessel are again checked.
h. Ship and shore figures are to be compared every 2 hours and discrepancies investigated.
i. At least 15 minutes' notice should be given to the terminal before each stop or in regard to slowing down the loading rate for "topping off".

Ballast: Vessels must arrive with sufficient ballast for safe manoeuvring into the berth.

There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Deballasting prior to the ship being fully secured to the buoy is only allowed after consultation with the Berthing Master.

Suspension of Loading Operation: If loading operations are suspended for an excessive period (e.g. leakage), hoses should be disconnected, blank flanged and made ready for lowering into the sea.

Disconnecting Hoses: The "after" or outer hose is disconnected first. It must be assured that all the bolts are fitted and properly tightened. The gasket must be in good condition and changed regularly. As soon as the hoses have been disconnected from the tanker's manifold, the blank flanges are fitted and the hose support buoy as well as the free end of the "hose hang-off chain" are shackled to the lug on the spool piece. Each hose is lowered over the side and towed clear from the tanker's side or temporarily secured to the SBM in a bight to prevent possible entanglement with the tanker's propeller.

Unmooring: Weight on the mooring ropes may be taken off by using ship's engines. The polypropylene pick-up ropes, which remain connected to the triangle plates of the chafing chains, are lead to the winch, and the weight is taken off the bow stopper or nylon snotter as the case may be. The bow stoppers are released or special shackles disconnected, and the moorings and pick-up ropes lowered from the bow into the water.

When both moorings have been let go, the tanker is given sternway until the bow is well clear of the hose strings.

Communications: Vessels are required to advise Sarawak Shell Berhad/Respective Agents of their ETA's 48 hours and again 24 hours prior to arrival. Telexes or telegrams should be sent to MA74306 or Saroilco Miri, respectively.

6 hours and again 3 hours prior to arrival, vessels are required to confirm their ETA to Miri Lutong Terminal on VHF Channel 18.

During office hours "Shell Marine" can be contacted on Channel 18, but this radio has a limited range.

Weather: The SBMs are positioned in the open sea. The weather in this region is basically good for tanker operations.

The seasonal weather patterns are broadly divided into three and the terminology used is consistent with that of South East Asia. These three types are:

(1) S.W. Monsoon (June–October)
(2) N.E. Monsoon (December–March)
(3) Transitions between the monsoons.

Persistent bad weather occurs during the N.E. monsoon. High swell conditions can persist for periods of 3 to 4 days and in extreme conditions for up to a week. During the S.W. monsoon winds are generally light to moderate, but during brief surges (generally lasting less than 36 hours) winds are occasionally strong, and local gale force squalls are experienced. The most favourable time for tanker operations is during the transition periods. Winds are lighter and variable. Seas in this period are rarely more than very slight. The only troublesome features of the periods are the occasional severe squalls that originate from inland, which are associated with cumulonimbus clouds and thunderstorms.

The basic patterns of these squalls are vigorous thunderstorms inland, increasing as the storm approaches. Just before the onset of torrential rain, the wind backs rapidly towards the land and increases violently to the peak gust.

Immobilisation: Immobilisation of engines is not permitted at any time during the vessel's stay at the SBM.

Transmission of Ship's Radio: Use of the ship's radio transmitter is prohibited during the vessel's stay at the SBM.

FRESH WATER: No fresh or boiler water available.

FUEL: No ex-barge facilities but bunkers obtained from Lutong Terminal.

Sealines Nos. 2 and 4. Available for bunkering dry-cargo vessels. Ship's spring wire will be used to haul ends of mooring wires on board and mooring winches should be double gear and in all respects ready for use. All other gear for mooring and connecting pipes is brought on board with Berthing Master at Pilot Station. Bunkers will be supplied through 8 in. flexible hose brought up on starboard side amidships and appropriate flange on ship's connection should be removed in advance. Berthing Master will remain on board throughout bunkering operation and will leave after vessel has unberthed. Mooring and unmooring operations each require about 1.5 hours and bunkering rate usually 45 t.p.h. – 75 t.p.h.

REPAIRS: Emergency deck and hull repairs can be carried out offshore. Please contact Harbour Master for arrangements if required. Tel: 085-32911 (office hours) or 085-33232 (outside office hours).

CUSTOMS ALLOWANCES: Bonded Store on vessels other than those berthing at Lutong Moorings for bunkers only and exempted from formal clearance, sealed by Customs after allowing a daily ration for duration of stay in port.

One Customs Officer will remain on board all vessels anchored in Miri Roads and accommodation, if necessary, should be arranged for them. The Agents' staff will remain on board throughout all cargo operations and it would be highly appreciated if meals could be supplied to them and to the Customs Officer in view of the long time occupied travelling by launch between ship and shore.

REPATRIATION: Crew changes and repatriation can be carried out at Marine Office, Kubu Road, Miri with little difficulty.

AIRPORT: Distant 10 km., daily, day and night flights.

TIME: GMT plus 8 hours. Permanent.

HOLIDAYS: New Year's Day; Chinese New Year; Good Friday; Labour Day; Wesak Day; Dayak Festival Day (Gawai); Yang Dipertuan Agong's Birthday; Hari Raya Puasa; T.Y.T. Yang Dipertua's Birthday; Natiomal Day; Hari Raya Haji; Awal Muharram; Prophet Mohammad's Birthday; Christmas Day.

Chinese New Year; Dayak Festival Day (Gawai); Hari Raya Puasa normally has 2 days holiday.

SHORE LEAVE: It is regretted that both passengers and crew must be dissuaded from coming ashore other than for medical attention, owing to weather and tidal restrictions.

IDENTIFICATION CARDS: Seaman's Record Book is sufficient.

LUBRICANTS: Generally, lubricants not available but in emergency certain grades sometimes obtainable in very limited quantities.

PROVISIONS: Limited fresh provisions and ex-bond stores available for which vessels should give 72 hours notice of requirements so that arrangements can be made to secure the required supplies.

REGULATIONS: The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than east 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

POLICE/AMBULANCE/FIRE: Tel: 999.

AUTHORITY: Marine Officer, Marine Department, Kubu Road, Miri, Sarawak, Malaysia. *Tel:* 085-32352; 085-32911, 085-33301. *Cables:* "Shipping Miri".

Miri Port Authority, River Road, P.O.Box 1179, 98008 Miri, Sarawak, Malaysia. *Tel:* 085-38481; 085-38529. *Telex:* 74227 MA Tyseng. *FAX:* 085-417191. *Contact:* The General Manager.

AGENT: See "Kota Kinabalu".

PASIR GUDANG, Malaya: 01.26 N. 103.54 E.

(See Plan)

LOCATION: The port is situated on the Malaysian Coast of the Straits of Johore, 10 nautical miles East of Johore Bahru Town. The approximate position is Lat. 01° 26′ 06″ N., Long. 103° 54′ 25″ E.

DOCUMENTS:

Customs:

2 Personal Effects List,

2 Narcotics Lists,

2 Arms and Ammunition Lists,

2 Stores Lists made out on ships forms only, no special forms issued by the port. Customs Boarding Officer also requires a full and correct statement of all dutiable liquor and tobacco carried as ship's stores, the statement which is to be submitted in duplicate on forms provided by the Boarding Officer is to show in detail the quantities of dutiable goods held:–

(a) in the ship's stores, bars and shops;
(b) in the possession of Officers and Crew.

Immigration: 3 Crew Lists, all Crew Seaman's Books for entry visa stamp.

Port Health: 1 Vaccination List, Maritime Declaration of Health.

Police: 1 Crew List, 2 Narcotics Lists, 2 Arms and Ammunition and Explosives Lists.

PILOTAGE: Pilotage is compulsory for vessels either exceeding 45 m. in length and/or with height structure above 30 m. or without any radio communication on board, entering or leaving the Port Water Limits. Pilotage is provided by the Authority. The pilot boarding point is 2 miles S.W. of Tanjung Stapa Lt. (01° 20.6′ N., 104° 08.2′ E.).

ETA to be sent to Harbour Master 24 hours prior to arrival, and to pilot 3 hours prior to arrival or departure.

APPROACHES: *Fairway:* There is no limitation imposed on size of vessels passing through the fairway except for the draft. The main channel in the East Johore Strait has a depth of water up to approximately 12.5 m. (41 ft.) ACD up to the Port Waterfront and 11.6 m. (38 ft.) ACD for areas beyond up to the Causeway.

ANCHORAGE: Anchorage areas have been designated within the port water limits and as indicated in all navigational charts for the following:

(a) General purposes.
(b) Dangerous goods and explosives.
(c) Quarantine.
(d) Petroleum.
(e) Lay-up.

RESTRICTIONS: A 24 hour pilotage service for all vessels entering or leaving Johore Port is provided. However, the following restrictions are imposed.

1. *Recommended Speed:*

(a) The maximum recommended speed should not exceed 8 knots and when passing Fairy Point, the speed should not exceed 6 knots.
(b) Vessels are required to slow down when passing Johore Port area, Malaysia Shipyard Engineering (MSE) and Sembawang Shipyard areas.

2. *Reporting:*

When entering, transiting or leaving the East Johore Strait, all ships of 2,000 g.r.t. and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceed 30 m. are requested to comply to the contents of the Port of Singapore Circular No. 23 of 1981 (see "Traffic Information") in providing the following data:–

(a) Name and Call Sign of vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres;
(d) Destination (Sembawang port, name of shipyard, etc.);
(e) Point of origin (Sembawang port, Johore Port, Johore Shoal Buoy, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

on VHF Channels 11, 21 and 63.

3. *Tugs:*

Tug services are available for towage, berthing and unberthing operations within the port's water limits. This service is provided by the Authority's tugs and supplemented by privately operated tug companies. The tugs are mostly equipped with fire fighting and anti-pollution equipment.

(a) VLCCs or vessels of more than 280 m. in length are to be provided with at least 2 escort tugs when transitting the East Johore Strait.
(b) Vessels of more than 240 m. in length are required to be provided with 1 escort tug when transitting the East Johore Strait.

4. *General:*

(a) When a nuclear powered ship is underway in the East Johore Strait no vessel should be underway forward of her.
(b) Vessels above 180 m. in length will not be programmed to pass any vessel exceeding 280 m. in length transitting the East Johore Strait between Changi and Sembawang Shipyard.
(c) VLCCs or vessels of more than 280 m. in length will be programmed to transit the Fairy Point/Changi area during slack water or stemming the tidal current.
(d) Vessels of more than 240 m. in length will be permitted to transit the East Johore Strait only during daylight hours.
(e) Vessels of between 210 m. and 240 m. in length are permitted to transit East Johore Strait during non-daylight hours provided they have full use of engines and are programmed to transit during slack tide or stemming the tidal current.
(f) Anchoring is prohibited in the main channel. Any unauthorised anchoring must be reported immediately to Johore Port Authority and Sembawang Control.
(g) During the hours of darkness, tows are generally not permitted to transit East Johore Strait.

For the purposes of the above guidelines:–

(a) A VLCC (very large crude carrier) is deemed to be a tanker of 150,000 d.w.t. and above.
(b) Length of vessel refers to her overall length.
(c) Daylight hours means from 0700 hrs. to 1900 hrs.

VHF: Vessels can communicate direct with the pilot control station tower via ship to shore VHF on the following Channels:

Channel	*Ship Stations*	*Shore Stations*
11	156.550 MHz	156.550 MHz
21	157.050 MHz	161.650 MHz
(Listening Frequency only) 63	156.175 MHz	160.775 MHz

VHF network links the tugs, launches and the Authority's personnel working on board vessels at the anchorages.

TUGS: See "Restrictions" and "Facilities".

FACILITIES: *Oil Jetty:* Depth of water 10.2 m. (33 ft.), L-shaped with 2 berths.

Dangerous Cargo Jetty: Depth of water 11.0 m. (36 ft.), length 216 m. (708 ft.).

Ocean Wharves: Depth of water 12.2 m. (41 ft.), length 1,093 m. (3,583 ft.).

Coastal Wharf: Depth of water 5.0 m. (16 ft.), length 107 m. (350 ft.).

Transit Shed: (2) 21,256 sq.m.

Godown: (3) 23,411 sq.m.

Open Storage Yard: 2.05 hectares.

Container Yard: 44,175 sq.m.

Container Freight Station: 7,750 sq.m.

Palm Oil Tank Installation: Present capacity for crude and refined palm oil 121,000 tonnes.

Petroleum and Petroleum Products: Storage capacity 63,000 tonnes.

Grain Silos: 72,000 tonnes.

Fertiliser Storage: 59,000 tonnes.

Clinker and Gypsum: 27,000 tonnes.

Timber Terminal: 4.36 hectares.

Other facilities such as bauxite, ore and woodchip jetties as well as a shipyard (Malaysian Shipyard and Engineering) are available and operated by private companies. The shipyard undertakes repairs and docking to vessels up to 400,000 d.w.t.

Shore Equipment:

	Capacity	*Unit*
Forklift Trucks	8 tonnes	6
	6 tonnes	3
	2 tonnes	22
	2.8 tonnes	10
Towing Tractors	1.3 tonnes	1
	1.8 tonnes	1
	3.5 tonnes	2
Trailers	1.5 tonnes	5
	3.5 tonnes	2
Continuous Unloaders	800 tonnes/hr.	2
Level-Luffing Crane	15/400 tonnes/hr.	1
Multi-purpose Crane	35/400 tonnes/hr.	1
Container Cranes	36 tonnes	2
Straddle Carriers	36 tonnes	2
Transfer Cranes	36 tonnes	2
40 ft. Skeletal Semi-trailers		18
Container Terminal Tractors		10

Floating Equipment:

Tugs	1 – 3,200 b.h.p.
	2 – 1,800 b.h.p.
	1 – 1,240 b.h.p.
	1 – 750 b.h.p.
	2 – 350 b.h.p.
Launches	2 pilot launches
	4 – security launches
Lighters	8 – 80 tonnes capacity steel barges
	2 – 200 tonnes capacity steel flat-top water barges
Passenger Boats	6

STEVEDORES: Stevedore and shore labour undertaken by the Port Authority and shift times are as follows:–

0700 – 1500 hrs.
1500 – 2300 hrs.
2300 – 0700 hrs.

Stevedores may undertake work of opening/closing of hatches but rigging of gear must be done by the crew.

FRESH WATER: Fresh water connections are on the berth. The rate of supply being 20 t.p.h.

FUEL: All grades of Bunkers are available at short notice.

REPAIRS/DRY DOCKS: Situated in Pasir Gudang Industrial area is Malaysia Shipyard & Engineering Sdn, Bhd. MSE is a fully equipped up-to-date engineering establishment. With facilities for ship repairing, new-building up to 12,000 d.w.t. and general engineering works.

(1) Dry dock, length 395 m., width 80 m., depth 14 m., capable of handling ships of 400,000 d.w.t.

(2) No. 2 dry dock, length 270 m., width 46 m., depth 12.5 m. capable of handling up to 140,000 d.w.t.

(3) Newbuilding dock, length (approx.) 123 m., width 25 m., depth 8.0 m., capacity approx. 12,000 d.w.t.

Berthage: No. 1 quay, 390 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 2 quay, 268 m. long × 7 m. draft. 1 × 15 ton luffing crane. No. 3 quay, 268 m. long × 7 m. draft. 1 × 15 ton luffing crane.

SURVEYORS: Classification Surveyors are available from Singapore and Kuala Lumpur. Cargo Surveyors are represented locally by Caleb Brett, General Superintendents and Trident Malaysia.

TELEPHONES: Telephones may be placed on board at a connection charge of $/M25.00 per day.

GANGWAY/DECK WATCHMEN: The Port Authority has a Security Division responsible for the general security of the port area. The force consists of a detachment of trained armed guards. Their services are available if requested through the Agents.

SERVICES: *Provisions:* 2 licensed ship chandlers are able to provide and attend to all requirements.

CUSTOMS ALLOWANCES: Spirits: 0.125 of a quart per man per day or wine 1 quart per man per day; beer 1 quart per man per day, cigarettes: 25 in number per man per day or cigars 8 in number per man per day or tobacco 1 oz. per man per day.

Customs will issue allowance for total of 3 days, and on request to a Proper Customs Officer the seal may be broken for further issues.

CARGO GEAR: When possible all loading and discharging are carried out with ship's gear. Shore equipment comprises – 1 side loader capacity 52,000 lbs., 5 side loaders of capacity 9,000 lbs., each 2×28 tonne mobile cranes, and 2×10 tonne mobile cranes. For bulk cargoes, grains, fertilisers, sulphurs, etc., shore grabs of 2 tonne capacity connected to ship's gear.

REPATRIATION: Ship's crew with valid or recognised International Passport are permitted to enter and sign-off through Malaysia/Singapore checkpoint at Causeway, provided they obtain a transit visa from the Malaysia Authorities through the ship's Agents. Ship's crew without International Passport, and only Seamen's Books must join/leave ships via Kuala Lumpur.

TIME: GMT plus 8 hours.

HOLIDAYS: *Port closed Holidays:* The port is operationally closed during the following festival days:–

1. Hari Raya Puasa (Muslim Aid II Fitri);
2. Chinese New Year;
3. Malaysia National Day;
4. Deepavali;
5. Hari Raya Haji (Muslim Aid II Adha).

SHORE LEAVE: Shore leave for crew members is permissible. The nearest town is Masai approx. 5 miles from the port. Johore Bahru is approx. 23.5 miles from the port by road. Crew members are allowed to cross the Causeway into Singapore, providing they obtain the necessary permit from the Immigration Authorities through the ship's Agent.

DEVELOPMENTS: Johore Port has plans for the construction of 5 more wharves. The proposed berths are for dry bulk materials, general cargo and containers. The berths will serve the needs of specialised industries such as fertilisers, feedmeal, and grains. The construction of silos, storage area, and other processing plants is to be undertaken by the companies concerned. Completion expected by 1992. The container berths (2) will have a length of 700 m. and depth 15.0 m.

TRAFFIC INFORMATION:

Port of Singapore Authority – Port Circular No. 23, dated 20th March, 1981.

To: Shipping Community

Traffic Information System for Ships Transitting Serangoon Harbour: 1. In exercise of the powers conferred by section 65 of the Port of Singapore Authority Act (Cap 173) 1970, I hereby direct that Masters of vessels entering, transitting or leaving the traffic information area shall, in the case of vessels having a gross registered tonnage of 2,000 and above or whose masts or superstructures exceed 30 m. above the waterline or where the vessel is under tow and the combined length of the towing vessel and the tow exceeds 30 m., comply with the new VHF reporting system which is given in this circular with effect from 1st June, 1981.

2. *Method of Communication:*

2.1 The VHF traffic is conducted on VHF Channel 21 and Masters of vessels are required to listen to this Channel continuously while their vessels are entering, transitting or leaving the traffic information area.

2.2 In the event that Channel 21 is inoperative, Channel 13 will be used. Masters of vessels are required to contact Port Operations on Channel 12 for confirmation of breakdown of Channel 21 prior to using Channel 13 for communication with the PSA Control Station.

3. *Notification:*

3.1 Master of vessels mentioned in paragraph 1 intending to enter or transit the traffic information area shall give at least 24 hours notice to the PSA Control Station. The information required together with this notice are:

(a) Name and Call Sign of Vessel;
(b) Type of vessel (stipulate floating crane, oil rig, etc.);
(c) Max. height above waterline in metres;
(d) Destination (Sembawang Port, name of shipyard, etc.);
(e) Point of Origin (Sembawang Port, Johore Port, JSB, etc.);
(f) ETA at Johore Shoal Buoy or ETD.

3.2 This notification may be given to the PSA Control Station by telephone, VHF, telex, public telegram or W/T.

3.3 Between 2 and 3 hours before arrival at Johore Shoal Buoy (approx. positon Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.) or 3 hours before departure from a berth within East Johore Strait, Masters of vessels mentioned in paragraph 1 shall notify and seek permission from the PSA Control Station on Channel 21. In seeking permission from the Control Station, the following information is required.

(a) Eastbound:
ETD from berth
ETA at Perimbi Buoy (approx. position Lat. 01° 25′ 50″ N., Long. 103° 53′ 21″ E.).
ETA at Malang Papan Beacon (approx. position Lat. 01° 24′ 07″ N., Long. 103° 59′ 27″ E.).
ETA at Malang Tiga Buoy (approx. position Lat. 01° 23′ 09″ N., Long. 104° 01′ 33″ E.).

(b) Westbound:
ETA at Johore Shoal Buoy (approx. position Lat. 01° 18′ 53″ N., Long. 104° 05′ 00″ E.).
ETA at Malang Tiga Buoy.
ETA at Malang Papan Beacon.
ETA at Perimbi Buoy (if applicable).

Following approval from the PSA Control Station, Masters of Westbound vessels when passing Johore Shoal Buoy and Angler Buoy (approx. position Lat. 01° 21′ 06″ N., Long. 104° 03′ 07″ E) shall confirm or update their ETAs at Malang Tiga Buoy and Malang Papan Beacon.

3.4 Masters of Eastbound vessels shall confirm or update their vessels' ETAs at Malang Papan Beacon and Malang Tiga Buoy when passing Punggol Beacon (position Lat. 01° 25′ 19″ N., Long. 103° 54′ 48″ E.) and Squance Buoy (approx. position 01° 23′ 43″ N., 103° 58′ 00″ E.).

3.5 Masters of vessels should check their vessels declared ETAs at Malang Tiga Buoy and Malang Papan Beacon when their vessels are between Angler Buoy and Squance Buoy. Should the new ETAs at Malang Tiga Buoy and Malang Papan Beacon differ by 5 minutes or more from the last declared ETAs, they should update their vessels' ETAs with the PSA Control Station.

4. Masters of vessels failing to comply with these directions shall be guilty of an offence punishable under section 66 of the Port of Singapore Authority Act.

Signed: Port Master, Port of Singapore Authority.

SHIPMASTER'S REPORT: February 1979. (Updated 1986).

Port Limits: All the area of water enclosed on the West by a line drawn due South from Tanjung Bin (Lat. 01° 20′ 00″ N., Long. 103° 32′ 48″ E.) on the North by the Southern shores of the State of Johore, on the East by a line drawn 229° from Tanjung Stapa (Lat. 01° 20′ 36″ N., Long. 104° 08′ 12″ E.) and on the South by the limits of territorial waters of Johore, including the Johore River up to the bridge where the Johore Bahru to Kota Tinggi road crosses.

Documents: Agent: Last Port Clearance, Manifest, Bills of Lading, Ships Certificates, Crew Agreement (Articles).

Pilotage: Pilots board off Johore Shoal Buoy, request for Pilot to be made via Agents. Confirmation of Pilot boarding obtained from Johore Port Control, VHF Channels 11, 21 and 63.

Pilot launch is a fast motor cruiser.

Pilotage is compulsory for all vessels over 45 m. in length.

Anchorage: Ships proceeding to call at any of the docks within Johore Port Limits, may be requested to use the anchorage to the East of the pilot boarding point. Vessels may also anchor approx. 0.6 miles E.S.E. off Pasir Gudang wharf, for large vessels there is a mooring buoy to restrict swinging into the channel.

Max. Size: The navigational conditions in the Straits are adequate for vessels of sizes expected to call at Johore Port as determined by depths at Ocean Wharf, Oil Jetty, and Coastal Wharf. No limitations on the size of vessel passing through the fairway except for controlling draft in the East Johore Channel of up to approx. 11.6 m. Large vessels up to 400,000 d.w.t. can navigate the Straits in ballast proceeding to Malaysia Shipyard also situated in Pasir Gudang.

Health: Vessels Agent to give advance notification to the Health Officer, if possible 48 hours prior to ETA of vessel, together with a list of ports visited within the preceding 14 days. Vessels from infected ports, or without valid Derat Exemption Certificates, or with cases of sickness or death on board, must fly the quarantine flag, and proceed to quarantine anchorage until boarded by the Port Health Officer.

Radio: Singapore Radio 9VG is the most reliable, and messages are telexed direct to local Agent in Johore Baru.

VHF: The base station is situated at Pasir Gudang, Channels presently in use are 11, 21 and 63.

Tugs: 2 tugboats of 3,200 h.p., 2 tugboats of 350 h.p. Tugs normally meet vessels off the wharf, or at anchorage when mooring to buoy. Tugs lines used.

Berthing: Oil Jetty: Depth alongside 10.2 m.; "L" shaped jetty, with 2 berths.

Ocean Wharves: Depth alongside 12.5 m.; length of wharf 1,093 m.

Coastal Wharf: Depth alongside 5.0 m.; length of wharf 107 m.

The Ocean berth is designed for general cargo vessels, and bulk carriers, of approx. 20,000 – 60,000 d.w.t.

All cargo work is carried out by ship's gear, shore equipment is available, e.g. mobile cranes, side loaders, vacuvators.

Specialised Cargo Handling Facilities: Oil Jetty capable of handling Palm oil shipment. Liquid chemical installation of 21,500 tonnes capacity. Grain silos, 72,000 tonnes capacity. Fertiliser storage 59,000 tonnes. Timber terminal 4.36 acres.

Medical: Medical service is available from the nearby town of Pasir Gudang, which is only a short distance from the port. There is a General Hospital situated in Johore Baru to attend to serious cases.

Fresh Water: Fresh water is available through hydrants installed at frequent intervals on the wharves and the breasting island of the oil jetty. Fire fighting hydrants are installed throughout the port area, using separate fresh water, and sea water systems. Fresh water may also be supplied to vessels in the anchorage if required by water barge.

Fuel: Bunkers are available by pipe-line installed along the quay, or alternatively by barges. Bunkering is undertaken by Petronas.

Fire Precautions: The Port Authority maintains a fire and rescue service, with trained firemen responsible for fire fighting on board, and on shore. The brigade is equipped with modern fire fighting appliances, and salvage equipment. Tugs are also equipped with fire fighting equipment, and anti-pollution equipment.

Consuls: Nearest Consuls are situated in Singapore, and arrangements can be made to obtain Visa to proceed to Singapore to carry out ships business.

Hatches: Preferably all opening/closing to be carried out by ship's crew, as the stevedoring labour is inexperienced.

Services: The Malaysia Shipyard & Engineering Co. has an agreement with the Port of Singapore Authority for the use of a slop barge which may be sent to the Johore Anchorage to receive slops from tankers which are proceeding to MSE for repairs. Numerous other services, and local representation for engineering and marine equipment available from Singapore.

SHIPMASTER'S REPORT: April 1979. (Updated 1986).

Position: The port is situated at the Southern tip of the Malaysian peninsula on the East of Johore Straits, about 10 miles East of Johore Bahru town. The straits separating Malaysia and Singapore provides good shelter and safe anchorage.

The exact position is Lat: 1° 26′ 06″ N., Long: 103° 54′ 25″ E.

Approaches: Pilot is picked up at Johore Shoal buoy. Pilots can be contacted on VHF Channels 11, 21 and 63. The access route for vessels proceeding to the port branches via the buoy off Johore Shoal, passes through Kuala Johore and the bend off Serangoon North of Pulare Ubin. From Serangoon the route leads straight N.W. of the port. The East Johore channel has a depth of 38 ft.

Berths: There are at present 10 berths in the port.

Boarding Officials: Since this vessel came from Singapore, all clearances were arranged by the Agent there. The Customs boarded to check the seal on the bond. The Immigration, Port Health, etc. also boarded for a cursory check.

Discharging: Discharging was carried out using grabs which were attached to the ship's cranes. There are no facilities ashore for any type of discharging, except a small conveyor which is used for grain only. The grabs had no weight marked on them, hence it was insisted that the grab along with one full lift of cargo be weighed. This was done and the average weight of the grab was found to be 2 tons and the maximum cargo possible that could be lifted was 2.5 tons.

This port apparently handles a lot of fertiliser, but never in large parcels. This parcel of 6,000 tons was the second largest discharged. 4 cranes were used throughout and the discharge rate worked out to nearly 2,000 tons/day. The stevedores were initially warned against mishandling the cranes, and it was found that the operators handled the cranes very slowly and carefully.

Provisions: Available, but slightly more expensive than Singapore. No bonded stores available at this port.

Density: Varied from 1018 to 1021.

Shore Leave: There is no restriction on shore leave. No special permits/passes are issued, but the Agents suggested that persons going ashore should preferably carry their Passports/Discharge Books. The nearest city is Johore Bahru which is 20 miles away. Ample transport is available at moderate rates. About 4 miles away from the port there is also a village called Masai.

Medical: All types of normal medical attention available.

AUTHORITY: The Chairman, Johore Port Authority, P.O. Box 66, 81707 Pasir Gudang, Johore, Malaysia. *Tel:* 07-512601-8. *Telex:* MA 60717/60192. *FAX:* 07-512609. *Cables:* Johan Pasirgudang. *Contact:* Operations, Tel. 511766.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Container Building, P.O.Box 51, 81707 Pasir Gudang, Johore. Tel: (7) 514312/3. Telex: MA65084. Cables: "Jarship Pasir Gudang". Fax: (7) 514314.

Associated with Jardine Shipping Agencies.

PENANG, Malaya: 05.25 N. 100.21 E. (See Plan)

DOCUMENTS:

The Report of Arrival (provided in Marine Shipping Ordinance, 1952).
A copy of Passenger Statistics on prescribed forms.
A List of Crew Members.
A List of Passengers.
Evidence of last Port Clearance.
All Ship's Documents (Safety Equipment, Derat, Radio, Load Line and Register).
Maritime Declaration of Health.
International Health Certificate for passengers and crew.
Vaccination List, for Cholera, for passengers and crew.
Departures: Port Clearance Certificate signed by the Port Health Officer, to be shown to the Port Officer issuing clearance.
Clearance also required from Immigration.

For oil tankers, a copy of Ship's Manifest to be submitted. Ship carrying explosives, Master required to fill prescribed form "D" stating quantity of explosive cargo ship is carrying together with copy of Ship's Manifest.

PILOTAGE: Vessel approaching port has to send telegram to Pilot Office direct (cable address "Pilots Penang") or to ship's Agent stating "ETA North Channel Light Float" or in case of South Channel "ETA Pulau Rimau". Draft of vessel to be given. The Pilot Office could be contacted direct on VHF Channel 12 or through Penang Radio Exchange on VHF Channel 16 to local telephone No. 613313. At least 3 hours' advance notice should be given before arrival at Pilot point.

Pilot boat painted with International red colour hull with white upperworks with "Pilot" written in bold letters on both sides of boat and fitted with VHF which operates on Channel 12.

Pilot is usually taken onboard in vicinity of the North Channel Light Float in position Lat. 5° 35.9′ N., Long. 100° 12.45′ E. for vessels entering the harbour through the North Channel. For entry through the South Channel the Pilot will be taken onboard in vicinity of Rimau Wreck Buoy 1 mile South of Pulau Rimau Lighthouse.

Vessels awaiting Pilot can anchor, in case of North Channel, in the Pilot waiting area within the following co-ordinates:

1.	Lat. 05° 35.8′ N.	Long. 100° 10.9′ E.
2.	Lat. 05° 34.3′ N.	Long. 100° 10.9′ E.
3.	Lat. 05° 32.7′ N.	Long. 100° 13.0′ E.
4.	Lat. 05° 34.2′ N.	Long. 100° 13.0′ E.

An approach channel of 10 nautical miles × 183 m. wide for 1 line of traffic has been dredged at the North Channel. The available depth of water at the channel is periodically declared to port users. Current depth available is – 9.7 m. A.C.D.

Approach through the South Channel is restricted to vessels of 28 m. air draft - due to existence of the Penang Bridge. Current depth 5.8 m. A.C.D. Must comply to Merchant Shipping Ordinance 1952. Under Penang Port (Navigation within the area of the Bridge) Rules 1986.

Pilotage is compulsory for all vessels navigating in pilot district of Penang with the exception of fishing vessels and vessels of 600 g.r.t. and below.

ANCHORAGES: The Man of War, Petroleum, Quarantine, Explosive and local vessel anchorages are marked on Charts of the Penang Harbour (A.C. No. 3732).

There is no specific anchorage area in the harbour for vessels other than mentioned above. These other vessels are normally anchored South of Lat. 5° 26′ N. and North of Lat. 5° 22.80′ N. between the mainland and the island, clear of the berths, fairways and shallow areas.

RESTRICTIONS: No entry restrictions imposed other than those dictated by state of tide and draft of vessel.

Also see "Pilotage".

RADIO: Penang Radio, call sign 9MG. Channel 16 VHF for ship/shore telephone.

VHF: The Penang Port has various working Channels as follows:
Channel 16 – Watching Channel.
Channel 12 – Pilotage.
Channel 20 – Port Operations/ferries.
Channel 13 – Working Channel between tugs/Pilot.

TUGS: May be required to berth vessels at all berths in the port. 3 tugs available, 2,000 b.h.p., 1,320 b.h.p. and 1,200 b.h.p.

BERTHING: Berthing facilities are available at Butterworth Wharves, Vegetable Oil Tanker Pier, Bulk Cargo Terminal, Prai (all of which are located on the Mainland) and Swettenham Pier on the island of Penang.

Conventional Cargo handled at Butterworth Wharves and Swettenham Pier.

Butterworth Wharves: 4 ocean berths with a total quay length of 717 m. Depth alongside 8.9 m. There are 4 transit sheds of 11,288 sq.m. and 6 storage godowns with an area of 24,526 sq.m. An open-sided timber shed of 3,623 sq.m. and an open storage area of 13,006 sq.m. are also available.

Swettenham Pier: 2 berths with a total quay length of 366 m. Depth alongside 10.0 m. There are 2 transit sheds of 4,464 sq.m. and 8 storage godowns of 10,900 sq.m. This terminal which is equipped with a modern passenger terminal also caters for cruise liners from all over the world.

Also see "Equipment".

BULK HANDLING FACILITIES: *Bulk Cargo Terminal:* A bulk cargo terminal has been constructed to service dry and liquid bulk carriers. The terminal comprises 2 berths of 338.2 m. length. The first berth is 140.2 m. long and is equipped with a conveyor belt system to handle dry bulk cargo. Private pipe-lines are used for the handling of liquid cargo. The second berth has a dual berthing face for vessels. The main berth is 198 m. long while the inner berth is 154 m. long. Depth alongside is 10.0 m. The berths are linked to the storage area by a 1,219 m. access bridge. An area of 30.6 hectares forms the back-up for the storage sheds, stockpiling and tank farms.

Vegetable Oil Tanker Pier: A dolphin-type berth used exclusively for the Butterworth Vegetable Oil Installations. Pipe-lines connect the tanks to the berth providing speedy and efficient loading and discharge of vegetable oil, particularly palm oil, direct to and from the vessels. Depth alongside is 8.9 m.

Also see "Equipment".

EQUIPMENT:

Butterworth Wharves:	*No. of Units*	*Capacity*
Mobile cranes	2	5 tons each
Prime movers	8	12 tons each
Forklifts	41	3 tons each
Trailers	10	12 tons each
Tractors	1	—
Swettenham Pier:		
Mobile cranes	3	1.5 tons each
Shore cranes	2	2.5 tons each
Electric cranes	3	2.5 tons each
Container:		
Gantry cranes	2	35 tons each
Transtainers	8	30-35 tons each
Trailers	57	20-40 tons each
Prime movers	23	20-40 tons each
Front-end loaders	5	25-30.5 tons each
Clamp forklift	1	2 tons each
Forklifts	16	3 tons each (for CFS operation)
Power points for refrigerated containers	108	
Bulk Cargo:		
Bulk Cargo Terminal		
Kangaroo crane	1	12.5 tons
Payloaders	2	5 tons each
Mobile crane		1.5 tons
Conveyor belt	1	200 t.p.h. – 250 t.p.h.

For liquid bulk cargo, pipelines connect the berths to the tanks, located outside the Port area.

CONTAINER HANDLING FACILITIES: The Port has 2 container berths with total quay length of 322 m. Berth No. 6 is equipped with a Ro/Ro ramp of 8 m. wide and 28 m. long to service container and Ro/Ro vessels.

An 11.6 hectare marshalling yard with a static storage capacity for 7,845 TEU of containers, 2 freight stations of 11,892 sq.m. and 108 units of power points for refrigerated containers.

Also see "Equipment".

LIGHTERAGE: In the event of a vessel working in the Roads, lighterage is available for the transport of goods to and from the vessel. There are about 105 lighters operated by private companies.

BRIDGE: Channel width 156 m. Overhead clearance 28 m.

STEVEDORES: Stevedores and cargo handlers are obtainable from registered labour contractors. A Port Labour Board exists to register and control the employment of all categories of port labour.

Working Hours:

The Port operates round the clock. The working hours are as follows:

1st shift 0730 – 1530 hrs. (meal break 1130 – 1230 hrs.)
2nd shift 1530 – 2300 hrs. (meal break 1930 – 2030 hrs.)
3rd shift 2330 – 0730 hrs. (meal break 0330 – 0430 hrs.)

MEDICAL: Advance notice is necessary if medical attention is required so that arrangements can be made with Medical Department by Agents.

TANKERS: See "Fuel".

FRESH WATER: Fresh water is available at all times for supply to ships. Delivery can be through hydrants for vessels alongside wharf or by means of water-boats to vessels anchored in the Roads.

FUEL: Bunkering facilities are available from Shell Malaysia Ltd. and Esso Standard (M) Ltd., at their own wharves at Butterworth with a depth of 8.2 m. and from Caltex Ltd. at its wharves at Prai with alongside depth of 10.7 m.

Limited supply can be obtained by vessels anchored in the roads.

CONSULS: Danish Royal Consulate, Consulate of the Republic of France, Consulate of the Federal German Republic, Honorary British Representative, Consulate of the Republic of Indonesia, Consulate General of Japan, Consulate of the Netherlands, Royal Norwegian Consulate, Swedish Consulate, Thai Royal Consulate General.

REPAIRS/DRY DOCKS: The Port Commission operates the Bagan Dalam Dockyard on the mainland for minor and urgent repairs of vessels up to 700 tons displacement. All floating craft of the Commission are serviced at the Dockyard.

GANGWAY/DECK WATCHMEN: Services of a watchman recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.

AIRPORT: Distance from port to airport approximately 18.3 km. Served by both international and local airlines.

TIME: 7.5 hours ahead of GMT. No alteration to clocks during year.

HOLIDAYS: The 3 annual port holidays are the first day of Hari Raya Puasa, Hari Raya Haji (according on the Muslim Calendar) and National Day (31st August).

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: Available on request.

BANKS: Algemene Bank, Nederland NV, Bank Hin Lee Bank Bhd., Bank Bumiputra (M) Bhd., Bank Pusat Kerjasama Bhd., Chung Khiaw Bank Ltd., Citibank NA, Development & Commercial Bank (Ltd.) Bhd., Hong Kong & Shanghai Banking Corp., Lee Wah Bank Ltd., Malayan Banking Bhd., MUI Bank, Overseas-Chinese Banking Corp. Ltd., Overseas Union Bank Ltd., Public Bank Bhd., Southern Bank Bhd., Standard Chartered Bank, United Asian Bank Ltd., United Malayan Banking Corp. Bhd.

SERVICES: Some of the minor marine services provided by private firms are draft survey, general conditioning of ships, valuation of ships, accident survey, inspection of refrigeration, radar adjusting service, compass adjusting and tank cleaning.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Needed only when a crew member is discharged after hospitalisation or when he is repatriated.

REGULATIONS: When a vessel calls at port, Customs search party may go on board vessel to search for contraband goods.

DELAYS: Rain is only factor that may delay a ship's discharging or loading operations.

DEVELOPMENTS: *Development Projects:*

1. Acquisition of one gantry crane in 1991.
2. Acquisition of 3 transfer cranes in 1991.
3. Acquisition of 2 FEL/Reach Stackers in 1991.
4. Conversion of Berth No. 4 at Butterworth Wharves into a container berth – 3rd quarter of 1990.
5. Expansion of container yard from 11.61 hectares to 15.04 hectares, which is capable of stacking 10,600 TEUs.

Major Projects: Construction of North Butterworth Container Terminal – operational by 1994.

Scope of Project:

1. Wharf : 350 m.
2. Depth : −12 m. A.C.D.
3. Approach Bridge : 520 m. × 19 m.
4. Land Area : Land Reclamation – 42 hectares.
5. C.F.S. : 1 Godown × 6,000 sq.m.
6. Equipment : 3 gantry cranes, 8 rubber tyred transfer cranes. (1 over 4 and 6 container and 1 chasis lane).

Implementation Programme:

Phase 1: (3rd quarter 1990 – 3rd quarter 1991).
Dredging and Reclamation – 42 hectares of sea-bed.
Phase 2: (3rd quarter 1991 – 2nd quarter 1993).
Construction of wharf and bridge.
Phase 3: (2nd quarter 1992 – 4th quarter 1993).
Construction of port buildings, marshalling yard and utilities.
Phase 4: (1st quarter 1992 – 4th quarter 1993).
Acquisition of container/cargo handling equipment.

AUTHORITY: The Penang Port Commission, P.O.Box 143, 10710 Penang, Malaysia. *Tel:* 04-612211. *Telex:* Pelpin Ma 40157. *Cables:* "Wharves Penang". *FAX:* 604-613336. *Contact:* General Manager or Chief Marine Officer.

PORT DICKSON, Malaya: 02.31 N. 101.47 E.

DOCUMENTS:

1. *Harbour Master's Office or Marine Department*
   - *(a)* "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.
   - *(b)* One copy, Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.
   - *(c)* Port Clearance from last port and copy of Manifest of Cargo to be discharged.
   - *(d)* List of all arms and explosives on board.
   - *(e)* In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port, produce to Port Officer the Certificate of Registry and ship's Articles.
   - *(f)* All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load-line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derat Certificate and all Certificates of Competency of all Officers on board.
   - *(g)* Crew List.
2. *Immigration Authorities*
   - *(a)* Crew List (3 copies).
   - *(b)* Passenger List (3 copies).
   - *(c)* Produce all passengers passports/visas.
   - *(d)* Produce all Seaman's Cards.
   - *(e)* Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.
3. *Port Health*
   - *(a)* Crew List showing last date of vaccination.
   - *(b)* Passenger List showing the last date of vaccination.
   - *(c)* Produce all seamen and passengers' vaccination cards.
4. *Customs Department*
   - *(a)* Crew List (2 copies).
   - *(b)* Passenger List (2 copies).
   - *(c)* Personnel Effects List (2 copies).
   - *(d)* Cargo Manifests (2 copies).
   - *(e)* Last Port Clearance.
   - *(f)* Bonded Stores List (2 copies).
   - *(g)* Full and correct statement of dutiable goods carried as ship's stores (2 copies).
   - *(h)* Customs Form C.D.15 obtainable from Customs Department on arrival.

APPROACHES: Deep water approach channel from N.W., marked by 5 light buoys, presents no difficulties and is clear.

PILOTAGE: The Port Dickson area does not constitute a Compulsory Pilotage District under provisions of Merchant Shipping Ordinance, 1952. Private pilotage services are, however, operated by Shell and Esso for vessels making use of their respective marine installations. Mooring Master boards tankers at Banbeck Shoal Buoy. Pilots on VHF Channel 19.

Ship's Officer's Report: Pilot boards one mile off Fairway Buoy. However, vessels of less than 30,000 d.w.t. holding Admiralty Chart No. 1140 may be requested to proceed inwards, Pilot boarding at No. 1 Buoy. Coasters proceeding to Headlands Jetties may be required to do own pilotage.

ANCHORAGES: *(a)* Good anchorage may be obtained in depths from 15 to 20 fathoms, Westward and South-Westward of Tanjong Kamunin. Small vessels may obtain anchorage in depths from 4 to 5 fathoms North-Eastward of Pulau Arang Arang, but holding ground is poor.

(b) Prohibited Anchorage Area indicated by pecked lines on chart and described under Port (Negeri Sembilan) (Amendment) Rules, 1963. This area contains a tanker SBM, with extensive ground tackle and floating hose attachments, which is connected to the shore by a submarine pipeline. Passage between the buoy and the shore is also prohibited.

RADIO: *Ship's Officer's Report:* Send ETA 96 hours and 24 hours in advance. Two hours before arrival keep listening watch on Channel 16. Shell Oil Terminal on VHF Channel 16 and 19. Cargo operations are carried out on Channel 9.

TUGS: No tug-boats available.

MAX. SIZE: Up to 49 ft. draft at S.B.M. terminal.

BERTHING: Port installations at Port Dickson comprise the following:

A small boat harbour contained in the curve of the stone approach to the Railway Jetty which affords little shelter against Southerly winds dries out at low water.

The Shell Jetty – property of the Shell Refining Co. (Malaysia) Ltd. (Private). Reinforced concrete jetty 700 ft. with "T" head 170 ft.×36 ft.

The Esso Jetty – property of the Esso Standard Malaya Ltd. (Private). Reinforced concrete island jetty 200 ft.×24 ft.

The Railway Jetty – property of the Malayan Railway Administration. Stone pier 600 ft. length terminating in a crosshead 150 ft. long with steel piling and wooden deck.

The Joint Shell/Esso single-buoy Tanker Mooring and Crude Oil Discharging Terminal (see "Tankers").

Stone ramp on foreshore usable by lighters at high water.

MEDICAL: District hospital with 150 beds.

TANKERS: *Cautionary Advice - Operating Conditions - Esso SBM:* Strong local winds, ("Sumatras"), often occur during darkness and without any advance warning. For this reason, it is essential that arrangements be made during the early part of discharge in order that a sufficient number of tanks are ready to receive ballast as soon as required.

In order to safeguard the SBM installation and the ship, no large crude carrier is permitted to fully discharge without having ballasted to at least 15% of her deadweight. For ships completing discharge and sailing during daylight hours, a 20% minimum deadweight is usually acceptable but all cases are treated on an individual basis, season of year, present weather conditions, tidal stream, etc. being considered.

If during discharge of cargo, stoppage of some hours is advised by the installation, then opportunity should be taken, after joint consultation between ship and shore, to ballast to normal sea ballast condition, to avoid a delay after the cargo discharge is finally completed, assuming that the Master wishes to take ballast additional to his permanent ballast prior to sailing.

Upon arrival, ullages and samples are taken by shore representatives. Prior commencing ballasting, tanks are certified dry by a shore representative. Likewise if ballast is taken on board prior to completion of cargo, tanks should be inspected.

Shore will instruct at what stage of the operation the compartments containing the residues and the load on top or parcels should be discharged.

Vessels moored at the SBM must keep engine ready on short notice. Immobilisation of engine is not permitted. Propeller of turbine engine should be turned at minimum revolutions. This point should be discussed and co-ordinated with the Marine Superintendent since higher revolutions may cause vessel to surge forward and damage SBM, hoses and ropes.

On approach of the "Sumatras" engine should be immediately put on standby. The critical moment is when a vessel lying with the tide is caught by the wind and swung around the buoy. During the swinging-process the vessel may gain great momentum and put the hawsers under heavy strain.

The Marine Superintendent does not remain on board the vessel during the discharge, but may be reached at any time via VHF Channel 9.

A launch remains in attendance at the ship for tending hoses, mooring, etc. In addition to the VHF radio operators, 2 workers, per shift, remain on board.

The terminal requires that a seaman from the vessel is stationed on the forecastle to watch moorings at all times and alert the Master whenever vessel's bow tends to touch the SBM and/or at anytime anything is going wrong with mooring arrangements.

General: The Shell/Esso SBM is located West of the town of Port Dickson. It is used for the crude discharge by Exxon controlled tonnage and by Shell for both crude discharge and fuel oil loading. The SBM is operated by Shell. In addition each company also operates a conventional type of wharf for export cargoes.

Communications: Radio traffic to and from vessels to be directed via Penang Radio. Vessels to monitor Penang Radio or Singapore Radio for traffic list.

Vessels should listen on VHF Channel 16 (alternate 9) 2 hours before arrival. Call sign "Shell Port Dickson".

Arrival Advice: Vessels should include in their arrival message, ETA at Fairway Buoy, draft forward and aft, Bill of Lading figures in barrels and Long Tons, number and location of tanks where slops were consolidated prior to loading and amount of water, residues and cargo loaded on top. Also include measurements of bow openings, cargo manifold and lifting capacity of ship's boom, if problem is foreseen. For crude oil washing request "Essoref PortDickson" well in advance for the COW questionnaire to be completed and cabled back to 'Essoref'.

Preparations: Crude vessels bound to SBM should have their accommodation ladder rigged on the starboard side. Port and Starboard derricks rigged. 2 good mooring ropes should be readily available on the forecastle head to be used as messenger lines. "Panama" centre fairlead to be uncovered.

Navigation: On approaching the Fairway Buoy moored in position Lat. 02° 30′ 00″ N., Long. 101° 42′ 48″ E.; the National Electricity Board Power Station chimneys provide a prominent landmark. The refinery flares also provide landmarks which can be easily identified. It should be borne in mind that the 2 gas flares may be extinguished at times. Position of NEB Power Station: Lat. 02° 31′ 58″ N., Long. 101° 47′ 30″ E. Painted white horizontal bands and red horizontal fixed lights at top and mid height. Height above sea level 307 ft.

Position of Shell flare: Lat. 02° 32′ 02.3″ N., Long. 101° 48′ 45.3″ E.

The Esso flare is about 1 mile East of the Shell flare.

Fishing boats may be encountered in the approaches to the Fairway Buoy and they may present a navigational hazard.

Anchorages: It is sometimes necessary for vessels to anchor to await berth or suitable tides for berthing. Anchoring position for large crude carriers is 1 mile North of Fairway Buoy. If wait at anchorage is expected to be more than 3 days then vessel to anchor about 1.5 miles East of Fairway Buoy in order not to hamper navigation of other vessels in the Fairway Channel. Masters not familiar with this port should not enter the channel without a Pilot and should drop anchor outside at the Fairway Anchorage.

Product vessels routinely trading Port Dickson normally enter the channel and anchor about 0.5 miles N.E. of Buoy No. 2.

Pilots and Tugs: The Shell Refinery Marine Superintendent will board crude vessels for pilotage and mooring at the anchorages or 1 mile off the Fairway Buoy while underway if vessel is to berth on arrival. Anticipated time of boarding, etc. will be advised by Radio W/T or VHF. The Shell Marine Superintendent monitors VHF Channel 16 (alternate 9) on 24 hours basis. No tugs are available.

Esso/Shell SBM: General: The SBM is moored in position Lat. 02° 31′ 19.6″ N., Long. 101° 47′ 03.5″ E. (Pulau Arang Lighthouse bearing 122° 8 cables distance).

The SBM is moored in 16 fathoms of water and the least depth within a radius of 1,000 ft. from the SBM is 53 ft.

Berth Approach: Vessels from the anchorage proceed towards the SBM through the buoyed channel at the time established by the Marine Superintendent. Vessels up to 30,000 d.w.t. berth at any stage of the tide. Vessels in excess of 30,000 d.w.t. generally moor at SBM during ebb tide when N.W. tidal stream is running. There are no night restrictions for berthing.

Mooring: Vessels are moored to the SBM by means of 2×120 ft.×12 in. nylon ropes with a breaking strength of 125 tons each which are connected to 6 in. wire snotters secured on the ship's bollard. Hawser's chafing chains are, if possible, led through the ship's centre line "Panama" type fairlead. Large crude carriers may connect a third nylon preventer rope.

Mooring/unmooring is done by a shore gang, but assistance of the ship's crew will be required to operate all ship's equipment, winches, etc.

Certain mooring equipment, i.e. shackles, wires, snotters, etc. will be brought on board from the pilot mooring launch.

When the vessel is about 600 ft. from the SBM the mooring launch will run out to the vessel's port bow with one 12 in. nylon rope to which is connected a 10 ft. length of 2.25 in. diameter chain and a monkey face. To this monkey face, the launch will have connected a 500 ft. long 10 in. polypropylene pick-up rope. The tanker then lowers a ship's rope as a messenger from the port bow to the launch, which will connect the ship's rope to the polypropylene pick-up. The tanker will then heave up on the messenger and the pick-up until the monkey face is in-board when it will be shackled to the 6 in. wire snotters already fastened around the ship's bollards. When the launch has made fast the port messenger connection to the ship's rope, she will then run out the second ship's rope to the buoy and connect the second 12 in. buoy assembly line. Whether the third 12 in. nylon preventer should then be connected will be advised by the Marine Superintendent.

There is no night restriction for unberthing but awaiting of flood current is strongly recommended.

Cargo Operations: There are 2×16 in. hoses, each string 700 ft. long supported by flotation beads.

Each string terminates at the ship's end with a keystone valve having a flange of 12 in. ASA (150 psi).

Connecting and disconnecting of hoses is done by shore gang with the assistance of ship's crew and under ship's responsibility. A large crude tanker in empty condition is required to have derricks with safe lifting capacity of 10 tons to take the weight of a full hose. Hoses are fastened to the ship's main deck and are supported by means of chains. Connections from the SBM to the 30 in. diameter submarine pipe-line to the shore is by means of 2×16 in. diameter submarine hoses. Hydraulically shore operated valves are fitted at the connecting points on the sea bed.

The line from the shore to the refineries is 31 in. diameter – about 2 miles long to Shell and 3 miles to Esso.

The shore system has proved capable of handling rates of 5,500 cu.m.p.hr. but the governing factor at all times is the Ship's Rail Pressure. Ship's Rail Pressure must never exceed 120 p.s.i. (10 kg./sq.cm.).

Due to the SBM being a jointly owned facility, the system will on occasions contain oil owned by the other party, or another grade of crude oil. It is therefore often necessary for line clearing operations to be carried out before bulk discharge commences. Ship's manifold should remain closed when no cargo is being discharged as there may be static head back pressure of some 30 p.s.i. (2 kg./sq.cm.) once the shore lines are opened.

Line clearing involves the pumping of approximately 1,500 tons of cargo to shore tanks. The exact figure will be advised and controlled by shore; ships are, however, required to keep a close check in order that over clearance be avoided or in case radio contact is lost. Esso Refinery representative will board the vessel when berthed and will advise the quantity and procedures to be followed. Once line clearance has been completed and the necessary tanks lined up, readiness to receive cargo will be advised by shore. Discharge should commence using one pump first when oil is being received by shore, the ship will be advised to increase the pumping rate, until 120 p.s.i. at rail is reached.

Due to refinery operating requirements, it will sometimes be necessary to stop pumping during the change over of shore tanks. Shore will give ship at least 20 minutes notice before the ship is required to stop.

Advice to stop pumping will be confirmed 5 minutes before actual stoppage is required. If at that time, or any other time, radio contact is lost the ship should stop pumping until contact is re-established.

Every hour the quantities received ashore are advised by the refinery control. Ships are asked to check that these figures tally with the amount discharged.

The stripping and draining of cargo tanks should be commenced as soon as possible and every endeavour made to keep ahead of discharge, in order that no delay be incurred by draining. It is also essential that sufficient tanks be drained during the early part of the discharge, as it may at any time be necessary to suspend discharge and commence ballasting due to weather deterioration. This applies particularly to vessels without permanent ballast tanks or vessels whose permanent ballast is less then 20% of deadweight. In Port Dickson, experience has shown that a good trim is required for an efficient and quick draining. This is of particular importance for vessels stripping high vapour pressure crudes.

Two battery operated VHF radios on Channel 9, with an operator on a 6 hour shift, will be placed on board for all ship/shore contact throughout a vessel's stay at the SBM. It is suggested these should be sited in the ship's office or in some convenient room near the centre of operations (Cargo Control Room).

Ship/shore radio checks are to be made every hour, or more frequently if reception conditions are poor and if contact is lost cargo operations should cease immediately. Ship's VHF should be ready at all times to be used in case of failure of the portable sets.

Environmental Conditions: Strong local winds, known as "Sumatras" occur during the period May to October. They blow usually from a southwesterly to a Northwesterly direction, are of short duration (1 to 4 hours average) and velocities of between 40 and 50 knots have been experienced. They are usually followed shortly after onset by very heavy rain.

Direction of the tidal current at the SBM is approximately 326°-146° with a maximum rate of 3 knots. The Northwesterly current (ebb) which normally flows for 6 hours starts 3-4 hours after HW and ends about 3-4 hours before HW. Port Dickson tides are semi-diurnal.

Density of water at the SBM varies between 1018-1023.

Safety, Fire and Protection: General: A Safety and Pollution Check List is used at each terminal and international accepted safety and pollution rules are strictly enforced. Discharge should be stopped immediately and the Marine Superintendent advised promptly in case of pollution incident.

Fire Fighting: In the event of fire on board, cargo operations should be stopped immediately, valves closed and terminal's superintendent advised.

No fire fighting facilities are available. The Marine Superintendent will be available to advise Masters and to assist if feasible in moving the vessel to an anchorage clear of the berth.

In case of breakdown of communications via VHF ships should use their whistle (six long blasts).

Security: No security problems have been reported, and shore leave is permitted.

Services: Fresh Water: Fresh water requirements should be cabled to the Agent prior arrival. It is supplied by a 180 ton steel barge.

Bunkers: All grades of bunkers are available alongside at both Esso and Shell Product Piers. No bunker barges are available to supply crude vessels at SBM or at anchor.

Provisions, Laundry, etc.: Fresh and dry provisions are available through a ship chandler. Limited selection of bonded stores also available. 24 hour laundry service available, if arranged prior to arrival. No deck/engine store available.

Tank Cleaning: There are no tank cleaning facilities. Facilities for receipt of dirty ballast are limited to Esso and Shell product piers.

Crew Change and Repatriation: Available through Kuala Lumpur airport.

Esso Product Jetty: Berth is constructed of reinforced concrete. The island jetty is 200 ft.×24 ft. with 4 off-lying mooring buoys inshore for mooring purposes. Accommodation for one vessel on outer face only.

Max. LOA 575 ft.; max. draft 34 ft.; max. size 19,500 d.w.t.

Shore connections:
1×20 in. black oil/ballasting
1×16 in. white oil line
1×10 in. LPG line
1× 4 in. inert gas line
1 crane to handle hose

FRESH WATER: Available at Shell and Railway jetties.

FUEL: Bunker fuel oil available. No diesel.

REPAIRS/DRY DOCKS: None.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars 8 in number per man per day, or tobacco 1 oz. per man per day, or snuff 1 oz. per man per day. Wine and/or spirits, spirit 0.175 qt. per man per day, or wines 1 qt. per man per day, or beer or stout 1 qt. per man per day.

AIRPORT: No airport locally.

HOLIDAYS: Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammed's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

DEVELOPMENTS: Proposal to enlarge facilities and to provide deep-water berths.

AUTHORITY: See "Malacca".

PORT KELANG, Malaya: 03.00 N. 101.24 E. **(See Plan)**

PORT LIMITS: *Northern Limits:* A line from Beacon B running N.W. towards Pulau Angsa Lighthouse until it intersects Lat. 3° 07′ 24″ N., thence extending due East along this latitude till it meets the mainland; *Southern Limits:* A line from Tanjung Ru running West along Lat. 2° 50′ 21″ N. till it intersects Long. 101° 14′ 00″ E., thence extending due North along this longitude till it meets Pulau Pintu Gedong;

There shall be included within the limits all waters in the Klang Straits, Selat Lumut, Sungai Puluh, Sungai Aur, Sungai Langat and other waterways contained within the Lat. 3° 07′ 24″ N. and 2° 50′ 21″ N., and Westwards towards the coast from Long. 101° 28′ 30″ E. (which passes through Connaught Bridge): including all piers, jetties, landing places, wharves, quays, docks and other similar works whether within or without the line of high-water mark and any position on the shore or bank within 45.72 m. of the high-water mark, subject to any rights of private property therein.

APPROACHES: Ships from and to Penang enter and leave the port by the North Klang Straits, and ships from and to Singapore enter and leave by the South Klang Straits. The entrance channel at the North Klang Straits is dredged to 11.3 m. below datum. A very large deep water anchorage for ships is available at the North Klang Straits. Ships can also navigate in and out of Port Kelang through a secondary channel at the South Kelang Straits. At all times the channel is dredged to 9.1 m. below datum.

DOCUMENTS: *(a) For Agent.* Vessels required to fill in arrival report which may be obtained from Agent at Singapore or Penang or Boarding Agent on arrival. This should be completed and handed to Boarding Agent together with last Port Clearance and one copy each of Crew List and Passenger Lists for submission to Marine Department.

Vessels should have ready and hand to Boarding Agent on arrival the following:

Arrival Report.
Last Port Clearance.
Two copies of Crew List.
Two copies each of Disembarking and Transit Passenger Lists (if any).
List of Explosives, dangerous cargo on board.

Following documents should also be handed to Boarding Agent on arrival and will be returned to vessel after perusal by Marine Department:

Malaysian Light Dues Receipt (if any).
Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Derat Certificate.

Port Health Officer now requires all vessels arriving from foreign ports to submit an "Entry Declaration" on form Health 43, on the International "Maritime Declaration of Health" form or on a similar copy, and this should be handed to Boarding Agent, together with copy of Crew List, in cases where vessels are not in Quarantine, in which case doctor does not attend on board.

Note: Endorsement of Port Clearance must be obtained from Port Office at Marine Office before a fresh Port Clearance can be issued by local Customs Authorities and handed to vessel before sailing.

(b) Immigration
2 copies Crew List.
2 copies Passenger List (Disembarking and Transit).

(c) Customs
2 copies Customs List (CD.15).
1 Crew List.
1 Passenger List.

FLAGS: The Malaysian flag. Flag "Q" meaning Health Clearance required. *Flag 2/5 meaning no passengers on board, or *flag 3/4 meaning passengers on board. Pennant Zero is not required since Boarding Officers do not board the ship on arrival. Flag "H" meaning Pilot on board. (*Applies only to vessels arriving from foreign ports, which includes Singapore.)

Note: Except for vessels under way, no vessel in port may use its siren except in case of an emergency when no other means of communication is available. The Authorities strictly enforce this rule and vessels infringing it become liable to heavy fine.

Shipmaster's Report: June 1983: Flags 2/5 must be flown by day, or green/green lights shown by night until Immigration clearance has been obtained, otherwise the ship is liable to be fined.

PILOTAGE: Available 24 hours a day. Pilotage compulsory.

(a) Application: Piloting carried out by Kelang Port Authority. Masters to cable "Pilots Port Kelang" giving ETA and point of arrival, i.e. Pintu Gedong or Pulau Angsa and draft at least 4 hours before arrival, as Pilots will not leave shore until confirmation received from vessel or Agent. Both North and South Channels are well marked and Pilots consider it quite safe to arrive and depart at any hour.

Vessels approaching this port normally apply through Agent, giving ETA Pintu Gedong, Pulau Angsa or Deep Water Point, together with draft and port of departure.

(b) VHF: If vessels wish to communicate direct all pilot boats are fitted with VHF for use between pilot office, pilot boats, pilot boat to pilot boat and where necessary to vessels arriving at this port. Operated on Channel 12 of International Maritime VHF radio telephone bands, and of a range of 20–25 miles.

(c) Recognition: Pilot boats painted orange and have white superstructure.

(d) Boarding. Unless advised otherwise Pilots will be ordered to board vessels at Pulau Angsa (North Channel), or Pintu Gedong South of the Seaward Bar Buoy.

Pilot ladders should be of approved Standard pattern internationally used.

(e) Waiting for Pilot: Location for a vessel awaiting Pilot is at Pintu Gedong 5 cables South of Seaward Bar Buoy, at Pulau Angsa 1 mile East of Pulau Angsa Island, and at Deep Water Point where anchorage is available according to number of vessels already anchored.

ANCHORAGES: Per latest Admiralty charts. Vessels may load timber and ore from privately owned junks at Deep Water Point Anchorage. In exceptional cases and with permission of Port Authority it is also possible to work with Authority Lighters at Deep Water Point.

Special Anchorages: The Port Authority provides an explosives anchorage and a LASH anchorage situated North of Tanjong Bakau in the North Kelang Straits. The quarantine anchorage is located North-West of the North Port wharves.

RESTRICTIONS: (See "Max. Size"). At Pintu Gedong, the Southern Channel Pilot Station, there is a restriction which vessels will be advised of when giving their ETA.

MAX. SIZE: Maximum length of vessels using South Port is: Dry cargo vessels, 600 ft. LOA and draft of 32 ft.; tankers, up to 560 ft. LOA and draft 32 ft. Tidal conditions govern movements of all vessels over 300 ft. LOA in the South Port but not at the North Port. At the North extension wharves container ships of 950 ft. can be berthed.

HEALTH: Port Health Officer will board vessels arriving from infected ports, or carrying deck passengers at Deep Water Point at any time of day.

All vessels should include in arrival cables confirmation that all well on board and also that all health papers in order. It should be understood that the health papers referred to include Derat, or Derat Exemption Certificate. Also it is necessary to furnish information on the last 5 ports called within 14 days and the expiry date of Derat Certificate.

RADIO: ETA cables normally routed via Singapore or Penang as no radio station in Port Kelang. Such messages when received are transmitted by telephone to Agents/and or Pilots at Port Kelang.

TUGS: Supplied by Port Authority and normally "stand-by" vessels berthing at wharves as and when required. Tugs towing use ship's lines, tugs pushing use their own lines. 8 tugs available (800 h.p. – 2,700 h.p.) to assist in berthing and unberthing and are equipped with fire-fighting appliances and radio communications system. When vessels berth or unberth at wharf tugs ordered by Agent in consultation with Pilots and once in attendance are charged for whether used or not. Tugs are also used to swing vessels in stream which are stemming ebb tide on departure.

VHF: (See "Pilotage"). Ship to shore telephones available at all berths at North Klang Straits, and VHF sets available for ships in moorings. Klang Exchange keeps a 24-hour watch on Channel 16 and will connect the vessel to any telephone receiver ashore (Channels 24, 26 and 27). For local calls the cost is $1.92 for three minutes (approx.).

BERTHING: There are 2 ports viz: the South Port and the North Port. Vessels berthing in the South Port are governed by tidal conditions which vary considerably. Vessels over 525 ft. LOA are usually berthed port side to on the ebb and then only when tides are favourable. There is usually no objection to vessels unberthing from the wharves at night although generally speaking vessels will not be berthed at night.

(a) South Port: 4 ocean wharves of 2,190 ft. in length out of which 3 wharves are with 33 ft. of water alongside, and 1 wharf with 30 ft. of water alongside. 4 coastal shipping wharves of 1,320 ft. length. Of these, 1 wharf with 20 ft. of water alongside and 3 wharves with 18 ft. of water alongside and 2 anchorage. 3 to 4 vessels of not more than 250 ft. in length and with drafts of up to 18 ft. can be accommodated at the North shore anchorage.

Berth Nos. 1 – 4 are for ocean-going vessels while Berth Nos. 5, 6, 7 and 7A are used principally by coastal vessels with a maximum size of about 6,000 deadweight tonnes. The wharf apron is 15.2 m. (50 ft.) wide and carries 3 rail tracks.

(b) North Port Wharves: There are 17 ocean wharves with a total length of 12,120 ft. Of these, 2 are container berths with 44 ft. of water alongside, 1 Ro/Ro berth with a depth of 36 ft., 4 general cargo berths with 30 ft. of water alongside, 6 general cargo berths with 38 ft. of water alongside, 2 dry bulk berths with 36 ft. of water alongside for bulk carriers of 36,000 d.w.t., and 2 dolphins for tankers up to 60,000 displacement tonnes.

There are 5 container cranes on the container wharves.

Depth of water alongside is 44 ft. 62 acres of stacking area, capacity 10,800 TEU's (excluding 100 reefer points). Freight station measures 600 ft. × 120 ft.

Container Handling Equipment: 5 container cranes of 35 tons capacity each.

21 straddle carriers of which 11 have a lifting capacity of 30 tons and 10 with 35 tons capacity.

36 tractors.

40 × 20 ft. and 31 × 40 ft. trailers.

58 forklifts with capacity 3 tons – 15 tons.

(c) General:

Facility		*Depth Below New A.D.C.* (ft.)
North Klang Straits Approach		36
Pintu Gedong Bar		19
Labohan Garap Bar		24
No. 1 Wharf	580 ft. length	33
No. 2 Wharf	580 ft. length	33
No. 3 Wharf	550 ft. length	33
No. 4 Wharf	480 ft. length	30
No. 5 Wharf	350 ft. length	20
No. 6 Wharf	300 ft. length	18
No. 7 Wharf	310 ft. length	18
No. 7A Wharf	310 ft. length	18
No. 8 Wharf (Ro/Ro Containers)	700 ft. length	36
No. 9 Wharf (Containers)	1,050 ft. length	44
No. 10 Wharf (Containers)	1,050 ft. length	44
No. 11 Wharf	580 ft. length	30
No. 12 Wharf	580 ft. length	30
No. 13 Wharf	580 ft. length	30
No. 14 Wharf	580 ft. length	30
No. 15 Wharf (Dolphin Berth)	550 ft. length	30
No. 16 Wharf	700 ft. length	38
No. 17 Wharf	700 ft. length	38
No. 18 Wharf	700 ft. length	38
No. 19 Wharf	700 ft. length	38
No. 20 Wharf	700 ft. length	38
No. 21 Wharf	700 ft. length	38
No. 22 Wharf } (Dolphin Berth)	700 ft. length	38
No. 23 Wharf	700 ft. length	38
No. 24 Wharf	700 ft. length	36
No. 25 Wharf	700 ft. length	36

(d) Berth No. 8, is for Ro/Ro as well as container traffic. The Ro/Ro ramp at the Southern end of the berth is 45 m. (147 ft.) long and 8 m. (27 ft.) wide. The maximum gradient is 1:10 at tides between +0.3 m. (1 ft.) and +5 m. (17 ft.). There are 3 forklifts of 22.5 tonnes capacity specially for Ro/Ro operations, as well as 3 tractors and 3 trailers. The berth can cope with ships of up to 40,000 tonnes and is capable of accommodating vessels with 20 m.to 32 m. beams and 1.0 m. to 4.5 m. freeboards.

LIGHTERAGE: Wharf facilities are supplemented by lighterage. Two anchorage points are provided in the Anchorage Reach through which vessels pass on their way to and from the South Port.

Four vessels with length not exceeding 76 m. (250 ft.) and with draft not exceeding 5.5 m. (18 ft.) can anchor along the North Shore. As the size of the vessels which can use these moorings is limited, large bulk carriers have to anchor in the Deep Water Point opposite the North Port. Shore facilities for lightering cargoes at the North Port and South Port are provided by the Port Authority.

A skeleton lightering service of 12 lighters are in use to handle small amounts of break bulk general cargo and explosives.

Stream Berths for Lighterage Working:

	Swing	*Permissible LOA*	*Depth Available*
Anchorage	183 m.	167.6 m.	9.1 m. (30 ft.)
No. 6	152.4 m.	137 m.	12.2 m. (40 ft.)

DENSITY: Varies considerably with state of tide and heavy monsoon rains.

BULK HANDLING FACILITIES:

South Port: Berths No. 1 – 3 are equipped with pipe-lines to handle bulk liquid cargoes such as palm oil, latex, petroleum and other petroleum products, coconut oil and tallow.

Bulk liquid installations and pipe-lines are owned by the operators.

Other facilities for the discharge of liquid cargoes are provided at the coastal palm oil jetty and private Shell Oil jetty. The coastal palm oil jetty in Sungei Aur is used by tankers of up to 76.2 m. (250 ft.) in length which load at plantation jetties and discharge their cargoes to the storage installations at the South Port. The Shell Oil Jetty is used for the discharge of petroleum products principally for the BP storage and distribution depot nearby.

Storage capacity for the various bulk liquid cargoes are as below:

Palm oil and kernel oil	159,512 tonnes
Latex	42,418 tonnes
Vegetable oil	3,048 tonnes
Coconut oil	2,062 tonnes
Tallow	2,032 tonnes
Alkane	1,282 tonnes

Berth No. 4 has special equipment for the discharge of wheat grains in bulk by means of suction units. The wheat is then delivered by an overhead conveyor to a flour mill situated to the rear of Berths 3 and 4. Estimated discharging rate is 1,016 tonnes per day.

North Port: Berth No. 12 is provided with portable hoppers and conveyors to handle sugar from bulk carriers using their own cranes. The sugar is transported by conveyors to a sugar storage godown onshore. The discharging rate for 24 working hours is about 1,000 tons.

Dry bulk cargoes are handled at Berths No. 24 and 25. Bulk handling system recently installed to handle fertilisers, wheat, sugar, maize and salt. 2 grab cranes each with a capacity of 420 t.p.h.; 2 feed hoppers and conveyor system of 840 t.p.h. capacity make up the system.

Bulk Facilities in the North Port: Several specialised facilities have been set up at the North Port Second Extension. They include specialised terminals for timber, liquid bulk cargo, dry bulk cargo and bunkering facilities.

The handling of liquid bulk cargo is now carried out only in South Port. However, the latter has no space for expansion and insufficient wharves to cater for the increasing size of tankers calling at the port. An area of 31.3 hectares (77 acres) in the North Port has been developed to handle liquid cargo such as chemicals and refined palm oil.

The dry bulk cargo terminal on a 13.2 hectare (34 acre) site to cater for the handling of dry cargo such as artificial fertilisers, salt and sugar has been developed.

Timber which is at present largely shipped through private jetties is another cargo being given attention to by the Authority. The Malaysian Timber Industries Board will operate the terminal through its subsidiary company. The terminal is on a 18.5 hectare (45.6 acre) site at the Second Extension.

Petronas, the national petroleum company, has set up bunkering facilities at the Second Extension. The Authority reserved 5 hectares (20 acres) for this purpose.

CRANES: *South Port:* 2×10.6 tonne mobile cranes and 5×5 tonne mobile cranes.

North Port: Mobile cranes – 7×5.08 tonne, 3×7.1 tonne, 2×10.1 tonne, 3×17.2 tonne, 1×25.4 tonne and 1×30.4 tonne.

STEVEDORES: Almost all timber loaded from private junks for which no lighter gangs needed. Average working rate, subject to stow, for timber in loose pieces is 4 – 6 t.p.h., and in bundles 6 – 8 t.p.h. Not more than 2 lighters or "tongkangs" may lie alongside any vessel abreast of each other and not more than 2 lighters shall be moored astern of a vessel.

Rubber, latex in drums, etc., loaded by Port Authority and lighter/wharf gangs are required. Average working rate for these commodities is 14 t.p.h.

The average rate of discharge at North Port (North Klang Straits) wharves is 14 – 16 t.p.h.

On-board stevedores provided by the Port Authority. Requirements for the 1st shift should be made known by 1930 hrs. the previous day and for 2nd shift by 1130 hrs. same day and the 3rd shift not later than 1930 hrs. the same day.

Working hours throughout the port: 1st shift 0800 to 1600 hrs. (meal break 1200 – 1300 hrs.). 2nd shift 1600 to 2300 hrs. (meal break 2000 – 2100 hrs.). 3rd shift 2400 to 0800 hrs. (meal break 0400 – 0500 hrs.).

MEDICAL: A number of private doctors in Port Kelang and it is often not necessary to give any advance notice of medical attention being required. In event of vessel requiring urgent medical attention on arrival, advisable for Master to cable Agent in advance. At present 2nd class medical facilities available in Kelang and 1st class facilities only available in Kuala Lumpur. As vessels arriving at Port Kelang normally do so after calling at Penang or Singapore no inoculation, vaccination or fever certificates are required unless either Singapore or Penang is declared an infected port.

TANKERS: Tankers always berth port side to on ebb and near slack water. Vessels with bulk liquid cargoes to load or discharge will berth at Wharves 1, 2, or 3. When a number of pumping vessels in port, vessels will usually occupy these wharves only for the time it takes to complete pumping and may then have to shift to stream or another wharf. Three of the ocean wharves are provided with facilities for handling liquid cargo. Liquid cargoes now being handled are: latex, palm, coconut oil, petroleum products, alkane, tallow and fuel oil.

Shell Company has a private jetty on which vessels up to 320 ft. in length with drafts not exceeding 20 ft. can be berthed.

Also see "Bulk Handling Facilities".

FRESH WATER: 3 waterboats of total capacity 750 tons, available to supply vessels in South Port and at Deep Water Point with fresh water. As much notice as possible should be given if waterboat required. At North Port (North Klang Straits) water available from wharf. Pumping rate about 20 – 25 t.p.h.

FUEL: Bunkers are available.
FIRE PRECAUTIONS: In respect of tankers loading or discharging inflammable cargo, necessary to have wharf cordoned off and "No Smoking" signs exhibited prominently. Port Fire Brigade required to be on stand-by at wharf whilst operation in progress. Vessel may not disable engines whilst alongside wharf and shall have axes ready in event has to leave wharf urgently and necessary to cut ship's lines. Port Fire Service on duty 24 hours a day throughout year. Service is capable of fighting all types of fire whether on land or on sea. Fire service has following equipment: 3 fire engines, 1 Land Rover fire engine, 2 trailer pumps, 3 fire fighting tugs, 1 elevated tank in South Port (capacity 200,000 gallons), 2 elevated tanks in North Port (capacity 200,000 gallons), 3 vans at the fire brigade station, 4 ambulances, fresh water hydrants at various points in the Ports.

REPAIRS/DRY DOCKS: There are no major ship repair facilities at the port. The Authority operates 3 slipways for its own crafts.

Slipway No. 1 can accommodate vessels up to 27.4 m. long with a 3.10 m. draft and a displacement of 150 tonnes.

Slipway No. 2 designed for flat bottomed vessels, can cater only for craft up to 23.1 m. length, 2.1 m. draft and with a displacement of 100 tonnes.

Slipway No. 3 can accommodate vessels up to 45.7 m. in length, 4.4 m. draft and with a displacement of 450 tonnes.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS/IMMIGRATION: Customs Officer will board vessel soon after arrival to seal the "Bonded stores". For vessels staying in port some time it is usual to issue 3 days supply – a further issue may be made on request after 3 days.

Immigration Officer will clear vessels arriving from foreign ports on a 24 hour basis. No one may board or leave or approach within one cable length of such vessel without special permission until vessel has been cleared by Immigration Officer and Immigration Signal is hauled down. No Immigration formalities required for vessels arriving from or leaving for other West Malaysian ports (Malacca and Penang).
REPATRIATION: Crew changes and repatriation must be arranged by Agent. Harbour Master attends signing-on and signing-off of the crews on ship's articles.
AIRPORT: Subang International Airport approximately 20 miles from port on main trunk route to Malaysian capital of Kuala Lumpur and served by regular domestic flights and international flights.
HOLIDAYS: Port Closing Days. *Hari Raya Puasa; *Chinese New Year; Malaysia Day (31st August); *Deepavali; Christmas Day (25th December). *Dates subject to changes as festivals coincide with Mohammedan, Chinese and Hindu calendars.
TELEPHONES: At North Port (North Klang Straits) Wharves telephones installed on board if required. At wharves in South Port there is always a telephone within easy reach at Wharf Office.

VHF radio sets available to vessels at anchor or moored to buoys.
IDENTIFICATION CARDS: Advisable that members of crew carry identification cards when leaving ship.
GENERAL: *(a)* Ship-Shore Communication. When vessels are berthed in stream or at Deep Water Point a 24 hour launch service can be supplied. Arranged by Agent in consultation with Master to suit requirements of ship.

Vessels permitted use own boats with proper navigation lights at night.

(b) Seamen's Club. "Mariner's Club" for officers and seamen outside No. 3 Gate of South Port. Club has swimming pool, bar, restaurant and accommodation.

(c) Diving. Diving services available for salvaging lost cargoes, examining underside of ships, etc. Divers capable of deep-sea diving down to 120 ft.
DEVELOPMENTS: Construction of 2,800 ft. of wharves at an island called Pulau Lumut, opposite the South Port is planned. 1st phase of the project scheduled for completion in 1990.

Bulk cement terminal completed. Discharge rate 250 t.p.h. bagging facilities at the silo.

Also see "Berthing – North Port" and "Bulk Handling Facilities"

SHIPMASTER'S REPORT: May 1986.

The following advices were received from our Agents in Port Kelang.
Water Supply to Ships: Owing to lack of facilities presently in the port, the Port Authority is unable to supply fresh water to vessels promptly.
Compulsory Pilotage in Port Kelang: We would advise you that pilotage is compulsory throughout the pilotage district of Port Kelang.

In order to ensure that the Pilot boards your vessel immediately on your arrival at the Pulau Angsa/Pintu Gedong Pilot Station (North/South Entrance Pilot Station), please cable us and "Pilot Portkelang" advising your ETA, deepest draft and vessel's Readiness to Load (if berth required for that purpose) as soon as possible.
Panamanian Vessels: We would advise you that quite a number of Panamanian vessels have experienced extreme difficulties in obtaining Sailing Clearances from the Harbour Master, Port Kelang, owing to expiry of Crew Rolls and/or absence of Panama Consul's endorsements on signed on/signed off entries in the Crew Rolls.

To avoid encountering this problem at Port Kelang, please ensure that your Crew Roll is valid and in order.

For your information, there is no Panama Consulate in Kuala Lumpur. The nearest one in this region is in Singapore where you can have your Crew Roll validated, if necessary.
AUTHORITY: Kelang Port Authority, Jalan Pelabuhan, Mail Bag Service 202, 42005 Port Kelang, Malaysia. *Tel:* 3688211 (20 lines). *Telex:* MA 39524. *FAX:* 03-3670211. *Contact:* Mohd. Hashir H. Abdullah, General Manager. Kwek Chee Wah, Chief Commercial Officer, Commercial Department.

Associated with Jardine Shipping Agencies.

ROMPIN (Kuala Rompin) inc. Pahang, Malaya:
02.43 N. 103.30 E.

DOCUMENTS:
Register.
Last Port Clearance.
7 copies Crew List and 4 for Agent.
5 copies Passenger List (if any).
5 copies Stowaway List (if any).
2 copies Stores List (including firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crews Declaration List (cameras, radios, etc.).
1 copy Vaccination List.

Masters of vessels to fly the necessary following flags on arrival as required under Section 448 of the Merchant Shipping Ordinance and Sub-Section (9) of the Federation Port Rules, 1953.

(1) The Federation of Malaysia Flag.
(2) The Pennant "O" Flag (Request Port Officer).
(3) The "Q" Flag (request Port Health Officer).
(4) The Pennant "2"; "5" Flags if no passengers and "3"; "4" Flags if there are passengers on board (Immigration).

PILOTAGE: Compulsory to the loading berths. Extra charge for pilotage outside normal office hours and holidays.
LOADING. *(a)* Ladders. Masters particularly advised to see that a sound and adequate ladder provided at each lighter to allow labourers engaged in loading to pass to and from ship with no undue risk. Regulations are provided in the Merchant Shipping Ordinance, Section 445, Sub-Section (O) which takes care of this requirement and failure to take adequate precaution in seeing regulation is observed may result in serious consequence to those responsible.

Masters requested to ensure that in addition to ladders for labourers, an extra ladder, preferably a clean pilot ladder, be made available at all times for the Agent for boarding. This ladder should be made fast on lee side, just forward of any scuppers in vicinity, and a heaving line from ship's rail made fast to bottom rung. When ladder not in use, bottom of ladder can be pulled up a few feet with heaving line to prevent labourers from using it or damage from lighters.

(b) Winches. All winches must be in single gear at all times.

(c) Derricks. Practice to work 2 sets of derricks to 1 lighter where practicable.

(d) Trimming. No manual trimming undertaken.

(e) Damages. In the event of your vessel sustaining damage by stevedores during loading, you are requested to inform the clerk and foreman on board immediately and as soon as practicable confirm same in writing to the Eastern Stevedoring Co. Ltd., Kuala Rompin, with copies to Hong Kong & Eastern Shipping Co. Ltd., Hong Kong, and Malay States Shipping Ltd., Kuala Rompin. It is important that full details of damage are given, together with measurements whenever possible.

Minor damage has occurred on vessels due to hatch beams not being bolted or lashed. Masters therefore requested ensure all beams adjoining working parts of hatches either bolted or lashed, otherwise stevedores will repudiate liability for any damage incurred.

ANCHORAGE: On arrival, vessels required to anchor about 1 mile outside berthed ships to obtain pratique. An accommodation ladder must be rigged on lee side to allow Port Authorities to board.

READINESS: Notice of Readiness cannot be accepted until vessel is in Free Pratique, Customs Inward Examination completed, and in all respects ready to load.

OPENING/CLOSING HATCHES: Removal and replacement of hatch beams and covers must be done by ship's crew. Ship's Officers should see that any tween-deck beam removed is replaced before ore reaches that height.

CUSTOMS: Customs office hours 0830 to 1630 Monday to Friday, 0830 to 1300 hrs. Saturday.

HOLIDAYS: New Year's Day; Hari Raya Puasa, 2nd day; Chinese New Year, 2nd day; Hari Raya Haji, 2nd day; First Day of Muharram; Vesak Day; Birthday of Sultan of Pahang; Birthday of H.M. The Yang Di-Pertuan Agong; Birthday of Prophet Muhammad; Malaysia Day; Deepavali; Christmas Day.

Note: Where a holiday falls on a Sunday, the following day will be observed as a holiday, and if such latter day is already a holiday, then the day following shall be a public holiday.

SHORE LEAVE: No seaman may proceed more than 3 miles from Kuala Rompin Customs House. The Officer in Charge Customs, as acting Immigration Officer, has authority to limit or prohibit shore leave in all cases.

IDENTIFICATION CARDS: Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.

GENERAL: *(a) Scrap Iron.* Steel mills in Japan complain from time to time of finding pieces of scrap iron in the iron ore cargoes. If this scrap is not found it will cause serious damage to the plant and occasion considerable delay to production: furthermore, should scrap iron enter the machinery there is always the possibility of it endangering life, and several fatal accidents have been attributed to this cause.

The assistance of officers and crew is requested in reporting any scrap iron they see being loaded, advising shippers into which hold it went and number of the lighter it came from to enable us to take appropriate action.

(b) Whistle, Radio. Wireless Transmitters, Whistles and Sirens etc., must not be used by vessels at anchor off Kuala Rompin.

(c) Stores. Bonded stores can be obtained from Kuala Lumpur and Kuantan at prices roughly same as Singapore. Essential, view Customs formalities, that Masters give Malay States Shipping Ltd., Kuala Rompin 6 days prior notice of requirements.

SABAH (Minor Ports): (See Plan)

KUDAT: 06.53 N. 116.51 E.
LAHAD DATU: 05.02 N. 118.20 E.
SEMPORNA: 04.29 N. 118.37 E.

DOCUMENTS: 8 copies all usual documents, i.e. Crew List, Passenger List, Manifest. Others include Store List, Stowage Plan, Sea Worthiness Certificate and Last Port Clearance Certificate. Where possible, Cargo Manifests and Stowage Plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot services required. Pilot boats between 30 ft. – 40 ft. length and equipped with VHF/AM Sets – 80.4 MHz frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within port limit.

ANCHORAGE: All ports within bays and they provide good safe anchorages.

RESTRICTIONS: No restrictions for vessels entering port at night.

HEALTH: To obtain Pratique, arrange with Shipping Agent. Pratique for vessel entering, after calling at another port in same state, is not required. Anchor in quarantine anchorage if vessel is suspect and display following signals: *By Day:* International Code Signal "QQ". *By Night:* A Red light over a White light and a separate hoist of Red light over a Green light. Hoisted vertically 6 ft. apart where best seen.

RADIO: Singapore Radio recommended.

BERTHING: Application for berthing has to be made within 24 hours prior to actual time that berthing is required.

Details and Requirements: Name of vessel, gross and net tonnage, length overall, draft (fore and aft), ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded. No priority for berthing ships and the turn is, first come first served.

Kudat: L-shaped wharf with 2 berths. Western berth – length 370 ft. min. depth 21 ft. Eastern berth – length 300 ft., min. depth 21 ft.

Lahad Datu: Outer Berth: Length 320 ft. Depth 36 ft. Max. size 25,000 d.w.t.

Inner Berth: Length 240 m. Depth 30 ft. Max. size 2,000 d.w.t.

Semporna: T-shaped wooden wharf with 2 berths. Outer berth, length 150 ft. min. depth 26 ft. Inner berth, length 127 ft., min. depth 20 ft. The wharf is operated by the State Government.

STEVEDORES: Arrangement of stevedores should be made with 48 hours' notice to Shipping Agent. Average gang performance is 20 ton-per-gang-hour for conventional traffic (excluding vehicles) and 40 ton-per-gang-hour for pre-palletised cargo (excluding vehicles). Cargo work is carried out in 3 × 4-hour periods namely:–

1st Period 0730 hrs. to 1130 hrs.
2nd Period 1300 hrs. to 1700 hrs.
3rd Period 1800 hrs. to 2200 hrs.

MAX. SIZE: There is no limit on cargo vessels worked at anchorage. Also see "Berthing".

MEDICAL: Arranged on arrival by Shipping Agent.

DENSITY: Average density in the ports 1020.

FRESH WATER: Available at General Cargo Wharves at a rate of 20 t.p.h.

CONSULS: Consulates in Kota Kinabalu:–

United Kingdom
Indonesia
Japan
Denmark

REPAIRS: Marine Department operates engineering workshops at Labuan and Sandakan. Some private firms and workshops also undertake small engine and deck repairs in Kota Kinabalu.

DRY DOCKS: Marine Department has 3 slipways in Labuan which are capable of shipping vessels of 60 tons, 200 tons and 500 tons displacements. One in Sandakan for vessel up to 120 tons.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may advise option.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No control and up to discretion of Officers of Customs and Excise.

CARGO GEAR: Ship's gear used also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Most airports in State between 4 km. to 10 km. from the town.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: Cargo work can be arranged if necessary during official holidays, but not for Hari Raya Puasa, Chinese New Year and Christmas Day. Also see "Sandakan".

POLICE/AMBULANCE/FIRE:

	Fire/Police	*Hospital*
Kudat	333	335
Lahad Datu	81999	81522
Semporna	SPA 599	SPA 522

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not needed.

DELAYS: Due to weather conditions only.

AUTHORITY: Sabah Ports Authority, Kota Kinabalu, Sabah. *Tel:* 088-56155/088-52140. *Telex:* Saport MA80074. *Contact:* The General Manager.

Lahad Datu: Sabah Ports Authority, P.O.Box No. 143, 91107 Lahad Datu. *Tel:* 81244, 81610, 81213. *Telex:* MA 83207.

SANDAKAN, Sabah: 05.50 N. 118.07 E. (See Plan)

FLAGS: Signal letters, Mail flag (if any mail on board for discharge); "Q" flag is essential if Sandakan is the first Sabah port at which a vessel calls. If ship carrying passengers it should fly Immigration Signal Nos. 3 and 4; if no passengers Nos. 2 and 5.

PORT LIMITS: The limits of the port of Sandakan shall be Sandakan Bay bounded by a line drawn in a West-South-West direction from the Northern point of Pulau Berhala to the mainland, and by another from the same point on Pulau Berhala to the most Eastern extremity of Tanjong Aru and thence to the opposite bank at the entrance of Trusan Duyong, including all passages and rivers entering the same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS: 5 sets of Inward Manifest in the prescribed form to be airmailed to Agent to arrive at least 48 hours before the vessel.

(a) To be Produced on Arrival:

1 Sabah Lights and Harbour Dues form
2 Manifests in the prescribed form
3 Crew Lists
1 Last Port Clearance
3 Stores Lists
3 Passenger Lists
2 Arms Lists
3 Narcotics Lists
2 Parcels Lists

(b) Required by Agent:

2 sets of Inward Manifests for all inward cargo
5 sets of Transhipment Manifests for all cargo to be transhipped at Sandakan.
2 copies of Hatch List.
1 copy of Passenger List.
1 copy of Crew List.
1 copy of List of Arms and Ammunition.
1 copy Narcotics List.
1 copy Stores List.

(c) To be Supplied to Ship before Departure:

Manifests, as required by vessels.
Master's copy of Bills of Lading.
Port Clearance and Customs Clearance.
Sabah Lights and Harbour Dues form.

(d) Immigration: Immigration Officer will board vessel on arrival and clear her inward. No restrictions on crew and/or passengers going ashore. Immigration require 2 copies of Crew List and 2 copies of Passenger List. Vessels cleared inward until 1800 hrs. only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

(e) Marine Department: Shipping Arrival Report to be signed by Master of Vessel.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Pilotage not compulsory but if required the Harbour Master acts as Pilot. Private pilots available by air from Kota Kinabalu. At least 24 hours' notice should be given and position where Pilot is required to embark (i.e. the bar buoy or within harbour limits) should be included in the message.

ANCHORAGES: For loading timber: A black and white conical buoy situated 1.2 miles S.W. from Government Wharf indicates the anchorage. It is important that vessels should anchor as close to this buoy as possible, when anchored further from shore it may take up to an hour longer for launches towing rafts of timber to reach ship and in addition there is less shelter from wind and weather and consequently raftsmen have to cease work earlier.

For discharging: Unless it is intended to come alongside the wharf, vessels discharging should anchor 4 cables due South of wharf. Wharf is 750 ft. long with dolphins placed 100 ft. from each end giving a total length of 950 ft. If discharging into lighters and loading log timber simultaneously vessels should proceed to Timber Anchorage.

RESTRICTIONS: *(a)* Shifting: Vessels may not berth alongside after dark without special permission but they may leave the wharf, having given prior notice.

(b) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset, except at discretion of Harbour Master. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Harbour Master. Livestock: subject to approval of Veterinary Authority. Certain animals, including cattle, are prohibited imports and exports except under licence.

MAX. SIZE: Draft restriction is 24 ft. on the Bar plus the height of tide, mean high water being about 6 ft.

HEALTH: (Also see "Radio" and "Regulations"). If Sandakan is first port of entry into Sabah a vessel must proceed to quarantine anchorage until cleared by Health and Immigration Officials.

The Sabah Government are signatories to the WHO convention on quarantine regulations. If vessel comes from outside State of Sabah then Port Health Authority will require to board in quarantine anchorage before vessel can proceed to wharf or timber anchorage. If, however, vessel is not coming from an infected port Pratique may be granted providing vessel cables Agent prior arrival advising last port of call and whether vessel healthy. Pratique normally cabled to ship but if unreceived, vessel must proceed to quarantine anchorage.

Port Health Authority require completed copy of Maritime Declaration of Health, and copies of Crew, Passenger and Narcotics Lists.

RADIO: Singapore Radio recommended.

(Information required before ship's arrival.) ETA, number of passengers, health situation, Manifest, amount of water required. Vessels not allowed to use their radio in port.

VHF: Marine signal station keeps watch on VHF Channel 16, from 0530 to 2000 hrs.

TUGS: A tug of 636 h.p. stationed at Sandakan.

BERTHING: (Also see "Anchorages").

(a) Mooring: The numbers of a vessel which is berthing alongside will be shown from signal station on Eastern end of Customs House. In addition, a cone indicating tidal stream will be hoisted pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines, a mooring boat will be provided by Marine Department if it is necessary to send lines to dolphins. Old Government Wharf, least depth 19 ft.

(b) Buoys: No mooring buoys.

(c) Lighters: No lighter fleet. The timber companies have their own lighters and scows which can sometimes be hired if not being used by these companies.

Rectangular Island Wharf: The particulars of the berths are as follows:

Berth No.	*Length* (m.)	*Depth* (m.)
1	213	11.0
2	122	8.0
3	76.2	6.1
4	164	7.0

The berths were dredged in 1989.

The berths are constructed to receive containers.

Covered Storage:

(a) One transit shed 90,000 sq.ft. at new port site.

(b) New godown at new port – 52,520 sq.ft.

Equipment: New equipment only listed below:

(a) 4 towing tractors.

(b) 47 forklifts 3-6 tonnes capacity and 1×25 ton and 1×19 ton capacity for container handling.

(c) 24×5 ton trailers and 4×20 ton trailers for container handling.

CARGO: (a) Tally: Tally clerks supplied by Agent if required. Sawn timber tallied on to scows by timber companies' clerks and tallied into ship by ship's tally clerks. Ship responsible for total number of pieces of timber shown on Mate's receipts. Letters of Credit do not allow the clause: "A quantity said to be" to be inserted on the B/Lading. Log timber tallied into ship by checking against specifications supplied by timber companies.

(b) Inward Cargo: Is tallied out of ship on to wharf or into lighter. Local watchmen can be supplied by Agent if necesary but it is generally found to be more satisfactory if these duties are carried out by crew. Damaged cargo is surveyed on the spot, otherwise no liability of vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-handed Memo certified by Chief Officer is usually accepted as proof.

(c) Heavy Lifts: Usually landed overside on flat-top scows for delivery to private jetties, where they are man-handled to required site. Occasionally consignees provide low-loaders.

(d) Transhipment Cargo: After discharge of cargo from first carrier, transhipment cargo placed under supervision to Ports Authority, unless it is possible to arrange direct transhipment into small coastal vessels.

(e) Outward Cargo: Main export is log timber and is towed out to loading vessels in rafts, each one accompanied by 2 raftsmen. Loading is on a single swinging derrick with gun tackle; the other derrick being used for pulling the logs into position in the holds. Vessels should have, if possible, 2 snatch blocks available at each hatch where log timber is being loaded. Sawn timber loaded in normal manner from scows and lighters. Documents required are shipping order issued by Agent and list of specifications supplied by timber companies. Other exports are rubber, copra, coconuts, palm oil, jungle and sea produce.

(f) Refrigerated cargo: Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with Customs and Agriculture Department Regulations. Inward fridge cargo is confined to foodstuffs, meat, etc., and outward to frozen prawns. 1×65 amp and 3×30 amp reefer points available.

(g) Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior to arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

(h) Damaged Cargo: Direct delivery/cargo surveyed at shipside. Cargo discharged into godowns surveyed jointly between Port Authority and ship's representative in damaged cargo lockers.

STEVEDORES: Stevedoring in hands of Port Authority who supply gangs as required.

(a) Working hours, 0730 – 1130, 1300 – 1700 and 1800 – 2200. Gangs ordered at least 12 hours before a vessel arrives.

(b) Overtime. When working in stream, overtime usually from 1100 to 1200 and 1800 to 2200 hrs. Application for permission to work overtime must be made to Customs not later than 1500 hrs. on the afternoon that overtime is to be worked or 1100 hrs. on Saturday for weekend overtime.

(c) Working Sundays and holidays. Work is normally carried out Sundays and it is sometimes possible to arrange for work on some public holidays. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

See "Holidays".

(d) Rate. Log loading is good, comparing more than favourably with other Borneo ports. Rate of loading about 800 cu. ft. hoppus (20 B/L tons) per gang hour for logs, and 6 B/L tons per gang hour for sawn timber. Discharging general cargo about 20 tons per gang hour. Palletised cargoes about 40 tons per gang hour.

MEDICAL: *(a)* Hospitals: Duchess of Kent Hospital will receive sick seamen or officers. Three classes of wards, also isolation wing. Hospital equipped to carry out normal surgery.

(b) Inoculation: PHO will vaccinate or inoculate crew members at Duchess of Kent Hospital.

(c) Death on Board: PHO and Police to be informed immediately. They will then make an investigation into cause of death. If satisfied that death was due to natural causes, a certificate will be issued, and arrangements may then be made for interning the body. Harbour Master must also be informed in the case of seamen.

TANKERS: Two bulk oil installations at Karimunting (Pavitt Point). Esso, with storage capacity of 2,080 tons and Shell, with storage capacity 15,730 tons.

Shell Jetty extends 550 ft. from shore, is 128 ft. long with mooring dolphins 125 ft. from each end. Min. depth alongside 24 ft.

S.P.A. Oil berth, 1,000 ft. length between dolphins, with central discharging pier. Least depth alongside 30 ft. This berth also used for loading palm oil in bulk. Max. size 30,000 d.w.t.

FRESH WATER: Can normally be supplied from wharf at rate of 20 t.p.h. Private water boat available on request. Occasionally water is not available and, at such times, Agent warns Principals in advance.

FUEL: Lubricants can be obtained in drums and bulk diesoline available at Shell/Esso jetty. Approval must be obtained first from Customs Department and Ministry of Trade and Industry before loading.

FIRE PRECAUTIONS: No fire-floats and in case of a vessel alongside, fire brigade should be summoned by dialling 999. The OCPD should be informed also.

CONSULS: At Kota Kinabalu.

REPAIRS: Marine Department operates engineering workshops at Sandakan.

DRY DOCKS: One in Sandakan for vessels up to 120 tons.

A Government-owned shipyard/dry dock known as Sabah Building, Repairing and Engineering Sdn. Bhd. exists in Labuan to undertake full repairs services has been established for ocean-going vessels.

WATCHMEN: No regulations regarding use of watchmen, who, however, can be supplied if required. There have been only very isolated reports of pilferage in Sandakan.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ship's gear used, also for containers ex-feeder ships and heavy lifts in major ports.

HOLIDAYS:

Closure of SPA Ports
During Sabah State Public Holidays – 1990:

All ports under the jurisdiction of the Authority shall be closed completely during the following public holidays:–

(a) New Year	Monday	1st January
(b) Chinese New Year	Saturday	27th February
(c) Good Friday	Friday	13th April
(d) Hari Raya Puasa * (2 days)	Thursday & Friday	26th & 27th April
(e) Labour Day	Tuesday	1st May
(f) Harvest Festival	Wednesday	30th May
(g) Hari Raya Haji *	Tuesday	3rd July
(h) Birthday of Sabah Head of State	Sunday	16th September
(i) Christmas Day	Tuesday	25th December

* Subject to alteration.

The ports will however remain open during other public holidays.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alterations to clocks.

POLICE/AMBULANCE/FIRE: Ambulance: Duchess of Kent Hospital, tel. 2111; Police/Fire: Police Station Emergency, tel. 999.

TELEPHONES: Available.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

IDENTIFICATION CARDS: Not required.

DELAYS: Due to weather conditions only.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah), Sdn. Bhd. are Lloyd's Agents, neither Bureau Veritas nor the American Bureau of Shipping are represented.

(b) Fumigation: No facilities.

(c) Ship Chandlers: All kinds of stores and provisions can be supplied at reasonable prices.

(d) Call Signals and Call Flags: (i) Continuous watch kept by signal station during day-light hours. In emergency such as serious injury or fire a ship should hoist appropriate International Code signal and blow whistle or siren to attract attention. Apart from these circumstances and for purposes of navigation vessels are prohibited from using sound signals for any other reason.

(ii) Signals for attracting Public Service Launch: By day: International Code Pendant No. 8. By night: Three red lights vertical. Owing distance of anchorage from jetty these signals often indistinguishable by hire launches unless they are cruising in the harbour. Regular launch services can be arranged if required by Master. No restrictions against a vessel using its own launch or motor lifeboat but it must not land anywhere other than at Customs wharf.

(e) Recreation Facilities: Three cinemas in town which show English-language films. Cricket, football, and hockey matches can be arranged with local teams and several tennis courts available. Only suitable swimming beaches at Berhala Island at mouth of harbour. Yacht Club and Golf Club for members only, but several Shipping Companies pay Corporate Membership fee which enables all officers and first-class passengers to use club. Recreation Club offers facilities for large variety of sports and entertainment; visitors must be accompanied by a member. Churches in town for Anglican, Catholic, Seventh Day Adventist and Lutheran worship.

REGULATIONS: 1. Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing by filling in Form "A" – "Notice of Arrival" to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

9. Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

SARAWAK COASTAL PORTS

Coastal anchorages at Sibuti, Niah and Suai, 28, 30 and 47 miles S.W. of Miri respectively are being used increasingly for the export of round logs, good holding ground is to be found approximately 3.5 miles offshore in 30 ft. of water. Caution should be observed in the event of sudden wind squalls from the West.

Vessels destined for coastal ports should report to Miri for Customs and Immigration Clearance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Kuching Port Authority, P.O.Box 530, 93710 Kuching, Sarawak. *Tel:* (082) 482144. *Telex:* MA 70420-Kuport. *FAX:* (082) 481696. *Cables:* Kuport Kuching. *Contact:* General Manager.

SEJINGKAT (Sungei Sarawak), Sarawak: 01.35 N. 110.26 E.

Anchorage off Kampong Sejingkat approximately 14 miles from mouth of river and 3 miles below Pending Point. (See "Kuching".)

Main timber loading point for the First Division of Sarawak. Loading used to be seasonal due to log rafts having to be towed from felling areas along coast. Since this is not possible during North-east monsoon season shippers now stockpile during favourable weather and loading continues throughout monsoon period.

Vessels up to 580 ft. length and 25 ft. draft regularly use anchorage. No facilities for obtaining fuel. Fresh water obtainable through Marine Department.

Pilots may be picked up off Tanjong Po in the area marked "Pilots" on Admiralty Chart 1822 or at Sejingkat. In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The port clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Kuching Port Authority, P.O. Box 530, 93710 Kuching, Sarawak, Malaysia. *Tel:* 082-482144. *Telex:* MA 70420-Kuport. *FAX:* 082-481696, 334776 *Cables:* Kuport Kuching. *Contact:* General Manager.

SIBU, Sarawak (incl. Bintangor, Sarikei and Sungei Merah): 02.24 N. 111.56 E. **(See Plan)**

Sibu is the capital of the Third Division of Sarawak. There are 2 navigable routes *(a)* via Paloh River and *(b)* via Rajang River and a third entrance from the North i.e. via Igan River, is uncharted. Sibu is 61 miles from the sea via Paloh, and 70 miles via Rajang.

APPROACHES:

(a) Paloh Channel: The bar was resurveyed in 1975 and shoaling was reported in 1981 to depths of 2.7 m. below chart datum at the middle of the Fairway and Inner Buoys. Masters of ships are advised to consult their tide tables before entering. The buoys are fitted with radar reflectors and the Fairway Buoy is visible for a distance of 10 miles. A conspicious wreck in position Lat. 2° 28′ N., Long. 111° 14.6′ E. has 2 posts above chart datum, serves as a good approach to the Kuala Paloh entrance, and Tanjong Sedi which is on the North bank of the river is marked by a light beacon.

Vessels using this entrance are restricted to a maximum length of 130 m. and drafts of 5.5 m. during the S.W. Monsoon and 4.5 m. during the N.E. Monsoon. During the N.E. Monsoon periods, vessels of 5.5 m. have entered the Paloh Channel but entrance depends on the state of the sea.

When crossing the Kuala Paloh Channel, strong currents and swell (especially during the N.E. Monsoon period) are liable to be encountered thus necessitating caution.

An Inner Bar with at least depth of 3.7 m. exists where the Paloh joins the Seredang at Tanjong Gelang. This crossing is marked by unlit transits and is sheltered.

(b) Rajang Entrances: Vessels intending to use the Rajang River to Sibu are restricted to 60 m. in length and 4 m. in draft as after Tg. Manis deepwater anchorage, the river is winding, narrow and shallow. The depth of the bar is 5.8 m. below chart datum. 2 wrecks in position Lat. 2° 07.6′ N., Long. 111° 7.25′ E. and another in position Lat. 2° 8.7′ N., Long. 111° 14.2′ E. are marked by starboard hand buoys. There is a bar situated about 3 miles below Sarikei with at least depth of 3.9 m. below chart datum.

From Sarikei to Bintangor the river is winding with some shallow patches. Lebaan Corner which is 15 miles below Sibu has a charted depth of 2.2 m.

There is an obstruction off Tanjong Ensurai approximately 6.25 miles upriver from Lebaan with a depth of 4.6 m. Caution should also be exercised when rounding Tanjong Binjei due to 3 shoals across the river, one of which has at least depth of 3 m.

Vessels using this route to Sibu are advised to navigate with caution as tugs towing barges and logs of 100 m. or more are often encountered.

DOCUMENTS: Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Rajang Port Authority, 2 copies for Customs, 1 copy for Port Health Officer and 1 copy for Port Officer.

List of ship's stores (2 copies for Customs).

List of ammunition (2 copies for Customs).

Health Documents (Vaccination certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

PILOTAGE: Pilots are provided by the Marine Department for Sibu and Sarikei for the Paloh and Rajang entrances respectively. Movements of vessels are restricted to daylight hours only. The Pilots use 5 m. fibreglass speedboats which are fitted with VHF.

(a) Kuala Paloh. The Pilots embarked off Tanjong Sedi, at position Lat. 2° 25.5′ N., Long. 111° 18′ E. and application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sibu.

(b) Pilots for Sarikei, Bintangor and Sibu via this river normally embarked in buoyed channel West of Jerijeh Lighthouse but it may be necessary for a ship to follow the pilot speedboat to sheltered waters inside turning buoy. Application for Pilots should be made giving at least 24 hours notice of arrival to "Shipping" Sarikei.

ANCHORAGES: *(a)* Sibu Anchorage. Some foreign-going vessels load, with Customs permission, at the mid-stream anchorage.

(b) Restricted Anchorages.

(i) The Anchorage defined by a line running 045° 2.6 cables from position: Lat. 02° 16.89′ N., Long. 111° 49.28′ E. on Pulau Kerto, thence 135° 8 cables to position; Lat. 02° 16.5′ N., Long. 111° 50.4′ E. thence 225° 1.9 cables to shore on Pulau Kerto. For loading and discharging dangerous goods other than petroleum.

(ii) The berth alongside the Sungei Merah Wharf in position approximately 2 miles downstream from the junction of the Rajang/Igan River on the true right bank. For loading and discharging petroleum.

MAX. SIZE: Largest vessel to berth Sibu was 7,372 gross tons and overall length 137 m.

Deepest drafted vessel to berth Sibu was 7.1 m.

Also see "Approaches".

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

BERTHING:

(a) Principal wharves at Sibu.

1. Rajang Port Authority Wharf 450 m. long with minimum depth of 6.1 m.
2. Sungei Merah Oil Wharf is a 48.8 m. concrete wharf with at least depth of 4.9 m.

(b) Sarikei Wharf.

Rajang Port Authority Wharf 60.4 m. with at least depth of 7.6 m.

(c) Bintagor Wharf.

Rajang Port Authority Wharf 48.8 m. with at least depth of 4.6 m.

STEVEDORES: The Rajang Port Authority provide all labour necessary for loading and discharging at Sibu, Sarikei and Bintangor.

REPAIRS: Sibu is one of the major shipbuilding and repair ports in Sarawak and there are 8 shipyards with slipways of which one of them can accommodate vessels up to 2,000 gross tons.

REGULATIONS: The Merchant Shipping (Ports and Rivers) Regulations, 1961:–

8. The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

9. (i) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(ii) The Port Clearance shall be in the form as prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

10. A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

50. No oil, oily bilge water or substance containing oil of any description shall be discharged or allowed to escape from any vessel or allowed to run off any wharf, into any river or port.

GENERAL: Small quantities of diesel oil bunkers available, also provisions and fresh water. Principal exports rubber, pepper, timber and sago.

AUTHORITY: Rajang Port Authority, 96000 Sibu, Sarawak, Malaysia. *Tel:* 319004-9. *Telex:* LPR MA 72121. *FAX:* 318754. *Cables:* Raport Sibu. *Contact:* Mohidin Hj. Seman, General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754, 332752. *Cables:* "Shipping" Sibu.

AGENT: Pesaka Jardine Shipping Agencies Sdn. Bhd., Room 505, 5th. Floor, Grand Merdin Building, 131 Jalan Kampong Nyabor, 96000 Sibu, Sarawak, East Malaysia. Tel: (084) 332673/332668. Telex: MA72194. Fax: (084) 318689. Cables: "Jarship Sibu".

Associated with Jardine Shipping Agencies.

SIPITANG, Sabah: 05.03 N. 115.31 E.

SHIPMASTER'S REPORT: February 1987.

LOCATION: A new jetty called the "SFI Jetty" has been built for vessels up to about 15,000 tons deadweight at Sipitang in Brunei Bay. Approximate position of jetty is Lat. 05° 02.7′ N., Long. 115° 30.65′ E.

DOCUMENTS: Before proceeding to Sipitang we called at Labuan Quarantine Anchorage to meet Authorities (Customs, Quarantine and Immigration Officers) after which vessel proceeded to Sipitang Anchorage. A pilot was not supplied for above manoeuvring.

ANCHORAGE: When anchoring at Sipitang, vessels should not proceed nearer than 2.5 miles to 3.0 miles off the jetty as there are fishing stakes in the vicinity and 2 obstructions located at Lat. 05° 02.4′ N., Long. 115° 29.35′ E. and Lat. 05° 03.3′ N., Long. 115° 29.4′ E.

APPROACHES: The light which should be in position Lat. 05° 03.65′ N., Long. 115° 30.1′ E. was not in position.

RESTRICTIONS: Great care should be taken when crossing Brunei Bay at night as there are many unlit laid-up tankers and small fishing boats in the area.

TUGS: One tug available.

BERTHING: When going alongside the tug makes fast aft. The starboard anchor was dropped to stop the bow and vessel berthed port side alongside.

Vessel Particulars:

Length	172.0 m.	
Breadth	25.9 m.	
G.R.T.	16,703	
Arrival Draft	Forward	28 ft. 00 in.
	Aft	31 ft. 00 in.

Cargo Discharged: Wood Pulp from West Coast U.S.A./Canada.

GENERAL: There are no banks or chandlers at Sipitang.

We obtained fresh fish and vegetables at the local market and rice, flour, sugar, eggs, cooking oil, etc., at a local store called Rocky Liam.

TANJONG MANIS, Sarawak: 02.09 N. 111.21 E.

PILOTAGE: Pilots embarked, weather permitting in the buoyed channel West of Jerijeh Lighthouse but occasionally the Pilot will request ships to proceed into sheltered waters as they use 5 m. fibre-glass speedboats, fitted with VHF.

Application for Pilot should be made giving 24 hours notice of arrival to "Shipping Sarikei" and Masters can call "Rajang Pilot" before arrival.

APPROACHES: Rajang River entrance has at least depth of 5.8 m. below chart datum. The entrance is well lit by two lighthouses and one light beacon and the bar is marked by two light buoys.

There is a wreck situated at Lat. 2° 7.6′ N., Long. 111° 7.25′ E. which is approximately 8 cables S.E.×E. of the inner Fairway Buoy marked by a starboard hand buoy and about 7 miles further inwards South-West of Kampong Rajang another wreck at Lat. 2° 8.7′ N., Long. 111° 14.12′ E. which is also marked by a starboard hand buoy.

ANCHORAGE: *Tanjong Manis Anchorage:* This is a deepwater anchorage 20 miles from the Fairway Buoy, used by vessels loading timber. The anchorage can accommodate approximately 3 vessels of 183 m. and 12 vessels of 120 m. – 150 m. in length.

Restricted Anchorage: Abeam of Loba Selemit on the North bank of the Rajang river in position Lat. 2° 08′ N., Long. 111° 16′ 35″ E. is restricted to loading and discharging any dangerous goods.

MAX. SIZE: The maximum length of a vessel permitted is 183 m. and max. draft 8.4 m.

AUTHORITY: Rajang Port Authority, 96000 Sibu, Sarawak, Malaysia. *Tel:* 319004-9 (6 lines). *Telex:* LPR MA 72121. *FAX:* 318754. *Cables:* Raport Sibu. *Contact:* Mr. Mohidin Hj. Seman, General Manager.

Marine Department, Sibu, Sarawak. *Tel:* 332754/332752. *Cables:* "Shipping" Sibu.

TAWAU, Sabah: 04.14 N. 117.52 E. (See Plan)

PORT LIMITS: The Port of Tawau shall comprise the waters of Cowie Bay and Wallace Bay and rivers entering same contained within the following limits:

A line from Lat. 4° 13.3′ N., Long. 118° 00.0′ E. to the National boundary mark on the Eastern shore of Sebatik Island, thence to the National boundary mark on the Western shore of the said island, thence in a 270°(T) direction to the shores at Burs Point, thence in a 311°(T) direction to Lat. 4° 20.0′ N., Long. 117° 25.9′ E. thence in a 070°(T) direction to Lat. 4° 25.0′ N., Long. 117° 40.0′ E., thence in a 120°(T) direction to the point of commencement.

DOCUMENTS:

(a) To be Produced on Arrival:

Customs

2 Manifests in prescribed form.
2 Crew Lists.
1 Last Customs Clearance.
2 Stores Lists.
2 Passenger Lists.
2 Arms Lists.
2 copies Through Cargo Manifest.
2 copies Crew Personal Effects List.
2 copies Parcels List.
2 copies Narcotic & Dangerous Drugs List.
2 copies Customs Clearance (Last Port).
1 copy Ship's Arrival Report.
2 copies General Information or Vessel's Particulars.

Marine

1 Marine Dept. Boarding Report, is required to be completed.
1 Last Port Clearance.
1 Crew List.
1 Passenger List.

Agent

4 (2 for SPA) Manifests in the prescribed form.
1 Crew List.
1 Passenger List.

Immigration

2 Crew Lists.
2 Passenger Lists.

Travel Control Office

2 each, Crew Lists and Passenger Lists.

(b) To be Supplied to Ship before Departure:

Manifests, as required by vessel.
1 Port Clearance and 1 Customs Clearance.
3 copies of Passenger List.

(c) To be supplied by ship prior to arrival:

Where possible, cargo manifests and stowage plans should be forwarded in advance to local Agents and Port Authority ahead of vessels.

Certificates: Registry, Load Line, Radio, Safety Equipment and Derat Exemption.

PILOTAGE: Not compulsory. A Pilot is available from 0600 to 1800 hrs. for berthing vessels given reasonable notice (48 hours). Marine Department Tel: 73510.

Applications normally made by Shipping Agents with advance notice of 24 hours prior to actual time that Pilot Services are required. Pilot boats are between 30 ft. – 40 ft. length and equipped with VHF/AM sets – 80.4 Mc/s. frequency. Pilot station at Port Office (Marine Department) and location for vessel awaiting Pilot is within Port Limits.

ANCHORAGES: Good anchorage in 8 fathoms 1,000 yd. to 1,300 yd. W.N.W. of wharf; and 350 yd. South there is an anchorage in 8.5 fathoms.

Petroleum Anchorage: An area bounded by parallels of Lat. 04° 15′ N. and Lat. 04° 16′ N. and meridians of Long. 117° 51′ E. and Long. 117° 52′ E. This area is to be marked "Petroleum Anchorage".

Explosives Anchorage: An area bounded by parallels of Lat. 04° 12′ N. and Lat. 04° 13′ N. and meridians of Long. 117° 52′ E. and Long. 117° 53′ E. This area is to be marked "Explosives Anchorage".

Quarantine Anchorage: An area bounded by parallels of Lat. 04° 12.5′ N. and Lat. 04° 13.5′ N. and meridians of Long. 117° 54′ E. and Long. 117° 55′ E. This area is to be marked "Quarantine Anchorage".

RESTRICTIONS: *(a)* Communication ship/shore when lying on Roads: Regular launch services difficult to arrange if required by Master. No recognised signals for summoning a launch, as distance between small boat jetty and anchorage is too great for flag signals to be recognised. No restrictions against a vessel using its own launch or motor life-boat apart from fact that it must not land anywhere other than at Ports Authority Wharf.

(b) Explosives: No vessel carrying explosives shall come within 500 yards of shore or any other vessel except with written permission of Port Manager which will be given provided that:

(i) quantity does not exceed 2,000 lb. of explosives of Class V and VI and are carried in a certified magazine, and there is no other dangerous cargo on board as certified in writing by the Master.
(ii) quantity does not exceed 3,000 lb. and are exclusively of one of the following classes III, IV or VII.

Danger flag must be flown by day and a red light by night.

HEALTH: *(a)* Quarantine: The Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board, unless vessel comes from an infected port. Instead Maritime Declaration of Health is to be filled out and handed to Boarding Officer of Marine Department, who will require one copy of crew list and one copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel healthy.

(b) Immigration: Immigration officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration will require 2 copies of Crew List and 2 copies of Passenger List. Vessels are cleared inward until 1800 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

RADIO: Singapore Radio recommended.

Application for berthing has to be made 24 hours prior to actual time when berthing is required.

Details and requirements:

Name of vessel, gross and nett tonnage, length overall, draft (fore and aft) ETA at berth, ETD from berth, nature and tonnage of cargo to be discharged/loaded, number of gangs required, quantity of fresh water required. Vessels given berth on first come, first served basis.

VHF: A Maritime VHF radio telephone service now operates in the Port of Tawau on Hague Plan Channels 16 and 12.

Continuous listening watch is kept on Channel 16 and the station is operative between the hours of 0600 and 2000 daily.

Vessels are requested to make use of the above facility for notifying ETA, pilotage requirements, etc. Berth availability will be notified on vessel's call.

TUGS: No tugs available.

BERTHING: *(a)* Wharf Light at Tawau in position on N.W. end of Old Wharf, Lat. 04° 14′ 32″ N., Long. 117° 52′ 56″ E.

(b) Tides/Linesmen. The numbers of a vessel which is berthing alongside will be flown from signal station. In addition a cone, indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines; a motor boat can be hired to assist in berthing if prior advice is given.

(c) Old Wharf. Berth Nos. 1 and 2: Consists of a 220 ft. long approach causeway extending from a reclamation area and a 650 ft. long wharf, 40 ft. wide with a dolphin in line +100 ft. off each end.

New Wharf. Berth Nos. 3, 4, 5 and 6: Located 400 ft. North West of Old Wharf. 3 berths on the outer side (No. 3, 4 and 5) with a total length 1,000 ft. 1 berth on inner side (No. 6) with a length of 500 ft.

Berth No.	*Depth* (m.)
1	5.8
2	5.0
3	6.5
4	7.5
5	9.0
6	5.0

(d) Monsoon. During strong wind from S.E. and S.W. ships are liable to range alongside wharf, and during S.W. monsoon sea breeze may make it difficult for ships to leave wharf in the afternoon.

(e) Buoys: No mooring buoys in Tawau.

(f) Lighters: No lighters available except a few wooden and steel lighters owned by Bombay Burmah Trading Corpn. Ltd. and Borneo Abaca Limited. Hire of these lighters can be arranged when they are not being used by owners, which is seldom.

Also see "Developments".

CARGO HANDLING FACILITIES: 41 Fork-lift trucks 3-6 tonnes capacity; 19 Towing tractors; 51 Trailers 5-7 tonnes.

Container Facilities: 2 forklifts, 25 tonne and 19 tonne. 6 Trailers, 20 tonnes. 3 towing tractors.

CARGO: *(a)* Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset except at discretion of Port Manager. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Port Manager.

Heavy lifts usually handled at new wharf only. Customs bonded store is available with about 4,000 sq. ft. of space including Customs Liquor and tobacco store. There are no private bonded warehouses to date. There are no facilities for handling or storing bulk cargoes in any quantity.

Livestock: Subject to approval of Veterinary Authority, certain animals including cattle are prohibited imports and exports except under licence.

(b) Damage. Ship's survey should be carried out on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign, certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

(c) Tally: Tally clerks can be supplied by Agent if required, on receiving advance notice.

(d) Inward. Inward cargo is tallied out of ship onto wharf or into lighter. Damaged cargo surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side, but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(e) Transhipment. After discharge of cargo from first carrier, transhipment cargo is placed under the supervision of the Customs, unless it is possible to arrange direct transhipment into small coastal vessel.

(f) Outward. When vessels berth alongside, packages are brought by motor transport and lighters; when in roads, by lighters.

(g) Refrigerator. Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs Regulations. Inward refrigerated cargo is confined to foodstuffs, meat, etc., and outward to frozen fish.

(h) Explosives. Explosives must be discharged into lighters or immediately on arrival onto wharf under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge, or as through cargo.

FRESH WATER: Can only be supplied at wharf. 24 hours' notice should be given of a vessel's water requirements. Usual rate of supply is about 15 t.p.h. A water barge is available but no guarantee of availability.

STEVEDORES: *(a)* Stevedoring in the hands of Sabah Ports Authority who will supply gangs as required.

(b) Working hours 0730 – 1130 hrs., 1300 – 1700 hrs., 1800 – 2200 hrs.

(c) Overtime: Overtime working hours are from 1800 to 2200 hrs. Application must be made to Customs 1 day in advance; double rate charged.

(d) Sundays and holidays: Work normally carried out on Sundays and holidays (See "Sandakan"). Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(e) Handling Rate: (Net).
Conventional Vessel : 25 t.p.h./gang
Palletised Vessel : 50 t.p.h./gang
Container Vessel : 150 t.p.h./gang

MEDICAL: *(a)* Hospitals. Government General Hospital is only hospital in town, and will receive any sick seamen or officers. 3 classes of wards, but first class ward can only accommodate 2 persons. Hospital is equipped to carry out normal surgery.

(b) Inoculation. Port Health Officer will vaccinate or inoculate Crew members at General hospital.

(c) Port Health Officer. General Hospital, General Office 73533, 72191. Medical Officer-in-Charge 71206. M.O.'s Residence 72239.

TANKERS: Shell Jetty: Least depth 14 ft.

S.P.A. Oil Jetty: Length 240 ft. Depth alongside 32 ft. The jetty is about 2.4 km. from the general cargo berths.

Also see "Shipmaster's Report".

DENSITY: 1020 (approx.).

FUEL: Not available except diesoline in drums.

FIRE PRECAUTIONS: No fire floats and in the case of a vessel alongside catching fire, the fire brigade should be summoned by dialling 2999. The OCPD should also be informed.

CONSULS: At Kota Kinabalu.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary. Agents may exercise option.

OPENING/CLOSING HATCHES: Normally by Stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits: No control, up to discretion of Officer of Customs and Excise.

CARGO GEAR: Ships gear used, also for containers ex-feeder ships and heavy lifts in major ports.

REPATRIATION: Normally arranged by Agents.

AIRPORT: Some airports in State are between 4 km. to 10 km. from town centre.

TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.

HOLIDAYS: See "Sandakan".

POLICE/AMBULANCE/FIRE: *(a)* Police/Fire, Tel. 089-73111; Ambulance/Hospital, Tel. 089-73533.

(b) Accidents: Hoist a two-flag signal and give a blast of the whistle to call attention of signal station. Police and the hospital should be informed immediately of any untoward incident.

TELEPHONES: Available.

SERVICES: Tank cleaning services can be arranged with Agents. Marine Department deals with compass adjustments.

IDENTIFICATION CARDS: Not required.

REGULATIONS: *(a)* Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International code Signal "2 5"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Quarantine (vessel is Healthy request Pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received Pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green light over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

DELAYS: Due to weather conditions only.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah) Ltd., as Lloyd's sub-Agents, may appoint a Surveyor if a survey is requested.

(b) Fumigation: No facilities.

(c) Ship Chandlers: Fresh vegetables obtainable in limited quantities early every morning from vegetable market.

(d) Priority: Vessels are berthed on a "First come first served" basis. Vessels with 75% inward palletised cargo get priority.

(e) Watchmen: These can be supplied if required.

DEVELOPMENTS: Major expansion work was completed in 1982 under Phase 1 of the development programme. Included in the expansion works are facilities, modelled after those in the Kota Kinabalu port, to service feeder container traffic. These new facilities are expected to be sufficient to cater for traffic volume up to the end of the 1990's

It is envisaged that further expansion of port facilities will become necessary for the years beyond 1990. Reserve land has been acquired for this purpose.

The berth facilities in the old port are expected to be upgraded considerably during the next expansion programme.

SHIPMASTER'S REPORT: 1976.

Government Oil Wharf:

Position: Lat. 04° 15.5′ N., Long. 117° 50′ E. 2 miles N.W. of Main Cargo Pier.

Least depth in channel from sea to berth — 30 ft. Vessels to be ballasted to 1/3rd deadweight. Density, 1025. Vessel docks daylight only, undocks anytime at any stage of tide. Anchorage 0.5 mile S.W. of jetty. 5 lengths of ship's hose required. Manifold, 10 in. Length of shoreline 3,000 ft. All products handled. Shore booster pump cannot be used. No steam.

Pilot boards at Quarantine Anchorage. 48 hours notice required. No tugs available. Accommodation ladder required for Quarantine but not at berth.

Fresh water available ex-barge. Other services available: Fresh provisions, repairs, Machine Shop, Airport, Lloyd's Surveyor, Telex, Doctor, Hospital, Laundry, Groceries and Meats. No slop tanks.

AUTHORITY: Sabah Ports Authority, Peti Surat 335, 91007 Tawau, Sabah, Malaysia. *Tel:* (089) 773700, 772852. *Telex:* MA 83127. *Contact:* Thomas Soon Min On, Port Manager.

TELOK EWA, Langkawi, Malaysia: 06.26 N. 99.46 E.

SHIPMASTER'S REPORT: December 1987 (Updated 1990).

Telok Ewa Port is one of the newest ports on the Malayan Peninsular. The port is designed to handle Bulk (both dry and liquid) petroleum products as well as general cargo. Major exports are clinker and bulk/bagged Cement. The port is approximately 80 nautical miles North of Penang Island, and in position Lat. 06° 25′ 36″ N., Long. 99° 46′ E.

PORT LIMITS: All the waters enclosed within the area bounded by a line drawn from a point at Lat. 06° 30′ N., Long. 99° 52′ E. in a Southeasterly direction to Lat. 06° 25′ N., Long. 99° 58′ E., thence in a Southerly direction to Lat. 06° 08′ N., Long. 99° 58′ E., thence in a Westerly direction to Lat. 06° 08′ N., Long. 99° 37′ E., thence in a Northerly direction to Lat. 06° 27′ N., Long. 99° 37′ E. and thence in a Northeasterly direction back to Lat. 06° 30′ N., Long. 99° 52′ E. and any navigable waters therein.

DOCUMENTS: The following documents, together with ship's documents and certificates and copies of manifest, are to be presented to the Port Officer at time of report.

Crew List.
Vaccination List.
Stores List.
Personal Declaration.
Drug & Narcotic List.
Passenger List.
Last three ports of call.

PILOTAGE: Pilotage is compulsory for all vessels exceeding 30 m. in length entering or leaving the port limits. Pilots are available throughout 24 hours and the boarding point is in position Lat. 06° 27.8′ N., Long. 99° 45.5′ E.

While rounding off Tanjung Chinchin it is preferable to keep North of the fairway during the N.E. monsoon as considerable S./S.W. set is experienced with strong and persistent E./N.E. winds.

ANCHORAGES: Anchorage area is situated East of Pilot boarding station marked on BA. Chart No. 3943.

MAX. SIZE: There is a restriction of 9.0 m. draft at present alongside. Permission to exceed 9.0 m. may be given under exceptional circumstances with a tug on stand-by during manoeuvres.

HEALTH: Health Official boards vessel when alongside. A close check is carried out on Vaccination List.

TUGS: One tug of 1,500 b.h.p. available at present. It is only used during deep draft vessels unberthing. Usually ships berth heading into the wind/tide using the off-shore anchor.

STEVEDORES: Arranged by Kedah Cement. They usually need notice of 7 days, 72 hours, 48 hours and 24 hours.

CRANES: For clinker and bulk cement, Kedah Cement, the operators of the terminal, use one shoot of about 500 t.p.h. capacity and for raw material imports such as Bauxite/Iron ore a grab crane of 11.2 tonnes SWL is in operation at present. For loading bagged cement, ship's own gear is used.

MEDICAL: There is a hospital, for minor surgery only, at Kuah which is 24 km. from the berth. For serious cases, patients to go to the mainland, one hour further by ferry.

DENSITY: 1020/1021.

FRESH WATER: Available at the berth, rate about 100 t.p.h.

REPAIRS: All repairs are carried out on the mainland.

AIRPORT: There are daily flights to Penang and Kuala Lumpur.

TIME: GMT plus 8 hours all year round.

STORING: Fresh provisions can be obtained locally but at least 2 days notice required as some items may have to be brought from the mainland.

DELAYS: None, except rain.

GENERAL: Well organised port with efficient and skilled labour and a very co-operative stevedore. No thefts reported on board. When nearing 9.0 m. draft it is preferable to check depths even though we found 9.6 m. up to chart datum at the general cargo berth.

AUTHORITY: Marine Department, Telok Ewa, 07000 Langkawi, Malaysia. *Tel:* 04-788505. *Telex:* MA 39748. *FAX:* 04-788691. *Contact:* Mr. Rossid Musa, Port Manager.

AGENT: Malaysian Shipping Agencies, Bangunanan PKNK, Padang Lalang, Air Hongat, 07000 Langkawi. Telex No. MA 42096.

Maldives

MALE: 04.10 N. 73.31 E.

RADIO: ETA to be sent to Maldives Ports Authority 24 hours prior to arrival.

Coastal Radio, Department of Posts and Telecommunication
Call sign: 802
Tel. No.: 325557
Telex: 66069 MALRAD

VHF: Channel 12 used to contact Maldives Ports Authority.

CRANES: Coles and Mitsubishi cranes are used, all are shore cranes with a maximum capacity of 25 tons. All vessels anchored at outer harbour should use their own gear.

At present there are 11 lighters available from 75 tons – 150 tons.

STEVEDORES: Ships arriving at Male Commercial Harbour have an average ship turnaround of 3.9 days. Total port hours amount to 45 hours. Gang start work at 0730 hrs. and stop work at 2230 hrs. 15 lighters are available to work on ships, including forklifts that could work in hatches.

MEDICAL: No advance notice required, except in case of serious illness which is to be included in arrival cable.

FRESH WATER: Fresh water should be ordered through the Agent.

FUEL: Fuel should be ordered through the Agent, delivery could be undertaken by the Maldives Ports Authority.

CONSULS:

Bangladesh	India	Sri Lanka
Germany F.R.	Pakistan	U.S.A.

HATCHES: Opening and closing of hatches will be undertaken by ship's crew.

AIRPORT: Distance to airport 0.75 km., served by many international airlines.

POLICE/AMBULANCE/FIRE: Police 111; Ambulance 102; Fire 101.

EMERGENCY CO-ORDINATION CENTRE: Male Coastal Radio, Department of Posts & Telecommunication.

VHF	Channel 16
R/T	821 kHz
	1221 kHz
W/T	8363.6 kHz
R/T Distress & normal calling	2182 kHz Simplex
Distress & Supplementary calling	6215.5 kHz, 4125 kHz
Range	3,000 km.

BANKS: State Bank of India, Habib Bank Ltd., Bank of Ceylon, Bank of Maldives, Bank of Credit & Commerce International.

SHIPMASTER'S REPORT: May 1982 (Updated 1986).

Approaches: Except in very heavy rain during the S.W. monsoon, the visibility is good and landfall can be made easily. The T.V. Tower, South of Male in position: Lat. 04° 10.2′ N., Long. 73° 30.9′ E. is visible at a distance of 30 miles. The dome of the Islamic Centre in position: Lat. 04° 10.7′ N., Long. 73° 30.85′ E. and the minaret of Grand Mosque (Islamic Centre) in position: Lat. 04° 10.69′ N., Long. 73° 30.83′ E. are also visible for approaching vessels.

Recommended entrance to Male is via East Male Passage. As many small fishing, passenger/pleasure vessels are crossing the passage, approaching vessels should be very careful and proceed at slow speed if necessary. Beacons mentioned below are still non-existent, therefore night approach should be avoided.

As there are a number of fishing vessels and other small vessels anchored at Male anchorage, Masters of vessels anchoring should give special care while approaching the anchorage.

The Northern route via Kaduoigiri Passage as described in the Sailing Directions was taken. Apart from a very strong Westerly set near the reef N.W. of Kaduoigiri Island no particulars were observed.

Beacons in the following positions non-existent:
A. Lat. 04° 11.75′ N., Long. 73° 31.05′ E. (West of Dunidu Island).
B. Lat. 04° 12.37′ N., Long. 73° 30.43′ E. (Reef between Dunidu & Ferdo).
C. Lat. 04° 13.45′ N., Long. 73° 31.54′ E. (Vehamanafushi).

Mooring Buoy (private) in position: 04° 11.45′ N., 73° 30.97′ E. non-existent.

Navigation Warning: Unmanned/unlighted fishing vessel (approximately 60 tons gross) anchored in position: 04° 11.2′ N., 73° 30.55′ E.

Documents: Papers Required: Security: 1 Crew List (search party, search all cabins for weapons/pornographic material).

Doctor: Port Health Form (Male Issue), Vaccination List (Cholera Vaccinations).

Immigration: 2 Crew Lists (all passports checked).

Customs: Last Port Clearance, 1 Crew List, Cargo Manifests, Store List from Head of Catering. Customs will also check whether the vessel is carrying valid Safety Certificates on board, i.e. Safety Construction Certificate, Safety Equipment Certificate, Loadline and Safety Radio Telephony Certificate. Importing of alcohol without prior permission is prohibited. Whatever is on board may be sealed in the ship's bond. Import of Narcotic Drugs is totally prohibited into the Republic of Maldives. Whatever found on board will be confiscated, penalties levied and the Owner/Master and crew will be prosecuted. Customs also gave the ship a "Notice to Ships Calling at the Port of Male". See "Notice".

Agents: 1 Crew List. All passports taken ashore to be returned upon departure with Customs Clearance.

Cargo Handling: (Chief Officer's Report):

Arrived 20th May, 1982. Sailed 24th May, 1982. Port hours: 94 hours 11 minutes.

Three gangs are available in Male to work on board ships, of which 2 were supplied on 20th, 21st and 22nd May. One gang on 23rd May. The gangs arrived diligently between 0750 hrs. and 0800 hrs. in the morning and worked till about 2220 hrs. except on the Thursday, when they worked till 1730 hrs. and on the 21st when work was interrupted from 1000 hrs. till 1415 hrs. being a Muslim religious festival.

No forklift trucks are available for work on board ships in Male and cargo stacked on pallets had to be dragged from the sides of the holds under the hook. This was the cause of damaged bags of flour and cartons of provisions.

There are 6 lighters available. Empty lighters were regularly supplied, except after rainy periods, when discharging of lighters alongside the wharf is interrupted.

Shore tally staff seemed to be very dedicated in their duties and were accompanied by a Customs Officer/Clerk.

Nett tonnages per hour:
Hatch No. 1: 12.1 t.p.h. (182 tons discharged).
Hatch No. 2: 12.2 t.p.h. (216 tons discharged).
Hatch No. 6: 16.8 t.p.h. (411 tons discharged).

A boat schedule was arranged upon arrival but a regular boat service was never carried out. The Agency appeared not to be in possession of any documentation (manifests, stowage plans, etc.) of the cargo to be discharged.

Developments: 1986. A new quay to bring lighters alongside, with Customs House and warehouses is under construction at N.W. end of Male, to be completed in 1986. On completion of the project the cargo handling will increase.

NOTICE: Issued by Maldive Customs.

Notice to Ships Calling at the Port of Male

1. All ships are required to submit a Port Clearance, Cargo Manifest, Passenger and Crew List and where available any other relevant documents.
2. Departure time should be notified and a Port Clearance obtained.
3. All visitors, officers and crew and passengers of ships are requested to use the Customs Jetty when arriving or leaving Male.
4. All articles are subject to inspection by the Customs.
5. All ships anchored at Male Harbour should exhibit on board the under mentioned lights between sunset and sunrise.
   a. White anchor light of all round visibility.
   b. White stern light with 135° illuminated sector.
   c. Mast light with all round visibility.

The Law On Prohibited Imports into Maldives

1. *Prohibited Items of Import Except for the Use of the State:*
   a. Any type of gun powder.
   b. Weapons of war.
   c. Opium, ganja, cocaine and any other item which could be used as an intoxicant.

Articles carried by foreign distinguished personnel signifying their ranks, titles or honours and articles carried in connection with such ranks, titles or honours by those who accompany such distinguished guests shall be exception to this Article.

2. *Prohibited Items of Import Without a Permit from the Ministry of Home Affairs Except for the Use of the State:*
   a. All forms of poisons and sulphuric acid.
   b. Nitrates.
   c. Dangerous animals.
3. *Totally Prohibited Items of Imports Into Maldives:*
   a. Pornographic literature and posters.
4. *Prohibited Items of Import Without a Permit from the Ministry of External Affairs Except for the Use of the State:*
   a. Alcoholic drinks.
   b. Dogs.
   c. Pigs or pork.
   d. Statues (used for worship).

In addition to items stipulated in this Bill, the Principal Collector of Customs shall withhold such items, the import of which is in his opinion shall be prohibited and bring the matter to the notice of the Department of Finance. The final settlement will be in accordance with the decision of that Department.

AUTHORITY: Ministry of Transport and Shipping, Male (20-05), Republic of Maldives. *Tel:* 2413. *Cables:* Mintrans, Maldives. *Contact:* Ahmed Shareef, Director of Marine Affairs.

Maldives Ports Authority, Male, Republic of Maldives. *Tel:* 325681, 325240, 325237. *Contact:* Mohamed Zaki, Deputy Director.

NOTES

Please also advise Shipping Guides Ltd.

Malta

VALLETTA (Including Marsaxlokk): 35.54 N. 14.31 E.

(See Plan)

DOCUMENTS: On arrival the Master has to fill the Pratique Deposition, the Stores List, the Crew Declaration, and the Crew List (two copies). The forms for the Pratique Deposition and for the Store List are supplied by the Customs Boarding Officer.

Arrival Notice: In accordance with the Port's Regulations Master or Agent of a vessel should give the ETA to the Port Department on a form prescribed by the regulations as early as possible prior to arrival and 48 hours in the case of vessels carrying petroleum or other hazardous cargoes.

Certificates: Ship's Register; Load Line Certificate; Derat Certificate; Factory Act Book.

PILOTAGE: Pilotage is compulsory for vessels above 500 g.r.t. Pilots for Valletta and Marsaxlokk board vessels at Fairway Buoy, weather permitting. Pilots available round the clock all the year round. In bad weather Pilots board vessels inside entrance, subject to size of vessels, Master's knowledge of the port and Master's willingness to bring vessel up to Bighi Bay.

Pilot boat is equipped with VHF on Channels 12, 14 and 16.

ANCHORAGES: Anchorage in territorial waters and in other harbours is prohibited unless expressly authorised by the Port Department.

RESTRICTIONS: Maximum depth at entrance is 16 m. Nature of bottom in entrance channel, rock and mud. Harbour channels – mud.

Harbour entrance and approaches affected by current. With North-Westerly winds there is a set of up to 0.5 knots from N.W. to N.E.

Port is subject to closure in gregale (N.E. gale) conditions – Winter months occasionally, not more than 4 times a year.

MAX. SIZE: Discharging Berths:

Deep Water Quay – 500 m. long, depth 10 m.

Crucifix Wharf: 264 m. long, depth 10 m.

Flagstone Wharf: 217 m. long, depth 13.7 m. Can handle bulk coal carriers and tankers.

Magazine Wharf: Combined with Laboratory Wharf has total length of 440 m. Depth 12.2 m. – 15.0 m. The Kordin Grain Terminal is equipped to handle bulk grain carriers up to 70,000 d.w.t. Capacity of silos 86,000 tons. Maximum discharge rate 1,100 t.p.h. Maximum loading rate 1,250 t.p.h.

Berth Nos. 1, 2 and 3 have maximum depth of water alongside of 9.75 m. Maximum displacement tonnage of 15,000 tons.

Berth No. 4 has the same depth of water and can take maximum displacement of 25,000 tons.

Laboratory Wharf has a length of 220 m. with a depth of 12 m. Two other small berths adjacent to the main wharf are used for Ro/Ro and direct deliveries.

There are other berths at Coal Wharf (length 275 m., depth 7.0 m.) for cargoes intended for discharging direct to trucks. There are various berths for various sizes of ships at Bighi Bay, Fish Market, Fuel Wharf and Bridge Wharf.

Also see "Developments".

HEALTH: Port Medical Officer grants Pratique after boarding vessels on arrival. Accelerated Pratique may be granted through Agent provided crew are all in good health and ship has not called at any infected port during previous 15 days and is coming from a European port.

RADIO: Call sign 9HD. Radio telephone working frequency 2625 kHz. Listening watch 2182 kHz.

RADAR/VHF: No radar service available. VHF available at Port Signal Station. Operating on VHF Channels 11, 12, 14 and 16.

Also see "Pilotage".

TUGS: Meet vessels just inside harbour entrance. Lines given at discretion of ship's Master under advice from Pilot.

BERTHING: Berthing conference held at the Port Department daily at 1100 hrs. between Monday and Saturday when berths are allocated for expected ships. No specific requirements necessary. Once berth has been allocated by Port Department vessels can berth at any time at the allocated berth (container and Ro/Ro berths are available).

Also see "Developments" and "Plan".

EQUIPMENT: One gantry crane maximum lifting capacity 35 tons. One mobile crane maximum lifting capacity 250 tons. Two mobile cranes with maximum lifting capacity of 75 tons (for container handling). Various other mobile cranes. Fork lift trucks 2×40 tons. Various other smaller fork lift trucks and other cargo handling equipment.

STEVEDORES: Ship Agents of liner vessels normally act as stevedores. Port workers for stevedoring are ordered by Shipping Agents and labour is allocated from a pool operated by the Manager of port workers.

Working Hours: 0800 – 1200 hrs., 1300 – 1700 hrs. Vessels may work till 2100 – 2200 hrs. to complete. Nightwork: 1900 – 0400 hrs. (mainly containers).

Work may be arranged on Saturdays, Sundays and Holidays at special rates.

MEDICAL: Notice must be given to Agents as early as possible. Hospital facilities available. Crew must be in possession of inoculation/vaccination certificates.

TANKERS: Vessels must be gas-free except for the tank cleaning berth. Facilities for discharging slop or residue are available.

N.B. Vessels not gas-free are not allowed to enter port between sunset and sunrise.

FRESH WATER: Limited amount ex-barge subject to permission from Water Authority. Notice, as long as possible required.

FUEL: Sea Malta Co. Ltd. Grades handled include gas oil, fuel oil, thin fuel oil 30 cST up to 380 cST.

FIRE PRECAUTIONS: Precautions as laid down in Ports Regulations for cargo ships and as in Petroleum Ships Regulations for tankers. Civil tugs partly equipped with fire fighting equipment.

REPAIRS: Malta Dry Docks has the capability to carry out normal and specialised engine, hull and machinery repairs such as:

Engine, (diesel, steam, turbine)
Auxiliaries (turbine and diesel)
Turbine re-blading
Propeller servicing, repairs including re-tipping (tips cast in yard) and balancing
Dynamic balancing of rotors
Boiler and heat exchanger chemical cleaning
Rudder and tailshaft alignment and repairs
Gritblasting (internal/external) to all standards
Hull cleaning by high pressure water jet
Refrigeration system repairs
Replacement of lignum vitae stern tube bearings
Installation of Deutsche Werft Simplex stern tube sealings
Internal/external cathodic protection
Combustion control system repairs
Re-tubing of boilers, brickwork and lagging
Renewal of heating coils, cargo and stripping lines
Hull repairs (welded and rivetted)
Jumboizing.

Travelling Repair Parties:

Malta Dry Docks Travelling Repair Parties are available to carry out repairs at sea both as an emergency repair, or as a means of reducing lay-up time during normal voyage repairs or classification surveys.

It is possible to shorten the time of refits by employing a travelling repair party to commence work before entering or complete after leaving the Dry Docks, non-critical items being completed on passage.

Malta allows the maximum use to be made of Travelling Repair Parties, situated as it is in the centre of the Mediterranean, midway between Gibraltar and Port Said. It is ideally placed on the shipping lanes between the East and West and connected by daily air services to Europe and North Africa.

Malta Dry Docks Travelling Repair Parties are equipped to carry out the following work:

1. Repairs to main and auxiliary boilers, including re-tubing, renewal of brickwork and insulation and fitting of new furnaces in Scotch type boilers.
2. Overhauling and repairing deck and engine room auxiliary steam and diesel plant, cargo systems and valves.
3. Repairs or replacement of cargo tank heating and stripping line systems, in cast iron, steel or aluminium/brass.
4. "Metalock" cold repairs to castings by trained specialists.
5. Gas or electric welding to Classification Society requirements for steelwork repairs and reinforcements.
6. Repair or renewal of electrical wires and cables.
7. Overhaul or installation of any electrical machinery.
8. Repair or installation of all navigational aids, i.e., radar, radio, auto-pilots, gyros by qualified personnel.

Any enquiry will receive immediate attention by radio, telex or telephone.

SURVEYORS: Lloyd's Register of Shipping; The London Salvage Association; American Bureau; U.S. Salvage Association; Det Norske Veritas; Registro Navale Italiano; Bureau Veritas; Germanischer Lloyd; Panama Bureau of Shipping; Nippon Kaiji Kyokai.

GANGWAY/DECK WATCHMEN: Gangway recommended. Deck compulsory.

OPENING/CLOSING HATCHES: By ship's crew or shore labour.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, plus one bottle spirits (officers only).

CARGO GEAR: Certificates of cargo handling gear have to be valid before cargo work can commence. Factory Act Book to be endorsed quadrienially and annually.

REPATRIATION: Facilities exist for crew changes and repatriation by air.

AIRPORT: Luqa Airport is 4 miles from port, served by Air Malta and other airlines. Daily flights to London and Rome. Also other flights to other countries.

DRY DOCKS: Malta Dry Docks.
Docking Facilities:

Dock Number	Length (m.)	Inside Beam (m.)	Depth (m.)	Cranes Capacity (tons)	Other Facilities*
1	153.92	21.64	5.57	1×50 1×5	A–S–FW–SW
2	169.6	24.68	9.96	1×4 3×5 1×20	A–S–FW–SW
3	142.9	17.67	9.55	1×4 2×10 1×20	A–S–FW–SW
4	262.5	39.6	10.3	1×5 1×10 1×50	A–S–FW–SW

7	100.0	35.35	4.32	1×150	FW–SW–A

*A – Compressed Air FW – Fresh Water O – Oxygen
S – Steam SW – Salt Water P – Propane

Capacity of No. 6 Dock 300,000 d.w.t.

TIME: GMT plus 1 hour in Winter. Summer time kept from last Sunday in March until last Sunday in September.

HOLIDAYS: New Year (1st January – no work); St. Paul's Shipwreck (10th February); St. Joseph's Day (19th March); National Day (31st March); Good Friday (no work performed at all on this holiday and in the afternoon of Tuesday Carnival); St. Joseph the Worker (1st May); Ascension Day (date changes); St. Peter and St. Paul (29th June); Assumption of B.V. Mary (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); 13th December (Republic Day); Christmas Day (25th December); (no work performed at all).

POLICE/AMBULANCE/FIRE: Police 28135; Ambulance 961; Shore Fire Brigade 99.

TELEPHONES: Can be arranged at the Dry Dock Berths, and on buoys.

SERVICES: Tank cleaning and underwater hull cleaning undertaken by Malta Dry Docks.

Ricasoli Tanker Cleaning Installation:

The tanker cleaning installation at Ricasoli accepts cleaning for dry docking, repairs and survey for upgrading tankers.

The jetty area consists of a 100 m. jetty, situated immediately inside the Grand Harbour, and capable of berthing tankers up to 100,000 d.w.t. at a maximum draft of 8.5 m. in 10 m. of water.

Tankers are assured of immediate attention on arrival from a trained crew of tank-cleaning personnel. Work is continuous 24 hours per day from the time of arrival of the vessel, together with a 24-hour security watch.

1. Washing: The installation supplies hot wash water at a temperature of 60°C and a pressure of 14 kg./sq.cm. to operate 4 washing machines simultaneously, with a delivery rate of 30 – 34 t.p.h. The discharge of slops and/or ballast is at a maximum of 1,200 t.p.h. Chemical cleaning is also undertaken and Malta Dry Docks holds stocks of well-known chemicals.
2. Gas-freeing: The installation operates 3 compressors and 6 Meco ventilators, together with trunking, are available for gas-freeing.
3. Steam Supply: This is available at the jetty when required. All associated tank-cleaning equipment is available for ship's use.

Full fire-fighting facilities are available at the jetty.

The installation also makes distilled water for sale to ships and a separate line is available at the jetty for the discharge of this product.

The reception and treatment area incorporates reception tanks, treatment tanks and an observation tank with separating baffles and oil sump. In addition there is an oil storage tank and a distilled water storage tank.

The boiler house accommodates 3 Scotch boilers with all associated auxiliary equipment. The steam supply is extensively used in the plant area for heating and treatment purposes. An evaporator-distiller is incorporated in the Boiler House for the production of distilled water.

The whole area has been designed to be perfectly safe and is to the standards laid down by the Institute of Petroleum Safety Codes for Installations storing Class A Petroleum. Strict safety regulations are applicable to the whole plant and the tank-cleaning crew has been thoroughly trained in these matters.

Mediterranean Oilfield Services Co. Ltd.:

Address: Manoel Island, Malta. Tel: 36408, 36409, 39656, 31411, 38195. Telex: MW1273, MW1485. Cables: Medserv, Malta.

24 hour service, 7 days a week.

Devoted solely to the oil industry. 800 ft. deep water quay frontage. 1,722 sq.ft. bonded warehouse. 40,000 sq.ft. covered storage. 20 acres open storage. Office space. Catering services.

One operation for loading mud, cement, water, pipes, fuel and other supplies. Labour contractors.

BANKS: Bank of Valletta, Central Bank of Malta, Lombard Bank (Malta) Ltd., Mid-Med Bank Ltd., Melita Bank International Ltd.

IDENTIFICATION CARDS: A personal identification card not required. Passports or seamen's books will suffice.

GENERAL: Important that tankers are gas-free before entering, and that vessels do not carry explosives.

DEVELOPMENTS: *Marsaxlokk:* Developed as a transhipment port. In the first stage (completed) the following is available.

Berth	Length (m.)	Depth (m.)	Remarks
A-B	70	3.0	Service Berth
B-C	80	3.5	General Cargo and Containers
C-D	167	9.5	
D-E	550	13.5	

In the second stage a breakwater berth, length 1,150 m., and depth alongside 14.25 m. – 18.75 m., is being constructed. When fully operational the Breakwater Berth will be able to accommodate bulk carriers up to 80,000 d.w.t.

Stage three will consist of Container/Ro-Ro Berths and Bulk Terminal. Total length of quays will be 1,330 m. and dredged depths will range from 12 m. to 22 m.

2 gantry cranes will be available to handle third and fourth generation container ships.

The bay will be dredged from 12.5 m. to 16.0 m. in Summer of 1990.

AUTHORITY: Director of Ports, Port Department, Marina Pinto, Valletta. *Tel:* 222679. *Telex:* 1110 Regship MT. *Contact:* Director of Ports.

AGENT: Kirton & Co. Ltd., 18/19 Floor 3, Europa Centre, Floriana, Malta. Cable address: "Kirton Malta". Tel: 234360. After hours 674650, 319861, 820599. Telex: MW 1241. Sole and exclusive Agents for Lambert Brothers Ship Agencies Ltd.

Commonwealth of the Northern Mariana Islands

SAIPAN (Commercial Port): 15.13 N. 145.44 E.

(See Plan)

DOCUMENTS:
5 General Declarations.
5 Crew Manifests.
5 Passenger Manifests.
4 Crew Personal Effects Lists.
3 Sealed Stores Lists (food, medication, etc).
3 Cargo Manifests.
3 Dangerous Cargo Lists.
2 Crew Vaccination Lists.
2 Entry Permits.
Note: Entry Permit may be requested via cable to Northern Marianas Immigration or through local Agent.

PILOTAGE: Pilot available on request. Advance notice of least 24 hours required. Pilot boards at Tango Buoy (15° 12′ 07″ N., 145° 40′ 20″ E.).

ANCHORAGES: Outside harbour at Garapan Anchorage and inside harbour basin.

RESTRICTIONS: No waste discharge within harbour or within territorial waters (3 miles). Harbour depth restricted to 30 ft. MSL.

MAX. SIZE: Berth space limited to 500 ft. at longest portion of dock. Vessels longer than 500 ft. require special permission from Port Superintendent.

HEALTH: No formal clearance required; however, authorities may demand proof of immunisation against certain communicable diseases if ship is coming from infected countries.

VHF: Saipan Port Control on Channel 16 for berthing assignment. U.S. Coastguard on Channel 16 for emergency.

RADAR: Not available.

TUGS: None.

BERTHING: Berth No. 1, length 200 ft.; Nos. 2 and 3, length 500 ft.; No. 4, length 200 ft.

CRANES: 2×50 ton cranes and 1 × 165 ton crane.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Available on request prior to arrival of vessel, at least 24 hours advance notice required.

MEDICAL: At least 48 hours advance notice for requests other than emergencies. Hospital facility is limited.

TANKERS: Discharging or loading of fuel at Berths No. 2 and 3 only. 1×2 in. connection, standard thread.

FRESH WATER: Available between the hours of 0600 – 2000 hrs. local time. Rate approximately 100 gallons per minute. Cost – 30 cents per ton.

FUEL: Mobil diesel fuel ASTM No. 2 D grade, flash point 150°, API 34 – 42, viscosity SSU at 100°F. 33 – 45.

REPAIRS: No repair facilities.

DRY DOCKS: None.

SURVEYORS: John Robinson and Lorenzo I. Deleon Guerrero.

GANGWAY/DECK WATCHMEN: Available upon request.

HATCHES: Stevedore in charge.

CUSTOMS ALLOWANCES: 1 case beer; 0.6 gallons spirits; 3 cartons cigarettes, duty free for personal consumption.

REPATRIATION: Not possible.

AIRPORT: Approximately 9 miles from port. Continental Airlines, Air Mike Express, All Nippon Airlines, Northwest Airlines and Japan Air Lines serving Saipan from Guam and Japan.

TIME: GMT plus 10 hours.

HOLIDAYS: New Year's Day (January 1st); Commonwealth Day (January 9th); President's Day (February 19th); Covenant Day (March 23rd); Memorial Day (May 28th); Liberation Day (July 4th); Labour Day (1st Monday of September); Colombus Day (2nd Monday in October); Citizen's Day (November 5th); Veteran's Day (November 12th); Thanksgiving Day (last Thursday of November); Constitution Day (December 7th); Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Police Tel: 234-6333 and 234-6431. Ambulance Tel: 234-6222 and 234-6115. Fire Tel: 234-9222 and 234-6222.

EMERGENCY CO-ORDINATION CENTRE: U.S. Coast Guard Tel: 234-6101. Civil Defence (local) Tel: 234-6592.

SERVICES: Scuba divers available.

BANKS: Bank of Guam, Telex: 607. Union Bank, Telex: 634. Bank of Saipan, Telex: 682. Bank of Hawaii, Telex: 621.

SHORE LEAVE: Crew members are allowed on shore once cleared by Immigration and Customs.

DELAYS: Due to limited berthing space, vessels are usually delayed until the berth is vacant.

AUTHORITY: Commonwealth Ports Authority, P.O.Box 1055, Saipan, MP 96950, Commonwealth of the Northern Mariana Islands. *FAX:* (670) 234-5962. *Contact:* Roman T. Tudela, Executive Director. *Tel:* (670) 234-8315/16/17. Jose L. G. Diaz, Port Superintendent. *Tel:* 322-9865, 322-9973.

Martinique

FORT DE FRANCE: 14.36 N. 61.04 W. (See Plan)

PORT LIMITS: The seaward limit of the port is the broken line joining the following points: Extremity of Pointe des Negres, South of Fort Saint Louis, Red Buoy No. 3, Black/Yellow Buoy S., Green Buoy No. 6L and Pointe Desgras.

DOCUMENTS:

Maritime Declaration of Health.
4 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
5 Lists of Passengers Disembarking.
2 Lists of Crew Personal Effects.
2 Vessel's Particulars Declarations.
2 Cargo Manifests.

Tankers Only: Certificate of Insurance against Oil Pollution.

PILOTAGE: Call Pilot by International Code flag "G" or by sounding "G" on whistle. Pilot launches are painted black. The Pilot joins vessel on arrival at Pointe des Negres. If Pilot not available, vessel must anchor in the Baie des Flamands, East of Point des Negres to await Pilot.

ANCHORAGES: In Baie des Flamands in front of the town. Depths of 10 m. – 14 m.

MAX. SIZE: Length: 180 m. for vessels with one right hand propeller and without bow-thruster. 250 m. if vessel has two propellers and bow-thruster. See also "Tankers".

HEALTH: Request Free Pratique by radio or can be obtained on arrival when Master completes Health Declaration and presents Health Certificates.

RADIO: Fort de France Radio, call sign FFP. ETA message to Agent required 24 hours before arrival on working days or 48 hours on holidays. Message to include number of crew on board, flag, ship's name, tonnage, length, beam, max. draft on arrival, date and time of arrival.

VHF: Port Authority on Channel 16. Pilot on Channel 13.

RADAR: None.

TUGS: None available or required.

TIME: GMT minus 4 hours.

TELEPHONES: Available in cruise ship reception building at Quai des Tourelles.

SERVICES: No tank cleaning equipment, tank-washing, or compass adjusting.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's Book.

DEVELOPMENTS: There is a plan to install a third container gantry in 1990.

Cruise ship terminal at Baie de Flamands will be available 1990.

SHIPMASTER'S REPORT: December 1988.

Belle Fontaine: (See "Plans").

Vessel: LOA 150 m. Beam 21.0 m. Summer draft 9.05 m. 10,330 g.r.t. 5,584 n.r.t. 3 hatches.

After completion of cargo operations at Fort de France, the pilot boarded and vessel sailed for Belle Fontaine.

The Master takes command from Fort de France pilot station to about 1.5 miles before the berth at Belle Fontaine, when the pilot again assists. The regular pilot boat follows with additional crew from Fort de France and assists in taking the ropes to the dolphins and the jetty. Usually, and preferably, the pilot berths the vessel port side alongside against a slight current. The berthing is also done, preferably, in the early morning, due to absence of wind. The starboard anchor is dropped to 2 shackles on deck when the vessel is about 4 to 3 cables from the berth and is slacked away as required. The anchor is not of use for berthing but is for assisting unberthing. Under normal conditions the vessel makes fast with 2 long headlines and 2 stern lines to the dolphins and 2 springs each, forward and aft.

The berth is built of concrete on a solid foundation, the sea bottom is rock covered with boulders. The berth is very well fendered with 8 large tube-type rubber fenders of about 1.20 m. diameter and 1.50 m. length. Both corners of the berth are additionally protected with 4 smaller tube-type fenders on each side.

The berth is fitted with 2 modern loading arms for receiving fuel for the power station, to which the berth belongs. The berth is also used to receive equipment and spares for the power station, as well as shipping used parts. We loaded 150 tons of general, consisting mainly of oversized and heavy material, also some 40 ft. containers of up to 30 tons each. The space on the berth is limited and if the vessel has to work on a second hatch it has to shift. There is sufficient room to manoeuvre with 40 ft. trailers. The stevedores come from Fort de France.

If vessels are berthing at Belle Fontaine and come directly from overseas, the customs broker takes all documents to Fort de France to obtain Clearance. Usually the authorities do not come on board.

The pilot has to be ordered from Fort de France, and will await the vessel 1 mile Northwest of the berth. All regulations valid for Fort de France are valid for this berth. The official name of the berth is: Fort de France, berth Belle Fontaine.

If repairs or stores are requested it has to be organised through Fort de France companies. In an emergency small amounts of fresh water can be taken by a 1 in. pipeline.

The position of the berth taken by bearings and from official sources (B.A. Chart No. 371) differs slightly from the position taken from the satellite. The latitude shows no difference but the longitude obtained by satellite is 61° 10.47′ W., whereas the position on the chart shows 61° 08.7′ W.

600 m. inshore of the berth is a new power station with 2 conspicuous chimneys. They are illuminated at night by white lights and make a good landmark by day and night. The chimneys are in line 055°.

AUTHORITY: Direction Departementale de l'Equipment (DDE), B.P. 661, Boulevarde du General de Gaulle, 97262 Fort de France Cedex. *Tel:* 63 00 31. *Telex:* 912529 Mr. *Contact:* Monsieur Fourlon, Port Director.

Capitainerie du Port, B.P. 625, 97261 Fort de France Cedex. *Tel:* 63.40.74, 70.20.73. *Telex:* 912854 Mr. *Contact:* M. Gibon, Port Captain.

Mauritania

NOUADHIBOU: (Port Etienne): (See Plan)

POINT CENTRAL: 20.49 N. 17.03 W.

DOCUMENTS:

3 Crew Lists.
2 Stores Lists.
2 Crew Declaration Lists.
2 Passenger Lists (even if "NIL").
2 Ports of Call Lists of the last 30 days.
1 Health Declaration.
1 Vaccination List.

Maritime Gendarmerie: Officers of the Maritime Gendarmerie of Nouadhibou may come on board. They mainly control if the Mauritanian flag (must be flown day and night) is hoisted and check very closely the concordance between the Ship's Articles, the Seaman's Books and the Crew List.

If any difference is found between these three documents a fine may be given to the ship.

Immigration/Police: Crew members are not allowed to go ashore without a safe conduct given by the police. The list of the men asking to go ashore has to be given to Agent on arrival.

Money: On principle, foreign money is not allowed in Mauritania, but Agent may change money into local currency.

No Mauritanian money (Ouguiya) may be kept on board and if the crew have not spent their local money they have to give it back to the Agency (10 Ouguiya about 1 French Franc).

PILOTAGE: Compulsory for vessels calling at Point Central.

An outer pilot station is situated in the vicinity of No. 2 Buoy, bearing 037° distance 4.4 miles from Fairway Buoy No. 0 (Lat. 20° 40′ N., Long. 17° 04′ 30″ W.). Also see "Shipmaster's Report (1977)".

The inner pilot station is 1 mile from the Mineral Wharf bearing East.

ANCHORAGES: Ships waiting can anchor N.E. of No. 2 Buoy, distance 1 mile in 20 m. of water, good holding ground. Another anchorage on the roadstead, the wharf bearing N.W./N.N.W. distance 1 mile can be used by ships prior to berthing.

RESTRICTIONS: Minimum depth of water below chart datum is 17 m. in the buoyed channels and swinging area. Outer channel width is 400 m. but it varies from 250 m. to 400 m. for the inner channel; the radius of the swinging circle being 500 m.

MAX. SIZE: Not to exceed 310 m. in length and 47 m. in breadth, the extreme reach of the shiploader arm being 28.5 m. from ship's side. At the limit an extreme breadth of 48 m. could be accepted after advice from the DCFP. If possible drawing should be sent prior to acceptance for vessels of more than 100,000 d.w.t.

The recommended draft for large vessels in ballast, or partially loaded is 12 m. on arrival. Smaller ships should have on board a quantity of ballast equal to half their cargo capacity.

Maximum freeboard under shiploader arm is 14 m. With hatch covers opening crosswise (abreast) the maximum freeboard must be understood as the height from sea level to the upper part of hatch covers.

On departure a draft of 16.15 m. is usually admitted.

Essential: All vessels greater than 100,000 d.w.t., which have never visited the port before must have prior approval of the DCFP.

HEALTH: Free Pratique is usually granted after vessel has berthed. Yellow fever vaccination certificates required.

TUGS: None available.

BERTHING:

Mineral Wharf: The ore loading terminal of "Societe Nationale Industrielle & Miniere de Mauritanie" (SNIM) is located at mid distance between Cap Blanc and Nouadhibou, geographical position: Lat. 20° 49′ N., Long. 17° 02′ W. It consists of a platform, 20 m. wide oriented North and South, resting on 8 dolphins, 13 m. in diameter each and 32 m. distant one from the other. The platform supports a conveyor belt and one single shiploader. The maximum travel of the shiploader from one end of the rails (railway) to the other is 165 m.; the virtual loading capacity would be 5,000 t.p.h. while the actual output varies from 2,000 to 4,000 t.p.h. according to ship's size and on condition there is only one quality and grade of ore to load.

To maintain a depth below LLWT (lowest low water astronomical tides) of 16 m. at the berth, ships are laid against 2 big outrigger pontoons leaning on the dolphins and protected on the ship's side by heavy but efficient rubber rollers acting as shock-absorbers.

Ships are generally made fast port side to the quay, coming alongside with the help of the anchors which should be kept at the ready.

Shipmaster's Report: March 1983.

Heavy lifts up to 24 tonnes were discharged alongside the berth with vessel's gear.

MEDICAL: There are hospital and medical facilities at the port.

TANKERS: Oil Wharf: It consists of a light platform placed on top of 3 dolphins of the same diameter as above but 64 m. apart, adjoining the mineral wharf to the Southward. A wooden decking supports the oil pipes which are connected abreast of dolphin No. 10 to the tanker lying port side to the quay, the stern is made fast to a mooring buoy.

DENSITY: Point Central 1026–1027.

FRESH WATER: *Shipmaster's Report:* March 1983. Fresh water available in limited quantities (approx. 100 tonnes) at a cost of U.S.$1.50 per tonne.

FUEL: Not available at the moment. An oil refinery has been built which will eventually supply fuel.

GANGWAY/DECK WATCHMEN: Recommended as stowaways try to board at night.

SURVEYORS: Bureau Veritas, Lloyd's, Salvage Association.

CUSTOMS: Regulations are very strict, and a careful declaration of all bonded stores must be made before berthing. Ships have been fined for quantities in excess or missing even when small.

GENERAL: (a) Radiotelegrams stating the date and ETA at pilot station and addressed to SNIM Nouadhibou should be transmitted 72 hrs. and 24 hours beforehand via Nouadhibou coast radio station (5 TA) working hours 0800 – 1800 or Dakar (6 VA) hours: Continuous.

Shipmaster's Report: 1977. Telegrams to Agents through Dakar Radio 6 VA only.

(b) It is of interest to Pilots when coming on board, to know whether the ship is powered by a steam-turbine or diesel engine whether the propeller is left or righthand and if it is a variable pitch propeller, how she behaves when the engine is running astern.

DEVELOPMENTS: Extensions to the Mineral Port are being studied.

SHIPMASTER'S REPORT: 1975. Vessel 169,000 d.w.t.

Iron Ore Marine Loading Terminal:

Approach to Cap Blanc and Baie du Levrier: Approach was from the Southward. From Dakar the course was laid to cross the 100 fathom line at 20° 04′ N., 17° 41′ W., this being a precipitous shelf, when crossed with D.F. bearings from the Radio Beacon at Port Etienne gave a reasonable fix. Vessel then steamed across the main flow of North/South traffic at quite a broad angle heading for the landfall buoy 6 miles West by South of Cap Blanc. A dense concentration of fishing vessels extending Westwards from Banc Vilmorin offered little hindrance to our landfall. The light of Cap Blanc lighthouse was visually observed in the pre-dawn darkness at 26 miles and radar contact of Cap Blanc was established at 23 miles. The landfall buoy fitted with a radar reflector, gave radar contact at 15 miles.

Pilotage: A Pilot boards in the vicinity of No. 2 Fairway Buoy from a black-hulled, white superstructure, 40 ft. high-speed motor launch with "Pilote" written on the side. VHF contact is made on Channel 16, working frequency Channel 14. Call "Nouadhibou Pilot". The Pilot, a Frenchman, had a good understanding of English and proved to be very competent. The transit inwards and through the Passe du Levrier was at half speed but the last mile towards the berth only an occasional Dead Slow ahead movement was made to maintain steerage way.

Tide/Currents: Berthing for large vessels is on the ebb tide with a Southerly set of about 1 knot. South of the headland the set is to the Eastwards again about 1 knot i.e. directly across the channel. Unberthing is made on the flood tide setting Northerly along the jetty again about 1 knot. Rise and fall is in the region of 1.6 m.

Wind: Ranges from North by West to North by East (May). During darkness it abated to about Force 3 but from early morning through to sunset gusted up to Force 6 causing a short steep sea to run. The Pilot stated that in August and September Easterly winds often occurred hence the placing of 2 mooring buoys about 1 cable off the berth to assist vessels warping clear when leaving.

Tugs: None available.

Quay: Stout cylindrical rubber fenders are chained to the sides of 2 floating pontoons laying to the quay face. An adequate number of bollards are placed along the length of the quay. 3 dolphins, connected by a catwalk, extend the Southern length of the quayside for ship mooring purposes.

Moorings: When approaching and lying off the jetty 2 motorised mooring boats will run ashore 1 synthetic fibre rope (no wire ropes at this stage) from forward and 1 similar rope from the Poop. Vessel is then to warp alongside with these 2 lines aided by helm and small engine movements. Once alongside a spring from the after extremity of the Poop is to be sent away and a forward spring. Vessel secured to the berth with 1 headline to a mooring buoy North of the jetty, 3 forward breast lines, 1 forward spring, 2 stern lines, 2 after breast lines 1 spring from the Poop, and 1 spring from the normal position on the after deck.

Gangway: The accommodation ladder could not be used because of the space between the pontoons lying between ship's side and the quay. A pilot ladder was the means of access to the after pontoon from which access could be obtained to the quay.

Depths alongside: At the first low water soundings were taken around the ship and when reduced to chart datum — obtained from a monthly tide table loaned by the Pilot – a least depth of 16.2 m. was found on the inboard side with depths generally about 18/19 m. elsewhere.

Draft: Maximum permitted for berthing 12 m. Maximum permitted draft for sailing is 16.16 m. (53 ft.) at any state of the tide.

Airdraft: Maximum 14.5 m. In our case several thousand tonnes of hold ballast had to be taken once secure alongside, this delayed loading for 5 hours.

Shiploader: This is a single conveyor belt fed gantry having a range of travel of 165 m. along the quay but the loading arm has no facility to slew horizontally. It can only be luffed in the vertical plane. The maximum outreach was stated to be 23 m. which combined with the airdraft limitation of 14.5 m. made it extremely difficult to plumb the centre of the holds. For the majority of our loading period the ship had a port list (this was exaggerated by the free surface effect of the 4 ballasted holds). To keep the loading arm from fouling the ship's structure and assisting the arm to plumb centre all the port side side-rolling hatch lids were only partially opened.

Shifting: This had to be done on 2 occasions but was successfully achieved by hauling on the 2 spring wires aft and 1 headline to warp a distance of 6 m. forward and heaving on the forward spring and stern lines to warp 26 m. aft. The shifting was necessitated by the fact that the distance centre to centre of our extreme loading hatches was 191 m.

Agency: This was conducted by SNIM, Societe Nationale Industrielle & Miniers, their telegraphic address is "Snimport – Nouadhibou".

Documents: Required are:

4 Crew Lists.
2 Stores Lists.
2 Crew Declaration Manifests.
2 Vaccination Lists.
3 Passenger Lists.
3 Ports of Call of the Last Month Lists.
2 Ballast Manifests.

The latter 3 lists can be made on 1 sheet of paper (in triplicate). No Maritime Health Declaration was asked for. All these documents were passed to the Agent, no Customs, Port Health, Immigration or Police visited the ship. Although some crew members were without Yellow Fever vaccination certificates this posed no problem with the Agent, he declared no vaccinations can be done here. Nor can the Derat Exemption Certificate be renewed.

Port Restrictions: The Agent warned that crew members could not use pounds sterling, U.S. dollars, Dutch guilders or other foreign currency ashore for fear of confiscation by the "authorities". The local currency is the Ouguiya, 100 of which are on par with £1 (approx.).

Port Capacity: The Pilot stated previous largest ships had been:

(i) *"Atland"* OBO Swedish 84,229 g.r.t.

(ii) *"Thor"* Bulk German 79,270 g.r.t.

(iii) *"Lilyprima"* OBO Italian 72,68 g.r.t.

However, our claim to be the largest vessel to call being 169,080 d.w.t. is unsubstantiated. The Agent claims a shipment of 139,000 metric tonnes is the largest cargo exported from the port.

Loading Rate: The installation foreman claimed a rate of 4,000 t.p.h. Our rate, allowing for the frequent short stoppages, was 2,813 t.p.h.

Ore: The grade "Siliceous Iron Ore Fines XBF" was extremely dusty. About 10 grades of ore are available from 3 different mines.

Water Density: From our observations at low water 1024 ozs./cu. ft. and at high water 1025 ozs./cu. ft.

Cargo Figures: All tonnages quoted this port are metric tonnes. Ship's figure was about 1,300 tonnes less than the shore quantity, however, the ship's figure was accepted and the foreman stated the shore installations were usually 1% high of the ship figure. Ship was loaded to the maximum draft of 53 ft. but a great deal of difficulty was experienced reading the draft due to the seaway.

Unberthing: This was carried out on the flood tide. Single up to the 2 spring wires aft, using small astern movements and helm movements which aided by the anchor will cant the head from the quay. When the anchor is aweigh, slip the springs and steam ahead of the jetty then using full ahead power and starboard rudder followed by full astern power the vessel is swung well within the turning area to head seawards.

Depths in Channel: Except for the area of the channel abreast Cap Blanc lighthouse where less than 1 m. beneath the keel the remaining parts of the channel showed 3 m. – 4 m. underkeel clearance.

Conclusion: It would appear impractical to enter ships of a larger physical size than ourselves at this port because of airdraft/outreach limitations, draft restriction and manoeuvrability problems. Although we were fortunate in having a trouble–free berthing and unberthing procedure serious problems could be foreseen if a vessel had a main engine failure or a sudden deterioration of the weather occurred during these manoeuvres.

SHIPMASTER'S REPORT: 1977. The landfall buoy 6 miles West- by-South from Cape Blanco does not exist. Buoy No. 0 approx. position 20° 40′ N., 17° 04.7′ W. has been removed.

SHIPMASTER'S REPORT: June 1978. The following is a brief account of the port which is in addition to the information supplied in the "Guide", which may be read as being correct. The port, formerly Port Etienne, is in Mauritania, I found travellers are afforded every courtesy. There are two flights per week from Paris via Air Africa who are very good. The flights arriving here on Tuesday and Thursday. The plane returning from Dakar Wednesday and Friday. Spare parts can be landed here and taken out to the ship with minimum of Customs formalities though it would prove to be an expensive exercise. It must also be pointed out that it is not always possible for the plane to land here due to high cross winds and resultant sand storms at the runway, in which case the plane then proceeds to Dakar direct.

Custom Authorities are most interested in the amount of foreign currency brought in as there is a strict levy on this, care must be exercised in this respect. They are also most interested in the stores on board the ship and these must be strictly accounted for precisely.

The town itself of which I did not visit is a separate community from the mining town itself. The mining town itself is self-sufficient and both French and Mauritanians live here. There is a hotel, which is practical and clean with reasonable food. There is also a club with tennis courts, a post office, power station and cinema and a hospital where major surgery can be carried out. There is also an oil refinery which is uncompleted. Refined products are imported via a modern berth. Bunkers and fresh water are available here but in limited quantities and I would imagine costly.

There are no tugs. According to the Agent wireless telegraphy may be used alongside the berth although there is a Telex ashore. I found the Agent to be most helpful.

I was assured that seamen joining or leaving here do not require a visa only a passport and discharge book are required, which I personally was never asked to produce.

The iron ore mine is approximately 650 miles from the loading berth, all the ore coming by rail and attacks are frequent by bandits and guerillas. This can cause lengthy delays to the ship as very little ore is stockpiled.

Loading is carried out by one loading arm which pours approximately 4,000 tonnes per hour. Weights loaded can be measured ashore and have proved to be quite accurate, however it is normally the practice to accept the ship's figures.

SHIPMASTER'S REPORT: September 1986.

Vessel: Ore carrier – 117,600 d.w.t.

Telegrams: Telegrams to our Agents (SNIM) were sent through St. Lys Radio in France, and were received without delay at the Agency.

Water: Requirement should be stated in the 72 hour notice of ETA cable.

Navigation: 2 Pilots working this port now.

Still no tugs available.

All buoys in the Approach Channel are unlit.

Buoys No. 1 and 3, (B.A. Chart No. 1699, 1983 edition), are missing.

Cape Blanc Lighthouse unreliable as extinguished at times.

Stowaways: The possibility of stowaways still exists. Local guards have been placed on the quay to stop unauthorised people from getting aboard, but it is recommended to have ship's crew as watchmen as well.

SHIPMASTER'S REPORT: August 1987.

Vessel: 24,750 d.w.t. 170 m. length.

Location of Oil Terminal: 20° 49.8′ N., 17° 01.75′ W.

Documents:

6 copies Crew List.

3 copies Crew Personal Effects List.

2 copies Stores List.

1 copy Health Declaration.

Ship's documents not required. Vaccinations not possible. It is not possible to renew the Derat Certificate.

Pilotage: Not compulsory. Pilot may be contacted on VHF Channel 16.

Anchorage: Location clearly shown on chart.

Approaches: Vessels should only approach the Pilot station and fairway buoy in daylight hours.

The buoys are in the positions shown on the chart but are incorrectly numbered and are not lit at night. The lighthouse at Cape Blanco was not working. However, the African Pilot Volume No. 1 and the chart provided sufficient information for safe approach.

Approaching without an efficient radar is not safe as the visibility is normally very poor and many fishing vessels may be in the area.

The Channel from the Pilot Station to the oil pier is dredged to 15.5 m.

Restrictions: Berthing and unberthing during daylight hours only.

Max. Size: Max. draft 15.0 m.

Tugs: Vessel berthed without tugs as none available.

Berthing: Dolphin type berth with 7 Chicksan arms connected direct to the shore.

Dirty ballast can be discharged ashore.

Fresh Water: Not available.

Fuel: Not available.

Delays: Strong winds may delay tankers berthing.

SHIPMASTER'S REPORT: September 1987.

Documents:

4 copies Crew List.

3 copies Stores List.

3 copies Crew Declaration.

3 copies Passenger List.

2 copies Ammunition List.

2 copies Stowaway List.

3 copies Ports of Call List for the last 30 days.

2 copies Health Declaration.

3 copies Vaccination List.

2 copies Currency Declaration List.

The above documents, especially Crew Personal Effects List, Bonded Stores and Steward's Stores and Provisions List should be correctly declared, otherwise vessel will be fined by the Customs and other authorities.

Pilotage: Pilotage is compulsory for vessels calling at Nouadhibou. Vessel should anchor one mile South East of Buoy No. 2 if she has to wait for berth. Constant communication with the Pilot is necessary in order to determine time for berthing. Agent could not be contacted by VHF.

Approaches: If approaching Nouadhibou during the night a vessel must be very careful as there are scattered fishing vessels in the vicinity. The fishing vessels of various nationalities are found up to 30 miles from the shore and their nets are obstructions to navigation. Navigational aids in this port are very poor, Cape Blanco lighthouse and the (7) channel buoys are not lit. Buoy "A" or the Sea Buoy has moved 1.5 cables N.W. of the charted position, the others are in their charted position. The top mark of Buoy No. 2 is broken and was difficult to identify at a distance greater than 3 miles. All the buoys in the channel are unlit. Master was informed by the Pilot that there would be no movements during the night and pilotage service will be rendered only during day time. It is recommended by the Pilot that vessels arrive at Nouadhibou during daylight.

Restrictions: Depth of water in the buoyed channel is 16.0 m.. This was monitored by our fathometer during the passage. On the Oil Berth the Pilot usually docks the vessel on slack tide, and normally port side to, using the starboard anchor with two shackles in the water. Services of the Pilot are good and satisfactory.

Communications: When the vessel is at anchor and waiting for berth communication with the agent and the terminal is difficult. If you call them on the VHF they never answer, the language barrier is the problem. The service of the Agent was poor, he did not meet the vessel even when it was berthed. At the time of our departure we waited over an hour for our Departure Clearance.

Health: Free Pratique is usually granted when the vessel is on the berth. Cholera and Yellow Fever Vaccination Certificates are required.

Tugs: Not available. Vessels with bow thrusters have no problems.

Tanker Berth: The tanker berth is constructed of light materials and cement, the floor of the platform is wood, the length of the berth is about 165 m. It has 6 loading arms of 8 in. diameter. The fenders on the pier are hard rubber supported with springs. Two mooring boats will assist with the mooring lines of the vessel being berthed. A five man mooring gang will receive the lines. Slops or dirty ballast can be received ashore at the refinery facilities. Only the Loading Master could speak a little English, so language is the main problem with the operations.

Fresh Water: Not available.

Customs: Only 2 Customs Officers boarded the vessel,they scrutinize every paper or document presented to them, especially Bonded Stores List, Steward's Stores List, and Personal Effects Lists. If a mistake is found they will start to talk about fines to the vessel. It is therefore advisable to itemise the Declaration of the Bonded Store, Steward's Stores and Provision, and Crew Personal Effects Lists in order to avoid fine or any other problems. During our stay in port the Customs Officers boarded three times.

Gangway: The vessel has to provide her own gangway as there is no shore or terminal gangway provided. Ship's personnel should keep a constant watch on the gangway during the change of tide as the current is very strong and the range of tide is about 5 ft.

SHIPMASTER'S REPORT: June/August 1989.

Vessel's ETA to be sent through Dakar Radio. Contact with Dakar Radio was extremely difficult.

Land was picked up 18.8 miles away. An almost Easterly approach was made. Navigational aids are poor.

Cap Blanc Lighthouse (5fl. 5s. 23M) is inoperative. Most of the channel buoys were unlit without top marks and rusty.

Contacting Nouadhibou Pilots on VHF is difficult. We were asked to anchor off Buoy No. 2 and we did so in position Lat. 20° 44.7′ N., Long. 17° 00.8′ W. After a day, we were taken to the inner anchorage, with Point Central bearing 347° × 1.7 miles, and awaited berthing on completion of vessel loading alongside Point Central. After spending 2 days at the inner anchorage, we were taken alongside.

Vessels should have *sufficient quantity of fresh water* as a long wait can be expected. The ship prior to us was at the anchorage for 15 days.

Berthing: Berthing is carried out during daylight, during ebb tide and is port side alongside.

There is one African Pilot and one Vietnamese Pilot. The latter, who is the Chief Pilot, boarded our vessel. He was not very sure of himself and gave unnecessary helm and engine orders.

No tugs are available.

A mooring boat takes 2 head lines (nylon) forward and a breast line/spring aft. These are placed on bitts and vessel has to heave alongside. The starboard anchor is also used.

Final moorings: Forward: 4 head lines, 2 breast lines and 2 springs.
Aft: 2 stern lines, 2 breast lines and 2 springs.

On berthing, the Customs Officer boarded the vessel. He did not seal the bonded store and was not particularly interested in looking at any papers. The Agent boarded the vessel the next day, possibly because a curfew was imposed from 2000 hrs. to 0800 hrs. Loading commenced 20 hours after berthing.

The loader is 25 years old and is in poor condition. The loader can take an air draft of 14.5 m. and remains high above the hold. As the cargo is very dusty, it flies all over the place. By the time we left, the decks were concealed with this cargo.

Machinery breakdowns are very frequent and of long duration. It took us almost 3.5 days to load 75,000 tonnes. The ship's figures are always accepted. There is no cargo survey, but at the discharge port a cargo surveyor on behalf of the shipper boarded the vessel.

A sharp watch for stowaways was always maintained.

Fresh water (hard) is available alongside in small quantities (50/60 tonnes).

A pilot ladder is used to get on the wharf. A terminal bus is available every hour to go to the nearby town of Nouadhibou, which is free of charge. Taxis charge 200 Ouguiya. (U.S.$1.00 = 70 Ougiya). Only change money in the bank. Never have any transactions with the terminal people as this is viewed very seriously by the Authorities.

Further observations made during vessel's visit to Point Central (Mineral Berth) in August 1989:

Contact with Nouadhibou Pilot was extremely difficult as the VHF set in the Pilot's office is also shared with the Agent (SNIM). The radio is only switched on when the Pilot is in the office or wants to make contact with a ship.

Visibility is reduced to less than 2 miles most of the time due to the haze caused by the particles of the light ore being carried all over, by breeze, when loading is in progress.

We remained at anchorage for 11 days and alongside the berth for 4 days.

Although the loading rate of the ore is about 3,500 metric tonnes per hour, the machinery breakdowns delayed the loading.

Shore Leave: It is advisable to get the local currency as cash advance from the Agent, it can then be returned if unused. In order to change foreign currencies at the local banks, the Customs' approval must be given.

Shopkeepers and cabs quote high rates to foreigners, so bargaining is necessary.

Knowledge of French is quite useful.

SHIPMASTER'S REPORT: July 1990.

Documents:
2 Crew Lists.
2 Vaccination Lists.
2 Personal Effects Declarations.
2 Currency Declarations.
2 Ship's Stores Lists.
2 Provisions Lists.
2 Bonded Stores Lists.
2 Arms and Ammunition Lists.
2 Narcotics Lists.
2 Cargo Manifests.
2 Passenger Lists.
1 Health Declaration.

Approaches: A large number of fishing vessels were encountered off Cabo Corveiro and Cabo Dubouchage, but they generally kept clear. The coastline is easily identifiable on radar.

Buoyage/Nav. Aids: B.A. Chart No. 1699.

No. 0 Buoy was missing. No. 2 Buoy was out of position. It was seen in approximate position 20° 42.75′ N., 17° 01.93′ W. The topmark was broken and missing. No. 1 Buoy was out of position, approximately 0.2 nautical miles S.E. of charted position. No. 3 Buoy was about 0.1 nautical miles off charted position. No. 4 Buoy was found in charted position. No. 8 Buoy was missing.

None of the lights for the buoys were working.

Cap Blanc Lighthouse light was not working.

Anchorage: About 1.5 nautical miles N.E. of charted position of No. 2 Buoy, around position marked on B.A. Chart No. 1699. Holding ground is good.

Winds: At anchorage and alongside berth, mainly Northerly winds Force 4/5 were experienced, tending to increase during late evening.

Pilotage: Compulsory. Pilot boards and disembarks between No. 1 and No. 2 Buoys. Pilot boat has a black hull and white superstructure, and has "PILOTE" written on the hull. Only 2 pilots are employed in the port.

Health: Free Pratique is granted on berthing. Quarantine officials did not board the vessel.

Customs: Bond locker was not sealed. Customs officer carried out a check of the bond locker and provisions stores.

Radio: All messages to agents had to be sent via St.Lys Radio (FFL), as Nouadhibou Radio could not be contacted at all. Agents advised that Dakar Radio was not reliable, and vessel to use only St.Lys Radio.

VHF: Pilots available on VHF only when working on ships, in daylight hours. Port Control answers only during early hours of the morning (0700 hrs. – 0900 hrs. approx.). Message can be left with pilots, requesting agents to call back on VHF.

Tugs: No tugs available.

Berthing: Vessels usually berth on ebb tide and sail on flood tide. Although the pilots do carry out these operations at other times, to avoid loader being idle. Usually pilotage is not done after nightfall. In case a vessel has to be berthed at night, the loaded vessel is removed from the berth, and anchored just off the berth, in inner anchorage.

Generally vessels are berthed port side alongside.

Starboard anchor is dropped, about one shackle in water, to assist in hauling off.

Mooring: Two mooring boats in attendance for berthing. Two head lines are sent first, followed by 2 back springs from aft. Total lines used were 4 head lines, 2 breast lines and 2 springs from forward; 2 stern lines, 2 breast lines and 2 springs from aft.

Restrictions: Maximum draft allowed for berthing is 12.0 m. Maximum sailing draft allowed is 16.15 m. Maximum air draft permissible for loader to top of hatch coaming is 14.0 m., although we found about 1.0 m. clearance at an air draft of 14.1 m.

Stevedores: Stevedores work around the clock.

Density: 1025 – 1026.

Fresh Water: Usually no fresh water available. We received a small quantity by fire tender. Fire tender capacity was 6 tonnes, and the water was very expensive.

Fuel: Usually none available. Agents advised that 50 tonnes – 60 tonnes of gas oil can be supplied by trucks in an emergency.

Watchmen: Compulsory. No stowaway problems due to presence of watchmen, according to agents.

Telephone/Fax: Telephone lines were not clear. Fax available, but messages were received garbled by Hong Kong office.

Surveyors: No surveyors available for cargo quantity surveys. Ship's figures accepted for Bill of Lading.

AUTHORITY: Societe Nationale Industrielle et Miniere (SNIM), B.P. 42, Nouadhibou, Mauritania. *Tel:* 100, 114. *Telex:* 459 Snim Ndb, Snim 426 MTN. *FAX:* 45396/49027/49013. *Contact:* Mohamed Salem Ould Cheikh, Chief of Port Department.

NOUADHIBOU HARBOUR: 20.54 N. 17.03 W.

LOCATION: Position of Trading Port 20° 53′ 48″ N., 17° 03′ 10″ W.

DOCUMENTS:
3 Crew Lists.
2 Stores Lists.
2 List of Personal Effects.
2 Lists of Ports of Call.
Cargo Manifest, even if nil.
Manifest of Passengers Disembarking or in Transit, even if nil.
1 List of Foreign Currency held by ship and crew.

PILOTAGE: Not compulsory but recommended, effected by SNIM/Cominor. Pilotage not available at night.

RESTRICTIONS: Depth of buoyed Channel 24 ft. Anchorage strictly prohibited in the Channel.

RADIO: Nouadhibou Radio – Call sign 5TA. Hours 0800 – 1800 daily.

It is recommended that vessels advise their Agent of ETA 72 hours prior to arrival.

VHF: Request Pilot through Port Captain on VHF Channel 16.

TUGS: One tug, 150 h.p.

BERTHING: Pier of 125 m. length connected to shore by a 150 m. long bridge.

Outside general berth for ships with a 24 ft. draft and a 160 m. max. length. According to certain vessel's accommodations, the extreme hatches cannot be discharged through quayside.

Inside berth for ships with a 15 ft. max. draft and a 80 m. max. length. The maximum payload authorised on the bridge connecting the pier to the warehouses and the storage areas being limited to 10 tons, all heavy lifts over 10 tons are to be compulsorily discharged on lighters.

Lighterage Piers: Southern Quay = length 80 m; depth 10 ft.
Western Quay = 180 m.; depth 10 ft.

The Southern Quay is connected to SNIM/Cominor railroad network, allowing the loading of heavy lifts on railcars.

2 covered sheds: total 3,500 sq.m.

1 area with macadamised roads offering 30,000 sq.m. of storage connected to SNIM/Cominor railroad system.

Lighterage: Compulsory for any ship whose characteristics do not allow a safe berth. Compulsory for any loading or unloading of heavy lift over 10 tons.

Not compulsory in case berths are occupied and if manpower and equipment are still available.

CARGO HANDLING EQUIPMENT: 1 lighter × 150 tons, 2 flat top lighters × 200 tons.

14 cranes × 4 tonnes.
2 cranes × 15 tonnes.
4 stacker trucks × 3 tonnes.
1 stacker truck × 8 tonnes.
6 tractors.
16 trailers.
1 rail mounted crane × 70 tonnes (SNIM Property).
1 mobile crane × 50 tonnes, available on request for heavy lifts.
2 cranes on rails for containers.

STEVEDORES:
Working Hours. Normal hours: from 0800 to 1200 and 1400 to 1800 from Saturday to Wednesday.
Overtime: Saturday to Wednesday: 1200 – 1400 hrs. 1800 – 2000 hrs. Thursday: 0800 – 2000 hrs. Fridays and holidays: 0800 – 2000 hrs.

Nightwork possible after 2000 hrs. in order to finish.

During the time of Ramadan work finishes at 1800 hrs.

There is no work on the following holidays: New Year's Day (Jan. 1); Tabaski (El Aid) (variable date); Day of Reunification, (Feb. 26); El Mouloud (variable date); Labour Day (May 1); Africa Liberation Day (May 25); Korite (El Fatar) (variable date); Independence Day (Nov. 28); Christmas (Dec. 25); 1st Moharam (variable date).

The holidays corresponding to the Islamic Religious holidays are calculated from Arabic calendar.

FRESH WATER: Available in small quantities.
FUEL: Available in small quantities.
SURVEYORS: Bureau Veritas, Lloyd's and Salvage Association.
CARGO GEAR: Ship's gear used.
GENERAL: *Winds:* Mainly N./N.E. in the morning, N./N.W. in the evening. Wind force: variable from August to January, rather strong from February to July. Tidal current running North during Flood, and South during Ebb (1.5 to 2.5 knots).
Swell: 0.80 m. max. Strong surge alongside all berths.
Rise and Fall: HW 2.35 m. LW 0.35 m. difference = 2 m.
AUTHORITY: Port Autonome de Nouadhibou, B.P. 236, Nouadhibou. *Tel:* 21-34, 22-35, 22-76. *Telex:* 441 Mtn.

NOUAKCHOTT: 18.02 N. 16.02 W. (See Plan)

NOTE: All information below, except the Shipmaster's Reports dated October 1987 and March 1988, is for the old port.
LOCATION: Nouakchott Wharf (old port) is situated in position Lat. 18° 02′ 08″ N., Long. 16° 01′ 43″ W., being about 7 km. S.S.W. of Nouakchott.

Vessels anchor off the port and movement of cargo is undertaken by barges and lighters.
WIND: The direction of the wind varies from N.N.W. to N.E. The predominant winds affecting navigation are from the N.N.W.

The rapid onset of bad weather should be noted. When conditions are bad vessels should weigh anchor and proceed seaward as the coast offers no natural shelter.
CURRENTS: There is an almost permanent North-South current running at about 0.5 knots; it reverses South-North on a few days during the year.
SWELL: 2 kinds of swell have been observed: Local swell due to the coastal winds, varying from North to N.W. in dry weather, and turning between N.W. and S.W. during the wet season.
ANCHORING ROADS CONDITIONS: The periods during which climatic conditions are liable to upset work are as follows: Strong swell, January/March; rain, July/August/September.

This virtually allows the port to be used during 200 days in the year.
WORKING CONDITIONS: Vessels must locate themselves as closely as possible, where they can anchor without risk, to the wharf, within the limits of their drafts (generally between 0.5 and 0.25 miles), in line. At the lighterage quay there is a depth of water of 7 m. – 8.5 m. It is preferable for a ring of lines to be placed in advance around the sides of the vessel to which barges may tie up.

Experience shows that the tonnage unloaded currently by the wharf is 400 to 500 t.p.d. where goods in sacks are concerned. It is possible to work 2 vessels at once, but each will only work half of this tonnage.

Work is currently carried out on board by private companies, and on land, in the launches and lighters by the Wharf Organisation personnel.

As far as wharf personnel are concerned, during working days, the normal working hours are from 0800 to 1600 hrs.

Overtime day hours are from 1600 to 1900 hrs.

Night time working is considered to apply between the hours of 1900 and 0600 hrs. (currently impossible).

It should be noted that there is an overtime hour at the beginning and end of work, which is the time required to launch or bring barges on to the landing-stage.
RECOMMENDATIONS TO MASTERS OF VESSELS: Vessels must be at all times capable of gaining the open sea rapidly, since bad weather comes up very quickly, and the coast affords no natural protection.
WHARF: The working platform is 86 m.×21 m. and lies in a N.W.-S.E. direction; it is connected to the shore by a gangway 246.5 m. length and 7 m. wide.

The wharf is designed to take a load of 2 lorries of 25 tons (2 axles of 10 tons and 1 axle of 5 tons) or an overload of 1 ton/sq.m.

The Wharf Manager's office together with Police, Customs and radio office are located on the shore.
FLOATING EQUIPMENT: 1 launch of 50 h.p., 2 launches of 100 h.p., 10 steel barges, internal dimensions 10 m.×3 m.×1.25 m. with capacity for 20 tons cargo. 1 steel barge, internal dimensions 13 m.×4 m.×1.35 m. with capacity for 30 tons cargo.

WHARF EQUIPMENT: 3 cranes with capacities of 20 tons, 8 tons and 5 tons respectively.
LAND EQUIPMENT: Goods are transported from the wharf to the storage area by 18 trailers each with a capacity of 8 tons. The port is also equipped with 2 tractors of 80 h.p. and 5 fork-lift trucks with capacity of 3.5 tons.
TANKERS: Dakar oil companies are presently building a hydrocarbon oil depot about 400 m. North of the wharf.

The depot will be fed from tankers by means of 2 sea-lines of 900 m. length.

SHIPMASTER'S REPORT: August 1978 (Old Port).
The following is to be read in conjunction with the information above.
Currents: Reversal of current is unpredictable and may last for several days on each occasion.
Anchoring Roads Conditions: While in the main the holding ground is good, there appears to be patches of hard sand where the anchor cannot take hold.
Working Conditions: It is practical to work 4 vessels at once plus one of up to 5,000 d.w.t. at the new extension to the pier.

Present (August 1978) hours for ships at anchor are 0800 to 1600 hrs. (Ramadan) but Sunday overtime can be worked if vessel gives authority. It seems that this is very expensive as so many are involved.

At the pier extension work has been observed from 0800 to 2400 hrs. and a mobile crane is available there to assist ship's gear.
Wharf Equipment: There are 7 cranes with various capacities, two being used for lifting out barges for repairs and to house the tug launches at night. The mobile crane is backed up by some 8 small fixed jib carriers.
Tankers: The sea berth North of the pier is in operation.
Documentation: See "Nouadhibou".
Customs Control: The officer will not board until the Agent has entered the vessel with the necessary documents, hence there will always be a time interval between arrival and being boarded for inspection. So financial loss must be expected accordingly.
General Observations: Due to the lack of any VHF or similar communication system, it is difficult to assess the true performance of this port. It is most uncomfortable for any vessel of more than 7,500 d.w.t. unless the barges are prepared to come out to 7 or more cables from the pier. In the recommended anchorage the effect of swell and surf is such that the vessel frequently swings through a wide arc and the chances of breaking out the anchor are very real. The erratic current direction may also swing the ship towards the pier hence the above opinion. Other vessels may also anchor so as to swing across one's own cable and anchor.

SHIPMASTER'S REPORT: October 1979 (Old Port).
Anchorage: Vessel anchored in position Lat. 18° 02.2′ N., Long. 16° 02.7′ W. (with the lighthouse tower on the jetty bearing 101° distance 3.3 cables).
General: City of Nouakchott (the capital) is in position Lat. 18° 05′ N., Long. 15° 58′ W. The port jetty is in position Lat. 18° 02.1′ N., Long. 16° 01.55′ W. being about 7 km. S.S.W. of the city. The official languages are Arabic and French. There are asphalt roads, one which leads to Dakar. There is an airport (close South of the city) with connections to Dakar and Casablanca. Scheduled flights being published in the daily newspapers.
Time: GMT.
Authorities: No authorities come on board on arrival, however, after a few days an agent's clerk comes on board and takes all port forms and documents ashore. No store rooms are sealed but stores list is to be filled in properly.
Documents: Two copies of each of the following are required:

(a) Crew List.
(b) Health Declaration.
(c) Vaccination List.
(d) List of Ports of Call.
(e) List of Arms and Ammunition.
(f) Ship's Register and Tonnage Certificate.
(g) Ship's Stores List.
(h) Crew's Personal Effects Declaration.
(i) Notice of Readiness/Manifest & Stowage Plans.

With regard to Notice of Readiness it is advisable to send cable via Dakar Radio. It is also advisable to ask the clerk for his identification card and ask him to sign a receipt for the above.
Shore Leave: Passports are needed for going ashore, only method of going ashore is by ship's own lifeboat or during working hours by the motor launches used for transporting barges.
Consuls: Germany F.R., China and U.K.
Medical: All services can be arranged by Agent.
Stores: Limited amounts of vegetables, cereals, coffee (instant) and milk (condensed) can be arranged by agent (all items are imported). There is no ship chandler.
Repairs: No facilities.
Fresh Water: There is no possibility of supplying fresh water to vessels, therefore rationing of water is recommended on arrival due to the fact that turn of 30 – 40 days is normal for general cargo, bulk cargoes and bagged cargoes. Priority being given to vessels with cement cargo as construction of a new port is taking place 1.5 miles to the South. At most times there are 15 – 20 vessels at the anchorage.
Repatriation: Can be arranged by Agent via Dakar.
Weather: See "African Pilot", Volume 1 and supplements. During the time the vessel was at the port (mid-September to mid-October) there was hardly any rain. Temperatures ranged from 20°C to 42°C depending on the direction of the wind. The barometric pressure was 1008 mb. (min.) to 1012 mb. (max.). Winds normally from the North to N.W., being influenced by anticyclones in the Dakar and Casablanca areas. Occasionally winds were from the West, S.W., South, S.E. and East. The wind was from Force 3-5/6 for short periods which quickly caused deep swell and surf.

Easterly winds caused sand storms and visibility becomes poor.

The swell is reported to reach high levels in the first and last quarter of the year and vessels are advised to leave the anchorage when the rapid increase in wind appears. These winds come from two directions, namely, Northerly and Northwesterly.

Approaching/Pilotage: No Pilot available. Charts B.A. 3247 and B.A. 2078 Plan (1976/correction 1978). Vessels should approach the coast heading 090° from the 20 fathom line 9 miles to the West of the charted lighthouse (Chart B.A. 3247). The jetty is a good radar target at 37 – 40 miles and the radio beacon at Nouakchott "KC" on 297 kHz in position Lat. 18° 04.3′ N., Long. 15° 58′ W., is an excellent aid. The depths on this track are between 20 fathoms and a minimum of 30 ft., close to the shore line (0.25 miles offshore). There are no dangers or difficulties encountered approaching.

Navigational Aids: B.A. Chart 2078 Plan (1976/correction 1978) most charted buoys are not in correct position. The unlit wreck buoy in position Lat. 18° 01′ 32.2″ N., Long. 16° 02′ 48.8″ W., marks a wreck to the S.E., the wreck is not visible and the position is doubtful. For further information see the plan of the port made by the ship's officers.

Anchoring/Berthing: Anchorage is recommended in the area to the North of the green wreck buoy and between 0.25 and 0.5 nautical miles from the shore. A close anchorage is required during discharge to avoid long distances for the lighters and tugs. The jetty berth (N.W. end) could be used by vessels during calm weather and low swell. The berth is 52 m. in length and the jetty which runs in a N.W./S.E. direction is 86 m. long with a width of 21.17 m. If berthed alongside, good fenders must be available at all times and crew must stand by the mooring ropes.

Remarks: Receivers sometimes require a vessel to berth at the jetty but care should be taken, as if vessel causes any damage during the difficult approach or by swell, the authorities may sue the Master/Owners with high penalties and detain the vessel until payment is made. There has been an instance where a Master has been placed under "hotel arrest" and all papers and documents for the vessel kept ashore, resulting in a delay to the vessel of 40 days.

Stevedoring/Port Equipment: The stevedore company is So Ge Co Nouakchott, Societe Generale de Consignation.

The jetty wharf is connected to the shore by a 246.5 m. long bridge with two lanes each of 7 m. width. There is an old pipe-line in the centre of the bridge between the two lanes. The bridge runs in a 104° direction to the shore. At the Southern side of the jetty-platform there are 7 cranes (one damaged) with lifting capacities of 12.5 to 25 tonnes.

There are 5 motor launches (50 – 100 h.p.) for towing lighters to and from the vessels. There are also 10 steel barges (lighters) with a capacity from 20 – 70 tonnes. At night the launches are lifted onto the jetty and the lighters are either moored alongside the jetty or at buoys.

In addition to the 7 cranes there are available on the jetty and wharf area 10 mobile cranes and 5 forklift trucks (3.5 tonnes) and 2 tractors for transporting goods on trailers (total 18), capacity of the trailers being from 8 – 20 tonnes.

Cargo is discharged into the barges and transported to the shore. Net slings mostly being used for bagged cargo and general cargo. There are stacking areas of 70,000 sq.m. and 45,000 sq.m. near the wharf. So Ge Co have 2 cold rooms (6 m. × 3 m.). There are 4 sheds, storage area 2,000 – 4,000 sq.m. capacity.

Signals: When loaded barges alongside the vessel are to be collected by the launches, vessel is to sound 2 long blasts on the ship's whistle.

Average discharge rate: Bulk cargo 7.5 tonnes per gang hour and bagged cargoes 15 tonnes per gang hour, however, this is dependent upon barges and launches. The average tonnage discharged per day/gang is for general cargo 15 – 35 tonnes and bagged cargoes 35 –86 tonnes.

Working hours: Monday to Friday 0800 – 1600 hrs. Saturday 0800 – 1200 hrs. Sundays and local holidays are on overtime.

Note: It is compulsory that 1 hour prior to and 1 hour after working hours is counted as overtime for shore gear preparation.

Agency: Care should be taken when appointing Agents as agency fees, handling fees and port expenses can vary enormously.

SHIPMASTER'S REPORT: October 1987 (New Port).

Port: Port de L'Amitie.

Location: 3 miles South of Nouakchott Wharf.

Pilotage: Pilot (Chinese) boards between the first buoy and the wharf.

Anchorage: Vessel anchored 1.5 miles West of berth in a depth of 12.5 m.

Restrictions: No berthing on Friday.

Max. Size: Depth alongside 10.0 m. Vessel entered and sailed with a draft of 8.6 m. To the West of the port entrance there is a depth of 11.0 m.

Radio: ETA messages sent via St. Lys. It is not possible to telephone Nouakchott direct or through Nouadhibou Radio.

VHF: The Port Captain (Chinese) located at Nouakchott Wharf, 3 miles to the North, is on Channel 16 from 0800 hrs. – 1400 hrs. (except Friday). They will advise pilot and tugs of vessel's ETA.

The Agent (Compagnie Mauritanienne de Navigation) is on Channel 16 from 0730 hrs. – 1530 hrs. (except Friday).

Pilot and tugs on VHF when working.

Tugs: 2 tugs available.

Berthing: The approach jetty runs East–West and is 700 m. in length. The wharf at the western end is 585 m. long and 100 m. wide and lies in a NE'ly–SW'ly direction (060° – 240° T). The depth alongside is 10.0 m. The jetty head (length 100 m.) is protected from swell from the West.

Two buoys mark the land-side of the port limits. The wharf has an open storage shed of 50 m. length.

Stevedores: Fairly good at handling containers.

As there is a heavy swell it is preferable to use steel wire slings. Ship's derricks used as no shore facilities. Containers loaded direct on to lorries at Nouakchott Wharf (6 km.), by forklift trucks and transported to the berth.

Stevedores work from 0800 hrs. to 1700 hrs. with the possibility of overtime. No work on Friday.

Documents: Usual Declarations required plus a Foreign Currency Declaration. The Agent takes all documents ashore.

Customs: Customs make an inspection but do not seal any of the stores.

Port Captain: The Chinese Port Captain checks all Safety Certificates.

General: The port presents difficulties when there are strong trade winds as the vessel is poorly protected.

Because of the swell, the sea can come over the open storage area. Mooring should be frequently checked.

SHIPMASTER'S REPORT: March 1988 (New Port).

Please Note: The following Report translated from French.

Approaches: Coming from the North, landfall at 18° 02.5′ N., 16° 28′ W., then steer 100° to come to the South of the new port.

At 20 miles from the coast weak echoes from the town and a few buildings close to the pylon in position 18° 08.5′ N., 16° 00.5′ W. observed on the radar.

At 15 miles echoes from the new port and the old wharf appear. The coast only appears at 9 miles on the radar as the coast is dunes and swamps.

In the event of electricity power failure in the town, only the light at the end of the new port operates. This light was observed at 5 miles. This small lighthouse is a white pylon of concrete, about 10 m. high, and with a white light on top (2 secs. on, 3 secs. off).

The new port is 2.6 miles to the South of the old wharf (see "Plan" – "radar picture at 6 miles"). On land to the N.E. of the access to the port is a modern lighthouse with white and black stripes (see "Plan"). The light is Iso. white (5 secs. on, 5 secs. off). Height 37.1 m., range 16 miles (information obtained from authorities).

It is possible to distinguish an approach alignment (085°) formed by two iron pylons on top of which is a white and red diamond formation, and carrying lights (see "Plan" — "radar picture at 1.5 miles"). On this alignment and at 1.8 miles from the jetty, was a landing buoy (disappeared). The alignment brings the vessel close to the jetty.

Pilotage/Tugs: Pilot and Port Captaincy contacted on Channel 16. If entering, the Pilot requests vessels to anchor between 0.5 – 1 miles from the jetty(s). It is preferable to remain to the S.W. of the jetty at 0.8 miles. Depth of water from 9.0 m. – 10.0 m., and this for short duration of anchoring. The Pilot comes onboard when anchoring, and comes with a tug. The tug ties up near to the pilot ladder.

Do not lower the anchor until the pilot is on board (fairly long operation).

The port has 2 tugs of 980 h.p. (theoretical power), but they barely make 500 h.p. A single tug operates, and has a mixed Chinese-Mauritanian crew. There is one Chinese pilot and 2 Mauritanian trainee pilots.

NOTE: In the event of anchoring for a long time, remain in depths of 12 m. – 15 m., towards the old landfall buoy, at the North axis of the channel. No entry or sailing at night.

Port: A long arm of 750 m. is aligned East-West, followed by a 580 m. mole with 3 berths. This mole is equipped with red coloured cranes, of 10 tons lifting power. The mole runs at 240°. An 80 m. long breakwater orientated at 190° and formed by concrete blocks extends from this mole. Near to the end of this breakwater is the little white lighthouse (2 secs., 3 secs).

On land near to the access to the arm are 4 large light green sheds and a container park.

Two yellow-black and yellow-black-yellow buoys indicate the sand bank in the port. The marks are respectively N. and W. The indicator of the North buoy is partly broken away. Buoys are not lit.

Fairly strong undertow is experienced in the port, and vessel rolls almost continuously whilst at the quay. There are good fenders along the quay.

SHIPMASTER'S REPORT: August 1989 (New Port).

The new port, named "Port of Friendship", has been in operation since November 1987. The centre of the jetty is located in position Lat. 17° 59.35′ N., Long. 16° 02.1′ W., 15 km. S.S.W. from the capital city Nouakchott. The jetty is 585 m. in length and is 45 m. wide and lies in a 240°/060° direction and is connected to the shore by a 750 m. × 13 m. long bridge which lies in a 270°/090° direction.

There are 3 berths on the jetty: No. 1: 149 m. Min. depth 9.8 m.
No. 2: 168 m. Min. depth 10.0 m.
No. 3: 190 m. Min. depth 10.3 m.

The port is designed to import and export 500,000 tons per year.

The jetty is equipped with 2 gantry cranes of 10 tons' capacity each, but handling of cargo is normally by ship's gear.

There is a breakwater from the N.W. corner of the jetty, extending about 200 m. in direction 200° (See "Plan"). A light beacon has been established at its S.W. extremity.

Two yellow buoys mark the East and South extremity.

One mooring buoy lies between the Naval Berth and extreme East buoy.

There is a pair of leading lights with diamond top marks in line 080°.

Several buildings, warehouses and 42,682 sq.m. of open storage area are located about 1 km. East of the jetty wharf.

The Port Office lies close South of the port gate.

The Pilot Station is on the N.E. corner of the jetty, near Berth No. 1. Two tugboats of 900 b.h.p. each berth alongside Berth No. 1.

A naval berth is under construction on the South side of the middle of the jetty bridge.

The main lighthouse, a white round tower with black bands, about 35 m. high, lies 200 m. N.N.E. of the extreme East of the bridge (approximate position Lat. 17° 59.5′ N., Long. 16° 01.5′ W.).

Anchoring is recommended in the area 1 mile West of the breakwater in approximate position Lat. 17° 59.3′ N., Long. 16° 03.2′ W. with depth 12 m., a sandy bottom and good holding ground. The current runs at less than 0.5 knots, ship's heading is nearly always against the wind. There are no dangers or difficulties encountered when approaching the anchorage. Occasionally, there are one or two vessels waiting to berth.

Normally, one tug assists vessel to berth or unberth, but in daytime only and in good weather. During bad weather with wind from S.E. – S.W. at Force 6 or more, the vessel may have to stay on the berth, even if cargo work has been completed.

The predominant swell is Northwesterly. It always affects the berths and causes vessels to range continuously. It is therefore important that double springs are used fore and aft and that spare lines are ready when bad weather is forecast. The records show that in the Winter of 1987, a vessel broke 21 ropes during strong Northwesterly winds, after which she left the berth to anchorage for safety.

Easterly winds cause sand storms and visibility becomes poor, sometimes as low as 20 m.

Handling rate: Average discharge rate for bagged sugar, wheat or cement is 20 – 25 tons per gang/hour, tea in cases 10 – 15 tons per gang hour and other general cargo averages 10 – 20 tons per gang/hour, however this is dependent upon the trucks and gangs.

Cargo is discharged from the ship and reloaded into the trucks at the same time, thence directly to the city. These trucks have a capacity of between 10 tons – 30 tons.

Net slings are mainly used for bagged cargo and general cargo.

Work is in 2 shifts per day: Day shift from 0800 hrs. – 1800 hrs., with 1500 hrs. – 1800 hrs. on overtime. Night shifting is 1800 hrs – 0530 hrs., all on overtime which is arranged and approved by the ship.

Friday is a holiday, but work is possible at overtime rates if vessel gives approval. Saturday and Sunday are normal working days.

Documents: See "Nouadhibou".

Customs control: For Chinese vessels the Port Officers do not board on arrival. They may board later to see the vessel but do not seal the bond. The Agent boards the ship to bring back the necessary documents after berthing. For other foreign vessels they will board ship after berthing and seal the bonded store as usual. They may take away some ship's certificates for checking and return them to the ship before sailing.

There is no stealing among the stevedores, even when discharging general cargo and there are no shore watchman here.

VHF: Port Control on Channel 16, working 24 hours a day. Pilot Station on Channel 6, working when berthing and unberthing only.

Berthing sometimes delayed when not ready in time.

There are 2 Chinese Pilots and 3 local apprentices.

Supplies: No ship chandler available. Limited provisions can be supplied through Agent. Fresh water can be supplied by water tank through Agent. Each tank has 13 tons capacity, average rate 10 t.p.h. (daytime only). Good quality but expensive, U.S.$12.00 per ton.

Repatriation: Can be arranged by Agent. Regular airlines to Dakar and Casablanca.

Medical: Can be arranged by Agent.

Shore Leave: Permitted. Passport or Seaman's Book required.

Fishing: Plentiful fish in the port and anchorage. Fishing is allowed on board only.

AUTHORITY: Monsieur le Directeur du Port de Nouakchott, Ministere de l'Equipement, Nouakchott, Mauritania.

Societe Nationale Industrielle et Miniere, P.O.Box 1260, Nouakchott. *Tel:* 522-74, 523-29. *Telex:* 551 Snim Nkc.

AGENT: Societe Mauritanienne de Peche et de Navigation (S.M.P.N.), 13 Avenue Bourguiba, B.P. 6254, Nouakchott, Mauritania. Tel: 53638, 53703. Telex: 847 MTN SMPN. Fax: 53787.

NOTES

Please also advise Shipping Guides Ltd.

Mauritius

PORT LOUIS: 20.09 S. 57.30 E. (See Plan)

PORT LIMITS: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the Outside Anchorage lie within the limits of the port defined by an imaginary line joining Pointe Aux Sables and Pointe Aux Piments. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers or personnel.

PILOTAGE: Compulsory for vessels over 100 n.r.t. Vessels are piloted inwards and outwards at any time of the day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys though they may, in some circumstances have to be boarded at a greater distance offshore.

Once the Pilot boards the maximum distance to any berth is 1.5 miles. Both anchors should be ready for use and ships' lines prepared for making fast tugs before entering the channels.

Anchors are often used to assist in turning vessels.

ANCHORAGES: Open roadstead with anchorages for vessels of any draft. Admiralty Chart No. 713 refers.

RESTRICTIONS: Vessels carrying highly inflammable products are only berthed during daylight hours.

MAX. SIZE: Harbour Entrance depths from 12.8 m. to 36.3 m. Channel dredged to 12.1 m. Also see "Berthing".

HEALTH: *Shipmaster's Report:* June 1989.

The following message was received from Mauritius with regard to Free Pratique by Radio.

1. We are pleased to announce that from 5th June 1989 the Ministry of Health has kindly accepted to grant Free Pratique by Radio. This is as a result of repeated requests from Association of SHipping Agents over the past years.
2. Applications should be submitted to Port Health Inspector 48 hours prior to arrival of vessel by Agent.

Following Data Required:

I Name of ship.
II Expected time and date of arrival.
III First port of loading, i.e. port of departure.
IV Last port of call.
V Has any case of contagious disease, or of sickness suspected to be of a contagious nature, occurred on board during the last 15 days?
Indicate the number of cases of contagious disease(s) occurring during the last 15 days.
VI Has any case of death from sickness due to contagious disease(s) or otherwise occurred on board during the voyage?
Indicate the number of deaths from sickness due to contagious disease(s) or otherwise occurring on board during the voyage.
VII Does the ship have a ship's surgeon on board?
VIII Number of crew (including Master) and number of passengers.
IX Indicate the number of crew members or passengers disembarking.
X Does the ship have in its possession a Derat Certificate or a Derat Exemption Certificate, also mention the date of expiry.

RADIO: The Port Master requires to be notified of the date of the vessel's arrival, the length and draft and purpose of call, by radio as soon as it is possible for Master to communicate with Harbour either:

1. By CW transmission through the Government Radio Station (3 BA) at Vacoas on 500 kHz.
2. By R/T transmission through Port Louis Harbour Radio Station (3 BB 3) on 2182 kHz.

VHF: Port Louis Harbour Radio Station is equipped with VHF and maintains 24 hour watch on Channel 16.

TUGS: 2×830 h.p. diesel-engine tugs, *Betty* and *Winnie*. These tugs are available for deep-sea towage and salvage and are fitted with fire-fighting equipment, R/T and VHF. 3 smaller tugs of 320 h.p. are also available for harbour work and fitted with VHF.

A new Voith Schneider tug of 2,670 h.p., *Sir Seewoosagur*, is available for deepsea towage and salvage and is fitted with fire fighting equipment, SSB and VHF. It is available for harbour work.

BERTHING:

Quay No.1: Length 122 m., maximum draft 11 m. at any state of tide, vessels up to 183 m. overall length can be accommodated. This berth is designed mainly for discharging petroleum products (Esso, Shell and Caltex), ammonia, bulk fertiliser and coal. General cargo vessels and passenger ships are occasionally berthed at the Quay.

This is a common user berth on the port side of the Entrance Channel. This berth handles the largest vessels in port but due to the low power of the tugs the maximum displacement is limited to 33,000 tons.

Ships approaching the berth from seaward in daytime are swung to port with the aid of tugs and berth starboard side to the quay. At night the berthing is always port side-to, however, night berthing is rare. The ship will be turned in daytime when leaving the port.

As winds are often fresh, and passing traffic can cause surging, moorings should be carefully tended.

The quay is of concrete construction. It is well fendered, but there is little or no resilience in the fendering rubber rollers so heavy landing must be avoided.

Quay Nos. 2-3: Marginal quays having a total length of 366 m.; maximum draft 10.2 m.; vessels up to 195 m. overall length can be accommodated. Berth No. 2 will continue to be used for general cargo operations whereas Berth No. 3 will be restricted as far as possible to container operations.

Quay No. 4: (Container Terminal): Length 183 m., maximum draft 10.2 m. This berth is for container operations. A Container Park of 6 hectares is available for storage of containers. Vessels up to 220 m. overall length can be accommodated.

Equipment:
2 × 26 tons Hyster.
3 × 35 tons Lancer Boss.
3 × 32 tons Hyster.
1 × 18 tons Hyster.
2 × 10 tons Hyster. } Empty
2 × 75 tons Hyster. } Containers.
1 Ferranti 2K90 – 40 Tons.

Vessels must use their own gear to discharge/load containers. The movement from the hook to the Container Park and vice versa is carried out by tractor/trailer system.

Quay D: This is a common user berth near the inner end of the harbour on the port hand when entering. Length 149 m., maximum draft 9.3 m. can take a vessel up to 183 m. overall length. This berth is used for discharging of petroleum products and loading of bulk molasses, edible oil and bulk wheat.

Passenger vessels are also berthed alongside the quay.

Vessels follow the Entrance Channel leading to a position off the berth where they are swung with the aid of tugs to berth port or starboard side to quay depending on wind conditions.

Wire moorings will be accepted, but for the ease of handling, fibre/synthetic tails are preferred.

Cautionary Advice:

(a) The quay is of concrete construction protected with modern rubber fendering. The fendering is not resilient and heavy landings must be avoided.
(b) The berth is little affected by passing traffic but fresh offshore winds may be experienced, especially during the afternoon.
(c) Although 2 policemen are usually stationed on the quay when tankers are discharging, there is no real control over access. Ships should appoint their own gangway guard to prevent unauthorised boarding.

Quay C: Length 121 m., maximum draft 5 m. Berth can take a vessel of up to 92 m. length berthed port side to. This berth is used mainly for the inter-island trade and discharge of cattle.

Sugar Terminal: A Bulk Sugar Terminal constructed on the South side of the harbour came into operation in 1980. Sugar is now loaded in bulk at a maximum rate of 1,400 t.p.h. Vessels up to 198 m. overall length can be accommodated at the terminal. Maximum draft for vessels loading sugar is 11 m. Two sheds capable of storing 175,000 tons of sugar each have been constructed. The Bulk Sugar Terminal is operated by the Mauritius Sugar Corporation.

Facilities are also available on this quay for fuel oil discharge, which is connected by pipe-line to storage tanks for the power station.

Ships approaching the berth from seaward are swung to starboard with the aid of tugs and berth head out alongside in the normal manner.

Winds are often fresh and passing traffic can cause surging so moorings and anchors if used should be carefully tended.

Bulk Cement Berth: A bulk cement discharge point lies between Quay Nos. 1 and 2. Cement vessels up to 135 m. are regularly accommodated at this berth. Vessels up to 183 m. may be occasionally accommodated subject to adjacent berths being vacant.

Buoy Berths: 1 berth – LOA 195 m., draft 11.0 m.
1 berth – LOA 172 m., draft 8.5 m.

Vessels are berthed/unberthed at any state of tide. Tidal range is about 0.8 m. maximum.

Fishing Quay: Length 162 m., maximum draft 4.5 m. Berth can take vessels of up to 70 m. length.

SPECIALISED CARGO HANDLING FACILITIES: LPG carriers berthed at Quay D. The Port offers full containerisation facilities. Quay Nos. 3 and 4 are specially designed to receive container vessels. Cement discharging facilities also available. Rate of discharge 500 t.p.h.

Pumping and conveyor facilities exist at Quay D for discharge of bulk wheat, discharge rate 200 t.p.h.

STEVEDORES: Undertaken by the Cargo Handling Corporation Ltd. (CHC Ltd.).

Working hours: Monday to Fridays from 0700 to 1500 hrs., Saturdays from 0700 to 1300 hrs. Sundays and public holidays from 0700 – 1100 hrs. Overtime work is carried out during weekdays as well as on Sundays and Public Holidays if necessary. However, a double-shift system has been introduced at Berth No. 4 with the following working hours:

Mondays to Fridays:	1st shift – 0700 hrs. to 1500 hrs. 2nd shift – 1500 hrs. to 2300 hrs.
Saturdays:	No shift – 0700 hrs. to 1800 hrs.
Sundays:	No shift – 0700 hrs. to 1100 hrs.

Operates extended hours if and when required up to 2100 hrs.

MEDICAL: Arrangements for medical attendance should be made through ship's Agent. Private clinics available.

TANKERS: There are no deballasting or slop facilities.

Bulk Sugar Terminal: Fuel oil is discharged through a single 8 in. hose with ASA bolted flange which forms the link between ship's manifold and the jetty. Ships' derrick should be plumbed mid-manifold for lifting the hose. Weight approximately 2 tons. Bunkers are supplied through the same line.

Quay D: 2×12 in. pipe-lines run under the quay, one for fuel oil which goes to Shell Depot only, and one for all other products. One or two 16 in. hoses can be used to link each line to the ships' manifold (ASA bolted flange).

There is also an LPG line to the Shell Depot, Shell, Elf Antagaz and Esso from near the end of the quay, but this is only used for very small ships. LPG vessels carry up to 1,300 tons.

Quay No. 1: Cargo transfer facilities are not permanently installed on the jetty. 8 in. hoses are carried to the quay when required and connected to the single pipe-line which is buried in the quay. No water flush of the line is required between the products. Max. rate for gas oil is 700 t.p.h. Max. rail pressure 100 p.s.i. Max. rate for Mogas 600 t.p.h. at the same pressure as gasoil.

Also see "Berthing".

FRESH WATER: Fresh water supplied by barges at any berth between 0700 hrs. and 1600 hrs. Arrangements can be made for supply before 0700 hrs. and after 1600 hrs. on payment of overtime. The loading rate is about 25 – 30 t.p.h. 4 barges of 50, 75, 85 and 110 tons respectively are available.

FUEL: Gas oil, marine diesel and furnace oil obtainable. (Arrangements must be made in advance between Owners and Shell or Caltex). The pumping capacity of the installations at Port Louis for furnace oil is between 150 t.p.h. and 200 t.p.h., and for marine diesel oil and gas oil 50 t.p.h. Marine diesel oil and furnace oil (35 secs. to 1,000 secs.) is supplied at Quay D. Gasoil – Quays C, D, 2, 3 and 4. Marine diesel – Quays 2,3,4 and D. Furnace oil – Quays 2,3,4 and D.

A 400 ton bunkering barge is available to supply vessels in harbour and outside anchorage.

REPAIRS: Almost any type of repair can be undertaken in Port Louis.

DRY DOCK: Stevenson Dry Dock. Largest vessel that can be docked: 100 m. × 15 m., with a max. draft of 9.0 m.; vessels of up to 109 m. × 15.3 m. can also be docked, but at least 15 days' notice should be given.

CONSULS: *Consulates:* Australian, Austrian, Belgian, Canadian, Danish, Dutch, Finnish, German (Federal Republic), Norwegian, Portuguese, Spanish and Swedish.

Embassies: Egyptian, French, Malagasy, Pakistan, Peoples' Republic of China, U.S.S.R. and U.S.A. *High Commissions:* British and Indian.

TIME: Local time GMT plus 4 hours.

HOLIDAYS: (1990): New Year, Monday 1st January and Tuesday 2nd January; Chinese Spring Festival, Saturday 27th January; Thaipoosam Cavadee, Thursday 8th February; Maha Shivaratree, Friday 23rd February; Independance Day, Monday 12th March; Ougadi, Thursday 27th March; Id–El–Fitr, Friday 27th April; Labour Day, Tuesday 1st May; Ganesh Chaturthi, Saturday 25th August; Divali, Thursday 18th October; All Saints Day, Thursday 1st November; Christmas, Tuesday 25th December.

POLICE/FIRE: Police Tel: 999. Fire Tel: 08-3741.

DEVELOPMENTS:

(i) Rice Handling Complex.
(ii) Extension of Fishing Quay.
(iii) Expansion of Open Storage Areas.
(iv) Dredging and Reclamation of Mer Rouge and Chien de Plomb.

SHIPMASTER'S REPORT: June 1982. (Updated 1990).

Off Limits Call for Stores, Mail and Crew Changes:

Documents: (All local forms – IMO standard documents in use (FAL conv. 1965)).

1 Parcels List, 1 Shipmaster's Report Inwards, 1 Ship's Record, 1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration, 1 Maritime Declaration of Health, 1 Crew Declaration, 4 Crew Lists.

Anchorage: Possible but not necessary for the 2 hour stop.

Max. Size: No limit.

Health: Vessel is boarded by 2 Quarantine Officials who grant Free Pratique.

Radio: An amended ETA had not been received 6.5 hours after transmission.

VHF: Port Louis Harbour Radio very helpful and will pass messages. We were not able to contact them until about 30 miles to the West.

General: Vessel is also boarded by, 1 Customs Official, 1 Immigration Official and the Agent. After entry formalities are completed the ship-chandler boards together with any new crew. Despite cabled request our stores were not pre-slung and had to use ship's net slings. Require derrick amidships for stores and good lee, usually port side. Stores' boat is separate from Officials' boat.

SHIPMASTER'S REPORT: July 1982 (Updated 1990).

Port Limits: The commercial area of the port is the area inside the port bounded by the Entrance Buoys and the shore line of the Inner Harbour. Vessels at the outside anchorage also lie within the limits of the port defined by a line joining Pte. Aux Sables and Pte. Aux Piments. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers and personnel.

Documents: Immigration: 2 Crew Lists, 2 Passenger Lists, 1 Certificate under Act No. 20 of 1973 (Form PF102).

Health: 1 Declaration of Health, 1 Vaccination List.

Customs: 1 Customs Form (Form F24), 1 Parcel List (Form F17), 1 Ship's Report – Inward, 1 Narcotics List, 1 Arms and Ammunition List.

Agent: 2 Crew Lists, 2 Passenger Lists, 1 Ship's Record – Port of Port Louis.

Note: Declare ship's cameras, VHF's, TV's, etc. in bonded section of F17. If space allocated on F17 for crew "other items" is insufficient, use of a supplementary list is acceptable.

Clearance: Health, Customs and Immigration board on entrance. Clearance may be obtained at the Outer Anchorage but is subject to availability of personnel and may be limited to the purposes of anchoring listed in "Port Limits" above.

Approaches: Approach directions are well covered in the Sailing Directions and Chart No. 61592. The Citadel is easily recognised from considerable distance during the day. Closer in, the middle and upper ranges are visible, but the separation is not sufficient for good accuracy. The lower range is an orange daymark, located on the red roof of the Port Office, both faded to a rust colour. It is very difficult to locate and can be confused with the daymark on the light located on "B" Berth. The Northern red can buoy is large and makes a good radar target. The Southern BW is of skeleton construction and is subsequently harder to pick up visually or with radar. There is a tidal current that sets across the channel and at right angles to it.

Pilotage: Compulsory for vessels over 100 g.r.t. Vessels are piloted inwards and outwards at any time of day or night if circumstances permit. Inward bound vessels are met about 1 mile seaward of the Entrance Buoys. The pilot boat is a white launch with a deck height of approximately 4 ft. There are only 4 Pilots, so movements may be delayed by congestion and night entrance curtailed.

Anchorage: Open roadstead with anchorages for vessels of any draft. Consult Chart No. 61592.

Radio: Government Radio Station 3BA at Vacoas is on 500 kHz. and also has high frequency Channels. Port Louis Harbour Radio Station has 2182 kHz. and VHF Channel 16. They do not have regular traffic lists but are easily reached, particularly around weather reporting times.

The Port Master requires to be notified of the date of vessel's arrival, length, draft and purpose of call, by radio, as soon as practical with the above stations.

Tugs: 2 tugs of 830 h.p. and 3 smaller units of 320 h.p. for inner harbour work, and one new multi-purpose high powered tug of 2,670 h.p.

Berthing: There are numerous speciality docks and berths for smaller vessels. The main deep-draft berth has 2 sheds for unitised and general cargo with one open container section. This new dock has excellent fenders but the older docks have virtually nothing. Bagged goods are generally worked into lighters at mooring buoys.

When berthing to buoys, the vessel is berthed head-out on 2 anchors with additional headlines to a buoy. The stern is secured to the buoy by 4 ship's lines and a heavy shore wire. A messenger is necessary for taking the wire, and lashing straps to tie the eyes to the mooring rings must be supplied by the ship. The wire is taken through the centre stern chock, and one set of bitts must be kept free for it. Chafing gear on stern lines is advisable. Vessels berthed at the container berth may be required to send 4 lines to a buoy about 100 ft. off the corner of the dock.

Medical: Medical and dental facilities are available with arrangements to be made through the Agent. Repatriation can be arranged. Radio Pratique is not available. Cholera and yellow fever vaccinations are required for arrivals from infected areas.

Consuls: The U.S. Embassy is located about 200 yards outside the main harbour gates and is easily recognised. The office is on the 4th floor of Rogers House. Working hours are 0900 – 1200, Monday – Friday.

Watchmen: 3 shifts: 0700 – 1500 hrs., 1500 – 2000 hrs. and 2000 – 0700 hrs. Number is at discretion of ship, but heavy pressure is applied to the Chief Officer to employ extra, claiming these are "normal" or "routine". If cargo is *free out,* watchmen are hired and paid by receivers, with vessel only providing meals. Quality is poor to fair. If vessel is at Outer Anchorage, no watchmen are available. There have been frequent incidents of thefts by bum-boats, so an adequate crew watch is recommended.

Customs Allowance: On arrival, officers and crew may have in their possession, an 8 day allowance of tobacco products and 4 day allowance of spirits per daily schedule of: Master: 1 oz. tobacco, 0.25 pint of spirits, 1 quart of wine, 1 quart of beer: Other Officers: 0.75 oz. tobacco, spirits same; Crew: 0.5 oz. tobacco, spirits same. (200 cigarettes for the 8 days is accepted as within amounts listed). 2 Customs Officers will be assigned to vessel, usually just during working hours, with vessel expected to provide a suitable room and meals.

Supplies: General supplies are available through Agents and private ship chandlers, though prices can be expected to be high for consumable stores and equipment. Repairs can be performed, but the shipyard dry dock is too small for larger vessels. Foodstuffs are not recommended. Fresh water is about $2/ton via barge. Fuel is expensive, about $45/bbl. for Bunker C. Numerous ship chandlers will solicit the vessel, many falsely claiming to be sent or approved by the agency.

Time: GMT plus 4 hours.

Holidays: There are 13 official holidays, and numerous others are observed in various degrees due to the mixed Chinese, French and Indian heritages.

SHIPMASTER'S REPORT: October 1983 (Updated 1990).

Off Limits Call for Mail, Stores and Crew changes:

Documents: Documents required may be:

1 Shipmaster's Report Inwards – for Customs.
1 Parcels List Customs F.17.
1 Customs F.16 – Crew Declaration although they *may* accept ship's own form.
2 Copies Master's Report for Mercantile Marine Office, also an addendum in duplicate, and these forms are taken ashore by the Agent.
1 P.F. 102 – Certificate Finder Act No. 20 of 1973 for Immigration.
3 Crew Lists on arrival.
2 Crew Lists on departure – to show newly joined personnel.

Immigration require international embarkation and disembarkation cards for all joining and departing personnel.

Port Health require Marine Declaration of Health.

All these papers are required, even though the vessel is only there between 1 and 2 hours.

Ship's Spares: Any package for the vessel arriving from abroad should preferably be at the airport at least 2 days prior to the vessel's arrival as it takes time to clear such packages through Customs.

General: The Mauritius Sailors Home Society will exchange paperbacks – arranged through Agents.

AUTHORITY: Mauritius Marine Authority, P.O.Box 379, Port Louis, Mauritius. *Tel:* 240-0415. *Telex:* 4238 Mauport IW. *FAX:* 240-0856. *Contact:* Director General.

Mexico

ACAPULCO: 16.50 N. 99.54 W.

DOCUMENTS:
Health Clearance from previous port.
Health Pratique.
4 Stores Lists.
4 Lists of Crew's Personal Effects.
12 Crew Lists.*
2 Passenger Lists.*
12 Manifests of cargo for the port.*
*One copy to be visaed by Mexican Consul.

PILOTAGE: Pilot is ordered by Agent on the basis of Master's ETA, which should be given accurately at least 24 hours before arrival. Pilot boards at the port limits, approx. 1 mile from the entrance. Pilot station on VHF Channel 16 when vessel expected.

ANCHORAGES: Vessels may anchor in the middle of the bay as indicated by the Pilot. Depths up to 150 ft.

RESTRICTIONS: The Bay of Acapulco is a natural harbour surrounded by mountains, approx. 4 miles across at its widest part and 2.5 miles across at its narrowest. There are 2 entrances, 1 called Boca Grande and the other called Boca Chica.

Boca Grande is between Punta Siclata on Isla de la Roqueta and Punta Bruja. The channel is 3,000 m. wide with a depth of 31 fathoms in mid-channel.

Boca Chica Channel, between Isla de la Roqueta and the Peninsula of Las Playas is 300 m. wide with a depth of 14 fathoms in mid-channel.

MAX. SIZE: For berthing alongside max. draft 28 ft. 6 in.

HEALTH: When vessel arrives at the port the following Authorities will board: Port Health Authority, Customs and Immigration, accompanied by the ship's Agent.

RADIO: Coastal station of Acapulco receiving on 8374 kHz in daytime and on 4180 kHz at night. Transmitting on 8514 kHz in daytime and 4250 kHz at night. Radiotelephone receiving and transmitting on 2715 kHz during the day and on 2182 kHz from 2000 – 0600 hrs. local time.

VHF: Service available from 0630 hrs. to 2300 hrs.

TUGS: *Shipmaster's Report:* December 1984.
There are no tugs at Acapulco. Berthing and unberthing are unproblematic because of the use of anchor and aft buoy line and furthermore the help of mostly weak prevailing winds which blow parallel to the pier.

BERTHING:

	Length (m.)	*Depth* (m.)
Fiscal Quay	198	8.0
Coastal Quay	150	4.0
Passenger Quay	206	10.0
Fishing Quay	173	4.0
Yacht Quay	340	3.0

MEDICAL: Agent should be advised by radio in advance if any medical assistance required. Hospital facilities available.

TANKERS: Tanker moorings operated by Petroleos Mexicanos situated on the Eastern side of the bay. It is strictly prohibited to discharge oily residues in the bay or within 40 miles of the port.

FRESH WATER: Can be supplied from the quays using ship's hoses, rate about 15 t.p.h.

FUEL: Available.

CONSULS:

Denmark	Tel: 2.11.11	Norway	Tel: 2.19.56
France	Tel: 2.43.83	United Kingdom	Tel: 2.29.21
Italy	Tel: 2.25.10		

REPAIRS: Minor engine repairs can be effected. No dry docks, only a slipway for vessels up to 100 tons.

Vessels may carry out own repairs only after permission obtained.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew members are only allowed to retain cigarettes, tobacco and liquor sufficient for their own consumption while vessel is in port.

REPATRIATION: Can be arranged.

AIRPORT: International Airport situated 22 km. from the port, daily flights to all parts of the world.

TIME: GMT minus 6 hours all through the year.

HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.

POLICE/FIRE/AMBULANCE: Police Tel: 2.00.40; Fire Tel: 2.00.42; Ambulance (Red Cross) Tel: 2.02.41. and/or 2.00.88.

TELEPHONES: Cannot be connected on board the ship but Master may make calls from the quay.

SHORE LEAVE: Allowed. Crew List to be left with gate.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Delegacion Coordinadora, Costera Miguel Aleman No. 320, 4th Floor, Office No. 2, Fiscal Quay Warehouse No. 2. *Tel:* 2-54-95.

Empresa de Servicios Portuarios, Costera Miguel Aleman, Free Zone Area. *Tel:* 3-56-58 and 3-56-59.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5. Mexico, II D.F. *Tel:* 553 87 11.

CAYO ARCAS: 20.11 N. 91.59 W. **(See Plan)**

SHIPMASTER'S REPORT: January 1982.

DOCUMENTS: *Agents, Customs and Immigration:* The Charterer's Agent dealing with the paperwork when loading at Cayo Arcas are Benjamin Negroe Pawling, Consignatario de Buques, Calle 31 No. 1, Ciudad del Carmen, Campeche, Mexico. They only deal with the entry and clearance of the ship and preparation of the cargo papers. They also prepare and obtain a visaed Crew List irrespective of the fact that one might have been prepared and visaed at the previous discharge port.

The Customs and Immigration come by helicopter to the storage tanker and clear the ship when alongside. However, they will also clear the ship in the anchorage coming out on one of the tugs.

Papers Required: 6 Visaed Crew Lists (or plain Crew Lists with a letter from the Agent at the previous port stating that there was no Consul available).
2 Visaed Manifests for cargo on board.
2 Vaccination Lists.
4 Crew Declarations of Personal Effects.
2 Copies of Stores Lists.

During the 3 loadings at Cayo Arcas and the time spent at anchor off Coatzacoalcos no mention was ever made to the Work Permits which it was understood had to be obtained when working on the Pemex Charter. Perhaps these will be issued when the vessel loads at a port on the coast.

ANCHORAGES: 4 to 8 miles to the East of the flare in 25 fathoms, bottom sand, mud and shell. Good holding ground using 9 shackles of cable.

RESTRICTIONS: See "Loading".

RADIO: Radio communication via XFF2 . . . . Pemex Pajaritos, traffic list even hour GMT plus 30 minutes . . . . sometimes 5 to 10 minutes delay. No charges are made for any cables to Pemex.

Transmits:		Receives:
	4346	4191
	6442.5	6286.5
	8690 (8690.5 Off Tune)	8382
	12790 (12790.5 Off Tune)	12573
	17075.5	16764

Always on 8 MHz, transmits on 12 MHz, receives 16 MHz.

During the course of the voyage, in addition to the arrival and departure cables, Pemex require the vessel's noon position each day, the ETA at the next port and any requirements such as bunkers and water. No acknowledgement is ever received and very few cables are sent to the ship by Pemex. Telex orders and instructions are routed via the Agent in the discharging port.

On approaching Cayo Arcas and the storage tanker, due to language problems (the Pemex operatives only speaking Spanish) all VHF calls are made through the English speaking officers on the tugs 'Eliska Theriot' and 'Martha Theriot' whose calling and working frequency is Channel 9. One of these English speaking officers also accompanies the Mexican Pilot-Berthing Loading Master and Pemex Representative to act as an interpreter when required and also when communication problems arise during cargo operations.

When at anchor off Cayo Arcas, information is usually obtainable via the 'Theriot' tugs.

BERTHING: Vessel moors port side to, alongside the storage tanker. This requires 8 parts of rope both forward and aft, 6 ship's lines and 2 from the storage tanker. All wires have to be fitted with rope pennants. Great care must be taken when going alongside to ensure that the ship's lines do not foul underneath the Yokohama fenders. Two tugs are in attendance, one forward and one aft using the tugs' lines. These are very heavy and require a messenger to heave them on board.

LOADING: Three lines are connected; these being 16 in. flexible rubber hoses with 12 in. reducers to the ship's manifold. They are connected by Pemex personnel but it is essential to have ship's staff operating the winch and the derrick gear. The API of the Maya Crude Oil is about 22.6 and the average loading temperature about 108°F. The maximum loading rate is 30,000 bbls./hr., however if the ship is receiving direct from the field, the rate drops to 15,000 bbls./hr.

It is advisable to leave the loading plan flexible as Pemex are likely to cease loading without prior warning and sail the vessel with deadfreight. The reasons for this can be due to the onset of bad weather or to ensure the ship leaves the storage tanker in sufficient time to enable the next ship to berth before dark. Unberthing is possible during the hours of darkness but the Pilots do not berth ships alongside the storage tanker between the hours of sunset and sunrise. The terminal requires 2 hours' notice prior to completion of loading and 10 minutes to stop operations. Communications between the ship and storage tanker is by a manifold watchman with a radio. These persons have a casual approach to their responsibilities and must be watched closely to make sure they are at the manifold when required.

Charles Martin Surveyors attend the vessel before and after cargo operations and insist on a visual inspection and manual dipping of the tanks. But they do not require water dips of the ship's tanks, a percentage allowance being noted on the Bills of Lading for these impurities.

Hydrogen Sulphide Content of Mexican Crude Oils: The H_2S content of the Maya Crude Oil is extremely high and all necessary safety precautions must be followed and adhered to.

FRESH WATER/FUEL: Fresh water, fuel oil and diesel oil are all available and are delivered to the ship by small coastal tanker or oil-rig supply tenders. They have to be ordered via Pemex preferably on the departure cable after leaving the discharge port. Whilst Pemex prefer to deliver bunkers when the ship is at the loading port, these commodities can be obtained in Curacao where Pemex have rented bunker storage facilities. Ships can avail themselves of this service when bunkers were not delivered in Mexico due to bad weather or some other cause.

DEVELOPMENTS: At the moment the only buoy in operation is No. 1 to which the storage tanker is moored. 'Boya Fija No. 3' and 'Boya No. 2' are in position as is the base for the hotel block 'HB CA1' and the degassing plant 'PBE-CA1'. It is understood the present completion date for these new installations is late March 1982 and production commencing some time after.

SHIPMASTER'S REPORT: May 1982.

DOCUMENTS:
Last Port Clearance.
5 Copies Crew List.
2 Copies Stores List.

PILOTAGE: Compulsory. Pemex Pilot boards 2 miles East of the berth.
ANCHORAGES: Depth 45 m. – 50 m. Bottom is sand.
RESTRICTIONS: Berthing daylight hours only. Unberthing at anytime.
MAX. SIZE: 350,000 d.w.t.
HEALTH: Pratique available day and night.
RADIO: Lantana Radio (WOE).
VHF: Terminal on Channel 11 only.
TUGS: 2 × 8,500 h.p. Both tugs required for docking and undocking.
BERTHING: Vessel berthed at No. 1 berth. Max. size permissible 110,000 d.w.t. Depth of water 42 m. Bottom is sand. Hoses connected on port side. No. 1 berth is alongside the storage tanker. However, after June 1st, 1982 the vessel will berth direct to the SBM.

Loading is through 3×12 in. hoses. Cargo is Maya Crude (API 22) which comes directly from oil production wells, through a gas separator. H_2S content is very high and dangerous.

The storage vessel is equipped with Yokohama fenders and also passes over 3 ropes forward and 1 rope aft.

Berth No. 2 (SBM): Max. size 250,000 d.w.t., hoses connected on port side.

Berth No. 3 (SBM): Max. size 350,000 d.w.t., hoses connected on port side.

No facilities for dirty ballast.

MEDICAL: Services available.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not possible.

SHIPMASTER'S REPORT: May 1984.

LOCATION: Lat. 20° 12.5′ N., Long. 91° 57.5′ W.

The port of Cayo Arcas Terminal is an open sea terminal located in the Campeche Bank, some 85 miles almost West of Campeche and 90 miles North of Puerto del Carmen. The Middle Cay is the biggest with a lighthouse (round concrete tower) elevation 75 ft., Fl. (2) 14 s. 14 M.

The terminal is formed by:

1. One platform gas stabiliser (called "Cabezal de Valvulas" on Chart 28260) located in position 20° 09.6′ N., 91° 57.8′ W., with a gas burning flare (conspicuous) visible at 30 miles equipped with Racon "C" (– · – ·).
2. One old gas burning structure located 1 mile S.W. of the above platform.
3. SBM No. 1 in position 20° 10.0′ N., 91° 59.0′ W.
4. SBM No. 2 in position 20° 08.8′ N., 91° 59.0′ W.
5. One fixed structure in 20° 11.4′ N., 91° 59.5′ W. to which is permanently moored the storage tanker "Venture Europe", capacity over 2 million barrels.

The platform and both storage tankers are very good radar targets at 24 miles.

DOCUMENTS: 6 Crew Lists visaed by the Mexican Consul of the last foreign port or 6 Crew Lists and a statement from the Agent at the last foreign port that no Consul in the area. 3 Ship's Stores Declarations and 4 Crew Declarations.
CLEARANCE/OUTWARD DOCUMENTS: The Agent will prepare on board after loading, all required documents already signed and stamped by the due Authority. The Agent will also prepare the Bill of Lading and Cargo Manifest with the quantities given by cargo and Pemex Inspectors.
PILOTAGE: Compulsory for berthing/unberthing. Pilot boards 2 miles S.W. of the platform and he remains on board during all operations. Accommodation and meals must be provided.
ANCHORAGES: Outside Prohibited Zone about 8 miles East of the platform or 4.5 miles S.S.E. of the platform in approximately 50 m. of water. Good holding with 9 shackles in winds up to 35 knots.
COMMUNICATIONS: ETA for Cayos Arcas Terminal: Send ETA to Pemex (Petroleos Mexicanos) Pajaritos via Pajaritos Radio Station, XFF2, working frequencies:

Transmits	*Receives*
4346	4191
6442	6286.5
8690	8382
12790	12573
17075	16764

Of the above frequencies only checked on 8 MHz.

Traffic list on even hours plus 30 minutes although some 5 to 10 minutes delay can be expected. Only listening to this station when South of Florida.

ETA to Pemex Pajaritos can also be sent via Lantana Radio Station, WOE when far from Cayo Arcas.

When close to Cayos Arcas communication with Port Control (stationed aboard "Venture Europe") via VHF on Channel 9.

ETA to Agent can first be sent via telex to Tampa Office relay Ciudad del Carmen and then by cable via Veracruz Radio Station, XFU.

REPATRIATION: Embarking crew have to get permission from Immigration at Ciudad del Carmen before joining the vessel.

Disembarking crew cannot disembark, even if the Agent makes a request, until Immigration has cleared the vessel.

BERTHING: When mooring at any of the SBMs have ready the port crane or boom to pick up gear. In the forecastle 1 mooring rope (not wire) with a tail of 3 fathoms length and 2.5 in. circumference to lash the shore rope. One gang of 10 men board the vessel with the Pilot to assist in mooring/unmooring and connection/disconnection of hoses. These 10 men remain on board throughout during vessel's stay and accommodation and meals must be provided.

2 Cargo Inspectors and 1 Pemex Inspector, and sometimes the Agent board the vessel with the Pilot. Accommodation and meals must be provided.

When mooring alongside the storage tankers, only 3 or 4 people remain aboard.

Mooring to Storage Tankers: Both storage tankers have Yokohama fenders on starboard side. Mooring port side alongside using 3 head ropes, 2 breast and 2 spring ropes fore and aft plus 2 breast ropes from the storage tanker forward. 2×12 in. hoses used.

Mooring to SBM Nos. 1 and 2: One tug is used (tug's wire) on starboard bow to assist in the mooring. One shore polypropylene rope 9 in. circumference to which a chain is attached must be heaved on deck. Minimum opening of the bracket or stopper 15 in. × 7 in., otherwise 2 shackles with a thick wire must be attached to the chain and passed around the bitt. 2×16 in. hoses used.

FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Not possible.
GENERAL:
Authorities: By helicopter from Ciudad del Carmen to "Venture Europe" and then by tug. Accommodation ladder requested.
Agent: Consignaciones de Buques, Canega Inc., with offices in Tampa, Florida. Telex: 803757 Canega B and Ciudad del Carmen, Campeche. Cable Address: Negroe, Ciudad del Carmen.
Charts: U.S.N.O. 28031, 28260.

SHIPMASTER'S REPORT: March 1987 (Updated Sept. 1987).

VESSEL: 117,000 d.w.t.
DOCUMENTS:
5 Crew Lists.
3 Ship's Stores Lists (including Bond).
3 Personal Manifests.
Last Port Clearance.
Ship's Register.

Personnel: 1 Agent, 1 Immigration Officer, 3 Cargo Surveyors, 1 Loading Master and 10 Mooring/Pipe-line personnel join with Pilot. 1 Pilot, 1 Loading Master, 3 Cargo Surveyors and 1 Agent remain on board and require meals. Accommodation required only if night loading.

Departure Documentation: This takes up to 4 hours but the vessel must be ready to leave the mooring on completion of ullaging and sampling, drifting clear of the area whilst the cargo calculations are completed.

September 1987: Documentation took about 3 hours, but the vessel can start to unberth 2 hours after disconnecting.

PILOTAGE: Pilot boards from a supply boat about 2.5 miles S.W. of the platform.
APPROACHES: Normal direction of approach to berths is from the S.W. When proceeding to an SBM, the supply vessel lands all pipe-line equipment on board (port side), approximate weight 500 kgs.

Navigational lights marked on chart are extinguished. Flare marked on chart is also extinguished.

Racon on the oil platform S.S.E. of island showed well at 16 miles.

Approaching from the West, there were no problems when keeping well to the South of the 'Area to be avoided'.

September 1987: There is a radar watch on the platform, using a Norcontrol System. All headings and distances to reach the anchorage are given through "Marine Control". Anchorage this time 4 miles to the East of platform. Depth 47 m., mud bottom.

Chart: B.A. 2626.

TUGS: 5 tugs of varying sizes, 2 supply vessels also used as tugs and several work boats. All equipped with VHF.
BERTHS: There are 3 loading berths.

(a) Storage vessel "Texaco Veraguas" moored to SPM – Maya Crude.
(b) SBM No. 1 – Maya Crude.
(c) SBM No. 2 – Maya Crude.

Storage vessel ((a) above) has fenders in place on the starboard side and loading vessels berth port side to, using 1 tug on the starboard bow and 1 tug on the starboard quarter.

Moorings depend on the size of the vessel.
Maximum size vessel: 100,000 d.w.t.
Hoses: 2×12 in.
Loading rate: 5,800 t.p.h.

September 1987: Berth used this time: VLCC "Texaco Veraguas", port side to, 4 floating fenders and 1 bow/quarter fender. Connections 2×12 in., only used VLCC's boom.

Loading vessels berth bow on to SBM ((b) and (c) above) using 1 tug on the starboard bow. Vessel picks up 1×80 mm. diameter messenger which is attached to a mooring chain for use with a Smit Bracket/AKD stopper.

Maximum size vessel: 216,000 d.w.t.
Hoses: 2×16 in. on port side.
Loading rate: 3,300 t.p.h. direct from the oil well.
Loading temperature: Up to 45°C.

Berthing is done in daylight hours only, unberthing day or night.

Tugs/supply vessels use their own lines when making fast for mooring. In calm weather 1 tug makes fast aft to hold vessel off the SBM.

The 10 man mooring/pipe-line squad stand-by forward and by the manifold whilst the vessel is at the SBM.

Ship's personnel are required only to work the winches when mooring/unmooring, connecting and disconnecting the hoses.

RADIO: All ETA messages sent to ship's Agents.

Prior to arrival call 'Marine Control' on VHF Channel 16. Working Channels are 9 and 11, they were clearly heard at 20 miles. Vessel was instructed to anchor 5 miles East of platform, this was between the 'Area to be avoided' and the marked anchorage in approximately 42 m., mud bottom.

Information required by VHF: Nationality, draft, quantity of ballast and de-ballasting time.

After anchoring call 'Marine Control' with arrival time, anchoring time, quantity of bunkers and fresh water on arrival.

CARGO: *Caution.* Maya Crude has an extremely high Hydrogen Sulphide content.

MEDICAL: A doctor is available on the platform but facilities are limited.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities available.

GANGWAY: Accommodation ladder is required on the port side at SBM.

CUSTOMS: Customs allowance seems to be a 'reasonable amount'. There was no query over 200 cigarettes and 1 bottle of spirits per person.

The bond is not sealed but the Immigration Officer checked two or three items against the Ship's Stores List.

REPATRIATION: Personnel are taken by helicopter from Cayo Arcas to Ciudad del Carmen, 90 miles to the South, and then by plane to Mexico City where there is an International Airport. There is no limit on the number of personnel travelling.

TIME: GMT minus 6 hours all year round.

SHORE LEAVE: Not permitted.

GENERAL *Stores:* None available, but fresh prawns can be obtained from supply vessels/tugs.

Mail: Takes approximately 15 days to U.K./Europe but a courier service via the Agents is available taking only 5 days.

COATZACOALCOS: 18.08 N. 94.25 W. (See Plan)

PORT LIMITS: From the centre of the channel at the bar with a radius of 0.5 miles to seaward.

DOCUMENTS:

Customs:

Cargo Manifest, original and 4 copies visaed by Mexican Consul at place of origin. If no cargo carried for this port a certificate and 2 copies stating the fact.

Stores List, original and 1 copy.

Personal Effects List, original and 1 copy if vessel is arriving from another Mexican port. Customs release from that port must be produced.

Port Captain:

Clearance from Last Port.

2 copies Crew List.

3 copies Manifest of cargo for this port.

Immigration:

Crew List, original and 1 copy, bearing consular visa.

Passenger List, original and copy, visaed by consul.

All Crew Passports or I.D. Cards.

Health:

2 copies Crew List.

2 copies Passenger List.

Crew Vaccination Certificates.

Derat Certificate.

When vessels are anchored beyond the breakwater authorities board from the pilot launch.

The following must be made available for inspection.

- Registration Certificate of Vessel.
- Certificate of Inspection of Deck Machinery.
- Certificate of Inspection of Machinery.
- Freeboard Certificate.
- Tonnage Certificate.
- Radio Certificate.
- Radio-telephony Certificate.
- Emergency Procedure in the Case of Abandoning Ship.
- Emergency Procedure in the Event of Fire.
- Vessel Insurance Policy.
- Copy of the Charter Party (where applicable).

PILOTAGE: Compulsory. Pilot meets vessel off the jetties at Coatzacoalcos Estuary. Master should give Agent information not less than 24 hours prior arrival stating vessel's name, flag, and ETA as well as draft.

Pilot boat black hull, white housing and red deck. 2 launches, *Alcion* and *Vencedora.* The sound signal for calling the Pilot is 2 long blasts and 1 short blast. The light signal is a blue Bengal light.

There is a new cutter *Siriux.* The pilots' office has a VHF radio station, listening out on Channel 16.

ANCHORAGES: Ample anchorage grounds available outside the Bar of the Coatzacoalcos River.

Two anchorage areas have been established and are bounded by lines joining the following positions:

West Area:	A.	Lat. 18° 12′ 30″ N.,	Long. 94° 26′ 57″ W.
	B.	Lat. 18° 12′ 30″ N.,	Long. 94° 25′ 54″ W.
	C.	Lat. 18° 10′ 54″ N.,	Long. 94° 26′ 57″ W.
	D.	Lat. 18° 10′ 54″ N.,	Long. 94° 25′ 15″ W.
East Area:	A.	Lat. 18° 12′ 32″ N.,	Long. 94° 25′ 22″ W.
	B.	Lat. 18° 12′ 32″ N.,	Long. 94° 23′ 46″ W.
	C.	Lat. 18° 10′ 54″ N.,	Long. 94° 24′ 51″ W.
	D.	Lat. 18° 10′ 54″ N.,	Long. 94° 23′ 22″ W.

Anchorage exposed during Northerly winds when it is advisable to weigh anchor and proceed to sea.

RESTRICTIONS: Access Channel: 5,200 m. in length, depth 12.0 m.

Secondary Channel: 2,200 m. length, depth 14.0 m.

MAX. SIZE: Max. draft crossing the bar is 39 ft. The Pajaritos Channel to the bar reaches 42 ft. (will shortly be 45 ft.)

Free Zone: Max. length during the day 200 m., at night 125 m. Max. draft. 31 ft.

Pajaritos: Max. length 225 m. Max. draft 39 ft.

Report: 1985. Pilot office announced that they will not manoeuvre vessels with a draft of more than 38 ft. 00 in. (forward) and 38 ft. 06 in. (aft).

HEALTH: Pratique never given by radio. Vessels granted Free Pratique when berthed alongside if no contagious illnesses aboard.

RADIO/VHF: Telegraphic transmitter type TH 600-M with an open sea range of 500 miles radius, frequencies of 512, 500, 432, and 419.5 kHz. Telephonic transmitter type TSB-500-Be with approx. range of 500 km., frequencies of 2182, 2270, 2542 and 2665 kHz. RDF transmitter type TT-1017-B with approx. range of 300 miles, frequency 312 kHz. Transmitter/Receiver for radiotelephony VHF type VFD-50PT/PR, with approx. range of 50 miles, frequencies in Simplex operation: Channel 12-156.6 MHz and Channel 16 International call-up 156.8 MHz. Duplex operation: Channel 26: Transmission 161.9 MHz, reception 157.30 MHz. Channel 27: Transmission 161.95 MHz and receiving channel 157.35 MHz. At the moment, there is a point to point link-up with national and coastal telegraphs, as well as teleprinters for national and international service No. 078-835 (the latter is said already to be installed and will shortly be operating normally).

Tankers: In addition local requirements are that ETA messages should be sent to Pajaritos PEMEX Terminal, Call Sign XFF2 as soon as possible after departure from the previous port and updated at least 72, 48 and 24 hours prior arrival, using following frequencies: 4191 kHz, 6286.5 kHz, 8382 kHz, 12573 kHz, 16764 kHz, 22253 kHz or 25094 kHz.

TUGS: The Free Zone has the "Servicios Portuarios del Istmo de Tehuantepec S.A de C.V.", who own the tugs *Quetzalcoatl* 2,400 h.p., *Olmeca* 1,600 h.p. and *P.L.M.8* with 600 h.p. for operations in the Free Zone and the Pajaritos Terminal, the first being able to undertake salvaging work due to extensive range of action.

A tug is obligatory for mooring, unmooring or changing position in the port. 1 tug for vessels of 2,500 g.r.t. and 2 tugs for vessels larger than 4,000 g.r.t. The signal for calling up tugs is 2 long and 2 short blasts on the vessel's siren. The signal for the tug to withdraw is 1 short, 1 long and 3 short. The tug will repeat the signal to indicate that it has been heard. Tugs are fitted with VHF radio listening out on Channel 16 and during working, on the channel which the tug captain is ordered to use.

BERTHING: *Free Zone:* This has a quay length of 1,900 m. (1, 2, 3, 4, 5, 6, 7, 8) with varying depths of water from 29 ft. to 31 ft. All necessary services for vessels are available. During the day, vessels up to 200 m. overall length can manoeuvre, and at night only vessels up to a max. length of 125 m.

Restrictions: Night service is suspended during times of strong currents in the Coatzacoalcos river.

Pajaritos Terminal: In this terminal PEMEX has 3 quays operating and 1 being constructed, those operating being PX1E and PX1W with operational depth of 33 ft. and 30,000 tons gross with lengths of 200 m. PX2E and PX2W with operational depths on the Eastern side of 33 ft. and with 37 ft. on the Western side, admits vessels of 225 m. overall length and 35,000 g.r.t. The Provisional Quay admits vessels with 37 ft. draft and 35,000 g.r.t. At this terminal, Pemex exports crude oils, fuel oils, and at the PX1E quay, ethylene is loaded specifically. In the Western part of the lagoon, there is a manoeuvring basin with a radius of 300 m.

F.F.M. Quay: In the Eastern part of the Lagoon of Pajaritos, the Empresa Fertilizantes Fosfatados Mexicanos S.A. have their plants and a quay of 425 m., running E. — W., this quay being used for discharge of phosphoric rock in 4 mobile hoppers. Also, liquid sulphur is discharged, phosphoric acid is loaded, as are sulphuric acid and superphosphates. It has an operational draft of 33 ft., and takes vessels of 35,000 g.r.t.

CRANES: 300 ton crane for handling containers.

STEVEDORES: No ETA advice necessary. Free Port: Straight working hours: from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Overtime 100% overcharged according Tariffs. Latest times to order gangs: 0730, 1330 and 1730 hrs. Straight time above hours Monday through Saturday. Sunday and holidays allowed to work except "Legal Holidays". Loading and discharging rates: 25 tons gang/hour using ship's derricks. No shore cranes available. Loading sulphur by conveyor belts at 500 t.p.h., working around the clock.

Private FFM Berth: Loading or discharging operations performed by their own personnel working 24 hours per day. Rate of loading by conveyor belt: 500 t.p.h. Rate of discharging 1,100 tons per day with ship's gear.

MEDICAL: Hospital facilities available. Inform Agent in advance if treatment required.

TANKERS: Tankers regularly moor in the Pajaritos Roads. There are 4 large quays for mooring 7 vessels up to 233 m., with max. depth at the quay of 33 ft.

The Provisional Quay has 2 lines of operation of 24 in. with 3×8 in. for crude oil.

Bunkers and Lubricants: Not available.

Fresh Water: Available at jetties but should *not* be used for drinking water.

Stores and Laundry Facilities: Available, but no bonded stores.

Limited dirty ballast facilities available. Vessels sould arrive with clean ballast. Failing to do so can result in excessive delays.

All tanks lids must be closed when entering or leaving the port.

It is strictly prohibited to emit excessive amounts of smoke from the funnel.

Shore leave is normally permitted by the local Immigration Authorities, however the shore passes are only valid inside the city limit. Severe penalties will be imposed for crew members found outside City Limits. Pajaritos crude oil contains hydrogen sulphide – H_2S.

During rainy season (May/June and November/December) currents of up to 6 knots can be experienced in the river.

Also see "Shipmaster's Reports", "Berthing" and "Rabon Grande".

DENSITY: Average 1012.
FRESH WATER: Available at berths in Free Port area, delivered by 1.5 in. hose. Loading rate about 8 t.p.h.
FUEL: Fuel can be supplied at Coatzacoalcos port by tank-trucks when vessels need small quantities. Petroleos Mexicanos (PEMEX) has, at Nanchital, a loading terminal which is about 3 miles up-river from Coatzacoalcos (max. draft 27 ft. 6 in.) where Bunker C fuel available.

Diesel oil only available at Minatitlan, about 17.5 miles up-river from Coatzacoalcos (max. draft 21 ft.). If vessel bunkers at Nanchital or Minatitlan there will be at least 1 day delay and heavy extra expenses.

Gas freeing equipment for Gas tanker at Nanchital.
CONSULS: Norway and Netherlands.
REPAIRS: Minor repairs may be effected. Electronic repairs possible.
DRY DOCK: No dry dock available.
CUSTOMS ALLOWANCES: No restriction for free use on board.
AIRPORT: At Minatitlan, about 40 minutes car drive away. 2 regular flights to Mexico City.
TIME: GMT minus 6 hours.
HOLIDAYS: No work performed on following legal holidays: January 1st; March 21st; May 1st; May 5th; September 16th; October 12th; November 20th; December 25th; and December 1st every six years when Federal Government changes President.
POLICE/AMBULANCE/HOSPITAL: Police Tel: 2 01 22, Red Cross Tel: 2 02 85; Hospital Tel: 2 00 30.
TELEPHONES: No facilities for placing telephones on ships.
SHORE LEAVE: Possible. Crew must have I.D. cards or passports. Passengers must have passports.
DEVELOPMENTS: The entrance channel up to Pajaritos roads has been dredged up to 42 ft. The quays in the Free Zone have been completely reinforced, vessels up to 31 ft. draft being able to come alongside. The warehouses for general cargo at quays 2 and 3 have been completed, with a covered area of 4,000 m. and normal loading capacity of 10,000 cu. m. There are sufficient open areas for positioning heavy loads or machinery. Apart from the lighthouse on the Gavilan Hill, in the Allende area (left bank), the port has light towers indicating the main entrance channel, another 2 to indicate the channel leading to Pajaritos roads. All 4 have flashing lights. The branch leading onwards to the Free Zone is indicated by a small tower with flashing white light. The lights of the promontories of the 2 headlands;— the East light is green, and the West light is red. The channel is marked with black coloured buoys with odd numbers, on the port side entering, and red with even numbers on the starboard side. Both sets of lights are of the flashing type. When continuing upstream towards Nanchital or Minatitlan, the bridge has to be passed under. Its characteristics are: Length 1,375 m. vertical clearance with the bridge up 35 m., with the bridge down 8.84 m. Horizontal clearance which can be used: 60 m. To have the bridge raised, vessels must give 3 long and 2 short blasts on the siren.

SHIPMASTER'S REPORT: October 1985 – LPG Carrier 35,800 cu.m.
Approaches: Present charts are not appropriately scaled, coming off Bay of Campeche chart to Chart 373 which is only a port plan, and does not extend out to the SBMs. This was partly overcome by a 'home-made' extension to Chart 373, which of course lacked soundings, but was only slightly in error by using the given Latitudes and Longitudes for marking the SBMs. The 4 fathoms rock indicated in sailing directions is said to be much closer to shore (by local knowledge) and is not close West of the new anchorage area for gas carriers. We anchored 4 miles due North of breakwaters in 28 m. of water, and soundings in the approach appeared uniform. This was just at the North limit of the dirty water from the river outflow, so vessels with a long waiting time needing to make fresh water would need to be about 6 miles off. Current was running to the East, fairly strong inside 5 miles off, at least 3 knots at times (despite freshening winds in squalls from the North, the vessel secured at No. 1 SBM was seen to be on a constant Westerly heading – a tug secured to the stern appears to be standard practice at the SBM, so it is possible the current changes at certain times). Radar targets were visible from 20 miles off, and the breakwaters were discernable on radar from 10 miles off, thus a good fix is obtainable well in the offing.
Anchorage: There were many ships at the anchorage, most of whom had taken up a position between 3 miles and 6 miles off in the N.E./N.W. vector. Holding appears to be good in this area.
Inward Transit: Pilot calls on VHF and asks vessel to meet him at the boarding ground. Pilot will accept hoist or combination ladder. Vessel is about 1 mile from breakwaters by the time Pilot reaches the bridge, so only a little time for discussion of berthing plan. Full ahead is needed to overcome outflow between breakwaters, where rate can reach 8 knots, (4.5 knots on this occasion). Good steering is essential at all points and ability to 'feel' sheer developing, but Pilots are steady and well experienced and know exactly when bow and then stern will be affected when crossing from river into Pajaritos Channel. Tugs meet vessel just after this crossing point and tie-up shoulder and quarter. Speed is reduced in the Cut to enter the basin at about 3 knots. As can be seen from chart, very little lining-up is needed for Pier 3. The same Pilot berths the vessel. This is a straight forward manoeuvre, springs first to final position, then tugs push vessel to maintain position.
Moorings: The dolphins are well placed/spaced and have good swivel slip-hooks, however there are no capstans available. The mooring gang appeared to be about 30 persons, and they eventually carried the aft back spring along the catwalk to the corner of the main platform. The mooring boat towed the messengers for the remainder of the after wires across the dolphins, while forward we used a running messenger and pulled the wires out to the hook.
Gangway: There are no shore gangways. Landing area for ships is very limited. Situation was made as safe as possible throughout, but far from comfortable.
Terminal: Pajaritos Terminal is situated within Laguna de Pajaritos which is entered via a cut-off channel from Rio Coatzacoalcos about 1.25 miles inside the breakwaters. The plan is to dredge it out to a uniform depth and face all four sides of the laguna, and build further finger piers. At present only the Western half (approx.) is in use.
Depths: It was reported that there is now a uniform depth of 42 ft. within the Western side of the laguna to a line joining the root of Jetty No. 9 with the E.N.E end of the fertiliser jetty, and outwards in the channel and river and on the leading lines outwards to the pilot boarding position, thence to seaward there are no lesser depths. This sets the controlling maximum draft for all tankers and gas carriers at 39 ft.
Berths: There are currently 10 berths in use for tankers, these being 1W, 1E, 3W, 3E, 4W, 4E, 5, 6, 7W and 7E. No. 2 has been destroyed and not yet re-built. No. 8 has not yet been built. No 9 has been built and all fendering is in position, but no pipe-lines yet connected, it is currently in use as a lay-by berth. All berths have modern hydraulic type fendering, adequate mooring sliphooks (but no capstans), and Chicksans of varying number and dimensions. Nos. 1, 3 and 4 are for products, with No. 3 currently temporary fitted up for LPG via hose. Nos. 5 and 6 have larger Chicksans for black products and crude blends etc., while No. 7 is currently for virgin crudes.

Berth Nos. 5 and 6 are at the Southern end of a continuous concrete jetty which extends the whole length of the Western side of the laguna from abreast the lower leading light to the S.W. corner, and the Northern part of this jetty is used for materials/pipes/service craft, etc. (The recessed berth shown on Admiralty Chart 373 is not now correct).

Vessels berth head-in, that is heading South on all berths with the exception of Nos. 7 and 9 where it is head North (thus nomination for 3E means starboard side to).
Tugs: There are 4 tugs currently on charter to Pemex, and it is normal to take 2 tugs in and out. Tugs are strapped up alongside 'American style' and are well fendered. 3 tugs were seen handling a 70,000 ton loaded tanker with comfort.
Pilots: Pilots come under the Harbour Master of Coatzacoalcos, but all movements to and from the Oil jetties are under the control of the Pemex Port Captain, who allocates berths. Night movement of LPG carriers is not permitted.
Customs/Immigration: Vessels are boarded on arrival alongside, Pratique being granted before any operations may commence. Pajaritos Oil Terminal is *not* part of the free port area. Vessels without Visaed Clearance/Crew Lists should produce a copy of diversionary telex. Shore leave without a pass system is normal, and boats are arranged by Agents from the stern dolphin of each pier to the town ferry landing.
Fuel: There is one header on each jetty for Fuel and Gas oil. However delays or shifting ships are possible if other vessels loading these grades.
LPG cooldown: This is possible using slow loading method, not known whether there is a by-pass system at the pumphouse to control rate, there is no by-pass system on the jetty headers.
LPG Loading: Temporarily at Jetty No. 3 only, using 150 mm. flexible hose from base of jetty abaft the chicksans. No vapour return. Loading rate 450 cu.m/hr.
Standard Time: Nautical Almanac states Vera Cruz Province keeps a Summer Time. This is not so. Time here all year is 6 hours behind GMT.

SHIPMASTER'S REPORT: November 1985.

This report from sister ship confirms and updates report above dated October 1985.

Vessel was directed to proceed to Pajaritos to load a cargo of Butane and LPG Mix. The vessel arrived at Pajaritos anchorage and in keeping with the received instructions anchored well off the port to await orders. The anchorage chosen was in a position with Pajaritos breakwaters bearing 171°×13.6 miles, in 36 m. of water. 6 shackles were used and even though the wind freshened considerably during the time at anchor, no dragging occurred. That the wind did indeed freshen is made apparent by the fact that the port was closed for 3 days. When the port reopened, we were instructed by local Agents to proceed to the pilot station to take on a Pilot for berthing. This was duly done.
Approaches: As in the case of our sister ship a "home-made extension" was made for Chart No. 373, which chart is totally inadequate for approach to the port. I can confirm that a strong East-going current was encountered inside 5 miles off on the approach to the Pilot, but radar targets are good, especially the breakwaters which show up well. On this vessel's approach the port had, as noted, been closed, with a consequent build-up in ships awaiting Pilots.
Inward Approach: Once Pilot was safely on board vessel proceeded inwards. The approaches through breakwaters and into outer harbour are clearly marked with leading line beacons. Vessel had to enter between breakwaters at full ahead due to the strong outfall, estimated on this visit at about 5 knots. The Pilots however, are capable and very experienced, and inward passage to berth was similar to that of our sister ship. We entered the Laguna at about 3 knots, slowly reducing speed and with tugs in attendance forward and aft, on shoulder and quarter. The tugs are of ample power and well handled.

Vessel moved straight onto berth, in this case Berth No. 3 E, with no difficulties whatsoever being encountered. Berth was starboard side to and vessel moved into position immediately. Problems now arose however, due to the inability of shore mooring gang to handle the heavy mooring wires of the vessel's mooring complement. On this occasion no mooring boat was available and shore gang amounted to about 10 men, split fore and aft. As a result vessel resorted to running messengers to heave the wires ashore and onto the sliphooks. The jetty appears to be well constructed but alas no capstans are fitted to heave moorings to shore.
Gangway: Still no shore gangway available at this berth so ship's gangway used to the small area available, in a not wholly satisfactory position.
Cargo: Shore require vessel to present 1×10 in. (150 ASA) connection. No vapour return to shore available. 1×6 in. flexible cargo hose available, therefore only one grade at a time can be worked. For grade changes shore drain flexible hose to the sea via a small drain line on jetty, then disconnect shore end of hose and move on the jetty to the

new grade shore manifold. This involves several men plus the use of ship's crane and takes from 2 hours – 4 hours.

There is no recirculation system on the shore line system, so when initially loading any grade the temperature can be anything up to 20° above normal loading temperature, resulting in a very high boil off. This can cause problems if trying to cool down a tank to load LPG Mix at −34°C, when tank had previously held Butane at −2°C. An estimated line clearance of 80-100 tonnes is received on board before liquid temperatures drop to normal, and certainly ships maximum reliquifying capacity is required during the initial loading phase, even at very low rates.

Once the bulk loading stage is reached, an average of 240 tonnes/p.h. was achieved on both Butane and LPG Mix parcels. The rate is controlled by shore pump house, working on shore line back pressure.

The vessel is required to fill in a shore document every 6 hours, giving amount of cargo received, rate, quantity remaining to load and estimated time of completion.

Loading can, and was, stopped if a Pemex priority ship berths on the adjacent jetty (No. 3W), as shore can only load one ship, one grade at a time. Shore will also stop loading when other ship connecting loading line. This vessel suffered stoppages amounting to 44 hours due to this reason, plus a change of grade to LPG Mix during the loading of the Butane parcel.

On this occasion the cargo surveyors employed by Charterers were Redwood, employing local staff. They had a reasonable command of English. These surveyors make the initial and final calculations and the Bills of Lading are based on these figures. No shore metering or tank gauging is possible as the two shore tanks are being filled continuously as the ship loads. Surveyors require 4-5 hours to calculate figures for arrival/departure.

As shore tanks are in use at all times, no shore tank densities are available. Redwood surveyors and Pemex chemists take samples from ships tanks loaded or loading at 50% to determine density of cargo loaded and for cargo analysis.

The surveyors are available throughout the loading on VHF Channel 16 and proved very helpful when communications with shore installation became difficult.

On completion, Redwood supply vessel with copies of ullage reports, density sheets and analysis reports.

On this occasion densities as follows:

LPG Mix: 0.5365 at 60°F in vacuum, loaded at −34°C
Butane: 0.576 at 60°F in vacuum, loaded at −6°C.

Communications: Initial contact with Agent is made via telex. However, whilst the Agent can receive telex messages, they are unable to send via telex to ships at sea. As an alternative, they send messages via Mobile Radio or Alabama Radio, call sign WLO, which station vessels should monitor until within VHF range of Pajaritos Agent. As Tomas Ruiz are also Pemex Agents ETA's etc., can also be sent to them. Agency monitors VHF Channel 16 and works on Channel 72.

There is no Health Clearance via radio for Pajaritos. Port officials board at berth, but no difficulties experienced.

Length/Draft: Informed by Agent that the following ship lengths/safe drafts apply:

Ship length	*Minimum safe draft*	
	Forward	Aft
150 m. – 175 m.	12 ft.	22 ft.
175 m. – 200 m.	14 ft.	24 ft.
200 m. – 225 m.	16 ft.	26 ft.
225 m. – 250 m.	18 ft.	28 ft.

250 m. is the maximum length that can be handled.

Radio – Loading: Communications during cargo operations caused some problems and a Letter of Protest on this subject was issued to the shore installation. All stops/starts information etc. is given to ship and ship to shore via VHF radio on Channel 16 and working Channels 9 or 11, call sign Pemex Operations. Their operators have a reasonable command of English, but can be very hard to raise at times. Also vessel was supposedly able to communicate with loading supervisor and pump house directly on Channel 9, but this proved impossible as no English was spoken or understood by these operatives, hence the Letter of Protest. After this was sent to shore Pemex operations communicated directly with the ship instead of the loading supervisor and standards were markedly improved. Even so, on 2 occasions vessel observed that loading had been suspended without any information being given to ship.

For the completion of each grade an English speaking supervisor boarded vessel to assist should any language problems arise. However, when "stop loading" was given, the pump house reaction was immediate. Paperwork for cargo, safety etc., as per normal.

Once the language problems and frequent changes to loading programme were overcome, the loading operation ran very smoothly.

A further Letter of Protest was also issued due to the shore stopping loading before the requested quantity was received on board, there being no way they would restart loading to complete.

Outward Transit: No difficulties experienced leaving jetty. Vessel moved off stern first, assisted by a tug fore and aft, then swung in the laguna. The unberthing Pilot however took some time to become accustomed to the rapid swinging of the vessel. This was especially evident in the passage through the Outer Harbour and breakwaters, being accentuated by again a strong outfall of approximately 4 knots – 5 knots. After clearing entrance vessel was swung to the West to clear passage for incoming vessels and Pilot departed when West of breakwaters.

Points of Interest: At the time of our visit to Pajaritos there was an abnormal amount of plant and vegetable material both floating and in suspension in the water, from the Outer Harbour to the berths. This material resulted in frequent cleaning of sea intake filters, some of them on a daily basis. It is not known if this condition applies on a year round basis, but certainly it was a problem in November.

SHIPMASTER'S REPORT: Pajaritos. October 1987.

Pilotage: Pilot boards from a small open, orange painted launch that is of the same design as local fishing boats.

Restrictions: Agent advised that there is no berthing or unberthing between 1800 hrs. and 0600 hrs.

Shore Leave: There is a frequent ferry service from the oil terminal to the town which takes 30 minutes and is free.

Draft: The following letter was received from the terminal:

Quote:

Master . . . . Date . . . .
In Port . . . . Pier Number . . . .

The Harbour Master has instructed us that the following minimum draft will be required for manoeuvring into and out of this port (including Pajaritos Lagoon):

Vessel's Length	*Minimum Draft*	
(m.)	Fwd (ft.)	Aft (ft.)
50 – 100	4	14
100 – 125	8	18
125 – 150	10	20
150 – 175	12	22
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28

Please comply with the above instructions, in any other condition Pilots will not manoeuvre your ship.

On behalf of Petroleos Mexicanos

....

Unquote.

SHIPMASTER'S REPORT: August 1990.

Berth: Pajaritos.

Charts: B.A. Charts No. 373 and 1225.

Approach: Do not confuse point in position 18° 20′ N., 94° 31′ W. for Pta. San Juan.

Breakwaters at Coatzacoalcos show up well on radar.

Anchorage: About 2.5 miles N.W. of breakwaters. Very exposed in Northerly winds. In strong winds, vessels invariably drag anchors. A short steep swell can develop. Wind force increase can be sudden and dramatic. Designated anchorage areas not enforced, probably due to light traffic.

Pilots: Both port closed from 1700 hrs. to 0600 hrs. Ships observed shifting inside Pajaritos Basin up to sunset.

Pilot boards in good weather, 2 miles North of breakwater from orange steel hulled cutter (fairly slow), and leaves outside breakwater. In poor weather, pilot often boards and leaves just inside breakwater. Gangway/ladder combination compulsory for boarding in ballast condition. Pilots fairly competent.

VHF: Pilots: Channels 16 and 10, difficult to make contact at night. 'Pemex': Channels 16, 17 and 9 (0900 hrs. – 0000 hrs.). Agent (Ruiz): Channels 16 and 72.

Channel: Official entry draft for tankers/gas carriers in ballast is minimum 14 ft. forward and 24 ft. aft, but is not enforced.

Full speed is used passing through the breakwater heads, due to the swell and strong West to East cross current.

Beware of small fishing boats around the entrance. Leading lights, which operate 24 hours, are very conspicuous. Once inside the breakwaters, speed is reduced, but beware of the Rio Coatzacoalcos outgoing current, which in autumn can be up to 7 knots. Due to the river current, which causes erosion, the buoyage is not to be relied upon, buoys also drift off station, due to weed and logs striking them. In summer and autumn, a lot of weed is encountered in channel and Pajaritos Basin, engine intakes should be monitored.

Pilots report many ships 'blacking out' in channel. Channel to Pajaritos about 100 m. wide and dredged to 45 ft. Dredging constantly in progress by large dredger (Hang Jun 6002), which has very conspicuous spoil boom on top.

The minimum depth found was 14.3 m., just seaward of the breakwater heads, generally greater than 15.0 m.

Tugs: 7 tugs, which also serve Coatzacoalcos, are available. 5 'Pemex' tugs (4×2,000 h.p. tractor tugs, 1×4,500 h.p. supply type tug) and 2 British 'Cory' tugs on hire to 'Pemex' ('Yewgarth' and 'Strongbow', both 4,200 h.p.). Tugs lines used throughout. Tugs berth near 'Pemex' Control Tower.

Rescue/fire fighting ship 'Pemex 652' also on stand-by near Control Tower. Believe built for SBM moorings and offshore oil fields.

Berths: Pajaritos Basin consists of 4 piers (No. 1 – No. 4) with 8 berths, and depths of about 40 ft. for handling LPG, Ammonia and certain products. Berth No. 1 handles Ethylene and VCM.

Two berths (No. 5 and No. 6) handle crude and products, and have a depth of 45 ft., size up to approx. 100,000 d.w.t.

Berth No. 7 handles crude only, depth 45 ft.

Berth No. 8, marked on B.A. Chart No. 373 never constructed.

Berth No. 9 built to handle crude, but only used as a lay-by berth.

One fertiliser berth of 40 ft. depth. One fertiliser pier (2 berths), East and West 39 ft. depth with loading gantries.

Pier No. 2 is being reconstructed, due to heavy damage as a result of LPG ship fire.

Coatzacoalcos is for general cargo, except a chemical tanker berth with tankage positioned at the South end near the Naval Base. Berth position 18° 07.55′ N., 94° 25.05′ W.

Moorings: Always head in at all berths. Vessels generally moor with 3-2-2 at each end.

Difficulty experienced handling mooring wires. After back spring gets caught up on fenders, especially at Berths No. 3 and No. 4. We had to obtain diver to free wire. Mooring gang both ends.

Gangway: Difficult to land. At Berth No. 1, we used conventional gangway with plank from bottom platform to mooring dolphin. At Berth No. 3, B.O.T. type gangway from manifold to Chicksan platform.

Cargo: Ammonia through Anaconda hoses at Berths No. 1 – No. 4 (8 in. 150 ASA). VRL available at Berth No. 3 East and West. No VRL at Berth No. 1. Ammonia cold −32°C.

Rate generally 800 t.p.h., but possible up to 1,200 t.p.h. with 3 shore pumps. Little control on rate apart from stopping and starting pumps. Chicksans for LPG, reported to be 10 in. ASA 150. Ammonia 'First Foots' stop 2 hours – 2.5 hours.

Fresh Water: Available at all berths. Apply through agent. Reported to be of poor quality.

Agent: Tomas Ruiz most generally used, and from reports the most attentive. We found them to be helpful and obtainable on VHF. Arranged diver within one hour. Tomas Ruiz S.A., Tel: 921 2 01 17, 921 2 01 30, 921 2 95 42. Telex: 78820. Fax: 921 2 65 78.

General: In Winter months, port often closed for days, due to strong Northerly winds.

Diesel fuel available at all berths, except No. 7 and No. 9, and fertiliser berths.

Fuel oil only by barge. Order fuel several days in advance.

Boat service can be arranged at about U.S.$ 3.00 per person from piers to Coatzacoalcos.

Most services can be obtained.

A number of chandlers board on arrival. Fresh salad and vegetables reported to be good.

No security at piers, boats come and go at will. Security/stowaway search advisable on departure.

Nearest airport at Minatitlan, about 20 km. away, local service to Mexico City.

Formalities: All officials board with agent on arrival. No particular difficulties. Sometimes passports are checked, and if no U.S. visa, passport will be held for duration of ship's stay.

Shore leave possible, no passes required.

Negative Visaed Crew List now required.

Clearance last port.

1 Maritime Health Declaration.

4 Stores Lists – U.S. forms acceptable.

4 Bond Lists – U.S. forms acceptable.

6 Crew Lists.

2 Vaccination Lists.

Ship's Register and Derat Certificate sighted.

Customs Officer and officials do not remain onboard. Bond not sealed.

On departure, Immigration and agent board with pilot, and issue vessel with final Clearance.

AUTHORITY: Delegacion Coordinadora, Edificio Zona Franca, Antiguo Puertos Libres. *Tel:* 2-19-46 and 2-10-00.

Empresa de Servicios Portuarios, Edificio Zona Franca. *Tel:* 2-30-89 and 2-03-46.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 8711.

DOS BOCAS: 18.37 N. 93.10 W.

LOCATION: SBM No. 1, Lat. 18° 37′ 33″ N., Long. 93° 09′ 37″ W.
SBM No. 2, Lat. 18° 37′ 36″ N., Long. 93° 11′ 00″ W.

PILOTAGE: Compulsory. Pilot boards 2 miles N.W. or North of the SBMs. Accommodation ladder to be rigged 15 ft. above the water.

ANCHORAGES: North of SBMs in 20 fathoms.

The anchors should be secured with stoppers during loading and whilst manoeuvring.

MAX. SIZE: 250,000 d.w.t. Max. LOA 345 m.

VHF: Pemex on Channels 9 and 16.

TUGS: 1 tug available to make fast aft in an emergency. Tug keeps watch 24 hours on VHF Channels 16 or 9.

Mooring boats are only available for assisting with mooring, connecting, disconnecting the hoses and unmooring, no boat service available.

BERTHING: The terminal of Dos Bocas, Tabasco, Mexico, is equipped with 2 SBMs capable of loading vessels from 150,000 – 250,000 d.w.t.

The maximum LOA permitted is 345 m. (1,131 ft.) The maximum distance from bow to the ship's manifold is 183 m. (600 ft.) and the minimum distance is 149 m. (490 ft.).

SBM No. 1: Ships must have at the manifold 3 cargo connections each of 16 in. diameter (150 lbs.) with 1.4375 in. flange thickness (ANSI specifications) and should be able to receive Camlock connections.

SBM No. 2: Ships must have at the manifold 3 cargo connections each of 16 in. diameter (150 lbs.) with 1.4375 in. flange thickness (ANSI specifications) and should be able to receive Camlock connections.

The distance between centres of cargo connections must be at least 2,500 mm., and from cargo line to fuel line must be 2,000 mm. the min. distance from cargo manifold to the ship's side should be 4,600 mm.

The height from the centre of the cargo line to drip tray must be 900 mm., and to the deck 2,100 mm. maximum.

The height from deck to manifold will not be less than the height from deck to hose rail.

The cargo lines at the manifold must have one pressure gauge and drain valve.

The drip tray must be fitted with rounded edges to protect the hoses and must have Irving screen or similar.

The minimum S.W.L. of the booms should be 15 tons. The distance from deck to the top of the boom, not be less than 10 m. (33 ft.) in the working position.

The runner wire must have appropriate cargo hook.

Before vessel moors to the SBM, the boom has to be ready to work on the port side to lift the mooring equipment. The hoses will be connected on the same side.

The vessel must have 2 Panama leads forward with a minimum clearance of 600 mm. by 450 mm. with a distance between centres of 2.0 m. – 3.0 m. The vessel should preferably have AKD chain stoppers.

The minimum distance, from the Panama lead to the forward bitts should be not less than 2.7 m. (9 ft.) and not more than 8 m. (25 ft.).

The vessel has to supply a winch operator when vessel is mooring or connecting the hoses. In the event of mooring line damage the vessel has to provide lines as necessary.

Vessel will supply one messenger rope.

The terminal requests that vessel arrives with clean or segregated ballast.

Cargo and deballasting operations, must be planned in such a way that the vessel will be as close as possible to a safe draft for manoeuvring of the buoys in case of an emergency.

Vessels are requested to arrive with a trim not greater than 10 ft. by the stern.

The Loading Master and assistants have a portable walkie-talkie (VHF), to communicate with shore, however the vessels VHF set must also be available.

One of the riggers will be required to watch the deck from the wheelhouse for early warning of leaking or spillage and maintain communications with the shore terminal.

In the event of bad weather conditions, the Pilot may take the decision to stop the loading operations and take the vessel off the SBM. However, the Ship Master's responsibility will not cease.

Pilots, Loading Master and Mooring Personnel: When vessel moors, the Pilot, Pemex Loading Master and 10 riggers will board the vessel.

The vessel has to provide meals and cabins of officers standard for the Pilot and Pemex Loading Master. The riggers will have meals of crew standard. All will remain on board the vessel during all the loading operations.

The Loading Master is a Pemex representative and coordinates operations between shore and vessel and he has control of the operations. He will deliver to the Master or Chief Officer the cargo orders, the General Safety Regulations and the notice to avoid pressure surges. When Owners or Charterers and Pemex instructions disagree, agreement must be made prior to mooring.

On completion of loading operations the vessel will be disconnected from the buoy. Cargo calculations and clearance will be carried out whilst drifting or at anchor.

Tanks: 10 tanks for crude oil, each 500,000 barrels capacity.

DEVELOPMENTS: Project included supply port to service drilling rigs, petroleum port with 3 piers which will be able to load 12 vessels up to 60,000 d.w.t. simultaneously with liquid gas and petroleum products, 3 piers for loading crude carriers up to 100,000 d.w.t. and a container terminal.

SHIPMASTER'S REPORT: December 1984.

Shore Location: Lat. 18° 26.5′ N., Long. 93° 11′ W.

Sea Terminal: There are 2 SBMs 11 miles to the North.

SBM 1: 2 lines on port side of the ship, diameter 16 in.

SBM 2: 3 lines on port side, 16 in. diameter.

Documents: Customs Officer comes onboard with the Agent before mooring. Documents required:

Last Port Clearance.

6 Crew Lists with vaccination dates.

2 Passenger Lists.

2 Arms Lists.

3 Stores Lists.

3 Crew Personnel Effects Declarations.

Anchorage: See British Admiralty Chart No. 2626. Located between 5 miles and 10 miles to the North of the SBM. As it is not very good holding ground, pilots usually recommend a position to the N.W. 4 miles or 5 miles from the SBM, as less threatening in case of ship dragging (in Winter there may be Northerly gales).

Pilotage/Berthing: Before arrival call on VHF Channel 16 or 9 for Pemex Operations. Pilot boards at 1.5 miles West or N.W. of SBM with a tug bringing out mooring equipment and shore crew. The tug assists with mooring, then goes aft and passes a line to the poop. No berthing at night time.

Crude oil: Same as Rabon Grande. Loading rate 15,000 – 45,000 bbls.p.h.

Persons on board: During vessel's stay:

1 Pilot.

1 Loading Master.

1-2 Pemex representatives.

1 Inspector (Redwood, etc.).

9 or 10 crew required for mooring, connecting and loading watches (One man permanently on the forecastle deck and one on the bridge).

Repatriation: Crew changes may be arranged.

Shore Leave: It is not possible to have regular connection with the shore.

Ship Chandler: Available via pilot boat, but food very expensive.

SHIPMASTER'S REPORT: September 1985.

Location: The Pemex Oil Terminal at Dos Bocas consists of two SPMs.

Anchorage: Anchorage for vessels awaiting berth is centred on position Lat. 18° 45.25′ N., Long. 93° 10.5′ W., 7 miles North of the SPMs.

Documents:

5 copies Crew List.

Last Port Clearance.

2 copies Stores List.

2 copies Personal Effects Declaration.

1 copy Vaccination List.

Health: Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours prior to arrival.

(a) Vessel's name and nationality.

(b) Master's name.

(c) Total number of crew onboard.

(d) Last port.

(e) Port and date of issue of Derat Certificate.

(f) ETA local time (GMT – 6 hours).

Radio: Vessel is required to send its ETA and cargo requirements to the Agent and Petroleos Mexicanos at least 72 hours in advance and thereafter the ETA is to be updated 48 hours and 24 hours in advance of arrival.

Loading: The standard hose connections are 16 in. SPM No. 1 has 2 hoses and SPM No. 2 has 3 hoses. The average loading rate is 40,000 bbls.p.h. There are no facilities for receiving dirty ballast ashore and vessels must arrive with clean ballast.

Completion of documents: On completion of loading a further delay of about 2 hours is expected before cargo papers are finalised. The vessel may either anchor or drift in the vicinity until these documents are completed.

Accommodation: The Mooring Master, Loading Master, two Cargo Surveyors and 10 crew for handling hoses. They expect accommodation and meals to be provided.

SHIPMASTER'S REPORT: July 1987.

Anchorage Area: 1. 18° 42′ 30″ N. 93° 08′ 00″ W.
2. 18° 47′ 30″ N. 93° 08′ 00″ W.
3. 18° 47′ 30″ N. 93° 13′ 15″ W.
4. 18° 42′ 30″ N. 93° 13′ 15″ W.

Location of Buoys:
Buoy No. 1: Lat. 18° 37′ 35.2″ N., Long. 93° 09′ 57.29″ W.
Buoy No. 2: Lat. 18° 37′ 35.5″ N., Long. 93° 10′ 59.84″ W.

Arrival Draft: Vessel size 135,900 d.w.t. Initially required 20 ft. forward and 34 ft. aft. This was later changed to 18 ft. forward and 30 ft. aft and was finally changed to 16 ft. forward and 30 ft. aft.

Radio: Vessel used radio stations WLO and WDP. ETA advices to be sent to the Agent and PEMEX, 72 hours, 48 hours and 24 hours prior to arrival. Any changes in ETA should be notified to Agent and PEMEX immediately. PEMEX (Exports) Telex No. 1773171/1773671, PEMEX (Maritime Transportation) Telex No. 1773986.

Pre-Arrival Information: The following must be advised with the vessel's ETA:

1. Name of Master.
2. Number of crew and nationality.
3. Gross and nett tonnage.
4. Arrival draft, fore and aft.
5. Approximate departure draft, fore and aft.
6. Type and amount of ballast on board and time required for deballasting.
7. Derat or Exemption Certificate, together with date and port of issue.
8. To whom Notice of Readiness to be tendered (for Agent).
9. Type of cargo and amount required.
10. Last port of call.
11. Discharge port for present voyage.

All of the above information is required in order that vessel may obtain berthing date and export licence from PEMEX.

VHF: Initial communications with PEMEX prior to arrival was made on VHF Channel 16. When at the terminal, communications are made on Channel 9 (calling) and Channel 8 (working Channel).

Berthing: Mooring of the vessel is supervised by a Government pilot and a shore gang of 8 persons. The shore gang connect and disconnect hoses and are assisted by the ship's crew. Whilst the vessel is loading the personnel maintain a watch on the forecastle, manifold and bridge.

Accommodation is required for one pilot, one PEMEX representative, one inspector and 8 crew. Mooring is carried out with the assistance of one tug which remains with the vessel at all times while cargo operations are under way. One rope is required aft for the tug.

Cargo Information: Grades available: Isthmus Crude and Maya Crude. Vessel loaded Isthmus Crude API 34.4, temperature on board 32.5° C. and Maya Crude API 22.0, temperature on board 44° C.

3×16 in. hoses were connected and the loading rate was 50,000-55,000 barrels per hour.

The Bill of Lading figures were established on board when the vessel was clear of the SBM. The ship's ullages were used to obtain the figures. Taking of ullages and paperwork takes approximately 5 hours and is prepared jointly by PEMEX inspectors, independent inspectors and ship's personnel.

General: Documents required on arrival are those required at other Mexican ports. If vessel has no Mexican forms on board they will be filled in by Agent from the ship's documents.

Repairs: Immobilisation of the engine not permitted while vessel is at the SBM.

Stores: A small amount of stores are available.

ENSENADA: 31.51 N. 116.38 W.

RESTRICTIONS: *Access Channel:* Length 1,000 m. Depth 10.0 m.
VHF: Port Authority on VHF Channel 16.
BERTHING:

	Length (m.)	*Depth* (m.)
Coastal vessel quay	483.0	4.0 – 9.5
Deep sea quay	725.0	10.5

Storage: Warehouses 15,024 sq.m. Open areas 40,000 sq.m. Covered areas 30,789 sq.m.
BULK HANDLING FACILITIES: Conveyor belt for handling limestone. Suction units for handling bulk cargoes at high capacity. Mechanical means for discharging tuna and anchovies.
MEDICAL: Hospital services available.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Mechanical, electrical and electronic repairs possible.
DRY DOCK: Floating dock for vessels up to 1,400 tons displacement.
AIRPORT: International airport at Tijuana.
DEVELOPMENTS: Breakwater under construction.
AUTHORITY: Delegacion Coordinadora, Boulevard Teniente Azueta No. 101. *Tel:* 8.35.80 and 8.13.20.

Empresa de Servicios Portuarios, Teniente Azueta No. 224. *Tel:* 8.23.68 and 8.28.60.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, II D.F. *Tel:* 553.87.11.

GUAYMAS: 27.54 N. 110.52 W. (See Plan)

DOCUMENTS:
5 Crew Lists.
6 Passenger Lists.
5 Stowaway Lists.
1 Personal Effects Lists.
2 Stores Lists.
2 Provisions Lists.
2 Arms and Ammunition Lists (1 copy visaed).
4 Cargo in Transit Lists.
Ship's Official Documents.
Ballast Certificate.
Clearance from last port.
International Health Declaration.
Derat Certificate.
Manifest of Cargo for Discharge visaed by Mexican Consul (original and 5 copies).

PILOTAGE: Compulsory. Pilot available throughout 24 hours. Pilot meets vessel at Fairway Buoy.
ANCHORAGES: Good anchorage in the vicinity of the Fairway Buoy. Depth 14.5 m. Bottom mud.
RESTRICTIONS: *Entry Channel:* Length 3,500 m., width 75 m., depth 10.5 m.
HEALTH: Free Pratique available by radio on arrival.
RADIO: Guaymas Coast Radio, "XFY". Receives on 425, 454, 468 and 480 kHz. Transmits on 429 and 489 kHz.
VHF: Pilot and Port Authority on VHF, but communications not reliable.
TUGS: 1×2,250 h.p.
BERTHING:

	Length (m.)	*Depth* (m.)
East Quay	323	10.0
South Quay	350	11.0

Storage: Warehouses 4,800 sq.m., open areas 141,000 sq.m., covered areas 6,772 sq.m.
BULK HANDLING FACILITIES: The port has a specialised installation for the handling of dry bulk cargo, provided and operated by Almacenes Nacionales de Deposito S.A.

Characteristics: Warehousing capacity 68,000 tonnes. 36 silos arranged in 2 batteries. Conveyor belts permitting simultaneous filling of 4 holds of the vessel, with an absolute maximum rate of loading of 900 tonnes/p.h. Truck tipper. Hydraulic ramp for discharging road transport.

CARGO HANDLING FACILITIES: Loading and discharge of vessels is at the following rates:
General cargo – 22 tons/hr./hook (average).
Dry bulk cargo – 32 tons/hr./hook (average).
Bales of cotton: average handling rate 100 hr./hook.
Railroad and road transport up to alongside ship.

Vehicle ferries of Caminos y Puentes Federales de Ingresos, connect this port with La Paz and Santa Rosalia.

The port has equipment for handling all types of goods.

The Free Zone permits a more rapid transit of goods through the port, and a very great saving in Customs procedures.

Fumigation is provided for cargo, vessels, road and rail transport vehicles.

Lighting for night work permits work throughout 24 hours.

STEVEDORES: Working hours: 0800 – 1200 hrs. and 1400 – 1800 hrs.
MEDICAL: Doctors and hospital available.
TANKERS: Pemex Jetty – depth 10.0 m.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Mechanical, electrical and electronic repairs possible.
DRY DOCK: Slipway for vessels of less than 800 tons displacement (1,250 d.w.t.). Also see "General".
AIRPORT: International Airport in Guaymas, 10 km. from town.
GENERAL: *Shipyards:* This is an important industry in the port with five shipyards handling the construction of fishing vessels for tuna, sardines and shrimps, with technology of international prestige. There is a slipway for repair of vessels drawing up to 15 ft., with a 135 m. long underwater ramp.

The Rodolfo Sanchez Taboada industrial zone managed by the National Fund for Port Development was created to activate industrial development in the port, and started with promoting industries allied to fishing, there being currently two fishmeal processing plants, a fishing vessel shipyard, and it is planned to install 25 more industries and a shipyard for construction of deep draft vessels covering an area of 173 ha. This complex has asphalted roads, electricity and drinking water supplies.

LAZARO CARDENAS: 17.55 N. 102.10 W. (See Plan)

PORT LIMITS: Area within limits of anchoring described below. For "Arrived Ship", pilotage limits 1 mile to seaward from breakwaters.

DOCUMENTS:

7 Crew Lists.
2 Vaccination Lists.
1 Sanitary Health Declaration.
3 Stores Lists.
2 Personal Effects Lists.
Clearance From Last Port.
Voyage Memorandum, showing also Ship's Registry.
Derat Certificate and Cargo Gear Certificate regarding cargo.
5 Cargo Manifests.
5 Bills of Lading.

PILOTAGE: 24 hours advance notice through coastal station, addressed to "Puerto" Lazaro Cardenas, Mich. A VHF watch on Channel 16 is maintained Monday to Friday, 0800 to 1900 hrs. and at any time previously requested by ship's Agent. VHF range 45 miles. Pilot will board normally either at Sea Buoy (17° 53.1' N., 102° 09.6' W.) or at the anchorage, and at Master's request further out if required. In the event of heavy sea, vessel will be instructed accordingly via VHF.

ANCHORAGES: One mile West of Sea Buoy. Very good holding ground, care should be taken not to anchor on, or near leading line (304°) due to a submarine canyon with over 100 fathoms depths at 1 mile off the breakwater.

RESTRICTIONS: Vessels up to 200 m. LOA and up to 35 ft. salt water draft may enter or leave the port 24 hours a day, larger vessels or those with deeper draft only with daylight. Vessels with over 42 ft. salt water draft must wait for tide.

Access Channel: Length 1,400 m., depth 14.5 m.
Secondary Channel: Length 500 m., depth 14 m.
Turning Basin: 600 m. diameter and 14 m. depth.

HEALTH: Pratique can be granted by VHF radio. Automatic Pratique is granted when coming from another Mexican port.

RADIO: Radio Maritima Manzanillo "XFM" and Radio Maritima Mazatlan "XMA" are recommended coastal stations through which to route ETAs. Initial contact on 2182 kHz.

VHF: At port, 25 watt 45 mile range. Channels 6, 16, 26, 11, 12, 13 and 69. Initial contact to be made on Channel 16, manoeuvring on Channel 6, port operations on Channels 11, 12 and 13.

RADAR: No radar service available.

TUGS: 1 tug stationed permanently at port 1,900 h.p. twin-screw. Tug's lines used, no charge for lines. Vessels over 50,000 tons displacement should apply to Manzanillo for another tug through Agent.

BERTHING:

	Length (m.)	Depth (m.)
Metal and Mineral Quay	650	14
Container Quay	284	12
General Cargo Quay	504	9.7 – 9.4

Shore cranes and sometimes ship's gear used for steel products. Significant cargoes are steel structure, coke-breeze, pig iron and finished steel products, also grain and sugar.

CRANES: One container crane 40 tons lifting capacity is available. Clearance from boom to MLLW 31.2 m. Also 3×75 ton movable cranes (self-powered) can work anywhere on quay, 4 additional mobile cranes of 20 ton capacity are available.

BULK CARGO FACILITIES: There is a shore crane clam-bucket type 250 t.p.h. capacity capable of loading and unloading. Clearance from boom to MLLW 35 m. Conveyor belt system in operation.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 1 can handle containers and heavy lifts up to 40 tons. Berth No. 2 can handle bulk and ores.

BRIDGES: No bridges.

STEVEDORES: Agents will arrange for stevedores with Lazaro Cardenas Port Services Co.

MEDICAL: Advance notice required by Agents when medical assistance required, emergencies can be routed via VHF at pilot station (Channel 16). 2 hospitals and 2 clinics with a total of 40 beds available plus a new hospital with 50 bed capacity will accept seamen. Yellow fever and cholera vaccination desirable.

TANKERS: Mineral Wharf has 10 in. diameter lines to discharge fuel oil.

DENSITY: Highly variable, can range from 1024 in dry season to 1012 in rainy season.

FRESH WATER: Available. 3 in. pipe on Mineral Wharf (American standard thread), but is recommended to boil it for drinking purposes.

FUEL: No fuel available for vessels, only diesel of specific gravity 0.85 available in trucks.

FIRE PRECAUTIONS: Tankers should fit a good ground connection to quay and have 2 lines hanging fore and aft ready for emergency towing.

CONSULS: No consuls available at present.

REPAIRS: Small and medium size repairs can be done at the workshop of the steel works if previous advice sent to Agent and Port Services Company.

DRY DOCKS: No dry docks available.

SURVEYORS: Two independent surveyors available for draft surveys, on/off hire and damage, can be contacted through Agents.

GANGWAY/DECK WATCHMEN: Not necessary or recommended.

HATCHES: Normally done by crew members, or by stevedores at ship's request.

CUSTOMS ALLOWANCES: There are no regulations. It is according to the Master's judgement for his needs for the stay in the port.

CARGO GEAR: Normally done with ship's gear but shore cranes are available upon request. Heavy lift cranes up to 40 tons.

REPATRIATION: All facilities for crew changes.

AIRPORT: Zihuatanejo Airport, nearest 135 km. 5 daily flights to Mexico City with connections to all parts of the world.

TIME: GMT minus 6 hours.

HOLIDAYS: 1st January, 1st February, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when there is change of President

POLICE/AMBULANCE/FIRE: Police Tel: 2-0154. Ambulance Tel: 2-05-75. Fire Tel: 2-03-33 ext. 1020 and 1000

TELEPHONE: No shore connection available.

SERVICES: Only ship chandler and laundry.

SHORE LEAVE: Crew members allowed shore leave without any special permit.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: No special regulations.

DELAYS: No delays expected.

GENERAL: Salinity in basin and docks always changing and subject to tides and river flow, recommend taking at least 5 samples from keel to surface to get an adequate average of salinity.

DEVELOPMENTS: Fertimex Berth: Phosphate rock, length 509 m., depth from 12 m. to 14 m. 1 screw unloader with capacity of 600 t.p.h. for rock and sulphur and 500 t.p.h. for salt. The facilities were damaged by an earthquake in September 1985 and repairs underway.

Grain Berth: 250 m., depth from 12 m. to 15 m.; "L" shaped berth, outside 250 m., inside 210 m. with depth 11 m. Silo with capacity 80,000 tons nearing completion. Capacity of unloader 600 t.p.h.

AUTHORITY: Oficina de Operacion y Desarrollo Portuario. Unidad Administrativa S.C.T. *Tel:* 2-01-97, 2-17-79 and 2-01-24.

Port Services Company: Empresa de Servicios Portuarios, Rio Tepalcatepel No. 29, Lazaro Cardenas, Mich. Mexico. *Tel:* (Operations) 2-00-37, (Administration/Management) 2-17-22, 2-17-23, 2-20-64 and 2-20-65. *Telex:* 01772873 Cplcme.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico 11, D.F. *Tel:* 553-87-11.

MANZANILLO: 19.03 N. 104.20 W. (See Plan)

DOCUMENTS:

14 Crew Lists.
20 Passenger Lists.
Derat Certificate.
Vaccination Certificate for each crew member.
Cargo Manifest and one copy to be visaed.
8 additional copies of Cargo Manifest, unvisaed.
10 Bills of Lading, one copy to be attached to each cargo manifest.

PILOTAGE: Pilot station on VHF Channel 16, only keeps watch when vessel expected. Pilots are ordered by Agents basis Master's ETA.

Pilot boat is black with white wheel-house on which is painted letter "H". International Code signals used. Pilot normally boards vessel about 1 or 2 miles from breakwater but if requested in advance the pilot boat will come out to 5 or 6 miles. Pilot cannot board in rough weather. Vessels waiting for Pilot may anchor about 2 – 3 miles N.W. of breakwater in depths of 12-15 fathoms.

ANCHORAGES: Vessels may anchor in the whole North part of the Bay where depths are 12-15 fathoms at a distance of 1 – 2 miles from the coast.

RESTRICTIONS: Vessels may enter at any time day or night.

Access Channel: Length 450 m. Depth 12.0 m.

MAX. SIZE: No limitation for anchoring in the bay. For mooring alongside, max. length 200 m., max. draft 32 ft.

Also see "Tankers".

HEALTH: Port Health Officer and Immigration Officers board vessel at anchorage. Passengers and crew may be required for inspection.

RADIO: Coastal station Manzanillo Radio, call sign XFM, operating 0600 – 1800 hrs. local time.

VHF: See "Pilotage".

TUGS: 1 tug available, compulsory to use tug when mooring alongside. Tug will join vessel as ordered by the Pilot.

BERTHING: Old Port:

Name	*Length* (m.)	*Depth* (ft.)
Muelle Fiscal Quay		
East Side	230	36 (Outer end)
		16 (Inner end)
West Side	220	36 (Outer end)
		20 (Inner end)
Coastal Quay	305	13 – 20
Naval Quay	165	13 – 37

New Port:

1,092 m. of New Quays with depths 32 ft. – 36 ft. completed.
685 m. of new quay under construction, depth alongside 14 m.
Depth in channel and South End of Basin is 36 ft.

STEVEDORES: Advise Agent in advance number of gangs required. Discharge rate approximately 20 t.p.h. – 25 t.p.h. per gang.

MEDICAL: Agent should be advised in advance if medical attendance required on board. Hospital facilities available.

TANKERS: 2 berths available, max. length 650 ft. No restriction on beam. Max. draft: N.E. side 31 ft. (Forward) and 38 ft. (Aft). S.E. side 33 ft. (Forward) and 38 ft. (Aft).

New Pemex Jetty: Located on the inner side of the west breakwater. "T" shaped berth with length of Approx. 110 m. on outer side. Depth alongside 52 ft. (inner) and 64 ft. (seaward end). 8 cargo arms available.

FRESH WATER: Should be ordered in advance. Rate of 10 t.p.h. Vessels must furnish own hose for pumping, 2 in. coupling. No barges available for delivery at anchorage.

FUEL: Should be ordered in advance. All grades available. May be expensive due Customs fees.

CONSULS: Nearest are at Colima and Guadalajara.

REPAIRS: Only repairs to auxiliary machinery can be effected with permission. At Guadalajara hull repairs may be effected provided dry dock not required.

GANGWAY/DECK WATCHMEN: No shore service available.

OPENING/CLOSING HATCHES: Normally performed by crew members.

CUSTOMS ALLOWANCES: Each crew member may retain 1 carton of cigarettes, and 1 bottle wine/spirits for his own use. No alcohol may be taken ashore.

REPATRIATION: Can be arranged.

AIRPORT: Local airport only for internal traffic.

TIME: GMT minus 6 hours all the year round.

HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.

POLICE/FIRE/AMBULANCE: Police Tel: 4; Fire Tel: 23; Ambulance Tel: 96.

TELEPHONES: Cannot be connected on board ships.

SHORE LEAVE: Permitted, except for crews of Russian, Cuban and Communist Chinese vessels.

Crew members left behind by vessel must be covered by 10,000 Pesos bond to guarantee repatriation expenses.

IDENTIFICATION CARDS: Not required. A Crew List should be left at the gate for checking crew.

DEVELOPMENTS: Improvements are in progress to accommodate vessels up to 30,000 tons with a draft of 40 ft.

Shipmaster's Report: December 1984. A new port is under construction in Laguna de San Pedrito close East of the Old Port. There are already piers to accommodate 4 medium size vessels, and cement poles are being rammed all around the Lagoon, also dredgers are dredging the Lagoon to an expected depth of about 14 m.

AUTHORITY: Delegacion Coordinadora, Teniente Azueta – S/No., Port Operation Buidling. *Tel:* 2-07-89 and 2-00-04.

Empresa de Servicios Portuarios, Fraccionamiento Plaza Azul, Lote 9. *Tel:* 2-12-54 and 2-13-72.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, II D.F. *Tel:* 553 87 11.

MAZATLAN: 23.11 N. 106.26 W.

DOCUMENTS:

Port Clearance from previous port.
4 Stores Lists.
12 Crew Lists.
2 Passenger Lists or "Nil" Passenger List.

(All to be stamped by Mexican Consul or a representative of a friendly country).

On arrival the following officials board:

Port Health Authority.
Customs.
Agricultural Department Authority for checking ship's provisions, mainly vegetables.
Doctor for checking 'meat' in the fridge room.
Immigration.
Ship's Agent.
Port Authority representative.

The (provisions) meat room is sealed after inspection by the doctor; every morning the seal is broken and resealed after the day's provisions are taken out.

PILOTAGE: Pilots can be contacted on VHF Channel 16. Pilots board in position Lat. 23° 10′ 24″ N., Long. 106° 26′ 24″ W. with Creston Island Light bearing 116° (T) × 0.4 miles.

APPROACHES: The approach is clear with no obstructions except Piedra Negra Rock which is just 7 ft. above the water. Vessel should head for Creston Island Light, keeping at least 2 cables clear of Piedra Negra Rock.

ANCHORAGES: *Shipmaster's Report:* Anchorage is not in the position marked on the British Admiralty Chart. I was told about this by the Pilot when he boarded. The anchorage is now shifted and a vessel should anchor East of a line drawn North/South through the Eastern tip of Island Chivas, East and clear of Piedra Negra Rock but outside the 10 fathom line. The holding ground is not good. Creston Island Light is a very powerful light, but its characteristic is now Fl. white every 8 sec. and not as marked on the chart.

RESTRICTIONS: *Access Channel:* Length 1,500 m. Depth 10 m. *Secondary Channel to Fishing Port:* Length 1,400 m. Depth 7 m.

RADIO: Mazatlan has a coastal radio station but only works on medium frequency.

VHF: See "Pilotage."

TUGS: Only 1 tug is available, if a second tug is required it has to be called from another port.

BERTHING:

	Length (m.)	*Depth* (m.)
Main Quays	981	10
Ro/Ro Berths	2 berths	10

STEVEDORES: Gangs work from Mondays to Saturdays from 0800 to 1700 hrs. Any work after 1700 hrs. till 0700 hrs. next day and from 1700 hrs. on Saturday till 0700 hrs. Monday is overtime. Cotton bales are loaded at the rate of 85 to 90 bales per hour per gang. The bales stow at 29/30 cu.ft. per bale.

MEDICAL: Assistance available.

TANKERS: Max. draft 29 ft. and LOA 590 ft., however tankers of 629 ft. LOA have discharged.

FUEL: Can be supplied, but has to be arranged in advance through PEMEX (Petroleos Mexicanos) office in New York. Diesel oil is normally supplied by trucks.

FRESH WATER: Can be obtained at any time and is supplied by hoses (ship's hoses) from the quay at about 9 Pesos per ton.

REPAIRS: Workshop for mechanical repairs. Electrical and electronic repairs possible.

DRY DOCK: Shipyard and slipway for small vessels.

REPATRIATION: Can be arranged via Mazatlan Airport or Mexico City.

TIME: GMT minus 7 hours throughout the year.

AIRPORT: International Airport.

STORES: Provisions are available, however it is difficult to get a variety and frozen vegetables are not available.

IDENTIFICATION CARDS: Not required, crew can go ashore, there are no restrictions, but all Passports and Seamen's Books are kept in the custody of the Master.

SHIPMASTER'S REPORT: December 1978.

Pilotage: Pilot compulsory. Pilot boards 1.5 cables off the South breakwater. ETAs and amendments to be sent as soon as possible after leaving previous port.

Restrictions: Vessels can enter and leave day and night. However, they can only sail on the flood tide. Tidal range approximately 3 ft.

Tugs: Tugs available but power not known.

VHF: Pilot, Port Authority and Agent on Channel 16.

Services Available: Fresh water (must be boiled for drinking). Fresh provisions. Airport (3 miles from city). Salvage Surveyor. Laundry service. Bunker fuel oil. Doctor and Hospital. Groceries and meats.

Density: 1020.

Charts: U.S. Chart 21301. B.A. Chart 3060.

Ship Anchored: 4 cables S.W. of Cerro del Creston Light in dense morning fog, depth 13 fathoms.

Pilot Boat: Low power, black hull with white superstructure, only came out to ship when the fog cleared. Requested first a gangway to board but afterwards changed his mind for a pilot ladder in view of a slight swell. Pilot boat also handled the ship's mooring lines at the berth.

Breakwater: Quite narrow to pass through.

Buoys: Mostly all covered in guano.

Berth No.3: As there was a bulk carrier on the next berth the ship had to overhang the berth by approximately 12 m. However there were bollards on shore away from the quay to provide suitable leads for stern lines. The quay was low, lying approximately 3 m. above the water with 1 m. maximum rise and fall of tide.

Note: Admiralty Tide Tables do not give any data for this port other than its range. U.S. tide tables give all required information.

Depth of Water: Average depth after sounding round hull was approximately 9.5 m., shallowest depth 8.5 m.

Officials: There is a Customs and Police gate on the quay.

Cargo Work: The ship loaded from refrigerated road trucks. The labour set their own derricks and took out the beams and plugs. However, it was over two hours before the first sling came onboard. Meal breaks were long necessitating the covering of open decks with plastic sheets to keep the cold air in. The cargo was not stowed very well, most of it was very crooked with large gaps between the deckhead and cargo. Gross hourly cargo rate is approximately 8 t.p.h.

Pilfering: There did not appear to be much pilfering. Keeping the offshore doors and the store rooms locked is a good precaution.

Early Morning Fog: On two mornings we had fog, clearing between 1030 and 1200 hrs.

Fresh Water: Available alongside the berth, appears to have no meter on it and we had to use our own hose and coupling. However pipe was left connected and we could top up whenever required.

Painting: No objection was made to painting the ship's side from a painting punt.

Lifeboat: Starboard lifeboat was used for a trip to the beach, boat however should not be landed because of the heavy swell.

SHIPMASTER'S REPORT: August 1979.

Navigation: Best chart is American. U.S. Chart No. 21301.

Anchorage: Recommended position with Cerro del Creston Lighthouse bearing 310° distant 2 miles in approximately 10 fathoms.

Approach: Straightforward but note that the small island off harbour entrance (Piedra Island) is often unlit.

Communications: Mazatlan Radio (XFL) has a range of 2,000 miles.

VHF: Pilots have Channel 16, also tugboats.

Pilots: Compulsory, board at anchorage or about 1 mile from breakwater entrance. Use a variety of craft. Board via pilot ladder.

No large ship movements permitted at night or during strong tidal streams.

Ro-Ro ferries, which also take Pilots in and out, have priority at all times.

Tugs: 1 only, low powered.

Draft: Presently restricted to 30 ft. salt water.

Cargo Facilities: Discharged 18,100 tons bulk soya bean in 10 working days. Discharge rate very dependent on transport and truck (rail) availability. 24 hour working with 6 gangs into hoppers. All grain type cargoes from South America must be fumigated if loaded onto road trucks, this takes approximately 2 days. Ship's gear usually used for cargo operations.

Authorities: Require the following in addition to ship's certificates:

12 Crew Lists
12 Passenger Lists
2 Crew Effects Lists
Crew Passports
6 Stores Lists.

The meat store of the vessel may be sealed if the Government Inspector considers that the meat is from an unsuitable country.

Repair Facilities: Minimal, mostly involved with the upkeep and repair of very large fishing fleet.

Surveyors: Nil – Nearest ABS Surveyor is in Mexico City 350 miles away, but will attend at two days' notice.
Medical: Good local facilities with English speaking staff.
Provisions: Excellent fruit, fish and vegetables. Meat of poor quality and expensive.
Hatches: Mechanical hatches operated by crew. Essential to have adequate crew available at night in rainy season (August to October) while working cargo at night.
Watchmen: Not required or compulsory. Little thieving experienced.
Laundry: Excellent quality and price.
Cash: Both Mexican pesos and U.S. Dollars available.
Time: GMT minus 7 hours.
Repatriation: Several flights daily from local airport direct to Southern and Western U.S.A. airports. This avoids having the Agents post a 'bond' if travelling via Mexico City.
Agents: Most have telex, either via Mexico City or direct international. Telephoning overseas reasonably efficient. Mail services 7 days to Europe.
Fresh Water: Available at piers – should be chlorinated prior to use.
Bunkers: Only diesel oil available – sole supplier Government owned 'Petromex'.
Shore Labour: Not available as heavy port congestion at present.
General: Mazatlan is one of the largest ports in Mexico, 6 berths and is also a large resort with excellent hotels and large numbers of tourists. It is also the largest fishing port on the West coast of Mexico.

Port delays – Bulk carriers 4 days.
– General cargo ships 2 days.

(As at mid August) – this could change for the worse once the rainy season starts.

AUTHORITY: Delegacion Coordinadora, Av. Miguel Aleman 120-Oriente, Desp. 2. *Tel:* 1-69-45.

Empresa de Servicios Portuarios, Av. Emilio Barragan y Vicente Guerrero, Recinto Portuario. *Tel:* 2-02-78 and 2-38-11.

Comision Nacional Coordinadora de Puertos, Cuenavaca No. 5. Mexico, 11 D.F. *Tel:* 553 87 11.

MINATITLAN: 17.54 N. 94.35 W.

DOCUMENTS: See "Coatzacoalcos".
PILOTAGE: See "Coatzacoalcos – Pilotage". Port about 17.5 miles up-river from Coatzacoalcos. Vessels are piloted either up-river or down-river to and from Minatitlan.
ANCHORAGES: Only at Coatzacoalcos. At Minatitlan river is narrow and anchorage not permitted.
RESTRICTIONS: Vessels may enter harbour only in daylight. Latest time for entry and sailing to and from Minatitlan is 1500 hours.

Access Channel: Width 70 m. Depth 7 m.

Manoeuvring Basin: 850 m. × 190 m. Depth 7 m. – 11 m.

MAX. SIZE: Max. LOA at Pemex berths: 475 ft. Max. LOA at Fiscal berth: 440 ft. No breadth restrictions at both. Max. draft permitted: 21 ft. in fresh water.
HEALTH: Pratique never given by radio. Vessels granted Pratique at anchor at Coatzacoalcos. Vessels must prepare accommodation ladder, to be boarded by port authorities.
TUGS: 1 tug required to accompany vessels past the Coatzacoalcos Bridge. Tugs rejoin vessels in the river on arrival at berth. Tug's lines used. For vessels over 2,000 g.r.t. 1 tug required; over 3,000 g.r.t. 2 tugs required.
BERTHING: Normally vessels dock starboard side to. Petroleos Mexicanos (Pemex) has 8 berths for tankers, where they can load crude, fuel oil, gasoline, benzene, xylene, metaparaxylene, toluene and other petroleum derivates. Fiscal berth has a length of 73 m. depth alongside of 7.5 m. Actually only used to discharge harmless bulk fertilisers. Discharge performed by elevator at a rate of 800 tons per 24 hours, also by ship's gear using buckets at a rate of 200 tons per day per hatch.
BRIDGES: See "Coatzacoalcos – Developments".
STEVEDORES: No ETA advice necessary. Agent of Receivers of cargo order gangs to discharge. Straight working hours from 0700 to 1500 Mondays through Saturdays. Latest time to order gangs 0645 and 1445 hrs.
MEDICAL: Hospital facilities available.
TANKERS: No ballast to be discharged in the river. All ballast to be discharged to shore tanks through 2×6 in. pipe-lines.

PEMEX No. 1 Marginal Berth:
Location 78 m. downstream from the South Face of the Lazaro Cardenas Refinery.
Arrangement: Marginal.
Length: 34 m.
Width: 12.4 m.
Useful Berthing Length: 34 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX No. 2 Marginal Berth:
Location: Immediately after Berth No. 1.
Arrangement: Marginal.
Length: 103 m.
Width: 9 m.
Useful Berthing Length: 103 m.
Height Above Average Low Tide: 3.43 m.
Depth: 3.5 m. at Average Low Tide.

PEMEX Quay No. 3:
Location: 507 m. downstream from the South Face.
Arrangement: T Shaped.
Length: 12.5 m.
Width: 4.6 m.
Useful Berthing Length: 12.5 m.
Height Above Average Low Tide: 3.6 m.
Depth: 8.5 m. at Average Low Tide.
Services: Drinking water, 13 product loading and discharge lines.

PEMEX Quay No. 4:
Location: 667 m. from the South Face.
Arrangement: Pier.
Length: 17.9 m.
Width: 14.8 m.
Useful Berthing Length: 37.8 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 4 m.
Depth: 9.4 m. at Average Low Tide.

PEMEX Quay No. 5:
Location: 824 m. downstream from the South Face.
Arrangement: Pier.
Length: 21.5 m.
Width: 15.6 m.
Useful Berthing Length: 31.6 m. with the aid of 2 Dukes of Alba.
Height Above Average Low Tide: 3.7 m.
Depth: 3.6 m. at Average Low Tide.

PEMEX Quay No. 8:
Location: 1,063 m. downstream from the South Face.
Arrangement: Marginal.
Length: 91.7 m.
Width: 6.1 m.
Useful Berthing Length: 91.7 m.
Height Above Average Low Tide: 3.9 m.
Depth: 1.5 m. at Average Low Tide.

PEMEX Quay No. 9:
Location: 1,178 m. downstream from the South Face.
Arrangement: Marginal.
Length: 240 m.
Width: 29.1 m.
Height Above Average Low Tide: 3.73 m.
Depth: 3.1 m. at Average Low Tide.
Services: Track for mobile crane, bitts, lighting and water (fresh), gas feed points.

Tanks: Tanks which PEMEX has within the General Lazaro Cardenas Refinery.

No. of Tanks	*Content*	*Capacity Millions of Litres*
10	Wax Crude	108.3
1	Non-wax Crude	5.3
10	Petrol	93.2
11	Diesel	94.7
7	Primary Paraffin	32.3
7	Turbosine	12.8
9	Fuel Oil	90.2
5	FR-3 Asphalt	20.3
11	Hexane Aromatics	8.8
2	Heptane Aromatics	0.9
1	Betolime	0.7
20	E. Benzine	13.1
7	Toluene	8.3
9	Xylene	6.8
2	Aromine	1.5
4	F.C.C. Catalytic	19.4
2	Heavy Aromatic	2.3
1	Reformed Naphtha	6.5
2	Formed Wood Spirit	11.6
1	Poli Gasoline	1.7
1	Refined	7.3
1	Primary G.	7.3
4	Absorption Liquid	7.6
3	Recuperated Oil	21.8
8	Neutral Lubricants	5.2
17	Finished Lubricants and those in preparation	2.2
9	Finished Lubricants and those in preparation.	1.5
11	Balance Tanks	81.0

DENSITY: Averages 1006.
FRESH WATER: Available at all berths, but is not recommended.
FUEL: Marine diesel oil and Bunker "C" obtainable at Pemex berths. Bunker "C" also obtainable by barge, and diesel oil only by tank truck.
REPAIRS: No dry docks available, but small repairs can be done in shore repair shops.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards remain on vessel while alongside.
AIRPORT: About 15 minutes' car drive away. Regular flights to Mexico City.
TIME: GMT minus 6 hours.
TELEPHONES: No facilities for placing telephones on ships.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.
AUTHORITY: Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

MORRO REDONDO, Cedros Island: 28.03 N. 115.11 W. (See Plan)

LOCATION: Morro Redondo: Bulk Salt Terminal Lat. 28° 10′ N., Long. 115° 11′ W.

DOCUMENTS:

3 Crew Lists in Spanish, visaed by Mexican Consulate in previous port.
12 Ordinary Crew Lists.
3 Stores and Provisions Lists.
3 Lists of Crew Effects.
1 List of Crew Vaccinations.
Clearance from Last Port.
Certificate of Registry.

The Authorities such as Port Health, Customs and Immigration together with the Agent will board after the vessel has berthed. Only in exceptional circumstances will the Authorities board at anchor or off the berth.

PILOTAGE: Pilotage available day and night. Pilot arranged by Agent on the basis of ship's ETA. Pilot boards when ship is within 1 to 3 miles of the berth, from a small MFV type pilot launch, painted black with white cabin and red deck. No radio.

ANCHORAGES: Good holding ground is found 1 – 3 miles North of the berth in 20 to 35 fathoms with the ship loading tower in line with the Morro Redondo Lighthouse.

RESTRICTIONS: None. Vessels enter and clear 24 hours a day on a first come first served basis. Height of chute above MLLW is 48 ft.

MAX. SIZE: Minimum depth alongside 17 m. Largest ship to date 160,000 d.w.t.

HEALTH: Pratique granted by Port Health Doctor who boards on arrival. Requires Crew Vaccination Certificates and Master's Declaration of Health.

RADIO: Vessels can transmit and receive through KFS San Francisco Radio or KOK Los Angeles Radio.

VHF: Loading installation calls VHF Channel 16 when ship is expected and gives any information at this time. VHF is normally manned on Channel 12 so further communication is available.

RADAR: None.

TUGS: 5 tugs are available ranging from 2,500 h.p. to 3,200 h.p. each. 2 tugs are normally used for berthing, 1 tug for unberthing. Tugs' lines at no extra charge.

BERTHING: 1 berth only, 710 ft. in length consisting of steel dolphins and wood facings, also large mooring buoys, 1 ahead and 1 astern, each about 600 ft. distance from berth. 2 mooring ropes must be bent together to reach buoys.

The large stockpile of salt at the root of the pier is conspicuous.

CRANES: None.

BULK CARGO FACILITIES: Port is solely for the purpose of loading solar salt in bulk. Loader is belt and spout type and is fixed in position. Vessel must be shifted from hatch to hatch by ship's crew.

STEVEDORES: No special requirements. Average loading rate 2,000 t.p.h.

MEDICAL: No advance notice required, doctor will attend on board at dock. Limited hospital facilities available.

DENSITY: 1026.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: No smoking allowed on dock.

CONSULS: None.

REPAIRS: No repairs possible.

GANGWAY/DECK WATCHMEN: Shore gangway only, electrically operated and tended by stevedores. Deck watchmen required.

HATCHES: Opened and closed by ship's crew.

CARGO GEAR: One fixed loader only, controlled by stevedores.

REPATRIATION: Possible, with advance notice to Agent.

AIRPORT: Close to berth. Average 3 flights per week to mainland.

TIME: Standard time GMT minus 8 hours. Daylight saving time GMT minus 7 hours from last Sunday in April to last Sunday in October.

HOLIDAYS: Cargo is worked every day of the week including Sundays and holidays (except Labour Day – 1st May).

TELEPHONES: No telephone contact with mainland.

TELEGRAPH: Government public telegraph services available in village about 11 km. from port.

SHORE LEAVE: Allowed. No special shore passes required.

AUTHORITY: Exportadora de Sal, S.A. de C.V., 7120 Via de la Amistad, Otay Mesa, CA. 92073, U.S.A. Postal Address: P.O. Box 73054, San Ysido. CA. 92073. *Tel:* (619) 661-6750. *Telex:* 69 7829. *Cables:* Essas San Diego. *FAX:* (619) 661-6989. *Contact:* Mr. Manuel Guzman, General Coordinator, Purchasing and Traffic.

There is no telephone or telex on Cedros Island.

NANCHITAL: 18.00 N. 94.27 W.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: See "Coatzacoalcos Pilotage". Port about 3 miles up-river from Coatzacoalcos.

ANCHORAGE: See "Coatzacoalcos Anchorage".

RESTRICTIONS: Vessels may enter Coatzacoalcos only with daylight. Navigation from Coatzacoalcos to Nanchital remains closed from 1630 hrs. to 0700 hrs.

HEALTH: See "Coatzacoalcos".

TUGS: When vessels proceed to Nanchital, 1 tug accompanies vessel to pass the Coatzacoalcos bridge, according to Port Regulations. Tugs again join vessels when arriving at Nanchital berths. Tug's lines used. For vessels over 4,000 g.r.t. 2 tugs used.

MAX. SIZE: Max. LOA 580 ft. No breadth restrictions. Max. draft permitted 27 ft. 06 in.

BERTHING: Normally vessels dock port side alongside. When current and circumstances permit vessel is turned around and docked starboard side to. There are 2 docks at Nanchital, called Old Pier and New Pier. Both to load crude oil, No. 6 fuel oil by pipe-line of 6 in. and up to 10 in. Mooring, unmooring, connecting and disconnecting hoses performed by Pemex own labourers.

Old Pemex Quay:

Location: Right bank of Rio Coatzacoalcos 10.5 km. from the mouth of the port.
Built: 1950.
Arrangement: T-shaped.
Length: 88.3 m.
Width: 12.4 m.
Useful Berthing Length: 95 m. including Dukes of Alba.
Height Above Average Low Tide: 1.8 m.
Useful Depth: 8 m. at average low tide.
Services: Fresh water, lighting, bollards, fuel supply points.

New Pemex Quay:

Location: Facing the Pemex installations at Nanchital.
Built: 1969.
Arrangement: T-shaped.
Length of Platform: 32.4 m.
Width of Platform: 13 m.
Useful Berthing Length: 86.7 m. using 2 Dukes of Alba.
Height Above Average Low Tide: 2.71 m.
Depth: 9 m. at average low tide.
Services: Fresh water, lighting, fuel supply points, loading hoses.

Marginal Quay:

Location: On right bank of Rio Coatzacoalcos 11 km. upstream from port entrance.
Built: 1959.
Arrangement: Marginal.
Length: 239 m.
Width: 30 m.
Useful Berthing Length: 239 m.
Height Above Average Low Tide: 2.05 m.
Depth: 8 m. at average low tide.
Use: By Pemex.

Tanks: Used by Pemex:
3 for crude oil (8.2 million litres).
1 for fuel oil (15.2 million litres).
Located within inhabited area:
2 for diesel (1.59 and 8.7 million litres).
1 for fresh water (10.3 million litres).

MEDICAL: Hospital facilities available only at Coatzacoalcos.

TANKERS: See "Berthing".

BALLAST: Special regulation for tankers that no ballast water to be discharged in the river. Deballasting performed by 2 pipe-lines of 6 in. diameter to shore tanks.

DENSITY: Average 1006.

FRESH WATER: Available at both berths but is not recommended for drinking.

FUEL: Available only at the Pemex Oil Terminal at any time.

CONSULS: None.

REPAIRS/DRY DOCKS: No dry docks available, but small repairs can be done in shore repair shops.

CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards stay on board. Vessel to provide them boarding and lodging.

AIRPORT: At Minatitlan, about 1 hour car drive away. 2 regular flights to Mexico City.

TIME: GMT minus 6 hours.

TELEPHONES: No facilities for placing telephones on ships.

DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.

AUTHORITY: Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

PROGRESO: 21.17 N. 89.39 W.

PORT LIMITS: For port fees and freight contracts, port limits are considered as a zone within the area bounded by the meridian crossing Chicxulub port in the East, the meridian crossing Chelem port to the West, and the meridian passing through the Entrance Buoy (cylindrical beacon, painted with red and white stripes) situated in Latitude 21° 21′ 03″ N., Longitude 89° 41′ 09″ W.

DOCUMENTS:

7 copies of Crew List, visaed by Mexican Consulate.
6 copies of Ship's Stores List.
6 copies of Personal Effects Declaration.
6 copies of Bills of Lading.
Clearance from last Port.
Derat Certificate.
Tonnage Certificate.
Safety Certificates.
Loading Plan.
Stability Calculations.

PILOTAGE: Compulsory. The Pilot boards at the Entrance Buoy, his launch is identified by the international signal code day or night. Approximate arrival time must be notified by the consignee at least 24 hours before arrival, and confirmed 2 hours prior to arrival. Pilots monitor VHF Channel 16, and Telephone No. (993)-5-00-09, during office hours (0800 hrs. – 1800 hrs.)

ANCHORAGES: 1.5 miles N.W. of the Entrance Buoy in 30 ft. depth for vessels with over 20 ft. draft, and 2.5 miles N.W. of Pier No. 2, for vessels of 16 ft. draft or less, in 21 ft. depth.

RESTRICTIONS: There are no night time restrictions, except for vessels of over 16 ft. draft at Piers No. 1 and No. 2, and over 23 ft. draft at Piers No. 3 and No. 4.

MAX. SIZE: No restrictions, except for vessels over 23 ft. draft.

HEALTH: A representative of the Health Department checks the vessel on arrival.

RADIO: Progreso Coastal Radio Station (XFN) listens from 0600 hrs. to 1900 hrs. local time on 2182 kHz, Channel 16 VHF and 500 kHz. Arrival advice may be sent through the station 24 hours beforehand.

TUGS: Compulsory for vessels over 500 g.r.t. The port has 4 tugs, 2×800 h.p., 1×1,350 h.p. and 1×2,350 h.p.

BERTHING: The facilities are located 2 km. offshore in position 21° 18.25′ N., 89° 40.3′ W., and 6.5 km. offshore in position 21° 20.75′ N., 89° 40.7′ W.

Pier	*No.*	*Length* (m.)	*Official Draft* (ft.)	*Use*
Fiscal	1	204	16	Grain
Fiscal	2	204	16	General cargo
Fiscal	3	240	23	General cargo
Fiscal	4	140	23	Containers
Mooring Berth	1	170	16	Gasoline
Mooring Berth	2	170	18	Diesel (Pemex)

CARGO HANDLING EQUIPMENT:

4 Platforms for containers.
1×80,000 lb front loader.
1×120 ton crane.
2 hydraulic cranes of 40 tons each.
2 forklift trucks (2.3 tons) for stacking and unstacking.
1×36.3 ton forklift for container handling.
1 rail tractor.
4 truck-tractors.

Equipment for agricultural grains, consisting of liquid transfer machine, elevator, 4 chutes, bands and 11 suction devices.

STEVEDORES: Service to be requested 24 hours in advance through consignee.

MEDICAL: Medical attention available at the port. There are hospitals in the city of Merida, 32 km. away.

TANKERS: There are 2 moorings or buoys, for unloading products with 8 in. and 12 in. lines.

DENSITY: 1015.

FRESH WATER: Safe drinking water available on piers through 2.5 in. pipes, or by tank trucks.

FUEL: Diesel can be supplied by truck, as well as grease and lube oil in drums. They should be requested 24 hours in advance by the consignee. Heavy fuel cannot be supplied.

WATCHMEN: These services are usually undertaken by vessel's personnel.

OPENING/CLOSING HATCHES: Usually performed by vessel's crew.

CERTIFICATES: See "Documents".

CUSTOMS ALLOWANCES: A carton of cigarettes and 2 bottles of whisky per week.

IDENTIFICATION CARDS: Not required.

CONSULS: Located at Merida, 30 minutes by road.

Cuba	Tel: 91-99-21.26.77
Germany F.R.	21.21.77
France	21.60.13
Lebanon	21.77.76
Switzerland	91-99-21.75.00
U.K.	21.67.99
U.S.A.	21.60.30

REPAIRS: Specialised shops can undertake repairs.

SURVEYORS: Lloyd's Register Agent: Manuel Mier y Teran. Tel: 91-993-5-00-29, 5-00-42 and 5-01-36. Fax: 50966. Telex: 753834 Reimme.

DRY DOCKS: Three docks (Astimex, Zena and Bonanza).

REPATRIATION: Possible.

AIRPORT: 37 km. from port, about 30 minutes driving time. Daily flights to Miami and New Orleans by Pan Am, also flights to Central America, Jamaica, Germany, and connections via Can-Cun and Mexico City.

TIME: Central Standard Time (local time) GMT minus 6 hours.

POLICE/AMBULANCE/FIRE: Port Police, Tel: 5-00-48 and 5-00-90.
Ambulance, Tel: 5-04-94 (Navy Hospital).
Firemen and Municipal Police, Tel: 5-00-26.

EMERGENCY CO-ORDINATION CENTRE: Ninth Naval Zone (Yukalpeten Port) monitors VHF Channel 70, 2182 kHz and 500 kHz. Tel: 5-02-85.

SERVICES: Repairs to radar, Loran, echo sounders, gyros (any electronic device), inspections and underwater repairs.

HOLIDAYS: January 1st, February 5th, March 21st, May 1st and 5th, June 1st, September 16th, November 1st and 2nd, December 1st (every 6 years), December 25th. It is possible to hire labour at 100% increase on these days.

SHORE LEAVE: No restrictions.

AUTHORITY: Direccion General de Marina Mercante, P.O.Box 21, Calle 78 No. 146, 97320 Progreso, Yuc., Mexico. *Tel:* 5-00-90 and 5-12-55. Residence 5-01-08. *Contact:* Captain Gilberto Andrade Castro, Captain of the Port.

PUERTO MADERO: 14.44 N. 92.25 W. (See Plan)

PORT LIMITS: A vessel is considered an "arrived ship" when it is alongside the berth.

DOCUMENTS:

10 Crew Lists (Spanish language), 3 stamped.
10 Passenger Lists (Spanish language) 3 stamped.
10 Stores Lists (Spanish language).
10 Cargo Manifest (Spanish language), 3 stamped.
3 Arrival Reports.
10 Bills of Lading.
3 Crew Customs Manifests.
1 W.H.O. Form.

All papers must be correct, Immigration Officer checks Crew List against all Passports/Seaman's Books.

Vessels are boarded on arrival by 7 officials.

PILOTAGE: Compulsory. Pilot will board vessel 1 mile S.E. of Fairway Buoy, depth approximately 8 fathoms.

Vessel must send ETA 24 hours in advance of arrival. Ship's Agent to request services of Port Pilot in advance. Pilot will reply by giving instructions to be followed on arrival.

ANCHORAGES: Call the Pilot on VHF Channel 16 and agree on the position of anchorage and the side where the gangway will be positioned.

As a secondary area, vessels may anchor about 2 miles to the S.W. of the Port Entrance in 10 fathoms of water.

The bottom is muddy at the anchorage and throughout the port.

RESTRICTIONS:

Channel between Breakwaters: Length 1,167 m. Width 80 m. Depth 9.7 m.
Manoeuvring Basin: Length 450 m. Width 80 m. Depth 9.5 m.
Channel to Main Dock: Length 350 m. Width 80 m. Depth 9.15 m.
Access Channel to Fish Dock and Navy Dock: Length 650 m. Width 60 m. Depth 7.0 m.

MAX. SIZE: Max. LOA 165 m. Max. beam 25 m. Max. draft 8 m.

Measurements are in accordance with the manoeuvring area and the depth of water throughout the port.

Tankers are not received in the port as there are no discharge lines, and the manoeuvring area does not permit it.

HEALTH: Request Free Pratique 48 hours and 24 hours in advance of arrival via Salina Cruz.

Report any suspicious illness to Agent prior to arrival in order that vessel may be directed to Quarantine Anchorage.

Health Officials require:
Health Declaration.
Derat or Exemption Certificate.
Crew Vaccination Certificates.
Crew List.

RADIO: Via Manzanillo or Salina Cruz, ETA 48 hours and 24 hours prior to arrival.

All vessels approaching the port to berth, and when effecting manoeuvres within the area of the port or when leaving the port, must effect all communications by VHF Channel 16.

Additional communication or for safety provided by the Naval (Coast Guard) on 500 kHz. International Call Sign for Aid to Fishing Vessels 2182 kHz on R/T or Channel 16 VHF.

VHF: Salina Cruz and Puerto Madero on VHF Channel 16.

RADAR: There is a radar system but it is only used by the Naval "Coast Guard", and no contact with this system is possible, although all vessels approaching this port are detected by this radar.

TUGS: There is a service tug (750 h.p.) which comes alongside the vessel at the port entrance, working with vessel until she is berthed alongside a quay. The services of the tug are compulsory for all shipping.

BERTHING: There are 2 reaches, an expansion basin, a turning basin and a general cargo berth 150 m. length, the depth is 9.2 m. at LW (salt water).

Vessels usually moor port side alongside and drop the starboard anchor with 3 or 4 shackles. The cargo handling is by means of ship's own gear and there are four conveyor belts for the handling of boxed bananas.

CRANES: The port has no cranes, discharge and loading has to be with the ship's derricks.

BULK CARGO FACILITIES: In the port is a single general cargo berth. Bulk cargo is handled directly from the hold to the lorry or railway trucks using hoppers and scoops and loaded into the hold and raised by the ship's derrick.

At present the port handles bananas and coffee outwards and bulk fertilisers (and in sacks) inwards. Also bagged cement and heavy machinery for hydro-electric stations.

SPECIALISED CARGO HANDLING FACILITIES: There is no equipment for handling container vessels.

BRIDGES: The entry of vessels is free, there being no bridges over the channel.

STEVEDORES: Masters of vessels must request the requisite number of gangs 24 hours in advance via the ship's Agent.

General cargo – 18 to 20 tonnes/p.h./hook.
Bananas – 3,000 cases per hour by the side-port system.

MEDICAL: 24 hours notice for requesting medical assistance.

A sick person can be hospitalised if the Master so requests by radio. International Health requires certificates of vaccination and where necessary personnel can be vaccinated if required.

TANKERS: No facilities.

DENSITY: Average 1025.

FRESH WATER: The port quay has drinking water hydrants controlled by the Superintendency of Port Operations.

FUEL: It is possible to provide bunkers in small quantities via pipes, average supply 15,000 litres.

In cases of emergency, bunkers can be requested by radio from the ship's Agent.

FIRE PRECAUTIONS: Those normal for a cargo vessel.

CONSULS: There are no Consulates in the port. There is one in the town of Tapachula, Chiapas, 28 km. from the port.

Consul of Guatemala: 2a Calle Oriente No. 33, 30700 Tapachula, Chiapas. Tel: 6-12-52.

REPAIRS: It is possible to have repairs made to engines of small vessels in the town of Tapachula.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: It is necessary to post a watchman of the Immigration Service on the gangway when the vessel is berthed in the port.

HATCHES: Opening and closing of hatches by the crew or stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or their equivalent; 1 litre of spirits.

CARGO GEAR: Loading/discharging is carried out by means of the ship's derricks.

REPATRIATION: Possible.

AIRPORT: 12 km. from the port is the new International Airport of Tapachula.

Regular Flights – Aeromexico:

Mexico/Tuxtla Gtz./Tapach LA: Arrival at Tapachula at 1155 hrs. departure at 1255 hrs.

Mexico/Oaxaca/Tapachula: Arrival at Tapachula at 0855 hrs., departure at 0920 hrs.

Aviacion de Chiapas: Tapachula/Tuxtla Gutierrez: Arrival 0800 hrs. leave 0830 hrs. Arrive 1300 hrs. leave 1330 hrs.

In Tuxtla Gutierrez there is a connection with the whole state of Chiapas and part of the state of Tabasco.

Executive Air Services: To any part of the country and Central America.

TIME: Local time is GMT minus 6 hours throughout the year.

HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December every 6 years when the Executive Power is transferred.

Loading and discharge services can be provided on these days, but it is considered as overtime.

POLICE/AMBULANCE/FIRE: Police Headquarters Tel: 6-10-93, Tapachula, Chiapas.

Mexican Red Cross Tel: 6-19-49, Tapachula, Chiapas.

Fire Brigade Tel: 5-20-65, Tapachula, Chiapas.

EMERGENCY CO-ORDINATION CENTRE: Headquarters of the 22nd Military Naval Area on 500 kHz. Also see "Radio".

TELEPHONES: There is no telephone service available in the port.

SERVICES: No tank cleaning or dirty ballast facilities.

BANKS: Bancomer, S.N.C., Central Poniente y 4a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-12-20. Telex: Bcchme – 77715, Bcchme – 77716.

Banco Nacional Pesquero y Portuario, S.N.C., Central Oriente No. 42, 30700 – Tapachula, Chiapas. Tel: 5-03-52.

Banobras, S.N.C., 6a Avenida Norte No. 4, 30700 – Tapachula, Chiapas. Tel: 5-15-58.

Banco Internacional, S.N.C., 1A Poniente y 2a Avenida Norte, 30700 – Tapachula, Chiapas. Tel: 6-28-00. Telex: Bichme – 77733.

Banpais, S.N.C., 4a Avenida Norte y 1a Calle Poniente, 30700 – Tapachula, Chiapas. Tel: 5-00-31.

Banco del Atlantico, S.N.C., Central Norte No. 18, 30700 – Tapachula, Chiapas. Tel: 5-12-90.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: A Seaman's Book is sufficient for going as far as the town of Tapachula, Chiapas.

DELAYS: There are no delays, on arrival a Pilot proceeds to bring the vessel into port, and the work gangs are already on the quay, commencing work as soon as the vessel is secured.

DEVELOPMENTS: It is planned to extend the breakwaters.

GENERAL: The port is relatively new, it lacks port infrastructure for loading/discharge of goods. But in order to handle any type of cargo, equipment can be brought from the nearest port if the ship's Agent requests it 48 hours in advance and at the same time presents the list of cargo so as to ascertain the type of equipment required. With regard to the labour force, the gangs can alternate to provide 24 hour working.

RABON GRANDE: 18.14 N. 94.23 W.

SHIPMASTER'S REPORT: September & October 1982.

LOCATION:

SBM No. 1 Lat. 18° 13′ 34″ N., Long. 94° 23′ 07″ W. Light "S".
SBM No. 2 Lat. 18° 13′ 34″ N., Long. 94° 20′ 29″ W. Light "O".

PILOTAGE: Pilot boards in a position midway between the two buoys. Tug rendezvous in same position with mooring equipment which is loaded on the port side.

ANCHORAGES: Anchorage position as advised by the Pilot is to the N.W. of a line joining the 2 SBMs and about 2 miles distant. A point of note is that there were at least 20 vessels anchored to the North and West of the port entrance, mostly oil tankers awaiting berth in the inner harbour. A U.S. Government chart covers the port area and SBM berths but was not available through the local Agency.

While the vessel was lying off in the rendezvous position waiting for Pilot and mooring equipment a very strong set to the S.E. was experienced, the wind being Northerly, Force 6 throughout the afternoon. Also during the vessel's stay it was noted that the wind increased to Force 5 – 6 every afternoon and gusting to Force 6 – 7 during the night time squalls.

Shipmaster's Report: January, 1982. Not same vessel.

Anchorage 2 to 8 miles Northwards from the breakwater. Poor holding ground anywhere in the area due to the river discharge giving a muddy ooze bottom. Even with over 9 shackles out in 18 fathoms of water, ships drag anchor when subject to the gales which blow from the Northern quadrants.

The onset of these gales are sudden and fierce, blowing towards the shore. Apart from the very accurate weather reports advising that a front is approaching, it was noted that an appreciable rise in barometric pressure preceeded the gale. The normal practice in the event of a gale being forecast was to have the engines on 10 minutes' notice and if the vessel began to drag, the anchor was weighed and the vessel cruised off the area until the storm abated.

RESTRICTIONS: Mooring to SBM in daylight hours only but unmooring allowed at anytime. Both operations depending on prevailing weather conditions.

Recommended arrival drafts are as follows:

Length O.A. (m.)	*Draft Forward* (ft.)	*Draft Aft* (ft.)
175 – 200	14	24
200 – 225	16	26
225 – 250	18	28
over 300	20	32

RADIO: Communication between ship and shore is by vessel's VHF set and constantly monitored by shore personnel.

Radio Pratique is obtainable by forwarding the following information to the Agent at least 24 hours before arrival:

(a) Vessel's name and Nationality
(b) Master's name
(c) Total crew on board
(d) Last port.
(e) Derat Certificate – Port and date of issue
(f) ETA local time (GMT minus 6 hours.)

It is also advisable to establish as soon as possible which grade the installation require to load first.

Communications with the Agency was by Telex via Portishead and/or Mobile, Ala., the latter preferred by the Agency until within range of the local station.

Pajaritos Radio Station: Call sign XFF2: Station operated by Pemex.

Traffic lists are broadcast on the even hour plus 30 minutes. Weather forecast at 0830, 1430, 2030 hrs. local time. Local time is GMT minus 6 hours.

Ship (Tx.) kHz	*Shore (Tx.)* kHz	*Times*
4191.0	3700.0	Night only
6286.5	6442.5	Day and night
12573.0	12790.0	Day and night
8382.0	8690.0	Day and night
16764.0	17075.0	

It is advisable to pass cargo information, grades, quantities and order of loading through this station as sometimes the Agencies fail to pass on information received from vessels to Pemex, the operating oil company.

On this visit (October 1982) all radio traffic was passed through Mobile Radio Station Alabama, and was received within a reasonable time at Coatzacoalcos.

BERTHING/LOADING: The 2 SBMs are fitted with 2×16 in. hoses with connection to port side of vessel.

Two grades are available, Isthmus Crude and Maya Crude and the line clearing amount is 34,000 barrels.

Loading rates vary from 17,000 to 35,000 U.S. bbls./p.h. depending on stocks and number of vessels loading. During heavy squalls and/or electrical storms loading is suspended. While secured to the buoy the engines required on immediate/minimum notice.

During loading operations and while secured to the buoy the Pilot, Loading Master, 2 Petroleum Inspectors and 8 Hose Crew remain on board and have to be fed and housed. The Hose Crew change every morning and the Loading Master every third day or thereabouts.

October 1982: Once again loading on the SBM. 2 grades of oil, Maya and Isthmus Crude oils. The rate of loading varied from 12,000 to 25,000 bbls./p.h.

SHIPMASTER'S REPORT: July 1984.

Vessel (140,000 d.w.t.) anchored 320° (T) 2.1 nautical miles from No. 2 SBM which flashes 'U' every 15 seconds. Bottom was glutenous mud. Accommodation required for 1 Pilot, 1 Loading Master, 2 Cargo

Surveyors and 8 hosemen. The 8 hosemen work in shifts so only require 4 beds.

Agent receives all Immigration, Customs and Health Papers. Documents required were 4 Crew Lists (1 visaed), Personnal Effects Lists and Stores Lists.

Launch service to shore available at times agreed with Agent.

In the event of squalls/thunderstorms tug will tow from the stern.

Stores are available and from the quality of items seen ashore – mangoes, avocadoes and fresh fish appear to be of good quality.

SHIPMASTER'S REPORT: September 1985.

DOCUMENTS:

5 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.
1 copy Vaccination List.

FRESH WATER: Fresh water can be arranged through Pemex or vessel's agent.

ROSARITO: 32.20 N. 117.05 W. (See Plan)

SHIPMASTER'S REPORT: 1975.

GENERAL: There is no port or approaches chart for Rosarito.

There are 3 sea berths only, 2 using anchors and stern buoys, and 1 single point mooring platform due to come into service in 1976. There is a continuous Westerly swell (July) and the berth is very exposed.

Discharging a full cargo, it is advisable to commence ballasting as soon as possible to maintain a reasonable draft. There is no objection to this by the receivers.

DOCUMENTS: As for other Mexican ports re visaed Crew Lists, etc. Suppliers in Curacao supplied all cargo documents with correct number of copies.

PILOTAGE: Pilot boards about 1 mile West of the berths from a black pilot launch equipped with VHF Channel 9. He speaks good English. The Boarding Officer boards with the Pilot. He speaks no English. The Pilot and Boarding Officer remain on board throughout cargo operations, also pilot/mooring launch is at hand at all times. All cargo operation liaison with the shore is by VHF operated by the Boarding Officer, who also does all Customs, Immigration work, etc., with the Pilot as interpreter.

APPROACHES: Straight forward, with a shelving bottom and ample depth of water up to the berths. Anchorage was found about 1.2 miles off the South buoy berth in 14 fathoms with good holding. Approach in poor visibility, common at this time of year, presented little difficulty once a position of berths is ascertained. Coronado Islands are good radar targets for position fixing.

RADIO: Communications to Agents in Ensenada through Manzanillo Radio XFM and then Ensenada Radio XFE on HF.

Petroleos Mexicanos (PEMEX), the Charterers, have their own station at Rosarito which supplies berthing instructions, etc. Station XIB83 working on 8690 kHz and 500 kHz. They also keep a listening watch on VHF Channel 9.

OPERATIONS: Local flag tonnage gets preference for the berths. This should have little effect with the single point mooring coming into operation shortly, giving 2 product berths.

The pipe-line is handled by ship's staff. All ullaging etc. done by ship's staff. A comparison between ship's figures, B/Ladings and shore figure is made on completion of discharge, before clearance is issued by the Boarding Officer.

No difficulty was encountered in maintaining the requested back pressure of 6 kg. at the manifold using 1/2 pumps. Liaison with the shore is excellent, by Boarding Officer on VHF with hourly checks.

SUPPLIES: No bunkers or fresh water. Provisions can be obtained in small quantities but are difficult to get on board and expensive. Medical assistance can be obtained ashore, but again with the difficulty in getting ashore it would be only in a serious case.

AGENT: Only communication was on the second day by VHF but did not attend on board ship. This may be explained by the fact that due to the heavy swell it is difficult and sometimes dangerous to clear the breakwater by boat. This is endorsed wholeheartedly by Officers joining the vessel. However they were well attended by the Agent ashore. It is recommended that this port is not used for reliefs unless absolutely necessary. There was no shore leave allowed by me due to this.

SALINA CRUZ: 16.10 N. 95.12 W. (See Plan)

RESTRICTIONS: *Access Channel:* Length 760 m., depth 9.7 m.

BERTHING: Length of quays 915 m., depth alongside 9.5 m.

Repair Quay: Length 382 m., depth 1.5 m. – 4.0 m.

Storage Areas: Warehouses 20,160 sq.m.

MEDICAL: Hospital available.

TANKERS: Tankers of 250,000 d.w.t. berth at the Offshore Terminal.

Sea buoy: Lat. 16° 05′ N., Long. 95° 11′ W. Make the arrival to this location about 5 miles S.S.E. of breakwaters.

Charts: For approach H.O. No. 21441; for arrival and entry H.O. No. 21442; regular traders should have Mexican Chart SM No. 667 on board.

General: Salina Cruz is located on the West coast of Mexico, at the head of Gulf of Tehuantepec.

Note: North winds blow strongly from the Isthmus into the Salina Cruz coastal lowland, particularly during the winter. However, these Northern gales are not forecasted. The hurricane season is from June to October, the most common hurricane path is Westward, parallel to the coast, offshore.

South winds can be very strong in May and June, ships may have to leave the anchorage and the loading buoys.

The currents are unpredictable, in the Gulf of Tehuantepec and close inshore the set is either East or West.

Tanker Terminals: There are 2 tanker loading/discharging berths in the Inner Harbour, at Shed No. 4 and No. 5. There are 3 single point mooring buoys Southwestward of Salina Cruz: SPM No. 1 and No. 2 are used to load product tankers for domestic distribution up the coast. SPM No. 3 is used to export crude oils.

Communications: Standard communications procedures, through the local coast station at Salina Cruz.

Voice communications are via the Petroleos Mexicanos Marine Operations Office – Pemex Operations VHF, calling on Channel 16 or 9, the office is manned throughout 24 hours.

Caution: Internal communications within Mexico are occasionally delayed, therefore, ETA notices and other messages must be sent at the earliest possible time.

Pilotage: The Pilot boards from Pemex workboat either at the anchorage, or 1 mile South of the breakwaters, or 1 to 2 miles to the S.E. of the SPM location.

Anchorage: Tankers should anchor East of the entrance range line 346°, not closer than 0.5 miles. The holding ground is only fair. Anchorage is prohibited in the pipeline area within 0.75 miles of the SPMs and North to the coastline.

Tugs: 2 harbour tugs of about 2,400 h.p. each are kept at this port by Pemex. The tugs are used regularly to assist tankers berthing at Nos. 4 or 5 and at the SPMs. 2 workboats are available and are normally used when berthing at the SPMs. Tugs and launches are equipped with VHF.

Entering and Berthing: The short West Breakwater by the Outer Harbour Entrance was lengthened about 0.3 miles to the South; 2 new breakwaters, 0.4 to 0.2 miles long were built off the beach about 0.8 and 1.1 miles West of the Outer Harbour Entrance. Work in progress is not shown on available nautical charts.

Tankers berthing at the Inner Harbour Berth No. 4 (No. 5 used mainly by smaller ships) proceed on the leading range 346° with a tug aft. The tug should have a rope through the centerline fairlead proceed at minimum steering speed and drag the port anchor on a short scope of chain. As soon as the stern clears the entrance, the ship is turned to the E.N.E. with the assistance of the tugs, and the engine run astern to stop the ship. When the ship is stopped in the basin, she is then backed to her berth with the tugs working alongside, her bow close to the tip of the West pier. Tankers are normally moored with 5 ropes forward and 5 ropes aft. The dock fendering is of old tyres so it is imperative to berth the ship very softly.

Note: The opening between the East and West pier is 50 m., the stone and concrete tips of these piers are fendered with rotating tyre-like rubber fenders; however, precise positioning and control of the vessel, turning and stopping quickly once inside the basin is most important.

The basin is silted up along the North Quay face, sufficient depth for a tanker drawing 30 ft. may extend only 250 m. N.E. of the entrance. The basin is dredged to maintain depth and turning basin size, it is necessary to obtain up-to-date information from the Pilot, also to plan and agree on the manoeuvre, before entering.

Work in progress: (a) wharf building on the East side of other basin and on the N.E. corner of the Outer Harbour, (b) dredging at different locations, (c) construction of a new LPG berth in the N.W. side of the Outer Harbour. The Master should verify with the Pilot that works in progress do not interfere with ship's operations.

Restrictions: Entering and sailing during daylight hours only.

Hoses/Cargo: Normally gasolines, DO, FO, are loaded on tankers, through 8 in. hoses, for distribution along the coast. Isthmus crude can be loaded at No. 4 and 5 for export. Products and chemicals are occasionally received.

Note: Ships sailing from Berth No. 5 are frequently turned on the tip of the pier. This operation is undesirable; moreover it is not necessary as tugs are being used. The Master should discuss the unberthing/turning operation with the Pilot, making sure the ship will not be damaged.

Berthing at the SPMs: The 2 smaller SPMs No. 1 and No. 2 have been in use several years. Tankers in coastwise traffic only are berthed during daylight hours with the assistance of Pilot and one or two tugs and workboat. Cargo is normally gasoline, diesel oil and fuel oil.

The larger SPM No. 3 became operational in 1982, to load crude oils for export on large ships (from 100,000 to 250,00 d.w.t.) Tankers pull up 2 floating nylon hawsers (18 in. diameter and 50 m. long) with chafing chain. The use of mooring brackets is preferred, however, the ship's officer must supervise the seamen sent by Pemex to ensure the proper lead of messenger ropes and the proper use of brackets.

Note: The responsibility, for satisfactory moorings and proper use of the mooring brackets, rests completely with the ship's Master. Pemex provides a group of seamen, usually lead by a bosun and/or a young tanker's officer, to help and assist the tanker's crew in mooring, to handle equipment straps and shackles which may be shore supplied for mooring, and for the hose connections.

Combination accommodation ladder/pilot ladder should always be rigged ready when operating at the SPMs.

Hoses and Cargo: 3 floating hoses respectively of 910, 945, 980 ft. total length, carry flashing red marker lights. The connections are standard 16 in. quick coupling with valve. There is one crude oil pipeline 48 in. and 1×30 in. pipeline, length 15,000 ft. to the beach. Either crude, Isthumus or Maya, is loaded and the rate is from 40,000 bbls./hr. – 60,000 bbls./hr. Pemex expects that all large tankers shall be gas inerted and are able to load/deballast simultaneously.

Note: The 3 SPMs are fitted with flashing light and diaphone, however, reliance should not be placed on these navigation aids; this is valid for the other navaids as well, which do on occasion fail without being reported.

It is recommended to obtain from the local radio station the status of navaids, and also check the status with Pemex Operations on VHF.

SPM 1 – Flashing white, diaphone, letter R, 16° 8.5′ N., 95° 12.9 W.
SPM 2 – Flashing white, diaphone, letter M, 16° 8.5′ N., 95° 13.7 W.
SPM 3 – Flashing white, diaphone, letter U, 16° 6.9′ N., 95° 13.3 W.

The approach to Salina Cruz should not be attempted during periods of heavy rain. The breakwaters, the port area and the hills behind the port give a good radar picture at greater than 10 miles distance.

Ballast: The SPM 30 in. pipeline is designated for ballast, however, it may well be used for cargo instead. Tankers should always arrive with clean ballast only. Tankers in ballast must adhere to usual requirements; i.e., draft and trim satisfactory for safe manoeuvring, taking into consideration the ever present strong wind.

Pollution Control: The Mexican rules against pollution are strictly enforced, however, very little equipment is available locally for prevention and clean-up. No oil dispersant in stock, nor are the tugs or workboats equipped for spraying. The Master must obtain, from the Agent and the Pemex representative a copy of local regulations relating to pollution prevention, and advice as to how to handle and report pollution.

Firefighting: The town fire brigade and the Navy are able to fight fires on ships berthed in the Inner Harbour. Ships at the SPM have to rely on their equipment only, with possible minor assistance from the tugs.

Services: Bunkers available at the Inner Harbour Berths, also at SPM Nos. 1 and 2. Fresh water is piped to Berth Nos. 4 and 5, but it is recommended that drinking water be taken only in emergency. Shore leave. Crew changes, delivery of spare parts, should not be scheduled at Salina Cruz. Small amounts of provisions and stores can be obtained. Minor repairs can be arranged with workshops. Surveyor, Divers, Mexican nautical publications must be requested before arrival.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Workshops for mechanical, electronic and electrical repairs.

DRY DOCKS: Drydock for vessels up to 21,000 tons displacement (25 ft. draft) and syncro-lift for vessels up to 8,000 tons displacement. Slipway for small craft.

DEVELOPMENTS: Breakwater under construction.

SHIPMASTER'S REPORT: May 1982.

Berth: New container terminal in Outer Harbour. Length 240 m., depth alongside by sounding 8.8 m. – 12.0 m.

Pilotage: Pilot boards 1 mile South of harbour entrance.

Wharf: Concrete structure on concrete piles, protected by rubber fenders.

Chart: B.A. Chart No. 659.

Tugs: 2 tugs available.

Berthing: To prevent damage to vessel and gantry crane it should be ascertained that the gantry crane has been moved to the North end of the wharf before berthing.

SHIPMASTER'S REPORT: October 1983.

Documents:

Last Port Clearance.
12 Crew Lists.
3 Vaccination Lists.
6 Ship's Stores Lists.
6 Crew Manifest Declarations.

The local Authorities will board vessel on arrival.

Approaches: The Lighthouse of Salina Cruz and the Pemex tanks are easily seen when Bahia de Bamba is abeam to port at a distance of 7 miles.

Pilotage: Pilot will board vessel at position Lat. 16° 08.15′ N., Long. 95° 11.4′ W., if berthing on arrival.

Anchorages: A good holding anchorage at position: 1 mile E.N.E. of Buoy No. 3.

Radio: All telegrams via Mazatlan Radio/XFM or MW Salina Cruz/XFQ.

VHF: VHF Channel 9 is for Pilots/Pemex Operations. VHF Channel 13 is working channel and Channel 16 is for the Agent.

Tugs: Two tugs are used for mooring. One of 4,500 h.p. and the second of 2,600 h.p.

On completion of mooring, the second tug will make fast astern in order to hold vessel away from SBM at all times. It is wise to have engines stand-by on 10 minutes' notice in case of sudden Southern winds and to prevent any damage to the SBM.

Berthing: There are 3 SBMs (Monobuoys). No. 1 has 12 fathoms, No. 2 has 15 fathoms and No. 3 has 20 fathoms depth.

Loading: Two lines of 16 in. each which are connected with the main line of 36 in. to the shore.

Though "Pemex" (suppliers) tanks are placed high above sea level in the mountains, Pemex use 6 loading pumps with a rate of about 12,000 bbls./hr. each.

Cargo is Mexican Blend Crude Oil. API 33.5, temperature 90°F (approx.).

Ballast: There are no facilities for discharging dirty ballast to shore tanks or pits. Vessels must arrive with clean ballast.

Medical: Local Hospital and a Navy Doctor from Pemex available.

Density: 1025.

Fresh Water: Available by barge.

Fuel: Can be obtained via Pemex.

Consuls: None.

Repairs: Available for vessels up to 13,000 gross tons.

Surveyors: Lloyd's Surveyor can be reached via the local Agency.

Repatriation: Repatriation can be arranged. One must take the bus to the "Capital" of the State (2 hours' ride). Thence to Mexico City by plane.

Time: GMT minus 6 hours (Standard Time).

Shore Leave: Pemex has a launch which will serve the vessel at certain hours. Agent to be notified of vessel's requirements. No shore-pass requested.

Developments: Port of Salina Cruz is now under construction. Calculated to be completed in three years' time.

General: N.N.E. winds are standard at Salina Cruz, rising up to 40 knots in Summer. Other seasons up to Force 5-6 (Beaufort).

Fresh provisions available at a very fair price.

The language is Castellanos (Spanish). Only "Pemex" representatives speak reasonable English.

REPORT: April 1985.

Tankers: 3 SBMs located in position Lat. 16° 06′ 54.5″ N., Long. 95° 13′ 15.7″ W. about 5 km. S.W. of Salina Cruz Inner Harbour Entrance. Max. depth at single point type mooring is 98 ft. Max. allowed d.w.t. 250,000. Maximum/minimum LOA allowed 338 m. – 320 m. No shore ballast facilities so vessel must have clean/segregated ballast. Manifold to be fitted with 16 in. (150 p.s.i.) reducers. Port side derrick/boom to have 15 tons capacity. Bow fairlead to have minimum diameter of 18 in. distance bow fairlead to forward bollard to be between 2.7 m. – 8.0 m. Average pumping rate 60,000 – 70,000 bbls./p.h.

Note: Buoy Nos. 1 and 2 are for handling domestic traffic (gasoline, diesel oil, heavy oil, etc.) up to 60,000 d.w.t.

AUTHORITY: Delegacion Coordinadora, Av. Tampico No. 39-B Altos. *Tel:* 4-04-36, 4-04-46.

Empresa de Servicios Portuarios, Recinto Portuario. *Tel:* 4-01-01 and 4-00-44.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553-87-11.

SAN CARLOS: 24.47 N. 112.08 W. (See Plan)

PORT LIMITS: The limit of the port is up to parallel 24° 39′ 41.5″ N. which passes through the position of the East Buoy of the channel entrance on Mexican Chart F.H.614.

DOCUMENTS:

Port Captaincy:

Clearance from Last Port.
Crew List.
List of Passengers.
Voyage memorandum including dates and ports visited
during the previous 3 months.

Port Operations:

Stowage Plan.
Certificate of cargo handling equipment on board.
List of peculiarities of the vessel.

Health:

List of Vaccination Certificates of the crew.
List of Vaccination Certificates of passengers for the port.
Derat or Exemption Certificate.

Immigration:

Visaed Crew List.
List of Passengers for the port, also visaed.

Maritime Customs: Vessels without cargo, and arriving from abroad:

Declaration of arrival in Ballast.

Vessels coming from abroad with cargo for the port:

General Manifest for the port.
List of Passengers for the port.
List of Explosives, Corrosives, Flammables for the port, visaed.

Vessels coming from a Mexican port to load:

Customs Clearance.

Vessels coming from a Mexican port to unload:

Customs Clearance.
Cargo Manifest, visaed.
List of Passengers for the port.
List of Explosives, Corrosives, Flammables for the port.

Inspection of Animal Health:

List of Meats (tinned or fresh or refrigerated or in deep freeze).

Vessels bringing animals to the port:

Veterinary Health Certificate.
Transport Permit.
List of Meats (See above).

Inspection of Vegetable Health:

When products are not brought for discharge:

Derat Certificate or Exemption.

When products brought for discharge:

Derat Certificate or Exemption.
Vegetable Health Certificate.
Importation Permit from the Secretariat of Agriculture
and Cattle Breeding of Mexico.

PILOTAGE: The Port Captaincy has VHF Channel 16 for receiving ETAs. The Pilot comes on board vessels by motor launch from San Carlos 2 miles from the entrance to the channel.

ANCHORAGES: Any location between meridians 112° 05.0′ W. and 112° 03′ W. and parallels 24° 38.5′ N. and 24° 37.5′ N. Depths approximately 105 ft., sandy bottom.

RESTRICTIONS: With 26 ft. draft, vessels may navigate the Channel between Buoys "C" and "D" to "5" and "8". With a tidal rise of 4 ft., vessels enter and leave with a draft of 30 ft. at high tide.

MAX. SIZE: LOA 600 ft., beam 100 ft. and draft 30 ft.

HEALTH: When coming from abroad, hoist the yellow flag. Inspection is effected when the vessel is berthed or at the Inner Anchorage. If the vessel is coming from another Mexican port, the Health Authority's visit is not necessary.

RADIO: La Paz Coastal Radio: Call sign "XFK".
VHF: Port Captaincy on VHF Channel 16, operates between 0800 hrs. and 1800 hrs.
RADAR: This service does not exist.
TUGS: None available.
BERTHING: The "L" shaped quay is made of concrete and has 102 m. of berthing length. There are two "Dukes of Alba" making up a length with the quay for berthing of 204 m. Also there are 2 mooring buoys, one at each end of the berth. The minimum depth at LW is 37 ft. in the berthing area. Loading and discharging is effected using the vessel's own gear. It is possible to work in 2 or 4 gangs, according to the type of vessel and cargo.
CRANES: None.
BULK CARGO FACILITIES: On the quay there are installations of "CONASUPO" with a tower for shipment of grain, located in the angle of the "L". The grain generally shipped is wheat at the rate of 200 t.p.h. The height of the end of the grain output tube above sea level at full tide is 12 m.
SPECIALISED CARGO HANDLING FACILITIES: Vessels berth at the same quay as above with ammonia, unloading by means of installations located in the angle of the "L". These installations are owned by Fertimex.
BRIDGES: None.
STEVEDORES: Vessel's Agent submits a request 24 hours in advance for stevedoring services through the Superintendent of the Port Operations. Three products are mainly handled in the port: Cotton at a rate of 90 bales per hr. gang. Bulk wheat at a rate of 200 t.p.h., bagged at the rate of 25 t.p.h. Fertilisers in bags at a rate of 25 t.p.h. Since the mechanical equipment on shore is sufficient for 2 gangs in the case of cotton, stevedores are requested for this number of gangs. As far as wheat is concerned, the loading rate drops to 80 t.p.h. when the warehouse has little wheat in it.

Stevedores work from 0800 hrs. to 0200 hrs. of the following day i.e. they work 18 hours in 24 hours.
MEDICAL: There is a civil hospital in Ciudad Constitucion 45 minutes away from San Carlos. There is a telephone service available for calling ambulances. There are 6 doctors in the port.
TANKERS: No facilities.
DENSITY: 1023.
FRESH WATER: This is supplied when the vessel is berthed. There are various 2 in. hydrants. The rate of supply is 10 t.p.h., and the approximate cost is 6.90 Mexican Pesos per ton.
FUEL: Moderate quantities of diesel oil can be supplied, and it is brought by road tanker from La Paz, the vehicles themselves pumping supplies to the vessel.
CONSULS: There are no consuls in the port.
REPAIRS: There are workshops at Ciudad Constitucion 45 minutes away by road.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: This service does not exist.
HATCHES: Hatches are opened and closed by the stevedores.
SURVEYORS: None.
CUSTOMS ALLOWANCES: Tobacco, wine and spirits are placed under seal.
CARGO GEAR: For loading and discharge, ships' gear is used. There are no cranes in the port.
REPATRIATION: There are Immigration Authorities in the port. There are no hotels, however, there are several in Ciudad Constitucion and in La Paz. La Paz, is the capital of the State of Southern Lower California, and is approx. 3 hours away by road.
AIRPORT: None in the port. Airport at La Paz where there is an international airport called General Marquez de Leon.
TIME: GMT minus 7 hours. There are no seasonal time changes.
HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, and 1st December (every 6 years). These dates are all obligatory.
POLICE/AMBULANCE/FIRE: In the port there are Municipal and Prison Police, Tel: 25. Ambulance and fire fighting services come from Ciudad Constitucion.
TELEPHONES: No service for installing phones on board vessels, but in the port there is a telephone service for communications with any part of the world.
SERVICES: None available.
SHORE LEAVE: No restrictions.
IDENTIFICATION: Seaman's Book is sufficient.
REGULATIONS: No naked lights when there is cotton in the port or ammonia is being discharged.
DELAYS: As there is only one berth, there are times when the berth is occupied, but this does not occur often. Berthing is done in shifts.
DEVELOPMENTS: At the moment, there is no programme.
GENERAL: *Post Office:* At the moment, there is no Post Office in San Carlos.
Telegraph Office: There is a telegraph office but the service is not for maritime traffic. For such purpose, vessels must send their ETA via La Paz Coastal Radio Station.

SHIPMASTER'S REPORT: 1976.
Documents:
- Visaed Crew List by Mexican Consul and 9 copies.
- Visaed Cargo Manifest from each loading port and 4 copies.
- Derat Exemption Certificate.
- Passport or Seamen's Book for all on board.
- Clearance from last port of call.

Approaches: A very strong current was experienced running from S.E.-N.W. when entering Bahia Magdalena at Pta. Redondo. Caution should be exercised making this approach, because currents can be strong and unpredictable in this area.
Pilotage: Compulsory. Pilot boards at Lat. 24° 39′ N., Long. 112° 05′ W. from small boat with outboard engine.

Anchorage is also good in this position should it be necessary to await Pilot or berth. The 2 buoys marking the entrance make good radar targets and are distinctive.
Restrictions: Channel must be navigated at suitable time of tide giving careful consideration to vessel's draft, in order to clear numerous shallow patches. Max. draft to date of vessel navigating channel was 30 ft. 4 in. on top of high water.
Radio: La Paz Radio (XFK) 500 kHz and 441 kHz. Working hours appear to be uncertain, but there is a working arrangement with Agent to transmit messages free of charge.
Charts: Chart used to navigate channel was Mexican No. FH. 614. Masters are strongly advised to obtain this chart.
Berthing: One pier 420 ft. long.
Fresh Water: Available at pier at 10 t.p.h.
Communications: Very poor. No telex, no telephone and no cable service. Telephone available at Villa Constitucion 57 km. away by paved highway. Plans are in force to introduce a telephone service in the fairly near future.
Consul: If consular advice is required it is best to contact the British Embassy in Mexico City. Tel: 5 11 48 80.
Laundry Service: None.
Ship Chandler: None. A pick-up wagon can be supplied by Agent to obtain essential stores from supermarket at Villa Constitucion.

AUTHORITY: Capitania de Puerto de San Carlos.

SAN JUAN DE LA COSTA: 24.24 N. 110.40 W.

(See Plan)

SHIPMASTER'S REPORT: April 1985.

LOCATION: 4.1 miles South of Pta. Coyote in position: Lat. 24° 23.5′ N., Long. 110° 40.4′ W.
PILOTAGE: Compulsory. Pilot boards 1 mile to 2 miles East of berth.
ANCHORAGE: Vessels have to wait at anchor if wind exceeds Force 2 on the Beaufort Scale. Berthing only carried out in calm weather.
TUGS: Not available.
BERTHING: Open berth exposed to Easterly winds. Depth alongside 32 ft. Vessels berth port side alongside only.

There are 2 mooring buoys located about 140 m. from each end of the berth to the seaward side, used to make fast 2 slack ropes (1 forward and 1 aft) in order to assist vessel to sail, sailing mostly without Pilot.

Approach to berth is free of dangers.

On average 3 vessels a month load at the berth.
LOADING: Fixed loading installation (conveyor belt) with loading capability of about 600 – 700 t.p.h. Cargo loaded was rocky phosphate in bulk.

Vessel has to shift for loading each hold. During shifting special care should be taken as shifting is considered extremely dangerous, especially for loading extreme holds on account of short length of berth (for vessels above 180 m. in length) in combination with the prevailing winds.
FRESH WATER: Not available.
REPATRIATION: Can be arranged from the nearest port (La Paz).
GENERAL: *Provisions:* Fresh provisions not available.

TAMPICO (Including Altamira): 22.16 N. 97.47 W.

(See Plan)

PORT LIMITS: Vessels in Mexican ports are considered to be arrived vessels as soon as permission to moor has been granted by the Port Authorities.
DOCUMENTS:
- 7 simple copies of Crew List.
- 5 simple copies of Cargo Manifest.
- 1 Visaed Passenger List or Visaed Statement to the effect of no passengers, and 5 simple copies.
- 7 copies of Stores List.
- 7 copies of Personal Effects List.
- Derat Exemption Certificate.
- Passports or Seaman's Books of all crew.
- Clearance from Last Port of Call.
- 3 copies of lists of packages containing explosives, flammable or corrosive materials.

PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice of vessel's arrival. Pilots board vessels 2 miles off the breakwater. Vessels may anchor about 2 miles off the breakwater waiting for Pilot. Pilots on VHF Channel 16.
ANCHORAGES: About 2 miles East of breakwater in 40-60 fathoms of water.
RESTRICTIONS: There are no restrictions for movements at night. The drafts of the vessels will be governed by the mooring zones in which they are working.

The depths at these berths are as follows:

*Free Zone Quay	30 ft.
Minera Autlan Quay	32 ft.
Petroleos Mexicanos Quay	32 ft.
Mexican Gypsum Quay	28 ft.
Metals and Minerals Quay	30 ft.
Anahuac Cement Quay	28 ft.

The navigation channel to the Mexican Petroleum Maritime Terminal has a depth of 38 ft. and that to the Free Zone 33 ft.
*This depth is subject to constant dredger maintenance, the draft being reported weekly to the Ship Agents.

MAX. SIZE: The max. length is 656 ft. There are no restrictions for beam. The drafts will be those admissible in the corresponding berth used.
HEALTH: No Radio Pratique. Pratique granted after docking and presentation of documents to Port Authorities. In case of disease or fever on board, Master to give notice to Agent before arrival.
RADIO/VHF: Tampico has a coastal station with frequency 2182 kHz., as have the Port Captain, the Pilots' Office and Puertos Mexicanos Office. All have the same frequency and VHF Channel 16.
TUGS: 3 tugs are available, intended solely for port manoeuvres, comprising "SPTA-1" 4,352 h.p.; "SPTA-2" 3,200 h.p. and "SPTA-3" 4,352 h.p. Also Petroleos Mexicanos have tugs whose power varies between 4,200 h.p. and 5,600 h.p.
BERTHING:

1 berth at the Minera Autlan Quay where manganese is moved by moving belt at the rate of 1,200 t.p.h.

5 berths at the Pemex Quay, where oil and its derivates are moved at the rate of 600-800 t.p.h., by means of 4 in., 6 in., 8 in. and 10 in. pipes. Petroquimicos also have a quay.

1 berth at the Mexican Gypsum Quay where calcium sulphate is moved by moving belt at the rate of 500 t.p.h.

2 berths at the Metals and Minerals Quay, where bulk minerals are moved by 4 moving belts at the rate of 125 t.p.h. per belt.

2 berths at the Anahuac Cement Quay, where bulk cement is moved by means of 10 in. pipes at one berth and by 2×16 in. ducts at another berth at a rate of 250 t.p.h. per pipe.

9 berths at the Tampico Free Zone, where general cargo is moved at the rate of 20 t.p.h. per gang.

Berth	*Length*	*Berth*	*Length*
1	215 m.	5	145 m.
2	145 m.	6	145 m.
3	145 m.	7	180 m.
4	145 m.	8	185 m.
		9	185 m.

Depth alongside 10.5 m. Official fresh water draft 9.14 m.

All quays have lighting for night operation and telephone facilities.
Altamira: Approximate position: 22° 29′ 32″ N., 97° 51′ 45″ W. It has 2 berths with a total length of 500 m. and depth up to 13 m. The navigation channel has a depth of 12.0 m. The port also has areas for storage and facilities for containers and Roll-on/Roll-off.

Pilot compulsory. Pilot boards 2 miles off the entrance.

Fresh water and fuel available from Tampico.

A dock side container crane is in operation and two yard cranes are available, other miscellaneous equipment is available.
CRANES: Heavy lift crane, capacity 150 tons.
STEVEDORES: No ETA advice necessary if Stowage Plans received in advance by Agent, otherwise ETA advice for gangs appreciated 48 hours prior to arrival. Stevedores' general cargo discharging and loading rate about 20 t.p.h. per gang. Mineral loading at Metals Pier about 125 t.p.h. per belt (2 conveyor belts available to service both berths).
MEDICAL: Hospital facilities available. No advance notice required.
TANKERS: See "Berthing". Dirty ballast is received ashore.
DENSITY: Average 1006.
FRESH WATER: Available on written request from ship's Agent. Drinking water delivered by pump at the rate of 12 cu.m. per hour.
FUEL: The port has a barge with a capacity of 22,000 bbls. which is able to service vessels while they are loading and unloading cargo. Another fuel terminal is presently under construction and will be in operation in 1991. The Terminal Maritime Madero is available in the Petroleos Mexicanos Quay.
CONSULS: Brazil, Denmark, Finland, Germany F.R., Honduras, Italy, Lebanon, Norway, Spain, Sweden, U.K. and U.S.A.
REPAIRS: Hull repairs can be effected, as can work on steering system, machinery, marine auxiliaries and other equipment of less importance.

There are specialist workshops attached to the dock.
DRY DOCKS: Length 250 m., depth 9.5 m., width 37 m. Max. size 55,000 d.w.t. Only for tankers owned by Pemex.
GANGWAY/DECK WATCHMEN: No watchmen necessary. Customs guard keeps watch at gangway while vessel alongside.
CUSTOMS ALLOWANCES: No allowances to be taken ashore, but reasonable amounts of tobacco and spirits are allowed to be taken out of bond, but to be kept on board for use of crew and passengers only.
REPATRIATION: In the port there is an office of the Administrative Secretariat, where the repatriation of any crew member can be negotiated. This negotiation will be for the account of the ship's Agent, who is required to deposit a bond of Mexican $23,000 per person in case of certain nationalities.
AIRPORT: At a distance of 10 km. from the port. There are regular flights to Monterrey and Mexico City with connections in any direction.
TIME: GMT minus 6 hours.
HOLIDAYS: January 1st; February 5th; March 21st; May 1st; September 16th; November 20th; December 25th; December 1st (every 6 years).
FIRE/AMBULANCE/POLICE: Fire Department Tel. 2-12-22; Red Cross Tel. 2-13-33; Police Tel. 2-11-57 and 12-10-32.
DEVELOPMENTS: Constant programming for more space at wharves, sheds, warehouses, continuous dredging and increasing capacity of operational equipment.

SHIPMASTER'S REPORT: September 1980.
Pilotage & Radio: 2182 kHz does not appear to be in use but 500 kHz and VHF are the popular mode, most Agencies having the latter.
Restrictions:

Minera Autlan Quay for manganese loading: 33 ft.

Muelles des Minerals (Metals & Minerals Quay): 30 ft.
Max. Size: All vessels in river berths moored starboard side to, head up, and if at Muelles des Minerals and over 500 ft. length, the vessel will have to drop down river stern first before turning aided by tugs.
Berthing: Muelles des Minerals: This open apron berth adjacent to the railway sidings at Colonia del Golfo is situated before the sharp bend leading to the main wharfage at Tampico and the bulk cement wharf by the entrance to the Canal Cortadura.

The method of loading is to wheel portable belts adjacent to the hatch in conjunction with another belt lifted aboard and a chute that is suspended from the vessel's gear and braced for direction by guys.

The mineral is dumped into the hopper at the lower end by bulldozer and it will depend upon the situation of the pile as to the speed that can be obtained. Thus if the cargo is in railway gondolas it will be grabbed out by rail cranes into trucks for transport to the apron where a pile is created for the bulldozers, a method which has several areas of slow working or waiting time.

Ideally the cargo has been stockpiled on the rear side of the quay from which it can be lifted directly by the bulldozers for dropping into the belt hoppers. It is this system that can achieve a good rate.
Fresh Water: Observed delivered by road tanker.

AUTHORITY: Delegacion Puertos Mexicanos Tampico-Altamira, Edificio Puertos Mexicanos, 1er. Piso Recinto Fiscal Autorizado, Tampico, Tam., Mexico. *Tel:* 12-45-50, 12-45-61, 12-78-71. *FAX:* 12-57-44. *Telex:* 14887 Cpdtme.

Puertos Mexicanos, Av. Municipio Libre No. 377, Col. Santa Cruz Atoyac, C.P. 03310 Mexico, D.F. *Tel:* 688-22-66, 688-77-56. *FAX:* 688-38-95.

TOPOLOBAMPO (Punta Mapam): 25.36 N. 109.03 W. (See Plan)

SHIPMASTER'S REPORT: January 1986 (Updated 1988).

PORT LIMITS: Precise limits could not be established, however any reasonable distance from the Fairway Buoy is acceptable. See anchorage positions below.
DOCUMENTS:

3 copies Crew Lists.
3 copies Crew Personal Declaration.
3 copies Bonded/Slop Chest Stores List.
3 copies Steward's Stores List.
3 copies Vaccination List.

Manifests not always necessary for Pemex purposes.

Bills of Lading, necessary, these included with Clearance from last port and from loading port. Clearance very important.

Ship's certificates, not asked for, except ship must have licence to trade coastwise, issued by the Mexican Authorities.
PILOTAGE: Compulsory. Daylight only. Pilot on VHF Channel 16. Pilot boat is a small yellow dinghy with an outboard motor. In rough weather Pilot boards from tug 'Pemex 45' or 'Lobo'.

Pilot boards in vicinity of Fairway Buoy.
ANCHORAGE: Not defined, but in vicinity of Fairway Buoy. A good anchorage has been found in position 25° 29.3′ N., 109° 10.8′ W. in 17.6 m. of water, with the Fairway Buoy bearing 032° by 0.87 miles. On another occasion vessel anchored in position 25° 28.99′ N., 109° 12.05′ W., with Fairway Buoy bearing 057° by 1.75 miles. Positions by Satellite Navigator.
RESTRICTIONS: See "Max. Size".
MAX. SIZE: Maximum draft for crossing the bar is 31 ft. (SW).

In March 1988 the main channel entrance will be in operation with a new configuration (width 200 m. and depth 31 ft.) with no restrictions for entry. The new channel will be aligned 051° (T) with leading line towers on the shore. The front tower on Baviri Hill is 35 m. high and the rear tower on Panal Hill is 74 m. high. Both towers are white skeleton towers.

There is a new Sea Buoy located in position Lat. 25° 31.2′ N., Long. 109° 12′ W. The channel is marked with lighted buoys.
RADIO: In our case Charterer's private radio station was used. For commercial purposes Guaymas Radio is probably best.
VHF: Pilot on VHF Channel 16.
TUGS: 2 tugs available, 2,500 – 2,800 h.p.
BERTHING: Pemex Berth at Punta Mapam:

The berth is located 0.5 miles East of the derelict Pemex Berth in Topolobampo. The jetty is approximately 250 m. in length and aligned 087° – 267° with a depth of 14.0 m. on the South side.
Berthing at the Pemex Jetty:

North Berth: Port side to, head out to sea. Starboard anchor is let go off the berth.

South Berth: Port side to, Head in.
Unberthing from Pemex Jetty:

North Berth: Starboard anchor used to assist moving vessel off berth. HW not necessary but consider depths over the bar.

South Berth: Best just before HW when flood used to advantage to help move vessel off berth.
Currents at the Berth: Tidal stream currents set heavily across the berth so that on the flood, a vessel on the North Berth is pushed towards the berth and a vessel on the South Berth is pushed off the berth. When the tide is ebbing a vessel on the North Berth is pushed off and a vessel on the South Berth is pushed on to the berth.
Cargo Handling: Chicksan type cargo arms with 10 in. diameter for diesel oil and gasoline, sizes for other grades not checked but thought to be the same. In the case of our vessel (LOA 170 m.) the diesel arm was aligned with the manifold, but the gasoline arm was too far off forward of the manifold on the South Berth (and too far aft on the North Berth) and therefore a length of flexible 8 in. hose was used between the manifold and the cargo arm. Shore tanks were said to be 2 km. away and 42 m. above sea level.

FRESH WATER: Available, using international shore connection and ship's hoses from fire tower on jetty. Sailing directions recommend boiling before use.
SURVEYOR: Can be arranged through Lloyd's in Mexico City.
CUSTOMS ALLOWANCES: Usual allowances for Mexico.
REPATRIATION: Possible via Los Mochis, 12 miles inland.
AIRPORT: At Los Mochis, 12 miles away. Los Mochis can be reached by bus or taxi.
TIME: GMT minus 7 hours throughout the year.
SHORE LEAVE: No restrictions, identification cards not necessary.
DELAYS: Departure from tanker berth dependant upon state of tide and in daylight only. Other berths unknown.

SHIP'S OFFICERS REPORT: Small scale B.A. Chart No. 2323 used for approach. Large scale B.A. chart for Topolobampo not available, therefore Mexican Chart S.M. 337 used.

When approaching from the vicinity of Cabo Corrientes, the best course has been found to be 327° to approximate position 25° 18.3′ N., 109° 18.0′ W. when Farallon de San Ignacio will be dead ahead by 10 miles. Course is then altered to 030° for 13 miles for the Fairway Buoy. On this course the Fairway Buoy should be in line with an identifiable hill (see "Plan"). The Fairway Buoy has been fixed using Satellite Navigator derived positions at anchor and visual bearings together with radar ranges and found to be in 25° 29.93′ N., 109° 10.44′ W.

In rough or rainy weather the buoy may be difficult to see. With radar the channel buoys present slightly better echoes and may be recognised by comparison with the channel shape from the chart.

GENERAL: *Agent:* Agencia de Buques Zamorano, Domicilio Conocido, Topolobampo, Sinaloa. Tel: 2-00-11.
Storing: Limited facilities.
DEVELOPMENTS: In 1989 vessels of 50,000 d.w.t. will be able to enter the port (dredging completed mid-1989).

AUTHORITY: Capitania de Puerto, Apartado Postal No. 10, 81370 Topolobampo, Ahome, Sinaloa, Mexico. *Tel:* 91-686, 2-01-28. *Contact:* Captain Ricardo Flores Bravo, Port Captain.

TUXPAN: 20.57 N. 97.24 W. (See Plan)

SHIPMASTER'S REPORT: January 1982.

LOCATION: Tuxpan is situated on the North bank of the Rio Tuxpan. On the opposite side (the South bank) is situated part of Tuxpan called Santiago de la Pena.

The entrance of the Rio Tuxpan is situated at Lat. 20° 58.2′ N., Long. 97° 18.1′ W. Breakwaters on both sides of the river mouth. Approximately 100 m. and 120 m. seaward of the mole heads is a bar with quick changing depth over it. The bottom of the bar is sand, covered with a thin layer of mud. After a strong North wind the depth on the bar is one foot less than the day before. The permissible entering draft is 18 ft. – 20 ft. at HW and calm sea with nearly no swell. Occasionally vessels with 21 ft. draft can enter. Normally there is a low swell from the East all the year. After a strong North wind (Norte) you can expect a Northerly swell of 2 ft. – 4 ft. for 1 to 2 days. A dredger is working in the river entrance most of the time.

PORT LIMITS: One mile off all port installations and structures, including SBM and breakwaters.

DOCUMENTS:
1 original and 4 copies B/L's of all Tuxpan cargo.
12 Cargo Manifests.
1 Health Declaration.
8 Crew Lists.
8 Passenger Lists (even when none/nil – lists).
4 Stores Lists.
2 Personal Effects Lists.
(No special forms required/IMO-Forms are sufficient).

Documents which have to be shown to Port Authorities:
Tonnage Certificate.
Ship's Register.
Derat Certificate.
Seaman's Books or Passports.

PILOTAGE: Pilotage is compulsory. Pilot boards vessel approximately 2 miles to 2.5 miles East of entrance. Pilot boat: A white 20 ft. boat with white cabin and blue/white deck.

Equipped with VHF Channel 16. Pilot Office open from sunrise to sunset and listening on VHF Channel 16. Call: "Tuxpan Pilot".

The Pilot has to be ordered by Agent 24 hours in advance.

ANCHORAGES: East of breakwaters from 2 miles – 4 miles on a breadth of 1 mile North and 1 mile South of this line.

Caution: Many submerged gas and oil-pipes in the vicinity of entrance to Rio Tuxpan.

Best anchorage: North mole head bearing 270° (T) and 2.8 miles off. Ground: Muddy sand, good holding.

RESTRICTIONS: Entering port and river only in daytime. Departing vessels have to pass the bar at river entrance before sunset.

MAX. SIZE: Length of ships handled is 190 m., always in accordance with the draft.

HEALTH: There is a hospital at Tuxpan. Surgeons and Dentists are available. No vaccinations can be done.

Meat and vegetable rooms are sealed and opened once a day to take provisions. Garbage has to be kept on board in watertight and covered containers.

RADIO: No radio station at Tuxpan. Closest Tampico or Vera Cruz. Good communication between Tuxpan and these radio stations.

There is no repair of radars, VHF or other electric and electronic equipment possible. If required, technicians and spare parts have to be ordered from Tampico.

VHF:

Port Authorities	Channel 16
Pilot	Channel 16
Pemex	Channel 16
Tecomar (Agency)	Channel 68

RIVER: Ground: Mud. Density of water: Approximately 1005.

The current in the river is nearly always outwards and is from 0.5 knots in the dry season up to 6.5 knots in rainy season.

At Tuxpan there is a stationary bridge, which can only be passed by very small ships.

TUGS: 2 privately owned tugs are available. One of 500 h.p. and one of 600 h.p. Tugs to be ordered by Agent in advance. The tugs are very helpful when turning in the river.

BERTHING: (Places for dry cargoes):

	Length (m.)	*Depth Alongside* (ft.)
Muelle Fiscal (Extension under construction)	152	23
Grain Dock	70	22
Ro/Ro Berth	—	18
Berth for the Dredger (North bank)	60	18
Berth for Fishing Boats	80	15

CARGO HANDLING FACILITIES: No shore cranes, no forklifts, 2 small mobile cranes of unknown capacity; 2 special mobile cranes on container yard (these 2 cranes cannot be rented).

Four mobile grain elevators.

Several oil companies have own small berthing places and handle their cargoes themselves.

STEVEDORES: Agent has to order gangs from Port Operations 24 hours in advance. Approximately 120 men available.
Working Hours: 0800 – 1600 hrs. = 1st shift
1600 – 2400 hrs. = 2nd shift
0000 – 0800 hrs. = 3rd shift

Saturday and Sunday also, but all at overtime rates.

TANKERS: Tankers up to 6,000 tons gross can be taken inside the river to the oil companies' small jetties.

Offshore there are 2 SBMs in position:
No. 2 = Lat. 21° 02.58′ N., Long. 97° 17.43′ W. and
No. 1 = 135° – 1.9 miles from No. 2 SBM.

Tankers with 55 ft. draft acceptable. These SBMs are mainly used by Pemex. 2 additional buoys are to be installed.

FRESH WATER: No potable water available. Small quantities of wash-water can be delivered by trucks.

FUEL: Small quantities of clean diesel oil can be delivered by trucks. No marine diesel oil or heavy fuel oil available.

DRY DOCKS: None.

SHIPYARD: For fishing boats, some slipways available.

REPAIRS: Minor repairs can be done by the fishing boat shipyards.

REPATRIATION: Repatriation is possible via Tajin Airport to Mexico City. Tajin Airport is approximately 30 miles from Tuxpan and can be reached by a good road.

At Tuxpan on the left (North) riverbank is a small Airport (Fausto Vega Santander) only for VFR flights. Runway 1,600 m. No commercial flights.

HOLIDAYS: 1st January, 1st May, 5th May, 16th September, 25th December.

TIME: GMT minus 6 hours throughout the year.

TELEPHONE: No telephone connections at the piers.

Useful telephone numbers: Police, 40252; Port Captain, 40020; Pilot Office, 40043; Custom's Office, 40055.

Office Hours: Monday – Friday 0800 – 1500 hrs.

Some offices are also open on Saturday from 0800 – 1300 hrs.

SHORE LEAVE: Allowed without restrictions. No special identification cards required.

PROVISIONS: No ship chandlers at Tuxpan. Small quantities of vegetables and fish can be bought at the local market. For this Agent obtains a permission from Customs Office.

If necessary ship's stores can be ordered within 24 hours from Tampico.

SHIPMASTER'S REPORT: July 1990.

Intensive dredging is under way. The offshore bar near the entrance can now be passed, on leading lights line 238° with 26 ft. 06 in. at all tides (dredged to 9.5 m.).

Pilotage available day and night.

The breakwaters are being lengthened.

3 miles up-river on the South bank of Rio Tuxpan, a well operated Container Terminal can accommodate 2 vessels at a time, each 160 m. in length. Berthing is port side to, or after turning (which is advisable) starboard side to head seawards.

In good weather conditions, no use of anchor required.

One tug and one mooring boat available. Sufficient fenders are in place.

Container handling: With ship's gear only for ship-to-shore, then handled with special hydraulic mobile lifters (40 ft./20 ft. containers) on to trucks, or direct to stacking area.

Stevedores available 24 hours.

VERA CRUZ: 19.12 N. 96.08 W. (See Plan)

PORT LIMITS: Area bounded by the reef lighthouses outside the breakwater.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: Compulsory, advise Agent 24 hours before arrival giving name, flag, ETA and draft.

The Port Captain is to be given a minimum of 2 hours' notice by the Agent. This to be done between 0800 – 1800 hrs. (Pilot office hours). Orders for Pilots between 1800 – 0800 hrs. to be made between 0800 – 1800 hrs.

The Pilot normally boards 3 miles N.E. of harbour entrance, but if his services are requested outside such limits the Pilot will proceed to the location, i.e. the anchorage.

The pilot launch leaves from a "T" shaped pier when expected vessel is sighted. The launch has a black hull with white superstructure and false funnel painted black.

ANCHORAGES: In good weather, vessels may anchor in the outer area off the port, in the case of bad weather, to the South of the Isle of Sacrifices (Isla de Sacrificios). If the vessel prefers to anchor within the port limits, it must request the services of the Pilot and on anchoring for its own account within this sector must pay the fees due to the pilotage service.

RESTRICTIONS: In normal weather conditions there are no restrictions on entry and departure, the sole consideration being the draft of the vessel, since if this exceeds 29 ft. the time of the tide must be taken into consideration, and also after a strong North wind, a vessel drawing more than 24 ft. must wait for the tide. Depth in access channel 10 m. – 12 m.

MAX. SIZE: Length 200 m., at Berth Nos. 4 and 6 or the oil terminal.

HEALTH: The International Health Office gives a 24-hour service for the arrival and departure of vessels. To obtain Free Pratique on arrival of vessels there is a medical inspection, with submission of the Maritime Health Declaration, signed by the Master, and examination of documents of Derat Certificate, certificates of vaccination of the crew and passengers; cholera, yellow fever, (dependent upon the location from which the ship has come); examination of crew members or passengers who might be declared as suffering from contagious illnesses. With these formalities fulfilled, Free Pratique is granted. Free Pratique can be granted by radio, provided it is considered that the vessel's arrival will not give rise to the introduction or propagation of illnesses covered by the regulations, and that also the following requirements are fulfilled:

1. Exercise of greater epidemiological vigilance in respect of illnesses covered by International Health Regulations.
2. The Master's radiogram must be presented to the International Health Delegation 8 hours in advance and must invariably fulfil all the stipulations as set out in the attached form.
3. Without prejudice to the foregoing, the Health Doctor or whomsoever he may designate, and where it is considered appropriate, shall go on board for the purpose of receiving the Maritime Health Declaration so that enquiries and verifications as may be considered necessary may be carried out.

Once the vessel has called at a national port, in subsequent national ports the requirements for obtaining Free Pratique will not be required, provided there does not exist on board any alteration in the health conditions as established in the Maritime Health Declaration.

Medical service to crew members and passengers on board foreign flag vessels is provided by doctors and private hospital institutions, through the intermediary of the consignee ship's Agent.

For possible handling of disease covered by the Health Regulations (cholera, yellow fever, bubonic plague), there are isolation wards in the Official Hospitals "Aquiles Serdan" and "Regional de Veracruz".

The Office of International Health has immunisation services required for the diseases covered by the Regulation, which are certified on special international forms, with any cost, to crew members and passengers.

RADIO: Radio station Vera Cruz Radio, call sign XFU. Transmits on 420 and 451 kHz and listens on 425, 454, 463 and 480 kHz. Also VHF Channels 12, 16, 26 and 27.

VHF: Pilot on Channels 16, 12 and 20 throughout 24 hours.

TUGS: 4 tugs available, 3×1,300 h.p. and 1×2,250 h.p.; tugs' lines used at no extra charge. Tugs join vessels inside breakwater.

BERTHING:

Berth	*Capacity*	*Length* (m.)	*Depth* (m.)
No. 1	2 vessels	384.50	10
No. 2	2 vessels	431.00	9 – 10
No. 4	5 vessels	795.20	9 – 10
No. 6	5 vessels	725.00	9 – 11
No. 7	5 vessels	548.00	6 – 8
Marginal (Minerals)	–	407	10
Grain Quay	1 vessel	250.00	9 to 10
Container Quay	1 vessel	170.00	10
Pemex	2 vessels	958.00	10

BULK HANDLING FACILITIES: Handling of grain at a mechanised plant, with storage capacity of 25,000 tons and an average discharge rate of 250 t.p.h. and loading rate of 400 t.p.h.

Handling of bulk sugar by mechanised installations, with storage capacity of 40,000 tons and an average loading rate of 800 t.p.h.

Handling of aluminium, coal brickettes, cement, latex, crystallised honey, chemical products, vegetable oils and crude oil.

STEVEDORES: *Handling rates:* General cargo, 12 tons/per hook hour. Bulk cargo, 30 tons/per hook hour.

MEDICAL: Doctors, dentists and hospital facilities available (see "Health").

TANKERS: Petroleos Mexicanos berth located in Northern part of port. Max. draft 28 ft. Berthing for 2 vessels of 170 m. LOA. Berth provides 5×8 in. lines for discharge of refined product and 2×12 in. lines for fuel oil.

DENSITY: 1025.

FRESH WATER/FUEL: Available.

REPAIRS: Hull and machinery repairs can be effected by "Astilleros de Veracruz" (Vera Cruz Shipyard Company).

DRY DOCKS: "Astilleros de Veracruz S.A." has 4 docks, 2 floating and 2 dry docks. The largest of them is Floating Dock No. 4 with the following characteristics:

Length on stocks	169.210 m.
Internal useful beam	30.400 m.
Height of keel stocks	1.400 m.
Max. draft on keel stocks	8.200 m.
Lifting capacity	30,000 d.w.t.

Dock No. 2: With capacity for vessels up to 10,000 tons

Useful length	154.000 m.
Useful beam	19.400 m.
Draft	5.180 m.

Served by a 45 ton capacity crane

Floating Dock No. 3: With 3,000 ton capacity lifting capacity

Useful length	25.900 m.
Useful beam	13.550 m.
Draft	5.800 m.

Served by 2 cranes of 10 ton capacity each.

Dry Dock No. 1

Length	45.720 m.
Useful beam	7.920 m.
Draft	2.130 m.

SURVEYORS: Lloyd's, Norske Veritas and Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Mechanical hatches usually opened by crew, otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man and will attend as necessary for further issues.

CARGO GEAR: Piers 1 and 2, 4×20 tons, 6×10 ton, 3×5 ton and 10×4 ton mobile cranes. Various cranes at piers 4 and 6. 2 floating cranes available max. lift 46 tons.

REPATRIATION: Possible, arranged by Agent.

AIRPORT: 8 km. from Vera Cruz, flights daily to Mexico City.

TIME: GMT minus 6 hours all year round.

HOLIDAYS: During the year the following holidays are observed: 1st January, 5th February, 21st March, 1st May, 5th May, 16th September, 12th October, 20th November and 25th December.

POLICE/FIRE/AMBULANCE: Police – 2.28.23, Fire Brigade – 2.25.00, Red Cross – 2.01.40.

TELEPHONES: Available on most piers but not on vessels.

SERVICES: Provisions, laundries, and dunnage available. Garbage must be removed every 48 hours.

SHORE LEAVE: Possible.

GENERAL:

Government Secretariat – Local Administration Office

In accordance with the stipulations of Article 75 of the General Local Administration Law, vigilance of foreign crew members in vessels of any nationality tied up in national ports, together with visits or stays by the said crew members will be subject to the following requirements:

I. Heads of Local Government will designate accordingly personnel who will carry out vigilance of the vessel, in accordance with the provisions of Section II of Article 29.

II. Crew members may visit ports during the stay of the vessel, provided they deposit at the Local Administration Office their identity documents which for such purpose may be issued to them and their passports and other documents, all of which will be returned to them on re-embarkation.

III. Shipping companies, their Agents or consignee firms, for all legal purposes shall be responsible for the complete embarkation of crew members and for the costs involved in repatriating any who may remain behind after the vessel sails. When a crew member wishes to stay in the country, he must obtain documentation in compliance with one of the categories as set out in the appropriate Law and Regulations.

DEVELOPMENTS: A new petroleum quay is to be constructed to take 2 tankers of 40,000 tons.

A transtainer, portainer crane and other equipment will be acquired in the near future.

SHIPMASTER'S REPORT:
Documents:
1 Visaed and 9 Plain Spanish Crew Lists.
1 Visaed and 5 Plain Passenger Lists.
1 Visaed and 2 Plain Spanish Stores Lists.
2 Crew Customs Declarations.
5 Cargo Manifests.
1 Arrival form.

The Customs require a complete list of all shop goods priced in U.S. Dollars, failure to produce this will cause confiscation and $10,000 fine. The Customs thoroughly check bond and beer locker and seal same. All storerooms are also checked.

The Agricultural Inspector insists that all dry stores are fumigated and kept under seal for 24 hours. All refrigerated stores – except U.S.A. meat is sealed up.

Pilotage: Pilot boards 1 mile W.N.W. of Angeguda de Adentro Light beacon from black boat flying pilot flag.

Tugs: 2 tugs available for berthing.

Restrictions: Port open day and night. Prevailing Northerly winds are sometimes too strong to allow ship's movement in harbour.

Health: Health authorities board after berthing.

Radio: ETA to be sent 48 hours in advance via XFB Cuidad de Carmen. Agent orders Pilot.

Fuel: Bunker C and Diesel are available. A mixing machine is being installed to supply intermediate. Bunkers are supplied from most quays and are expensive for foreign ships.

Consul: There is a British Consul.

Repairs: There are 3 drydocks and all repairs can be done.

Airport: The airport is 6 km. from Vera Cruz with twice daily flights to Mexico City.

AUTHORITY: Delagacion Coordinadora, Edificio Oficinas Ligadas al Puerto, Plaza de la Republica No. 210, 5th floor. *Tel:* 2-13-19 and 2-30-40.

Empresa de Servicios Portuarios, Plaza de la Republica No. 210. *Tel:* 2-92-22, 2-40-22 and 2-74-11.

Comision Nacional Coordinadora de Puertos, Cuernavaca No. 5, Mexico, 11 D.F. *Tel:* 553 87 11.

Federated States of Micronesia

TOMIL HARBOUR, Yap: 09.31 N. 138.10 E. **(See Plan)**

PORT LIMITS: Vessel is considered an "Arrived Ship" on reaching Buoy No. 1. Laytime commences at this time.
DOCUMENTS: All necessary documents required by the Clearance Department shall be prepared before arrival. (e.g. Crew Lists, Passenger Lists, Customs, Health Documents, Manifests, Bills of Lading, Ship's Papers, Ship's Certificates, etc.)
PILOTAGE: All pilotage services must be requested by the Master or his Agent on their behalf 24 hours prior to vessel's arrival.

ETA messages for Pilotage are best routed through Port Control on VHF Channel 16.
ANCHORAGES: Inside Tomil Harbour, depth is 84 ft. MLW. Distance from dock, 3,000 ft.
RESTRICTIONS: There is no restriction in accordance with the state of tide and draft. However, restriction imposed upon vessel entry after 1800 hrs. and before 0600 hrs. because the channel is marked by an unlit buoy and can. Except in case of emergency arrival/departure will be limited to daylight hours.
MAX. SIZE: The length of the channel is 9,600 ft., breadth is 300 ft. Max. size for any vessel entering the port and for tankers is 6,000 g.r.t. Depth in the channel 78 ft.
HEALTH: Master of vessel or designated Agent should advise Port Authority 24 hours in advance of her arrival of any communicable diseases, sickness or injury found among its crew even if the vessel's last port of call was in the Federated States of Micronesia.
RADIO: Vessel should route her ETA via Yap Port Radio by using 5,205 kHz or use VHF Radio Channel 22A or 16.

Also see "Pilotage".
VHF: Port Control Radio – Channels 16 and 22A.
RADAR: No port radar.
TUGS: None.
BERTHING: Dock is 451 ft. long, depth is 78 ft. MLW, max. size permissible at LW (salt water) is 6,000 gross tons.
CRANES: None. Discharge is by ship's gear.
BRIDGES: None.
STEVEDORES: ETA advices required 24 hours before arrival in order to arrange Terminal personnel.

Terminal Operator: Waab Trans Co. Inc., P.O.Box 177, Yap, Western Caroline Islands 96943. Tel: 2301/2302.
MEDICAL: Advise Agent prior to arrival if medical assistance required.
TANKERS: Load/discharge lines are 6 in. diameter.
DENSITY: Average 95% salt water, 5% fresh water.
FRESH WATER: Available on pier apron using fire hose connected to fire hydrant for drawing fresh water.
FUEL: Advance notice required through Agencies' Offices in order to arrange fueling with Mobil Oil Inc. Plant. Fuel line available at the dock.
CONSULS: No consuls available.
REPAIRS: Deck and engine repairs are possible upon request of the Ship's Master. Location for such repairs will be designated by the Sea Port Manager.
DRY DOCKS: Not available.
SURVEYORS: ABS.
HATCHES: Normally opened/closed by combination of crew and stevedores.
CUSTOMS ALLOWANCES: Each crew member is permitted to hold out of bond a maximum of 2 bottles of wine, 2 cartons of cigarettes, 12 cans of beer, etc.
CARGO GEAR: Discharge is by ship's own gear. Other relevant gear such as forklifts and trucks provided by the Terminal Operator (see "Stevedores").
REPATRIATION: Effecting of crew changes will be arranged by the proper Agency Office.
AIRPORT: Distance from Sea Port to Airport is 2.5 miles, served by regular airline with 3 flights per week on Tuesdays, Thursdays and Saturdays.
TIME: GMT plus 10 hours. No alterations made throughout year.
HOLIDAYS: Cargo work can be arranged on holidays, except Christmas Day.
POLICE/AMBULANCE/FIRE: Police tel: 3333, Ambulance tel: 3444, Fire Department tel: 3222.
TELEPHONES: Placement available only for Yap State owned vessels. Telephone available at the dock terminal for other vessels.
SERVICES: Tank cleaning equipment, discharge of slops, compass adjustment, etc., are not available in this port.
SHORE LEAVE: Crew members are allowed ashore if no communicable disease found onboard.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
DELAYS: Usually depends on the quantity of cargo, especially bulk cargo.
GENERAL: *Garbage:* Disposal of garbage in port is strictly prohibited.
DEVELOPMENTS: There are expected draft increases. New facilities and installations are expected in the foreseeable future.
AUTHORITY: The Port Manager – Tomil Harbour, Yap Transportation Division Office, P.O.Box 290, Yap, Western Caroline Islands 96943, Federated States of Micronesia. *Tel:* 2178. *Cables:* Sto Yap. *Contact:* Frederick Figir, Port Manager.

Monaco

MONACO: 43.44 N. 07.26 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port commence by the 2 breakwaters at the Eastern entrance.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists – 3 Landing Passenger Lists.
2 Stores Lists.
1 Manifest (cargo).
1 Bill of Health.
Ship's Register.

PILOTAGE: ETA via Monaco Radio – Channels 16, 12, within range. Pilot boat is a small white boat with a black "Pilote" painted on the side of the cabin. Pilot boards vessels 0.3 miles East of the harbour entrance.

Pilotage available: 1st May – 30th September (0800 hrs. – 2300 hrs.).
1st October – 30th April (0800 hrs. – 2000 hrs.).

Pilotage compulsory for all vessels over 30 m. LOA.

ANCHORAGE: One half mile East of the Southern breakwater lighthouse. Depth at the anchorage 68 m.

MAX. SIZE: Max. length 130 m. Stern to the pier on the West side or alongside the North quay, only from October to March and with 8 days' notice. Max. draft allowed: West Pier 8 m; North Quay, 7 m.

HEALTH: Health Declaration must be handed to the Customs. If coming from neighbouring countries (France, Italy, Spain) not requested.

RADIO: Monaco Radio (Tel. 93.30.13.13). VHF Channel 16. Port Operations Channel 12. Public telephone calls Channels 20, 22, 28 and 86.

RADAR: No port radar service.

TUGS: Pilot boats (2×158 h.p.) available without notice. 1 tug boat 200 h.p. with notice and 1 tug boat 450 h.p. available with notice.

BERTHING: All 3 quays plus inner sides of the breakwaters and Western "T" pier are available for mooring yachts stern to. The port may be congested during the Summer season. The possibility remains of anchoring off the dock.

CRANES: 1×10 tonne mobile crane.

MEDICAL: There is a state hospital fully equipped for surgery, etc.

FRESH WATER: Can be supplied at all berths alongside the quay. If vessel on Roads, water may be provided by barge up to 500 tons per day, with one week notice. Tel. Cannes 93.39.36.12.

FUEL: There is a fuel berth in S.W. area of port for ships up to 80 ft. LOA. Bunkers are available on the quay by truck but no heavy fuel available.

CONSULS: Most countries are represented in Monaco.

CUSTOMS ALLOWANCES: Same as in French ports.

REPAIRS: Only for yachts.

DRY DOCKS: 1 slipway × 100 tons, 1 slipway × 40 tons, 1 crane × 10 tons.

REPATRIATION: Good railway connections.

AIRPORT: Nice – Cote d'Azur. Distance 25 km.

TIME: GMT plus 1 hour. May to September GMT plus 2 hours.

HOLIDAYS: New Year; National Holiday, (Jan. 27th); Easter Monday, (May 1st); All Saints' Day; His Serene Highness' birthday, Nov. 19th. Harbour services work on Sundays and Holidays.

POLICE/FIRE/AMBULANCE: Maritime Police, Quai Antonie 1st Tel. 93.30.22.39; Ambulance/Police Secours Tel. 17; Fire brigade Tel. 18.

TELEPHONE: Available at all berths.

SERVICES: Engine repairs. Electronics. Maintenance for yachts. 220 volts available at all berths. TV aerial sockets at all berths free of charge.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: *Recommendations to Ship-Owners, Masters and Crew Members:*

Ship-owners, Masters and Crew members are strongly requested not to dispose of hydrocarbon, household refuse and other rubbish into the Monaco harbour (i.e. cartons and mainly plastic containers).

Used motor oils and other petroleum residues must be transferred into tanks exclusively provided for this purpose at the beginning of the North and South jetties and on the landing stages facing the Rainier III swimming pool.

These tanks are signposted with panels bearing the words "Huiles Usees" (used oil) in red letters on a white background.

Household refuse and other rubbish is to be put into garbage containers located around the harbour throughout the year. Furthermore, during the Summer, special individual bags are made available free of charge to all in-coming vessels.

Those responsible for ships equipped with used water tanks or bilges are requested to empty these containers off the coasts of the Principality at a minimal distance of 6 miles.

Those whose ships are not equipped with these used water tanks are requested not to dispose of their used water during their stay in the Monaco harbour, and to use the sanitary installations and facilities made available to them within the harbour.

Offenders infringing the above provisions will be penalised in accordance with the stipulations of Law No. 954, dated April 19th, 1974, dealing with the fight against water and air pollution.

DEVELOPMENTS: The new yacht harbour at Fontvieille (West of the old town of Monaco) is now open. It is a private harbour with about 100 berths for yachts up to 35 m. All berths are fitted with water and electricity. Port Office Tel. 93.50.80.99.

This new port provides very good shelter regardless of wind direction.

AUTHORITY: Directeur du Port et du Service de la Marine, B.P.468, 98012 Monaco Cedex. *Tel:* 93.30.76.87 or 93.30.19.21. *Telex:* 489035 MC. *Contact:* Captain Philippe Haquette, Harbour Master.

Morocco

AGADIR: 30.25 N. 09.38 W. (See Plan)

DOCUMENTS:

Health Declaration. 6 Crew Lists.
4 Cargo Manifests. 6 Passenger Lists.
6 Stores Lists.

PILOTAGE: Compulsory. Pilot boards at port entrance. International code signals used. Pilot on VHF Channel 16, day and night.
ANCHORAGE: Good anchorage in open roadstead.
MAX. SIZE: Up to 29 ft. draft. Max. LOA 160 m., however vessel with LOA 190 m. has been accepted.
HEALTH: Pratique given immediately after berthing when port doctor boards.
RADIO: Agadir Radio operates 24 hours a day.
TUGS: 3 tugs available, 1×350 h.p., 1×1,275 h.p., 1×1,500 h.p.
BERTHING:

No. of Berths	*Length (m.)*	*Depth (m.)*	*Remarks*
4	150	9.0	—
1	110	7.0	Ro/Ro.
3	100	6.0	Oil tankers and butane carriers.
1	—	6.0	Used by Moroccan tankers only.
1	120	5.0	Equipped with fish pumps.

CRANES: One Titan crane of 40 tons capacity.
STEVEDORES:
Working Hours: 0700 – 1200 hrs., 1400 – 1800 hrs. , 2000 – 0600 hrs. (With 24 hours' notice of ETA).

New times to be introduced but date not fixed: 0700 – 1500 hrs. and 1500 – 2300 hrs.

MEDICAL: Doctor and hospital facilities available.
FRESH WATER: Available from pipe-line at berths.
FUEL: Fuel and gas oil available from pipe-lines at berths.
CONSULS:

	Tel.		*Tel.*
Belgium	217 00	Norway	238 40
France	228 29	Spain	221 26
Italy	226 66	U.K.	209 05 (Casablanca)

REPAIRS: Small machinery (up to 500 h.p.) and electronic repairs can be effected.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: Crew allowed normal daily consumption of tobacco, wine and spirits.
POLICE/FIRE/AMBULANCE:

	Tel.		*Tel.*
Police	19	Hospital	224 77
Fire/Ambulance	15	Port Police	223 49

TIME: GMT. No changes.
HOLIDAYS: Fete du Trone, (Throne holiday); 3rd March; Fete du Travail (Labour Day); 1st May; Al Massira Al Khadra, 6th November; Fete de l'Independance (Independence Day) 18th November; Aid El-Fitr, (1st and 2nd Chaoual); 1st January; Aid Adha (10 et 11 Hija); Le Premier Moharrem (The first Moharrem) and Aid Maouloud Annabaoui (12 et 13 Rebia I).
Note: Chaoual, Hija and Rebia are months in the Muslim calendar.

The following days are movable feasts governed by the Arabian Calendar – 1/2 Choual, 10/11 Diahijja, 1 Moharram, 1/13 Rabia I.

Work may be arranged on all holidays.

SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
DEVELOPMENTS: New port of Anza under construction in position Lat. 30° 26′ N., Long. 09° 35′ W.
Facilities will include 3,500 m. of quays, a Ro/Ro terminal and ship repair facilities. Depths alongside 10.5 m. – 15.0 m.

SHIPMASTER'S REPORT: November 1979.
Documents:

3 Copies Crew's Personal Effects.
6 Crew Lists.
3 Stores Lists.
3 Vaccination Lists.

Anchorage: Vessel anchored 0.5 miles South of breakwater.
Pilotage: Compulsory. Pilot boards 0.5 miles S.W. of the outer buoy. 1 hour's notice required.
Restrictions: Vessel can enter and sail during hours of darkness and at any stage of the tide.
Max. Size: Max. LOA 600 ft. (approx.) and max. draft. 26 ft. (approx.). Size of vessel limited by the swinging room.
Radio: Agadir Radio.
VHF: Pilot and Port Authority on Channel 16.
Tugs: Two available.
Berthing: Vessel berthed at No. 8 berth on the South mole which is about 7 cables from the harbour entrance. Max. LOA approximately 600 ft. and max. draft approximately 26 ft. Least depth of water in channel from sea to berth is approximately 30 ft. The bottom at the berth is sand and mud and the density is 1025.

There are no special bulk handling facilities. There are 10 cranes with safe working load of 10 tonnes. Ro/Ro facilities available, no floating cranes. There is ample equipment for handling palletised cargoes also storage space for palletised and break bulk cargoes. Containers are handled by ship's gear and storage space for containers is limited.
Facilities: The following are available: Fresh water (poor quality), fresh provisions, small repairs, there is a small machine shop, airport, Lloyd's Surveyor and laundry service.

AUTHORITY: Ministry of Equipment, Agadir Port Directorate, Agadir, Morocco. *Contact:* M. Abdelali, Port Director.

CASABLANCA: 33.36 N. 07.37 W. (See Plan)

PORT LIMITS: Vessels considered as "arrived" when passing Buoy CA 5 in position Lat. 33° 37′ 05″ N., Long. 7° 35′ 02″ W.
DOCUMENTS:

Certificate of Registration.
Cargo Manifests.
Stores List.
Crew Lists.
Passenger Lists.
Customs Declaration.
Bill of Health.
Ship's Entry Declaration.
International Tonnage Certificate.

All Stores Lists must be completed prior to arrival. If any errors found, vessel is heavily fined.
PILOTAGE: Compulsory for all merchant vessels of 100 tons and over, in the area between the meridians 7° 37′ 10″ W. (the foot of Jetee Moulay Youssef) and 7° 33′ 50″ W. (Table d'Oukacha) and South of the parallel 33° 37′ 4″ N. Pilotage is available day and night. The Pilot meets vessel at the CA5 buoy.

A red flag displayed at the signal station by day indicates that the Pilot cannot come out, on account of the sea, but vessels may enter the port at their own risk, and the Pilot will await them under the shelter of Jetee Moulay Youssef. Should bad weather prevent the Pilot from coming out, a vessel should not attempt to enter the harbour at night. The Master may contact the Pilot station for port radar service by VHF Channel 12.
ANCHORAGES: The anchorage outside Casablanca Harbour is partially protected from winds between South and West but a Westerly swell finds its way into the bay. With a heavy Westerly or Northwesterly swell the anchorage becomes dangerous.

The holding ground in most places outside the harbour is poor, but a berth with good holding ground may be obtained in a depth of 13 fathom North of Jetee Moulay Youssef. There are numerous anchorage berths in the harbour, some at mooring buoys, in depths up to 12.8 m. (42 ft.).
MAX. SIZE: Max. length permissible, about 884 ft.; max. breadth permissible, about 105 ft.; max. draft permissible, about 32 ft.; but normally 30 ft. for berthing alongside. Tankers: Up to 37 ft. draft.
Report: A vessel's agent has reported that for tankers discharging crude oil at the Crude Oil Berth the Max. draft is 35 ft. and Max. LOA 250 m.
HEALTH: Masters must fill in the Declaration of Health and display the "Q" flag, to obtain Pratique. In the event of any suspected disease or fever on board, Masters have to warn their Agent before the ship's arrival.
TUGS: There are 9 tugs of 800 – 1,500 h.p. 3 of them are sea-going tugs fitted with modern salvage apparatus. Normally tugs join the vessel at port entrance. To call them, 4 long blasts and 1 short for 1 tug, 4 long blasts and 2 short for 2 tugs, etc. Ship's lines are mostly used.
BERTHING: To arrange berth, ETA message should be given 24 hours before the ship's arrival.

Mooring: When making fast to the jetty by the stern, the anchor should be let go at a sufficient distance from the jetty to allow for a good scope of hawsers.

Vessels are recommended to secure with special 10 in. coir hawser tailed with wire. It is recommended to moor head to the swell, but in bad weather a vessel should be ready to leave at short notice.

Pier/Jetty	Berth No.	Total Length (m.)	Depth (m.)	Use
Moulay Youssef Jetty	P3	120	10.00	Crude oil, Petroleum Products.
	F	300	10.00	Dangerous products, lights and beacons.
Tarik Pier	T2	140	6.00	Heavy loads.
	10 – 13	390	8.20	Containers.
	A1,A2,A3.	140	8.20	Car–Ferry and Ro-Ro.
Commercial Pier	20 to 24	572	9.10	Cereals, General Cargo.
	T3 – T4	250	9.70	General Cargo, Sugar, Cereals, Passengers.
	30 – 33	480	9.70	Passengers, General, Bagged goods, Containers.
	34 – 36	400	9.70	
	R2 – R3	200	7.50	Fertlisers, Mineral Sand, Iron, General Cargo.
Citrus Products Berth	40 – 44	568	8.50	General Cargo, Fruit, including citrus products.
	T5 – T6	220	9.10	Citrus products.
	50 – 55	703	9.10	Citrus products, General Cargo, Sugar in bulk.
	R4 – R5	200	7.50	Iron - Scrap.
Phosphate Jetty	60 – 63	540	9.00-12.00	Iron, Ore, Coal, Phosphates
	64 – 66	510	9.00-12.00	Ore, Coal, Phosphates
	T7	125	9.00-12.00	Phosphates

CARGO HANDLING EQUIPMENT:

Dock Cranes:	62×5 – 10 tons
	3×12 – 15 tons
	2×25 tons
Mobile Cranes:	17×6 tons
	1×36 tons
	1×72 tons
Mounted Cranes:	3×6 tons
	5×10 tons
Gantry Cranes:	1×19 tons
	1×12.5 tons
Floating Crane:	1×50 tons, with 120 tons load capacity.
Forklifts:	241×1 – 32 tons
Grabs	32×2 – 5 tons
	13×6 tons
Straddle Carriers:	12×30 tons

RADIO: The name of radio station for ETA cables to Agents, receivers, etc., is Casablanca Radio.

VHF:
Pilot: Channels 12 and 26.
Port: Channels 16, 12 and 14.
Harbour Manager: Channel 12.
Tugs: Channels 12 and 16.

SPECIALISED CARGO HANDLING FACILITIES:

Container Terminal: The container terminal was built in 1972 and is situated on the Tarik Pier in the West side of the port.
Total area: 18 hectares divided into 8 zones.
Total quay length 790 m.
5 berths are reserved for the container traffic.
Depth 7.0 m. – 9.0 m.

Storage capacity: The storage area covers 85,000 sq.m. This allows a minimum storage capacity of 5,000 T.E.U.'s at two high.

Equipment:
2 mobile cranes on rails of 25 tons each.
2 rubber tyred travelling cranes of 36 tons each, and 1 mobile crane of 100 tons.
12 straddle carriers.
4 fork-lift trucks.
20 trailers.
7 tractors.

Grain Terminal: The Grain Terminal is located on the West side of the Commerical Pier. The terminal has a quay length of 250 m. and a depth of 9.5 m.

Capacity:
2 vertical silos of 30,000 tons storage capacity.
1 flat storage of 10,000 tons capacity.

Equipment:
3 gantries of 200 t.p.h. capacity each, reserved for import cargo.
2 gantries of 200 t.p.h. capacity each, reserved for export cargo.

Ro-Ro Terminal: The Ro-Ro facilities are located in the area of Berth A1 and A3 with 140 m. quay and depth 8.0 m.
2 Floating pontoons of 100 tons capacity.
2 Floating pontoons for Ro-Ro cargo with a maximum load of 35 tonnes.
1 freight station covering 6,000 sq.m.
Stuffing and unstuffing sheds and a parking area for TIR trailers.

Cold Storage: Two refrigerated warehouses on the Citrus Pier of 8,500 sq.m.
First warehouse is reserved for fruits, vegetables and any perishable produce, area 3,000 sq.m.
Second warehouse is intended for citrus and early vegetables, area 5,500 sq.m.

BULK HANDLING FACILITIES: *Phosphate Terminal:* 4 berths (64-65-66 and T7) located at the transversal jetty with a quay length of over 630 m.

Handling equipment:
2 conveyors of 2,500 t.p.h. for discharging railway wagons.
2 conveyors of 1,250 t.p.h. connecting the stockpile to the quays.
4 conveyors of 1,250 t.p.h. for loading purposes.
2 gantry cranes of 650 t.p.h. at Berth T7.
The storage capacity is 420,000 tons.

Iron Ore and Coal Terminal: 4 berths (60 to 63) with a quay length of 540 m.

Handling equipment:
1 gantry 12.5 tons.
1 new gantry of 600 t.p.h.
Storage area of 20,000 sq.m.

STEVEDORES: There are 13 stevedoring companies. Normal working days are in two shifts (from 0700 to 1500 hrs. and 1500 to 2300 hrs.). Ship's Agents arrange gangs in connection with stevedores. Two daily orders (at 1100 hrs. and 1600 hrs.) are made to fix the number of gangs.

MEDICAL: It is necessary for Agent to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: There are 4 tanker berths, *(a)* Berth P3 for Import and Export of white products, max. permitted draft 37 ft. and 60,000 d.w.t. *(b)* Three berths for Import and Export of black products. These berths (No. 60, 61 and 62) are situated inside the harbour, vessel's draft should not exceed 30 ft. Security tug necessary when handling certain petroleum products.

Report: December 1982: Vessel with LOA 237 m. (77,000 d.w.t.) berthed at No. P 3 and parted 11 mooring lines. For this reason owners believe the berth is unsafe for a vessel of this size with a swell running.

FRESH WATER: Numerous feeders along berths. Also delivery by barges is possible.

FUEL: All grades available. Ex-wharf or by barge.

FIRE PRECAUTIONS: Two firemen remain on board tankers while vessel berthed alongside. One fireman is required for other vessels carrying dangerous cargo.

CONSULS: The following countries are represented by consuls in Casablanca:

Algeria
Argentina
Austria
Belgium
Brazil
Denmark
Finland
France
Germany F.R.
Greece
Haiti
Italy
Netherlands
Norway
Panama
Poland
Portugal
Spain
Sweden
U.K.
U.S.A.
Yugoslavia

REPAIRS: Only small repairs and dry docking works are carried out.

DRY DOCKS: One large dry dock, 152 m. long and 22 m. wide (lifting power 10,000 tons). Three slips for ships up to 700 tons.

GANGWAY/DECK WATCHMEN: It is necessary to have watchmen on board. They are hired by the ship's Agent.

OPENING/CLOSING HATCHES: This work is normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes are permitted for each crew member to be held out of bond.

REPATRIATION: Facilities exist for effecting crew change and arranging any necessary repatriation.

AIRPORT: Distance from airport, 25 miles. International connections.

TIME: GMT. No changes.

POLICE/AMBULANCE/FIRE: Police, 2210-74 or 19; Ambulance, 15; Fire, 15.

TELEPHONES: Only arrangements for placing telephones on board passenger ships are possible.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Needed.

DEVELOPMENTS: A new container terminal is to be built to the East of the phosphate jetty.

AUTHORITY: Direction d' Exploitation du Port de Casablanca (D.E.P.C.) 2 Bd. des Almohades, Casablanca, Morocco. *Tel:* 031.61.11, 031.89.51. *Telex:* 220.62, 226.90. *FAX:* 031.57.21. *Contact:* M. Bellouchi, Director.

EL JADIDA (Mazagan): 33.15 N. 08.31 W. (See Plan)

DOCUMENTS: As for "Casablanca".

PILOTAGE: Arranged by Agent, basis vessel's ETA given in advance. Pilot boards about 2 miles from the port entrance.

ANCHORAGES: About half a mile from head of North jetty in depths of 13 m. to 14 m. Hard rock bottom covered in sand. Holding ground is fair only.

RESTRICTIONS: The port comprises an entrance channel 50 m. wide and an outer harbour area 7 hectares, partially dredged to 3 m. depth to make a waiting basin. In the Southern part of the outer harbour is a quay, called the barge quay, 120 m. long, dredged to 6 m. depth.

MAX. SIZE: No limitations for vessels anchoring. For entering harbour, max. length 80 m., draft 5 m., entering at high water.

RADIO: No local radio station. Use Casablanca Radio for messages to Agent.

TUGS: Available. Normally join vessel 2 miles from port entrance.

CRANES: 2 electric cranes and 2 diesel cranes available.

MEDICAL: Hospital facilities available. Vaccinations can be arranged.

FRESH WATER: Available at the quay.

FUEL: Can be supplied subject to 24 hours' notice.

CONSULS: The only consular representatives are those of France and Portugal.

REPAIRS: Small repairs can be done on board, or parts sent to Casablanca. One small dry dock reserved for Port Authority vessels and fishing boats.

WATCHMEN: Recommended to employ watchmen.

OPENING/CLOSING HATCHES: Work performed by ship's crew.

REPATRIATION: Can be arranged via Casablanca.

AIRPORT: Nearest commercial airport is at Casablanca.

TIME: GMT. No changes.

HOLIDAYS: Sundays and holidays, except for National holidays, can be worked on payment of overtime.

POLICE/AMBULANCE/FIRE: Police, Tel: 19; Ambulance, Tel: 15; Fire, Tel: 15.

TELEPHONES: Cannot be connected to vessel, but telephone situated on the quay.

AUTHORITY: Arrondissement de L'Equipment et de la Promotion Nationale.

JORF LASFAR: 33.08 N. 08.38 W. (See Plan)

SHIPMASTER'S REPORT: May 1984.

LOCATION: The Port of Jorf Lasfar is situated approximately 62 nautical miles by sea, and 120 km. by a good tar sealed surfaced road from the town of Casablanca, in Morocco. The natural deep water bay along the coast has afforded the development of an industrial complex, designed for the export of phosphates and minerals, also phosphoric acid and sulphuric acid.

Local sources of information have indicated to me that development began some 7 years ago. Large earth moving equipment carved away the hillsides, moving several million cu.m. of rock and earth, and transformed an area approximately 2,200 m. × 1,700 m. which now forms the harbour complex and Port of Jorf Lasfar. The port area and wharves are enclosed by a man made breakwater.

The principal breakwater, (Outer Breakwater) extends in a direction N.W. from the shore, 1.75 miles S.S.E. of Cap Blanc du Nord, on which is erected a "Yellow" square tower 31 m. in height with a black top, the position of which is Lat. 33° 09.8′ N., Long. 08° 37.6′ W. The light exhibited from tower is occulting white and red 6 secs., eclipse 1.5 secs. White visibility 9 miles 018° – 190° (172°), red visibility 6 miles, 190° – 018° (188°). The breakwater then turns S.W. and S.S.W. for a total length of 3,100 m. The Contre Digue or Lee Breakwater extends 1,250 m. N.W. from the shore 1 mile S.S.W. of the root of the Outer Breakwater.

Light structures stand each side of the entrance, on the Outer Breakwater about 500 m. N.N.E. of its head, and on the head of the Lee Breakwater (Contre Digue).

On arrival and during the vessel's stay in port (May 1984), these lights were unlit.

Local Authorities advise me that as electric power has not yet been laid on to the port area the lights are functioning by gas, but whether it was for economical purposes, or any other reason, as already reported, the lights were not functioning. Unless for some specific reason, this is of no consequence as entry into the port is only permitted in daylight hours.

Development appears to progress very slowly as will be seen from the facilities at present available. Local Authorities assured me that the port will be fully operational in 1985. Our stay was 22 days to discharge a cargo of bulk wheat and corn (55,000 tons).

APPROACHING: *Noon, day before arrival:* Position Lat. 33° 00′ N., Long. 12° 59′ W. Course 088°(T) allowed 2° set Gyro course 088°. *Day of Arrival:* 0139 hrs. Sat. Nav. fix Lat. 33° 04′ N., Long. 09° 39′ W., disallowed set.

Radar observation of the coastline was made when 43 miles off (radar JMA 159B/3 cm.) but no positive fix. Vessel running in on Sat. Nav. D/R position.

0443 hrs. Radar fix obtained of Cap Blanc du Nord, 25 miles.

As vessel had no port information or charts ETA given as 0700 hrs. (Sunrise 0612 hrs. GMT).

Called Casablanca Port Control on Channel 16 from 0530 hrs. Reception was poor and distorted.

Called Jorf Lasfar Pilot on Channel 12 . . . No reply.

About 7 miles off, the Principal Breakwater was clearly outlined on radar screen, and observed 1 small coaster at anchor off the port.

Weather was cloudy, visibility clear, a light Easterly wind was blowing, slight sea with low, heavy, Westerly swell.

When about 4 miles off, contact was made with the Pilot. Due to the berthing of the coaster, we were delayed, and vessel was turned around on reciprocal course. At 0745 hrs. turned vessel around and made approach to embark Pilot, on his advice.

Embarking of Pilot: Under normal circumstances a pilot launch is available. Unfortunately for us, the launch was under repair and Pilot came out to embark on a rather large tug. Not a very suitable proposition at the best of times.

No positive position for Pilot Boarding has yet been established and no Sea Buoy to indicate any approach.

Ladder was rigged on starboard side. The tug had great difficulty to manoeuvre to come alongside, but after several attempts and much helm and engine movements, further hampered by the heavy swell running for both vessel and tug, the Pilot (French) boarded without any incident.

I am of the opinion, that the Pilot should board approximately 1.0 to 1.5 miles off the Principal Breakwater Head, by pilot launch, with vessel's speed about 5 knots, to afford a good lee and counteract the swell. The tugs should be secured before the ship enters the port as there is about a 90° to 120° port turn to line up with the entrance, with very little room for error. Both anchors to be ready for letting go. Once the turn into the entrance is made, the way must be taken off the vessel quickly and stopped, to effect a port swing again of 90° to back into the berth, for starboard side alongside berthing at Quay No. 2 where vessel berthed.

The 2 tugs attending, "El Hafid" and "Casablanca", 2,000 h.p. and 1,600 h.p. respectively, were adequate under the prevailing conditions. Both tugs used ship's lines. Vessel was secured with 5 head and 5 stern lines also 2 springs forward and aft.

Whilst alongside with a heavy swell outside the harbour area, surge was experienced alongside. Rope springs are suggested for use, or wire springs with rope tails.

The foregoing was a deeply laden vessel, length 224.5 m., draft 38 ft. (salt water) even keel.

PORT LIMITS: The seaward boundaries of the port have not yet been defined. There are no designated anchorages off the port for vessels carrying the various categories of cargo.

There is no designated Pilot Boarding Ground.

There is no Sea Buoy, or Channel Marker Buoys to indicate a safe Fairway.

Charterer's particular requirements to vessel's Agents to be sent through Casablanca Radio, CNP (8 MHz).

We were able to contact Casablanca Radio, 5 days prior to arrival (1,600 miles).

Preliminary "Notice of Readiness" was tendered to Agents and receivers of cargo by radio on arrival (0700 hrs.).

I prepared 5 copies of my own "Notice of Readiness" which was handed to the Agent on berthing. He signed in acknowledgement, for transmission to the receivers.

"Notice of Readiness" was accepted at 0830 hrs., which was office opening hours on our arrival day.

DOCUMENTS:

Crew List, 6 copies.

Passenger List, 6 copies.

Customs Crew Personal Effects Declaration, 1 copy and 1 copy for Agent.

Ship's Stores List, 1 copy and 1 copy for Agent.

Ship's Manifests. If on board for delivery to Agent.

Bills of Lading. If on board for delivery to Agent.

Ship's Particulars, 1 copy for Agent's use.

Ship's Certificates: To produce Ship's Register, Safety Equipment, Ship Construction, Safety Radio, Tonnage Certificate, Derat Exemption.

PILOTAGE: Give ETA to Agent at Casablanca. He arranges Pilot and tugs. Pilot comes by road from Casablanca.

Apparently 1 tug is always stationed at Jorf Lasfar port, but is not manned. A second tug comes from Casablanca. (Ordered by Agent, who arranges time). Two tugs seemed adequate for this vessel under the prevailing conditions. Advise Agent accordingly if you require more. Pilots consider 2 tugs are adequate.

Minimum 24 hours' notice is required for Pilot and tugs.

Pilot Launch: Approximately 7 m. in length, black hull, white topsides, with the word "Pilote" painted in white bold lettering on each side. (Also see "Approaching".)

ANCHORAGES: See "Port Limits".

Pilots recommended 2 miles off breakwater, keep entrance to harbour clear. Holding ground good. Obstructions not charted.

Keep well clear of Cap Blanc du Nord. I have seen heavy breakers 0.5 miles to 0.75 miles off this point in strong Westerly winds and heavy swell/sea.

Depth lines showing a 1 m. difference in soundings have been charted on locally produced chart.

TUGS: Tugs do not have their own lines, ship's lines are used.

Also see "Approaching" and "Pilotage".

RESTRICTIONS: Movements, entry and departure are restricted to daylight hours only. From observations (personal) tidal range at spring tides is approximately 8 ft. No tidal predictions are as yet available.

We entered with a draft of 38 ft. (11.58 m.) salt water even keel. No adverse effect, or ground effect noticeable. Be careful of lift and fall in heavy swell, and rolling which will increase draft. As previously stated, apart from the light on Cap Blanc du Nord, no other lights are as yet available as an aid to navigation.

Depths: Entrance Channel 17 m. No. 1 Berth 13.5 m. (phosphate).

MAX. SIZE: Nothing yet stipulated by Port Authority.

Our vessel: Overall length 224.50 m. Moulded breadth 32.20 m. Max. Summer draft 12.956 m. Max. d.w.t. (Summer) 64,931. G.r.t. 35,417, N.r.t. 21,296. Panamax bulk carrier.

Also see "Restrictions" and "Cargo Gear".

HEALTH: Pratique free from one Moroccan port to next Moroccan port.

Master to send cable 24 hours prior to arrival to Agent. Cable to include following information: Number of crew (including Master) on board, certify vessel free of infectious disease, all crew healthy, and in possession of valid health and travel documents (passports) and last port or ports of call (21 days prior) arrival, and request Agent to supply for Radio Pratique and Immigration Clearance.

Prepare Health Declaration Papers if on board, otherwise Agent will prepare on arrival at berth, for signature.

Vaccination Lists, 2 copies.

VHF: Use Casablanca. Call CNP2. Frequency Channels 16, 12 and 14.

When you know from the Agent that the Pilot will board on arrival at Jorf Lasfar, then call "Jorf Lasfar Pilot" on Channel 12.

Also see "Approaching".

RADAR: Not available.

BERTHING:

Berth No.	*Depth Alongside* (m.)	*Length of Wharf* (m.)	*Width of Wharf* (m.)	*Surface Area* (sq.m.)
1	15.60	300	82.28	24,684
2 – 3	12.50	180	75.00	13,500
4 – 5	12.80 – 11.50	180	30.00	5,400
6 – 7	11.50	45	30.00	1,350
8 (Oil Berth)	15.60	45	15.00	675
9 (Oil Berth)	12.70	45	15.00	675
Q.C./10	5.25 – 6.75 – 9.00	360	20.00	7,200
Q.S.	3.50 – 4.00 – 5.00	215	20.00	4,200

Note: The above information has been obtained from the Port and Harbour Authority. The maximum permissible draft for our vessel at Berth No. 10 was declared as 26 ft. This information was given by the Pilot who shifted the vessel from Berth No. 2 to Berth No. 10 and agreed to by the Port and Harbour Authority. I requested this in writing before shifting the vessel.

From the above legend for the Quai de Commerce (Berth No. 10) the shallowest part is at the Eastern end near the Ro/Ro adjustable run-off. Berth No. 10 Surface unsealed, and consists of loose metal/ sand/ stones, many potholes, dry grass, and totally unsuitable for discharge of grain.

Note of Protest and Indemnification of Liability served on the receivers by the vessel's command through the Agents. Receivers accepted it without question.

I am led to understand that the port is to be divided into 2 sections. Berth Nos. 1 to 7 will be privately operated, and the remainder of the port will be operated by the government.

On some plans, a grain silo is shown on the Southern side of "Quai de Commerce", adjacent to the Ro/Ro terminal. This I believe will now not be developed, and Jorf Lasfar will not be used as a grain port. At times vessels use Jorf Lasfar to lighten ship to 30 ft. and then proceed to Casablanca for further discharge.

Berth use (on completion of port):

No. 1	Phosphates	Nos. 8 & 9	Petroleum
No. 1 Bis	Coal	Nos. 10 & 10 Bis	General
No. 2	Phosphates	No. 11	Service
No. 2 Bis	Coal	No. 12	Fish
No. 3	Phosphates	No. 3	Ro/Ro
No. 3 Bis	Minerals	No. 14	Cereals
Nos. 4 & 5	Sulphur	No. 15	Containers
Nos. 6 & 7	Acid		

CRANES: There are no permanent cranes to speak of at any of the berths.

6 mobile cranes were made available for the discharge of our vessel.

Type: Gottwald/Dusseldorf, luffing and slewing, diesel/motors.

Capacity: 6 tons × 8 m., 6 tons × 25 m.

Outreach: With base spreaders out, and tyres afloat, and in position the cranes could not plumb further than the centreline of the ship. (Beam 32.2 m. max., fenders alongside wharf).

No heavy lift cranes ashore or afloat available.

While in port 3 vessels were seen discharging heavy lifts for the industrial complex with their own gear.

One vessel discharged machinery and general cargo with ship's cranes.

Note: 1. Gearless ships would be serviced by the above mentioned mobile shore cranes.

2. Vessels with their own gear would have no difficulty to discharge cargoes such as grain/ores/coal/fertilisers/sulphurs/copra, etc.

SPECIALISED CARGO HANDLING FACILITIES: A container terminal is envisaged but at time of writing is non-existent, (wharf or cranes).

Berth is available for Ro/Ro vessels with adjustable ramp, (power facilities and terminal non-existent).

Berth for tankers (Berths No. 8 and 9), available but as yet no pipe-lines to storage tanks, behind the ridge of hills in the background of the port, have been laid on.

Berths available for liquid chemicals, (see plan), but no pipe-lines or facilities as yet available.

No facilities for LPG/LNG.

RADIO: "Casablanca Radio". Call sign CNP on 8 MHz.

We made contact 5 days (approximately 1,600 miles from Casablanca) prior to arrival.

BULK CARGO FACILITIES: Refer to legend of berths, cranes, and additional notes.

BRIDGES: None.

STEVEDORES: Agent will organise gangs with receivers.

Port Working Hours: Monday to Saturday inclusive 0700 – 2300 hrs. over 2 consecutive shifts 0700 – 1500 hrs. and 1500 – 2300 hrs. Overtime, Sundays and holidays when available and/or compulsory. A third shift overtime also possible when ordered by receivers and agreed by Port Authority (2300 – 0700 hrs.).

There appeared to be no "meal breaks" or "smokos".

There is a language barrier unless you speak French and/or Arabic.

MEDICAL: See "Documents".

There is a private clinic, and 3 hospitals for the general public, available at a town called El Jadida, about 25 km. from Jorf Lasfar.

Notify Agents who will make the necessary arrangements. Preferably 24 hours' notice is required due to the fact that there is no communication available from the ship or wharves (telephone). There is a telephone available at the Port Authority Office some 1.5 miles distant from the wharf area, but the office is not open day and night, also the Agent lives at Casablanca some 120 km. distant. My crew were cautioned to exercise care in their work habits to avoid accidents. Shore labourers will request first aid from the ship for minor cuts and bruises.

Dental treatment is also available at El Jadida.

It is advisable to have Cholera/Yellow Fever inoculations. Some charterers include this as a must in their charter parties. There is a Port Health Officer stationed at El Jadida, who clears the vessel on arrival.

TANKERS: Two berths. No pipe-lines laid at present.

DENSITY: During vessel's stay, when cargo discharged, calculations and final draft survey by ship was necessary. The average salinity (density) corrected for temperature was 1027.5/1028. Temperature varies between 16°C – 25°C.

FRESH WATER: No fresh water available at Jorf Lasfar, nor are there any facilities yet laid on the wharf for this purpose.

Vessel maintained consumption, average 12 tons per day (which included domestic, culinary, toilet flushing purposes and laundry) from the water made by evaporator at sea on passage and prior to arrival.

Agents advise me that in very urgent circumstances, fresh water is available by tug, approximately 40 tons maximum, from Casablanca, but very expensive. (Not less than U.S.$2,500 per 40 ton delivery.)

FUEL: Not available.

FIRE PRECAUTIONS: Normal ship safety fire precautions. No equipment available from wharf. Nearest available fire brigade is from El Jadida.

CONSULS: None available at Jorf Lasfar, or El Jadida, nearest is Casablanca. British Consul will act for certain Marine matters for British registered vessels.

I was able to have an extension to the vessel's "Safety Equipment Certificate" done in 30 minutes.

Take your passport to the British Embassy to gain entry. This will be checked after you have filled in a small form to indicate the purpose of your call.

REPAIRS: There are no facilities available for ship repairs, deck or engine.

The nearest repair yards and facilities are available at Casablanca. From the port plan, it would appear that there is to be 2 small docks or slipways, with workshop attached.

DRY DOCKS: None.

SURVEYORS: 1. Cargo Surveyors/Inspectors not available at Jorf Lasfar.

2. Ship's Surveyors (Lloyds/ABS/BV) not available at Jorf Lasfar.

Agents will arrange for Surveyors from Casablanca to attend. I was able to get the Lloyd's Surveyor at Casablanca to extend vessel's "Safety Construction Certificate". It took 7 days.

GANGWAY/DECK WATCHMEN: Compulsory. Two per vessel, one for ship and one on the wharf. It was noticed that they do a 24 hour shift. It is not essential to victual them, but as there is food available, it would seem the best idea to feed them and get good co-operation and service. The watchmen are ex-seamen and understand English. Agent will sign the victualling voucher.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 750 ml spirits per man/per week. They will open the bond stores for further issue weekly. Cost of obtaining Customs Officials per week 600 Dirhams which is about U.S.$75.

Beer is not sealed.

If vessel's stay is to be an extended one, obtain permission and take out the required amount for the stay, on *arrival.* This will save you the charge each time the bond store is opened. The Agent only advised me of this after the first request for additional allowance.

Customs Officials will examine personnel and their baggage on leaving ship and returning from shore.

CARGO GEAR: Discharge was effected by shore gear, as our vessel is a gearless vessel.

Grabs were used, of which there were 8. They leak like sieves. ("Note of Protest" for loss of weight/quantity was served on receivers). The grabs are not the automatic open release type. They were landed on the hopper steel framework to effect release. The crane hooks were not moused, thus several times the grab wires came unsecured.

6 hoppers, the sides were not high enough, hence constant spillage.

A corkscrew type shaft, with an 8 in. tubular outer casing powered with a small electric motor at its head, driven by portable mobile electric generator, is used as a mini-elevator to load the grain which is dumped on the wharf into trucks and transported to the various consignees is one of the methods employed.

Cargo is also bagged from this stockpile on the wharf and carried and stacked on flat top trucks (240 bags per truck average) for delivery to consignees.

Canvas tarpaulins are used to cover the grain, in the event of rain.

We experienced 2 heavy downpours lasting about 3 to 5 hours, when pools and deep puddles of water developed (Berth No. 10), and 2 to 3 light rain periods lasting about 1 hour.

Include in your protest on arrival "Ship not responsible for damage due to discharge in wet or inclement weather, or for contamination and deterioration". This will be accepted by the receivers without question.

Direct loading from grab to hopper to trucks is also carried on. There is no weighbridge for weight checking.

Also see "Port Nador" – "Report, January 1984".

REPATRIATION: Crew members are able to join vessels or be repatriated.

Visas are required for certain citizens, whose country of domicile do not have diplomatic reciprocal consulates. Therefore please check before effecting any crew replacement.

On arriving at "Mohammed V" Airport at Casablanca, Immigration Authorities will endorse your passport with an entry permit. Cable or advise Agent the flight number and request Agent to assist in Immigration entry facilities.

You will have a baggage check at the airport.

When cleared you have to proceed to El Jadida where the Immigration will again endorse your passport. You will possibly have another baggage check at Customs in El Jadida and then proceed to Jorf Lasfar. This is because Jorf Lasfar is outside the jurisdiction of Casablanca.

AIRPORT: "Mohammed V" Airport is situated approximately 35 km. from Casablanca, allow 45 minutes driving time from the heart of the city. The airport is serviced by a great many airlines, to name but a few, Royale Air Maroc, Iberia, Air France, Sabena, K.L.M., Swiss Air, Aeroflot, Lufthansa, British Airways, Iraqi Airways, Kuwait Airways, Libyan Arab Airlines.

Internal domestic flights are available to Agadir (on the coast), Marakesh and Ouarzazate (inland), Rabat the capital city of Morocco and Tangier.

There is no airport at Jorf Lasfar.

TIME: GMT. No changes.

HOLIDAYS: There are 5 official governmental holidays.

There are 3 religious holidays (movable dates).

New Year's Day (English calendar).

On the above days "No Work is performed". This is questionable as we did work and sail on May 1st (Labour Day), which is one of the supposedly official holidays.

POLICE/AMBULANCE/FIRE: As yet there are no facilities available at the wharf in Jorf Lasfar. There are facilities at El Jadida 25 km. away. No assistance will be afforded the Master if he wishes security escort or Immigration facility for discharging crew members who are being dismissed for offences aboard ship, and have to be lodged in hotels prior to repatriation. They will only assist if there has been criminal assault on board.

EMERGENCY CO-ORDINATION CENTRE: None available at Jorf Lasfar. The Agent is your co-ordinator.

TELEPHONES: None at all available on ship, or wharf, at time of visit.

Also see "Medical".

Overseas calls are possible from the Post Office at El Jadida or some of the 4 or 5 star hotels at Casablanca. There are no direct dialling facilities. Connections are made through Paris.

I had difficulty contacting my Owners at Singapore, so had to use the telex from the hotel and request them to call me, which did not take long.

SERVICES: None available at Jorf Lasfar. Casablanca is the nearest town to offer facilities for radio and radar repairs, through the Agents.

BANKS: None available at Jorf Lasfar. "Banque Credite Maroc" operates in El Jadida. Casablanca is the nearest city to offer any facilities for transactions.

STORING: Vessels can be stored by truck.

No barges available. No launches available, only the pilot launch. In due course when the port becomes fully operational storing from barge on the offside will be possible with ship's gear.

No regulations in force regarding storing at present.

Trucks can proceed alongside ship at the berths.

Fork lift trucks (2 available – 3 ton) belonging to the port. 1 front end loader rubber tyre was available.

Customs Regulations: Ship's machinery, spare parts, deck stores, goods shipped from overseas, are subject to Customs clearance.

VERY IMPORTANT: Declarations/invoices *must* be in the French language, proper, clear and precise nomenclature for *every item,* with the cost per individual item.

e.g. It took 9 days to clear a container (LCL) containing equipment for the installation of "Halon 1301" after the container was landed at Casablanca to be delivered to ship's side.

SHORE LEAVE: Shore leave is permitted for ship's Officers and crew. Passes are issued by the Immigration Authorities, after the vessel has berthed.

You must be in possession of your Pass when ashore.

If intending to stay at an hotel in El Jadida or Casablanca take your passport to check in at the hotel, as without it, you might not gain entry. Your passport will be held at the reception desk until account settled prior to checking out.

There is no way to obtain a taxi *from* the port.

Cargo transport trucks, initially offered crew transportation to El Jadida or Casablanca. Transport is available (taxis) from Casablanca or El Jadida, to the ship. Cost varies (day or night). Normal fare: El Jadida to ship 50 Dirhams (U.S.$6). Casablanca to ship 350 Dirhams (U.S.$42). Small mini-taxis are available for short distance transport in Casablanca. They do not have meters, 10 Dirhams seem to be the normal fare, for reasonably short distances.

"Siesta Time" is from 1330 to 1500 hrs. Business Houses (offices) close from 1300 to 1430 hrs. Working hours from 0830 to 1300 hrs. and 1430 to 1830 hrs.

Hotels: Casablanca: Several from 3 star to 5 star and prices range from 135 – 300 Dirhams for a single. Hyatt, 500 – 600 Dirhams. Consult tourist guide for information.

El Jadida: 2 hotels, the "Salam" and "Dounia", on the beach front. The former is more modern.

Sunbathing and swimming permitted in and around the hotel swimming pools. Tennis courts, volley ball, archery, horse riding, indoor dance and disco.

IDENTITY CARDS: See "Shore Leave".

REGULATIONS: No regulations as yet promulgated by the Port Authority. A Harbour Master was appointed 1 week before we sailed.

As mentioned earlier Pilots are ordered by the Agent and come from Casablanca. The Harbour Master will not be doing pilotage.

DELAYS: We had none, having berthed on arrival. However, I would expect some delay if the wharf area has not been cleared from the previous vessel's cargo.

WEATHER: *April:* During the vessel's stay in port, strong winds Beaufort Force 7 were logged, coming from a West to W.N.W. direction. Winds backed to South and East, Beaufort Force 5. Heavy rain showers accompanied the winds. Temperatures ranged from 15°C at night to a maximum of 25° – 27°C during the day. Heavy dew after sunset.

AGENT: The Charterers and Owners both used the services of the same Agency.

Lasry Maroc, 30 Avenue de l'Armee Royale, Casablanca. Telex: 21949, 21092. Tel: 31.38.75, 31.19.54. Cables: Jolasry.

The above Agent has an office equipped with telex and telephone facilities at El Jadida.

Lasry Maroc, 2 Rue William Redman, El Jadida. Telex: Jolasry 78990 M. Tel: 3276, 3370. Cables: Jolasry, El Jadida.

Note: 1. The telex number at Casablanca we used was Sagnav 24646 M.

2. The telephone numbers at Casablanca shown above are those printed on Agent's visiting cards.

SHIPMASTER'S REPORT: April 1988.

We were contacted by the pilot from the pilot station at El Jadida. Pilot boarded the vessel one mile off breakwater. Due to heavy swell, a good lee has to be provided for the pilot vessel. Breakwater lights were found to be working, but the light (Occ.W.R.10, 6M.) was not functioning. 2 – 3 tugs are available for assistance. There are 2 mobile cranes fitted with grabs at Berth No. 4. Each grab discharges about 8,000 tonnes per day. Heavy surging of the vessel takes place alongside and continuous attendance to moorings and gangway is required. Gangway has to be rested on uneven surface of the wharf. Fresh water is available alongside at a cost of U.S.$1.00 per ton. Nearest place for provisions, medical assistance, etc., is El Jadida, which is about 25 minutes drive by taxi and costs U.S.$30.00.

KENITRA: 34.17 N. 06.30 W.

Situated on the left bank of the Oued Sebou, 17 km. from the Atlantic.

PILOTAGE: Pilotage is compulsory for entering and leaving port. Vessels must wait outside the port entrance for the tide. It is possible to enter from 2 hours before until 1 hour after HW during the night, and from 3 hours before until 2 hours after HW during the day. The Pilot boards vessels at river mouth. The Pilot will be on station 2 hours before HW.

On arrival at the Roads or after 0830 hrs., call the Pilotage Department and advise arrival time at the Roads and draft. Pilotage Department on VHF Channel 16 and 2182.

RESTRICTIONS: From the mouth of the river up to the port is a dredged channel. Depths are 4.20 m. during neap tides and 5.40 m. during spring tides. Height of tide during neap tide is 2.60 m. Height of tide during spring tide is 3.80 m. The constant is 1.60 m.

During the Winter it is recommended to stay outside the port in strong squalls. Ships are advised by Kenitra Port Radio of the possibilities for entering port.

Between November and April there is a total of 6 or 7 individual days when the port is closed to navigation, due to weather conditions.

Vessels are berthed and unberthed in daytime only at present time.

RADIO: Messages to ship's Agent should be sent through Casablanca Radio. In the ETA message to Agent, also advise vessel's draft. There is a radio station at Kenitra for port use only. Watch-keeping hours are only during HW, on 2182 kHz.

TUGS: Two tugs of 250 h.p. and one of 130 h.p.

BERTHING: The outer port used only by trawlers, and a mooring quay of 360 m. length belonging to the Royal Moroccan Navy. The length of main quay is 870 m. and includes 10 berths. In addition to the above there is a jetty for wine vessels, and a jetty for oil tankers.

FRESH WATER: Supplied alongside the quays.

FUEL: There are supplies of diesel oil, gas oil and petrol in the port. These products supplied by tanker lorry along the quay.

CONSULS: The Consular representatives at Kenitra are those of Belgium, France and Portugal.

REPAIRS: There are workshops for small running repairs in the port. There is a slipway for ships up to 400 tons.

AIRPORT: The nearest commercial airport is that of Rabat-Sale and there is a small airfield at Kenitra.

TIME: GMT. No changes.

AUTHORITY: Port of Kenitra, B.P.23, Kenitra, Morocco. *Telex:* 91952. *Contact:* O. Ajebli, Port Director.

LAAYOUNE (El Aaiun): 27.04 N. 13.28 W.

LOCATION: Lighthouse at phosphate terminal in Lat. 27° 03′ 55″ N., Long. 13° 27′ 45″ W.

DOCUMENTS: See "Casablanca".

APPROACHES: There is a light located at the end of the bulk phosphate terminal in position Lat. 27° 03′ 09″ N., Long. 13° 27′ 07″ W. at the top of mineral silos, at a height of 180 ft. 1 flash every 5 seconds, range 10 miles.

There is also a fixed green light located at the Northern part of the terminal, range 10 miles, and a fixed red light at the Southern part of the terminal, range 10 miles.

The phosphate terminal installations give a good radar target at a distance of 25 miles. Vessels approaching from the North should keep 10 miles off the coast until the pier is bearing 090° and then steer towards the pier.

At night the installation lights are always visible and with a clear atmosphere can be seen from 25 miles off the coast.

PILOTAGE: Compulsory. Pilot boards about 0.50 miles off the pier head.

ANCHORAGES: Good anchorages can be found in 10 fathoms of water. When waiting for the Pilot it is recommended to anchor 0.50 miles Westward of the pier. No shelter in strong winds. Service of powerful auxiliary boats is available when lying at anchor.

MAX. SIZE: Depth 17.0 m. at LWL at the phosphate terminal berth.

General cargo is handled at a berth 2 miles North of the Phosphate Pier. The berth is managed by "Odep Laayoune".

HEALTH: Valid Yellow Fever and Cholera Certificates are required. Otherwise, usual clearance.

RADIO: There is no coast radio station in Laayoune. VHF radio communication is being placed at the phosphate terminal to work on Channel 12.

Ships calling at the terminal are required to send ETA cables or telegraph 72, 48 and 24 hours prior arrival to "Phosboucraa Laayoune".

TUGS: 2 tugs, each 960 h.p., are available to assist vessels.

BERTHING: Laayoune Mineral Terminal located approx. 6.5 miles South of Laayoune City.

The terminal head is in a North-South direction. Vessels are moored alongside dolphins that cover the two loading stations for 40,000 and 20,000 d.w.t. ships. The loading pier has a height above water of 50 ft. and the dolphins approx. 20 ft.

Facilities consist of modern equipment available for handling phosphate in bulk at a loading rate of 4,000 t.p.h. in two of the stations, and 2,000 t.p.h. at the third. The phosphate is loaded by means of movable loading machines with telescopic spouts to permit perfect trimming.

No gangway to be rigged at this terminal. Communication from ship-to-shore is by means of elevator from the loading machines.

REPAIRS: No repairs can be effected at this port.

AIRPORT: Laayoune (30 km. from harbour).

TIME: GMT. No changes.

BUNKERS: No bunkers available.

PROVISIONS: Provisions may be obtained.

AUTHORITY: Phosboucraa – Laayoune, B.P. 76, Laayoune, Morocco. *Tel:* 9-36-28, 9-36-29, 9-36-30. *Telex:* Phostel 26614, Fosayoun 26769. *Contact:* Port Manager.

Operator: DC/MR Casablanca, Telex: 22052/21008/21872 Comerfos. DCN Paris, Telex: 620948 Ocfos.

MOHAMMEDIA: 33.45 N. 07.22 W. (See Plan)

DOCUMENTS:

Bill of Health.
Derat Certificate.
8 Crew Lists.
3 Passenger Lists.
3 Provisions Lists.
Ship's Certificates.
Personal Effects Lists.
Cargo Documents.
Dangerous Cargo List.
Clearance from Last Port.

PILOTAGE: Compulsory for vessels entering or leaving the harbour or shifting berth. Pilot may be contacted on VHF Channels 16 and 11. Pilot Station Tel. 47-91.

ANCHORAGES: For vessels entering the basin, 3 good anchorages in depths of 11 to 6.5 fathoms about one mile N.E. of the entrance.

RESTRICTIONS: Vessels with a draft over 15 ft. wishing to berth in the basin are obliged to wait for tide. No berthing at night time. Vessels may leave day and night, except gas tankers. All movements in the basin to be effected when conditions are favourable.

MAX. SIZE: *Basin:* Max. LOA 130 m. Max. draft 6.7 m. (22 ft.).

New Terminal: Berth A: Tankers up to 100,000 d.w.t. Max. draft 16.0 m.

Berth B: Tankers up to 150,000 d.w.t. Max. draft 17.0 m.

Sealine: Mooring buoy removed. Berths not in use.

Berth No. 1: Tankers up to 100,000 d.w.t.

Berth No. 2: Tankers up to 120,000 d.w.t.

HEALTH: Port Sanitary Control Officer boards immediately after arrival for Pratique delivery. In the event of any suspected disease or fever on board, it is necessary to advise by radio to Agent 24 hours before arrival. Pratique is automatic after calling at another port of Morocco.

RADIO: Casablanca Radio Station.

TUGS: 3 tugs of 2,600 h.p. available day and night. Additional tugs, if necessary, can be ordered from Casablanca which is 16 miles away.

BERTHING: Vessels up to 130 m. in length and drawing up to 6.7 m. (22 ft.) at Spring tides and 5.4 m. (18 ft.) at Neaps.

Quay No. 1 has a length of 70 m. with a depth of 7.0 m. (23 ft.).

Quay No. 2 has a length of 170 m. with a depth of 6.20 m. Max. LOA 120 m. Max. draft 6.0 m.

Quay No. 6 has a length of 60 m. with a depth of 6.10 m. Max. LOA 90 m. and max. draft 6.0 m.

STEVEDORES: The loading and discharging capacity of general cargo or timber is 300 tons per day. Gangs are arranged by the stevedores according to the cargo plan given by the consignee to the harbour authorities.

MEDICAL: There is the hospital and clinic in Mohammedia. Vaccinations can be arranged.

TANKERS: New terminal in position Lat. 33° 43′ 45″ N., Long. 07° 23′ 24″ E. for crude oil, LPG and naphtha.

Diameter to swinging area 1,000 m. Vessels may be berthed in day time only but can sail at night. Mooring is effected with 20 nylon ropes (8 head/stern lines, 4 breast lines and 8 spring lines). Wires may also be used but must have nylon tails, length of each wire to be 200 m.

Connections: Berth A: Length of berth 260 m. Three discharging arms of 12 in. diameter (maximum pressure 15 Bar), one loading arm of 8 in. diameter and one deballasting arm of 8 in. diameter.

Berth B: Length of berth 260 m. Three discharging arms of 16 in. diameter for crude oil and 2 discharging arms of 12 in. diameter for LPG.

Also see "Shipmaster's Report" and "Chief Officer's Report".

DENSITY: 1025.

FRESH WATER: Water can be supplied at any time in the basin and at the new oil terminal.

FUEL: Available from Casablanca at 48 hours' notice.

FIRE PRECAUTIONS: All tankers are confined by gates and watched over by special firemen.

CONSULS: There is no consul in Mohammedia. All are in Casablanca.

GANGWAY/DECK WATCHMEN: Watchmen are recommended.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. When carried out by stevedores the cost is charged.

AIRPORT: The nearest airport for international flights is Mohamed V (Casablanca).

TIME: GMT. No changes.

HOLIDAYS: 1st January; 1st May; 3rd March; 23rd May; 9th July; 14th August; 6th and 18th November; and any other religious holidays which are not at regular dates.

POLICE/AMBULANCE/FIRE: Police, 44.66; Ambulance/Fire, 15.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Passport and Police Permit required for leaving the harbour.

CHIEF OFFICER'S REPORT: (L.P.G.) May 1987.

Charts: BA. Charts No. 3257 and 806.

Anchorage: The anchorage used was that indicated on BA. Chart No. 806. This anchorage being 1 mile off the outer leading lights and in 10 fathoms of water. There are unlit mooring buoys off the outer mole.

Pilotage: The Pilot boards from a black hulled launch off the inner harbour. Communications with the Pilot are on VHF Channel 11.

Berthing: Vessel berthed at the first berth inside the harbour on the starboard side. One tug is used to push the bow around to enable vessel to berth port side to with the bow out. The pilot boat runs the head lines to buoys. Vessel secures with 2 lines and 2 springs. The maximum draft at the berth is 20 ft. and the clearance is about 2 ft.

Berthing and unberthing is carried out at high water and in daylight hours only.

Ship's gangway used.

Cargo: A small arm 4 in., 300 ASA, is connected and disconnected by shore personnel.

Ethylene discharge at the berth (temperature −102.5°C). 3 pumps used with air back pressure of 3 Bar. Average rate of discharge 170 tonnes per hour.

Difficulties can be found when starting due to auto valve in shore line which closes in when the shore tank pressure is high. Pumps then trip out on low amps.

Ideally, vessel should start with 1 pump for 30 minutes so that shore can ascertain pressures.

Shore tank capacity 3,000 tonnes. The dewpoint was checked but no samples were taken.

There are 2 reliquefaction plants at the terminal.

Customs: The bond is sealed.

General: It is about 15 minutes walk to the town. There are a few small shops outside the gate which sell fresh vegetables and fruit, etc.

The fresh water supply on the quay is metered.

SHIPMASTER'S REPORT: (L.P.G.) April 1988.

Chart: B.A. Chart No. 860 and 861.

Port: Mohammedia. In some publications the port is known as Port Fedala.

Pilotage: The pilot boards from a black hulled launch off the inner harbour (Jetty Nord).

Pilot can be contacted on VHF Channel 11.

Anchorage: The anchorage is that indicated on B.A. Chart No. 861. Vessel anchored one mile NW of Point Sidi in a depth of 19.0 m. This anchorage was exposed.

The inner anchorage is about 0.5 miles N.E. of Jetty Nord but is very restricted.

Tugs: 3 tugs available. 1×3,000 h.p., 1×2,500 h.p. and 1 small pusher tug of 500 h.p.

Berthing: Vessel berthed at Berth No. 6 to discharge ethylene. Maximum draft over the bar is 6.6 m. at HW. Berth No. 6 accepts vessels up to 90.0 m. length. Depth at the berth is 7.0 m. at LW.

One tug used for berthing, ship's line. The tug pulls the vessel's bow round to starboard off the berth and vessel berths port side to, head out. The pilot boat runs the headlines to the buoy. Moorings forward consisted of 2 headlines and 3 springs. Similar moorings required aft.

Berthing is carried out during daylight hours only and at or near to high water, depending on draft. Berthing is carried out with a wind force up to Force 5.

Departure depends on draft but usually 3 hours either side of high water.

Ship's gangway used.

Berth No. 1, which is just West of Berth No. 6, handles vessels up to 125.0 m. LOA with a maximum draft inward of 6.6 m. The depth alongside the berth is 8.0 m. at low water. Berth No. 1 is used for chemical handling.

Cargo: Ethylene is discharged through 1×4 in. 300 ASA arm. Shore personnel connect and disconnect arm. The best discharge temperature is −102.5° C. The pumping rate varies with the temperature and ranges from 170 t.p.h. to 60 t.p.h. if the discharge temperature is high. The auto valve ashore closes if the temperature rises. The ethylene storage tank is a short distance from the berth and holds 2,800 tonnes. The tank is cooled to −103° C by vapour boil – off pumped by two Sulzer compressors to VCM production tank some distance away.

The discharge pressure again varies as temperature, but at full rate, back pressure was about 3 Bar.

When discharging, it is advisable to use one pump for about 30 minutes so that the shore can ascertain pressures. Trouble can be found when starting, due to the auto valve in the shore line, which closes when shore tank pressure is high, pumps then trip out at low amps.

About 1,500 tonnes of ethylene is imported each month.

Customs: The bond is sealed.

Shore Leave: Shore passes are issued, these are to be returned prior to departure. There is a guard on the gate.

General: It is about 15 minutes walk to the town.

The exchange rate for the Pound Sterling on our visit was 14 Dirhams to the Pound Sterling.

There are a few shops outside the gate which sell fresh vegetables, fruit, etc.

Fresh water available on the quay and is metered.

All services are available from Casablanca which is about 15 miles to the South.

Doctor available locally.

Developments: There is a new jetty for tankers inside the new outer breakwater. There are 2 berths for handling of LPG, chemicals, Naphtha and crude oil through Chicksan arms. Vessels berth head out.

SHIPMASTER'S REPORT: December 1988.

The following is an update of the Shipmaster's Report, dated April 1988.

Tugs: An additional tug of 2,500 h.p. is available.

Large tankers berthing at the Outer Harbour may require the assistance of an additional tug from Casablanca.

Berthing: Additional spring lines required if there is a large swell.

Daylight berthing only for LPG carriers. Product carriers berth between 0500 hrs. and 2200 hrs. Time depends on draft, but usually at or near HW.

Vessels at Berth No. 6 can sail at any time, depending on draft, but generally 3 hours either side of HW.

Pilot often unavailable between 2200 hrs. and 0600 hrs. (in December 1988 we sailed at 0100 hrs.).

Berth No. 1 used for chemicals and refined products.

Berth No. 2, inside of Berth No. 1, is used for refined products and loading salt. Depth about 7.0 m.

Cargo: Chicksan cooled with ship's condensate.

Watchman: Onboard throughout vessel's stay.

Officials: No Clearance at anchorage. In rare cases, crew changes are permitted at the anchorage.

Time: Summertime, GMT plus 1 hour, from June to September.

Airport: About 30 minutes by motorway to airport which is S.E. of Casablanca. West Europeans need "Negative Visas".

SHIPMASTER'S REPORT: October 1989.

Documents Required:

5 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration List.
Cargo Manifest and Cargo Documents.

Pilotage: Pilotage is compulsory for tankers entering or leaving. Pilot boards about 2 miles N.W. of the breakwater in a pilot boat with "Pilote" written on the sides. Pilots keep watch on VHF Channel 11.

Anchorage: It is advisable to drift West or Northwest of the breakwater while vessel is awaiting berthing instructions as the holding ground is poor. Many ships have lost both anchors as the anchorage area is exposed to weather.

Restrictions: Berthing of tankers is carried out in daylight hours only. Vessels can sail anytime.

Vessels do not berth when the swell height is more than 2 m.

Tugs: Normally, 5 tugs are employed for berthing. The 3 small tugs belong to the Harbour Authorities (ODEP) and 2 tugs (one each tied up forward and aft with tug's line) of 2,500 b.h.p. each belonging to "Offshore Maroc". Tugs join vessel Eastward of the breakwater. Suffincent Notice of Arrival must be given to the Agent as these 2 tugs come from Casablanca.

During the months of December, January and February, a considerable amount of surging of the vessel is experienced while alongside due to an enormous amount of swell that builds up inside the breakwater. During this period, it may be necessary to employ at least 2 tugs to keep vessel alongside, otherwise the mooring ropes part.

Breakwater: The breakwater extends about 2,800 m. into the sea. (See "Plan").

Berthing: At present, 2 jetties are in operation:

Jetty "A": For tankers from 15,000 d.w.t. to 100,000 d.w.t.
Max. length of tanker 260 m.
Max. draft 16 m.
3 × 12 in. Chicksans for discharging oil products.
1 × 8 in. Chicksan for loading naphtha.
1 × 8 in. Chicksan for receiving dirty ballast.

Jetty "B": For tankers from 25,000 d.w.t. to 150,000 d.w.t.
Max. length of tanker 290 m.
Max. draft 17 m.
3 × 16 in. Chicksans for discharging crude oil.
2 × 10 in. Chicksans for discharging oil products.

There are plans to build 3 more jetties with a total wharfage of 470 m.

The ship's head is 044° when secured to the jetty.

The dirty ballast receiving facility can receive 15,000 cu.m. of dirty ballast.

There are 8 dolphins for securing vessel at each berth and vessel is moored with 4 head lines and 4 stern lines, 2 breast lines and 4 back springs forward and aft.

Fresh Water: Connection available on the jetties and there is no restriction on the amount of water that can be taken.

Gangway/Deck Watchmen: 3 deck watchmen belonging to a private company are necessary.

Identification Cards: I.D. cards are issued by the Immigration Authorities and are required for seamen going ashore. It is advisable to send the Crew List in advance to the Agent.

Shore Leave: Crew members wishing to go ashore have to walk about 2.5 km. to the main gate. There is no transport provided by the terminal up to the main gate. From the main gate, taxis and buses are available to go either to Mohammedia town or to Casablanca.

AUTHORITY: Office d'Exploitation des Ports, Direction d'Exploitation du Port de Mohammedia, B.P. 98, Mohammedia, Morocco. *Tel:* 47-92. *Telex:* 22969 M. *Contact:* Harbour Master (Capitainerie).

PORT NADOR (Beni Enzar): 35.17 N. 02.56 W.

SHIPMASTER'S REPORT: November 1979.

DOCUMENTS:
6 Crew Lists.
3 Stores Lists.
Vaccination List.

PILOTAGE: Compulsory. Pilot boards off the breakwater and requires 1 hour's notice.

ANCHORAGE: About 0.5 miles N.E. of the breakwater.

RESTRICTIONS: Vessel is able to enter and leave at any stage of the tide, day or night.

MAX. SIZE: LOA 500 ft. (approx.). Max. draft 8.5 m. (approx.). Size of vessel limited by swinging room. Underkeel clearance of 1.5 m. required.

RADIO: Nador Radio.

VHF: Port Authority and Pilot on Channel 16.

TUGS: One tug of 600 h.p. An additional tug of 1,500 h.p. may be available.

BERTHING: *Berth No. 1:* The berth is close to the entrance and the max. size permissible is approximately 400 ft. LOA and approximately 8.5 m. draft. The least depth in the channel from sea to the berth is 13 m. The nature of the bottom at the berth is sand and mud and the density is 1025.

Cargo Facilities: There is 1 ore loader for small vessels. There are 4 mobile cranes with safe working load of 6 tonnes. No Ro/Ro facilities. There is ample mechanised equipment for handling palletised cargoes. There is storage space for break-bulk cargoes and storage for palletised cargoes, however, there is little covered space. There is no equipment for handling containers and there is no storage space for containers as there is no hard ground.

FACILITIES: The following are available: fresh water, fresh provisions, small repairs, small machine shop, airport (at Oudja 140 km.), Lloyd's Surveyor, Salvage Surveyor, laundry service, doctor and hospital, groceries and meats.

CONSULS: Spanish Consul located in the port. British and French Consuls at Oudja.

TIME: GMT. No changes.

GENERAL: Port Nador is situated next to Melilla, and the same entrance between the breakwaters is used for entering, although both ports are run entirely separately, Melilla being Spanish and Port Nador being Moroccan. The Moroccans are sure that Melilla will soon be theirs, then it will become one large port.

The port under construction is to have 14 berths, at the moment there are only 2 berths working, both of which are only partially completed. The only shed constructed is used for palletising and storing fruit.

Maximum intended draft when all is completed will be 13 m.

DEVELOPMENTS: Port construction is taking place at the present time and eventually 14 berths will be available and when this is completed Melilla and Port Nador are expected to become one port. There will be 1 oil/mineral berth with depth of 12.5 m., 2 berths with 8.5 m., 1 berth with 6.5 m. and 1 berth with 5 m. in the initial stages.

REPORT: Dated September 1980.

This port is still under construction but for the last 2 years has been open for trade of iron ore, lead and citrus fruit (seasonal). There are 3 piers now in use as follows:

Mole No. 1 (S.W. side) for the shipping of iron ore.
Mole No. 2 (N.E. side) for lead and general cargo.
Mole No. 2 (S.W. side) for citrus fruit.

The N.E. side of Mole No. 1 will also be for minerals but is still under construction.

REPORT: January 1984.

Ships have discharged on voyage charter at Nador on two occasions with similar experiences in the discharge of grain. Ships berthed at an open quay and the cargo was 'dumped' by portable cranes of light construction which are fitted with anemometers, in an area too far from the side of the ship to allow the use of ship's cranes. When the wind reaches Force 4 it is considered too dangerous to continue discharge and work ceases.

Charterers claim that work is stopped by the Port Authorities and that such time lost does not count as laytime, claiming it is a non weather working day.

This method of discharge is used because of a shortage of lorries, which, if they were available, could be loaded using ship's gear alongside the ship during such stoppages for wind.

Whilst no delays have been experienced at the port of Jorf Lasfar, the Master informed us that the same method of discharge was used at that port.

Owners should endeavour to protect themselves when fixing business which is likely to include discharge at this port as the wind seems to reach Force 4 on many days and a lot of time is lost resulting in costly delays.

SHIPMASTER'S REPORT: December 1989.

On arrival at Port Nador all Passports for non-Moroccan crew were taken ashore by a representative from the Immigration Authorities. A non-Moroccan crew member wanted to go across the border to Melilla (the Spanish part of the harbour) and therefore wanted his Passport back, he was told by the Agent that the Passports would not be released until time of departure, in exchange for the shore passes issued on arrival.

When the Master spoke to the Agent to try to find out what the problem was, he was told that if we wanted to go to Melilla, we should have informed the Agent/Authorities on arrival, in order to have our Passports processed.

No laundry service available in the Port of Nador.

AUTHORITY: R.A.P.C.

SAFI: 32.19 N. 09.12 W.

DOCUMENTS: Clearance procedure is very simple. 3 Crew Lists, 1 Personal Effects Lists, 3 Passenger Lists and 1 Stores Lists only are required. Other documents are presented on berthing.

PILOTAGE: Arranged by vessel's Agent, to whom a correct ETA should be given. There is VHF radio contact with the pilot station and Harbour Master's Office. The pilot boat is located inside the harbour and the Pilot boards in position Lat. 32° 19′ N., Long. 9° 16.1′ W. Pilot ladder only is required.

ANCHORAGE: Recommended anchorage is S.W. of harbour entrance. Safe holding ground for 25,000 d.w.t. vessels. Vessels should keep port entrance clear.

MAX. SIZE: Vessels with a draft of more than 28 ft. and up to a max. of 30 ft. enter and sail at high water.

Also see "Shipmaster's Report".

HEALTH: Health Officer boards shortly after berthing but Agent must be advised before arrival if suspected disease or fever on board. Health clearance in one Moroccan port holds good for the next.

RADIO: Casablanca Radio for normal traffic or Safi Radio for local R/T traffic. Harbour Radio VHF Channel 16.

TUGS: Tugs stand by vessel inside breakwater and, usually, ship's lines are used.

BERTHING: Vessels berth in order of arrival. Port used for export of manganese and barytes. No night entry after 1900 hrs.

STEVEDORES: Gangs are arranged by vessel's Agent. Night work is possible from 1800 to 2200 hrs. and, very exceptionally, until 2400 hrs.

MEDICAL: Advance notice of required medical attendance is advisable but not essential. Modern hospital and clinic are available. Vaccination is only necessary when vessels have called at cholera and yellow fever ports.

TANKERS: Only small tankers used in this port. White products and gas oil imported; no export. Ammonia tanker berth max. draft HW 30 ft.

DENSITY: Density varies between 1024 and 1026.

FRESH WATER: Availability not limited; by hoses from quay.

FUEL: Limited supplies gas oil; diesel available but must be stemmed. Fuel oil and large quantities diesel, gas oil can be delivered by tanking lorry from Casablanca.

CONSULS:

Denmark	Tel: 30.39	France	Tel: 27.97
El Salvador	Tel: 28.76	Portugal	Tel: 23.58
Finland	Tel: 31.40	Sweden	Tel: 29.06

REPAIRS: Major repairs not possible; small workshops only for repairing fishing boats.

GANGWAY/DECK WATCHMEN: Watchmen necessary. One watchman day and night.

OPENING/CLOSING HATCHES: Normally done by crew but can be arranged by stevedores with advance notice.

CUSTOMS ALLOWANCES: 200 cigarettes, and one open bottle of spirit allowed each man. Bond is sealed and heavy fines are imposed by Customs for smuggling.

REPATRIATION: Repatriation by air or sea through Casablanca, 150 miles away.

AIRPORT: Nearest at Casablanca, served by principal European airlines.

TIME: GMT. No changes.

HOLIDAYS: On the following holidays no work is possible: 1st January (New Year's Day); 3rd March (Coronation Day); 1st May (Labour Day); 18th November (Independence Day). Other Moslem and Christian holidays are subject to last minute decisions as far as tariff is concerned, but work can be arranged.
TELEPHONES: No telephones can be placed on board. Public telephone available on the quay during working hours only.
SHORE LEAVE: Police permits are required by crew and are delivered by Immigration Authorities.
IDENTIFICATION CARDS: These are needed.
GENERAL: Masters are strongly advised to take local currency from their Agent. Landing of foreign currency encourages black market transactions and incurs confiscation and heavy fines as well as delays by the Customs Authorities.

SHIPMASTER'S REPORT: January 1983.
Max. Size: Maximum draft on entry was said to be 35 ft. (10.67 m.) on HW.

At Phosphate Wharf vessels loading to more than 8.8 m. must – due to berth/draft restrictions – work for completion on HW. Max. LW draft at inner end was given as 9.3 m. minus 0.5 m. for surge effect.

Air draft problems affect large vessels in ballast and it is advisable to keep tank ballast in until alongside.

Conveyor outreach limits can cause problems for wide beam twin hatch vessels.
Berthing: Restriction on night entry on longer vessels applicable. (This vessel sailed at 2300 hrs. on HW with a draft of 10.54 m. Pilot transferred to another large deep draft vessel which was to move into our berth after we cleared).
Stevedores: At Phosphate Wharf, 24 hour working to suit tides, via 2 conveyors each of capacity 750 t.p.h., weights found to be accurate.
General: Small amounts of foreign currency may be taken/used ashore; occasionally gate officials enter amount on back of landing permit.

Phosphate company generally require all final ships' paperwork to be signed in their office ashore.

AUTHORITY: Capitainerie de Port.

TANGIER: 35.47 N. 05.48 W. (See Plan)

PORT LIMITS: To the South by the coast and port installations and to the North by a line joining Pointe de Malabata and the Mouth of L'Oued el Youd.
DOCUMENTS: Required on arrival:

Health Declaration.
2 Crew Lists.
7 Cargo Manifests.
5 Lists of Passengers Disembarking.
4 Lists of Passengers in Transit.
Required on departure:
5 Cargo Manifests.
5 Manifests of Passengers Embarking.

PILOTAGE: Pilotage is compulsory for ships of more than 50 g.r.t. for entering, leaving and shifting in harbour. Departure possible throughout 24 hours, entry up to the last departure. Pilot on VHF Channel 16 throughout 24 hours. Vessels should advise arrival 6 hours and 1 hour in advance.

Pilot boards 0.5 miles North of head of breakwater.
ANCHORAGES: There are good anchorages to the East and Southeast of the breakwater head in depths of 10 m.–16 m.
RESTRICTIONS: The harbour area between the breakwater and the extremity of the main pier has a minimum depth of 9 m.
Wreck Buoy: It is very important that vessels keep the wreck buoy (35° 47.27′ N., 05° 47.05′ W.) on their port side when entering the port.
HEALTH: Apart from the international laws which must be obeyed, vessels coming from an infected area must send in advance (12 hours) a telegram to "Saniport Tangiers" describing the state of the vessel and persons on board.

Vessels having a sick person on board to be landed at the port must send a telegram as soon as possible to "Saniport Tangiers" with all details concerning the case to be brought ashore and await the corresponding reply.

Hospitalisation will be in a State hospital, or, if needs be, in a clinic. No disembarkation of a sick person may take place without the presence or ruling of the health authorities of the port.

Vaccinations necessary in case of need are carried out on the spot, and in accordance with the requirements of the OMS.

Evacuation of sick persons is effected by ambulance, either municipal or private, after having advised the Port Health authorities.
RADIO: Tangiers Radio listens on 2182 kHz and VHF Channel 16. Weather forecast at 0915 hrs. and 1630 hrs. GMT on 1911 kHz.
TUGS: The port owns 1 tug of 1,500 h.p. and 1 tug of 2,500 h.p. equipped with fire-fighting equipment.

BERTHING:

Quay	*Berth* No.	*Length* (m.)	*Depth* (ft.)	*Remarks*
No. 1	P.4	200	14.0	Small cargo vessels

	T.3	100	16.5	Small car ferries and Ro/Ro
	T.4	100	20.0	Large car ferries and Ro/Ro

CRANES: 9 mobile cranes, lifting capacity 6 tonnes. 1 Titan rail mounted crane with capacity of 100 tonnes. 1 container crane, 99 tonnes at 3.5 m.
STEVEDORES: Normal working hours are from 0800–1200 hrs. and from 1400–1800 hrs. Overtime: 1200–1400 hrs. and 1800–2400 hrs. Usual loading and discharging rates are as follows: 15–18 t.p.h. goods in sacks; 12–15 t.p.h. for bales; 10 t.p.h. for general cargo; 7–8 t.p.h. for cork.
MEDICAL: Hospital available.
TANKERS: Length of berth 72 m. Butane gas carriers also handled.
FRESH WATER: Replenishment of fresh water can be made at all times alongside the quays at the rate of 30 t.p.h.
FUEL: There are no refuelling installations at the quays. Only very small quantities can be supplied by tanker lorries belonging to the oil companies.
CONSULS:

Portugal	317-08		

REPAIRS: Slipway for small vessels, no shipyard.
GANGWAY/DECK WATCHMEN: Advisable, order through Agent.
AIRPORT: International airport 12 km. from port on the road to Rabat.
TIME: GMT. No changes.
TELEPHONE: Installation only possible at the jetty.
POLICE/AMBULANCE/FIRE: Police: Tel. 19; Town Ambulance: Tel. 324-44, 342-42 and 376-83; Private Ambulance: Tel. 210-89; Fire Brigade: Tel.15.
GENERAL: *Tides:* Height of Springs, 2.20 m. Height of neaps, 0.50 m.
Wind: (October – May) W. and S.W., (May – October) E.N.E. (sometimes Force 8).
Swell: From the N.W. in Winter which creates fairly rough seas in the port.
Currents: Insignificant.
DEVELOPMENTS: 5 cranes on rails will be installed on the new mole in the near future. 7 mobile cranes will also be available.
AUTHORITY: Direction d'Exploitation du Port de Tanger, B.P.305, Tangier, Morocco. *Tel:* 360-40/45. *Telex:* 336-90. *Contact:* Port Director.

TAN-TAN: 28.29 N. 11.01 W.

The following is a translation of French Notices to Mariners.

The new fishing port of Tan-Tan is situated close to and to the S.W. of Cape Nachtigal. The main breakwater is 1,698 m. long, running N.E. for about 900 m. and then to the East towards the coast. The counter-dyke (230 m.) is perpendicular to the main breakwater at about 100 m. from its end. In the extension of the counter-dyke, and starting from the coast, the cross dyke is 548 m. long.

The port entrance faces S.W., the passage is about 100 m. wide between the ends of the counter-dyke and the cross dyke.

The port has 2 berths with 6 m. and 4 m. depth, one berth on the cross dyke and the other on the main breakwater. It also has a slipway 100 m. long and 50 m. wide.

Inside the port care must be taken when the winds are from West to North which produce a fairly strong undertow.

In October 1979 there were no lights or buoys. Arrival by day is recommended. A characteristic gap in the cliff and buildings to the N.E. of the port, together with a mountainous summit to the South will be seen. To the North of the main breakwater, the sea breaks over a barrier reef. Near the port the current runs Southwards.

Anchoring is possible in 12 m. – 13 m. of water, with sandy bottom and very firm, 1.2 miles to the W.S.W. of the end of the main breakwater. A shallow of 6.4 m. is located 0.5 miles to the West of the end of this breakwater.

VILLA CISNEROS (Dakhla): 23.42 N. 15.55 W.

DOCUMENTS: *Foreign Vessels*

- Crew List.
- Health Pratique.
- Passenger List.
- Cargo Manifest.
- Safety Equipment Certificate.
- Radio Safety Certificate.
- Seaworthiness Certificate.

PILOTAGE: Pilot is necessary to cross the bar and for river navigation. Pilot joins at anchorage. Pilotage compulsory for all vessels over 50 g.r.t. Contact Pilot by radio-telephone, via Port of Villa Cisneros Radio operating on 2182 and 2626 kHz from 0800 to 1300 hrs. and from 1500 to 2000 hrs. GMT.

ANCHORAGES: In depths of more than 10 m. about 0.6 miles East of the breakwater head. This situation is well protected from swell from the S.W. but open to winds from the N.E. which are frequently strong creating difficult conditions for very small vessels. There are no mooring buoys.

Vessels loading transhipment cargo anchor in position with Punta Galera Light bearing 030°T, 1.2 miles off. The prevailing winds blow mostly from the North up to Force 3 with a long low swell mostly from a Northwesterly direction.

MAX. SIZE: Length 100 m., beam 12 m., draft 5 m.

HEALTH: Masters are required to complete a health certificate for the Port Captaincy declaring that the vessel has not called at any infected ports.

TUGS: None available, only one small launch which may assist.

BERTHING: Breakwater of 750 m. length extends towards the S.E., berths alongside the last 200 m., 1 concrete pier for small vessels, 3 small jetties enclosing 2 docks, can be used by vessels of medium size.

STEVEDORES: Employed by Port Authority and engaged by ship's Agent.

MEDICAL: Hospital available for any kind of medical attention; doctors and ambulance service available.

TANKERS: Moor at Jetty No. 2. Pipe-lines 4 in. diameter.

FRESH WATER: On the quays are 3 hydrants, capacity 3 t.p.h. and 4 of 2 t.p.h.

FUEL: Atlas Company can supply fuel subject to advance notice.

CONSULS: No local representation.

REPAIRS: Only facilities for very minor repairs.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: Crew are allowed to take only sufficient tobacco ashore for their own consumption. It is not permitted to take alcohol ashore.

REPATRIATION: Can be arranged provided that documentation is in order.

AIRPORT: Situated 1 km. from the port. 5 flights per week.

TIME: GMT is used all year round.

HOLIDAYS: Mohammedan Holidays: Aid el Queber (2 days); Aid el Mulud (1 day); Aid el Seguer (2 days).

POLICE/FIRE/AMBULANCE: Police Station situated 100 m. from the quays. Fire, Tel: 18. Ambulance, Tel: 17.

SHORE LEAVE: Allowed without restriction.

IDENTIFICATION CARDS: Seamen going ashore must take an identity card or a shore pass, issued by the Master.

NOTES

Please also advise Shipping Guides Ltd.

Mozambique

BEIRA: 19.46 S. 34.50 E. (See Plan)

PORT LIMITS: Vessels are considered to be "arrived ships" when they enter the pilotage area, i.e. when they enter within a radius of 5 miles from the pilot boat. The custom of the port is that vessels are in "Free Pratique" only when they have entered port and have been cleared by the Immigration Authorities. Immigration will only clear vessels in port.

DOCUMENTS:

Customs Clearance from last port.
Health Certificate.
8 Crew Lists.
8 Lists Passengers in Transit.
8 Lists Passengers Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
8 copies of Manifest of Beira Cargo.

Shipmaster's Report: March 1981.

Customs Clearance from Last Port.
Declaration of Health (Form Modelo No. 101-s.s.).
2 Sets Vaccination Lists.
7 Crew Lists.
7 Passenger Lists (with Passport Nos.)
2 Stores Lists (Lista De Mantimentos).
2 Crew Declarations (Company Form).
3 In-Transit Cargo Lists (Tonnage and Main Items) Company Form/Letter.
3 Hazardous Cargo Manifests.
Register of Entrance (Form DSM-079) (To Pilot).

Note: Shore passes issued at gate in exchange for Seaman's ID Card/Book. Radio Pratique not available.

Ship Certificates: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

PILOTAGE: Compulsory for all ships other than naval vessels. Ship's name, ETA and draft should be radioed via Beira Radio, call sign CRS, 24 hours in advance to Port Captain Beira and owner's Agent.

The pilot boat – black hull, grey upperworks, black funnel with white "P" – is stationed Lat. 19° 52′ 47″ S., Long. 34° 57′ 21″ E. Pilot boat call sign CRL H – W/T: listens on 500 kHz, replies on 480 kHz, – R/T: listens on 2,182 kHz, replies on 2,341 kHz. – VHF: Channels 16, 12 and 10 (plus most intership channels).

Unless instructed to the contrary by the pilot boat, vessels with a draft under 25 ft. anchor by "P" Buoy, 19° 52′ 47.3″ S., 34° 57′ 21.1″ E., and vessels with draft over 25 ft. anchor between "P" and "A" Buoys, 19° 56′ 20.1″ S., 35° 02′ 44″ E.

In bad weather pilot boat may leave above position and enter port. In such cases vessels should anchor as indicated above, weather permitting.

ANCHORAGES: At Bar, "P" and "A" Buoys as indicated above. There is anchorage for 4 – 6 ships, depending on size, in inner harbour off Cabedelo sand-pit.

RESTRICTIONS: Ships with draft 16 ft. and under can enter at any time. Ships with draft over 16 ft. generally enter 2 hours either side of high water.

MAX. SIZE: Max. permissible length about 800 ft. Max. permissible drafts between 33 ft. – 36 ft. at springs, about 27 ft. – 29 ft. at neap tides.

HEALTH: Vessel to radio "Sanidade Maritima", Beira, their ETA and "All Well". If "All Well", Health Certificate given by Pilot.

RADIO: Vessels to route messages through Beira Radio – call sign CRS. Agents radio ships through same station. Naval Radio Station – call sign CRX 3 available for distress signals.

VHF: Beira Pilots and Beira Port Control on VHF throughout 24 hours.

TUGS: Join incoming vessels at inner anchorage, about 1 mile distant from quays. Ship's lines used. 4 tugs available, up to 3,200 h.p.

BERTHING: No night berthing done unless with prior consent of Chief Pilot, otherwise no specific requirements.

Pungue Wharf:

Berth No.	Depth (ft.)	Length of Berth (ft.)	Cranes (Electric)
1	27	580	2× 6 tons 4× 3 tons
2	27	530	2× 6 tons 4× 3 tons
3	27	530	3× 6 tons 3× 3 tons
4	30	525	2× 6 tons 3× 3 tons
5	30	530	2×3.5 tons 1× 5 tons 1× 3 tons
6	30	540	1× 10 tons 5× 5 tons
7	31	540	1× 10 tons 5× 5 tons
8	31	630	Conveyor Belt
9	31	540	1× 10 tons 5× 5 tons
10	31.5	550	1× 20 tons 5× 5 tons

Note: Wharf No. 1 is generally used by trawlers, No. 2 by trawlers and coasters, No. 3 by vessels loading cement, Nos. 4, 5, 6, 7, 9 and 10 for general cargo. Ro/Ro facilities available.

Range of Tides: 15 ft. – 21 ft. Maximum depth of water should only be taken as an approximate guide as actual depths are dependent on the port dredging programme. Maximum permissible draft for turning ships round at or off the wharves is 30 ft.

CARGO HANDLING FACILITIES: There is a mechanical appliance at No. 8 Berth Pungue Wharf, used for coal. This appliance is new and has never been used but it has been designed to achieve 700 t.p.h. It is also equipped with 1 spout.

Mobile Cranes: 25 cranes with capacity 1-10 tons.

Electric Cranes: See "Berthing" – Pungue Wharf.

Molasses: Storage tanks, capacity 18,000 tons. Served via No. 8 Berth.

Vegetable Oils and Tallow: 5 tanks with total capacity 1,800 tons.

STEVEDORES: Ordered by Agent. Vessels should advise Agent their ETA at least 12 hours in advance (weekdays), 24 hours in advance (week-ends).

Port Cargo Working Hours: (3 shifts throughout all days): 0700 – 1300 hrs., 1300 – 1900 hrs., 1900 – 0200 hrs.

From 1300 hrs. Saturday until 0200 hrs. Monday – all overtime.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid cholera and yellow fever certificates on international forms. Vaccination/ fever inoculations and certificates may be obtained ashore if required.

TANKERS: Discharge lines white and black oils, 2×10 in. lines feeding into 12 and 14 in. lines leading to storage tanks. Also a 22 in. discharge line for crude oil. No slop discharge facilities. 2 tanker berths, max. permitted drafts about 31 ft.

DENSITY: In harbour area allow 3 to 4 in.

FRESH WATER: Available at all Pungue Wharf berths, pumping rate about 50 t.p.h.

FUEL: Fuel oil 1,000 Secs R. viscosity, marine diesel 43.1 Secs R., diesel 34.1 Secs R. 3 – 4 days' advance notice required. Bunkers delivered when alongside, no bunkering barge available.

CONSULS: Netherlands, Portugal, U.S.S.R.

REPAIRS: Most types of deck and engine repairs are possible, but major repair jobs are not undertaken.

DRY DOCKS: 1 dry dock 115 m.×17 m.×8.5 m., suitable for ships up to 5,000 tons, LOA 377 ft. and max. beam 55 ft.

GANGWAY/DECK WATCHMEN: Compulsory to employ watchmen to prevent pilferage.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CUSTOMS ALLOWANCES: There is no restriction on crew member holding in his cabin any amount of tobacco/wine, spirits.

CARGO GEAR: All gear supplied by stevedores except rope slings, rain tents, and spreaders for heavy lifts.

REPATRIATION: Facilities exist and a valid passport is necessary as Immigration Authorities do not recognise a Seamen's Book as a valid travel document.

AIRPORT: Beira Airport situated 7 miles from port and is served only by domestic airline which maintains 2 flights per day to Maputo from where international connections available and 1 weekly flight to Harare (Zimbabwe).

TIME: Local time 2 hours ahead of GMT. No alterations made to clocks during year.

HOLIDAYS: January 1st (New Year's Day); February 3rd (Hero's Day); April 7th (Woman's Day); May 1st (Labour Day); June 25th (Independence Day) and September 25th (Army Day).

POLICE/AMBULANCE/FIRE: Port Police (Tel. 22920); Ambulance (Tel. 22442); Fire (Tel. 22222).

TELEPHONES: No telephones placed on vessels.

SERVICES: Services normally available for tank cleaning, compass adjusting, minor repairs to radar and radio.

SHORE LEAVE: Crew members and officers are allowed ashore, and shore passes are issued against Seaman's Book or Passport.

IDENTIFICATION CARDS: Required. Passport if possible, otherwise Seamen's Book.

DELAYS: Generally no delays, but sometimes 24 – 48 hours' delay following rain or bunching of arrivals.

GENERAL: Beira port works 20 hours per day, 7 days a week (except 1st January) and overtime working is compulsory.

DEVELOPMENTS: A long term master plan is to be undertaken.

The plan includes a new oil terminal for tankers up to 50,000 d.w.t., new coal terminal for vessels up to 125,000 d.w.t., new bulk terminal for sugar and cereals and a container/multi-purpose terminal (length 650 m., by converting Berths No. 2 – 5). The access channel will also be deepened in order to accommodate larger vessels.

AUTHORITY: Direccao do Porto da Beira.

AGENT: Manica Freight Services (Moc) SARL, Largo Joao Coutinho No. 148, P.O.Box 44 or 258. Tel: 325163/5, 322091. (After hours 323456). Telex: 7-343/7-345. Fax: 322285. Cables: "Freights".

MAPUTO: 25.59 S. 32.34 E.

DOCUMENTS:

6 Crew Lists.
1 Stores List.
6 Passenger Lists.
Last Port Customs and Port Clearance.
1 List of Ports of Call.
1 Health Declaration (given by Pilots on arrival).
1 Entrance Report (given by Pilot on arrival).
1 Customs Entrance (given by Agent on arrival).
1 Railway Statistics Form (given by Agent on arrival).

Shipmaster's Report: March 1981.
Same as Beira Report except:
6 Crew Lists (1 to Pilot).
1 Stores List.
6 Passenger Lists.
1 Crew Declarations.
1 List Ports of Call.
In Transit and Hazardous Cargo List is required.

Notes: Immigration requires all-hands muster with I.D. Card/Book on entering and sailing.

Immigration Clearance: Inwards: 0600 – 1800 hrs. only inside harbour proper. Outwards: 0600 – 2400 hrs. except in special circumstances.

N.B. Vessels at the pilot station cannot obtain Pratique because this includes Immigration Clearance and can therefore be considered as not having arrived or not being in all respects ready to load.

Certificates: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

PILOTAGE: Compulsory. Available during daylight hours only.

Pilot granted only if 16 hours' notice of ETA given.

On arrival vessels can contact Pilot on VHF Channel 16 (working on Channel 14).

The pilot ladder is used together with the accommodation ladder in order that the Pilot has a climb of 9 ft. on the pilot ladder.

Pilot Boarding Position: Pilot boards at Buoy No. 4 (South).

ANCHORAGES: Inside harbour: One each for vessels drawing 33 ft., 31 ft., 27 ft. and 26 ft. respectively. Six for vessels between 17 ft. and 19 ft. Vessels delayed in berthing are brought in from pilot station at port's convenience.

RESTRICTIONS: Berthing and Unberthing only during daylight hours.

MAX. SIZE: Maximum draft is 7.5 m. plus height of tide (Max. 3.8 m. HWST) = 11.3 m. Also see "Berthing".

The controlling factor is the depth in Polona Channel, which in August 1988 was 35 ft.

HEALTH: Pratique granted by Pilot unless disease prevalent on board when Masters should telegraph "Saude" Maputo.

RADIO: Advice of arrival 16 hours before to the Harbour Master or Chief Pilot and Port Health should be sent through the station C9C (Naval), operating 24 hours on 500 kHz, replying on 487 kHz, also 2000 to 0500 hrs. GMT on 8356 kHz to 8376 kHz (replying 8642 kHz) and 0800 to 2000 GMT on 12534 kHz and 12564 kHz (replying 12990 kHz). All other non-official messages through station CRL, operating 0200 – 1800 GMT on 8 MHz at even hours, 0400 to 1800 GMT on 4 MHz at even hours plus 30 minutes (answering on 4259 kHz). Continues watch 0200 – 0400 GMT on 4 MHz. Radio telephone through CRL on 2132 kHz at even hours plus 45 minutes 0600 – 1700 GMT answering on 4415 kHz.

VHF: Pilot boat and Port Radio operate on Channel 16 (calling) and Channels 12 and 14 (working) from 0530 to 1830 hours.

TUGS: 2 tugs available, 3,200 h.p. and 2,300 h.p.

BERTHING: *Main Wharf:* All facilities owned and operated by Caminhos de Ferro de Mocambique (CFM), including stevedoring.

Dimensions: Wharf is in an uninterrupted line running roughly N.E./S.W., accommodating 12 – 15 vessels. Length: 3,275 m. Depth 9.0 m.

Grain: For loading or discharging bulk grain there are 2 Buhler machines at a berth with 33 ft. depth of water LWOST. About 120 t.p.h. A recent vessel averaged 2,900 tons per day. Bagging plants handle 1,000 bags per hour.

Bulk Loading Terminal: Length 210 m., depth 10.0 m. (max. sailing draft 11.3 m. (HWST) and 10.0 m. (HWNT). Terminal equipped with 2 shiploaders, 2 discharge/reclaimers, 2 wagon tipplers and conveyor system.

Coal: The best loading rate, in theory, is about 12,000 tons per day, however, in practice, allowing for shunting trucks, warping ship, etc., average rate is about 4,000 – 4,500 tons per day. In mid-1988 a vessel achieved 18,000 tons in 24 hours.

The length of the chute is 181 m. and it operates between angles of 46° and 58° to the perpendicular. At 46° the tip of the chute is 4.80 m. above wharf level and 9.50 m. from the wharf edge. At 58° the tip of the chute is 7.60 m. above wharf level and 11.80 m. from the wharf edge. At lowest spring tide the water at the coaling berth is 5.90 m. below wharf level and at highest spring tide 2.15 m., the difference between max. extremities being 3.75 m.

Sugar Terminal: Terminal equipped with 2 shiploaders and conveyor system from storage sheds. Sugar discharged from railway wagons by overhead cranes and grabs into hoppers which feed conveyors to storage sheds. The daily intake capability of installation is 2,000 tonnes and it has storage facilities in three sheds with a capacity of 40,000 tonnes each. Daily discharge rate 10,000 tons. Length of berth 200 m. Depth alongside 9.7 m.

Also see "Shipmaster's Report" – July 1988.

Steel Terminal: Adjacent to the Container Terminal. Length 200 m., depth 9.7 m. Terminal equipped with 4×20 tonnes electric quayside cranes and 20 tonnes capacity forklift trucks. Storage area for approximately 20,000 tonnes.

Container Terminal: Length 300 m., depth 9.7 m. Terminal equipped with 2×35 tonnes ship to shore gantry cranes for 20 ft. – 40 ft. containers, 1×35 tonnes and 8×20 tonnes forklift trucks, 10 MAFI/tugs and trailers and 3×40 ton heads/trailers. Storage capacity of terminal approximately 1,300 teu's.

LPG Carriers: Berth at Matola Ore Berth.

Timber: Vessels berth at Matola, Post No. 1 (P.I.). Max. draft 32 ft. Max. LOA, 600 ft. Vessels over 550 ft. LOA and draft over 25 ft. berth and sail during daylight hours only.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid yellow fever certificates (cholera certificate too if cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required. Men for sick parade must first go through the port doctor whose hours are week-days 0800 – 1130 hrs. and 1400 – 1730 hrs.; Saturdays 1000 – 1130 hrs., but always available on an emergency call.

STORAGE CAPACITIES:

Ore and Coal Dumps: Gorjao Wharf.

	Tons
Coal	200,000
Ores	20,000
Copper	40,000
Vermiculite	4,000
Steel, Beams and Billets	100,000
Vanadium	7,000
Containers	1,000 TEU

Oil: Storage capacity 200,000 tons.

Molasses: 4 tanks, capacities 6,000, 9,000, 11,000 and 7,000 tons.

Fruit: 7,500 tons (1.133 cu.m./ton) in 100 chambers.

Fish: 200 tons.

Ore: Via Ro-Con unit attached to container cranes, rate 5,000 tons per day.

Sugar: See "Berthing".

CRANES: *Electric Cranes:* 75 units with capacity 3 tons to 60 tons.

Mobile Cranes: 15 units with capacity 3 tons to 20 tons.

Heavy lift crane with capacity of between 60 tons – 80 tons.

STEVEDORES: *Working Hours Monday through Sunday:*
0700 – 1100 1300 – 1700
1900 – 2300 0000 – 0600

All above periods are considered normal time.

TANKERS: Matola Mineral Wharf, 35 ft. LWOST, max. length of vessel 200 m.

Tanker Terminal: "T" jetty, 60 m. in length with mooring dolphins. Depth alongside 10.0 m. Pipeline from jetty to oil storage farm.

DENSITY: Average 1022.

FRESH WATER: Available at all berths, not available ex-barge.

FUEL: Vessels can be supplied from pipe-lines whilst working at all berths, including the Matola Appliance and Tanker jetty, but excluding the new wharf extension, where pipes have been laid but the system is not yet ready for delivering bunkers. The rate of delivery varies between 300 t.p.h. and 500 t.p.h. depending on the type of vessel taking bunkers. At present, supplies of gas oil and marine diesel oil are not in very plentiful supply, recommended to stem as far in advance as possible.

REPAIRS: No dry dock except for small coasters. Facilities for most normal work, except underwater riveting, cutting and welding, and shaft balancing.

WATCHMEN: Strongly recommend employing services of a local watchman, who will also control visitors and labour passes.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CUSTOMS ALLOWANCES: Bonded stores are usually not sealed.

REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid Passport and visa is necessary as Immigration Authorities do not recognise a Seaman's Book as being a valid travel document.

AIRPORT: Maputo International Airport 4 km. from port.

HOLIDAYS: No cargo work on 1st January, on other holidays, work continues normally in the port.

TIME: Local time GMT plus 2 hours. No alterations made to clocks during the year.

TELEPHONES: A telephone will be placed on board the vessel.

SHORE LEAVE: Crew are allowed ashore, from 0600 hrs. – 1700 hrs. excepting nationals of those countries not maintaining diplomatic relations with Mozambique.

IDENTIFICATION CARDS: Crew and passengers are issued with Immigration Boarding Permits and they must be carried at all times. (Such permits to be returned to Immigration Officer prior to sailing.)

GENERAL: Crew and passengers not to take photographs in the dock area. Permission through Agent required to lower any boats or gear overside into the water or on to the wharf.

Do not immobilise main engines or carry out engine trials at the wharf until permission has been obtained by the Agent as the Authorities require vessels to maintain sufficient steam for main engines to be used at 2 hours' notice.

Customs guards to be supplied with meals and accommodation whilst at Inner Anchorage and alongside the wharf otherwise cost per guard will have to be paid by Agent on Owner's behalf.

DEVELOPMENTS: New buoyage system being installed.

Dredging in progress.

SHIPMASTER'S REPORT: April 1987.

The following navigational problems were encountered when arriving from South:

Canal Do Sul: The Canal Do Sul is closed and the buoys indicated on BA. Chart No. 644 no longer exist. All ships have to proceed via Canal Do Norte.

Canal Do Norte: It is advisable to proceed in daylight only as most of the buoys are missing or out of position.

Pilot boarding position is at Buoy No. 4 (25° 56′ S., 32° 45′ E.). No pilot launch available during our visit so outbound and inbound ships sometimes exchange Pilot with their own lifeboats. If one of the tugs is in operation, pilot will embark with that tug.

Berthing and unberthing was made without tugs using one anchor.

Most of the cranes were non-operational.

Before departure a thorough search for stowaways is to be made.

Due to problems of pilot transportation, Masters are sometimes asked to proceed outbound without pilot through Canal da Polana, this means dropping Pilot at Buoy No. 15. This is not to be recommended as positions of buoys are doubtful and numerous small fishing craft cross the channel.

When a tug is available the Pilot disembarks at Buoy No. 10.

Special attention has to be paid to Xefina Bank which is extending southwards.

SHIPMASTER'S REPORT: July 1988.
Vessel: 20,900 d.w.t.
Cargo: Loaded 17,500 tonnes of bulk raw sugar at the Sugar Terminal. Vessel used 2 loaders alternately at 500 t.p.h.
Sailing Draft: Forward: 9.2 m. Aft: 9.3 m.
Approaches: North Channel: Navigation limited to daylight hours only as some channel buoys are missing and some are unlit. IALA system used, red to port and green/black to starboard.
B.A. Chart 644:

Lacerda lighthouse unlit.

Macomana lighthouse unlit.

Necessary care must be taken when approaching No. 2 N. Buoy for clearing Baixo Cutfield Shoals.

No. 2 N. Red buoy missing.
No. 4 N. Red buoy in position but unlit.
No. 1 N. Black buoy missing.
No. 3 N. Black buoy missing.
No. 6 N. Red buoy in position but unlit and rusted.
No. 3 Black buoy in position but unlit.
No. 3 A. Green buoy is a new buoy laid in position Lat. 25° 55.5′ S., Long. 32° 51.2′ E. (approximate).

After No. 3 Buoy, steer to pass close East of No. 3 A Green buoy and then with approximate course 268° to No. 4 Red buoy which is the Pilot's boarding position.
Pilotage: Pilots are experienced and cooperative. Pilot ladder required on the leeside, combination with accommodation ladder not needed.
Tugs: Two tugs available. One is used for mooring/unmooring and the other for pilot service at Buoy No. 4.
Watchman: Local watchman is compulsory. Special attention is required prior to sailing as stowaways may try to board.
Fresh Water: Plentiful supply, rate about 25 t.p.h.
Provisions: Fresh fruit and vegetables and good provisions available from local market.
General: Extreme caution must be taken when navigating in the North Channel when in a loaded condition, between Buoys No. 4N – No. 6N. In this area the echo sounder shows approximately 30 cm. under keel clearance.

Dredger was working in the Inner Channel, close to Maputo Port.

Passage close to Baixo Rebeiro Beacon not recommended, when in a loaded condition due to suspect depths and at times a strong current.

Most buoys of the Inner Channel was discoloured and rusted.

AUTHORITY: National Directorate of Ports and Railways (DNPCF), P.O.Box 276, Maputo, Mozambique. *Tel:* 28790, 25152. *Telex:* 6-438, 6-208. *Contact:* Mr. F. Ferreira Mendes, National Director.

MOZAMBIQUE: 14.58 S. 40.45 E.

DOCUMENTS:
- Customs Clearance from last port.
- Port Clearance.
- Health Certificate.
- 6 Crew Lists.
- 6 Passenger Lists in Transit.
- 7 Passenger Lists Disembarking.
- 2 Stores Lists.
- 2 Lists Deck Stores.
- 2 Lists Cargo in Transit (main items of cargo only).
- 6 copies of Manifest of Mozambique Cargo.

PILOTAGE: One Pilot available, 24 hours pilot boat is black and grey. Ships take Pilot near Buoy No. 2 (Red Buoy) placed off Goa Island. At night ships should send Morse signals with Aldis lamp to the middle of Mozambique Island (location of port office). ETA should be given as soon as possible to pilot station off Mozambique Island and/or to ship's Agent.
ANCHORAGES: When waiting for Pilot, or due to their draft (more than 30 ft.) ships may drop anchor off red Buoy No. 2 (0.5 miles seawards). Depths between 60 ft. and 90 ft. Bottom with sand and some broken coral; current from North to South, sometimes up to 4 knots.
MAX. SIZE: Only ships with drafts less than 30 ft. can cross the bar and enter the Port.
HEALTH: Quarantine flag should be flown, even after calling at other ports in this country. Health Certificate given by Pilot.
RADIO: Radio Mozambique, call sign CRQ. Also available Maputo or Beira Radio Stations.
TUGS: Tugs are not necessary in this port.
BERTHING: No quay berths. Vessels work cargo at anchor.
STEVEDORES: All requirements on this purpose must be sent to the Agent.
MEDICAL: Medical assistance can be given at any time, even to vessels unable to cross the bar because of draft. Hospital with adequate facilities, and emergency services available.
FRESH WATER: Always available in any quantity. Supplied by barge of 40 tons capacity.
FUEL: Small quantities available.
CONSULS: No local representatives.
REPAIRS: Light repairs can be effected.
OPENING/CLOSING HATCHES: By stevedores.
CARGO GEAR: Vessels anchor in bay and load and discharge by lighter and barges.
HOLIDAYS: 1st January; 2nd March; 1st and 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December. Cargo handling can be arranged on these days.
POLICE/AMBULANCE/FIRE: Maritime Police, Customs and Agents will always be on board during stay.
TELEPHONES: No telephones, but walkie-talkies are available; arrange with Agent.
IDENTIFICATION CARDS: Required.
AUTHORITY: Capitania do Porto de Mocambique.

NACALA: 14.32 S. 40.40 E. (See Plan)

PORT LIMITS: The line joining Ilha Goman to Cabo Columulomo Light at the entrance of Bay of Fernao Veloso.
DOCUMENTS:
- 6 Crew Lists.
- 6 Passenger Lists.
- 2 Supplies Lists.
- 2 Stores Lists.
- 4 Cargo Manifests.
- 3 Cargo Plans.
- 5 Ports of Call Lists.
- 2 Animal Lists.
- 2 Vaccination Lists.
- 1 Health Certificate.
- 1 Clearance from Last Port.

These documents are to be completed, and presented, at the time of report to local authorities.
Certificates: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.
PILOTAGE: Compulsory. Request Nacala Pilots on VHF radio on Channel 16, and then change to Channels 14 or 68.

Advance notice of ETA required at least 24 hours before arrival, through the Agent, and then 4 hours before entering Fernao Veloso Bay, via VHF.

Pilot boat has white hull with black boot-topping and white superstructure. The area of boarding is usually 2 miles × 57° from the Nacala Lighthouse, except during the period of strong winds from N.E. to S.E., when Pilot will embark between Cape Fernao Veloso and Cape Sacamulo. Usual requirements for ladders are in force, and Pilot boarding requires the ladder to be about 3 ft. to 4 ft. above water.
ANCHORAGE: After entering the narrow passage between Cape Fernao Veloso and Cape Sacamulo, in the outer anchorage Bay of Muananculo and the inner Bay of Bengo, away from the middle fairway to the harbour. Maximum size of the vessel anchoring in the outer anchorage area is about 130,000 d.w.t., and 18.0 m. draft.
RESTRICTIONS: No night time restrictions. Berthing is possible 24 hours a day.
HEALTH: International health regulations are to be observed. Any vessel, which is suspect, should inform the Harbour Office.
RADIO: Pilot radio station works with the SSB and VHF equipment. Port telex No. 4205 CFMNC MO. Fax No. 526390. All early reports, ETA, etc., through the Agent.

Also see "Pilotage".
RADAR: No radar installation in the port.
TUGS: 1×960 h.p. tug available.
BERTHING:

Quay	*Length* (m.)	*Depth* (m.)
Container Terminal	335	14.0
	37	12.0
North Quay	300	9.0
	229	7.7
	90	7.0

CONTAINER HANDLING FACILITIES: 1,119 ground slots and connection possibilities for 26 reefer units. There is 1×5 ton crane for handling empty containers, and 1×25 ton rail-mounted transtainer for loading and unloading wagons and lorries. During 1991, a 20 ton quay crane for loading and unloading the ships will be operational.

For container handling, there is 1×42 ton front loader with flexible spreader (20 ft. – 40 ft.), and 2×32 ton front loaders.

For long distance transport, there are 3 tractors and 9 trailers with different dimensions.

Also stripping and stuffing operations available, in a 1,480 sq.m. container freight station.
WATCHMEN: Should be ordered through the Agent, either from the port or other sources.

HATCHES: Opening and closing by crew members.
GENERAL CARGO HANDLING FACILITIES: Nacala Port has a covered storage area of 15,692 sq.m., and an open area of about 25,000 sq.m.

For ships operations there are 1×20 ton, 1×10 ton and 7×5 ton quay cranes.

Forklifts available, equipped also with bale clamps.
BULK HANDLING FACILITIES: Petrochemicals handled at the East end of the general cargo terminal (North Quay), with minimum depth of water 9.7 m., and a quay length of 190 m.

The pipeline diameter is 8 in. No slop discharge facilities available. Maximum receiving rate of about 150 t.p.h. – 200 t.p.h.

Possibilities of handling bulk cargoes, such as grain, fertilisers, etc., at the North Quay.
STEVEDORES: Particulars of cargoes for discharge to be sent, with the ETA message, for arranging the gangs. Normally, the port is working in 3 shifts, from 0700 hrs. to 1500 hrs., from 1500 hrs. to 2300 hrs., and from 2300 hrs. to 0700 hrs. After 1100 hrs. on Saturdays, Sundays and public holidays, the work is charged as overtime, and must be ordered at least 48 hours in advance.
MEDICAL: Only simple diseases, and first aid emergency cases, can be handled in the local hospital. No dentist available.
TANKERS: See "Bulk Handling Facilities".
DENSITY: 1025 inside the bay.
FRESH WATER: Available by hose from the quay.
FUEL: Marine diesel available, delivered by lorries.

Some delays are to be expected in bunkering operations, due to lack of lorries.
SURVEYORS: Cargo inspectors available.
AIRPORT: In Nacala, there is a military air base, used by civil planes upon request. Nearest airport is at Nampula, about 190 km. from the port, with 5 weekly domestic flights to Maputo.
TIME: GMT plus 2 hours.
HOLIDAYS: January 1st (New Year's Day); February 3rd (National Heroes Day); April 7th (Mozambican Womens Day); May 1st (Labour Day); June 25th (Independence Day); September 7th (Victory Day, commemorating the Lusaka Agreements and the end of the war for independence); September 25th (Armed Forces Day and Revolution Day); December 25th (Family Day).

Vessels are requested to "Dress ship" on these days.
POLICE/AMBULANCE/FIRE: The port has its own Police Force and Fire Brigade. The local hospital has an ambulance.
TELEPHONES: No connections for ships alongside. Public telephones for local or international calls are located in the Post Office building, in the city centre, close to the port.
BANKS: There is a branch office of the Bank of Mozambique in the city.
SHORE LEAVE: Crew and passengers need an Immigration Boarding Permit when leaving the port area.
GENERAL: As usual, the port authority hopes that the Shipmaster will give any reports about the lighthouses nearby.

SHIPMASTER'S REPORT: June 1988.
Port Limits: Vessel considered arrived when at entrance off Pta. Narenque. Free Pratique only granted after boarding by immigration authorities at inner anchorage (off Baiai De Bengo) or at berth.
Documents: Last Port Clearance, 8 copies Crew Lists, Stores List, Crew Personal Property List, Manifest, Vaccination List and Agent's Forms (given on arrival). Shore passes issued at gate in exchange for Passport, shore leave up to 2200 hrs. only.
Pilotage: Available off Fernao Veloso, with prior arrangement. If BA Chart No. 649 on board, then advisable to move in without pilot, as delays are quite normal. Similarly, if outbound it is at Master's discretion to drop pilot off the berth or retain his services until past Pta. Narenque.

Pilots can be called on VHF Channels 12 and 16.

Advisable to approach at daybreak as lighthouses are unlit. For the same reason berthing/unberthing carried out in daylight hours only. A small pilot boat is available and Pilot is accompanied by a trainee.
Draft: Very deep water exists. Vessels with drafts up to 14.0 m. can berth at New SW Container Terminal. NW Quay has depths up to 9.5 m. and Berth No. 4 at NE end of NW Quay, used for product tankers, has depths of 12.0 m.
ETA: Messages to be radioed via Maputo Agents, who then inform Nacala branch by radio. At least 24 hours to be allowed for this information to reach Nacala.
Tug: One tug available, using ship's lines.
Medical: Minor medical complaints can be attended to by doctor arranged via agent.
Tankers: Discharge through 1×8 in. connection leading to storage tanks about 2 km. away. BP Mocambique in charge of liason, etc. We discharged 3,000 tons of jet fuel in 36 hours.
Fresh Water: Available ex-jetty, but as jetty infested by rats and cockroaches it is not advisable to use same for drinking.
Fuel: Not available.
Watchmen: As per Port Regulations, one watchman is compulsory.
Customs Allowance: No particular restrictions.
Ship's Certificates: Not required to be taken ashore.
Consuls: None.
Repairs: No facilities.
Repatriation: Not possible, except in extreme emergency. Nearest operational airport is at Nampula, about 200 km. away.
Time: GMT plus 2 hours throughout the year.
Provisions: Minimum amounts of fresh vegetables available locally at market. Currency must be changed officially through agent only and excess returned.

AUTHORITY: Empresa Nacional dos Portos, Direccao do Porto de Nacala, Caixa Postal No. 70, Nacala, Mozambique. *Contact:* Carlos F. Bambo Nhangou, Port Director.
AGENT: Manica Freight Services (Moc) SARL, Predio Pelotas, P.O. Box 144, Nacala. Tel: 526820, 526259, 526024. Fax: 526961, 526025. Cables: Corymann.

PEMBA: 13.00 S. 40.28 E.

DOCUMENTS:
6 Crew Lists.
6 Lists of Passengers Disembarking.
6 Lists of Passengers in Transit.
1 Master's Declaration.
1 Stores and Provisions List.
1 Health Declaration.
5 Sets of Cargo Manifests.
2 Sets of non-negotiable Bills of Lading.
Clearance Documents from last port.
PILOTAGE: It is necessary to order by radio request to Agent 14 hours before arrival.
ANCHORAGES: Vessels may anchor South of the dock about 300 m. off. Other suitable anchorages will be indicated by the Pilot.
RESTRICTIONS: Vessels may enter with Pilot at any hour day or night.
MAX. SIZE: Draft up to 27 ft. 6 in. for berthing.
HEALTH: In case of contagious disease on board, the Port Health Authorities must be advised in advance.
RADIO: Send messages through Beira radio.
TUGS: None available
BERTHING: One berth, length 182 m., depth alongside 28 ft.
STEVEDORES: In ETA message to Agent, indicate number of gangs required and advise quantity and description of cargo for discharge.
MEDICAL: In case of urgency advise Agent by radio before arrival. Hospital facilities available. Vaccinations can be performed.
FRESH WATER: Available.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary as there is a permanent guard on board.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: Bond is not sealed and no restrictions made.
REPATRIATION: Can be arranged.
AIRPORT: Situated 7 km. away. Flights to Beira and Maputo daily.
TIME: GMT plus 2 hours. No alterations during the year.
HOLIDAYS: No work performed from 1700 hrs. Christmas Eve until 0600 hrs. 26th December; no work performed from 1700 hrs. New Year's Eve until 0600 hrs. on 2nd January. Work may be arranged on the following holidays: 1st January, 3rd February, 7th April, 1st May, 25th June and 25th September.
POLICE/FIRE/AMBULANCE: Police, Tel: 2828; Hospital, Tel: 2211.
SHORE LEAVE: Allowed. Except for nationals of countries not maintaining diplomatic relations with Mozambique.
IDENTIFICATION CARDS: Required by police.
AUTHORITY: Capitao do Porto de Pemba.

NOTES

Please also advise Shipping Guides Ltd.

Union of Myanmar (Burma)

YANGON (Rangoon): 16.47 N. 96.15 E. (See Plan)

DOCUMENTS:

Ship's Register.
Crew and Passenger List.
Dangerous Cargo List, if any.
Customs Declaration for Crew and Ship.

PILOTAGE: Compulsory. The services of Pilots are required to bring ships alongside.

Vessels bound for the port of Yangon should make for the *Dagon* Light Vessel (China Bakir) Lat. 15° 59.9′ N., Long. 96° 14.5′ E. and then proceed towards *Lanthaya* Light Vessel. Vessels of 26 ft. draft and over should anchor off *Dagon* Light Vessel due to insufficiency of depths at the pilot station at low water, and await instructions from the pilot vessel for embarking Pilot.

Vessels below 26 ft. draft may proceed direct to the pilot vessel for embarkation of Pilot.

The pilot vessel or its relief is normally cruising or anchored at Lat. 16° 11.0′ N., Long. 96° 19.6′ E., approximately 10 miles North of *Dagon* Light Vessel and approximately 2 miles East of Lanthaya Light Float and 42 miles from the Port of Yangon.

ANCHORAGES: Specific areas of the port are reserved for special anchorages as follows:

(a) *Petroleum Anchorage* at Liffey Reach just below Syriam, accommodating 2 vessels.
(b) *Explosives Anchorage* below Admiralty Jetty near Chokey Point.
(c) *Small Craft Anchorage* at King's Bank, accommodating 20 inland vessels and schooners, etc.

ETA: 48 hours advance notice of ETA required, confirmation to be made 24 hours later or one working day ahead of the ship's ETA to enable necessary arrangements to be made regarding Pilots. Information required in the advance notice are:

(a) ETA, *(b)* Fresh Water Draft, *(c)* Speed, *(d)* Gross tonnage, *(e)* LOA and LBP.

RESTRICTIONS: Generally on a flood tide between the time of LW to HW at the pilot station, depending on ship's actual draft and speed in order to obtain sufficient depths at the Outer Bar.

Navigation day and night during river passage, but entry into Inner Harbour is normally restricted to daylight hours.

The Master Attendant regularly issues Draft Forecasts to all vessels Agents advising them of the drafts to be obtained within the next 2 months.

MAX. SIZE: The port is accessible to vessel of 548 ft. LOA, and draft up to 28 ft. at Spring tides. The draft of the vessel entering the river is controlled by the depth available at the Outer Bar, carrying 12 ft. depth at datum. Entry into the harbour is controlled by the Inner Bar off Monkey Point, carrying from 10 ft. to 12 ft. depth at datum. These depths are subject to seasonal variations and are least during the dry season from November to May.

HEALTH:

(a) Maritime Declaration of Health signed by the Master and also by a Ship's Surgeon if one is available.
(b) Valid Derat or Derat Exemption Certificate.
(c) Valid Vaccination Certificates against cholera for crew and passengers (if a certified list of date of expiry of these Certificates is available, the issue of Pratique will be expedited).
(d) Pratique is issued by the Medical Officer on duty, after examination of the crew and passengers of the ship. The Pratique is automatic if the vessel arrives after touching other ports in the country. NO RADIO PRATIQUE IS ISSUED.
(e) Quarantine Clearance on sailing is essential.

RADIO: International single operator watch period for Zone "C". Assigned frequencies are 425, 454, 468, 512, 500 kHz and 2.8, 4.26 MHz, call sign XYCZ.

In cases of inability to contact the pilot vessel by wireless, the Master should send cable to the Harbour Master "Portrust" via Yangon Radio Station, call sign XYR.

Within harbour limits contact can be made with Port Tower by light visual signalling. VHF contact can also be made with Port Tower, call sign XYU, Channel 16 (calling frequency). The working frequencies are Channels 14, 12 and 6 (Hague Convention).

BERTHING: There are 11 wharf berths and 2 pontoon berths for sea-going vessels:

Rice Loading Berths:

(a) *Sule Pagoda Wharf,* Berth Nos. 1 & 2 accommodating two vessels of 450 ft. each. LWOST varies from 24 ft. to 28 ft. approx.
(b) *Ahlone Wharf,* length 440 ft. accommodating a vessel of 440 ft. LWOST varies from 26 ft. to 28 ft. approx.
(c) *Hteedan No. 1,* length 456 ft. accommodating a vessel of 460 ft. LWOST varies from 26 ft. to 30 ft. approx.

General Cargo Berths:

Sule Pagoda Wharf, Berth Nos. 3, 4, 5, 6 and 7 accommodating five vessels ranging from 450 ft. to 520 ft. LWOST varies from 24 ft. to 30 ft. approx.

Timber Export Berths:

Bo Aung Gyaw Street Wharf: Berth Nos. 1 and 2, accommodating two vessels of 450 ft. each. LWOST varies from 26 ft. to 29 ft. approx.

Passenger Berth:

The Port Health Station. A Pontoon Jetty equipped with a large floating pontoon 500 ft. length and accommodating vessels of 520 ft. to 595 ft. LWOST varies from 25 ft. to 28 ft.

Moorings:

The port is equipped with 13 swinging moorings and 2 sets of fixed moorings in the Inner Harbour; 3 swinging mooring buoys at Hastings, and 2 fixed moorings for oil tankers. In addition, a number of mooring buoys are provided for small sized seagoing vessels.

Mooring and Berthing Procedure:

While in port, ships lie alongside wharves or moorings. The procedure is as follows:

(a) *Single Buoy Mooring* – Vessels moored with ship's own cable which is led through hawse pipe and shackled on to buoy cable. The shackle is provided by the Myanma Port Authority.

(b) *Fixed Mooring* – Same procedure as above but the vessel is moored to 4 buoys.

(c) *Berthing* – Normal ship's ropes and wires are used for berthing at wharves. In addition, wharves' mooring chains are also provided for securing to ship's bollards.

TUGS: Generally not used for mooring and berthing purposes, but available in emergency.

CARGO HANDLING EQUIPMENT: The heaviest lifting capacity of the port is a 40 ton crane at the Bo Aung Gyaw Street Wharf.

Heavy packages may be landed or shipped by a vessel's own tackle at the wharves, subject to prior notice being given to the Deputy General Manager (Traffic).

STEVEDORES: In two shifts of 0800 hrs. to 1600 hrs., and 2000 hrs. to 0400 hrs. Overtime work is arranged on special request from Agents. Stevedoring undertaken by Port Authority. To enable ship's Agents to order labour gangs in time, it is important to obtain in advance the accurate ETA of vessels. Latest time to order gangs is 1100 hrs. for booking for that night and the next day.

FRESH WATER: Available either directly alongside the wharves or in midstream, delivered by water boats.

FUEL: Fuel, diesel and gas oil (HSD) from Myanma Petroleum Products Enterprise. Fuel oil provided by barges of 150 tons to 180 tons capacity alongside vessel during daylight hours. Coal supplied by Government No. 3 Mining Enterprise.

FIRE PRECAUTIONS: A special land-based Port Fire Brigade is maintained by the Port Authority, supplemented by a fire-fighting vessel and tugs for emergencies in the river.

CONSULS: The following countries are represented by consulates or embassies at Yangon:

Afghanistan
Algeria
Australia
Austria
Bangladesh
Belgium
Bulgaria
Cambodia
China
Cuba
Czechoslovakia
Denmark
Egypt
Finland
France
Germany F.R.
Hungary
India
Indonesia
Israel
Japan
Republic of Korea
Laos
Malaysia
Mongolia
Nepal
Netherlands
Nigeria
Norway
Pakistan
Philippines
Poland
Singapore
Sri Lanka
Thailand
U.K.
U.S.A.
U.S.S.R.
Vietnam
Yugoslavia

REPAIRS: Deep-sea repairs are undertaken by MPA's engineers. The "Setsan Dry Dock", a tidal dock owned by the MPA, can take vessels up to 1,000 tons and 250 ft. in length.

The Myanma Shipyards can take vessels up to 2,000 tons and 300 ft. in length.

GANGWAY/DECK WATCHMEN: Available on application to the Deputy General Manager (Traffic).

The working hours of a watchman are the same as the wharf working hours.

OPENING/CLOSING HATCHES: Undertaken by port labour for hatch boards and pontoon type covers only.

POLICE/AMBULANCE/FIRE: Port Police 74520; Ambulance 71111; Port Fire Brigade 78653.

HOLIDAYS: Ships may work on holidays on application to the Deputy General Manager (Traffic) and on payment of holiday fees.

DEVELOPMENTS: Bo Aung Gyaw Street Wharves No. 1 & 2 to be converted for container handling. Expected to be operational by the second half of 1990. The facility will be able to store approximately 1,818 TEU. Reefer points will be provided for 56 containers. Ship's gear will be used in the initial stages.

SHIPMASTER'S REPORT: July 1978.

Approaches: Approach was from the Malacca Strait, in generally overcast and rainy weather. The last reliable fix obtained prior to picking up the Dagon Light Ship at 1330 hrs. on 6/7/78 was at 0530 hrs. on 5/7/78. From 1330 hrs. on 5th, 2° were allowed for Easterly set, apart from a 2-hour period on the 6th, when only the Compass Error was allowed. This would seem to indicate that an Easterly set was experienced, but it is possible that what actually occurred was that the vessel was set to the Eastward by the tide, from about 0900 hrs. on the 6th until the Dagon Light Ship was picked up. We sighted the Dagon at about the time and on about the bearing we expected.

The tidal information provided on B.A. Chart 823, although depending on observations obtained during the dry season, was most helpful.

On clearing the Rangoon River, shortly after HW Elephant Point, there was a slight South-Westerly tidal set, as one would expect. The departure Pilot provided the following information, which we were not able to check:

B.A. Chart 823: "Thuriya" Light Buoy is in position Lat. 15° 19′ N., Long. 95° 01′ E., and not as charted. (Charted position: Lat. 15° 20′ N., Long. 95° 10.5′ E.).

The two dangerous wrecks about 38 and 40 miles South of Thante Light are no longer dangerous.

B.A. Chart 833: The dangerous wreck between Upper Western and Upper Middle Buoys is no longer dangerous. We passed between the buoys without any difficulty, drawing 19 ft. 03 in., fresh water. The following is from our own observations: Upper Spit Buoy is now in approximate position 290°(T) – 7 cables from its charted position. All buoys, from and including Upper Spit Buoy to the berth, with the sole exception of "C.M.B." Buoy, were unlit.

Naturally, vessels do not transit this portion of the river during the hours of darkness. With the exception of Upper Spit Buoy all buoys, light floats and the light ship appeared to be in their charted positions. When crossing the bars and during the river passage very close attention must be paid to the steering. With a top-class helmsman who is really concentrating, little difficulty would be experienced. In order to carry the tide up to Rangoon, it is important that a vessel should arrive at the pilot station not later than HW Elephant Point; we were in fact 10 minutes late, and would not have continued except that we were fortunate enough to have the most senior Pilot on board.

It was noticed on departure that an inbound vessel giving an ETA at the pilot station 30 minutes after HW Elephant Point, was directed to anchor.

Anchorages: Vessels may anchor in the vicinity of the pilot station shown on B.A. Chart 823 or in the petroleum or explosives anchorages shown on B.A. Chart 833.

Berthing: Vessel was originally placed at a buoy berth, the anchor cable down the hawsepipe and shackled on to the buoy.

As we have a short length of cable inboard of each anchor with a joining shackle, this operation presented little difficulty but took considerable time.

When we were placed at the buoy, it was dark by the time the operation was completed, but if we had gone straight alongside this could have been done under twilight conditions. Neither the Pilot nor I could understand why the vessel was not berthed on arrival, since our berth was then vacant. The explanation I received was that the shore lighting was poor and that, as a safety precaution, ships are only berthed in full daylight.

At 0625 hrs. the next morning, we commenced unshackling from the buoy and the vessel was secured alongside No. 1 Berth, Sule Pagoda Wharf at 0805 hrs. We berthed starboard side to, stemming the ebb tide and river outflow. The buoy anchor remained hung off until after berthing. When berthing, the offshore anchor is placed in a convenient position to assist in getting the vessel off again. When alongside and the cable slack, we had 4.5 shackles out on the port anchor. Moorings were as follows: Forward – 3 headlines, 1 ship's wire and a shore mooring chain, all leading ahead. No spring. The shore chain is brought on board and turned up on the ship's bitts. Aft – 1 breastrope, 2 sternlines and ship's wire leading aft. No spring.

Departure: The vessel leaves the berth on the last of the ebb and drops down the harbour stern first to a position North of the transit beacons on the South bank, where she anchors until there is sufficient water to cross the Inner Bar and proceed downstream.

Pilotage: Is compulsory. River Pilots take the vessel from the pilot station to the port or buoy and Docking Pilots do the berthing and unberthing, including dropping down to the temporary anchorage. The Docking Pilot remains on board while at anchor. River Pilots, when boarding and leaving, require pilot ladder, manropes and a boatrope. Ship comes under the stern, never ahead, of the cutter, with ladder rigged on the lee side. Docking Pilots board and leave by the gangway.

Communications: Rangoon Radio, call sign XYR, keeps regular watch schedules on 6 HF frequencies. However from departure Lae on 24th June to 2nd July, nothing was heard of this station.

Two-way contact was established on 3rd July, but after the station had instructed the Radio Officer to change frequency, it ceased working.

It was not until 0500 hrs. GMT on 4th July that traffic could be cleared. Later that day it became possible to work XYR on MF. All calls were then answered promptly and an efficient service provided.

An advice of bad propogation conditions from Portishead Radio was in effect during the period covered by the above remarks. This may have had some bearing on the difficulties experienced. The vessel arrived at the pilot station at 0830 hrs. GMT, 6th July, 1978.

VHF: The Pilot cutter and the Harbour Master's Office are fitted with VHF Channel 16. This is efficiently operated.

Telephone: I spent many hours in the Agent's office, attempting to contact London. We were unsuccessful. The hours, local time, during which one may attempt to call London, are: via Hong Kong – 0900 to 1430 hrs.; via India – 1630 to 1800 hrs. These hours are nominated by the Port and Telecommunication Corporation.

Telex: There is a telex machine in the Agent's office, and the Operator's normal hours of duty are 0930 to 1630 hrs. It was possible to send an outward message only in these hours and so, on occasions, it was necessary to request that the Operator remain on duty until 2000 hrs. The reasons for the difficulty in sending outward messages is: Unless a special request is made otherwise, all outward messages are sent to a central transmitting point. Inward messages were received promptly.

Mail: Both to and from Europe and Australiasia, appeared to be reliable.

Agents: T.A.C. are a government corporation and handle every vessel that uses the port. All concerned are most charming, and very polite. All persons I came into contact with from T.A.C. spoke excellent English.

Documents: Required on arrival: 20 Crew Lists, 6 Crew Personal Effects Lists, 6 Ship's Declarations of Foreign Currency, 6 Crew Declarations of Foreign Currency, 1 International Health Declaration, 1 List of dates of Cholera Vaccinations.

Notes:

1. All on board must be in possession of valid Vaccination Certificate against cholera.
2. The Customs do an efficient rummage on arrival, and again on sailing. Their main concerns seem to be cigarettes, foreign currency and pornography.
3. It is most important that all paper money of any foreign country held either by the ship or by individuals is accurately declared and then placed in one or other of the ship's safes. The safes are then sealed and can only be opened with the approval of the resident Customs Officer. Time and trouble on arrival can be saved by collecting all foreign currency in advance. Some small amounts of foreign currency were found by rummagers, but a lenient attitude was taken and these sums were allowed to be placed under seal. The Penalties for attempting to evade the regulations with regard to foreign currency are severe.
4. All on board are required to be photographed, so that local shore passes may be issued. The passes are valid for 12 months from date of issue and cover subsequent calls at Rangoon or any other Burmese port. No shore leave is permitted until shore passes in quadruplicate have been processed. This happens quite swiftly and takes about 12 hours.
5. With the exception of the Health Declaration, there do not appear to be any pre-printed Burmese Forms, and the ship will have to make up her own.

Tugs: There are tugs in the port, but I understand that they are never used for berthing.

Departure: At least 6 up-to-date Crew Lists are required. All shore passes must be collected prior to departure, they are stamped by Immigration and returned to the holders.

All 3 government departments involved with the vessel (Customs, Immigration and Quarantine) issue a clearance on departure. In addition, the Master is given a letter from the Burma Ports Corporation for the River Pilot, stating that all sailing documents have been produced and giving permission for the vessel to proceed to sea.

Register and supporting Certificates: (Load Line, Safety Equipment, etc.) are taken ashore by Agents on arrival, against a receipt, and returned immediately prior to departure.

Officials: Supervisors and Tally Clerks wear uniform with badges of rank. They must be provided with an office on board, and it is customary to provide these gentlemen with meals. Two Customs Officers live on board at all times and accompany vessel to anchorage or buoy berth. These Officers must be fed in the dining saloon and provided with accommodation. On arrival the Customs seal the bond and, if requested to do so, will also seal the dry stores, which is a wise precaution.

Beer is not put under seal. The Customs Officer will make an issue of bonded items daily if requested. The only thing to which restrictions are applied is cigarettes, where the daily issue is limited to 40 per man. Customs also exercise a tight control over all local currency drawn from the Agents and all must be accounted for prior to departure, even cash spent on Provisions.

Cargo Work: Two shifts of 8 hours are normally worked, that is, 0800 – 1600 hrs. and 2000 – 0400 hrs. Cargo can be worked at any time. Overtime hours being 1600 – 2000 hrs. and 0400 – 0800 hrs. Ship's gear was used for discharge. Two gangs were employed at each hatch, and rates of discharge were: No. 2 – 10.35 t.p.h. No. 3 – 14.46 t.p.h. The rate of discharge at No. 2 was remarkably good when one takes into consideration that No. 2 after crane, due to a winch breakdown, was not available after the first 1.5 days. Two gangs were employed throughout at this hatch. After the crane failure the after gang were employed in shifting cargo to where the forward crane could plumb it.

Weather permitting, discharge continued 24 hours a day. A total of 37 hours 40 minutes working time was lost due to rain. When one takes into consideration the many delays and the fact that the Watersiders were discharging a random stow, the rate of discharge was most creditable. Crane drivers and Watersiders were very satisfactory; Supervisors were helpful. Pilferage was nil, damage to cargo was slight and there was no damage to the ship.

Pratique: Granted on arrival. There are no facilities for Radio Pratique.

Provisions: Obtained through the Shipchandler. But very expensive. We purchased salad and bread at the local market at reasonable prices and of reasonable quality. This was done by the Purser/Catering Officer, going there with the Agent and paying cash. This is common practice and was condoned by our Customs Officer.

As we had no contact with the Official Shipchandler, we do not know what his prices were or what his product range is. Any future vessel calling at Rangoon should arrive with as much in the storerooms as possible.

Fresh Water: Obtainable either from water boats or the wharf. Give 2 days notice. It is expensive, 10 Kyats (about 79 pence) a ton. As a precaution, we treated what we took with chloride of lime.

Repairs: We employed some electricians from the machine shop of the Central Electric Service to assist in our investigations of the winch fault at No. 2 hatch. An Electrical Engineer and 3 Electricians were provided and appeared competent. Unfortunately, they did not trace the fault.

Currency: The unit of currency is the Kyat, worth approximately 12.69 to the Pound Sterling.

Weather: Hot and humid, with much rain, it being the season of the S.W. monsoon. Winds in the port were generally light. At the time of our stay, the river was just beginning to rise as a result of the monsoonal rains in the high country, but had not reached full flood. There was, however, a continuous outflow past the port at all states of the tide.

Health: Up to date Cholera Vaccination Certificates are required by the local Authorities and anti-malaria precautions should be taken. Mosquitoes and many other insects are numerous, especially in the wet weather.

General: Five watchmen were provided. When at anchor or at buoy berth, the ship must feed them. When alongside, they eat ashore. The security at the gate is very strict indeed and all local people leaving the port area are searched. No ship's gear or personal effects went missing. There is no garbage collection at Rangoon, so the ship must make her own arrangements for storing waste. Burmese people are unfailingly polite and courteous and naturally expect the same treatment in return. The vessel can work cargo on any day.

Repatriation: Possible but not recommended.

SHIPMASTER'S REPORT: August 1982.

Navigation: Dagon Light Vessel was showing Gp. Fl. (3) 20 sec. on the vessel's arrival, but was unlit on departure 10 days later. The Racon was not operating. The light vessel was in its charted position.

The pilot vessel "Thamada", call sign XYCZ, anchors around position Lat. 16° 13′ N., Long. 96° 18′ E. In August 1982 the pilot vessel's VHF was not operating, but they could be contacted by WT on 500 kHz and also by Aldis lamp. When picking up a Pilot the pilot vessel will be under way; boat rope, manropes and heaving line are required; the Pilot comes off by motor launch from the pilot vessel. If the anchorage is crowded extreme caution is advised while manoeuvring, due to very strong tides, estimated at 6 knots to 7 knots at Springs. Many collisions have taken place during embarkation of Pilots.

Lanthaya Light Float was observed to be 1.8′ N.N.E. of its charted position. It is small and inconspicuous. Northwards of Lanthaya, buoys and light floats are moved as conditions in the channel require, and their charted positions should not be relied upon.

There are no navigational aids available which are useful in approaching the pilot station; however, acceptable results were obtained by taking RDF bearings of the Burma Broadcasting Service broadcast station operating on 955 kHz with antennae in position Lat. 16° 52′ N., Long. 96° 10′ E. (position from World Radio & TV Handbook 1982).

There is a Port Radio station at Rangoon Port, operating on VHF Channel 16, call sign "Port Tower".

Tugs: No tugs are available for berthing, however Pilots are very experienced and all were found to be excellent shiphandlers.

Formalities: Immigration require 4 photographs of each crew member and will issue shore passes; Agents can arrange a photographer to attend on board on arrival.

Customs Regulations are extremely strict, particularly with regard to foreign currency. All foreign currency must be declared and will be put under seal during the vessel's port stay. It has been reported that violations of currency regulations have resulted in severe prison sentences recently. Firearms and narcotics will also be placed under Customs seal. Shore-going crew must undergo Customs inspection at the Main Gate.

Derat is available.

Cargo: The vessel loaded a full cargo of 2,982 hoppus tons of Burmese round logs of mixed varieties; logs were very heavy, averaging out at 1.23 tonnes/cu.m. Cargo was brought alongside by trucks and loaded ex-wharf by ship's gear. Stevedores were inexperienced; stowage was poor and loading rate slow. Cargo was also found to be rat infested. Shippers originaly requested 600 (repeat six hundred) original B/L's, and when this request was dismissed they eventually agreed to 60, issued through Agents, covering 41 parcels of cargo.

Shippers also presented a proforma copy of "Burma Ports Corporation B/L Form" which they requested be issued instead of Owners' forms, stating that this was a standard Burmese B/L form. After studying the clauses contained in this B/L form it was rejected as being poorly written, badly printed, containing many misprints and having no provision for the inclusion of the "Clause Paramount". Masters are therefore advised to exercise caution in accepting a B/L for signature in this form, in order to safeguard Owners' interests.

General: There is a Philippine Embassy in Rangoon, where Filippino crew may renew or be issued with Passports conveniently. Call Embassy for appointment. Fresh water is available alongside or by barge. Bunkers are not available. Minor repairs can be undertaken, but are very expensive. Good medical facilities are available. Fresh provisions may be obtained at the local markets at very reasonable prices. The British Embassy is next door to the main post office. The Strand Hotel, near the British Embassy, provides good meals and adequate facilities at reasonable prices.

AUTHORITY: Myanma Port Authority, P.O.Box No. 1, Yangon, Union of Myanmar. *Tel:* 83122. *Telex:* BM 21208, BM 21219. *Cables:* Portrust Yangon. *Contact:* The Managing Director.

Namibia

LUDERITZ: 26.39 S. 15.09 E. **(See Plan)**

PORT LIMITS: East of the line from Angra Pt. to a point 1,097 m. due North thereof, thence by a line from the latter point to the South shore extremity of N.E. Point.

DOCUMENTS:
1 copy Arrival Form T958 for Agent.
2 copies Crew List.
2 copies Passenger List.
Certificate of Ship's Registry.
Ship's Articles.
Manifests.
Charter Party.
Bills of Lading.
Official Log Book.
List of Dutiable Stores.
Ship's Radio Station Licence.
Safety Certificate.

PILOTAGE: ETA at least 72 hours in advance if possible; unless in an emergency. Cables addressed to Port Captain Luderitz.

All pilotage inside port limits is compulsory.

Pilot Boarding Positions: 1 mile North of Angra Point. Contact Pilot on VHF Channels 16 and 12.

Pilot Vessels: "Fisant": Black hull, white wheelhouse and yellow roof. Yellow funnel. "Tern": Black hull, white upperworks, wooden wheelhouse. Yellow funnel.

Specific Requirements:
2 manropes at ladder.
Lifebuoy at ladder.
Ship's officer in attendance when Pilot embarking or disembarking.

At night, the ladder is to be lit without blinding Pilot. No broken or slippery ladder rungs.

ANCHORAGES: Outside port limits: Shearwater Bay: Between Diaz Pt. and Angra Pt. Good holding ground. Depth up to 20 m.

Inside port limits: Luderitz Harbour: Between Angra Pt. and Shark Island. Good holding ground. Depth up to 16 m.

Robert Harbour: Between Shark and Penguin Islands. Good holding ground. Depth up to 9 m. Confined anchorage.

RESTRICTIONS: Docking and undocking may take place between 0600 hrs. and 2200 hrs. or at any other time in an emergency.

MAX. SIZE: Shearwater Bay: No restrictions. Luderitz Harbour: No length restrictions, draft 15 m. Robert Harbour: Length approx. 140 m., draft 7.5 m. Alongside main jetty: Length up to 105 m., draft 6.0 m. (In an emergency 6.1 m.)

HEALTH: Arrange for Pratique via Agent.

RADIO: Radio-telephone calls, cables etc. to Agents, Shippers, etc, through Walvis Bay Radio; call sign ZSV. Frequencies as per International Telecommunication Union list of Coast Stations.

VHF: VHF contact with Port Control on Channels 16 and 12. Working Channels: 6, 8, 9, 10, 11, 13, 14, 17, 67, 68, 69, 70, 71, 72, 73 and 74. Same VHF channels apply to Pilot and Tugs.

Diaz Point Lighthouse maintains a 24 hour watch on VHF Channel 16; with working channels as for Port Control. If no reply from port control, contact Diaz Point Lighthouse.

RADAR: No port radar service.

TUGS: Two small tugs are stationed at the Port: "Tern" (diesel) of 850 h.p. length 26 m. and "Fisant" (diesel) of 220 h.p. length 14 m.

Tugs usually join vessel at head of the channel in Robert Harbour. Tugs lines' are used; at no extra charge.

Tugs are equipped with fire fighting hoses and salvage pumps.

BERTHING: Entrance Channel: Length 708 m., width 60.9 m., depth 6.1 m.

Turning Basin: 236 m. by 198 m., depth 6.1 m.
Main Jetty: Length 242 m. Two berths of 92 m. length, depth 6.1 m.
Wooden Jetty: Length 168 m., depth 3.5 m.

One berth is available on each side of the main jetty for vessels up to 150 m. in length. A draft restriction of 6 m. at low tide exists. Sea bottom alongside berths and entire channel is soft mud and silt.

The wooden jetty is used mainly for the local fishing fleet of small wooden boats.

No specialised berths exist at Luderitz, at present.

CRANES: 2×4 ton cranes able to work over either side of jetty but unable to work in tandem. Any heavier lifts by ship's gear only.

STEVEDORES: 72 hours' notice is required in order to arrange gangs. Average rates: Frozen fish 18 t.p.h. General cargo 32 t.p.h. Timber 45 t.p.h.

MEDICAL: 2 doctors, one hospital (36 beds), one hospital (160 beds), notice of 4 hours required, except emergencies.

TANKERS: 2×10 in. diameter DGO pipe-lines, all necessary fittings ashore. SG 0.854.

DENSITY: 1025.

FRESH WATER: Available on jetty by pipe-line through meter at approximately 25 t.p.h.

FUEL: Gas oil connections to 2×254 mm. pipe-lines from shore tanks.

Gas oil bunkers points on the main jetty supply at approximately 25 t.p.h. 1,200,000 litres of gas oil are available.

Small quantities of gas oil by 6,819 litre capacity road tanker are also available at immediate notice.

CONSULS: None.

REPAIRS: Light engineering facilities exist. Underwater inspections and working divers available.

DRY DOCKS: One slipway of 400 tons capacity and 1×150 ton capacity. Used mainly by local fishing boats.

SURVEYORS: Department of Transport surveyor is available at Walvis Bay. Cargo surveys, underwater surveys and other independent surveys are available by Master Mariner (foreign-going).

GANGWAY/DECK WATCHMEN: Not necessary but available if required.

HATCHES: Opened and closed by crew.

CARGO GEAR: Alongside jetty by shore cranes (4 ton capacity) by ship's gear at anchor when using lighters. Eight lighters, 26 m. long, 150 ton capacity are stationed at the port.

REPATRIATION: Handled by Agent.

AIRPORT: 12 km. from harbour. 2 flights a week to and from Windhoek and Cape Town. Charter flights may be arranged.

TIME: GMT plus 2 hours.

HOLIDAYS: Cargo can be worked on any day.

POLICE/AMBULANCE/FIRE: Police: 10111, Ambulance: 2266, Fire: 2607.

TELEPHONES: Available R30.00 per connection plus usage.

SERVICES: Compass adjusting, diving and cargo surveys.

SHIP SUPPLY SERVICE: An Off-Shore Ship Supply Service is operated by the Namibian Transport Services (Harbours) by means of a small tug and (occasionally) by means of a launch.

If the vessel does not have an Agent at the port, a deposit is required before the service will be rendered. The service is provided on a 24 hour basis, provided (except in an emergency) the necessary arrangements are made during normal office hours.

The tug has a capacity of approximately 3 tons and 24 passengers, but the capacity of the launch is severely limited.

The normal rendezvous position is approximately 3 miles N.E. of Diaz Point Lighthouse (Position of lighthouse: Lat. 26° 38.2′ S., Long. 15° 05.6′ E.) but the tug, by special arrangement, will proceed further to seaward if required. The depth of water at the normal rendezvous position is 22 m.

SHORE LEAVE: 24 hours at anchorage, launch available. No restrictions when alongside.

IDENTIFICATION CARDS: Seaman's Book.

DELAYS: No delays normally, except due to weather.

GENERAL: Fresh provisions, supplies and services available by arrangement with Agent.

Basic weather conditions: Summer – South to S.W. wind up to 35 knots frequently experienced. Winter – winds variable but mainly North up to 20 knots. Fog is frequently experienced West of Angra Pt.

Charts: BA. 3861 and 3863; South African Naval Charts: 1002 and 1003.

DEVELOPMENTS: The buoyage system used in the port is IALA Maritime Buoyage System "A".

SHIP'S OFFICER'S REPORT: December 1983.

Medical: No facilities for blood tests; these can only be done when there is a direct flight to Capetown.

Surveyors: Port Captain acted as Cargo Surveyor.

Customs: Very strict regarding magazines. These should be sealed in bonded store, otherwise fines payable.

Shore Leave: Possible from anchorage using tug.

Stores: Fresh vegetables available, but at very high prices.

AUTHORITY: Namibian Transport Services, P.O.Box 88, Luderitz 9000. *Tel:* 2337 or 21240. *FAX:* (06331) 21230.

AGENT: King & Sons (Pty.) Ltd. P.O.Box 11 (Hafen Street), Luderitz 9045. Tel: (06331) 2054. Telex: 0908-796. Fax: (06331) 2224.

WALVIS BAY 22.57 S. 14.30 E. **(See Plan)**

PORT LIMITS: The area bounded on the West by a line drawn from Pelican Point Lighthouse to a point North (true) for a distance of 4 km; on the North by a line from this point drawn East (true) to the mainland; together with the foreshore therein and the jetties, harbour works and harbour lands vested in the Government. For the purposes of calculating port charges a vessel is regarded as an "arrived ship" when it enters the dredged channel in Walvis Bay Harbour or when the vessel anchors in the port limits.

DOCUMENTS:
5 copies Crew List.
8 copies Passenger List.
2 copies Report Inwards/Outwards.
2 Certificates of Clearance DA3.
2 copies Transire DA4 for each port of call.
Manifest of Cargo in duplicate.
3 copies Manifest of Stores DA5.
1 Portnet Clearance.
Shipping Master's Certificate.
Immigration Certificate.
Post Office Certificate.
Income Tax Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.

PILOTAGE: Pilotage is compulsory. The vessel's Master must radio his ETA to his local Agent, who completes Form T.958 for submission to the Port Authority.

Channel 16 on VHF radio can be used to call the Port Control Office, working Channel 12. Pilot boats are normally black with a white superstructure and have a yellow funnel with horizontal green stripes.

The Pilot boards at a point approximately 0.5 miles North of the Fairway Buoy (Entrance Channel Buoy) in the direction of the Bell Buoy (Pelican Point Spit Buoy).

The Pilot will inform the Master by means of the VHF on which side the pilot-boarding ladder and manropes are required.

ANCHORAGES: Varying in depth from 13 m. – 14 m. at LWOST 1.0 miles North of Fairway Buoy. Bottom – sand and silt. (Please also see "Africa Pilot" Vol. II).

RESTRICTIONS: The movement of Oil Tankers and vessels carrying explosives or dangerous goods are restricted to daytime hours (berthing 0600 hrs. – 2000 hrs., unberthing up to 2145 hrs). The maximum permissible draft is 10.4 m.

MAX. SIZE: Max. LOA 224 m., max. draft 10.4 m.

HEALTH: Master to contact Port Health via Walvis Bay Radio to request Pratique. Same procedure applicable if disease reported.

RADIO: Call sign ZSV. VHF radio in Port Captain's Office.

VHF: Port Control equipped with VHF Channels 16 – 12. Port working Channels 9 – 11.

RADAR: Radar is fitted to the harbour tugs and pilot boats. Master to contact Port Control for radar service.

TUGS: Two first-class tugs equipped with radar, wireless telegraph and telephone, direction-finding apparatus and salvage and fire-fighting appliances; 2 Pilot boats and 1 launch.

Tugs normally join a vessel on Pilot's request in the entrance channel and are secured by means of the tugs' wires.

BERTHING: 8 berths available excluding tanker berth. Quay length 1,409 m., max. permissible draft 9.9 m. (salt water). Load/discharge by shore cranes unless cargo of such nature that it is essential to use ship's derricks. Berth Nos. 1 – 6 general cargo, No. 7 container berth and No. 8 berth allocated to bulk loaders, also utilised as repair berth.

CRANES: 18 cranes available, 17 × 4 tons, 1 ×15 tons.

BULK CARGO FACILITIES: Berth Nos. 1 – 6 utilised if necessary. Berth No. 8 exclusively used for salt loading as this utilises ship's gear only. Berth Nos. 1 – 6 served by shore cranes. Max. draft 9.9 m. (salt water). Bulk cargoes at Walvis Bay consist of salt/petalite. Loading rate salt by shore crane approximately 95 t.p.h., petalite approximately 30 t.p.h.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 7 utilised as container berth. Ro/Ro vessels berthed at No. 6, liquid chemicals at Berth No. 5. Container stacking area and 2 container stacking cranes available. Ship's gear will still be required for loading and unloading containers. Liquid chemicals are handled in tank containers.

STEVEDORES: Stevedoring is undertaken by private enterprise and stevedores are appointed by Ships' Agents.

Stevedores require minimum notice 72 hours prior arrival. Main export salt in bags rate 18/25 t.p.h. depending on method of delivery to ship's side (rail/road).

MEDICAL: Hospitals are available but prior arrangements have to be made with Agents for medical assistance.

TANKERS: Only one berth available. Max. length of vessel accommodated 650 ft. Diameter of load/discharge lines 10 in. and 12 in. Discharge rate 10 in. – 240 t.p.h. and 12 in. – 350 t.p.h. Max. draft 9.9 m.

DENSITY: 1025.

FRESH WATER: Available and delivered by hose ex-wharfside – hydrant at 35 t.p.h.

FUEL: Gas oil only available, 12 hours' notice required. Delivery by pipe-line or tank truck.

FIRE PRECAUTIONS: When berthed alongside a wharf or jetty, a ship having explosives or any other goods of a dangerous nature, the Master shall, if the Port Captain so directs, have a fireman in attendance, the cost whereof shall be borne by the Owner of the ship and the Master of any such ship shall also, at the expense of the Owner of the ship, adopt such other or further precautionary measures as the Port Captain may consider reasonably necessary for ensuring the safety of the harbour, the ship or the cargo.

CONSULS: France.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCK: There are no dry-docks available at this port. A syncrolift with a lifting capacity of 2,000 tons, maximum permissible length of 72 m., max. beam 13 m., and a depth of 10 m. is operated and owned by the Department of Sea Fisheries.

SURVEYORS: Lloyd's and N.V. represented.

GANGWAY/DECK WATCHMEN: Arrangements have to be made with vessel's Agents to secure services of gangway/deck watchmen.

HATCHES: Opened by crew.

CUSTOMS ALLOWANCES: Officers: 200 cigarettes, wine 3 litres, spirits 1 litre, beer 2 litres.

Crew: 3 litres wine, 200 cigarettes.

Allowances are based on 4 day issues.

CARGO GEAR: Loading/discharging of cargo is effected by means of shore cranes. 30 ton mobile crane available in case of emergency.

REPATRIATION: All facilities available.

AIRPORT: Situated 14 km. from Walvis Bay. Served by Namib Air/Air Cape, 3 flights per week, Wednesday/Friday/Sunday.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Ascension Day; Day of Covenant (16th December); Christmas Day; Boxing Day (26th December).

Cargo worked on all holidays except Christmas.

POLICE/AMBULANCE/FIRE: Police Tel. 10111; Ambulance Tel. 3441; Fire Department; Municipal: Tel. 3117.

TELEPHONES: Arrangements have to be made with Post Office to have a telephone connected.

SERVICES: 24 hour launch service available, divers inspect fouling, underwater photography, tank cleaning, hold cleaning, compass adjusting, radar repairs, hull cleaning.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Seaman's Book sufficient.

REGULATIONS: A copy of the Regulations are supplied gratis to Masters on arrival.

DELAYS: Most delays caused by fog.

AUTHORITY: Portnet, P.O.Box 361, Walvis Bay 9190, Namibia. *Tel:* (0642) 2077, 8201. *Telex:* 09295. *FAX:* (0642) 8390 *Contact:* The Port Manager.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 529 (Corner 13th. Road and 3rd. Street East), Walvis Bay 9190. Tel: (0642) 2771. Telex: 0908-3504. Fax: (0642) 3994.

Republic of Nauru

NAURU: 00.32 S. 166.56 E. (See Plan)

PORT LIMITS: Vessels to arrive approximately 4 miles on the West side of the island and establish contact with Harbour Master on VHF Channel 16 to obtain further instructions. Vessels are advised not to approach closer than 0.5 miles off the island, due to very strong variable currents.

DOCUMENTS:

International Declaration of Health, 1 copy.
Clearance from Last Port.
Crew Lists, 2 copies.
Passenger Lists, if any, 2 copies.
Manifest, 1 copy.

Certificates: Derat Certificate only.

PILOTAGE: Pilotage is compulsory. The Pilot Station is 2 – 3 cables North-West of the Northernmost buoy, off the Northern set of cantilevers (Cantilever No. 2), on the West side of the island, which is 0.5 miles from the shore. Masters should inform Harbour Master of their ETA 72 hours and 24 hours before arrival. ETA messages to be sent through Nauru Radio or through Sydney Radio to telegraphic address 'NAURUPHOS NAURU' or telex No. ZV 33082 NRUPHOS for attention Harbour Master. If there is any message for the Master, "Nauruphos" will advise through Nauru Radio or Sydney Radio on receipt of the second ETA message. In case of adverse weather or congestion, vessels will be notified by radio or by VHF Channel 16. Vessels are berthed during daylight hours only and should fly the National flag when approaching the island.

A safe and clean pilot ladder should be provided on the port side of the vessel about 2 ft. from the waterline. Vessels, as far as possible, should approach the pilot station from the north side of the island, with the ship's heading between 180° and 250°.

ANCHORAGES: No sea anchorage is available at Nauru due to extreme depths of water all around the island. Vessels unable to moor due to adverse weather, berth occupancy or late arrival drift off the port and return by daylight next morning, or when advised to do so by the Harbour Master. There are no shallow patches while approaching the island, but vessels are advised not to approach closer than 0.5 miles from ashore, due to very strong variable currents.

RESTRICTIONS: Tide and draft have no bearing on entry but it is normal not to handle vessels into berth in darkness. However, vessels are unmoored at all hours.

MAX. SIZE: Vessels have been handled up to an overall length of 630 ft. (192.02 m.). Beam should not exceed 93 ft. (28.34 m.). A fully laden vessel on departure from Nauru loading berth, should not exceed 42,000 tonnes displacement, as the moorings are designed for the above tonnage.

HEALTH: Masters of vessels approaching Nauru are required to send a telegram or telex directly to the Quarantine Officer, Nauru, not more than 24 hours or less than 12 hours before arrival either through Nauru Radio or Sydney Radio. The quarantine message should state the name of the last port, the date of departure from the last port, the number of crew and passengers, and the presence of any infectious disease. If no reply is received by the vessel from the Quarantine Officer then the vessel should call Nauru Radio on VHF Channel 16 and obtain pratique clearance, after arrival off the island. Messages to Quarantine Officer can also be sent on Telex No. ZV 33086 NRUMIC.

RADIO: Nauru Radio Station, call sign C2N, operates 7 days a week, during the hours of 0800 – 1642 Local Time. Should, through atmospheric conditions, difficulty be found in raising Nauru, it is suggested that the message be passed through Sydney or any other convenient coastal station. Messages to the Nauru Radio Station can also be passed on Telex No. ZV 33086 NRUMIC or ZV 33081 GOVNRU.

There is a SSB radio at the Harbour Master's Office and contact can be established on 2182, 6215.5, 6221.6 and 16590.2 kHz.

VHF: Harbour Master's Office (Port Control) has VHF with a range of 20 miles to the West side of the island. Calling Channel 16. Working Channel 14 for the port.

Nauru Radio station has VHF with Channels 16, 11, 12, 26 and 68.

TUGS: No tugs available.

BERTHING: Special requirements which relate to berthing in the port are contained in the booklet "Information for Masters of vessels proceeding to Nauru" issued by the Nauru Phosphate Corporation. The gear for making fast to the mooring system and for heaving into the inner berth is supplied from ashore and the shore mooring gangs which board the vessel at pilot station, carry out the operation under the direction of the Duty Harbour Master (Pilot) on board. All Harbour Masters are qualified Master Mariners.

A vessel is moored initially to the outer buoys which are anchored in approximately 600 m. deep water and then hove to an inner buoy system, where the vessel lies in about 30 m. of water when in the loading position, 18 m. – 24 m. from the reef edge.

Loading of phosphate is by shore equipment at the rate of 3,000 t.p.h. Discharging and loading of all other cargoes is by ship's gear to and from the lighters.

A crane with a lifting capacity of 24 tons is available.

STEVEDORES: As stevedoring is carried out by Nauruphos, no separate advice is required. Loading rate of bulk phosphate is as high as 3,000 t.p.h.

MEDICAL: Medical treatment can be given at short notice. Limited hospital facilities are available, and emergency surgery can be carried out. Cholera vaccinations are required if the vessel has come from an infected area. However, if the vessels are calling at the island only for medical assistance, message should be sent directly to the Principal Immigration Officer, Nauru on Telex No. ZV 33086 or ZV 33081.

TANKERS: Lengths and drafts as for bulk phosphate vessels. 8 in. discharge line to shore storage tanks.

DENSITY: Normal salt water all states of tide.

FRESH WATER: Island water is imported, and water will be supplied only in cases of emergency and in very small quantities.

FUEL: Island stocks are imported for use in the phosphate industry, and limited quantities of heavy fuel or diesel oil can be made available in cases of extreme urgency.

CONSULS: Australian High Commissioner and Consul General for Republic of China are resident on the Island.

REPAIRS: The phosphate industry requires good workshop facilities of various kinds for maintenance of their own heavy plant and such workshops are kept busy at all times. Small repairs such as welding, brazing, lathe work, etc., can be carried out, but only when essential to allow the vessel to proceed on its voyage. Main engines cannot be immobilised whilst the vessel is moored to any section of the buoy system.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: No restrictions apply.

CARGO GEAR: Cargo gear should be up to the standard demanded in Australian ports.

REPATRIATION: Repatriation can be arranged. No facilities for crew changes.

AIRPORT: Airport is 1 km. from the Harbour Master's office. Air Nauru operates weekly to Melbourne, Fiji, New Zealand, Manila and Honiara.

TIME: Local time is GMT plus 12 hours. No alterations during the year.

HOLIDAYS: Christmas Day, New Year's Day, and Good Friday are normally closed holidays. Other National holidays occur during the year but normally work continues on these days.

POLICE/AMBULANCE/FIRE: All emergencies are handled by the Harbour Masters, one of whom remains aboard the vessel throughout the time the vessel is attached to the mooring system.

TELEPHONES: Telephones are placed aboard for the use of island staff working the vessel.

BANKS: Bank of Nauru is the only bank on the island, and is situated at the Civic Centre, which is 0.5 km. from the Harbour Master's office. The address of the bank is Bank of Nauru, P.O.Box 289, Republic of Nauru, Central Pacific. Telex No. ZV 33085 BANKNRU. Tel. No. 5239 and 5240.

SHORE LEAVE: This may be granted at the discretion of the Master in consultation with the Harbour Master on board. It should be borned in mind that in the event of adverse weather during loading operations the Harbour Master on board will decide to unmoor the vessel.

CREW IDENTIFICATION CARDS: Some form of identification, Passport, Discharge Book, or identity card should be carried by crew members.

PORT REGULATIONS: No vessel may immobilise main engines whilst moored to the buoy system. Main engines should be on instant readiness, deck power should be available at all times, and the vessel must proceed to sea when instructed to do so by the Harbour Master on board.

DELAYS: Normally no delays should be expected. Vessels could wait a day, or possibly 2 due to port congestion, but this seldom happens; but delays can occur due to adverse weather, the duration of which is unpredictable. The season of adverse weather is normally November to March.

Vessels to stock sufficient fuel, fresh water and provisions, in case of adverse weather which can cause the vessels to drift off the island, for several weeks.

AUTHORITY: Marine Department, Nauru Phosphate Corporation, Aiwo District, Republic of Nauru, Central Pacific. *Tel:* 4192, 4191. *Telex:* ZV 33082 NRUPHOS "Attn. Harbour Master". *Cables:* Nauruphos, Nauru. *Fax:* Area Code 674, No. 4111. *Contact:* Harbour Master, Tel. Office 4189. Residence 4459.

NOTES

Please also advise Shipping Guides Ltd.

Netherlands

AMSTERDAM: 52.22 N. 04.54 E. (See Plan)

PORT LIMITS: Notice of Readiness will only be accepted (subject to C/P terms) if vessel has actually arrived at Amsterdam, which means that vessels have to enter from sea and pass the locks at Ymuiden, proceeding through the North Sea Canal to Amsterdam. There are various buoys and quays available where vessels can be moored waiting for final discharging berth.

DOCUMENTS:
Health Certificate. Forms obtainable from sea Pilot.
Crew List in triplicate.
2 copies of Crew Manifest for cigarettes, cigars, spirits, etc., belonging to crew.
Passenger List in triplicate.
1 copy of Manifest.
1 copy of Bills of Lading.
Dangerous Cargo List.
Ship's Register.
1 copy Stores List.
Also see "Rotterdam".

PILOTAGE: Pilotage is compulsory. Pilot boards from tender in the vicinity of Ymuiden between the light whistle buoy and the moles.

In order to avoid delays, Masters who require a Pilot must advise their ETA not less than 4 hours in advance to "Traffic Centre Ymuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain: *(a)* the words "ETA-Pilot", *(b)* expected time arrival (group of 4 figures) in middle European time, *(c)* draft with indication of unit applied, *(d)* port of destination.

"Traffic Centre Ymuiden" (Telegraphic address "Pilot VTS IJmuiden") can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation is possible at night.

Pilotage by Helicopter: When the pilot service by tender has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 4.6 m. in diameter. Deck plans should be provided in advance.

Vessels with draft of over 45 ft. (S.W.) will use helicopter pilotage.

Restrictions:
1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind Force 10 (55 knots).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Bottom of the pilot ladder should be 6 ft. above the water. Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

ANCHORAGE: Anchoring in Ymuiden outer harbour, North Sea Canal and in harbour of Amsterdam is prohibited.

RESTRICTIONS: Entry possible at night.

MAX. SIZE: Vessels proceeding to Amsterdam have to pass locks at Ymuiden. Dimensions of Northern lock (largest): 400 m. long, 50 m. width and 15.00 m. deep at N.A.P. (N.A.P. is 1.13 m. above LLWS.) Max. LOA 325 m. Max. width 42 m., and with special permission up to 45 m.

At max. width 45 m. the max. draft is 40 ft. salt water. Between 45 m. width and 42 m. width the draft increases gradually from 40 ft. till 45 ft. salt water. All these ships have to pass the locks with special permission.

The official max. draft to enter Ymuiden is 54 ft. salt water. Vessels with a draft of 43 ft. to 45 ft. salt water may enter Ymuiden and proceed to Amsterdam.

RADIO: Cable Agents giving ETA, draft, cash and other requirements via Scheveningen Radio/PCH.

BERTHING: Possible at night. If no berth available vessels may be moored on buoys.

Length of quays for sea-going vessels and depth of adjacent navigable water.

TUGS: Sea-going tugs available between piers at Ymuiden assisting vessels, into locks or outer harbour. Harbour tugs available in locks assisting vessels to Amsterdam. The rates include use of tug hawser.

CRANES:

	Capacity	*Number*
General cargo cranes	1 – 30 tons	67
General cargo cranes for inland craft	1.5 – 5 tons	3
Bulk-cargo cranes (shipping)	2 – 16 tons	10
Container cranes	50 tons	3
Mobile container cranes	35 & 45 tons	2
Container railway cranes	35 tons	2
Van carriers	30 tons	3
Table cranes	5 – 30 tons	7
Transporter bridges	7 – 50 tons	8
Floating bulk cargo cranes	2.5 – 16 tons	8
General cargo cranes (industry)	1 – 40 tons	13
Bulk cargo cranes (industry)	1.5 – 6 tons	10
Mobile cranes (shipping)	1 – 6.5 tons	12
Floating derricks	10 – 300 tons	12

CARGO HANDLING FACILITIES: Grain:

I.G.M.A. (Internationale Graanoverslag Mij. Amsterdam B.V.): The grain terminal, Situated in Vlothaven, is specially designed for the fast discharge and transhipment of grain and derivatives.

Depth alongside 49 ft. 3 in.

A fast conveying installation transports grain into the silos or to receiving ships. Capacity of the silos: 52,700 tonnes. Also soyabeans are transhipped to the soya oil extraction plant next to the I.G.M.A. silo.

Equipment: The installation has a main jetty of 1,200 ft. length to accommodate 2 vessels up to 100,000 d.w.t. The ships are unloaded by 2 mobile pneumatic suckers, with a capacity of 400 t.p.h., 2 screw grain dischargers with a capacity of 800 t.p.h. each and 1 floating elevator with a capacity of 200 t.p.h. for heavy grain. Two crane/weigh tower combinations with a capacity of about 400 tons heavy grain each. A floating crane, capacity 15 tonnes is available for handling stores, spare parts, etc.

Despatch: With the modern equipment and the efficient way of handling, a good despatch can be realised. If two or three discharge units are available, a bulk carrier with 30,000 tons will be completed within 2 days. Daily discharge capacity in total is about 40,000 metric tons.

Supplies: Water obtainable from ashore, stores must be transhipped on barge at the quay as jetty is not accessible to trucks; bunkers by barge.

Pier C: Alongside this berth bulk carriers and tankers can be accommodated to load directly ex-silo. Max. draft 30 ft., max. airdraft 30 ft. Loading capacity 2,000 t.p.d.

Cargill B.V.: Located adjacent to the IGMA Grain Terminal.

Importing vessels are berthed alongside the IGMA pier and the plant receives the soyabeans directly by conveyor belt.

The finished products are loaded into coasters which moor alongside the jetty of the plant along the Mercurius Harbour. Loading capacity: About 200 t.p.h.

Ore, Coal, Agricultural Products, Derivates, etc.:

B.V. Overslagbedrijf "Amsterdam": This stevedoring company for the transhipment and storage of all kinds of dry bulk cargoes is situated in the West Dock, only 10 miles from Ymuiden. Along the quay with a length of 2,600 ft., large bulk carriers with a draft up to 49 ft. 03 in. fresh water can be accommodated. Vessels up to 54 ft. can be lightened at Ymuiden to a maximum draft of 45 ft. salt water.

There are no restrictions as to the length, height or beam of the ships. Maximum outreach of loading/discharging gear over water: 164 ft.; maximum height of loading/discharging gear above water level: 80 ft. 5 in.

Equipment: 4 high speed gantry cranes, gross lifting capacity 3×30 tons (20 tons net) and 1×50 tons (30 – 33 tons net) with built-in electronic weighing system. The 3×30 tons gantries have a maximum outreach over water of 131 ft., allowing a maximum air draft of 50 ft., whereas for the 50 tons gantry the maximum outreach over water is 164 ft., allowing a maximum airdraft of 80 ft.

Double independent conveyor belt-system (length 5 km.) for simultaneous stockpiling/reclaiming into barges and/or railcars with separate cranes for that purpose.

Loading machines for (push) barges and sea-going vessels up to 18,000 d.w.t.

Discharging equipment for railcars. Double track rail connection with Dutch Railway System with automatic weighing equipment. Storage capacity up to 3 million tons.

Capacity: Total discharging rate of gear: For ore up to 100,000 tons per 24 hours; for coal up to 60,000 tons; for derivatives up to 25,000 tons. Loading rate of gear into seagoing vessels from stockpile: up to 2,000 t.p.h. Ex barges: depending on size of barges.

Supplies: Water, stores and bunkers can be delivered by truck and/or barge.

Anthraciet Handels Vereniging: On the Adenhaven, quay of 180 m., water depth 33 ft., 1 table crane of 7.5 tons.

Scheepvaart en Steenkolen Maatschappij: In the Spoorweghaven, quay length 40 m., water depth 25 ft., 1 table crane of 6 tons.

Havenbedrijf de Rietlanden B.V.: Handles coal, minerals, ore, derivatives and fertilisers at 2 locations in the Port of Amsterdam, one in the Eastern port area, directly at the head of the Amsterdam Rhine Canal, the other in the Western port area.

Equipment: 2 gantry cranes with a capacity of 7 tons each; 2 floating cranes with a capacity up to 16 tons;

Excellent rail connections and weighing bridge;

Screening installations for coal and coke;

Storage capacity up to 200,000 tons;

Vast paved storage areas.

Very reasonable dispatch. Capacity about 15,000 tons per running day; with combined working of gantries and floating cranes even more. Quays with length of 4,800 ft. can accommodate large bulk carriers with a draft of 35 ft. With the floating cranes, vessels drawing up to 45 ft. can be handled at any place in the Port of Amsterdam.

Supplies: Stores, bunkers can be delivered by truck, and/or barge.

Phosphate: *Amfert B.V.*

At the fertiliser works, rock phosphate is discharged and after manufacture the ready product (fertiliser) shipped in bulk.

Equipment and berth: The main jetty has a depth alongside of 35 ft. and 2 vessels of up to about 25,000 tons can be accommodated. With the 2 grab cranes a daily out turn of 5,000 tons phosphate is reached.

Container and Ro-Ro/Ferry Terminals:

Combined Terminals Amsterdam V.O.F. (C.T.A.): Combined Terminals Amsterdam V.O.F. offer a complete container terminal service on the West Terminal which is located in the Westhaven.

Container Freight Station and Intercontainer Railway Terminal incorporated on the terminal site.

Roll-on/Roll-off ramp especially constructed for heavy axle loads. Car terminal facilities for handling large quantities of factory automobiles/trucks.

Berths:

Berth No. 1: Length 250 m. Depth alongside 13 m. (42 ft.)
No. 2: Length 215 m. Depth alongside 11.5 m. (37 ft.)
No. 3: Length 140 m. (Ro/Ro) Depth alongside 11.0 m. (35 ft.)
No. 4: Length 290 m. Depth alongside 11.0 m. (35 ft.)

Equipment: 3 Portainers, with lifting capacity 50 tons each, outreach 36 m. (116 ft.), rail width 20 m. (65 ft.) and backreach 24 m. (80 ft.) with 20 ft., 30 ft., 40 ft. and adjustable spreaders, also to lift two 20 ft. containers simultaneously.

Four multi-purpose-rail mounted dock cranes with lifting capacity of 30 tons on 20 m. (66 ft.) and 12 tons on 40 m. (131 ft.) outreach.

Two rail mounted transtainers, capacity 35 tons and 45 tons with 28 m. (90 ft.) and 40 m. (129 ft.) span rotating and adjustable spreader serving 3 railway tracks.

Eight van carriers, terminal tractors and chassis and heavy lift trucks equipped for containers, steel coils and pulp.

Facilities: Container storage yard 160,000 sq.m.

Car park 140,000 sq.m. (28 acres).

Container freight station 3,000 sq.m. (33,000 sq.ft.) 46 doors.

Two transit sheds 16,000 sq.m. (172,000 sq.ft.).

Workshop for the maintenance and repair of containers and road chassis.

40 reefer receptacles at the required voltages.

Depot of lease containers and road chassis. Container railway terminal.

Working Hours: Usually around the clock, 7 days per week.

Supplies: Fresh water obtainable from the quay, bunkers by barge.

Verenigd Cargadoorskantoor: VCK operates 2 modern stevedoring terminals of which one is equipped for Ro/Ro and passenger traffic: the Scandia Terminal. Regular ferry services sail from there to Norway (Summer passenger service) and Finland (cargo service).

Scandia Terminal: Scandia Terminal in the Suezhaven and Beringhaven, 10.5 nautical miles from the sea-locks in Ymuiden. Total area 105,080 sq.m., marshalling area 84,785 sq.m., quay length 771 m., 3 Ro/Ro ramps, one in Suezhaven and two in Beringhaven, shed space 20,295 sq.m., modern passenger building.

Vlothaven Terminal: 1 mobile container crane of 45 tons. 11 breakbulk cranes of 2 tons – 10 tons. Total area: 5,600 sq.m., quay length: 570 m., shed space: 13,700 sq.m. Marshalling area: 42,340 sq.m.

Also available on both terminals: side loaders (20 tons), tugmasters, slave trailers, flats, containers and forklift trucks.

P. Ter Haak & Zn. B.V.: Double berth Ro/Ro Terminal – Draft 39 ft. Regular Ro-Ro Service to East Coast of Sweden.

Molasses: Tradax–2 jetties, max. draft 11.30 m. receiving capacity 1,000 t.p.h. Max. d.w.t. 65,000 tons (approx.). Connections 8 in.

Minerals: Eggerding & Co. B.V. Length of quay 400 m. Depth alongside 33 ft. Discharge is carried out by floating cranes.

STEVEDORES: In order to enable Agents to order gangs in time it is recommended to keep Agents duly informed about ETA. No ETA to stevedores necessary.

MEDICAL: If immediate medical assistance will be required in the locks at Ymuiden, Agents must receive advance notice.

TANKERS: *Oiltanking B.V.:* 1 jetty for 2 vessels of 100,000 tons. Max. LOA 310 m., max. draft 15.0 m., 2 jetties for 2 vessels of 3,500 tons, 1 jetty (used in case of fire). One jetty for 1 ship up to 45,000 d.w.t. Pipeline connection 6 in. and 8 in. Receiving rate 2,000 t.p.h. LPG loading rate 2,000 t.p.h. depending on grade and condition. Fresh water available from jetty, fuel by barge. Stores by barge or trucks. (Jetty not accessible to trucks). Dirty ballast by barge.

Mobil: 2 jetties, 1 for vessel of 30,000 tons and another for vessel of 80,000 tons. Max. LOA 255 m., max. draft 13.7 m. Pipe-line connections 10 in. and 12 in.

One jetty for coast tankers or LPG tankers up to 2,500 tons.

The receiving rate for crude oil is 4,000 cu.m./hr. The loading rate varies from 400–1,900 cu.m/hr. depending on grade.

Fresh water available from jetty. Fuel available, pipe-line 8 in. Facilities available for dirty ballast if vessel to load at berth. Max. capacity 10,000 tons. Stores by barge or truck (Jetty not accessible to trucks).

Amatex: 4 jetties, max. LOA 300 m., max. draft 12.5 m. Pipe-line connections 6 in. – 12 in.

Receiving rate, up to 2,000 t.p.h. depending on grade and back pressure, if any. The loading rate is about 1,000 t.p.h. depending on grade.

Fresh water available by barge. Fuel available by barge. There are facilities for dirty ballast under special conditions. Stores mainly by truck (Jetties not accessible to trucks).

Comos: Two jetties, max. LOA 300 m., max. draft 13.5 m. Pipe-line connections 8 in. and 12 in. Four jetties available for seagoing vessels and barges up to a max. draft 14 ft. 9 in.

The receiving capacity is about 2,000 t.p.h. and loading rate up to about 1,000 t.p.h.

Fresh water available by barge. Fuel available by barge or pipe-line. Stores by truck. There are no facilities for dirty ballast.

Smid & Hollander: 2 berths for receiving crude oil, max. LOA 245 m., max. draft 12.5 m. Fuel available at berth. Fresh water available by barge. Stores by truck (Jetty not accessible to trucks). There are no dirty ballast facilities.

Noord Europees Wijnopslagbedrijf B.V.: One jetty, max. draft 41 ft. For wines, fruit juice and alcohol. Fresh water and fuel available by barge. Stores by truck.

Cindu: Located in Petroleumhaven. Max. LOA 170 m., max. draft 10 m. Fresh water and fuel available by barge. No dirty ballast facilities.

De Humber: Located in Petroleumhaven. Max LOA 150 m., max. draft 10.0 m. Fresh water and fuel available by barge. No dirty ballast facilities.

Marbon: Located in Hornhaven. Max. LOA 100 m., max. draft 5.50 m. Fresh water and fuel available by barge. No dirty ballast facilities.

Schuurman: Located in Usselincxhaven. Max. LOA 180 m., max. draft 11.30 m. Receives molasses at up to 1,000 t.p.h. Fresh water and fuel available by barge. No dirty ballast facilities.

DENSITY: Amsterdam is not a tidal port. The water is brackish to fresh.

FRESH WATER: Drinking and boiler water can be supplied by barge, or if connection available, from shore. Price depends on quantity ordered.

FUEL: All grades of fuel are available and delivered mainly by barge. Advance notice 48 hours.

FIRE PRECAUTIONS: No repair work to be carried out to tankers without permission of Harbour Authorities. Usual non-smoking precautions, etc.

CONSULS: In Amsterdam only. Many countries represented in The Hague and Rotterdam.

C = Consul. C.G. = Consul-General.

GANGWAY/DECK WATCHMEN: Not required. Dependent on commodity of cargo.

OPENING/CLOSING HATCHES: Liner vessels by crew or by stevedores, payable per man per hour. Tramp vessels as per Charter Party.

CERTIFICATES:

Ship's Register.
Usual Cargo Certificate.
Safety Radio.
Safety Equipment Certificate.
Crew Roll.

All usual certificates required for navigation.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man or equivalent of tobacco or cigars. Wine and/or Spirits: 5 litres of wine per man. Spirits: total 5 litres for the whole ship.

CARGO GEAR: Usual cargo certificate.

REPATRIATION: Facilities for repatriation of crew to any destination are available.

AIRPORT: Distance to Schiphol Airport (served by regular airlines) 15 km.

TIME: GMT plus 1 hour. Summer time GMT plus 2 hours.

HOLIDAYS: New Year's Day; Good Friday; Easter Sunday; Easter Monday; Queen's Birthday (April 30th); Ascension Day; National Liberation Day (May 5th); Whit Sunday; Whit Monday; Christmas Day and Boxing Day.

Cargo can be worked during these days subject to labour being available at premium rates.

POLICE/AMBULANCE/FIRE: Police 222222; Ambulance 555555; Fire 212121.

TELEPHONES: Telephone connections on board are only possible on certain quays (passenger ships). It is possible to rent portable mobile phones.

SERVICES: Compass adjusting/direction finder calibration, representatives of all leading radio installations, radar and other nautical instruments available.

Tanker Cleaning Amsterdam B.V.:

The largest jetty can accommodate vessels up to 870 ft. in length and has a depth of 33 ft. alongside the berth to hydraulically test cargo tanks.

2 jetties are available for smaller tankers up to 260 ft. and 600 ft. in length, and have a water depth alongside of 16 ft. and 18 ft. respectively.

Cold work may be carried out in the engine room during gas freeing operations in the cargo tanks subject to prior consultation and approval of the management and local authorities.

Barges are available for taking slops or contaminated oil.

Specialised equipment for alongside can be supplied for taking oil-spillages.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not needed.

DELAYS: Usually no congestion.

AUTHORITY: Gemeentelijk Havenbedrijf Amsterdam. (Port Management of Amsterdam), De Ruyterkade, 7, 1013 AA Amsterdam. *Tel:* 20-221201. *Telex:* 12247 Ampor Nl. *FAX:* 20-209821. *Contact:* G.C.G. van den Heuvel, Managing Director. Captain C. Oudendijk, Harbour Master (Tel: 20-221515).

DELFZIJL: 53.20 N. 06.56 E. (See Plan)

LOCATION: On the estuary of the River Ems, opposite Emden.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Pilot boats normally cruise at Wester-Ems Buoy. During bad weather they withdraw into estuary, but never further than Borkum Roads. Pilot boats listen on Channel 6 and 16 and Pilot Office on Channel 14 VHF; distance from pilot station to Delfzijl 36 miles. Pilot service compulsory for all vessels with a length over 40 m. Foreign vessels may call Pilot on 2182 kHz. Traffic between the cutter and the vessel will be held on 1657 kHz. Tel: 05960-14988. Telex: 53785.

Approaching vessels from sea should inform the Pilot Commissioner of their ETA in M.E.T. with a notice at least 12 hours in advance via a coastal radio station; the pilot cutter may be informed via VHF at least 4 hours in advance.

The ETA message should contain the following details: *(a)* ETA Pilot Westereems (time in M.E.T. in a group of 4 figures); *(b)* Draft; *(c)* Port of destination; *(d)* Name, Call Sign and Gross Tonnage.

Departing vessels should apply for a Pilot at least 1 hour before ETD; the request should be made to the Office of the Inspector of Pilotage.

Pilotage from Delfzijl to Emden is compulsory.

ANCHORAGE: Vessels up to 4,000 tons d.w.t., which for some reason have to anchor outside the piers can do this East of the harbour entrance near Oterdum. Anchorage is situated within the following area: a line connecting the Buoys 53/PS-55-57 and PS2-BW28. Request for anchorage at the Pilot Office, VHF Channel 14. Larger vessels should seek an anchorage in the Doekegat. There is no anchorage inside the harbour.

ENTRANCE: The harbour entrance lies opposite the former village of Oterdum. The entrance extends to reach the deep water of the Bocht van Watum, and lies opposite the dredged channel between the Bocht van Watum and the Oostfriese Gaatje near Paapsand Sud.

The harbour entrance has an initial depth of N.A.P. −10 m., and a bottom width of 208 m. The harbour channel has the same depth, and a width of 100 m.

Depths: All depths are indicated in relation to N.A.P. LLWS at Delfzijl lies 2.03 m. below N.A.P. (Normal Amsterdam Level).

Tides: The range at Springs is 3.26 m. and at Neaps 2.59 m. Tidal movement is diurnal with an average range of 2.99 m.

MAX. SIZE: The harbour entrance has a depth of 8 m. at LLWS. Vessels drawing up to 9.3 m. can enter under normal HW circumstances; a keel clearance of 10% of the draft will be maintained. Masters of vessels with large draft are recommended to contact the Port Authority in good time with regard to the water level to be expected near Paapsand-Sud and in the Zeehavenkanaal. In the harbour "always afloat" can be guaranteed along the entire length of the Handelskade West for vessels with a draft up to 8.7 m. See "Depths" above.

TUGS: Tugs up to 32 tons bollard pull available. Additional tugs can arrive within 3 hours from Emden.

RADIO: Cable to Agents via Radio Scheveningen (PCH) on VHF Channel 27.

VHF: The Pilot Office and Port Office at Delfzijl and Eemshaven are equipped with a VHF installation Channel 14. The stations are constantly manned 24 hours a day.

The Eemskanaal – Lockmaster's Office is equipped with a VHF installation, Channel 11, which is constantly manned from Monday 0000 hrs. till Saturday 2400 hrs.

"Weiwerderbrug" (brug = bridge) is equipped with a VHF installation, Channel 22. The VHF station is manned from Monday 0600 hrs. till Saturday 1400 hrs. For bridge passage outside these hours call Port Office Delfzijl, Channel 14.

"Heemskesbrug": For bridge passage call Port Office Delfzijl, Channel 14.

RADAR: An integrated German/Dutch radar chain has been installed along the River Eems. The chain comprises the radar stations "Borkum" (German), "Oudeschip" (Dutch), "Emden" (German) and "Wybelsum" (German). The coordination of the stations has been centralised at Emden.

Radar assistance can be given when visibility decreases to a distance less than 2,000 m. The radar stations are working on a regular basis. Guidance and assistance can be given according to the table.

Station	*Area*	*VHF Channel*
"Borkum Radar"	River Eems from Westereems Buoys 1/2 or Huibertgat Buoys H1/H2 to Buoy 33	18
"Emden Radar"	River Eems from Buoy 33 to entrance Port of Delfzijl Buoys 56/57	20
"Wybelsum Radar"	River Eems from Buoys 56/57 to entrance Port of Emden	21
"Eemshaven Radar"	River Eems from Buoy 31 or Buoy 35 to a berth at Eemshaven (on request with 1 hour's notice; request to Pilot Boat on VHF Channel 6 or Pilot Station Delfzijl on VHF Channel 14).	4

BRIDGES: Bridge to the Damsterhaven may always be worked. Bridge to the Oosterhornhaven will be handled from Monday to Saturday (see "VHF – Weiwerderbrug"). On Sunday bridge may be opened on special request at the Harbour Master's Office.

BERTHING: The Outer Harbour is divided into 3 communicating basins: Handelshaven, Balkenhaven and Zeehavenkanaal.

Handelshaven, in the Western part of the Outer Harbour, has a deepwater quay, 570 m. long, with a depth of 11 m. alongside; A floating jetty of 320 m. length in a depth of 11 m. also jetties 110 m. and 130 m. in length, with a depth of 7 m. alongside.

Balkenhaven, East of Handelshaven, has depths of 8.5 m. to 5.5 m.; there are berths at 4 mooring buoys for small sea-going vessels.

Zeehavenkanaal is the Eastern part of the Outer Harbour and is being developed as a deep-sea harbour; it has a depth of 10.0 m. – 10.5 m. There are several private mooring facilities in the Zeehavenkanaal, from West to East:

a. Private quay of Wagenborg Terminal B.V. Length of quay 110 m. 1×35 ton crane. Depth 7.0 m.;
b. Private jetty of the Nedalco Factory. Tankers up to 25,000 d.w.t., LOA 200 m. and draft 9.0 m. can be accommodated. Loading capacity 250 t.p.h.; discharging capacity 350 t.p.h.;
c. Private jetty of N.A.M. Tankers up to 6,000 d.w.t. loading condensate can be handled. Vessels berth starboard side alongside. Depth alongside 9.5 m.;
d. Private jetty of AKZO is equipped with a loading station with a loading capacity of 1,200 tons salt/hour. Ships up to 25,000 d.w.t. can be accommodated here; depth alongside 11 m.; most vessels berth starboard side alongside.
e. Private jetty of the Methanol Chemie Nederland (M.C.N.) equipped with a loading station with a loading capacity of 500 tons of methanol per hour. Tankers up to 200 m. LOA accepted. Vessels berth starboard side alongside. Depth 10.0 m.;
f. Private jetty of Aluminium Factory equipped with 1 crane and is able to accommodate ships up to 30,000 d.w.t., LOA 200 m. and draft 9.0 m. Discharging capacity 300 t.p.h.

The Oosterhornhaven behind the dyke is a basin with a total length of 3,100 m. and a width of 60 m.

Navigating Oosterhornhaven is prohibited for vessels having a LOA exceeding 75 m. and/or having a maximum beam exceeding 12.50 m. and or having a draft exceeding 4.50 m. or having a height of over 8.0 m., unless a special permission is obtained from the Harbour Master subject to certain conditions.

Amongst others there are mooring facilities located in this canal alongside the yard of Azko, Methanol Chemie and Dow Benelux, equipped with loading installation and a tanker jetty.

The Eemskanaal:

Several private mooring facilities are located here. These are the following:

Name	*Type*	*Suitable for*
Jonker's Terminal	Potatoflour, bulk term	Coasters
Aceco	Grain elevator	Inland vessels/Coasters
Terminal Delfzijl	Timber Terminal	Coasters
North Sea Petroleum	Oil storage	Inland vessels
O.M.D.	Oil storage	Inland vessels/Coasters
Eemsmond	Cement factory	Inland vessels/Coasters
Mulder/Marne	Grain elevator	Coasters
Cebo Holland	Mud/Cement Storage	Inland vessels/Coasters
Betoncentrale Eemsmond b.v.	Concrete mortar plant	Inland vessels/Coasters

The Sea Locks:

The link between the Outer Harbour and the Eemskanaal and also the Oosterhornhaven of the port area is formed by the provincial sea locks. Sea-going vessels up to 6,000 tons d.w.t. with a beam of 16 m., a length of 120 m., and a draft of up to 5 m. can use these locks. As this will generally apply to vessels in ballast, the locks for this size of vessel are only of importance for the Groningen Shipyards.

For loaded vessels, the limit lies between 2,000 and 2,200 d.w.t. In the Outer Harbour of the locks sufficient berths have been provided for vessels waiting to pass through the locks.

Dimensions of Locks:

The Western (small) Lock has a length of 123 m. at falling tide and 81 m. at rising tide, a width of 7 m., a depth of sill outside 4.2 m. inside 2.4 m.; across each lock head lies a bascule bridge. The Eastern (large) Lock has a length of 120 m., a width of 16 m., depth of sill 5.4 m.; across each lock head lies a drawbridge. The opening times of the locks are continuous on weekdays.

Sheds and Warehouses:

There are several sheds and warehouses (total capacity: 3,250 sq.m.); also open storage. Grain silo with a storage capacity of 2,000 tons loose and 500 tons in bags. Also several private sheds, warehouses and grain silos.

CRANES: There are 6 shore cranes at Handelskade West with capacities up to 30 tons for handling general cargoes and bulk commodities, a floating 60 ton crane and mobile cranes.

STEVEDORES: *Normal Working Hours:*

Morning shift	0800 – 1200
Afternoon Shift	1230 – 1600
Evening Shift	1630 – 2030
Night Shift	2100 – 0030

Work on Saturdays and Sundays: Work on Saturdays and Sundays can be arranged in the same manner as this is done in the ports of Rotterdam and Amsterdam, *viz.* in consultation with the stevedores.

DENSITY: Ranging between 1012 and 1018, depending on the tide and the season.

FRESH WATER: Water obtainable alongside the quays or can be delivered by motor tankers, capacity 20 t.p.h.

FUEL: Fuels in limited quantities for coasters are always available. For bunkering of larger vessels, arrangements should be made in advance.

PORT RECEPTION FACILITY: (Delfzijl and Eemshaven).
Slobs Marpol Annex I: Eemsmilieu Technik. Tel: 05960 – 18803. Fax: 05960-18796.

CONSULS:

At Delfzijl		*At Groningen*	
Denmark	Tel: 05960-15820	Belgium	Tel: 050-141555
Finland	Tel: 05960-16016	France	Tel: 050-345322
Norway	Tel: 05960-15820		

REPAIRS: Most engine and deck repairs can be carried out by a local shipyard.

DRY DOCKS: At the Eemskanaal at the inner side of the locks a dockyard for ships up to 3,000 tonnes d.w.t. and a draft not exceeding 32 dm. is available.

In the Southern part of the Handelshaven a floating dock is situated. Ships with max. sizes of length 125.0 m.; breadth 19.0 m. and draft 7.2 m. may dock here. Lifting capacity of the dock is 5,000 tonnes.

For larger vessels, dry-docking facilities exist in the nearby Port of Emden (Germany).

GANGWAY/DECK WATCHMEN: According to Port Regulations, Master has to keep watchmen on board.

AIRPORT: Eelde (Groningen).

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: The International Tonnage Certificate should be shown to Harbour Master on first call every year.

HEALTH, MEDICAL ATTENDANCE, HOLIDAYS, LOCAL TIME, CUSTOMS ALLOWANCES: See "Rotterdam".

REGULATIONS: *Regulations for Arrival and Departure of Sea-Going Vessels:*

1. The arrival of a sea-going vessel, other than vessels passing through the port, must be reported in writing by the Master, or his local representative at the Harbour Master's Office 24 hours prior to arrival;
2. The declaration of arrival must contain:
   a. name and flag of vessel;
   b. nature and amount of the cargo to be discharged and/or loaded;
   c. dangerous goods, according to the IMO Code;
   d. last port of call;
   e. ETA and next port of call.
3. Declaration of Arrival must be made on the special forms or per teleprinter (53299 Hsddz);
4. At least 3 hours before departure the Master, the shipping company or its local Agent must notify the Harbour Master's Office of the intended departure, stating the estimated time of departure and the destination of the vessel.

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960 – 14966. *Telex:* 53299 Hsddz. *FAX:* 05960-30424. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain J. Stokroos, Deputy Harbour Master.

DORDRECHT: 51.49 N. 04.40 E. (See Plan)

LOCATION: At the junction of four important rivers, the "Merwede", which is the lower end of the Rhine and main route of all inland water traffic to Germany, France and Switzerland; the "Noord" leading to Rotterdam; the "Dordtse Kil" leading to Antwerp and Belgium and the "Oude Maas" giving Dordrecht its own open connection with the North Sea. Vessels up to 31 ft. can be accommodated.

Entrance: The main entrance is via Maasmond (see "Rotterdam"), Rotterdam Waterweg and Oude Maas, a distance of 26 miles above Hook of Holland, with a least depth of 32 ft. below NAP.

DOCUMENTS:
2 copies Cargo List.
2 copies Passenger List.
2 copies Stowaway List.
3 copies Crew List.
Health Certificate.
Also see "Rotterdam".

PILOTAGE: Compulsory. Vessels have to enter New Waterway at Hook of Holland and proceed to Dordrecht via this New Waterway and the River Oude Maas. Masters of vessels bound for Dordrecht should state destination in ETA message as Pilots for Dordrecht embark from pilot cutter at roads. Deep-drafted vessels may have to exchange Pilots just inside breakwaters at Hook of Holland. (See Rotterdam "Ordering a Pilot").

ANCHORAGE: At sea off Hook of Holland (see "Rotterdam"). No anchorage between entrance to New Waterway and Dordrecht.

RESTRICTIONS: Maximum L.B.P.P. 175 m., beam 25 m., draft 31 ft. (MHW). Vessels exceeding maximum length or beam could be allowed to navigate the Oude Maas under certain conditions.

For dangerous cargoes, see "Rotterdam".

The Pilot will decide the number of tugs required for passage on the Oude Maas, usually a minimum of 3 – 4 tugs.

Vessels exceeding 135 m. LOA or 17.5 m. beam must give notice to the Harbour Co-ordination Centre (H.C.C.) before navigating the Oude Maas. (H.C.C. Tel: 010-4764855, Fax: 010-4773489, Telex: 27370 Drhcc NL.)

Notice should contain: Ship's name, call sign, nationality, g.r.t., length, beam and draft, first port of call and berth (port and berth in case of ships leaving or shifting berth), ETA in Oude Maas or time of departure if leaving/shifting berth, Agent's name.

Tides and Currents; The tides are diurnal, with a daily rise and fall of 0.80 m. The current turns about half an hour after HW and LW.

RADAR: Radar service provided by V.T.S. and Dordrecht Radar Post.

RADIO/VHF: Dordrecht on VHF Channel 19. Also see "Rotterdam".

TUGS: Tugboats ordered by Pilot when entering New Waterway. Tugs normally meet vessels at Dordrecht.

BERTHING: *Harbours:* There are 6 basins for sea-going vessels.

Wilhelmina Harbour: Has a water area of 52 acres, can accommodate ocean-going vessels with a draft of about 31 ft. A 300 ft. wide pier with railway connections, a spacious transit shed and an open storage site of 200,000 sq.ft. for bulk cargo has been constructed. Furthermore, at a distance of 80 ft. from this pier, there is a jetty 900 ft. long and 31 ft. wide with a depth alongside of about 31 ft. below NAP. Rivercraft can moor either directly alongside the large vessels or in the basin between pier and jetty. The basin has a depth varying between 13 ft. and 20 ft. below NAP. There are 9 mooring buoys.

Juliana Harbour: This harbour with its 3 basins has a water area of 67.5 acres and a depth of about 29 ft. below NAP.

Basin No. 1 has a depth up to 27 ft. below NAP and is used for handling chemicals and mineral oils. Gebr. Broere b.v. has a large tank storage installation with a capacity of 250,000 cu.m. The terminal has 7 jetties of which 6 are used for fast service to ocean-going tankers or river tankers and 1 jetty is used for river tankers only. The location is excellent for their distribution via river, rail and road to inland destinations.

Basin No. 2 has a depth up to 29 ft. In this basin there are 3 smaller companies handling gasoline, petrol and lubricating oil. Fret Co., also situated in this basin, is a company which mainly handles agricultural products and sometimes general cargo for which they have 2 sheds with a capacity of 30,000 sq.ft. A company called Trans Terminal Dordrecht, specialising in handling fertilisers, has an open storage area of 110,000 sq.ft. and two sheds with a capacity of 35,000 sq.ft. are also located here.

Basin No. 3 has a depth up to 17 ft., this will be 26 ft. in the near future. There are 2 sand/gravel jetties in this basin and one for blasting grit. The company which handles this blasting grit is called Nietim.

The Mallegat: 2 basins, has been closed by 2 dams, one 500 m. North of the Wilhelmina Harbour entrance and the other 600 m. South of the Juliana Harbour entrance. By closing the Mallegat, the area of the harbours of Dordrecht has been increased by about 40 acres. The North basin with a water area of 18 acres and a depth of 29 ft. below NAP. The South basin with a water area of 22 acres and a depth of 24 ft. below NAP. Besides, as a sea harbour, Dordrecht is an important centre of inland navigation.

Principal Riverside Quays:	*Length*	*Depth – NAP*
Buitenkalkhaven	1,000 ft.	12 ft.
Hooikade	250 ft.	11 ft.
Groothoofd		
Passenger Landing Pier	290 ft.	15 ft.
Merwekade	1,000 ft.	16 ft.
Handelskade	450 ft.	16 ft.

Coasters can be accommodated at the Handelskade, Buitenkalkhaven, 2nd and 3rd Merwedehaven. For clearance of inward and outward bound coasters, the lower part of the Handelskade has been reconstructed. Mooring free of harbour dues is restricted to the time needed for clearance only.

Principal Harbours – Inland Vessels and Coasters:	*Length*	*Width*	*Depth – NAP*
Binnenkalkhaven	800 ft.	230 ft.	11 ft.
Bomhaven	265 ft.	165 ft.	10 ft.
Wolwevershaven	1,000 ft.	165 ft.	8 ft.
Riedijkshaven	650 ft.	120 ft.	10 ft.
1st Merwedehaven	2,000 ft.	400 ft.	10 ft.
2nd Merwedehaven	2,000 ft.	600 ft.	16.5 ft.
3rd Merwedehaven	2,000 ft.	600 ft.	15 ft.

CRANES: 2 Transporting bridges 15 tons each, 2 Portal cranes 12.5 tons each, 1 Portal crane 7 tons, 1 cargo crane 5 tons capacity.

BRIDGES: Bridges across the River Oude Maas are opened day and night. Sea traffic has preference over shore traffic.

Immediately above its confluence into Nieuwe Maas, the Oude Maas is spanned by 2 lifting bridges:

1. The Botlek Bridge with a free width of 53.80 m.
2. The Spijkenisse Bridge with a free width of 80.00 m.

TANKERS: Oil installation of Gebr. Broere N.V. has 7 tanker berths. Max. draft 9.0 m. There are other tanker berths for small tankers. No slop (residue) storage facilities.

DENSITY: Fresh water.

REPAIRS: B.V. Scheepswerf en Machinefabriek "De Biesbosch" Maasstraat 24, 3313 CR Dordrecht, Tel: 078-14 70 77, Telex: 29494 Biesb. NL.

Machinefabriek L. Straatman B.V. Kuipershaven 61, 3311 AM Dordrecht. Tel: 078-14 24 22.

B.V. Scheepswerf Hoebee, Merwedestraat 56, 3313 CS Dordrecht. Tel: 078-13 00 88.

Machinefabriek C.P. Bolier B.V., Grevelingenstraat 21, 3313 LB Dordrecht. Tel: 078-16 41 11, Telex: 29329 Bomak. N.L.

STEVEDORES: Working hours: 0730 hrs. on Monday until 1900 hrs. on Saturday.
FRESH WATER: At oil installations fresh water can be supplied from shore or supply by waterboat.
FUEL: Available by barge.
CONSULS: Denmark Tel: 132177, Norway Tel: 132177. Other consulates at Rotterdam at 20 km. distance.
POLICE/AMBULANCE/FIRE: Tel. Police 339911; Ambulance and Fire 133333.
AIRPORT: Rotterdam and Amsterdam airports at a distance of 25 km. and 90 km. respectively served by regular airlines.
PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES: See "Rotterdam".
HOLIDAYS: New Year's Day, Easter Day, H.M. Birthday (30th April), Ascension Day, Whit Sunday, Christmas Day.
TIME: GMT plus 1 hour. Summer plus 2 hours.
AUTHORITY: Havendienst Dordrecht, Merdekade 56, 3311 TH Dordrecht, Netherlands. *Tel:* 078-134211. *Telex:* 29492 Haven nl. *FAX:* 078-312141. *Contact:* J. Maat, Harbour Master.

EEMSHAVEN: 53.27 N. 06.50 E. (See Plan)

LOCATION: On the Western shore of the River Eems, about 15 km. N.W. of Delfzijl.
DOCUMENTS: See "Rotterdam".
PILOTAGE: See "Delfzijl".
ANCHORAGE: Near the Western Mole of the Eemshaven is an anchorage with a depth of about 16 m.
RESTRICTIONS: The entrance channel Doekegatkanaal has a depth of 11.5 m. thus enabling ships with draft up to about 11 m. to enter at HW.
Tides: The range at Springs is 2.78 m. and at Neaps 2.13 m. Tidal movement is diurnal with an average range of 2.49 m. (all approx.).
Depths: All depths are indicated in relation to N.A.P. LLWS at Eemshaven lies 1.84 m. below N.A.P. (Normal Amsterdam Level).
RADIO/TUGS/VHF/RADAR: See "Delfzijl".
BERTHING: The harbour is divided into 4 communicating basins:
Doekegatkanaal: Has a width at the entrance of 325 m. and a bottom width of 200 m. over the rest of the channel. At the end of the Doekegatkanaal is a turning basin with a diameter of 500 m. and a depth of 11.0 m.
Wilhelminahaven: East of the turning basin is a special basin for tankers with a depth of up to 15 m. and a bottom width of 200 m. This basin has a length of 600 m. Mooring facilities will be constructed by future industries.
Julianahaven: Located West of the turning basin. This basin has a length of 1,200 m. and a width of 250 m. to 300 m. ultimately. The depth of this basin varies between 12.0 m. and 14.0 m.

To the South of this basin a quay has been constructed with a length of 1,150 m. and a width of 300 m. This private quay is operated by two stevedoring firms:

1. Transit Centre Eemshaven: Quay length 469 m. 6 electrical cranes up to 20 tons lifting capacity; storage area 100,000 sq.m.; 35,000 sq.m. shed space. Handling general cargo and containers. The Eemshaven Sugar Terminal is located on the premises of and is managed by Transit Centre Eemshaven. A bulk sugar silo of 136 m. × 65 m. × 33 m., with storage capacity of 100,000 tons. Reception possible by bulk rail wagon, bulk road truck and bulk barge.

Loading into sea-going vessels is via 2 spiral shiploaders (120 t.p.h.) or by a bulk-loader (750 t.p.h.).

2. Terminal Eemshaven: Quay length 664 m.; 3 electrical spiralveyors; 2 electrical cranes of 5 ton lifting capacity; several mobile cranes up to 200 tons lifting capacity. Handling general cargo, containers and Ro/Ro traffic. The Ro/Ro ramp has a capacity of 92 tons and a ramp width of 7.0 m.

General cargo shed of 6,500 sq.m.; air-conditioned cold store, divided into 12 boxes with a total capacity of 13,500 pallets. Each box can be cooled down to temperatures from −2° C. to 14° C. for all kinds of fruit.
Emmahaven: Has been constructed South of the quay and West of the swinging basin. This basin with a length of 600 m. and a width of 130 m. has been dredged to 10 m.

In the N.W. corner a Ro/Ro facility is operated by A. G. Ems-Nederland b.v., serving the island of Borkum and can also be used for International Ro/Ro traffic. For trailers and cars, a fenced parking area is available.

A floating jetty for inland ships with a length of 225 m. has been constructed and is operated by the Port Authority.
SUPPLIES: Fuel oil and provisions should be arranged in advance.
REGULATIONS: See "Delfzijl".

AUTHORITY: Port of Delfzijl/Eemshaven Authority, Noordersingel 1, 9934 AK Delfzijl or P.O.Box 20004, 9930 PA Delfzijl. *Tel:* 05960-14966. *Telex:* 53299 Hsddz. *FAX:* 05960-30424. *Contact:* C. Biemond, Port Director. Captain R. K. Mast, Harbour Master. Captain J. Stokroos, Deputy Harbour Master.

FLUSHING (Vlissingen): 51.27 N. 03.35 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.
Also see "Rotterdam".

PILOTAGE: Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.
Wielingen (Southern Approach) or via Scheur: Vessels approaching the Scheldt Estuary from the English Channel pass the light vessels Sandettie Banks and West Hinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at Lat. 51° 22′ N., Long. 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing Roads, where a Dutch Pilot comes on board to take the ship into harbour.
Oostgat (Northern Approach): Vessels approaching the Scheldt Estuary from the North can take a Pilot in the vicinity of the S.B.Z. Lightbuoy (Lat. 51° 42.3′ N., Long. 03° 14.3′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.
ETA Messages: Masters' telegrams via Scheveningen Radio, call-sign PCH, are passed on to Agents 24 hours a day, week-ends inclusive.

For this reason it is advisable that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the River Scheldt should cable, at least 4 hours in advance, their:

1. ETA "Wandelaar" (Southern Approach) to: "Pilotage Ostend", via Ostend Radio (OST):
2. ETA "Steenbank" (Northern Approach) to: "Pilotage Flushing", via Scheveningen Radio (PCH).

The ETA message should contain the following details: *(a)* the words "ETA Pilot Wandelaar or Steenbank". *(b)* ETA central European time shown in a group of four figures. *(c)* draft (S.W. or FW) with indication of unit applied. *(d)* port of destination and berth.

Pilot cutters may be contacted on VHF Channel 6.

During bad weather both pilot cutters shift to Flushing Roads.

ANCHORAGE: The Roads of Flushing offer a safe and spacious anchorage with a sandy bottom. Vessels anchoring in the Roads are recommended to do so Southward of the Koopmanshaven (the Western harbour of Flushing) at not less than 0.75 miles from the Northern Coast. In this part of the Roads depths vary from 10 m. (33 ft.) to 26 m. (85 ft.).

The greatest depths and the strongest tides are encountered on the Southern part of the Roads. When lying there vessels are less exposed to the risk of collision in foggy weather etc. and are well away from vessels proceeding up and down the river, manoeuvring for the purpose of landing and/or embarking Pilots, and from ferry boats crossing between Flushing and Breskens.

At the Northern part of the Roads the tidal stream slackens gradually until HW is reached and under normal conditions of tide and wind the ebb stream is already felt along the shore from half an hour after HW until 1 hour after LW. From 1 hour after LW the flood tide sets in again and is felt until shortly after HW.

At the South side of the Roads the tidal stream is running until slightly over an hour after HW when the stream slackens and turns. 2 hours after HW the stream is running in N.W. direction gradually veering West.

A new anchorage Wielingen Noord, North of the line of the lightbuoys W6 and W10, is marked by yellow conical buoys. It is strongly recommended that vessels carrying dangerous cargoes anchor there, exceptional circumstances excepted and weather permitting.

APPROACHES: Approaches to the Scheldt Estuary:

	MLWS (m.)	*Rise Spring* (m.)	*Rise Neap* (m.)
South Channel:			
Wielingen	8.0	4.7	3.8
Scheur	13.9	4.7	3.8
North Channel:			
Oostgat	8.0	3.9	3.0

MAX. SIZE: *Flushing East Harbour:* Entrance 12.5 m. at MLLWS. A depth of 11.3 m. (length 550 m.) and 13.3 m. (length 350 m.) alongside the quay.
Max. draft at Buoys 41 ft. (2 berths).
Outer Harbour: West side, max. draft 9.5 m.
Inner Docks: Max. depth 24 ft.
Total: Max. length 280 m., max. draft 15 m. (S.W.), max. d.w.t., 100,000 tons. However, draft is controlled by the depth in the approach channels.
HEALTH: No certficates required. In event of any disease or fever contact Agents.
RADIO: All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 21. Harbour tugboats and pilot cutters operate on VHF Channel 6. Port Authority VHF Channel 9.
RADAR/VHF: Port radar service available. River service under consideration. Flushing Radio Channel 21 VHF. Every 5 minutes each hour this station transmits information regarding visibility, water-level, hindrances, anchorages, etc. Harbour tugs Channel 6.
TUGS: Join vessels in Flushing Roads. Vessel's lines usually used. Extra for tug lines. For contract holders 5% reduction.

BERTHING: *Outer Harbour:* West side, quay of 350 m. long, depth of water 11.5 m.. MLLWS. Quay height above sea level 2 m. at high tide and 7 m. at low tide. Opposite the West Side Quay is an oil jetty with depth of 9.5 m. alongside (LLWS). The jetty is owned by the Oil Terminal Flushing. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 6.0 m. Depth at HW 8.8 m.

Flushing East Harbour: Quay length 530 m., depth 11.3 m. LWOST and 350 m., depth 13.3 m.

The Bijleveld Harbour, situated in the North West part of Flushing East Harbour is operational. The harbour has a public quay with a length of 800 m. and depth 9.0 m. LLWS on the West side and length 400 m. and depth 10.5 m. LLWS on the East side. The quay will be used for the transhipment of refrigerated products and steel.

The new Kalocthaven Terminal, situated in the South part of Flushing East Harbour is operational. The quay is 250 m. in length and has a depth at LLWS of 10.5 m. alongside the quay wall, and a depth of 16.5 m. with floating cranes placed between vessel and quay. The terminal is a coal transhipment facility and can handle vessels of 150,000 d.w.t. Coal is handled by floating cranes of 25 tons capacity. The stockyard has a capacity for 230,000 tons.

Inner Docks: A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock length 140 m., width 22 m., depth on still LWOST of 5.4 m.. The other lock is 65 m. long, 7.8 m. wide, and 3.0 m. deep.

STEVEDORES: Provided by N.V. Haven Van Vlissingen (Port of Flushing Limited). Tel: 01184-26000. Telex: 37837 A.

Stevedore Company – Westerschelde. Tel: 01184-60020. Telex: 37798.

Flushing Stevedoring Co. Tel: 72800.

MECHANISED CARGO HANDLING: Quay length 2,800 ft. equipped with 2 portainers (65 tons capacity), suitable for handling 20 ft. up to 40 ft. containers. Straddle carriers capacity 32 tons and fork-lifts capacity 32 tons available.

Roll-on/Roll-off service between Flushing and Sheerness. Service twice a day. Vessels berth in the Outer Harbour at the Olau Line Terminal. At Flushing-East, Ro/Ro facilities for deep sea vessels, as well as Ro/Ro facilities for short sea Ro/Ro traffic.

LPG HANDLING FACILITIES:

Eurogas Terminal, Flushing East: The Eurogas Terminal is dedicated solely to storage and throughput of Liquefied Petroleum Gases and Chemical Gases.

Documents: Eurogas has been authorised by the Dutch Customs Authorities to prepare and complete all necessary Customs and transportation documents, which reduces waiting time to an absolute minimum.

Pilotage: In close co-operation with Eurogas, the shipping Agent and the Pilot, the Harbour Authorities control the arrival and subsequent mooring in the Quarles Harbour.

Max. Size:

Vessel Size	Length (m.)	Beam (m.)	Draft (m.)	Facilities Refr.	Facilities Press.
Jetty 1	213	38	9.5	×	×
Jetty 2	295	44	13.5	×	×
Jetty 3	110	12	5.0	–	×
Jetty 4	110	12	5.0	–	×

The harbour has a depth of 16 m. NAP (13.50 m. LLWS) and is therefore accessible to all existing fully loaded LPG-carriers. Maximum drafts may also be dependent on the prevailing least depth in 'Het Scheur' and the near approaches to the jetties and are conditional on the agreed procedures and Port Authority requirements for the safe movement of LPG-carriers. For safety reasons loading/unloading can be stopped due to high wind forces depending on wind direction.

Berthing: Jetty 1: At which inland barges and oceangoing vessels with a draft of max. 9.5 m., overall length of max. 213 m., a max. bow to manifold distance of 115 m., a max. stern to manifold distance of 108 m. and a max. beam of 38 m. can safely reach and leave and at which such vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm can accommodate:

- max. height +14.0 m. NAP (Normaal Amsterdams Peil) which is comparable with approx. 11.5 m. above water-level at HW.
- minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.
- range out of centre loading arm parallel to berthing line approx. 5 m.
- range out of – and perpendicular on berthing line approx. 7 m.

Jetty 2: At which inland barges and ocean going vessels with a draft of max. 13.5 m., overall length of max. 295 m., a max. bow to manifold distance of 150 m., and a max. stern to manifold distance of 150 m. and a max. beam of 44 m. can safely reach and leave and at which vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:

- max. height +28 m. NAP which is comparable with approx. 25.5 m. above water-level at HW.
- minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.
- range out of centre loading arm parallel to berthing line approx. 7 m.
- range out of – and perpendicular on berthing line approx. 12 m.

Jetty 3/4: At which inland barges and coastal vessels with a draft of max. 5 m., overall length of max. 110 m., a max. bow to manifold distance of 40 m. (Jetty 3), and 55 m. (Jetty 4), a max. stern to manifold distance of 50 m. and a max. beam of 12 m. can safely reach and leave and at which vessels can always lie safely afloat.

Jetty 4 is also suitable for small coastal vessels (max. deadweight approx. 1,500 tonnes), ship size depending on manifold allocation.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:

- max. height +14.0 m. NAP.
- minimum height −1.5 m. NAP.
- range out of centre loading arm parallel to berthing line approx. 5 m.
- range out of – and perpendicular on berthing line approx. 6 m.

Discharging: Eurogas operate 24 hours a day, 7 days a week.

Eurogas and the independent surveyor check the facilities of the vessel and the quantity of the cargo before discharge commences.

Receiving Capacities at Various Jetties (all in cu.m./hr.)

	Into refrigerated tanks	*Into pressure tanks or to other jetties*
Jetty 1	1,000 (per tank)	500
Jetty 2	3,200 (per tank)	500
Jetty 3	—	500
Jetty 4	—	500

In order to minimise laytime on jetties, refrigerated propane and butane can be discharged simultaneously at Jetty 1 and 2.

Additionally, all pipe-lines on shore can be cooled down before the arrival of a vessel by means of separate cool-down lines. All jetties are equipped with vapour return facilities including a blower-system at Jetty 2.

Board/board transfers between all the jetties can be realised with or without the use of 2 heaters. These heaters have a capacity of 500 cu.m./hr. each, with a temperature differential of up to 47°C under all weather conditions.

Loading: 4 vessels/barges, 3 railcars and 4 road trucks can be loaded simultaneously with capacities as described below.

Railcars and road trucks are each loaded on a weighbridge. The consecutive loading of 2 products into 1 railcar/road truck can take place without disconnecting and reconnecting of loading arms and necessary shunting/shifting to another loading point.

Loading Capacities in cu.m./hr.	*Product. Refrig.*	*Press.*
1. From the refrigerated tanks:		
To Jetty 1 or 2 (per tank)	600	–
To Jetty 3 or 4	–	–
Via heater to pressure tank	–	500
Via heater to Jetty 1, 2, 3 and 4	–	500
2. From the pressure tanks:		
To Jetty 1, 2, 3 or 4	–	350
To each railcar loading point	–	120
To each roadtruck loading point	–	80

Storage: The terminal consists of 6 pressure tanks with a gross capacity of 3,369 cu.m. each, and 2 refrigerated tanks of 55,000 cu.m. each. Total capacity is therefore 130,000 cu.m.

The refrigerated tanks are constructed with double integrity steel inner tanks and a concrete outer wall capable of holding refrigerated product.

In the pressure tanks, chemical gases can also be stored.

Product List:

1. Refrigerated tanks: propane, butane and/or mixtures.

2. Pressure tanks: butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide, propylene.

Products for the pressurised storage are:

Spheres 1, 2, 3, 4, 5 and 6. Butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide. Spheres 4 and 5 also propylene.

A. Pressure tanks: Product stored in tanks 1, 2, 3 and 6 shall have a vapour pressure of less than 13.5 bar gauge at 30°C.

B. Pressure tanks: Product stored in tanks 4 and 5 shall have a vapour pressure of less than 16.5 bar gauge at 30°C.

C. Refrigerated tanks: 2% mol. max. ethane content in propane was the design basis for the refrigerated system. The tolerances on the compressors and the cooling system are the technical limitations on storage of products with higher ethane contents.

Safety: E.S.D. systems (Emergency Shut Down systems)

Activated by:

(a) Gas detection system.
(b) Loading arms limit switches.
(c) Ship's E.S.D. system.
(d) Control-room.
(e) Local push buttons.
(f) General E.S.D. pressure storage fill system.
(g) Fill shut down (overflow).
(h) Shut down sendout system.

Gas Detection System.

Sensors located at:

(a) Annular space tanks.
(b) Fan intake.
(c) Roof tanks.
(d) Relief valves' exhaustline.
(e) Area general.
(f) Process area.
(g) Boiler house.
(h) Office heating air intake.
(i) Jetties.
(j) Existing pressure storage.
(k) Generators' area.
(l) Expansion-tank water/glycol system.

Firefighting: The terminal site has been equipped with all sorts of fire-fighting apparatus like:

– 45 water guns, which can spray 1,600 litres per minute each over a distance of 70 m;

– sprinkler installations at all vital points;

– 2 separated pumping systems, to be sure of water supply under all circumstances; 1 at the harbour with 2 diesel-powered pumps with a total capacity of 2,000,000 litres water per hour, the other 65,000,000 litres at the pond which is constructed on the site.

– Eurogas has its own fire brigade, with a special fire-fighting truck which can also travel on rails. In this way every part of the terminal site and its perimeter can be reached with the greatest possible speed.

Operator: Eurogas Terminals C.V.

Head-Office: Van Vollenhovenstraat 3, 3016 BE Rotterdam. Tel: 010-366955. Telex: 25338.

Terminal: Frankrijkweg 4, 4455 TR Nieuwdorp. Tel: 01196-12820. Telex: 55684.

MEDICAL: Two hospitals available.

TANKERS: Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21°C, or over 22,000 gallons with flash point up to 55°C require Harbour Master's permission for entry.

2 discharging berths alongside the quay. Discharge lines 3×8 in. diameter with capacity of about 2,000 t.p.h.

Total: See "Max. Size".

One jetty for tankers up to 100,000 d.w.t. and 3 jetties for barges and coasters with depth of 20 ft. and 30 ft.

Cautionary Advice: Due to adverse tidal conditions, vessels may tend to drift away from jetty during period before high tide. It is, therefore, very important that ships pay particular attention to moorings.

Connections:

Commodity	Loading arms
Fuel oil	2×12 in.
Clean products	2×10 in.
Bunkers (fuel oil only)	1× 8 in.

The two fuel oil loading arms can also be used for the discharge of crude oil. The loading arms are hydraulically operated.

Deballasting: One 12 in. and one 10 in. loading arm can also be used for the discharge of dirty ballast water in unlimited quantities at the rate of about 1,000 t.p.h.

Capacities: Discharging rate of crude oil 3,000 t.p.h. and the loading rate of fuel oil about 2,700 t.p.h.

Supplies: Water obtainable from jetty. Bunkers by barge. Stores by small vehicles max. axle load 12 tons.

DENSITY: About 1024.

FRESH WATER: Can be supplied either alongside the quay or by water boat. Possible to supply fresh water in Flushing Roads weather permitting.

FUEL: All grades obtainable from major oil companies and supplied by barge only.

Economical bunkering arrangements can be made at the sheltered anchorage Schaar van Everingen, a few miles up river from Flushing. No harbour dues. Max. draft HW Neaps 42 ft. Springs 45 ft.(S.W.).

CONSULS:

Belgium	Tel: 66989	Germany F.R.	Tel: 01188-1764
Denmark	Tel: 12711	Norway	Tel: 12272
France	Tel: 16732	Sweden	Tel: 16828

REPAIRS: All repairs possible.

DRY DOCKS: Largest (Graving) Length 229 m., width 36.1 m., draft 8.5 m. (HW), 90,000 d.w.t. and 2 smaller docks.

A dry dock with 300,000 metric d.w.t. capacity is planned.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

OPENING/CLOSING HATCHES: On liners by crew or stevedores, ship's option.

CERTIFICATES: On arrival, ship's register only.

CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and total on board out of bond 5 litres spirits and 100 litres wine.

CARGO GEAR: The port is equipped with modern mobile cranes, which can be used both in the outer harbour and in the inner docks, with the following capacities:

2 cranes – 30 tons
2 cranes – 25 tons
3 cranes – 12 tons
2 cranes – 10 tons
1 crane – 8 tons

Floating cranes are available with capacities of 225, 75, 40 and 8 tons.

REPATRIATION: All facilities available for crew changes; good railway connections.

AIRPORT: Rotterdam (Zestienhoven) 125 km.; Brussels (Melsbroek) 150 km.; Amsterdam (Schiphol) 180 km.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Queen's Birthday (April 30th); Ascension Day; Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Work can be arranged on above days, however dependent upon permission of the Docker's Inspection.

POLICE/AMBULANCE/FIRE: Police 13333; Ambulance and Fire 14444.

TELEPHONES: Possible to place telephones on board and for vessels berthing at the shipyard "De Schelde".

SERVICES: Compass Adjuster; Radio/radar services also calibration of the Direction Finder, Seamen's Home (Mission to Seamen); Lloyd's Sub-agents; Ship's Laundries.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Flushing Ports Authority, Engelandweg, Sloehaven, Vlissingen-Oost, P.O.Box 1056, 4388 ZH Oost-Souburg, Netherlands. *Tel:* 01184-68080. *Telex:* 37865 Haven Nl. *FAX:* 01184-67020. *Contact:* Captain H. Th. Giezen, Harbour Master. Tel: 01184-70270 (Residence). Captain J. Verkiel, Deputy Harbour Master.

GRONINGEN: 53.15 N. 06.34 E. (See Plan)

The port is connected with the Ems Estuary via the Eemskanaal and the lock at Delfzijl.

DOCUMENTS: See "Rotterdam".

Clearing is done at Delfzijl.

PILOTAGE: For the approach of the lock see "Delfzijl".

The length of the lock is 120 m. and the width 16 m. Depth over sill at LW 3.9 m. and at canal level 6.07 m.

On the locks Canal-Pilots are available but pilotage on the canal is not compulsory. The length of the canal is 14 miles and it has a least depth of 5.2 m. There are 4 bridges all 16 m. wide.

MAX. SIZE: Maximum size for ships passing lock and navigating canal; beam 13 m. and draft 4.5 m. (Vessels with greater beam and draft possible with permission of the Canal Authority.)

TUGS: Available at Delfzijl and Groningen.

BERTHING: *Hunzehaven:* South side 300 m. quayage, railway connected, max. draft 4.5 m., 3 grab cranes 3.5 tons.

Oosterhaven: North side 75 m. quayage, max. beam 12 m., max. draft 3.6 m.

Deense Haven: 3 mooring buoys, max. draft 4.5 m. One private grab crane on wharf, capacity 8 tons.

Eemskanaal: Private silo. Max. beam 12 m., max. draft 3.6 m., private timber yard max. beam 12 m., max. draft 3.6 m.

Van Starkenborghkanaal: Private silo. Max. beam 9.6 m., max. draft 2.9 m., private timber yard max. beam 9.6 m., max. draft 2.9 m.

CRANES: Floating sheerlegs up to 250 tons.

STEVEDORES: Available.

MECHANICAL CARGO HANDLING: Silos with equipment for bulk-handling of grain on Eemskanaal and Van Starkenborghkanaal.

MEDICAL: 3 hospitals available.

FRESH WATER: Supplied by Authority's water boats.

FUEL: By barge only.

CONSULS: Belgium, Tel: 138222; Norway, Tel: 189444; Spain, Tel: 137879.

REPAIRS: All repairs possible at Delfzijl.

DRY DOCKS: Transverse slipway at Delfzijl.

CERTIFICATES: On arrival, Ship's Register only.

AIRPORT: Eelde, 10 km. from Groningen, daily services to Schiphol.

HOLIDAYS: New Year's Day, Easter Monday, Queen's Birthday (30th April), Ascension Day, Whit Monday, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Police Tel: 121212; Ambulance Tel: 123456; Fire Brigade Tel: 123456.

TELEPHONES: Can be placed on board alongside Hunzehaven Quay.

AUTHORITY: Gemeentelijk Havenbedrijf Groningen, Bornholmstraat 4, 9723 Ax Groningen. *Tel:* 050-120306 and 125777. *Contact:* A. J. F. van Kuik, Harbour Master. *Tel:* 05960-23376 (Private).

ROTTERDAM: 51.55 N. 04.24 E. (See Plan)

DOCUMENTS: The following documents have to be handed to Customs and Immigration Authorities:

3 copies General Declaration.
2 copies Crew List.
2 copies Passenger List.
2 copies Crew Customs Declaration (Personal Effects List).

In addition to the above the following documents have to be available on board for inspection by Customs and Immigration Authorities:

Ships Register or Certificate of Registry.
Cargo List, manifest or certificate.
Bill of Lading.
Log Book.
Crew Roll.
Stores List.
Health Certificate or Declaration of Health.
Tonnage Certificate.
*Tanker Check List.
*Tovalop Certificate.
*Dangerous Cargo List.
*Gas Free Certificate.
Safety Equipment Certificate.
Certificate of Depth.

*If appropriate, depending on the type of vessel.

Also see "Shipmasters Report – 1981".

Oil Pollution Damage Certificate: Tankers carrying over 2,000 tons of oil or oil products in bulk have to produce in Dutch ports a certificate of insurance in respect of civil liability for oil pollution damage (TOVALOP Certificate). Fines will be imposed if vessels do not comply with these international regulations and authorities will not allow such vessels to leave the port.

Shipmaster's Report: November 1988.

River Police: 2 copies Crew List on arrival, and 2 copies Crew List on departure.

Agent: 1 copy Stores List.
1 copy Personal Effects List.
Customs: 1 copy Personal Effects List.

DEEP-SEA PILOTAGE: See "Brixham" or "Cherbourg".

REMOTE PILOTAGE:
UNOFFICIAL TRANSLATION – THE DUTCH TEXT WILL REMAIN BINDING

NOTICE TO SHIPPING No. 65/1987

Roads Hook of Holland/Approach Rotterdam Waterway
Shore-based radar assistance/Remote Pilotage

The Director of the Directorate-General Shipping and Maritime Affairs, Rijnmond District, at the same time Government Harbour Master, announces the following, thereby withdrawing Notice to Shipping No. 24/1983:

In order to promote the safety and the smooth handling of maritime traffic, it is possible to provide "Remote Pilotage" besides (informative) shore-based radar assistance, at those places where shore-based radar equipment is operational.

This means that the Pilot, insofar as he is unable to board the vessel to be piloted, can also perform his task from another vessel or from the shore.

There are a number of conditions attached to "Remote Pilotage" of which the most important are stated below.

In connection with the foregoing, the sectors where informative shore-based radar assistance is being rendered from the various shore-based radar stations located in Traffic Centre Hook of Holland, required some adjustment.

1.0 *Informative shore-based radar assistance:*

As a result of extension of the shore-based radar cover outside, and an increase of range of the VHF Channels concerned in seaward direction,

The Shore-Based Radar Sectors, as seen from the sea:
– Maas Approach
– Pilot Maas and
– Maas Entrance
were changed as follows, as from August 1st, 1986.

With the coming into use of the Vessel Traffic System (VTS) "Rotterdam Waterway" the VHF frequencies have changed (see "Notice to Shipping No. 13/1987"). Since then the situation with regard to "Remote Pilotage" is as follows:

1.1 *Maas Approach Radar:*
– Communication VHF Channel 1.

– The radar working area involves the sea area, including the anchorages within the sector with a radius of 23 nautical miles, calculated from the position of the light-platform Goeree (approx. position 51° 55′ N., 03° 40′ E.), with the exception of the working area of "Pilot Maas" situated within this sector.

"Maas Approach" gives general nautical information and renders (informative) shore-based radar assistance, up to the following shore-based radar sector "Pilot Maas", where the pilot cruising ground is, or up to one of the anchorages.

In order to make early identification, c.q. information possible, "Maas Approach" is to be contacted, if possible, 3 hours prior to arrival at the pilot cruising ground "Maas Centre", but in any case for traffic coming from the South-West near the "M W 1 Buoy" and for traffic coming from the North, near the platform "PD 15".

These rules do not alter the instructions for obtaining a Pilot in the Rijnmond District, as stated in the Notice to Shipping No. 06/1986 of February 6th, 1986.

1.2 *Pilot Maas Radar:*
Communication VHF Channel 2.

The radar working area involves that part of the legally determined pilot-water in the sea area just off Hook of Holland, within which the pilot cruising grounds are located.

In the Pilot Maas-sector (advisory) shore-based radar assistance is rendered with respect to embarkation/disembarkation of the Pilot.

1.3 *Maas Entrance Radar:*
Communication VHF Channel 3.

The radar working area involves that part of the legally determined pilot-water in the sea area off Hook of Holland, East of the sector-limit Pilot Maas, Maas Entrance up to Calandcanal and the Rotterdam Waterway up to kilometre pole 1031.

Maas Entrance Radar provides the informative shore-based radar assistance.

2.0 *Remote Pilotage in DGSM-Rijnmond District:*

During periods in which pilot-boats cannot be operational at sea on account of weather circumstances, it frequently happens that seagoing vessels enter or leave the Hook of Holland estuary without a Pilot.

Other vessels have to anchor in one of the anchorages, or will be kept outside, due to the impossibility of taking a Pilot on board.

In order to promote the safe and smooth handling of these vessels and other maritime traffic, the estuary of Hook of Holland has been provided with the so-called "Remote Pilotage" since August 1st, 1986.

This takes place according to the following principles:

2.1 During the periods, from the moment that the Pilot Boats Service outside – on account of weather circumstances – will be suspended for "small vessels", until the time that pilot service will be resumed.

Furthermore, "Remote Pilotage" can be used occasionally during normal weather conditions, in case the construction of certain vessels make it impossible to embark/disembark the pilot outside.

2.2 "Remote Pilotage" takes place on the route pilot waters from the pilot cruising grounds (pilot cruising area) outside up to within Maas Entrance near TCH, and vice-versa.

2.3 The pilots perform their tasks from the traffic stations Pilot Maas (VHF Channel 2) and Maas Entrance (VHF Channel 3).

2.4 In case the Master of a vessel with compulsory pilotage indicates that he wants to enter Maas Entrance during the period as described under 2.1, he will be informed by Traffic Station Maas Approach that "Remote Pilotage" can be provided, taking into account all relevant factors of the admission policy for such a vessel.

The Master should explicitly accept this proposal, since the present Pilot Act does not yet provide a formal basis for this kind of pilotage.

The Master of a vessel with Non-Compulsory Pilotage can, at his request, also make use of "Remote Pilotage".

2.5 In view of the entire admission policy, it will be considered with regard to each vessel, whether it is acceptable – in view of the circumstances and taking into account all relevant legislation, rules and regulations in connection with the safety of shipping and surroundings – that the vessel concerned enters or leaves Maas Entrance without a Pilot, whether or not using "Remote Pilotage".

Masters of vessels, with whom good communication is not possible due to inadequate communication equipment (VHF) on board or insufficient knowledge and/or understanding of the English language, cannot use "Remote Pilotage".

2.6.1 Sea-going vessels with Compulsory Pilotage should stay outside if they do not want to make use of the possibility to enter by means of "Remote Pilotage".

2.6.2 Sea-going vessels with Compulsory Pilotage on account of their cargo should, with respect to the "Regulations Dangerous Goods Sea-going Vessels" and/or the Government Harbour Master's Notice to Shipping No. 50/1967 of 28-11-1967, in principle, remain outside, if they do not want to use "Remote Pilotage" for entering.

2.7 With respect to the vessels mentioned under 2.6.2 that should have a Pilot on board, it will be considered whether these vessels, dependent on among other things their size and the Master's knowledge of the area, can be allowed to enter Maas Entrance with "Remote Pilotage", all in view of the admission policy.

2.8 Large sea-going vessels, as mentioned in the Special Rules and Regulations Rotterdam Waterway, art. 16, 17, 18 and 19, can only navigate in Eurochannel, Maaschannel and Maas Entrance if a qualified and – for this purpose – trained Pilot is *on board* as stated in the Government Harbour Master's Notice to Shipping No. 92/1984 of 01-11-1984.

2.9.1 In principle, outbound seagoing vessels with Compulsory Pilotage, in particular those with dangerous cargo, as mentioned under 2.6.2. should, also in view of 2.4 and 2.5, actually have a Pilot on board until the pilot cruising grounds.

2.9.2 In view of 2.4, 2.6.1. and 2.6.2, vessels with "Mandatory" pilotage should on no account disembark at the Berghaven.

2.10 Vessels or coupled vessels which, in view of among others The Inland Navigation Police Regulations art. 1.06 and 1.21 and the Special Rules and Regulations Rotterdam Waterway, art. 15, are judged by the Government Harbour Master to be "Special Transport", should have a qualified Pilot on board.

2.11 Requests for "Remote Pilotage" should be made to:
– inward bound: Maas Approach Radar
– outward bound : (before departure) Harbour Co-ordination Centre Rotterdam, Central Traffic Controller DGSM, Rotterdam (VHF – Channel 14).

Rotterdam, September 22nd, 1987

Director Shipping and Maritime Affairs
Rijnmond District, also Government
Harbour Master.

PILOTAGE: River pilotage compulsory from sea to harbour area and vice versa, except vessels in ballast drawing less than 7 ft. 3 in.

Harbour pilotage compulsory from fairway to berth in harbour area and vice versa, except for vessels under 475 g.r.t.

Pilot Cutters: Cruising continuously, day and night, off entrance to New Rotterdam Waterway, one North of line North Mole/Maasbuoy and one near Maasbuoy. Characteristic signals:

1. By day pilot flag, being a blue flag with white letter "L", displayed from main top mast.
2. At night, lights as prescribed by Regulations for Preventing Collisions at Sea.
3. During bad visibility the fog signal prescribed by Rule 35 of these Regulations.

Ordering a Pilot:

1. Vessels bound for New Rotterdam Waterway must cable, at least 6 hours in advance, ETA pilot station, gross tonnage and draft to:
   (a) Pilotage Hook of Holland via Coastal Station Scheveningen Radio (PCH) or
   (b) Coastal Station Maassluis Radio (Radio Dirkzwager) by VHF Channel 12 (Port Operations) or
   (c) Pilot Approach at Hook of Holland by VHF Channel 1.

   This ETA notification shall, with due observance of the afore-mentioned 6 hours period, be rectified if the ETA will be more than 1 hour later than the ETA last reported.

   Without prejudice to this provision the Master shall indicate his requirement for a Pilot by displaying the prescribed visual signals when his vessel arrives within visual range of the pilot vessel.

The ETA message shall contain:

(a) The words "ETA Pilot"

(b) ETA (group of 4 figures) in Central European Time

(c) Draft of vessel including unit of measurement (feet or decimetres)

(d) Port of destination.

Please note that vessels which do not comply with the above-mentioned Regulations and fail to state their ETA timely or accurately, may only be provided with a Pilot 6 hours after their arrival at the pilot station, provided that other vessels which reported themselves correctly will not be delayed.

2. Vessels bound for Port of Dordrecht should also state their destination, as Pilots for Dordrecht embark from pilot cutter on roads.

On arrival at pilot station vessels requiring Pilot are to display following signals, separately or together:

1. *By day:* International code signal "G". Pilot flag, viz., vessel's National Flag with white border from foremast.
2. *By night:* Morse signal "G" by flash light. Blue lights at intervals of 15 minutes. A bright white light shown just above bulwark for 1 minute at short intervals.
3. *During bad visibility:* At least 3 seconds after the normal fog signal the international code signal "G". Pilot vessel will answer: the normal fog signals, followed after at least 3 seconds by international code signal "H" (I have Pilot on board).

Vessels constrained by their draft (68 ft. – 74 ft.) are to announce their expected time of arrival as follows:

The announcement shall be reported at least 24 hours before arrival at the rendezvous, "13 miles North from Cap de la Hague" if the Pilot is to be embarked in the channel.

Also see "Deep Draft Planning Guide, Greenwich Buoy to Europort for vessels with a draft between 20.7 m. (68 ft.) and 22.52 m. (74 ft.)" issued by Dienst van de Hydrografie. (Not reproduced).

Pilotage for Deep Draft Vessels and Helicopter Service: Vessels drawing 57 ft. (SW) and over must make use of the "Eurochannel" between the "Euro Buoy" and the "Maas Centre Buoy". Pilots board by helicopter in position Lat. 52° 00′ N., Long. 03° 00′ E. Helicopter may ask vessel to work on Channel 6 or 16 (See "KLM Helicopters Circular No. 8"). (Not reproduced).

Radio communication:

1. HF frequency 5645 kHz: Ships will be informed by telegram of the time of departure from base and ETA of the helicopter over the ship, which must be acknowledged. Listening watch should be maintained by the vessel on HF freq. 5645 kHz as from the advised departure time of the helicopter. Urgent messages for the vessel may be sent on this frequency by the helicopter and/or KLM Helicopters home-base. The ship may close down listening watch on this HF frequency only after VHF contact with the helicopter has been established.

2. VHF frequency 156.30 MHz (Channel 6): The helicopter will contact the vessel on the VHF-FM voice frequency Channel 6 or Channel 16, when within range (usually between 20 and 40 nautical miles distance from the ship). The helicopter may request the ship to change to another VHF Channel if radio traffic requires this. All instructions from the helicopter pilot to the vessel and vice versa will be on this VHF frequency. The call sign of the helicopter is the word 'helicopter' followed by the group of registration letters, of which the ship is informed in the departure telegram.

3. Operational information: As soon as VHF contact is established (normally initiated by the helicopter), the vessel shall advise the helicopter pilot of its position, courses, speed (when under way), the actual wind direction and speed over the deck, pitch, roll and condition of deck (e.g. dry, spray, wet, etc.). The helicopter pilot will confirm the acceptability of those conditions, or ask for a possible change in heading and/or speed.

For vessels drawing over 57 ft. (SW) 1.5 times the pilotage tariff Sea – Hook of Holland is applicable.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind Force 10 (55 knots.).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Vessels with a freeboard over 9 m. must provide an accommodation ladder in addition to the pilot ladder. If boarding equipment does not strictly comply with the SOLAS provisions, Pilots must be embarked/disembarked by helicopter. Generally Pilots refuse to use mechanical pilot hoists or other constructions not within the recommendations of the "European Maritime Pilots Association".

Notice:

Informal Translation of the Neth. N.t.M. 112/84.

Netherlands Regulations for requesting a Pilot in the District "Rijnmond".

The Director of the District "Rijnmond" (D.G.S.M.): paying attention to Article 38 of the Algemeen Loodsreglement (General Pilotage Regulations), (Stb. nr. 433 van 1932); announces:

Article 1.

The expected time of arrival (ETA) at the pilot stations "Maas Centre" or "MW 5" has to be announced as follows:

(a) The announcement shall be reported at least 6 hours before arrival at the pilot station concerned;

(b) The announcement shall be transmitted to Scheveningen-Radio (call sign PCH) or directly via VHF Channel 1 to Traffic Centre "Maas Approach" at Hook of Holland;

(c) The announcement is to be addressed to D.G.S.M. District "Rijnmond-HCC", Rotterdam;

(d) The announcement shall, include the following particulars:

1. Vessel's name, call sign and gross tonnage;
2. The words "ETA-Pilot";
3. Port of destination;
4. The ETA (group of 4 ciphers) in Central European Time;
5. The max. draft of the vessel, on arrival (feet or decimetres);

(e) The announcement shall be rectified if a delay of 1 hour or more is being expected.

Article 2.

Vessels constrained by their draft are to announce their ETA as follows:

(a) The announcement shall be reported at least 24 hours before arrival at the rendezvous "13 sea-miles North from Cap de La Hague" if the Pilot is to be embarked in the Channel;

(b) Other vessels constrained by their draft are to announce their arrival at the rendezvous (Lat. 52° 00′ N., Long. 03° 00′ E.) at least 8 hours in advance

(c) Article 1, sub (b), (c), (d) and (e), is applicable accordingly;

(d) By or on behalf of the Director of the District "Rijnmond" further particulars can be requested.

Article 3.

The Master of a vessel lying in a port in District "Rijnmond" requiring a Pilot, shall make an application for a Pilot at least 3 hours in advance to the "Loodsenbesteldienst" of the D.G.S.M. District "Rijnmond-HCC" Rotterdam (Tel: 010-4251433. Telex: 24045. Fax: 010-4710800. D.G.S.M. District "Rijnmond").

In case of vessels constrained by their draft, the request is to be made at least 6 hours in advance.

The request should include the following particulars:

(a) Vessel's name;

(b) Nationality;

(c) Gross tonnage;

(d) Maximum draft;

(e) Port of destination;

(f) Nature of cargo;

(g) Berth;

(h) Means of transport by Pilot;

(i) Name of Master and/or shipbroker's clerk, as well as the telephone number(s) where they are attainable;

(j) Agency with telephone number;

(k) Expected date and time of departure as well as the time upon which the Pilot is required.

The request for a Pilot is to be rectified as soon as possible, if it appears, that the ship's departure may be delayed by 1 hour or more.

Note: The corrections mentioned in Neth. N.t.M. 151/84 are incorporated.

(Gids Ned. Kust 1979 blz. 45 t/m 48).

(Nr. 3 and 10/84 D.G.S.M. Rijnmond: Hydr. L23).

Rotterdam, April 1984.

ANCHORAGES:

The following 5 anchorages are available:

1. Long term anchorage for deep draft vessels.
2. For deep draft vessels which have to wait for a short period (for tide or pilotage) before they can enter the DW route to Rotterdam-Europoort.
3. For vessels which on account of their draft cannot normally anchor in 4 or 5.
4. "Maas West".
5. "Maas Noord".

See Chart L (D2-D5) 3371.

RESTRICTIONS:

Dangerous Goods:

General Information:

Regulations are based on several Governmental laws and Municipal bye-laws.

The "Dangerous Goods Department" of the Municipal Port Management is the centre where all information on dangerous goods on board vessels is collected, administrated and distributed to those concerned.

Inspection on board vessels berthed in the Port of Rotterdam will be carried out mainly by inspectors of the Municipal Dangerous Goods Department, although in certain cases (e.g. explosives), Governmental Dangerous Goods Inspectors are in charge as well.

For detailed information the following Regulations should be consulted:

Rotterdam Port Bye Laws (Havenverordening Rotterdam)

Order of the State Secretary for Traffic and Public Works No. i-3/V20146 of 10 Jan. 1980

(Beschikking van de Staatssecretaris van Verkeer en Waterstaat Nr. i-3/V20146 of 10 Jan. 1980)

Notice to Shipping of the Governmental Harbour Master No. 11/1980 (Bekendmaking aan de scheepvaart No. 11/1980)

Notice to Shipping of the Dept. of Public Works No. 50/1967 (Bekendmaking aan de scheepvaart No. 50/1967)

From these Regulations the following significant obligations have been extracted:

1. *Signals:* Vessels carrying:

In Packages

(a) More than 100 kg. gross of IMO Class 1.1 and 1.5

(b) More than 1,000 kg. gross of IMO Class 1.2, 1.3, 1.4 (explosives) and 5.2 (organic peroxides).

(c) More than 1,000 kg. poisonous gases of IMO Class 2.

In Bulk

(d) Any dangerous substances in any quantity. Also empty tanks which are not certified as being clean by an acknowledged expert should hoist the following signals before entering the Rotterdam Waterway area:

I. by day: the International signal "B";

II. by night: 1 red light at the same level at a distance of 1 m.

2. *Prior Notification:* Masters of vessels carrying:

a. Dangerous goods of class 1 and 5.2 in packages;

b. More than 1,000 kg. gross weight per substance of the other IMO classes in packages.

c. Dangerous substances in bulk: Report these commodities to the Dangerous Goods Dept., of the Municipal Harbour Master 24 hours before arrival.

3. *Explosives:*

There is a restriction on the carriage of explosives by ships, dependent on kind, quantity and stowage of the explosives.

Permission to deliver explosives is given by the Minister of Transport.

Masters of vessels are advised to make sure whether such a permission has been granted.

4. *Dangerous Cargo List:*

Apart from these obligations the Rotterdam Port Bye Laws prescribe that a vessel having any dangerous cargo on board is prohibited from being in the harbour unless there is a list on board and an identical list has been submitted to the Harbour Master, stating the correct technical names, IMO class flashpoint if below 61° C and the stowage of these materials.

5. *Operational Notice:*

Masters of vessels showing the signals as mentioned above ("B" flag or 1 red light) shall give notice to "Pilot Maas" on VHF Channel 1 on arrival.

This notice shall be given at least half an hour but not more than 1 hour before the ship enters the Rotterdam Waterway area or if sailing from the Europoort area.

Upon departure: On Channel 14 to "Central Post".

This notice shall contain: ship's name, position, destination and expected time needed for passage in the port area.

Should there be considerable alteration in this time, "Pilot Maas" should be notified again 30 minutes in advance.

After the first notice and during the further voyage on the Rotterdam Waterway, VHF Channel 13 should be kept on stand-by and a listening watch should be kept.

When visibility is less than 500 m., ships are prohibited from navigating the Rotterdam Waterway, unless permission has been obtained from State Harbour Master on VHF Channel 14.

6. *Pilotage:* Ships carrying:

a. more than 1,000 kg. explosives (IMO Class 1), liable to mass explosion;

b. substances of IMO Class 2, Class 3 (not miscible with water) or Class 6.1 in bulk, must have a Pilot on board when entering the Rotterdam Waterway area. At least 24 hours and 4 hours before arrival and 1 hour before departure the following particulars shall be given to the Governmental Harbour Master via the H.C.C. (Harbour Co-ordination Centre)

1. Name and call sign;
2. Nationality;
3. Gross tonnage and draft;
4. Nature and quantity of dangerous cargo;
5. Berth;
6. ETA/ETD;
7. Agent.

Incoming ships shall also give notice 4 hours before arriving at the Pilot Cruising Station stating:

1. Name and call-sign;
2. Draft;
3. ETA;
4. The code word "IMO".

by radio telegram via the Netherlands Coastal Radio Station (PCH) addressed to: "Pilotage Hook of Holland" or by VHF on Channel 12 to "Maassluis Radio" (Dirkzwager).

Navigation on the Rotterdam Waterway might be prohibited if circumstances make this necessary.

Alterations:

For commodities in quantities above those mentioned in the list, there might be restrictions on certain berths.

Name of Dangerous Goods or Group of Dangerous Goods	*Limited Quantity*
1. Chlorine	1,000 kg.
2. Phosgene	1,000 kg.
3. Fluorine	1,000 kg.
4. Hydrogen Cyanide	5,000 kg.
5. Hydrogen Sulphide	5,000 kg.
6. Carbon Disulphide	5,000 lit.
7. Hydrogen Bromide	10,000 kg.
8. Hydrogen Chloride	10,000 kg.
9. Hydrogen Fluoride	10,000 kg.
10. Sulphur Dioxide	10,000 kg.
11. Methyl Bromide	10,000 kg.
12. Acetone Cyanohydrin	40,000 lit.
13. Acrylonitrile	40,000 lit.
14. Acrolein	40,000 lit.
15. Allyl Alcohol	40,000 lit.
16. Allyl Chloride	40,000 lit.
17. Epichlorohydrin	40,000 lit.
18. Acetonitrile	40,000 lit.

For bigger amounts apply to the Harbour Master.

Remarks:

a. Particular berths are the Eemhaven basins and the harbour basins to the West of them on the South bank of the New Rotterdam Waterway.

b. Liquid dangerous cargoes in bulk only in the oil harbours.

Restrictions for entering:

Fog: Tankers and vessels carrying poisonous and/or explosive cargoes may not be allowed to manoeuvre in fog with visibility of less than 500 m. (1,640 ft.).

Entry times: Depend on prevailing circumstances, as follows:

Europoort: Tankers:

up to 61 ft. (SW) draft – Any time.

over 61 ft. (SW) draft – 1 hour before until 2 hours after high water at Hook of Holland.

Vessels with a draft of 57 ft. (SW) or more and/or a length of 250 m. or more must comply with the "Shipping rules for large vessels".

On entering Europoort, tugboats are made fast just inside the breakwaters. On departure tug's hawsers must be used aft.

The time at which deeply loaded vessels destined for Europoort enter the New Waterway depends on the prevailing circumstances and is always subject to agreements made between the Pilot Service and the Harbour Master.

Botlek:

Max. draft 44 ft. (SW), exceptionally 45 ft. (SW), under certain conditions. To obtain permission one should apply to the State Harbour Master at H.C.C. in writing, if possible 10 days before arrival, giving particulars of call and vessel.

Vessels exceeding 270 m. in length and drawing 44 ft. (SW) may have to lighten at Europoort/Maasvlakte.

As a rule entering times are as follows: (Salt Water draft).

33 ft. – 37 ft. Anytime, except from 4.5 hours before, till HW at Rotterdam.

37 ft. – 39 ft. At Slack Low or at Slack High Water, depending on the prevailing circumstances.

39 ft. – 44 ft. At Slack High Water.

Vessels with a length of over 200 m. (656 ft.) only enter at slack tide.

Vessels which have been lightened at Europoort/Maasvlakte terminals should arrive at the Botlek entrance at about 1 hour after high water at the Hook of Holland.

Waalhaven:

Vessels with a draft of 36 ft. salt water, or a length of over 200 m. should arrive at the entrance of the Waalhaven at slack water Rotterdam.

Other basins:

Vessels with a draft of 28 ft. or more and a length of over 180 m. are generally tidebound.

All harbours in the Rotterdam area can be entered at any time during day and night.

Restrictions for several harbours are made on some drafts and ships' lengths as follows: (To be read in conjunction with the above).

Botlek and 3rd Petroleum Harbour: For ships with a length over 200 m. or a draft over 33 ft.

U.K.F.: Draft over 30 ft., no length restriction.

1st Petroleum Harbour: Draft over 31 ft. or longer than 200 m.

2nd Petroleum Harbour: Draft over 31 ft. or longer than 200 m.

Vulcaanhaven Vlaardingen: Draft over 30 ft.

Eemhaven: Draft over 36 ft. or longer than 245 m.

Schiedam, Shipyard Wilton: Ships longer than 200 m.

Schiedam, Wilhelminahaven: Draft over 21 ft. or longer than 200 m.

Shipyard R.D.M.: Ships longer than 180 m.

Waalhaven: Draft over 36 ft. or longer than 200 m.

MAX. SIZE:

Entrance and river area	*Channel width in (m.)*	*Max. SW draft (High tide)*	*Keel-clearance*
Euro Buoy – Euro 11	1,200	74 ft.	1.0 m.
Euro Buoy – Euro 11	600	74 ft.	1.0 m.
Euro 11 Buoy – Maas Centre	1,200	74 ft.	1.0 m.
Euro 11 Buoy – Maas Centre	600	74 ft.	1.0 m.
Maas Centre Buoy – Entrance	600–400	74 ft.	1.0 m.
Entrance – Europoort	400–350	74 ft.	1.0 m.
Entrance – Botlek	250	44 ft.	10%
Botlek – Waalhaven	250	40 ft.	10%
Waalhaven – Rijnhaven	200	34 ft.	10%

Shipping Rules for Large Vessels:

Vessels drawing 17.4 m. (57 ft.) (SW) or more must make use of the approach channels "Eurogeul" and Maasgeul". Such vessels must report, at least 8 hours prior to their arrival at the Pilot "rendezvous" position 52° N. 03° E., by radio telegram to D.G.S.M. District Rijnmond-H.C.C. Rotterdam as well as to Harbour Co-ordination Centre, Rotterdam via Scheveningen Radio (PCH) or to Dirkzwager Maassluis Telex No. 26751 if vessel equipped with "Telex Over Radio" and/or Inmarsat the following information:

a. Name and call sign of the vessel.

b. G.R.T. and deepest arrival draft in S.W.

c. ETA at "rendezvous" position.

d. Port of destination.

e. Name of Agent.

f. Confirmation of correct functioning of:

1. Gyro compass.
2. Radar installation.
3. VHF, operational on Channel 1, 9, 11 and 13.
4. Decca receiver mark XII of Mark XXI provided with a connection for the so-called Brown Pattern Indicator (Brown Box Connection).

Vessels with a length of 250 m. or more but with a draft of less than 57 ft. S.W. (not bound to use the approach channels) must report, at least 6 hours prior to their arrival at the Maasbuoy, the information mentioned under a, b, c, d, e and f 1, 2 and 3.

The intention to leave Europoort must be reported by the Master or the Agents, at least 3 hours prior to departure to D.G.S.M. District Rijnmond H.C.C., Rotterdam and Harbour Co-ordination Centre, Rotterdam, giving the information stated under a, b, c, d, e and f 1, 2 and 3. For leaving Europoort also f 4.

The 6 hours' report prior to arrival will also be considered the 6 hours' ETA message for obtaining a Pilot.

Vessels equipped with a "T.O.R." or Maritex installation can send their messages to D.G.S.M. District Rijnmond H.C.C. Rotterdam and Harbour Co-ordination Centre Rotterdam via Dirkzwager's message relay and ships reporting station: Telex No. 26751 "dirk nl".

Outward bound vessels drawing 57 ft. (SW) or more, having to make use of the "Maasgeul" and "Eurogeul" must give 12 hours Notice of Departure to the Harbour Coordination Centre/Municipal Harbour Service through their Agent.

Vessels drawing 20.7 m. (68 ft.) up to 22.56 m. (74 ft.) which must make use of the selected route via Strait of Dover and the Southern North Sea to the "Eurogeul" are moreover recommended:

1. To act in accordance with the instructions of the manual "Deep Draft Planning Guide, Greenwich Buoy to Europoort for vessels with a draft between 68 ft. and 74 ft." published by the Hydrographic Service.
2. Preferable to make use of the services of a certified North Sea Pilot as from Greenwich Buoy.
3. To report 24 hours prior to arrival at the rendezvous area near Cherbourg, by telegram to the Harbour Co-ordination Centre Rotterdam and D.G.S.M. District Rijnmond-H.C.C. Rotterdam via Scheveningen Radio (PCH) or Dirkzwager Maasluis, Telex No. 26751, and ask for sailing conditions with regard to sea and swell in the Twin-area for the selected route and order a river pilot. The telegram should contain:
   a. Name and call sign of the vessel.
   b. G.R.T. and deepest arrival draft in salt water.
   c. ETA pilotage location near Cherbourg, at about 13 miles North of Cap de la Hague.
   d. The order for a river pilot for the "Eurogeul" to be embarked by helicopter near Cherbourg.
   e. Confirmation of the correct functioning of:
      1. All nautical equipment in good working condition.
      2. VHF, operational on Channels 1, 9, 11 and 13.
      3. Decca receiver, stating the type, requiring Mark XII or Mark XXI, provided with connection for the so-called Brown Pattern Indicator (Brown Box Connection).
   f. If necessary, required expert assistance for equipment mentioned under e.
4. To confirm or amend via Scheveningen Radio the telegram mentioned under 3, 12 hours before arrival "rendezvous" location Cherbourg or by T.O.R. and/or Inmarsat via Dirkzwager Maasluis, Telex No. 26751.
5. To make use of Dutch seacharts published by the Hydrographic Service:
   No. 1971 – Sandettie to North Hinder.
   No. 1972 – North Hinder to Europoort.

Shifting: Vessels which have lightened at Europoort/Maasvlakte terminals should arrive at the Botlek entrance at about one hour after high tide at the Hook of Holland.

Shifting rules Europoort-Botlek:

Length overall	*Max. draft allowed*
up to 260 m. (up to 853 ft.)	44 ft. S.W.
260 m. – 270 m. (853 ft. – 885 ft.)	42 ft. S.W.
270 m. – 280 m. (885 ft. – 918 ft.)	41 ft. S.W.
over 280 m. (918 ft.)	39 ft. S.W.

Minimum draft allowed: 27 ft. (trim 3 ft.).

Tidal Information:

The mean height of sea-level off the Hook of Holland = 42 cm. above DATUM (=N.A.P.).

LLWS (Low Low Water Spring) = 84 cm. below DATUM

MLW (Mean Low Water) = 64 cm. below DATUM

All permissible drafts and depths of water mentioned are given at MLW, unless otherwise mentioned.

Tidal Range:

	Neap Tides	*Spring Tides*
Mean Rise above DATUM	82 cm.	121 cm.
Mean Fall below DATUM	64 cm.	63 cm.
TIDAL RANGE	146 cm.	184 cm.

Duration of the flood tide: 6 hrs. 47 min.

Duration of the ebb tide: 5 hrs. 38 min.

Notice: Notice to Shipping No. 02/1987:

Approach Rotterdam Waterway/

Conditional Admission of Vessels with a Draft of 21.95 m. up to 22.50 m.

The Director of the Directorate-General of Shipping and Maritime Affairs, District Rijnmond, also Government Harbour Master,

In view of Articles 4 and 16, sub 2, of the Special Regulations Rotterdam Waterway.

Makes known:

1. The navigation of the category of vessels with a draft of 21.95 m. up to 22.50 m. coming from sea with destination Europoort, can be allowed under favourable circumstances, as of February 1st, 1987.
2. The safe and smooth handling of the vessels mentioned under 1 demands that agreements are made well in advance.
3. In order to make such agreements, Central Post, DGSM, Traffic Service, Harbour Co-ordination Centre (HCC), Rotterdam (Europoint B), Tel: 010-4251410. Telex: 27370. Telefax No. 4773489, is to be contacted by or on behalf of the Master before loading in the place of loading.
4. Aforementioned agreements shall contain at least:
   a. Date and time of arrival;
   b. the procedure to be followed on account of congestion of the Eurochannel, due to swell conditions;
   c. compliance with the urgent recommendations as stated in Notice to Shipping No. 92/1984;
   d. urgent recommendations with respect to "en route" procedures while navigating through the Channel.
5. In view of the marginal nature of navigation through the Eurochannel by vessels with a draft of 21.95 m. up to 22.50 m., Masters are urgently recommended to comply with the above mentioned. Deviations can lead to refusal of permission or serious delay in handling, apart from dangerous situations.

HEALTH: Master has to fill in and sign Maritime Declaration of Health which is handed to him by Pilot. Vessels subject to medical inspection have to hoist flag signal according to Pilot's orders.

RADIO: *E.T.A. messages and T.O.R./Maritex:*

Masters' telegrams via Scheveningen Radio, call-sign P.C.H., are passed on to Agents 24 hours a day, weekends inclusive. For this reason it is advisable that Masters communicate with Agent via Scheveningen Radio, via which station they also route messages to vessels.

Ships equipped with "Telex Over Radio" may, outside office hours, channel their messages to Agent via Dirkzwager's message relay and ships' reporting station at Maassluis, Telex No. 26751, Answerback "Dirk NL". Such messages are passed on to Agent immediately, also during weekends.

Combination Carriers (OBO and O/O Carriers):

Combination carriers must, as per Rotterdam Bye-laws, comply with the following regulations when calling here to load and/or discharge dry cargo:

a. The dry cargo holds may not have any remnants (gas and/or liquid) of oil.
b. The spaces adjacent to the dry cargo holds must be either gas free or properly inerted or free from oil remnants.
c. Slops of previously carried oil cargoes may not be stowed adjacent to a dry cargo hold and must be blanketed by inert gas.

At least 24 hours prior to arrival the following information must be cabled:

1. That vessel has no slops on board and is certified gas free, or alternatively
2. a. Correct name of liquid cargo carried last, with place and date of discharge
   b. Stowage of cargo residues (gases and/or liquids) and whether mixed with water or not.
   c. Whether non-gasfree spaces are adjacent to dry cargo holds and if so, what holds
   d. What spaces contain inert gas.

In case of repairs, tankcleaning or delivery of slops, a combination carrier is considered to be a tankvessel and should comply with the regulations applicable to this kind of ship.

RADAR/VHF: Chain of 26 shore-based radar stations permits navigation during all weather conditions. Radio and Radar station Maas Approach, at Hook of Holland, communicates via VHF Channel 1 (Port Operations).

VHF range = about 30 miles.

Radar range = about 20 miles around the Goeree Platform.

Masters are requested to call this station, especially during bad visibility, well in advance of arrival at pilot station. Maas Approach provides vessels within range with nautical information and acts as a link with pilot cutters.

Radio-Radar Station: The radio station, "Traffic Centre Hook" (TCH), in Hook of Holland acts as a Communication Centre and a Traffic-Regulating Station near the entrance and on the New Waterway. The station provides weather forecasts on request by VHF Channel 13. Radar assistance is provided on VHF Channel 66 from "CA2-NW1" Separation Buoy into Europoort and vice versa.

Information on berths, Harbour Pilots, tugboats and linesmen in Europoort can be obtained on Channel 11.

VTMS: A Vessel Traffic Management System (VTMS) is in operation for the approaches to Europoort and in New Waterway; for details see Admiralty List of Radio Signals.

Vessels approaching Europoort and New Waterway should maintain continuous listening watch on VHF when East of Sandettie. Vessels which are unable to participate in the system should report, if possible, before entering the area to Haven Coordinatie Centrum (HCC), Rotterdam through Scheveningen Coast Radio Station or by telephone, telex or VHF.

TUGS: Tugs normally join vessel on river when nearing the basin where vessel will be accommodated. Vessel's towing lines used. On departure from Europoort the tow ropes, secured to the stern, must be supplied by the tugs.

BRIDGES: New Waterway connects Port of Rotterdam with North Sea, without any locks or bridges. Only to reach some shipyards, situated East of Rotterdam, vessels have to pass the "Maas-Bridges" (Koningshaven), which are on working days opened at regular times.

To reach berths in Brittanniehaven vessels have to pass the Calandbridge. To reach berths in Seinehaven and Neckarhaven vessels have also to pass the Rozenburg locks (between the Calandcanal and Hartelcanal).

GENERAL CARGO FACILITIES: *Muller-Thomsen Rotterdam B.V.:* Muller-Thomsen Rotterdam B.V. operates one terminal at Prinses Beatrixhaven specialising in the handling of forest products, pipes and other steel products, containers and general cargo.

For the handling of containers and other unit loads (such as steel and pipes) this terminal has 25 heavy cranes of which 2 mobile cranes have a maximum capacity of 67 tons (40 tons at 46 m.). The terminal is equipped with a transtainer, hydraulic lifting cars, tractors and spreaders. A workshop for repair and maintenance of containers is available.

Together with 55,770 sq.m. covered storage area for general cargo and forest products, Beatrixhaven forms a multi-purpose terminal.

For the handling of steel and forest products special gear is used. Vacuum spreaders for the discharging and loading of pipes from or into vessels have been developed by M.T.R. engineers.

These spreaders, which meet all safety standards, allow M.T.R. to handle different kinds of pipes (various diameters, with or without coating, welded or seamless, etc.) without causing damage.

Technical Data:

Maximum draft:	10.65 m. (35 ft.)
Quay length:	2,000 m.
Marshalling area:	210,000 sq.m.
Sheds:	7
Covered storage area:	55,770 sq.m.
of which temperature controlled	6,800 sq.m.
Open storage area:	100,000 sq.m.
No. of cranes (capacity):	25 (up to 67 tons)

There are a large number of forklift trucks up to 42 tons. The Prinses Beatrixhaven terminal is also equipped with 20 ft. and 40 ft. Ro/Ro trailers, 9 tugmasters, 2 locomotive engines and 2 weigh-bridges.

Seaport Terminals: The "Multi-Purpose Terminal" of Messrs. Seaport Terminals is situated in the Brittanniehaven, in the Eastern part of Europoort, 10 nautical miles from the entrance.

Technical Data:

Maximum draft:	12.65 m.
Quay length:	930 m.
Ro/Ro ramps:	2 adjustable of 300 tons each.
Cranes:	1 mobile crane, 50 tons. 1 gantry crane, 70 tons. 4 level luffing cranes, 25 – 40 tons.
Terminal size:	220,000 sq.m.
Terminal width:	270 m.
Sheds:	1 × 11,300 sq.m., 1 × 18,900 sq.m.

Seaport Terminals also have a terminal at Merwehaven with special cold stores and temperature controlled sheds, for the storage of fresh fruit and vegetables.

The total capacity of the Merwehaven area is:

Quay length:	1,900 m.
Cranes:	32 (5 up to 35 tons)
Sheds:	Total space 60,000 sq.m.

Quick Dispatch: Quick Dispatch operates a specialised car terminal in the Brittanniehaven, Europoort. This terminal handles approximately 200,000 cars annually.

East of this terminal Quick Dispatch (Nedlloyd) and Messrs. Broekman Motorships are operating an installation named "Rotterdam Car Centre". This terminal is used for storage, cleaning (deconservation) and distribution of cars.

Messrs. Quick Dispatch also have a Container/Ro-Ro multi-purpose terminal at Prinses Beatrixhaven.

Deka Transport: Seinehaven (East Europoort):

The company is owned by Deutsche Metall Gesellschaft.

Terminal area:	9 hectares (24 acres)
Quay length:	250 m.
Cranes:	2 fixed 3 mobile 1 transtainer
Sheds:	2

Uniport Stevedoring Company N.V.: Lloydkade/Schiehaven.

Terminal for general cargo and semi-container vessels.

Quay length:	1,050 m.
Max. draft:	9 m. (30 ft.) F.W.
Cranes:	2 heavy lift cranes, 45 tons (40 m. reach) 13 General Cargo cranes, 5 tons.
Terminal Area:	70,000 sq.m.
Shed space:	General Cargo 10,000 sq.m.
Shed space:	Stuffing/stripping 2,000 sq.m.
Open space:	35,000 m.

Multi-Terminals Waalhaven B.V.: Pier 2 Terminal: Equipped for the handling of conventional semi-container and Ro/Ro vessels.

Hanno Rotterdam B.V.: Multi-purpose terminal. Maashaven – North side.

Max. draft:	9.20 m. (30 ft.) F.W.
Future draft:	11.60 m. (38 ft.) F.W.
Quay length:	2,000 m.
Storage capacity:	7,500 TEUs
Sheds:	13 sheds, 14,000 sq.m.
Cranes:	16 general cargo cranes, 8 tons. 4 container cranes, 39 tons.

Nederlands Transport Bureau B.V.: Waalhaven - North side. General cargo handling. Fertiliser loading, both bagged and in bulk.

Quay length	*Max. draft*
200 m.	12 m. (39 ft. 3 in.) F.W.
1,200 m.	10 m. (32 ft. 8 in.) F.W.
150 m.	9 m. (29 ft. 6 in.) F.W.

FRUIT: There are modern fruit terminals in the Merwehaven.

1. Rotterdam Fruit Pier (R.F.P.) owned by the fruit importers:

Velleman & Tas
Jan van den Brink
Citronas
Internationale Fruit Mij.

2. Fruit Terminal Rotterdam (F.T.R.) owned by Rotterdam Fruit Pier (R.F.P.) and Fruit Stevedores Rotterdam (F.S.R.), which company is owned by the Stevedores.

Fruit Stevedores Rotterdam (F.S.R.) are acting as stevedoring operators on all fruit terminals in the Merwehaven.

Shed One: Temperature controlled warehouse of 11,000 sq.m.

Dimensions:	120 m.×90 m.×7 m.
Temperature:	4°C – 8°C
Ventilation capacity:	20,000 cu.m.p.h.

The largest palletised fruit carrier can be completely discharged into the warehouse. The short side of the shed runs parallel to the quay. Via 2 sets of doors in the long sides, 48 lorries can be loaded simultaneously. Rail connection is available.

Shed Two: This shed has the same capacity as Shed No. 1, but in addition 2 separate temperature controlled cool-cells are added with dimensions 15 m.×45 m.×5 m. each, suitable for fruit storage for longer periods. 8 cranes of 8 tons each and one of 17.5 tons are available to handle the discharging operations.

Future Planning: Sufficient space is available for further sheds/cold stores and for facilities to handle Ro/Ro vessels and containerised fruit shipments. Realisation will be effected in the next few years.

Juice Terminal: In the Ijselhaven, Eurobraz Terminal B.V. operate a transhipment and storage installation for concentrated fruit juices from Brazil.

The juices arrive at a temperature of −10°C and are stored in 16 stainless steel tanks for 1,000 tons concentrated juices each.

Cold store: HIWA Rotterdam Port Coldstores are enlarging their present cold store capacity of 40,000 cu.m. in the Ijselhaven in 1988 to 70,000 cu.m. and in 1989 their total capacity will be 100,000 cu.m.

HIWA specialises in the deep frozen storage of fruit juices in metal drums.

Maximum draft 33 ft. F.W.
Quay length: 310 m.

BULK HANDLING FACILITIES: Also see "Tables" and "Radio".

Europees Massagoed – Overslagbedrijf (EMO), B.V.: (European Bulk Transhipment Company (EMO) B.V.).

World's largest bulk transhipment and storage installation is situated on the Maasvlakte, which has been reclaimed from the North Sea. 3 fully loaded bulk carriers up to 300,000 d.w.t. can be discharged simultaneously.

EMO B.V. is an executing company which concludes transhipment contracts, primarily for ores and secondly for coal. Participants in this company are: SNV, Frans Swarttouw and Manufrance.

A.G. Messrs. EMO operate 2 transhipment installations.

A conveyor belt system connects the discharging pier in the Mississippihaven with the barge loading section in the Hartelhaven and with the stockpiling area.

Technical data:

Discharging quay, length 1,050 m., draft 72 ft. S.W.
Loading barges, length 700 m., draft 15 ft. F.W.
2×50 ton unloaders, capacity 11,000 t.p.h. (max.)
1×85 ton unloader, capacity 6,000 t.p.h. (average)
3 stackers/reclaimers, capacity 11,000 t.p.h.
1 loading machine, 5,000 t.p.h.
2 barge loaders, 11,000 t.p.h. (max.), 6,000 t.p.h. (average)
1 railway loader, 2,500 t.p.h.

Ertsoverslagbedrijf Europoort C.V.:

This transhipment installation, specialised in the handling of iron ore, is situated between Caland Canal and Dintelhaven.

A conveyor belt system connects the discharging quay in the Caland Canal with the barge loading section in the Dintelhaven, both direct and via the stockpiling area. For further details of this installation see "Tables".

Technical data:
Quay length discharging section – 645 m. and 395 m.
Max. draft allowed at MLW – 59 ft. and 75 ft. respectively SW.
No. of cranes – 3.
Max. capacity – 6,900 t.p.h.
Average discharging rate – 4,500 t.p.h.
Outreach discharging gear – 34.75 m. (114 ft.)
Max. height of gear above MHW – 24 m. (78 ft. 8 in.)
Storage capacity – 3.5 million tons
Transhipment capacity – 15 million tons/year.

GRAIN HANDLING FACILITIES:

		Max. draft at MLW	*Quay Length*	*Number of Elevators*	*Total Discharge Capacity*	*Loading Capacity*	*Silo Capacity (tons)*

Weighing: During transhipment and storage operations agri-bulk cargoes are weighed accurately at both shore and floating installations by means of computerised weighing equipment.

This equipment is checked several times per week by the Royal Dutch Grain & Feed Trade Association. Loaded weight certificates can be provided.

Overtime: No extra expenses for work in overtime are charged by the stevedores except for work on Sundays and holidays and the nights preceding and following them.

CONTAINER HANDLING FACILITIES:

Europe Container Terminus B.V.: At their home terminal in Eemhaven and Delta Terminal on the Maasvlakte E.C.T. handles 3rd generation container vessels and containers of all sizes and weights around the clock.

Partners: Internatio-Muller
Nedlloyd
Dutch Railways

About 40 container lines including a number of feeder services are operating from the E.C.T. 50 container trains are dispatched to 45 destinations in Europe weekly. Daily shuttle trains run to and from the E.C.T. Venlo Terminal, which is located near the German border.

E.C.T. Home Terminal: Prinses Margriethaven and Prins Willem Alexanderhaven.

Max. draft: 40 ft. SW
Water depth: 41 ft. 4 in. SW
Quay length: 3,000 m.
Marine terminal: 85 ha. marshalling area
Land terminal: 11 ha. storage area
Control terminal: 6 ha. administration

Equipment:
- 14 container cranes
- 5 stacking cranes
- 1 barge crane
- 3 rail tracks of 500 m.
- 3 multi trailer trains
- 18 heavy duty forklifts
- 2 railway gantry cranes
- 1 Ro/Ro ramp
- 525 terminal chassis
- 75 terminal trucks
- 40 van carriers

Number of containers handled:
1985. 1,045,450
1987. 981,000

E.C.T. Delta Terminal: E.C.T. Delta Terminal, the most modern and fastest container terminal in the world, suitable to handle fourth generation container vessels.

Technical details:
Terminal area: 81 ha. (200 acres)
Future: 300 ha. (750 acres)
Annual capacity: 600,000 containers
Future: 1,500,000 containers
Quay length: 1,200 m.
Ro/Ro ramp: 1
Cranes: 7 Conrad Stork, fitted with 2nd trolley system
Lifting capacity: 67 tons

Barge Terminal:
Cranes: 2
Quay length: 260 m. (future: 750 m.)

Communications: A special infra-red communication system transmits instructions to colour screens of straddle carriers while driving on top speed. The central computer and planning office is connected by glass-fibre with the main computers of E.C.T. in the Eemhaven.

Unitcentre B.V.: Waalhaven Pier 7. Container terminal
Annual capacity: 500,000 containers.

Technical data:
Maximum draft 12.2 m. (40 ft. FW)
Quay length 800 m.
Pier width 250 m.
Storage and marshalling area 250,000 sq.m.

	number	capacity	outreach
Container gantry cranes	5	60 tons	45 m.
Rail-mounted gantry cranes for stacking	6	45 tons	45 m.
Railway tracks	5		
Reefer station	124 connections		

Ro/Ro ramp: For vessels with an angled or slewing ramp a special outer ramp is available.

(Continued after "Bulk Handling Facilities" – table.)

BULK HANDLING FACILITIES: (continued)

Installation		Quay-length (m.)	Max. depth at MLW		Equipment	Discharging rate (t.p.h.)	Max. outreach discharging gear	Max. height of gear above MHW	Loading rate (t.p.h.)	Max. outreach loading gear	Capacities

					1 floating crane	Max. 300					
					1 floating crane	Max. 200					
					4 floating weigher/ loaders	Max. 30,000 tons/24 hours					

*Max. draft allowed at HW in Botlek 44 ft. (SW), under certain conditions 45 ft. (SW) and in Vulcaanhaven 39 ft. (FW). Bulk cargoes are also handled at the buoys in various basins by floating cranes of Messrs. Aegir, S.H.V. and Interstevedoring.

CONTAINER HANDLING FACILITIES: *(Continued)*
Container/Ro-Ro Terminal Heijplaat and CFS: This is a container/Ro-Ro terminal with an annual throughput capacity of 115,000 containers. There is a quay length of 760 m. provided with 4 cranes having a maximum capacity of 60 tonnes at 24 m. outreach and 40 tonnes at 40 m. There is is common user Ro-Ro berth having a length of 270 m. and a ramp width of 9 m.

This operation is planned to be moved to Waalhaven Pier 6.

Bell Lines: Bell Lines have handled their container vessels in a liner service between Rotterdam, Teesport, Newport, London and Waterford (Ireland) since 1967. As from October 1985, the terminal has also been available for other vessels.
Location: Brittanniehaven, Europoort.
Capacity: 140,000 TEUs (in 1985).

Uniport: Multipurpose Terminals B.V.: A new multipurpose terminal for middle sized container carriers is available in the Merwehaven.
Technical Data:

Quay length:	350 m.
Maximum draft:	10 m. (32 ft. 8 in.)
1 gantry crane:	45 tons (reach 35 m.)
1 heavy lift crane:	45 tons (reach 40 m.)
2 stacker cranes:	45 tons
Terminal Area:	35,000 sq.m.
Shed space for stuffing/stripping:	2,000 sq.m.
Transhipment capacity:	60 TEUs/hr.
Annual capacity:	50,000 TEUs
Future capacity:	70,000 TEUs

The terminal is planned to be extended either by the middle pier in Merwehaven or in the Schiehaven.

SPECIALISED CARGO-HANDLING FACILITIES: Quick dispatch, Brittanniehaven Car Terminal. Quay length 300 m., storage capacity about 15,000 cars.
Ro/Ro Facilities:

Company	*Location*	*Number of ramps*
Maatschappij Zeeland	Hook of Holland	2
Multi-Terminals B.V.	Waalhaven (pier 2)	2
Unitcentre B.V.	Heyplaat	1
Seaport Terminals B.V.	Prins Johan-Frisohaven	2
	Brittanniehaven	2
Quick Dispatch B.V. (Tor Line)	Prins Johan-Frisohaven	2
Quick Dispatch B.V.	Prinses Beatrixhaven	3
Europe Container Terminus B.V.	Prinses Margriethaven	1
	E.C.T. Delta Terminal	1
North-Sea Ferries B.V.	Beneluxhaven	2
P & O Ferries	Beneluxhaven	1
D.S.C.	Merwehaven	1

L.A.S.H.: Vessels discharge and load at buoys in Waalhaven. Average permissible draft at buoys is 36 ft. (FW).

Max. draft at Buoys 37, 38 and LASH buoys (No. 26 and 27) 40 ft. (SW).

Esso Chemie N.V.: The fertiliser plant in Europoort produces ammonia, urea, nitric acid, calcium ammonium nitrate.

Max. size: 30,000 d.w.t., length 690 ft., draft 42 ft. 6 in. in SW.

TANKER BERTHS:

Installation	*Basin*	*No. of berths*	*Max. SW draft*	*Hoses*

	Chemiehaven	3	41 ft. FW	
Shell	1st Petr. haven	7	28 ft. FW	4 × 8 in.
	2nd Petr. haven	7	39.5 ft. FW	4 × 8 in.
Texaco	2nd Petr. haven	1	32 ft. FW	3 × 12 in.
		1	35 ft. FW	3 × 12 in.
Mobil	2nd Petr. haven	1	33 ft. FW	6 and 8 in.

No facilities for discharging dirty ballast at Mobil at 2nd Petrol Haven, Texaco/Esso at 5th Petrol Haven, Tank Terminal Rotterdam, Panocean and Paktank.

No bunkers (ex-installation) at MOT, Mobil Oil, Esso, Tank Terminal Rotterdam, Panocean, Matex, Esso and Texaco.

Tank Cleaning – Ballast Water:
Messrs. Tankcleaning United C.V. and Booy Clean have floating and rolling equipment for all cleaning jobs and for the collection of contaminated ballast water.

Shore installation at Verolme Tankcleaning, Botlek.

Crude Oil Washing System:
For applying the crude washing system to tankers the permission of the oil installation, the Charterers and the Port Authorities is required.

Moerdijk:
The route New Waterway, Oude Maas and Dordtse Kil is frequently used by 20,000 ton tankers, loaded for 70%, proceeding to and from the Petrochemical installations of Shell Moerdijk, which are connected by pipe-lines to Shell-Chemie at Rotterdam-Pernis. Cleaning/gas-freeing is not allowed in this area.

Dimensions of sea-going ships on the river Oude Maas: Permission is required to navigate the rivers Oude Maas and Dordtse Kil with sea-going ships of a length greater than 135 m. or a breadth of more than 17.5 m. The maximum length allowed is 175 m. and breadth 23 m.

This permission must be applied for to the Harbour Co-ordination Centre in good time, in writing either by Telex or Fax.

"In good time" is understood to be: for incoming ships, at least 24 hours prior to entering the River Oude Maas. For outgoing ships and ships shifting berth, at least 24 hours prior to leaving the berth.

The application for permission for these ships should contain the following data:

1. Ships's name and call sign.
2. Nationality.
3. Length and breadth in metres.
3. Expected date and time of arrival at the Oude Maas, Dordtse Kil or of departure from the berth.
5. Gross tonnage and deepest draft on arrival. Draft in fresh water.

The address for permission is:

Harbour Co-ordination Centre,
Dept. Verkeersdienst/DGSM,
15 Galvanistraat,
3029 AD Rotterdam.
Tel: 010-4764855.
010-4251410.
Telex: DGSM-27370.
Fax: 010-4773489.

Restrictions:
Max. draft Oude Maas 31 ft., max. draft Dordtse Kil 25 ft. 6 in.; max. length 175 m., max. width 25 m., max. height 41 m., channel width 250 m.

The use of tugboats is compulsory for certain categories of vessels, the number of which depends upon length, draft and circumstances.

Also see "Shipmaster's Report" – June 1987.

STEVEDORES: *1. Bulk Cargoes other than Agribulk:*
EMO B.V. and Europoort C.V.: Around the clock, weekends inclusive. Other bulk stevedores: Monday 0730 hrs. – Saturday 1400 hrs. continuously. For work between Saturday 1400 hrs. and Monday 0730 hrs. permission is required from the labour authorities and unions.

Labourers are only available on a volunteer basis.

2. Agribulk – GEM Europoort Terminal I and II:
Monday 0730 hrs. until Saturday 1530 hrs.
Meal breaks: 1130 hrs. – 1200 hrs.
1930 hrs. – 2000 hrs.
0330 hrs. – 0400 hrs.

In principle, no work is performed on Saturday nights, Sundays and holidays.

Botlek and Rotterdam:

Monday-Friday	Monday-Thursday
0700 hrs. – 1130 hrs.	1530 hrs. – 1930 hrs.
1200 hrs. – 1530 hrs.	2000 hrs. – 2400 hrs.
Saturday	Friday night
0730 hrs. – 1130 hrs.	1530 hrs. – 2100 hrs.
1200 hrs. – 1530 hrs.	

Overtime: The Grain Elevator Company *does not charge* any overtime expenses, except for work on Sundays and holidays and the nights preceding and following them.

For weekend work after Saturday 1530 hrs. permission will normally only be granted when the operations can be completed on Sunday-morning early. Labourers have to be obtained on a volunteer basis.

Permission to work on Sunday from 0045 hrs. until 2200 hrs. is granted in exceptional cases only.

Official Office Hours at Rotterdam:

Monday – Friday	0900 – 1700 hrs.
Saturday	0900 – 1200 hrs.

Off-Port Notice Clause: In view of the fact that for large vessels a restricted number of berths is available only, such vessels frequently have to wait for a berth outside at sea.

In such cases laytime will count only in case the relevant Charter Party contains a proper off-port notice clause.

Lay-by Berth: In case the off-port notice clause stipulates the use of a lay-by berth, the vessel, in such a berth, should be at the immediate and effective disposition of the charterers.

In order to avoid heavy extra shifting expenses the charter party should stipulate that such a lay-by berth should be situated in that part of the port where the discharge will be actually effected (Europoort or Botlek).

Shifting Expenses: Berths midstream at the buoys in Botlek, Waalhaven and at the dolphins in Rijnhaven and Maashaven are recognised regular discharging berths where bulk cargoes are handled by means of floating equipment.

Disputes about shifting expenses from the buoys, especially when no work has been done there, to the Botlek shore installation can be avoided by stipulating for whose account shifting expenses between "berths" are.

Oil: At the oil refineries of Shell, Texaco, Esso, Kuwait Petroleum Europoort (K.P.E.) and B.P., tankers can discharge continuously, including week-ends without extra charge. This also applies to the Maasvlakte Oil Terminal, Maatschap Europoort Terminal (M.E.T.) and Europak.

The oil storage companies operate around the clock at overtime rates:

Paktank	2nd and 3rd Petroleum Harbour
Matex Nederland	Vlaardingen and 3rd Petroleum Harbour
Panocean	Chemiehaven, Botlek 1st Petroleum Harbour
Tank Terminal Rotterdam	Torontohaven, Botlek

General Cargo: The shift hours are as follows:

Day shift	0730 – 1600
Evening shift	1600 – 0015
Night shift	0000 – 0730

Normal working hours are during the day shifts and the evening shifts on Monday to Friday as well as the day shift on Saturday. Generally, gangs will be allocated on the basis 2 for the day shift and 1 for the evening shift.

For the night shift overtime has to be paid, as well as for work on Sundays and holidays, starting as from the end of the day shift on the preceding day until the beginning of the day shift on the next day.

No work is permitted:
24th December 1600 hrs. – 26th December 0730 hrs.
31st December 1600 hrs. – 1st January 1700 hrs.

Containers: The large container terminals E.C.T. and Unitcentre operate around the clock, week-ends inclusive. No work is permitted: 24th December 1530 hrs. – 26th December 0715 hrs. and 31st December 1530 hrs. – 1st January 1515 hrs.

Agents should be kept closely advised of vessel's position. In view of ordering gangs for next morning/evening Master's final ETA message is required before 1400 hrs. For work on Monday mornings a final ETA is required before Friday 1400 hrs.

MEDICAL: All medical facilities available. Advance notice only in emergency or if attendance required during week-end.

DENSITY: *Europoort:* At high water 1025; at low water 1022.
Botlek: At high water 1014; at low water 1001.

Waalhaven and other basins in the Rotterdam port area: at high water 1004; at low water 1000. All depending upon amount of fresh water carried down river.

FRESH WATER: Can be supplied ex-quay at many berths. Where no shore connections are available and at buoys: by waterboat.

Fresh water can also be supplied in the Roads off the Hook of Holland, weather permitting.

FUEL: All types of oil bunkers can be supplied by means of barges or ex-shore installations for tankers. Coasters can take bunkers ex-installation during their inward or outward passage. Advance notice is required for vessels which are only 24 hours or less in port and for bunkering during week-ends.

FIRE PRECAUTIONS: No floating objects are allowed alongside tankers during discharge or loading of dangerous cargoes and during ballasting.

CUSTOMS ALLOWANCES: Spirits: first arrival each month, 5 litres per vessel plus 1 bottle per man. Otherwise, 0.75 litre per man with a max. of 5 litres per vessel. Wine: 5 litres per man.

Each Crew member permitted out of bond 200 cigarettes, or 25 cigars, or 500 gm. tobacco.

GANGWAY/DECK WATCHMEN: Recommended.

CERTIFICATES: Ship's Register and Derat Exemption Certificate.

Tankers bound for a general cargo basin or a shipyard need to have a Gas Free Certificate (issued by a recognised Marine Chemist after inspection), before entering into the basin.

CONSULS: Area code 010

REPAIRS: (Also see "General"). A variety of shipyards and workshops are available for engineering and all types of repairs. Various yards have specialised in the construction of dredgers, ferry boats, offshore equipment, heavy derrick vessels and/or in the jumboizing of vessels.

The largest drydocks in the Rotterdam port area are owned by the following shipyards of the Rhine-Schelde-Verolme group:

Verolme Dock- and Shipbuilding Company	Graving Dock 7	500,000 d.w.t.
Wilton-Fijenoord, Schiedam	Graving Dock 8	160,000 d.w.t.

Wilton-Fijenoord and Verolme Rozenburg have combined their fleet of tugboats for assistance at the R.S.V. shipyards in the New Waterway area.

If VLCCs with a length of over 270 metres do not have full engine power for manoeuvring or have not made sufficient engine trials after repairs they must be escorted to and/or from the repair yards by two tugboats of sufficient capacity.

The Government Harbour Master (Rijkshavenmeester) must be notified in this respect 12 hours prior to arrival or departure.

Tank cleaning facilities are available.

Voyage repairs are carried out in the entire port area including Botlek and Europoort/Maasvlakte.

Some shipyards are situated beyond the bridges across the river Maas, East of Rotterdam. They can be reached via the Koningshaven, where a traffic and a railway bridge have to be passed.

Max. draft at HW: 21 ft. FW.
LW: 17 ft. FW.

Boele's Scheepswerven en Machinefabriek B.V., Bolnes: Postal Code 2980 DA, Ridderkerk, Holland. Tel: 0 1804-18555. Cables: Boele, Bolnes. Telex: 20012 Boele Nl.

U.K. Agents: G. C. Ridley & Co. Ltd., 15 St. Helen's Place, London EC3A 6DH. Tel: 01-588 5125. Telex: 885852.

Docks: 4. Lengths, 184.4 m. × 33.5 m. × 15.3 m.; 175.2 m. × 25.9 m. × 13.41 m.; 160 m. × 23.7 m. × 12.8 m.; 105 m. × 19.25 m. × 14 m.

Extreme Breadth: 41 m., 32.6 m., 30.6 m., 26.4 m. respectively.

Draft over Blocks: 8.4 m., 6.8 m., 7 m., 7.20 m. respectively.

Lifting Capacities: 22,500 tons, 13,000 tons, 11,000 tons, 5,000 tons respectively.

Slipways: 3. Patent electric side-slips, 122 m. long, up to 7,000 d.w.t.

Repair Quays: 8.

Engine Repairs: All types, steam and diesel.

Repair licensees, for Doxford, Gotaverken, Mirrlees Blackstone, Pielstick, Grandi Motori (Fiat) and Sulzer, Burmeister & Wain, Akasaka, Mitsubishi-UE, Kobe Diesel.

D. Van de Wetering B.V.: Bunschotenweg 134, 3089 KC Rotterdam, Holland. Tel: 010-29.62.55 (day and night) Telex: 28122 NL.

U.K. Agents: G. C. Ridley & Co. Ltd., 15 St. Helen's Place, London EC3A 6DH. Tel: 01-588 5125. Telex: 885852.

Engine Repairs: All types.

Specialised work: Port repairs for hulls, deck and electrical equipment. Cleaning and engine repairs.

Other work: After-sales service and spare parts for Daihatsu and Hanshin diesels, Thune Eureka pumps, Pusnes deck machinery. Tanabe compressors, Naniwa pumps, Hitma Crosby safety valves.

DRY DOCKS: Largest dry dock for vessels up to 500,000 d.w.t. with tank cleaning installation for largest vessels. See "Repairs".

OPENING/CLOSING HATCHES: On liners by stevedores. On tramp vessels by crew; stevedores lift beams.

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Rotterdam Airport Zestienhoven (distance 6 km.) and Amsterdam Airport Schiphol (distance 70 km.) are served by regular Airlines.

TIME: During Winter GMT plus 1 hour. During Summer GMT plus 2 hours.

HOLIDAYS: New Year's Day; Easter Monday; Queen's Birthday (30th April); Ascension Day; Whit Monday; Christmas Day (25th December) no work; Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Police head office tel. 14.31.44; Alarm and accidents tel. 14.14.14; Ambulance tel. 33.33.00; Fire tel. 29.29.29.

TELEPHONES: At major shipyards, oil and grain terminals telephone is placed on board without extra charge.

DEGASSING/CLEANING: Free translation of circular issued 17th April 1973 by the Docks Industry of the Municipality of Rotterdam, reads: Safety requirements in regard to degassing/cleaning of tanks and/or holds on board ocean tanker vessels.

A recent accident during cleaning activities of tanks having contained combustible gases or liquids, poisonous or not, has resulted in the following directives to maintain the safety and to protect the environment in the dock area.

The Articles 55 and 56 of the Port Regulations Rotterdam (Municipal Gazette 1971, No. 3) prescribed a written consent of the Port Superintendent for degassing/cleaning. To obtain such a written consent on behalf of an ocean tanker vessel, the Master should apply to the Office of the Port Superintendent, Department of Dangerous Substances, at least 24 hours before the actual cleaning. Conditions may be made in respect of, and amongst other things:

(a) safe cleaning procedure, and

(b) presence of an expert.

To that effect an investigation may be held on board as to a safe rinsing procedure, and relevant subjects, in consultation with the ship's management.

A statement may be demanded from the Master stating whom he charges with the supervision of the activities. From this person expertise is demanded, to the satisfaction of the Port Superintendent. This "Expert" may be a member of the ship's crew, respectively a person to be designated by the Owner (e.g. a laboratory expert). Without the express consent of the Port Superintendent cleaning must not be started.

These measures have become effective at once and are applicable to all ocean tanker vessels, of which the tanks to be cleaned have contained a combustible liquid as its last contents with a flash-point lower than, or equal to, 55° C.

For ships berthed at a shore tank-cleaning station and handled by that company, the cleaning-company concerned shall be liable for a safe treatment and consequently no separate consent shall be required.

In the following summary, the ship's data necessary to obtain a consent has been stated.

The cleaning of tanks, as indicated in this circular, is not permitted without the consent of the Port Superintendent of Rotterdam. Concerning stench-causing substances further directives will be issued.

It will be tried to restrict the delays possibly occurring as a result of this new regulation minimum.

Summary: By "degassing" to be understood: Degassing or ventilating a tankage, steaming or cleaning and the activities related thereto.

Reporting: At least 24 hours before commencement of the cleaning activities the ship (ship's Agent) should make a request by Telex to the Port Superintendent of Rotterdam (Port co-ordinating centre) to obtain a consent pursuant to Art. 55 or 56 Port Regulations.

The following data should be stated when making the application: (1) name ship; (2) nationality; (3) tonnage in g.r.t.; (4) name Agent; (5) berth where cleaning is to be carried out; (6) indication of tanks to be cleaned; (7) correct technical denomination of the last 2 products carried in these tanks; (8) expected time of commencement cleaning; (9) cargo still on board; (10) by whom cleaning will be carried out (ship's own crew respectively name cleaning company); (11) destination slush (remaining on board respectively discharge to . . .).

GENERAL:

Ship Repairing: For repairing (except cold work outside the cargo-area) on board any vessel outside a ship-repair yard permission from the Municipal Harbour Master is required.

Dependent on nature and location of repairs a certificate may be required to be issued by a recognised marine chemist after inspection.

For sea-going tank vessels an application for permission shall be made by telex to the Harbour Master of Rotterdam (Harbour Co-ordinating Centre, Dangerous Goods Department. Telex GEVST 25720), containing the following information:

1. Ship's name.
2. Date of commencement repairs.
3. Duration of repairs.
4. Berth.
5. Nature of repairs.
6. Location of repairs.
7. By whom repairs will be carried out.
8. Any cargo-operations, bunkering etc., during repairs.
9. Cargo on board and stowage.
10. Effect of repairs on ship's manoeuvrability and time and duration of immobilized situation.

The Municipal Dangerous Cargo Department will contact the Harbour-Inspectorate, which organisation is in charge of the National law: cleaning and repairing of tank vessels.

Inspection of International Safety Certificates:

As from January 1st, 1979 Harbour Pilots on board foreign vessels entering the port area of Rotterdam will keep a check on the presence of valid International Safety Certificates according to the "International Convention for the Safety of Life at Sea 1960" and the "International Convention on Loadlines 1966".

This check will be executed on behalf of the State Shipping Inspection to which Harbour-Pilots have to report. The Harbour-Pilots entrusted with this inspection are in the possession of an authorisation provided with photograph issued by the State Shipping Inspection (Scheepvaartinspectie). Should the reporting of a Harbour-Pilot be negative, any measures to be taken will solely remain the task and responsibility of the State Shipping Inspection.

"Off-Port Notice" clause:

Large grain vessels still often have to wait off the port for a berth. For that reason a proper "Off-Port Notice" clause is still recommended in order to avoid loss of time and sometimes heavy shifting expenses.

Control on delivery of cargo:

At Rotterdam, bulk grain cargoes are mainly discharged direct overboard into receivers' barges. Therefore, a careful supervision by an independent control company is recommended so as to make sure that no cargo is delivered to receivers before original Bills of Lading have been presented.

DEVELOPMENTS:

Waalhaven: Pier 6: Unitcentre is to expand its container facilities by building a new berth with length 445 m. and depth 14.15 m. below N.A.P.

Botlek: Kramer Container Service have constructed a berth with a depth of 10.65 m. below N.A.P. in Werkhaven. Length of berth 300 m.

Maashaven: Hanno Stevedoring Company have constructed a deep berth on the North side of Maashaven with a length of 350 m. and a depth of 11.65 m. below N.A.P.

Maasvlakte: A deepwater bulk cargo terminal is to be built for Frans Swarttouw. Completion expected late 1990. The terminal will handle 250,000 d.w.t. vessels with a draft of 68 ft. Once the deepwater terminal is in operation, the handling of coal and iron-ore at the Botlek Terminal will be discontinued.

ECT: Between 1988 and 1993, ECT will build a new terminal on the Maasvlakte alongside the existing Delta Terminal.

At the new ECT/Sea-Land Delta Terminal, container transport to and from the quayside gantry cranes will be carried out by automated guided vehicles (AGV's). Handling and storage of containers in the yard is furthermore automated through the application of remote controlled rail-mounted gantry cranes.

Major project characteristics:

Total Facility Area:	150 acres.
Quay wall:	3,200 ft.
Max. draft at low water:	44 ft. (achievable depth 55 ft.).
Gantry quay cranes:	8
Yearly throughput capacity:	500,000 containers

SHIPMASTER'S REPORT: November 1981.

On Stores Lists, wines and spirits should be total amounts in litres.

Require 4 Crew Lists, 2 Stores Lists and 2 Crew Declarations. Immigration board and take one Crew List and leave one stamped. Any personnel joining should have their particulars put on the back of this Crew List which will be collected by the Agent prior to departure.

Regulations regarding craft coming alongside are very strict. Basically, once discharging, ballasting or gas-freeing operations have commenced then no craft is allowed to come alongside a vessel if its engine is running when it is less than 25 m. from the vessel. Therefore, if bunkering or storing from barges these craft must be alongside before discharge etc., commences.

SHIPMASTER'S REPORT: July 1984.

Agents required us to use Dirkzwager Radio for all communications to them, chandlers and shore authorities. COW permissible but only after inspection by harbour authorities. Berthing Pilot boards around entrance to Europoort.

SHIPMASTER'S REPORT: June 1987.
Moerdijk.

Chart: BA. Chart No. 137.

Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
3 copies Crew Manifest.

Anchorage: Vessels use anchorages in the Hook of Holland area.

Pilotage: Pilot normally boards at the Maas Centre Buoy except when there is very poor weather when small vessels that know the area (with hydrocarbons) can proceed inside the Hook of Holland breakwaters and embark the Pilot there.

There is a special Pilot for Dordrecht and Moerdijk.

The average pilotage time to Moerdijk, depending on the state of the tide, is 4 hours.

River Passage: Pilots like to take small vessels up river on automatic pilot. On reaching the Oude Maas bridges, about 30 minutes after Botlek, the Pilot requires a man forward and changes to manual steering.

Berthing: Vessel berthed at Shell Moerdijk at Jetty "T" where there are 4 berths for small vessels. The largest vessel handled is about 20,000 d.w.t. The maximum draft is 9.0 m. (there is a tunnel under the Oude Maas near Dordrecht).

Vessels with a draft of 6.5 m. can navigate at any state of the tide, there is a shoal patch near Moerdijk.

Larger vessels are berthed against flat face of the "T". Ethylene is handled at Berth No. 2 on the "T" flat face and on Berth No. 3 on the inside South part of the "T". Normally vessels berth head in port side to, without the use of tugs. However, should the vessel have to berth starboard side to, a tug is required.

Mooring consisted of 2 head/stern lines and 2 springs. A mooring boat is provided and the fenders are good. Shore gangway provided.

When entering and leaving the pilot has to be very careful that the bow overhang does not hit the Chicksans on Berth No. 3.

Cargo: Vessels discharge ethylene. However, vessels are also able to load at this berth.

If 2 vessels are carrying the same product, only 1 vessel is allowed to discharge at one time.

There is one Chicksan (8 in. 150 ASA) for discharge at both Berths No. 2 and 3. Rate of discharge 80 t.p.h.

Samples are taken about 3 hours after commencement of discharge.

Fresh Water: Fresh water is available on both berths from a hydrant and is metered. The charge is DFL 2.75 per tonne.

General: All services are provided from Rotterdam. A telephone is placed on board but there is no meter. The meter indicating the total charges is at the gate office. Cost of call to UK is DFL 1.20 per minute and to Rotterdam DFL 0.25 per minute.

Vessel used Dirkzwager message agency at Maassluis (Telex 21058 dirknl) for all communications with Pilot and Harbour Authority prior to arrival. This service can also be used for after hours messages to the agent, etc.

There is a lay-by berth available at Shell Moerdijk for small vessels.

Should the vessel be taking on stores, the truck is only allowed as far as the car park which is about 300 m. from the vessel.

The best way to Dordrecht or Rotterdam is by train from Zevenbergen Station. Taxi from the car park to the station costs DFL15.0.

SHIPMASTER'S REPORT: September 1988.

Berth: Akzo Zout Chemie, Botlek.

Pilotage: Call "Maas Pilot" when approaching pilot boarding ground. The Pilot boards from a small boat which is sent from the large pilot cutter, or from a yellow launch in the vicinity of the Maas Centre Buoy.

Anchorage: The anchorage used by small vessels is to the South of the Maas Centre Buoy, outside the separation zone.

Tugs: Tugs not used.

Berthing: Akzo Zout Chemie, Botlek, is located in Chemiehaven. This is the South arm within the Botlek complex, on the East side. The berth is well fendered and low and is mainly used by small vessels and barges. Good leads for mooring lines are available.

The vessel is swung off the berth using the port anchor and berths starboard side to. Care should be taken when berthing as ships/barges are berthed at the Stolt (Panocean) Berths on the opposite side of the dock. Mooring usually consists of 2 head/stern lines and 1 spring at each end.

Cargo Operations: Initially the vessel had to purge with nitrogen. This was done on the berth, but with the nitrogen being supplied by Hoek Loes from trucks. The nitrogen was heated, both within the truck and by a heater at the manifold, to approximately 50°C. They can supply at 80°C if they can get trucks nearer to the ship. The nitrogen was supplied at 700 cu.m.p.h., but they can supply at up to 2,000 cu.m.p.h. if requested, but with corresponding drop in temperature.

Vessel loaded VCM through 4 in. (300 ASA) liquid line and 3 in. (300 ASA) vapour line (flexible hose attached to side of liquid arm). Shore supply and connect all reducers. Initially they required 1 ft. to be loaded into the tank, after which samples are taken. Analysis of each tank takes approximately 1.5 hours. As soon as first tank is cleared, vessel can commence loading, but only into that tank. Once all tanks are cleared, it is required that each tank is loaded individually so that the inhibitor can be added in the correct quantities. This takes approximately 2 minutes for each tank.

The maximum rate that shore can supply is 220 t.p.h. Cargo can be supplied at ambient temperature from pressure storage, or fully refrigerated.

Due to a mix-up between Charterers, cargo was initially supplied at ambient temperature and final 30 minutes at ambient temperature, due to the lack of refrigerated cargo. Refrigerated cargo was loaded at −15°C at the manifold and the final tank temperatures were −11.8°C.

Vapour is returned ashore and is passed through a scrubber before being vented. However, due to the size of the line (2 in. on the jetty) throughput is low. To increase this and reduce the tank pressures from 2 Bar down to 300 mb. prior to sailing, for the last 3 hours of loading, 2 compressors blowing ashore were used.

There is a control room at the head of the jetty which may be contacted by radio. Most communications were by word of mouth.

Caleb Brett have a surveyor permanently stationed within the plant. He handles all surveys and samples and the adding of inhibitor. In addition to taking samples at commencement of loading (first foot), samples are also taken when each tank is completed.

A telephone is placed on board the vessel.

Fresh Water: Available by barge.

General: Stores have to be manhandled along the jetty, but shore crane can be used to place large items aboard the vessel.

SHIPMASTER'S REPORT: December 1988.

Moerdijk:

The following is an update on Shipmaster's Report, dated June 1987.

Berthing: Max. draft 7.8 m. (not 9.0 m.)

Vessels with a draft of 7.5 m. (not 6.5 m.) can navigate at any state of the tide.

Normally vessels berth starboard side to at Berth No. 2 and port side to at Berth No. 3 without use of tug. Vessels can berth starboard side to at Berth No. 3 if a tug is used.

Cargo: Rate of discharge for ethylene is 110 t.p.h.

Generally, there is no surveyor. The terminal will not sign ullage sheet.

Make sure that the Loading Master signs the Statement of Fact on completion.

Time between completion and sailing is over 3 hours.

General: Lay-by berth at Shell is suitable for vessels 100 m. LOA and 8.0 m. draft.

Developments: Loading/discharging facilities to be upgraded in 1989 with extra ethylene lines for faster turnarounds.

ABA

SHIPMASTER'S REPORT: May 1989.

Pilot ladder required 2 ft. above water.

Sea Pilot takes EEC Check List for tankers and Health Declaration.

Vessels with a draft of 9.0 m. and over are to display deep draft signals.

Vessels proceeding to Europoort display a green light.

Agent requires copies (for Customs Clearance) of Bills of Lading, Letters of Protest, ullage reports at loading port(s) and ullage report arrival Rotterdam.

Any duty free items purchased by crew must be locked up ready for Customs inspection.

TERNEUZEN: 51.20 N. 03.50 E. (See Plan)

LOCATION: At mouth of the ship canal from the River Scheldt to Ghent. Lat. 51° 20′ 14″ N., Long. 3° 49′ 39″ E.
DOCUMENTS: Customs Clearance takes place in the docks, except vessels bound for Belgium. Clearing of ships comprises the production of a document signed by the Master, accompanied by the following documents: Crew List (2 copies), Stores List (2 copies) and Cargo Manifests (3 copies).

Masters are requested to have Crew List completed beforehand to avoid delay in the lock.

Also see "Rotterdam".
PILOTAGE: Compulsory for all sea-going vessels entering, leaving, and navigating inland waterways. Sea Pilot meets inward vessels at Buoy A1, Lat. 51° 22.00′ N., Long. 2° 53.24′ E. for ships entering by Wielingen Channel; or at Middensteen Bank Buoy, Lat. 51° 39.30′ N., Long. 3° 19.00′ E. for ships entering by the Oostgat Channel.

In Wielingen Channel Belgian and Dutch Pilots available. In Oostgat Channel a Dutch pilot cutter is stationed. Belgian pilot boat carries at the masthead a red flag with a white letter "P", the Dutch pilot boat has a blue flag with a white letter "L". Communicate with pilot cutter by VHF Channel 6.

Also see "Ghent – Pilotage" in Belgium.
Warning: In approaches Masters may encounter fishing boats steaming a parallel course about 300 ft. apart. The net is being towed between the two vessels. If there is danger of fouling the net, the fishing vessels will display by day International Code flag "D", or by night a searchlight from each vessel.
ANCHORAGE: Vessels anchor outside fairway where depth is at least 49 ft. Mud bottom and good holding ground.
RESTRICTIONS: No restrictions on night entry.
MAX. SIZE: Controlling depth 31 ft. 4 in. Keel clearance 3 ft. 0 in. Height of tide 12 ft. to 15 ft. A vessel of max. draft 40 ft. 6 in. can reach Terneuzen in most circumstances.

Ships not exceeding the following dimensions are allowed to pass through West lock and canal: Length 256 m., breadth 34 m., draft in fresh water (canal) 12.25 m.

Vessels loading a maximum cargo for Ghent should not exceed 12.25 m. draft (Fresh water).

Also see "Ghent" – "Shipmaster's Report".

Also see "Berthing".
HEALTH: Arriving vessels are only subject to medical examination when arriving from countries where contagious diseases reported or when such cases suspected on board. Medical Officer will board in Terneuzen Roads or Outer Harbour.
RADIO/RADAR: Communicate via Traffic Control Terneuzen on Channel 3 between Buoys No. 17 and 35 including the Braakmanhaven West, East and Ferry Harbour.

Radar Control also operates between Buoys No. 17 and 35 on Channel 3. 24 hour watch maintained.

Every hour plus 5 minutes a weather-bulletin, navigation reports and warnings are given.

Communicate on the Canal via Traffic Control Terneuzen, Channel 11.
TUGS: Towage compulsory for ships exceeding 180 m. LOA and/or draft 10.0 m.; also for car-carriers and ships exceeding 245 m. LOA there are specific rules. Tugs can be ordered from Terneuzen Tugboat Company or Towage and Salvage Union Ltd. respectively by Channel 72 and Channel 32. Both companies maintain continuous listening watch on Channels 3, 6, 11 and 14.

Slop barge can be ordered from tug companies.
BERTHING: The port has 4 outer harbours: Braakman, West, East and Ferry. The Braakman Harbour is only in use for handling chemical products. There are 2 jetties, also see "Dow Chemical". Braakman Jetty 450 m. in length, max. length of ship 140 m. Ocean Dock 350 m. length, least depth 14.5 m., max. length of ship 280 m. The West Harbour has 2 locks (West and Middle), which is mainly used by sea-going vessels. The East Harbour has 1 lock (East Lock) for inland craft, while the Ferry Harbour (no locks) is used mainly by fishing craft and yachts. Ships not exceeding the following dimensions are allowed to pass through the West Lock and Canal: length 256 m., breadth 34 m., fresh water draft (canal), 12.25 m. East Lock: ships of a length 183 m., breadth 22.80 m., draft 4.0 m. can pass. This lock is used by inland craft. Sea-going vessels with a max. length of 70 m. and a max. draft of 4.0 m. may also pass through the East Lock.

There are 4 harbours on the East bank of the canal situated about 1 mile South of Terneuzen Locks.
Noorderkanaalhaven (Northern Canal Harbour): Length of North Quay, 170 m., max. draft 5.50 m.; South Quay, 192 m., max. draft 5.50 m.; in the middle of the harbour max. draft 7.50 m.
Zuiderkanaalhaven (Southern Canal Harbour): Length of North Quay, 225 m., max. draft 2 m.; South Quay, 230 m., max. draft 5.75 m.; in the middle of the harbour max. draft 8.25 m. and 5 m.
Massagoedhaven (Bulk Harbour): Length of North Quay 504 m., max. draft 12.25 m. and 7.50 m. Length of South Quay 275 m., max. draft 7.50 m.
Zevenaarhaven (Zevenaar Harbour): Length of North Quay 1060 m., max. draft 12.25 m.; South Quay, 790 m., max. draft 8 m., in the middle of the harbour max. draft 12.25 m.

New terminal (August de Meyer B.V.) built by extending Zevenaar Harbour. The basin has been extended by 300 m. and deepened to 13.5 m. to provide accommodation for vessels, up to 65,000 d.w.t. The terminal is equipped with 2 Kangaroo cranes (36 tons capacity), each with a capacity of 440 t.p.h. and fitted with dust-free grabs. The 2 warehouses have a capacity of 130,000 tons in total.
Sluiskil (sub-port, about 4 miles South of Terneuzen) length of quay, 900 m., max. draft 10 m. to 10.50 m.
Sas van Gent (sub-port, on the canal about 7 miles South of Terneuzen) length of quay, 210 m., max. draft 7.00 m.

There are several sheds and warehouses, total capacity 160,000 sq.ft., also open storage, total capacity, 100,000 sq.ft. Grain silo with a storage capacity of 10,000 tons. Vessels up to 80,000 d.w.t. which for some reason have to anchor outside the piers can do so on the River Scheldt near Buoy No. 27. Ships with max. draft of 40 ft. 6 in. can reach Terneuzen under practically all circumstances.
Cranage: 10 movable cranes of 5 tons capacity; 4 floating cranes, 1×8.5 tons and 3×16 tons; 1 floating derrick of 40 tons. At Sluiskil there are 2 coke-loading plants, 3 cranes of 15 tons and 4 loading bridges. Sas van Gent has 2×5 ton cranes. Water and provisions available.
Container and Ro/Ro Facilities: Ro/Ro Harbour, width 24 m., max. draft 7.25 m. In Zevenaarharbour a Ro/Ro berth for 2 vessels, depth 9 m. and 8.50 m.
Ore and Bulk Cargo Facilities: Available at the Massagoed Harbour.

Dow Chemical: *On the Scheldt River – The Scheldt Jetty:* The Scheldt Jetty provides 1 berth only and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 22,500 tonnes deadweight (d.w.t.).

The jetty has no draft limitations and the maximum allowable length of the vessels (LOA) is 200 m. Also see "Product Handling Facilities".
In the Braakman Harbour – The Barge and Coaster Docks: The Barge and Coaster Docks have 3 platforms, providing 5 berths for loading and unloading purposes.

Berth A (East) is for the handling of barges only and excluded for the accommodation of seagoing vessels.

Certain draft limitations as well as size restrictions for the various berths have to be taken into account. See "The Braakman Harbour". For product handling facilities at the Barge and Coaster Docks see "Product Handling Facilities".
In the Braakman Harbour – The Ocean Dock: The Ocean Dock provides 2 berths and is suitable for accommodating vessels, ranging from barge-size up to ocean-going ships with a maximum of 100,000 tonnes deadweight (d.w.t.).

Certain draft limitations as well as size restrictions have to be taken into account, see "Braakman Harbour". For product handling facilities at the Ocean Dock see "Product Handling Facilities".
Berthing: A seagoing vessel calling at the Ocean Dock has to be:
(a) Moored with the bow in N.W. direction. Except as otherwise agreed by the Harbour Master.
(b) Turned away from the Ocean Dock.

A seagoing vessel calling at the Barge and Coaster Dock has to make its turn to starboard unless wind or other circumstances justify a different decision.

Masters must ensure that their vessels remain afloat under all circumstances.

Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master. At least 1 steel cable must be positioned on both the bow and the stern of the vessel. Each cable must be properly attached and adjusted for easy pick-up by a tug.
General Facilities and Limitations: Bunkering facilities are not available.

Supplies of bunker oils, fresh water or large quantities of stores can be supplied with a barge alongside the vessel. In this case the cargo operations have to be interrupted for the time the barge is alongside.

Depending on conditions in the port such operations will as a rule be limited to those vessels for which bunkering on the roads is legally not allowed (LPG vessels).

Bunkering at the berth requires 24 hours' notice and will be co-ordinated by the Loading Master. Limited quantities of stores can be taken on board via the jetties.

If for bunkering or any other reason a barge or boat has to moor alongside a ship, moored on one of the Dow Jetties, the Loading Master has to be informed 24 hours before the operation.

With the permission of the Loading Master it is allowed to transport cylinders with acetylene, nitrogen, helium, hydrogen, freon and oxygen from the jetty on board the moored ships and vice versa. By hoisting the cylinders it is obliged to use the specially made blue hoisting-containers from Dow. The cylinder valves must be protected by the screw-caps.

Slops or ballast water cannot be received at the jetty.

Tank cleaning of oil or chemical tankers is not permitted alongside the jetties. LPG vessels can be purged. Nitrogen and methane for purging purposes are available.

Vessels, moored at the Dow Jetties, have to comply with the International Ship/Shore Safety Check List and the additional Dow Marine Safety Regulations.

An intercom set and a telephone will be placed on board immediately after berthing. The intercom is for direct communication with the Loading Master

Charges for the telephone will be made via the ship's Agency. The telephone number of the set placed on board depends on the berth where the vessel is moored.

The following numbers are in use:

A West:	01150 – 72653
A East:	None
B West:	01150 – 72899
B East:	01150 – 72899
C:	01150 – 72679
OD North:	01150 – 73118
OD South:	01150 – 73118
Scheldt Jetty:	01150 – 19637 – 72211

The Braakman Harbour: General lay-out: See "Plan".

It should be noted that given water depths on the plans are valid immediately after dredging. A certain siltation should be taken into account. *The average rate of the siltation is unknown.*

Given water depths are translated to the General Mean Level for the Netherlands (N.A.P.). For the calculation of actual water depths, undermentioned tidal differences should be taken into account.

Tidal differences in metres:

High Water Spring (HWS) +2.7
High Water (HW) +2.0
Mean Level (N.A.P.) ±0.0
Low Water (LW) −2.0
Low Water Spring (LWS) −2.6

Barge and Coaster Docks:

Dock A (West) – Max. size 10,000 d.w.t. Depth 11 m.
Dock A (East) – Barges only. Depth 7.5 m.
Dock B (West) – Max. size 15,000 d.w.t. Depth 11 m.
Dock B (East) – Max. size 8,000 d.w.t. Depth 9.5 m.
Dock C (West) – Max. size 10,000 d.w.t. Depth 11 m.

In addition to the information, given on the Plan, the following "General Directives" should be observed:

For all berths, the overall length of vessels is restricted to a maximum of 140 m.

Berth A (East) is reserved for the accommodation of barges only.

Mooring at Berth B (East) is limited to the port side only.

The Ocean Dock: North and South Berth: Max. d.w.t. 100,000 tonnes. Max. length 280 m. Depth 14.5 m. L.L.W.S.

In addition to the information, given on the Plans, the following "General Directives" should be observed:

Time of berthing at/or departing from the Ocean Dock depends on tidal conditions and max. d.w.t. or draft of each vessel and will be appointed by the pilotage.

The maximum allowable draft of vessels is determined by the water depth at the Scheldt River Entrance, at Scheur. At present max. draft is at least 43 ft. (approx.). New figures are published every month.

Berthing with ship's bow pointing seaward is compulsory.

Port Regulations: To maintain order and safety of Navigation and based on Article 4 of the Port Regulations, the Harbour Master of Terneuzen has announced the following with regard to the Braakman Harbour and the berths, situated therein:

Admittance into the Harbour:

1. The largest admissable lengths and/or widths are for:

Sea-going vessels:
– in the harbour : length overall 280 m.
– along the Ocean Dock : length overall 280 m.
– along the B & C Docks: length overall 140 m.

Vessels exceeding 250 m. LOA should give ETA 36 hours in advance.

inland craft : length 140 m.
push barges : length 193 m.
width 22.8 m.
An additional length of 8 m. is permitted, provided that the maximum length of the barge does not exceed 153 m. and the pushtug is lashed in the axis of the barge.
lashed barges : length 110 m.
width 22.8 m.

2. It is prohibited to enter the harbour with vessels or boats which:
   a. Do not have to load or unload in the harbour.
   b. Do not have to carry out any work.
   c. Are not equipped with an VHF radio, suitable for transmitting and receiving on Channel 3.

3. Dispensation from measurements and conditions as mentioned above can be granted by the Harbour Master or his Substitute, except for the max. admittable LOA of 280 m.

Dow Chemical Marine Department can be contacted by VHF radio on Channels 6, 8, 13 and 34. Constant radio watch is kept on Channels 13 and 34.

Traffic Control:

1. Traffic is controlled by the Terneuzen Traffic Control Station. Tel: 01150-95651. (Traffic leader Tel: 01150-12161). Telex: 55482. FAX: 20527. VHF: Channel 3. Call sign: Post Terneuzen.

2. The procedure of "Reporting in Writing" is also compulsory for inland craft, whereby the term of 3 hours also applies for the activities as mentioned below.

Masters of seagoing vessels and inland craft must report by VHF on Channel 3 to Terneuzen Traffic Control Station, call sign "Post Terneuzen", when:

(a) On the Western Scheldt River with destination Braakman Harbour and:

Ascending the river: Entering the radio area "Post Terneuzen" and in the neighbourhood of Buoy 17.

Sailing down the river: Entering the radio area "Post Terneuzen" and in the neighbourhood of Buoy 22.

(b) Entering or leaving the harbour.
(c) After berthing and before unberthing.
(d) Changing berth.

4. All traffic inside the harbour or harbour entrance is obliged to have VHF radio tuned to Channel 3.

5. If necessitated by weather, or other circumstances, the required number of tug boats will be determined by the Harbour Master.

6. *Seagoing* vessels, having to carry the signals in accordance with Article 22 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 Nr.A-5/071054 (Regulations for Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less. *Inland* craft, having to carry the signals in accordance with Article 10 of the Decree of the Ministry of Transport and Public Works, dated 31/12/1971 (Regulations of Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

During approach under the above conditions vessels may be ordered by the Harbour Master, to berth or drop the anchor at a suitable place.

Dispensation from the paragraphs as provided above may be granted by the Harbour Master.

7. Entering and leaving the harbour is prohibited if a red light is shown below the green and red harbour lights.

Mooring:

1. Masters must ensure that their vessels remain afloat under all circumstances.

2. Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master.

At least 1 steel wire must be positioned on both the bow and the quarter of the ship. Each wire must be properly made fast and adjusted for easy pick-up by a tug.

Pilotage: Pilotage is compulsory for sea-going vessels, entering, leaving or manoeuvring in the harbour.

Dispensation may be granted by the Harbour Master.

Marking:

1. The entrance of the harbour is marked by a fixed green, and a fixed red light on top of piles on West side and East side of the white leading lights.

2. Night and day, the axis of the harbour entrance is marked by 2 synchronous interrupted white leading lights (iso 2 sec.) located on the Southern Harbour Dyke. Bearing is 191°.

3. The green and red harbour lights are located respectively 170 m. and 215 m. from the axis, indicated by the white leading lights.

The minimum width of the harbour entrance on either side of the axis, measured at right angles, is 112 m.

4. Night and day the centre of the turning-basin, West of the Ocean Dock, is indicated by interrupted green leading lights (3 sec. on, 1 sec. off). These lights are located on the Southern Harbour Dyke. Bearing is 211.5°.

5. The centre of the almost circular turning basin lies at the intersection of the green leading lights and the Westward lengthened axis of the Ocean Dock. The radius of the turning basin is 200 m.

6. During fog, 2 sodium fog-lights are lit underneath the green light of the harbour entrance.

One of these fog lights is directed towards the Scheldt River, the other one towards the harbour.

During the night and poor visibility, the piles, marking the harbour entrance are illuminated by floodlights.

7. The shoal in the harbour, extending from the South side of the Barge and Coaster Docks to further Southward is covered by 3 light buoys, located on a water depth of N.A.P. −7.5 m.

Depths:

1. The dredged bottom-depths in the harbour are:

In the Harbour Entrance : N.A.P − 15 m.
In the Turning Basin : N.A.P − 16 m.
The Western Berths of the
B & C Docks : N.A.P − 11 m.
B & C Dock Berth B-East : N.A.P − 9.5 m.
B & C Dock Berth A-East : N.A.P − 7.5 m.

The above mentioned bottom depths are typical figures and certain deviations as a result of siltation can occur.

2. Information with regard to permitted draft can be obtained from the Harbour Masters' Office or from the Traffic Control Station.

Tugs: A sea-going vessel mooring, or leaving a berth has to be assisted by at least:

(a) 1 tug if the length overall is less than 100 m.
(b) 2 tugs with sufficient power if the overall length exceeds 100 m. unless the vessel is equipped with a functioning bow-thruster when only 1 tug is required.

(c) The number of tugs may be 1 less when leaving Berths B-West or B-East and when moored with the bow to the North.

Assisting tug must be attached to the towing lines on the sea-going vessel.

Loading/Discharging:

Manifold Position:

The manifold position for ships bound for Terneuzen should be:

- about midships.
- 2 m. minimum from rail.
- 1 m. minimum above deck.
- Flange connection 6 in. minimum.

A well supported manifold is required and the space around and above the manifold should be free of obstructions.

Product Handling Facilities and Capabilities:

Marine Loading Equipment: All LPG products are loaded/unloaded at the Barge and Coaster Docks. Butane and propane can also be loaded/unloaded at the Ocean Dock. The following equipment is available:

B & C (A-West): 2 stainles steel loading arms for propane, nominal diameter 6 in., minimum temp. −104°C.

1 carbon steel loading arm for butane and propane, nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (A-East): 1 carbon steel loading arm for butane and propane, nominal diameter 6 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-West): 1 carbon steel loading arm for butane and propane, nominal diameter 8 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (B-East): 1 carbon steel loading arm for butane and propane, nominal diameter 8 in., with integrated vapour return line, nominal diameter 4 in., minimum temp. −10°C.

B & C (Dock C): 2 stainless steel loading arms for propane, nominal diameter 6 in., minimum temp. −104°C.

O.D. (South): 2 low temperature steel loading arms for butane and propane, nominal diameter 10 in., minimum temp. −50°C.

O.D. (North): 2 low temperature steel loading arms for butane and propane, nominal diameter 12 in., minimum temp. −50°C.

Except for the carbon steel loading arm on Berth A (West and East), all other arms are equipped with an emergency shut-off/disconnecting device and a fire fighting nozzle, directed on the ship's cargo line manifold.

On the Braakman Jetty a C-4 vaporiser and booster pump are available for C-4 unloading from barges which do not have own discharge facilities.

Propane can be unloaded with this booster-pump as well.

Nitrogen or methane supply from shore is necessary to produce enough over-pressure in the ship tanks, when unloading C3's.

Purging:

Purging of LPG vessels with nitrogen or methane can be carried out at the Barge and Coaster Docks. Maximum delivery rate of nitrogen is 2,000 N cu.m./hr., methane 1,800 N cu.m./hr.

Nitrogen can be heated to a temperature of +70°C to increase the drying effect of the vessel's cargo tanks which were waterwashed prior to the purge. Prior to loading LPG, vessels must meet the requirements as laid down in the "Guidelines for Cargotank Condition".

Conditions for unloading Propane and Butane:

All refrigerated propane and butane vessels should arrive with tanks over-pressure not exceeding 60 mb. to achieve maximum discharge rates.

Unloading of propane and butane is without vapour return.

Transfer Capabilities:

Discharge rates for refrigerated propane and butane are about 1,100 cu.m./hr.

Loading rates for refrigerated propane and butane are about 800 cu.m./hr.

Loading rates for pressurised propane and butane are about 250 cu.m./hr.

Storage:

Butane and propane are stored in refrigerated and pressurised tanks and loaded/unloaded at either ambient temperature or refrigerated. Refrigerated propane delivery is at −38°C and butane delivery is at −5°C.

LPG Storage Tanks:

2×50,000 cu.m. propane/butane fully refrigerated.

1×15,000 cu.m. butane fully refrigerated.

1×5,000 cu.m. butane pressurised.

2×3,000 cu.m. propane/butane pressurised.

Ventmasts must have clearly marked purge connections for either steam or nitrogen.

The vessel must have updated cargo-piping diagrams on board. Copies of drawings must be submitted to Dow on request.

Inspection – Visual Inspection:

Cargo tanks, pumps and refrigeration plants shall be easily accessible for inspection, and crew will upon request open the blinds, valves, drums, etc., as appropriate in accordance with vessel's safety practices.

Cargo Transfer Operations:

Loading or unloading will not start until the appropriate safety and operating procedures have been communicated by the Loading Master to the responsible ship's officer. The vessel must be securely moored alongside the jetty. If requested by the Loading Master additional mooring lines should be attached.

The Loading Master must be informed about the true set pressure of the cargo tank safety valves.

Non-used line ends must be blanked off. All bolt holes must be filled at all pipe connections.

Gas detection on board must be in good order. The Master must permit testing upon request. Master must allow the installation of additional shore gas detectors on deck during loading/unloading operations.

In case of inerted tanks and/or void-spaces, the Master is fully responsible for the necessary warning tags.

If a sprinkler test is requested by the Loading Master or Government Representatives, this must be permitted. If an ESD test is requested by the Loading Master or Government Representatives, this must also be permitted. Upon request the Master must state the valve closure time of his ESD system, to assure safe transfer at short ESD valve closing times. Dow reserves the right to the product transfer rates in order to keep the pressure, as a result of an activated ESD system, below the safety valve settings at no cost to Dow.

Pneumatic ESD connections for shore connections must be clearly marked.

(ESD = Emergency Shut Down.)

At the berth, the venting of gas through ventstacks is not permitted.

Upon request of the Loading Master, cargo pumps must be checked for proper functioning. Leakage of gas must not exceed a concentration of 30% LEL outside a circle of 25 cm. If the vessel's cargo compressors have to be used for loading or unloading operations, they will be tested as well. The Master must give full co-operation for these tests.

Safety:

1. Fire/emergency: In case of Fire/emergency (including personal accidents).

(a.) Inform jetty operator.

(b.) Dial 94982, report name, position, emergency situation and required help.

2. Communication: Ship to jetty and Marine office by means of portable telephone or intercom on board. Telephone: dial 18920, ext. 2563 Marine office, ext. 3165 Loading Master.

3. Use of intercom: Push button and call operator or office. Release button and wait. Always mention your ship's name. (If there are more ships alongside).

4. Emergency shutdown: Loading: To prevent overloading of ship's tanks and emergency shutdown can be carried out on deck by means of "the emergency shutdown switch" after which the shore-valve will immediately close.

5. Fire on board: Stop loading/unloading operations. Inform shore personnel.

6. Fire ashore or on other vessels: Stop loading/unloading operations. Make ship ready for departure. Wait for instructions.

7. Supervision: At all times during loading/unloading operations, adequate supervision must be carried out on deck and in the cargo-control room.

8. Tank cleaning: Tank cleaning or gas venting into the atmosphere alongside the jetty is strictly prohibited.

9. Deballasting: No deballasting of cargo tanks is allowed without permission of the Loading Master or his representative.

10. After loading: The loading arm will be blown with Nitrogen under pressure. You will receive approximately 3 cu.m. more.

Alarm signals: (Every Monday at 1200 hrs. there is an alarm test). Sounding of following signals:

Attention: 5 3 5 3 5 3 seconds: Stop cargo transfer, wait for instructions.

Evacuation: 1 1 1 1 1 1 seconds: Prepare ship for departure.

All clear: 20 seconds: Recommence operations (contact jetty operator). In case of loading: Loading will be stopped from: Ship/shore.

MEDICAL: One modern hospital available.

TANKERS: Slop tanker available. Also see "Berthing" – Dow Chemical.

FRESH WATER: Available from water barge.

FUEL: Fuel oil and lubricating oil available from lighter or tanker barge. Bunker coal available by prior arrangement.

CONSULS: Belgium, France, Finland, Norway and Spain.

REPAIRS: Terneuzen Shipbuilding Yard situated at junction of East and West Canal branches. Able carry out hull and engine repairs. Floating cranes and diving equipment available.

GANGWAY/DECK WATCHMEN: Available. Tariff increase 100% on Sundays and holidays.

OPENING/CLOSING HATCHES: Can be effected by crew or stevedores.

CUSTOMS ALLOWANCES: See "Rotterdam".

SURVEYORS: See "Flushing" or "Rotterdam".

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Rotterdam".

SERVICES: Repairs of radio, radar, etc., can be effected.

EMERGENCY CO-ORDINATION CENTRE: Harbour-Control Terneuzen continuous watch on VHF Channel 11. Tel: 12161. Telex: 55482.

BANKS: Amsterdam-Rotterdam Bank, Herengracht 15, 4531 GM Terneuzen. Tel: 94041. Telex: 55249.

Raiffeisen-Boerenleenbank, Herengracht 1, 4531 GM Terneuzen. Tel: 94651. Telex: 55260.

Algemene Bank Nederland, Herengracht 11, 4531 GM Terneuzen. Tel: 95051. Telex: 55429.

STORING: Vessels can be stored by barge and truck. At Braakman Harbour only with special permission of Dow Chemical Company, and not during loading and discharging. Trucks can proceed alongside at the berth except at Braakman Harbour. Approximate distance from truck to ship at Braakman Harbour, about 300 m.

At Braakman Harbour, no forklift trucks can be used to handle stores.

For Customs Regulations, see "Rotterdam".

Local Riggers can be employed to assist with storing.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

DEVELOPMENTS: Plans made to widen and deepen Outer Harbour.

SHIPMASTER'S REPORT: May 1988.

Chart: B.A. Chart No. 120.

Pilot: Vessels arriving from the West take Pilot at Wandelaar "A1" Buoy. Pilot on VHF Channel 6 and Telex No. 4682125.

If vessel arriving from the North, Pilot is taken at Steenbank. Pilot on VHF Channel 6 and Telex No. 4437811.

Gas ships with tank capacity over 1,500 cu.m., passage has to be via Schooneveld. If under 1,500 cu.m. the inside route via Oostgat can be used.

Under normal circumstances the Pilot taking the vessel to Terneuzen will also berth the vessel.

Anchorage: Vessels with dangerous cargo awaiting a berth at Terneuzen should anchor at Wielingen North Anchorage which is 3 miles West of Flushing, depth of water 7 fathoms.

Flushing Control monitors VHF Channel 21.

Everingen Anchorage, off Terneuzen, may be used for bunkers and repairs only. Loaded gas ships cannot wait at this anchorage.

If vessel awaiting orders she should stay to the North of "A1" Buoy.

Tugs: If berthing at Dow Chemical, vessels up to 100 m. LOA require 1 tug and if over 100 m. LOA, 2 tugs are required. We used 1 tug aft with the tug's line but the tug was too powerful for a small vessel.

Berths: For gas ships there are 4 berths available. These berths are both sides of Berth A and the West side only of Berths B and C. Vessels head North at all berths. Shore gangway used at all berths and the fendering was good. Depth alongside at low water 8.5 m.

Pilots advise that the maximum draft permissible at Ocean Pier is 14 m. and at any tide 10 m.

Cargo: Shore capacity for ethylene is 10,000 tonnes. Normal production 200 tonnes per day. Normally ethylene is exported from Terneuzen but at present there are problems with the production plant.

At present the shore reliquefaction plant is not working at full capacity and this is restricting discharge rate.

For handling of ethylene a 6 in. arm and a 4 in. vapour return line are used. Hot gas blown from ship on completion.

Berth C handles ethylene, propane, styrene, cumene, naphtha, resin oil and aromatic oil. Discharge rate for ethylene is 111 t.p.h. It takes about 3 hours for samples.

General: At present the maximum draft to Antwerp is 50 ft. if using 2 tides and 48 ft. if proceeding on 1 tide.

Fresh water is not available at Dow Chemical berths. Fresh water is provided by barge from Terneuzen.

Whilst at Flushing Anchorage, Ostend Radio is best for public correspondence, vessels can also use PCH. If anchored off Terneuzen it is best to use Antwerp Radio.

Barges with stores may proceed alongside before discharging, whilst sampling or after discharge. Stores can also be brought down the jetty with the aid of shore trolleys and crane. Bunkers may only be taken after completion of discharge.

Officials: Customs and Immigration board on arrival at the Berth. There was also an immigration check whilst at anchor off Flushing as the vessel had Eastern Block crew.

AUTHORITY: Havenschap Terneuzen, Maritiem District Scheldemond, Buitenhaven 1, 4531 BX Terneuzen. *Tel:* 01150-95651. *Telex:* 55482. *FAX:* 01150-20232 (office hours), 01150-20527 (24 hours - Control Centre). *Contact:* H.D.J. Wolfensberger, Harbour Master.

VLAARDINGEN: 51.54 N. 04.20 E.

On the Waterway about 5 miles from Rotterdam.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Harbour Pilots are always available.

VHF: Port Authority on Channel 20.

TUGS: Available.

BERTHING: *Old Harbour (Municipal):* Berths No. 656-660 and 701-705. For tugs and inland craft. Depth at entrance 10 ft. at LW. Total length of quay 2,000 m.

Koningin Wilhelmina Harbour (Municipal): Berths No. 634-653. Depth 12 to 17 ft. at LW. Length of quay 1,300 m.

Vulcaan Harbour (Private): Berths No. 601-620. Suitable for vessels up to a draft of 10 m. (33 ft.) at LW. Stevedoring by: Frans Swarttouw's Havenbedrijf.

Length of quay for cargo-handling: 750 m. Phosphate loading jetty (on riverside) for barges 140 m. 3 electric 16-ton cranes, 3 electric 6-ton cranes and two 5-ton mobile-cranes. Belt conveyors on phosphate jetty. Large shed with a capacity of 30,000 tons and 6 storage tanks with a total capacity of 90,000 tons for various bulk cargoes.

Nieuwe Matex Wharves (Private): Berths No. 622-633. 3 berths for sea-going vessels on riverside up to 35 ft. draft at LW. Several berths for barges and coasters on inner side of jetty up to 22 ft. draft.

Large tank installation; bonded warehouses. 424 storage tanks (total) capacity 450,000 cu.m. for vegetable and mineral oils, molasses, latex and chemicals.

Lensveld Wharf (Private): Berth No. 654. For general cargo and timber, max. draft 14 ft. at LW.

Lever-Sunlight Jetty (Private): Berth No. 712. Jetty 75 m. max. draft 10 ft. at LW. (no harbour dues).

N.V. Van Neerbos Ind. en Handel My. Jetty (Private): Berth No. 715. Length of jetty 70 m., max. draft 10 ft. at LW. 1 electric 3-ton crane.

Mosbert Absorbents Jetty (Private): Berth No. 716. Max. draft 20 ft. at LW.

Hydro Agri Fertiliser Works Harbour (Private): Berths No. 731-744. Length of harbour 300 m. max., draft 11 ft. to 14 ft. at LW. Two jetties on riverside: Phosphate discharging jetty, max. draft 16 ft. and acid discharging jetty, max. draft 23 ft. at LW. Harbour dues by arrangement.

FRESH WATER: Available by barge.

FUEL: Available by barge.

REPAIRS: *Ship Repair Yard "Vlaardingen Oost":* All kinds of repairs undertaken. Outfitting quay of 1,100 ft. length. Anchor and chain factory.

Machinefabriek Kreber: Builders and repairers of boilers, engines and various kinds of dredgers.

SURVEYORS: Saybolt Cargo Inspectors available at Vlaardingen, others (Caleb Brett, Bureau Verwey, etc.) at Rotterdam.

Lloyd's Register, American Bureau, Bureau Veritas and Det Norske Veritas Surveyors available at Rotterdam.

DRY DOCKS: Three dry docks (capacity 3,500, 4,200 and 5,300 tons) and one broadside slipway of 400 ft. (capacity 3,500 tons) in Vulcaan Harbour (Western part).

AIRPORT: Rotterdam Airport (designed for international short and medium haul air traffic) lies at a distance of 10 km. from the Vlaardingen port area.

EMERGENCY CO-ORDINATION CENTRE: Alarmcentrale Politie. Tel: 434 44 44. VHF Channel 11 (Port of Rotterdam).

AUTHORITY: Port of Vlaardingen, Gemeentewerken, Hoflaan 27, P.O.Box 141, 3130 AC Vlaardingen, Netherlands. *Tel:* 010 – 4344700. *Telex:* 27245. *FAX:* 4344373. *Contact:* Mr. S. van Berge, Harbour Master.

YMUIDEN (Ijmuiden): 52.28 N. 04.34 E. **(See Plan)**

Also refer to "Amsterdam".

DOCUMENTS:

2 Personal Effects Lists.
2 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
Declaration of Health.
Also see "Rotterdam".

PILOTAGE: On entering and leaving Ymuiden Government pilotage is compulsory. Pilots will board ships at sea, being transported from shore to the pilot boarding position by means of a sea-going tender. The boarding position is in the vicinity of the outer buoy.

"Traffic Centre Ymuiden" (Telegraphic address "Pilots VTS Ijmuiden") can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation are possible at night.

Pilot Ladders: Bottom of the pilot ladder should be 6 ft. above the water. Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

Pilot from Helicopter: When the pilot service per pilot tender has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 15 ft. in diameter. Deck plans should be provided in advance.

Vessels over 45 ft. draft always take helicopter pilotage.

Helicopter rates:
Dfl. 5,045. – per flying hour/pro rata exclusive fuel costs.
Dfl. 305. – per hoist transfer.
Dfl. 432. – Additional charge per flying hour from 1800 until 0600 hrs. and on Saturdays, Sundays and Dutch public holidays.

A variable fee per flying hour for fuel consumption fluctuating monthly.

Restrictions

1. Minimum visibility 800 m. at 150 ft. above sea level.
2. Maximum wind Force 10 (55 knots).
3. Severe turbulence and icing conditions.

Remote Pilotage (RP): During periods that pilot service is suspended for (small) vessels, shipping approaching Ymuiden can obtain the information and advice of a pilot at the Port Operation Centre, under the following conditions and provisions:

1. RP is for shipping for which pilotage is compulsory and vessels which voluntarily wish to make use of the service of a pilot.
2. RP will only be provided when it is impossible to board a vessel because of the weather conditions or for other reasons.
3. The Master explicitly announces that he wishes to approach the harbour using RP and that there is no objection to this under the terms of the access policy conducted.
4. The Master is obliged to take the pilot on board between the breakwaters.

Pre-Entry Reports:

Note: All reports must be updated if vessel delayed one hour or more.

7 Days Before Arrival: (Vessels using lock system with draft over 13.1 m. up to 13.7 m. and/or beam over 42 m. up to 45 m. and/or length over 325 m. up to 370 m.).

To: Pilot VTS Ymuiden.
Giving: IMO SRS Items: Alpha Bravo Golf India Juliet Oscar Papa Quebec Tango Uniform X-Ray.
Via: Telex: 71169 PIVTS NL.
Fax: 02550-32535.
Tel: 02550-64500 or Agent.

24 Hours Before Arrival in Netherlands Waters: (Tankers, dangerous cargo and draft over 13.7 m. up to 16.5 m.).

To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.
Note: Tanker Check List, if appropriate to Pilot on boarding.

8 Hours Before Arrival: (52° 30′ N., 03° 50′ E.). (Draft over 13.7 m. up to 16.5 m.).

To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.

6 Hours Before Arrival at Outer Buoy: All ships.
To: Pilot VTS Ymuiden.
Giving: As previous report.
Via: Telex, Fax, Tel. or Agent.

ANCHORAGE: Vessels may anchor off Ymuiden. Recommended area is 2 miles N.W. of Outer Buoy.

APPROACHES: The approach channel "IJ-geul" for navigation for ships with a draft of up to 54 ft. (16.5 m.). The channel leads to the Port of Ymuiden.

Approach Channel "IJ-geul": The navigation channel, officially known as the IJ-geul, has a width of 450 m. and is 23 km. long, when measured up to the piers at Ymuiden. The section of the channel within the piers is 4 km. long, and it is considerably narrower at some places.

Navigation: A number of measures have been taken to ensure a safe passage through the navigation channel. Ships which, due to their draft, need to use the new channel are obliged to take a Pilot on board. In other words it is prohibited to enter the channel without a Pilot. The Pilot boards the ship from a helicopter about 45 km. from the coast or is taken off at the Hook of Holland.

The deep draft ships can only sail in during a certain period of the tide (approx. 3 hours after flood-tide). Certain conditions (excessively high waves) can lead to a temporary closure of the channel. A special system has been developed to recognise and to forecast these conditions. A navigation plan that takes account of the water level prediction, weather and wave height forecasts and the draft of the ship in question is prepared and relayed to the Pilot. The conditions are continuously monitored and, if necessary, the plan is adjusted. Use is also made of a portable Decca receiver, which the Pilot takes on board with him. These portable receivers make use of more than the 2 customary transmitting stations, which means a considerable improvement in the determining of position – and as a consequence – improved navigation. Furthermore, these receivers are specially adapted to the situation at Ymuiden. Altogether this means that the Pilot can ascertain the position of the ship quite accurately, even at night or in fog, which leads to considerable improvement in safety.

A circular emergency anchorage area has been planned with a diameter of 1,600 m. about 10 km. from the pier. This emergency anchorage area is desirable because, should a disaster occur, the harbour mouth could suddenly become obstructed, preventing the ships in the channel from entering, whilst they would be unable to retrace their course back due to the approaching ebb-tide.

RESTRICTIONS/MAX. SIZE: All drafts listed below have been calculated in salt water with a specific gravity of 1.026.

Maximum Dimensions of Vessels: The approach channel to the port mouth of Ymuiden (IJ-geul) and the fairway in the Outer Harbour of Ymuiden via the Northern fairway to the Outer Quay No. 2 of Hoogovens is accessible for vessels with a maximum draft of 54 ft. in salt water. The maximum length of a vessel with a draft of 54 ft. that must swing is 300 m. Before vessels with a length of 250 m. – 300 m. and a draft of 49 ft. 3 in. can swing, consultation should be made as to the time of the swing manoeuvre in connection with the water level. Maximum draft of vessels longer than 300 m. to a maximum length of 350 m., that must swing, is 39 ft. 9 in. Ships with a draft of more than 45 ft. must remain in the channel and therefore should, when making a sailing plan, report at least 48 hours before entering Dutch waters.

In addition to the above mentioned report vessels restricted to the channel should report at least 24 hours before passing the Western border of the approach area. This approach area is located between the co-ordinates:

Lat. 52° 31′ 47″ N., Long. 3° 48′ 29″ E. and
Lat. 52° 27′ 25″ N., Long. 3° 41′ 20″ E.

This report should be corrected if there is more than 1 hour deviation, and should in any case be repeated at least 6 hours before arrival at the approach area.

Maximum dimensions for the North Sea Canal via the Northern fairway and the Northern Lock.

1. *Without a Licence:*
Length: 325 m.
Beam: 42 m.
Draft: 131 dm. (43 ft.)

2. *With Licence:*
Beam: 45 m.
Draft: 137 dm. (45 ft.)

Note: Should the beam exceed 42 m., restrictions will apply regarding the maximum permitted draft. Applications of such a licence are judged on basis tentatively fixed criteria per case.

Licences to exceed the maximum permitted draft and/or beam, to sail with an irregular transport should be applied for at least 7 days in advance.

Address: Directorate-General Shipping and Maritime Affairs, Head Traffic Service, Postbox 121, 1970 AC Ymuiden. Telex: 71169 PIVTS NL. FAX: 02550-35144.

HEALTH: Pratique granted automatically on arrival after completion of Maritime Declaration of Health. In case of suspected disease on board notify Agent by radio before arrival advising full details.

RADIO: *Obo-Carriers:* Masters of this type of vessel must, when calling to load and/or discharge dry cargo, cable at least 24 hours prior to arrival, the following information:

1. That vessel has no slops on board and is certified gas free or alternatively;
2. a. Correct name of liquid cargo carried last, with place and date of discharge.
   b. Stowage of cargo remnants (gases and/or liquids) and whether mixed with water or not.
   c. Whether non-gas free spaces are adjacent to dry cargo holds and if so, which holds.
   d. Which spaces contain inert gas.

Also see "Pilotage".

RADAR/VHF: The port is equipped with a shore based radar installation to facilitate navigation if necessary. Ymuiden has a VHF installation and Masters of vessels entering or leaving the port area must contact the Port Operations Centre (callsign – Ymuiden Port Control) by VHF to obtain information for safe navigation and rapid locking.

VHF Channels:

- In the approach area to Ymuiden seawards from the outer buoy: Channel 12 (Traffic Centre Ymuiden).
- From the outer buoy to the locks: Channel 9 (Ymuiden Port Control).
- On the North Sea Canal from the locks to kilometre 11.2: Channel 11 (Traffic Service North Sea Canal).
- On the North Sea Canal Eastwards at kilometre 11.2: Channel 14 (Traffic Service North Sea Canal).
- In the Port of Amsterdam: Channel 14.

TUGS: Available. Meet vessel in harbour entrance if required.

BERTHING: Steelworks Harbour (Private): Coal and ore cargoes discharged to Blast Furnace and Steel Works Company in Outer Harbour.

Quay 1: Length of quay: 1,360 ft. Depth alongside quay: 29 ft. 6 in. LLWS.

Opposite the quay there are 3 dolphins available where one vessel can wait for a loading/discharging berth (up to 34 ft. depth).

Equipment:
2 cranes, lifting capacity 30 tons, max. outreach 57 ft.
1 crane, lifting capacity 30 tons, max. outreach 63 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs and coils are handled.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 2: Length of quay: 1,800 ft. Depth alongside quay: 45 ft. (East) and 52 ft. (West) at LLWS.

Max. draft: The entrance to Outer Harbour is accessible to vessels up to 43 ft. draft and with special permission of the Harbour Authorities up to 45 ft. draft salt water.

Equipment:
3 bridge cranes, lifting capacity 40 tons each, max. outreach 115 ft.
2 conveyor belt systems (capacity 6,000 t.p.h.).

Despatch:
About 60,000 tons iron ore per 24 hours. About 50,000 tons coal per 24 hours.

Supplies: Water obtainable from quay. Stores can be delivered by truck, bunkers by barge.

Quay 3: Length of quay: 825 ft. Depth alongside quay: 31 ft. 6 in. LLWS. With special permission of the harbour authorities, max. sailing draft 34 ft. West of the quay are 4 dolphins available where a vessel can wait for a loading/discharging berth (up to 31 ft. 6 in. draft).

Equipment: 2 cranes with a capacity of 60 tons each. Outreach 70 ft.

Inner Harbours: These harbours are mainly used for loading or discharging smaller vessels having drafts between 11 ft. and 20 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs, coils but also fertilisers are handled.

CRANES: Inner Harbour No. 1 – 1 portal crane.
Inner Harbour No. 2 – 1×7.5 ton portal crane.
Inner Harbour No. 3 – 3×30 ton portal cranes.

STEVEDORES: *Working Hours:* In the Outer Harbours round the clock, also on Sundays and holidays.

In the Inner Harbour round the clock except from 1400 hrs. on Saturdays until 0600 hrs. on Monday.

FRESH WATER: Available from quay.
FUEL: Available by barge.
CONSULS: And all general information; refer to "Amsterdam".
MEDICAL: Doctors, hospital and all services available.
REPAIRS: Possible.
DRY DOCKS: None.
CUSTOMS ALLOWANCES: 200 cigarettes for each crew member; 5 litres spirits for whole ship.
AUTHORITY: Directorate General of Shipping and Maritime Affairs, Head of Traffic Service, Postbos 121, 1970 AC Ymuiden. *Tel:* 02550-19027. *FAX:* 02550-35144. *Telex:* 71169 HOCYM NL.

ZAANDAM (Zaanstad): 52.26 N. 04.49 E. (See Plan)

LOCATION: Zaandam lies on the Northern side of the North Sea Canal, near to Amsterdam. See "North Sea Canal" and "Amsterdam" plans. The Port of Zaanstad is divided into two parts by "Wilhelmina" sluice, the outer harbour being for large vessels and the inner harbour for coasters, etc.

PORT LIMITS: A line drawn from the Western side of Nieuwe Zeehaven entrance to the Eastern side of Zijkanaal "G" entrance defines the port limits.

DOCUMENTS: IMO Crew List, IMO fal form 5, other Customs papers to be supplied by Agents.

PILOTAGE: Procedure, etc. same as for Amsterdam. Not compulsory, but recommended. Pilot will take vessels all the way to Zaanstad. Amsterdam Harbour Service should be notified on VHF Channel 14 of vessel's intentions, then they will arrange for Zaanstad Harbour Service vessel to meet the vessel at the entrance to Zijkanaal "G" and direct it to its berth. When a vessel is leaving for sea, notice should be given to the Sluice Command via VHF Channel 11.

ANCHORAGE: It is prohibited to anchor in the port of Zaanstad.

RESTRICTIONS: Vessels with dangerous cargoes will not be handled at night.

All Zaandam harbours have direct unrestricted connection with the North Sea Canal.

LOCKS: Wilhelmina Sluice is 116.8 m. long, 12 m. wide and has a depth of 2.80 m.
MAX. SIZE: Max. draft 10.0 m.
HEALTH: Same as Ymuiden.
RADIO: Scheveningen Radio.
VHF: Wilhelmina Sluice – Channel 20. Alexander Bridge – Channel 20.
RADAR: No port radar service.
TUGS: Available.
BERTHING: (Docks)
Isaac Baarthaven: Length 900 m., width 70 m., depth 9 m. Quayage 370 m., with depths of 5 m. – 9 m. alongside. Ro/Ro quay available.
Dirk Metselaarhaven: Length 600 m., width 112 m., depth 10 m. Quayage 180 m., for transshipping liquids only (Private).
Zijkanaal E: Length 400 m., width 45 m. depth 7 m. Quayage 40 m., for transhipping only.
Old Timber Harbour:
  Quay length 230 m., Depth 9 m.
  Quay length 300 m., Depth 5 m. – 9 m.
Havenstraat:
  Quayage, Pont-south, 90 m., Depth 5 m.
  Quayage, Pont-north, 90 m., Depth 8 m.
  Slipways only for small ships.
  2 Ro-Ro berths, Width approximately 70 m. each, depth 8 m.
W. Thomassenharbour: Length 700 m., width 130 m., depth 9 m. Vessels up to 10 m. draft can berth. Quay with length 200 m., 4 berths with approximate width of 70 m. and 2 mooring buoys. No bridges and no locks.
CRANES: Mobile cranes only.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro vessels can be discharged in Oude Haven and Isaac Baarthaven.
STEVEDORES: *Working Hours:* Monday – Friday 0600 – 2130 hrs.
  Overtime possible from 2130 – 0600 hrs. and Saturday and Sunday.
MEDICAL: Full hospital facilities available without prior notice. Tel. 075-502911.
DENSITY: 1015.
FRESH WATER: Available.
FUEL: Arranged from Amsterdam.
REPAIRS: Possible.
DRY DOCKS: At Amsterdam, and Zaandam (Max. 90 m.).
CONSULS: Ghana, Tel: 075-351631.
  All others at Amsterdam (20 km.).
REPATRIATION: Possible.
AIRPORT: Schiphol Airport (Amsterdam) 20 km.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Port holidays similar to major Dutch ports, plus 2 extra holidays (Whit Tuesday and 1st May).
POLICE/AMBULANCE/FIRE: Tel: Police 211 311; Ambulance 020-555 555 5; Fire 32 32 32.
GENERAL: *Dirty Ballast:* Facilities available at Amsterdam.
Provisions: Available locally.
Chart: No. 124.
Prevailing Wind: Westerly.
AUTHORITY: Municipality of Zaanstad, Westkade 2, 1506 BA Zaandam, Netherlands. *Tel:* 075-512888. *Telex:* 19110. *FAX:* 075-512311. *Contact:* P.C.C. Majoor, Harbour Director. (Tel. 075-512526, 0600 hrs. – 2100 hrs.).

NOTES

Please also advise Shipping Guides Ltd.

Netherlands Antilles

BARCADERA, Aruba: 12.29 N. 70.00 W. (See Plan)

LOCATION: The industrial harbour of Aruba is situated 3 miles S.E. of Oranjestad.
DOCUMENTS: Documents and all general information, refer to "Oranjestad".
PILOTAGE: Compulsory.
RESTRICTIONS: Harbour open day and night. Depth of water in entrance is 36 ft. Depth of water alongside is 31 ft. Swinging basin width 1,000 ft.
MAX. SIZE: Max. LOA 185 m., max. draft 31 ft.
TUGS: Available.
BERTHING: 1,150 ft. of dockside accommodation.
FRESH WATER: Not available.
FUEL: Can be supplied.
AUTHORITY: See "Oranjestad".

BONAIRE TERMINAL (Brasil): 12.13 N. 68.23 W. (See Plan)

OPERATORS: Bonaire Petroleum Corporation N.V. Terminal is capable of handling all types of crude oil and heavy oils (bunker C and residual fuels). Heated and non-heated storage tanks are available for storage, blending and transhipment.
LOCATION: No. 1 Jetty is situated on the South coast of the Northern portion of the Island of Bonaire in Lat. 12° 13′ 12.9″ N., Long. 68° 23′ 17.2″ W.
DOCUMENTS:

5 Crew Lists.
2 Stores List.
2 Lists of Personal Effects of Crew.
5 Medicine and Drugs Lists.
1 Vaccination List.

PILOTAGE: Compulsory. The Pilot-Berthing Master will board the vessel at the established arrival point in Lat. 12° 10′ N., Long. 68° 25′ W., which is 2.5 miles, 235° True from No. 1 Jetty.

The Pilot will embark from one of the tugs or launches assigned to assist the vessel in the berthing operation. The Pilot will assist the Master in every way possible to manoeuvre the vessel from the arrival point into the berth with the assistance of 2, or in case of a VLCC/ULCC 3 to 4 tugs and utilising the services of 1 mooring launch to run mooring lines from the vessel to the mooring dolphins.

ANCHORAGE: There is no anchorage area at Bonaire for tankers; therefore, if the berth is occupied, vessels will be appropriately instructed to remain within radio/telephone (VHF Channels 16 and 13) radius pending advice with respect to a clear berth or other advices.

NAVIGATION: Navigable waters surrounding Bonaire Island are clear; however, the coasts of the Island are steep-to and should be avoided. The currents in the offing and off the points of the Island set Westward. On days with little wind a weak current sets to the Westward, generally parallel with the coast from Kralendijk Roads toward Wekoewa Point and parallel to the coast line in way of the jetty. It is urged that reference be made to the British Admiralty South American Pilot Volume V or United States HO Pub. 22 Sailing Directions for the West Indies Volume II or equivalent publication of the Netherlands Government.

Lacre Point, on which a light is shown, is at the Southern extremity of Bonaire. A light is situated on Boca Spelonk, the Eastern mid-point of the Island. Seroe Bentana Light, situated near the Northern extremity of the Island, is visible for approach from the N.E. through N.W. South of 250°/070° on the West side of the Northern end of the Island this light is obscured and then jetty lights and Radio Netherland Towers may be used for bearings.

Prevailing winds are the E.N.E. trade winds.

HAZARD ZONE: *Radio Transmitting Installation:* Vessels approaching Bonaire should remain clear of an area within a radius of 3 nautical miles from the Radio Netherlands Towers situated on the Island of Bonaire in Lat. 12° 13′ N., Long. 68° 19′ 15″ W. This area is noted as a danger area due to strong radiation from the powerful radio transmitters on shore. Bonaire Terminal is situated sufficiently West of this area to be well clear of any radio radiation influence.

HEALTH: There are no health formalities.

RADIO: When a vessel leaves its loading port, the shipper should advise the date of anticipated arrival at Bonaire. For vessels departing from remote loading ports, the estimated arrival date should be revised at least once each week while the vessel is en route.

A government wireless/telegraph station operates daily from 0700 to 2130 hrs. local time (1100 to 0130 hrs. GMT). Vessels bound for Bonaire should route their messages for Bonaire through Curacao Radio (PJC).

Arrival Advice: The Master should advise his estimated time of arrival not less than 72 hours in advance, again 48 hours in advance and again 24 hours prior to arrival, and this last message should be revised if an unusual change in the ETA should occur. Wireless telegraph messages of this nature must be sent to the ship's Agent who, in turn, will immediately relay the information to the Terminal Management.

Tankers from Mediterranean, Africa and Middle East should give ETAs 10 and 5 days as well as 72, 48 and 24 hours.

The text of any one of the arrival advices should contain the following data in addition to the declared time of arrival:

1. Draft of vessel, fore and aft.
2. Available fittings, i.e. number and diameter of connections at deck manifold system for prompt connecting of 2×24 in. and/or 2×12 in. steel swivel loading arms.
3. Any conditions which may affect loading or unloading operations.
4. Any unusual condition which may require abnormal attention prior to berthing.
5. Quantity of ballast and estimated time of deballasting.

VHF: International VHF Maritime Band Communication should be commenced within a radius of 30 miles from the Terminal, or more, if possible. The Terminal may be called on International VHF Channel 16 (156.800 MHz). When radio/telephone contact with the Terminal has been established, communication should then be shifted to Channel 13 (156.650 MHz).

After initial radio/telephone contact has been established, radio/telephone communication with the Terminal will remain on Channel 13. This will include communication with the 2 tugs and the 2 mooring launches on standby, all of which will be available to assist the vessel into the berth.

Mooring, Unmooring VHF Communication: Communication on Channel 13 during the immediate approach and mooring procedure will be confined rigidly to berthing operations which includes all directives from the Berthing Master to the tugs, the mooring launches and the jetty. The only messages which may interfere with these communications will be those caused by an extreme emergency.

After the vessel has been secured in the berth and the Berthing Master has cleared all berthing operations, communication on VHF Channel 13 will be secured and all base VHF receivers will be returned to guard Channel 16 pending an emergency or when the Berthing Master resumes his function for a departing vessel. It is to be noted that hand radio/telephone sets transmit and receive only on Channel 13. The base sets in the Terminal Office (Control Room) and on each of the tugs and launches is equipped with radio/telephone equipment for transmitting and receiving on Channels 16 and/or 13.

Radio/Telephone UHF (Private Frequency): Communication between the platform and the vessel and the Terminal before, during and after transfer of product will be via portable intrinsically safe, hand carried, radio/telephones supplied by the shore on a private UHF frequency.

Radio/Telephone VHF Resume Use Departing: When the vessel is ready to depart and the Berthing Master has boarded and resumes his function, VHF radio/telephone communication will again be established on International Maritime Channel 13 between the vessel's bridge, the 2 or 3 tugs, the mooring launches and the jetty, so that the casting off operation may be properly accomplished.

Radio Telephone – Guard Call Channel 16: After the Berthing Master disembarks and the tugs are dismissed, and the vessel has departed full away, it is expected the vessel will resume a guard watch on Channel 16. The terminal station may be called on Channel 16 and/or 13.

Radio Repairs: A Radio Holland Service Engineer available and can be arranged through the Agent.

TUGS: Tug assistance is compulsory. Mooring launch is available.

Normally 2 tugs are used for ships up to 150,000 d.w.t., from 150,000 to 350,000 d.w.t. 3 tugs, and above 350,000 d.w.t. 4 tugs will be used for docking.

When 2 tugs are used both will make fast on the port side main deck fore and aft; using tugs' lines. In case of VLCC or ULCC whereby 3 or 4 tugs are required, the Pilot determines the position where the tugs are to make fast. When sailing only 2 tugs can be used under normal weather conditions.

CUSTOMS/IMMIGRATION: When the vessel is secure in the berth and the gangway is landed on deck, the Immigration Officer, the Customs Officer and the Agent will board to attend formal entry of the vessel. The Immigration Officer may act on behalf of the Quarantine Service.

Immigration: Two copies of the crew list are to be ready for presentation to the Immigration Officer. Crew List is to be delivered to the Terminal Gate for Security Control, therefore no Gate Passes are required.

Customs: The Customs Officer will require 1 Crew List, 1 Stores List, 1 List of Personal Effects for those crew men leaving the vessel at Bonaire and 1 List of all Medicines and Drugs. The Customs Officer with the assistance of the ship's Agent will prepare the Inward Clearance document. This document is to be signed by the Master. Upon completion of the above formalities, the vessel is declared free and shore leave may be granted.

BERTHING: Berth No. 1: Max. size vessels 500,000 d.w.t. on full draft and no restrictions for length and beam. Depth of water 97 ft.

Minimum size vessels approximately 25,000 d.w.t. due to distance between the Inner Breasting Dolphins Nos. BD2 and BD3.

Mooring Facilities: Berth No. 1 consists of an operating platform 132 ft. 10 in. (40.48 m.) long facing the sea and 94 ft. (28.65 m.) wide toward the shore with 2×24 in. and 16 in. swivel jointed steel loading arms for the transfer of petroleum products. Loading arms are equipped with hydraulic quick couplings and will fit on all standard ASA/DIN flanges. The 24 in. loading arms are constructed to fit on 16 in., 18 in. and 24 in. ship connections and the 16 in. loading arms are constructed to fit on 10 in., 12 in., 14 in. and 16 in. ship connections. The waterfront side of the platform is 22 ft. 3 in. (6.787 m.) inside and away from the ship's side.

Breasting Dolphins: There are 6 breasting dolphins, 4 of which are designed for the vessel to rest against and to which forward and back spring lines are to be secured to heavy quick-release mooring hooks. At each end of the system of breasting dolphins there is 1 landing dolphin offset to allow a vessel 5° off the parallel line to land against the berth system. These are noted "a" for the offset dolphin and the main dolphin is noted "b". The dolphins are numbered from No. BD1a and BD1b in the West and through BD2, BD3 and BD4 and BD4a to the East. The centre line of the berthing facility is 17 ft. 5 in. (5.3 m.) East of the centre line of the operating platform. This point is well marked on the seaward panel of the platform with a 4 in. wide white reflecting vertical stripe. BD2 and BD3 are each 135 ft. (41.148 m.) West and East of this white vertical stripe. BD1b is 80 ft. (24.4 m.) further West from BD2 and BD4 is 119 ft. (36.4 m.) further East from BD3.

Mooring Dolphins: Inshore 215 ft. (65.532 m.) perpendicular from the berthing line are 6 mooring dolphins. These dolphins are numbered from MD1 in the West to MD6 in the East, MD3 and MD4 are each 350 ft.

(106.680 m.) West and East from the centre line of the mooring structure system noted by the white vertical stripe on the seaward face of the operating platform. MD2 and MD5 are each 250 ft. (76.200 m.) West and East respectively, from MD3 and MD4. MD1 and MD6 are each again 250 ft. (76.200 m.) West and East respectively, from MD2 and MD5.

Berth No. 2: Max. size vessels 150,000 d.w.t. with limited ballast or cargo quantity on board, down to 90,000 d.w.t. fully loaded. Max. depth of water on mooring line is 49 ft. 6 in. (Ship's Master reported depth as 51 ft. 6 in. in May 1987).

Minimum size vessels approximately 25,000 d.w.t. due to distance between the Inner Breasting Dolphin Nos. BD2 and BD3.

Mooring Facilities: Berth No. 2 consists of a triangular platform 49 ft. (14.94 m.) long, facing the sea and 42 ft. 6 in. (12.95 m.) wide towards the shore with 3×12 in. swivel jointed steel loading arms for the transfer of petroleum products. The waterfront side is 11 ft. 6 in. inside and away from the ship's side. All loading arms are equipped with hydraulic quick couplings and will fit on all standard ASA/DIN flanges of 10 in., 12 in., 14 in. and 16 in. on ship's manifold.

Breasting Dolphins: There are 4 breasting dolphins for the vessel to rest against and to which forward and back springs are to be secured to heavy quick-release mooring hooks. The dolphins are numbered BD1 and BD2 on the West side of the platform and BD3 and BD4 on the East side. BD2 is located 139 ft. 4 in. (42.5 m.) West of the centre line of the platform and BD3 is located 123 ft. (37.5 m.) East of the centre line. BD1 and BD4 are each 5.7 m. further West and East respectively from BD2 and BD3.

Mooring Dolphins: Inshore, 164 ft. perpendicular from the berthing line are 3 mooring dolphins of which 2 are on the East side and 1 on the West side to handle respectively the head and stern lines. These dolphins are numbered MD1, MD2 and MD3 from West to East. MD1 is 328 ft. (100 m.) West of the centre line of the operating platform. MD2 is 328 ft. (100 m.) East of the centre line of the operating platform, MD3 is 262 ft. (80 m.) East of MD2.

GENERAL INFORMATION APPLICABLE FOR BOTH JETTIES:

Capstans: On each of the breasting and mooring dolphins there is a small capstan with sufficient power to heave up on to the deck of the dolphin a ship's mooring line for securing to the heavy quick-release hooks.

Mooring Lines: Prior to coming alongside, the vessel must have all mooring lines on station and available on that side which will be to the berth (normally port side to). Bearing in mind that the product transfer is via steel swivel loading arms, it is imperative that the forward and back spring lines be adequate to maintain a minimum fore and aft motion of the vessel to remain within the limitation of the envelope of loading arms.

Spring, Breasting, Head and Sternlines: The first lines lead out are headlines to the mooring dolphin, immediately followed by the forward and back springs to the breasting dolphins. Hereafter respectively the forward and after breasting lines are lead out to the appropriate mooring dolphins and finally the sternlines to the mooring dolphin. The procedure may be altered in accord with physical equipment on the ship, weather and sea conditions, along with other circumstances, all subject to the Berthing Master's requirements and combined approval of the Master and terminal management.

Mixed Mooring Lines Prohibited: Mixed moorings are prohibited, i.e. a wire and a fibre rope in parallel service is undesirable due to unequal elasticity. All mooring lines must be so arranged that loss of effect cannot occur when slacking off or heaving in one line, as required, due to the rise or lowering of the vessel during discharge or loading of cargo.

Mooring Machinery – Deck Winches: All deck machinery used for the heaving in and control of mooring lines must be operable. A vessel having deck machinery in poor state of maintenance to that point where mooring lines cannot be hove tight or brakes that tend to slip under tension will be sufficient reason to require consideration of terminal management to refuse connecting of the steel loading arms, or if same are already connected and the mooring lines become insecure, all transfer of product will be stopped and the steel loading arms disconnected pending correction of the mooring situation.

Surge-Tension Controls Prohibited: Wire mooring lines not on winch drums are not to be used for spring lines. Mooring wires secured on surge and tension controlled winches are prohibited. All mooring lines must be secured positively, i.e. on winch drums with the brake properly drawn tight or properly secured on bitts.

Power to Deck Machinery: At no time during the period the vessel is in berth is the power to operate deck machinery to be shut off.

Motion of Vessel in Berth: The vessel, while loading arms are connected, must not be permitted any motion alongside or away from its proper position in berth.

Surveillance of Mooring Lines: Mooring lines must remain under constant surveillance during unloading and loading operations. Failure to ease tension on mooring lines during unloading or failure to maintain proper tension on mooring lines while loading will be sufficient reason to stop transfer of product.

Fire Warp – Emergency Towing Wire: After the vessel is all fast fore and aft, an emergency wire of suitable quality and strength to tow the vessel should be positioned on the offshore bow and the after offshore quarter of the ship. This towing wire should be secured so that the eye may be readily picked up by a towing vessel. It is required that the length of the wire hawser should be not less than one-half again that of the highest freeboard of the vessel at the point of its location on the ship where the ship end is well fast on bitts.

EMERGENCY SIGNAL: In the event of any form of emergency such as fire, bursting of transfer piping, Operating Platform emergency signal will be an intermittent signal on the general alarm system for not less than 15 seconds. Since a shore radio is supplied to the vessel for proper communication, this radio must be used in the event of an emergency to inform the Loading Master. The vessel will use its own emergency signals in the event of any emergency on board.

To co-ordinate any emergency procedure, the personnel on the Operating Platform must be advised of the vessel's emergency signals.

In the event of any emergency either on board the vessel or the operating platform all oil transfer must be stopped and all oil transfer valves closed.

LOADING: *Electric Bond – Earthing:* Prior to manoeuvring the loading/unloading steel mechanical loading arms toward the vessel from the Operating Platform, the electric bond wire must be connected to a clean metal contact on the vessel in the area of the manifold.

The electric bond wire shall not be disconnected until the loading/unloading mechanical arms have been disconnected and manoeuvred well clear of the vessel.

The flame proof switch on the jetty will remain open until the electric bond wire has been connected to the ship. Prior to disconnecting the electric bond wire from the ship, the flame proof switch on the jetty will have been opened.

Connection to Oil Transfer Piping System: On both jetties there are steel pipe swivel jointed loading/unloading arms. (See also "Berthing").

This equipment is controlled either from the deck of the Operating Platform or from the ship's deck by using a remote control panel. Connections of the fittings requires clean flat faced flanges on the vessel's manifold, using a O-ring gasket, to ensure a secure tight connection.

Cargo and Ballast Transfer: Before transfer of cargo or ballast may be started, the Chief Officer and the Terminal Representative will ensure that all necessary controls and safety measures have been attended. A Declaration of Inspection is to be signed by a responsible Ship's Officer and the Terminal representative certifying that all precautionary measures have been taken, that all equipment used in the transfer operation is in proper order and that all concerned are in agreement on the proper procedure of the operation.

Discharge of Cargo: Upon advice from the Terminal Loading Master to the Ship's Officer in charge that oil transfer may be started, the Officer will arrange for the initial flow to be slow with sufficient pressure to permit inspection of all transfer piping and connections for any leakage. When the terminal personnel advise they are receiving product, the flow may be increased to the rate agreed upon.

Completion of Cargo Discharge: After all cargo tanks have been drained and the pumps have lost suction and the discharge of cargo has been declared finished, the flow of product will have stopped. With the agreement between the Ship's Officer and the Terminal Marine Supervisor, the oil transfer valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipe-line system does not allow the complete draining of the unloading arm, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel !* After the arms have been completely drained, they may be disconnected and the ends blanked off to prevent any drippage of oil.

Loading of Cargo: Upon advice from the Ship's Officer in charge that oil transfer may be started, the Terminal Loading Master will arrange for the initial flow of product into the vessel. When the Ship's Officer advises that he is satisfied that product is flowing in accord with the loading programme, he will advise the terminal personnel and the flow will be increased to the rate agreed upon.

Communication, Audible, Visual: Constant contact with the personnel on the Operating Platform during the topping off procedure is mandatory ! The rate of flow of product is to be adjusted to that point where complete control is constant and that in the event of an emergency immediate shut down will not create any pressure surge on the shore transfer piping.

Topping Off of Cargo Tanks: Every precaution must be observed to avoid over-filling of any tank or causing any listing of the vessel. Observance of the trim by the stern shall be constant to avoid any undue strain upon the vessel's longitudinal structure. The cargo tanks and pipe-lines thereto on most tankers are segregated into groups. One tank in each group should be selected for the overflow relief tank by maintaining the level of liquid considerably lower than the other filling tanks to permit prompt relief of that tank reaching an overfilled level.

Completion of Loading: After all cargo has been loaded all product remaining in the loading arms will be drained into the vessel. If the vessel's pipe-line system does not permit complete draining of the loading arms, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel !* After the arms have been drained they may be disconnected and the ends blanked off to prevent any drippage of oil.

CRUDE OIL WASHING: Crude Oil Washing (C.O.W.) must be requested before arrival to obtain approval of the Terminal Manager.

It is the terminal's intention to allow vessels to C.O.W. at the terminal. However, the vessel must strictly adhere to the International Safety Guide for Oil Tankers and Terminals Guidelines pertaining to C.O.W. procedures and a terminal representative will check the procedure before and during the C.O.W.

BALLAST: *Ballast Loading:* Should the vessel have permanent ballast tanks with entirely separate pipe-lines and ballast transfer system sea water ballast may be loaded in accord with the Master's requirements.

Sea water ballast is not to be loaded into any cargo tanks or through any oil transfer system while there is any cargo on board the vessel. In the event of an emergency, special arrangements must be agreed upon with the terminal management for the loading of ballast into any cargo tanks before all of the cargo has been completely discharged.

The vessel's Senior Officer in charge will personally supervise the arrangement of the pumproom system for the ballasting operation. The Public Cargo Inspector will accompany the Officer into the pumproom to break the seals on the sea suction valves.

No sea suction valve may be opened until all down coming pipe-lines have been drained and are completely free of product and the down coming valve closed. In most instances the pumps should be operating just prior to opening the sea suction valve.

Ballast loading will be under the entire control of the ship's personnel and it is expected that all normal loading precautions will be observed.

Deballasting: En route to Bonaire the vessel should have thoroughly cleaned certain appropriate tanks for the containment of clean ballast for discharge overboard. Only dirty ballast (oil contaminated sea water) and tank cleaning slops are to be discharged into the terminal's ballast receiving system.

Ballast, Oily Water, Discharge: Under no circumstances will dirty ballast water be discharged overboard within a radius of 50 miles from any Netherlands Antilles Island.

Ballast Discharge to Shore: After the steel loading arm to be used has been connected to the ship's manifold, the discharge of ballast water will be accomplished in the same manner as the discharge of cargo.

Tank Bottoms and Slops: Upon completion of the deballasting operation, all of the vessel's tanks will be inspected and approved for the reception of cargo. The sea suction valves will then be sealed in the closed position by the public inspector or by a Bonaire Petroleum Corporation N.V. representative. Any bottoms and slops remaining must have the approval of terminal management prior to "loading on top".

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master for crew members requiring medical or dental attention.

In the case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign authorisation guaranteeing expense of attention rendered and repatriation.

FRESH WATER: Fresh water on Bonaire is desalinised sea water and the supply is minimal, but available. 72 hours' notice is requested and maximum 100 tons can be supplied.

FUEL: Bunkers for steam propelled tankers are available.

Bunker Transfer: During the period of time the vessel is in berth, the transfer of bunkers from one tank to another is prohibited. All bunkers to be consumed while in port must be available in that tank from which bunkers are normally consumed.

Fuel: Marine gasoil is available in small quantities from a shore storage tank. Limited Luboil available and supplied in drums. Water and fuel oil chemical treatment is available in drums by Drew Chemical.

REPAIRS: There are no repair facilities on the Island of Bonaire. Upon sufficient advance notice, special service personnel and minor mechanical repair work may be arranged from Curacao. Transportation for such service personnel is via scheduled airline.

POLICE/AMBULANCE/FIRE: Tel. 8000 via Terminal's Control Room or Office.

CARGO INSPECTION: Along with the Government Boarding Officers the representative of the petroleum inspecting organization mutually engaged by the Shipper and Bonaire Petroleum Corporation N.V. will board the vessel for the purpose of gauging the cargo tanks, obtaining the temperature of the cargo and obtaining required samples. His function is to protect the interest of the vessel as well as the Shipper and the consignee. Every assistance is to be rendered to expedite his function on board the vessel. An Officer should accompany the Inspector while on board and should assist by making available all information requested such as cargo tank calibration tables, etc. Cargo transfer may not be commenced without the approval of the Inspector.

Completion of Discharge of Cargo – Inspection: Upon completion of discharge of the cargo, the Inspector will examine all of the cargo tanks and will sign the tank inspection certificate.

Loading Cargo, Inspection: In the case of a vessel arriving to load cargo, the Inspector will examine all of the cargo tanks to determine the condition of the cargo tanks for reception of the cargo. Upon completion of loading all of the cargo, the Inspector will gauge the cargo tanks, take temperatures and samples as required.

Incomplete or Part Cargo: In the event the vessel does not complete the discharge of cargo, or does not load a full cargo, the Inspector will board the vessel to gauge the cargo tanks to record the amount of cargo in the vessel after transfer operations have been completed.

Cargo Pumproom Sea Suctions: Prior to loading or unloading the Public Inspector will certify that the sea suction valves connected to the vessel's oil transfer system are closed, lashed and sealed. *Do not lock these valves under any circumstances.* These valves are to be sealed in the *Closed* position and sufficiently lashed so they may not open due to vibration or any other reason.

STORES/PROVISIONS/LAUNDRY: All stores and provisions are available. There are no deck and engine stores available. Upon sufficient advance notice, all items not available on Bonaire may be obtained from Curacao.

Laundry service may be arranged through the ship's Agent and available for unlimited quantities. Advance notice required.

DEVELOPMENTS: The process unit is in operation and unit capable for heavy crude processing, residual oil processing, MDO processing, distillate correction and emulsion breaking.

SHIPMASTER'S REPORT: 1977. *In his report the Master called the port – "Brasil".*

Documents:

5 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
1 Vaccination List.

Immigration Officer acts on behalf of Quarantine service. State of health on board to be given in 72 hour ETA message.

Services: Fresh water by truck from Kralendijk and very expensive. Very limited quantities of shipchandlery supplies. No deck or engine stores. Gas oil limited and by drums only. Bunker "C" only. Lube oil limited to some brands and limited supply by drums. Water and fuel oil chemical treatment available. Radio Holland Service Engineer available. Repair men can be flown in from Curacao. Very limited laundry service. If required at least 4 days' notice advisable. Tankers from Mediterranean, Africa and Gulf should give ETAs 10 and 5 days as well as 72/48/24 hours, any of which to give arrival draft F & A, number and diameter of connections, any condition affecting loading or discharging, ballast quantity, clean or otherwise and slops quantity, Pilot advised that 10 days longest, so far, that vessel waited off for berth. Have adequate fresh water on board for this contingency.

Berthing: No. 1 Jetty: Least depth alongside 110 ft. Loading/discharging Chiksans 2×24 in. and 2×12 in.

Max. Size 500,000 d.w.t.

No. 2 Jetty: Least depth alongside 60 ft. Loading/Discharging Chicksans 3×12 in. Max. size 80,000 d.w.t. Product handled: Crude. Max. pressure; 125 p.s.i.

VHF contact with BOPEC on Channel 16 at 25 miles, then stand-by on Channel 13 for instructions. On berth VHF supplied to maintain shore contact with control who pass messages to Agent at Kralendijk.

Immobilising of engines or transfer of bunkers not permitted on berth. Port side alongside always.

SHIPMASTER'S REPORT: May, 1979.

Documents: Immigration require 2 Crew Lists on IMO forms. One additional Crew List to be supplied to Agent and another to the security gate also required are 2 Personal Effects Lists and 3 Stores Lists.

Pilotage: The Pilot requires a combination of accommodation ladder and pilot ladder. He will not use the pilot hoist.

Berthing: For vessels of about 140,000 d.w.t. 2 tugs are used, 1 each at the fore and aft ends of the main deck. Each tug supplies 2 lines.

When unberthing the tugs push and do not make fast.

Tankers of 250,000 d.w.t. use 3 tugs.

Moorings: 3 head lines are passed ashore first, followed by 2 breast lines and 2 forward springs. At the after end 2 spring lines are passed ashore first followed by 2 breast lines and finally 3 stern lines. Only one mooring boat is used and he passes forward shore lines ashore first.

SHIPMASTER'S REPORT: February, 1980.

Documents: 3 Crew Lists for Agent and 2 for Immigration.

Pilotage: Pilot requires accommodation ladder (usually starboard side) when disembarking for VLCCs.

Tankers: Crude oil washing permitted only for tanks which will be used for ballast.

Shore Leave: Passes not required.

AUTHORITY: Bonaire Petroleum Corporation N.V., Bopec Building, P.O.Box 117, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 8177 (Terminal). *Telex:* 1284 (Terminal). *FAX:* 8266. *Contact:* Mr. Edgar C. Jimenez, General Manager.

BULLEN BAY, Curacao: 12.11 N. 69.01 W. (See Plan)

LOCATION: Bullen Bay is an open bay on the South coast of Curacao, 8 miles N.W. of Willemstad.

DOCUMENTS: Documents and all General information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the Bay. Ships arriving and leaving are piloted by government Pilots supplied from Willemstad.

Pilot Station: 1 mile S.W. of Cape St. Marie (that is the cape on the West side of Bullen Bay).

Communications: Ships destined for Bullen Bay are to inform Traffic Control at Willemstad (call "Fort Nassau" on VHF Channel 16) and also Isla Terminal at Bullen Bay (VHF Channel 11) of their approach. The Pilots at Bullen Bay operate on VHF Channel 9.

ANCHORAGE: There is no anchorage in the bay. Ships that have to wait for berth are to remain in the vicinity within VHF radio range.

MAX. SIZE:

Jetty No.	*Max. LOA* (ft.)	*Max. Draft* (ft.)
1	1,120	69
2	850	40-42
3	900	56
4	1,350	94
5	900	63
6	No limit	94

TUGS: Compulsory. There are 2 tugs of 3,852 h.p. with 53 tons and 60 tons bollard pull stationed at Bullen Bay. 2 tugs will assist the tankers on their arrival and departure. 3 tugs will assist the VLCCs on their arrival and 2 tugs will assist on their departure.

BERTHING: The terminal located at Bullen Bay facilitates economical trans-shipment of Eastern hemisphere crude arriving in very large crude carriers (VLCCs) for storage and on-carriage in smaller ships to draft restricted U.S. ports.

Jetties: Ships moor port side alongside.

Tanker jetties from East to West:
No. 1: 250,000 d.w.t. 4×12 in. connections, heading 196°
No. 2: 70,000 d.w.t. 4×12 in. connections, heading 176°
No. 3: 100,000 d.w.t. 4×12 in. connections, heading 148°
No. 4: 530,000 d.w.t. 4×16 in. connections, heading 128°
No. 5: 100,000 d.w.t. 4×12 in. connections, heading 127°
No. 6: 530,000 d.w.t. 4×16 in. connections, heading 125°

The tugboat jetty is located between Jetties No. 2 and 3.

Total tank capacity: 17,750,000 barrels.
1 – 1,000,000 barrels capacity – 1,000,000
16 – 750,000 barrels capacity – 12,000,000
6 – 375,000 barrels capacity – 2,250,000
38 – small tanks capacity – 2,500,000

Pipe-lines: Main track consists of 5 strings of 36 in. pipe. The jetties carry 2 strings of 36 in. pipe in a loop. The loading rate is up to 12,000 t.p.h. Tankers' discharge rate is up to 25,000 t.p.h.

Deballasting: Capacity 4,000 t.p.h. per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

Throughput:

Transhipment	1,200,000 barrels per day
Refinery import	250,000 barrels per day

Operator: Refineria Isla (Curacao) S.A., P.O.Box 3843, Emmastad, Curacao, N.A. Tel: 662700. Telex: 1441, 1442, 3400 ISLA NA. Fax: 662588.

FRESH WATER: Fresh water available at the piers.

FUEL: Bunker facilities for all grades are available at a rate of 3,800 bbls.p.h.

NAVIGATIONAL AIDS: There is a leading range of 043° True bearing on the West side of the bay for ships entering the bay, running 851 m. (approx. 4.5 cables) clear of the shore near Cape St. Marie, with red daymarks and a green and (yellowish) red light at night.

SHIPMASTER'S REPORT: February 1979.

Restrictions: Crude oil washing permitted subject to notice below. Tank wash piping must be tested before arrival and oxygen metres calibrated.

Health: As for U.S.A.

VHF: Channel 9 to give Notice of Readiness and for berthing with Pilot and tugs. Call Agent on Channel 25.

Berthing: Shore gangway at 2 largest berths.

Notice No. 1: Issued by Isla Curacao S.A.

Crude Oil Washing

Only tankers equipped with a well constructed inert gas installation and provided with fixed tank washing machines connected to the tank wash piping system by means of fixed steel piping may crude wash cargo tanks under the following conditions:

1. Oxygen content in cargo tank may not exceed 5% (*metres calibrated*).
2. Minimum inert gas pressure of 200 mm. water gauge must be maintained in the cargo tanks.
3. Continuous supervision by a specifically appointed and experienced operator is mandatory.
4. The "in-line" O_2 analyser must be arranged to allow for calibration during inert gas operation.
5. The hydrants of the tankwash piping must be equipped with screwed-on heads.
6. Tankwash piping must be tested for tightness.
7. Exceed of discharge time will be for ship's account.

For each "crude washing" a request for cleaning must be submitted to the Head of Operations of Isla.

Please sign for receipt: Isla Curacao S.A.

Signed........................

Master

Operation Manager

Notice No. 2: Issued by N.V. Curacaosche Scheepvaart Maatschappij. Emmastad, Curacao, N.A.

CUSTOMS REGULATIONS
BONDED STORES

In connection with revised Customs Regulations for the ports of Curacao, we draw your attention to the following:

1. All stores on board of vessel on arrival, also personal effects, must be declared to Customs Officials when clearing in vessel.
2. While ship is in port, Customs Officials may seal bonded stores, e.g. beer, wine, spirits, cigarettes and tobacco.

   When sealing bonded stores, permission may be granted by the Customs Officials, to take out a certain amount of these stores, from the bonded store-room, before sealing the store-room.
3. Stores on board, which are *not* sealed by the Customs Officials, may be used on board vessels, but may not be taken ashore without permission of Customs.
4. All stores ordered in bond at the port of Curacao, MUST REMAIN UNBROACHED, until departure of vessel from Curacao, and it is more likely than not, that Customs Officials will board before departure for control. If bonded stores are found opened up, or missing, Customs will charge import duties, whilst the possibility exists that the ship may be fined for such breach of law.

SHIPMASTER'S REPORT: December, 1982.

Customs require one Narcotics List and will seal beer store if it contains more than 100 cases of beer.

If vessel requires to use shore crane for stores, etc., written permission must be obtained. This permission is supplied by Loading Master.

AUTHORITY: Harbour Master of Curacao. See "Willemstad".

AGENT: See "Willemstad".

CARACAS BAY, Curacao: 12.04 N. 68.52 W.

The port is temporarily out of operation and will no longer be used as an oil terminal.

LOCATION: Caracas Bay is an open bay on the South coast of Curacao, 5 miles S.E. of Willemstad.

DOCUMENTS: Documents and all general informations, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the bay. Ships at Caracas Bay are piloted by government Pilots supplied from Willemstad.

Pilot station: 1 mile SW of Lijhoek (that is the cape on the West side of Caracas Bay).

ANCHORAGE: There is no anchorage in the bay.

MAX. SIZE: Vessels with a max. overall length of 1,050 ft. and max. draft of 45 ft. can be accommodated. Max. displacement 100,000 tons.

VHF: Ships destined for Caracas Bay are to inform Traffic Control at Willemstad (call "Fort Nassau" on VHF Channel 16) of their approach. There is no VHF radio station at Caracas Bay.

TUGS: Tugboats operate from Willemstad. Tug assistance only for ships arriving. Tugs are automatically provided:

1 tug for cargo and passenger ships exceeding 16,000 g.r.t. and 600 ft. length.

2 tugs for cargo and passenger ships exceeding 30,000 g.r.t.

Ships leave without tug assistance.

BERTHING: 2 piers are at the East side of the bay, naturally protected from prevailing wind and sea, with depths up to 47 ft. alongside. Vessels dock directly with their port side along the piers.

Pier No. 2, with a depth alongside of 46 ft., and Pier No. 3, with a depth alongside of 46 ft., are concrete piers/quays, modern and equipped for handling oil in bulk, with enough platform to serve also as passenger terminal. The largest cruise ships moor along these piers regularly.

The oil is transported through pipe-lines from the refinery at Emmastad to the storage tanks at Caracas Bay. 2 ships can bunker simultaneously. Electrically-driven centrifugal pumps, metering and blending equipment at the bay reduce bunkering time. Subject only to the capacity of ships receiving connections, loading rates up to 2,000 t.p.h. of bunker oil can readily be achieved.

STEVEDORES: Lighters and longshoremen are supplied from Willemstad.

FRESH WATER: Fresh water can be obtained via pipe-line on the wharves.

FUEL: The piers are built as oil piers, modern and equipped to supply any kind of bunker or lubricating oil to any vessel.

REPAIRS: Small repairs can be done at the bay through working barges alongside.

GENERAL: Clearance, port administration, port charges and regulations are the same as at Willemstad.

SHIPMASTER'S REPORT: March 1986. Vessel 95,000 d.w.t.

Pilots usually request access on port side (due prevailing wind) but will accept starboard side if given a good lee. Pilot boards from tug which then makes fast through centre lead forward. As vessel gets into the bay a second tug makes fast on the main deck forward, then first tug lets go and makes fast starboard main deck aft. Tugs lines used.

Berth is not designed for vessels over 800 ft. in length. Forward moorings: 3 headlines, 2 springs, 2 breasts in that order. Aft moorings: 2 springs, 2 breasts, 3 stern lines in that order. Only 1 mooring boat was available so forward end was made fast first. Shore gangway used and shore passes required. Fresh water is available U.S.$6.00/ton. No dirty ballast facilities. Trade wind normally prevails but is liable to change during hurricane season.

AUTHORITY: Curacao Port Authority, N.V., Werf de Wilde Z/N, P.O.Box 689, Willemstad, Curacao, Netherlands Antilles. *Tel:* (9) 611133, 614422. *Telex:* 3339 Curpa Na. *FAX:* 613907. *Contact:* Mr. E. Voges, Managing Director. Captain R.F.Frankel, Harbour Master.

FUIKBAY, Curacao: 12.03 N. 68.50 W.

LOCATION: Fuikbay, on the South coast of Curacao, 7 miles S.E. of Willemstad, is an inland bay with a 147 ft. wide navigable entrance. The depth of this harbour is 26 ft.

DOCUMENTS: Documents and general information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory.

ANCHORAGE: There is an anchorage area in the West side of the bay.

RESTRICTIONS: As a rule vessels only enter this port during daylight. Sailing can take place day and night.

MAX. SIZE: Vessels can enter and leave with a max. draft of 24 ft. and a max. length of 360 ft.

BERTHING: This bay is mainly used as a loading terminal of the "Mining Company Curacao" for export of phosphate rock mined out of the "Tafelberg".

There is one berth under the conveyor which transports the phosphate rocks from shore into the holds of the vessel alongside. Depth alongside is 28 ft.

There is also a 84 ft. berth available for handling explosives or other cargo, usually named Westwerf. Only small vessels with a max. draft of 12 ft. can come alongside. Vessels with a greater draft can moor with the help of floats between ship and quay.

The piers are privately owned by "Mining Company Curacao" situated on private territory of this company.

FUEL: This port has no bunker facilities, so vessels bound for this port must take bunkers in Caracas Bay or Willemstad before or after calling at this port if bunkers are desired.

GENERAL: Other services such as tugboats, repairs, power, etc. are rendered from Willemstad. 5 ton mobile crane available.

AUTHORITY: Curacao Port Authority N.V., Werf de Wilde, P.O.Box 689, Willemstad, Curacao, Netherlands Antilles. *Tel:* (9) 611133, 614422. *Telex:* 3339 Curpa Na. *FAX:* 613907. *Contact:* Mr. E. Voges, Managing Director.

KRALENDIJK, (including Salina) Bonaire:
12.09 N. 68.17 W. **(See Plan)**

PORT LIMITS: Within 3 miles of the Port.

DOCUMENTS:

	Customs	*Immigration*	*Agent*
Passenger List	1	2	2
Crew List	1	2	2
Personal Effects List of Crew	1		
Stores List	1		
Curio List	1		

PILOTAGE: Pilot service is compulsory. Pilot meets vessels 0.75 miles S.W. of the berths. Pilot boat flies "H" flag by day and red over white light at night. The pilot boat is either a small tugboat or a fast speed GRP boat, orange hull, white superstructure with words "Pilot" on both sides.

ANCHORAGES: Unlimited. Depth 30 ft. and over.

RESTRICTIONS: Notify the Agent at least 24 hours in advance. No tide.

MAX. SIZE: Length 1,050 ft., also see "Berthing".

INWARD CLEARANCE: Inward Clearance is effected on board immediately on docking. Immigration Officer arrives on board immediately after docking. Passengers disembarking at Bonaire must present themselves for documents check.

Customs Officer boards immediately after docking and together with a representative of the Agency's Shipping Department the inward clearance document of the vessel (in ballast or with cargo in transit, as the case may be) is prepared and signed. This document must be signed by the Master. Occasionally the Customs Officer may insist that the Master sign in his presence. Only upon completion of the above formalities, usually carried out in a very short time, is the vessel declared free and passengers and crew may go ashore. It is recommended that one of the public rooms be made available for the purpose of inward clearance in order to avoid congestion in the Purser's Office.

HEALTH: Free Pratique is granted by the Pilot.

RADIO: The Government Harbour Pilot Office operates on Channel 16 VHF on a daily basis from Monday through Friday, between the hours of 0730 to 1200 and 1330 to 1700 hrs. Outside these hours and at weekends and official holidays the office remains unattended.

Any vessel bound to Bonaire after the normal working hours should route their messages to BOPEC Oil Terminal which operates VHF radio Channels 16 and 13 on a 24 hour basis, who in turn will relay the vessel's message to their Agent for pilot and berthing instructions. The Government Radio and Telephone Station maintains daily telephonic communications with Curacao, U.S.A., Europe, etc.

VHF: Call sign "Bonaire Pilots". Calling Channel 16, working Channel 11. Rescue operations Channel 6. Watchkeeping 0730 – 1200 hrs. and 1330 – 1700 hrs. except Saturdays, Sundays and holidays. Plans being made for 24-hour service.

RADAR: There is no Radar Port Control.

TUGS: 2×3,400 h.p. tugs are available. Vessels which require tug assistance for berthing should advise their Agent in advance in order to make necessary arrangements with the Bonaire Petroleum Company.

BERTHING:

*North Pier:**

Berthing space	225 ft.
Depth	30 ft. alongside at LW
Height	6 ft.

Max. permitted load factor on pier is 2,000 kilos per sq.m.

Vessels of max. 30,000 g.r.t. or a max. length of 738 ft. are allowed to berth alongside.

*North Pier not in use at present as major repairs required for reconditioning.

Southern Pier:

Length	394 ft.
Width	46 ft.
Depth alongside	50 ft.
Height	6 ft.
Length of connecting bridge from shore to pier	199 ft.
Width of connecting bridge from shore to pier	68 ft.
Max. LOA	1,050 ft.

Mooring Facilities:

1: Double Mampaey easy-release electrical capstans (100 tons each)
2: Two (2) bollards 50 tons each
3: Double Mampaey easy-release electrical capstans (100 tons each)
4: Bollards of 50, 25 and 10 tons (every 20 m.)

Fendering: Vredestein Gigant Fenders; Block fenders and D-fenders (made of rubber).

Roll-on/Roll-off Facilities: At the South Pier a small Ro-Ro Platform for "coaster-size" ships and small "landing-craft" type. Max. permitted load factor 2,000 kilos p.sq.m. Depth 5 m.

Off the Harbour Office between the North Pier and the South Pier a Ro-Ro Pier for ships up to 3,000 gross and/or a max. length of 90 m. Max. permitted load factor unlimited. Depth 6 m. Max. size: LOA 300 ft. Draft 15 ft.

For the mooring and unmooring at the pier shore labourers are engaged by Agents at the expense of the shipping line. Motor-boats are available for running lines.

Salina: Position: Lat. 12° 05.3′ N., Long. 68° 16.7′ W. This port is situated 4 miles South of Kralendijk and is owned by the Antilles International Salt Co., loading of salt in bulk only can be carried out at this pier. Pilot boards 0.75 miles from jetty.

Vessels of approximately 40,000 tons d.w.t. can be accommodated.

Depth alongside 45 ft. The Pilot will board vessels destined for this port 0.75 miles West of the jetty, from a motorboat displaying the signals as referred to for Kralendijk. Also see "Bulk Handling Facilities".

CRANES: There are 2 mobile cranes available 1×18 tons and 1×24 tons lifting capacity.

BULK CARGO FACILITIES: Salt in bulk is handled at the Port of Salina. The pier consists of 5 breasting dolphins and 2 mooring dolphins. The loading chute is situated on the centre breasting dolphin. Loading rate approximately 2,000 t.p.h. The chute is fixed and for shifting ship there are 2 mooring buoys, one on each side of the pier. The total length of the pier is 614 ft. and the max. draft is 45 ft. although the max. size of vessel which can be accommodated is approximately 40,000 d.w.t.

SPECIALISED CARGO HANDLING FACILITIES: There are no liquid, chemicals and LPG facilities. For Roll-on/Roll-off facilities see "Berthing".

BRIDGES: There are no bridges in the port of Bonaire.

STEVEDORES: There are no regular stevedores (longshoremen) available in Bonaire. For cargo handling operations ordinary labourers are engaged by the Agents for account and risk of the ship.

Working Hours: Monday-Friday 0700 – 1200 and 1300 – 1600. Overtime possible.

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical or dental treatment. In case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign an authorisation guaranteeing expense of treatment and repatriation.

TANKERS: There is no tanker facility in the port.

DENSITY: Average salinity of water is 1025.

FRESH WATER: Fresh water from the Government water distillation and power plant can be supplied at the pier.

FUEL: On advance request, bunkers are delivered by craft at rates comparable to those in Curacao or Aruba.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Venezuela and Colombia.

REPAIRS: There are no facilities for carrying out major repairs. Qualified technicians are available for electronic instrument repairs.

DRY DOCKS: No dry dock facilities.

SURVEYORS: No Classification Surveyors available, nearest port is Curacao. Cargo inspectors Saybolt and Caleb Brett, Independent Maritime Bureau represents ICS, P and I Club nautical and technical inspectors, inspectors for Liberian Bureau of Maritime Affairs.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary but recommended; Overtime as usual.

OPENING/CLOSING HATCHES: This work is normally carried out by crew.

CUSTOMS ALLOWANCES: No specific regulations, customs allow only a reasonable quantity out of bond.

CARGO GEAR: Load/discharge operations always by ship's gear.

REPATRIATION: All facilities exist for crew changes. Good connections, several times a day to Curacao and several times a week to U.S.A. and Europe.

AIR SERVICES: There is a good daily air service between Bonaire and Curacao. 8 to 10 flights a day with good connections at Curacao with the international services to and from many parts of the world.

HOLIDAYS: New Year's Day; Monday after Carnival; Good Friday; Easter Monday; Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day; Bonaire Day (September 6th); Christmas Day and Second Christmas Day.

TIME: 4 hours behind GMT. No Summer Time kept.

CUSTOMS OFFICERS ON BOARD: 1 or 2 Customs Officers will remain on board during the vessel's stay in port. Such officer(s) must be furnished meals at regular meal hours.

POLICE/AMBULANCE/FIRE: Police, tel. 8000; Ambulance, 8000; Fire, Tel. 8000.

EMERGENCY CO-ORDINATION CENTRE: Nearest Emergency Co-ordination Centre is the Rescue Co-ordination Centre of the Royal Netherlands Air Force on Curacao, Tel: Curacao 81622 and 81628.

TELEPHONE: Telephone connection on board is possible, to be arranged by ship's Agent in advance.

SERVICES: No tank cleaning equipment or facilities for discharge of tank washings. Compass adjusting, draft and quantity surveys, damage surveyors, marine consultants. Survey of tanks and machinery contact Independent Maritime Bureau, Tel: 8151.

BANKS: ABN Bank, Simon Bolivarstraat, Tel: 8417 and 8429.

Maduro and Curiel's Bank, P.O.Box 66. Tel: 8420 and 8414. Telex: 1201 Mcbon NA.

Banco Barclays Antillano N.V., Breedestraat, Tel: 8295.

STORING: As a rule the vessel is stored by truck. Trucks can proceed alongside at the berth. Forklifts can be used on jetty to handle stores.

No particular Customs Regulations regarding storing.

Local people can be employed for storing, contact ship's Agent.

SHORE LEAVE: No restrictions for shore leave.

IDENTIFICATION CARDS: Passengers: No landing cards required, but some ships carrying a large number of passengers furnish landing cards to passengers for their own control of passengers returning on board. Crew: No landing cards required.

REGULATIONS: No particular or unusual regulations for the port.

GENERAL:

Live Animals: The importation of dogs, cats, horses and certain other animals is permitted, provided these animals are accompanied by a certificate issued at place of origin by a licensed Veterinarian, stating that the animal in question is free from any contagious disease. Dogs must have, in addition, a Certificate of Rabies Inoculation. All animals imported (including birds) will moreover be examined on arrival.

Prohibited Imports: The importation of the following is strictly prohibited: Parrots and parakeets, absinth, explosives, firearms, ammunition and firework, except with prior permission from local authorities. All kinds of narcotics and drugs, the sale and use of which is regulated by International Conventions, except for legitimate use by and for sale to drugstores by duly accredited importers. Unauthorised reprints of copyrighted scientific and literary works of art. Copper, bronze and nickel coins, except for account of the Government of the Netherlands Antilles. Obscene printed matter.

Immigration Law: All passengers disembarking in Bonaire as temporary visitors, for business purposes, on vacation, or in transit to other destination, must be in possession of:

(a) Valid Passport/birth certificate.
(b) One Passport photograph.
(c) A return ticket, through ticket or passenger-order to next destination outside of the territory of the Netherlands Antilles.
(d) All documents and visas necessary for continuing to next destination or return to place of origin.
(e) Sufficient means to be able to support themselves during their stay in the territory.

No visa is required from a Netherlands Consul on any of the aforementioned documents.

DELAYS: As a rule there is no delay in berthing, loading or discharge. Delay in loading or discharging may be caused by rain.

DEVELOPMENTS: Feasibility study underway for port improvements.

AUTHORITY: Bonaire Port Authority, Harbour Office, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 8151. *Telex:* 1292 Gobon NA. *FAX:* 8416. *Contact:* Captain Celestino M. Semeleer, Harbour Master.

ORANJESTAD, Aruba: 12.31 N. 70.02 W. (See Plan)

DOCUMENTS:

Clearance from Last Port.
Derat Exemption Certificate.
Ship's Register.
Manifest of Cargo (or ballast), or Bills of Lading for import goods and transit goods separately.
Crew List (4 copies).
List of Stores on Board (2 copies).
Consignee Mail (if cargo for discharge).
Passenger List (if any passengers).

The Passenger List must carry full names, ages, sex, nationality and occupation of passengers landing at Aruba. The ultimate destination of in-transit passengers must also be shown on the Passenger List.

Derat Exemption Certificates can be renewed at Oranjestad, Barcadera and St. Nicholas.

Outward Clearance, cargo documents and list of outgoing passengers are delivered on board by the Agent's representative, thereby making it unnecessary for Masters to visit the Customs Office to obtain outward clearance.

PILOTAGE: Masters are requested to advise Agents of their expected time of arrival at least 48 hours in advance. Arrival messages should include advice regarding cash or other requirements. This information is particularly necessary in order to give prompt attention to vessel's requirements and to avoid delay after arrival.

Pilots are government employees and pilotage is compulsory for vessels from 50 g.r.t. upward entering or leaving the harbour. Pilots board inbound vessels within 2 miles of shore. The Agent's representative will arrange for Pilots to board vessels as necessary. Inbound vessels should close the West entrance of the harbour as near as prudently possible and make a lee to facilitate the Pilot's boarding.

Every vessel arriving or departing must provide and properly secure a pilot ladder which conforms with the standards of construction normally accepted by international safety standards. Failure to provide such a ladder may result in the Pilot's refusal to board a vessel.

ANCHORAGE: Anchorages, suitable even for deepest draft vessels, are located outside the protecting reef along the whole length of the Western and S.W. coast. The depth of water ranges from 10 to 35 fathoms. Because of the sharply shelving nature of the bottom in this area, it is recommended that the services of a Pilot be obtained in taking up an anchorage. Ships are anchored only during daylight hours.

MINIMUM DRAFTS: For tankers arriving or sailing in ballast the following minimum drafts are required for manoeuvring under normal weather conditions:

G.R.T.	*Forward*	*Aft.*
16,600 (T-2)	8 ft.	18 ft.
18,000	8 ft.	18 ft.
27,000-30,000	10 ft.	20 ft.
30,000-36,000	14 ft.	22 ft.
37,000	14 ft.	24 ft.
46,000	16 ft.	26 ft.

MAX. SIZE: The harbour itself has a depth of 36 ft. at MLW. The safe salt water draft approved for docking at the Long Pier is 30 ft. and in the two Western Basins is 28 ft. Vessels normally enter via the West channel and depart via the East channel.

HEALTH: The Port Doctor will visit an arriving ship only if there is a case of quarantinable disease on board, if the ship has no clean Bill of Health or if one of the preceding ports of call has been declared to harbour a quarantinable disease. The Netherland Antilles Bill of Health is free of charge.

RADIO: Shore station for R/T communication with 24-hour service. VHF Channel 16, 156.80 MHz (calling); Channel 11, 156.55 kHz (working channel).

HF 2182 kHz, 2558 kHz (working frequency transmitter), 2158 kHz (receiving frequency SSB).

TUGS: 2 tugs available, 2,200 h.p. and 3,500 h.p. Both fitted with VHF Channel 16 (working Channel 11).

BERTHING: In total there are 4,070 ft. of dock length available to accommodate ocean-going vessels and 1,090 ft. of dock for small craft, of which:

1,720 ft. with 36 ft. of water alongside
2,350 ft. with 34 ft. of water alongside
460 ft. with 16 ft. of water alongside
230 ft. with 10 ft. of water alongside
400 ft. with 6 ft. of water alongside

CONTAINER FACILITIES: 30 acre container terminal in operation. Length of quay 255 m., depth alongside 12.0 m. 1×50 ton container crane. 2×35 ton forklifts. 1 back-up mobile crane of 140 tons available.

STEVEDORES: Stevedoring is performed at a fairly fast rate compared with other ports in the Caribbean area. All cargoes are handled by shore cranes. The terminal has extensive electrical installations for refrigerated container cargoes.

MEDICAL: Excellent medical and dental attention is available at any hour of the day or night to crew members of all vessels.

FRESH WATER: Boiler and drinking water of purest quality is supplied by hose from the docks at a rate of 200 t.p.h. (in special cases 400 t.p.h.).

FUEL: The port of Oranjestad is an official Esso bunker station. All grades of bunker fuels can be supplied from shore tanks at a rate of 1,500 bbls./p.h. A minimum of 48 hours advance notice is required.

CONSULS: The following countries have consular representatives at Aruba:

Brazil
Chile
Colombia
Costa Rica
Denmark
Dominican Republic
El Salvador
Germany F.R.
Guatemala
Haiti
Italy
Lebanon
Liberia
Nicaragua
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United Kingdom
Venezuela

Necessary for Masters of Panamanian and Italian flag vessels to visit Consulates at Oranjestad to present documents and receive despatches. Other Consulates have similar requirements. Masters may check with Agent for clarification.

REPAIRS: There are no facilities at Aruba for major ship repairs. Local workshops can do repairs of minor nature. Preliminary advice regarding such minor repairs should be included in ETA messages and work requisitions for repairs should be prepared for handing to the Agent's representative immediately upon arrival.

Radar, radio and gyro repairs can be carried out. However, it is important that Masters radio in their requirements as early as possible and give a brief reference as to the nature of the breakdown or fault of the equipment concerned.

While alongside vessels must be prepared to move at 1 hour's notice. Engine repairs to the effect of demobilizing the vessel may only be carried out with special permission.

SURVEYORS: Representatives of the American Bureau of Shipping, the Lloyd's Register of Shipping and the Norske Veritas are resident in the area. Masters may request the surveyors' services through the Agent.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast that can be pumped over board when alongside, as it is prohibited to pump dirty ballast into the harbour.

GANGWAY/DECK WATCHMEN: An efficient and continuous watch must be maintained on deck and in the engine-room of all ships while in port, and a sufficient number of men must be on board at all times to move vessels either for harbour operations purposes or in emergency situations.

OPENING/CLOSING HATCHES: This work is normally carried out by the crew.

AIRPORT: The Port of Oranjestad – the commercial and tourist harbour of Aruba – is only 5 miles by road from the airport. The connection by air with the U.S.A. and Europe is very good and frequent (TCA, KLM, VIASA); other airlines operating in Aruba are: ALM, LAV, Aerocondor, and Caribbair.

TIME: Local time is 4 hours behind GMT. Vessels are requested to use local time in ETA messages and when dealing with their Agents.

POLICE/AMBULANCE/FIRE: Police, Oranjestad, Tel: 1000; Ambulance, Oranjestad, Tel: 2010/1234; Fire Alarm, Tel: 00.

CUSTOMS GUARDS: Local authorities assign 1 or more Customs guards to each vessel during its stay in port; the charges for guarding are for the account of the vessel. These officials must be provided with meals on board at regular meal hours.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore liberty. Masters are requested to endeavour to have all crew members on board prior to departure time, so that the ship will have no delay in sailing.

AUTHORITY: Aruba Ports Authority N.V., L. G. Smith Boulevard 23, Oranjestad, Aruba, Netherlands Antilles. *Tel:* 297-8-26633. *Telex:* 5120 Hafar NA. *Contact:* Harbour Master – Aruba.

PHILIPSBURG, St. Maarten: 18.01 N. 63.03 W. (See Plan)

LOCATION: Philipsburg, capital of Netherlands St. Maarten, lies in a well-protected bay in the S.E. corner of the island. The only obstruction to the harbour is "Proselyte Reef" or "Man-of-War-Shoals", located Lat. 17° 56′ N., Long. 63° 04′ W., with a minimum depth of 2.5 fathoms. Entrance to the harbour can be accomplished by passing either to the North or the East of this reef.

DOCUMENTS:

Crew List: Immigration 1 copy.
Agent 1 copy.
Passenger List: Immigration 1 copy.
Agent 1 copy.
Stores List: None required.
Ship's Register: Pilot will require to see this document for obtaining the official tonnage.

Note: No special form is prescribed for the above documents, consequently these may be made out in Company's regular form. No consular visa required on any of the above documents.

Immigration Law: All passengers disembarking in Bonaire as temporary visitors, for business purposes, on vacation, or in transit to other destination, must be in possession of:

(a) Valid Passport/birth certificate.
(b) One Passport photograph.
(c) A return ticket, through ticket or passenger-order to next destination outside of the territory of the Netherlands Antilles.
(d) All documents and visas necessary for continuing to next destination or return to place of origin.
(e) Sufficient means to be able to support themselves during their stay in the territory.

No visa is required from a Netherlands Consul on any of the aforementioned documents.

DELAYS: As a rule there is no delay in berthing, loading or discharge. Delay in loading or discharging may be caused by rain.

DEVELOPMENTS: Feasibility study underway for port improvements.

AUTHORITY: Bonaire Port Authority, Harbour Office, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 8151. *Telex:* 1292 Gobon NA. *FAX:* 8416. *Contact:* Captain Celestino M. Semeleer, Harbour Master.

ORANJESTAD, Aruba: 12.31 N. 70.02 W. (See Plan)

DOCUMENTS:

Stores List: None required.
Ship's Register: Pilot will require to see this document for obtaining the official tonnage.

Note: No special form is prescribed for the above documents, consequently these may be made out in Company's regular form. No consular visa required on any of the above documents.

Wind direction		*Current direction*	
True	*% of time*	*True*	*% of time*
20° – 40°	2	40° – 70°	24
50° – 60°	6	100° – 110°	17
70° – 80°	33	140° – 240°	10
90° – 100°	40	260° – 290°	24
110° – 120°	13	320° – 340°	25
140° – 170°	1		
220°	5		

Wind tolerance: At 30 knots steady, loading will be discontinued, and the loading arms will be drained, engine to be confirmed ready for use.

At 35 knots steady, arms will be disconnected and tugs will be on stand-by.

Loading Arms: RB I; four 16 in. cargo arms with 16 in. bolted flange connections. One 8 in. bunker arm (No. 5 arm, the most Westerly arm). RB II; five 16 in. cargo arms with 16 in. connections.

Discharge/Loading Lines: RB I 36 in., 3,000 ft. long. RB II 56 in., 4,000 ft. long.

Radio Contact: Contact between Loading Master, control room, marine office by VHF and UHF. Particulars will be given by Loading Master.

Bunkers: RBI; through bunker arm (No. 5). RB II; through No. 1 or No. 5 loading arms with reducers.

Water: Not available.

Provisions: By launch; to be taken on board by ship's lifting gear on the port quarter.

Shore Leave: No pedestrian traffic allowed between ship and main gate. Arrangements for crew transportation can be made with Agent.

LIGHTERING OPERATIONS: (No lightering taking place at present, pending a decision for re-opening the terminal for ULCC's and VLCC's.) VLCCs discharging at Aruba may be called upon to discharge part of their cargo by ship-to-ship transfer off Aruba. The lightening operation is carried out by vessels suitably equipped for ship-to-ship transfer operations, and is under the control of Exxon's Lightening Master on the lightening vessel.

The Lightening Master will board about 1.5 miles off San Nicolas Haven to discuss the operations. A derrick or crane should be ready on the lee side to pick up various equipment for the mooring and pipe-line connection. A Lightening Assistant stays on board to advise and assist with mooring procedures.

The VLCC and the Lightening vessel rendezvous in position: Lat. 12° 24′ N., Long 70° 14′ W. Communications are by portable radio placed on board and/or VHF Channel 8. The designated lightening area is bounded by the following positions:

(1) Lat. 12° 25′ N., Long 70° 04.4′ W.
(2) Lat. 12° 25′ N., Long 70° 10.3′ W.
(3) Lat. 12° 30′ N., Long 70° 13.5′ W.
(4) Lat. 12° 30′ N., Long 70° 07.2′ W.

The mooring takes place whilst steaming into the prevailing wind on an Easterly course at about 3 knots. Thereafter the VLCC anchors within the designated lightening area for the ship-to-ship transfer. Wind speeds in excess of 23 knots are considered unsuitable for the mooring and the lightening operations to take place.

Masters need not come ashore to clear ship with Customs. The ship's Agent can do this by proxy. Ship's papers for clearance and signed proxy will be picked up from ship off port by tug or launch.

FRESH WATER: Not available.

FUEL: All grades of bunkers available.

Berth: Vessels arriving for bunkers only with a draft greater than 39 ft. or over 90,000 d.w.t. must use the Reef Berths. As the berth is used for crude oil trans-shipment bunkering vessels can expect delays. Also the following considerations apply:

1. Vessels working cargo have priority over vessels bunkering.
2. In assigning tugs, vessels working cargo take priority. (2 to 3 hours tug service required at the sea berth.)
3. Vessels using the Reef Berths must have at least 12 good mooring lines. All mooring winches and equipment will be inspected and must be in good order. Vessels may not be docked if equipment is faulty.
4. In the event of marginal weather, deep draft vessels calling for bunkers may not be docked.

REPAIRS: A local workshop can do minor repairs.

PORT FIRE PROTECTION: The Port of San Nicolas is very well equipped with modern equipment for fire-fighting and fire prevention.

BALLAST: Vessels must arrive with no more than 8% d.w.t. dirty ballast. Clean ballast will be discharged overboard after docking. Slops can be discharged to the disposal facilities ashore. Shore reception facilities are limited.

SPECIAL REGULATIONS: Strict compliance with Harbour Safety Regulations is mandatory. Stringent regulations prohibit the transportation of alcoholic beverages through the refinery and harbour area. No liquor or beer may be taken on board or removed from vessels except only bonded stores ordered by the Master.

POLICE/AMBULANCE/FIRE: Dial 2222 on jetty telephone. Call "Lagomarine" on UHF set which is supplied to every ship whilst alongside.

SHORE LEAVE: As all ship's personnel when going ashore have to pass through the docks and the company's concession, every seaman must carry an identity card to check off against ship's Crew List at main gate. Seamen must have special pass to use any other gate than refinery main gate.

AUTHORITY: Esso Petrolera S.A., Seroe Colorado, Aruba, Netherlands Antilles. *Tel:* 9-2067. *Telex:* 5026. *Cables:* Essolago Aruba.

Also see "Oranjestad".

SINT MICHIELSBAY, Curacao: 12.09 N., 69.01 W.

LOCATION: Sint Michielsbay, on the South coast of Curacao, 5 miles West of Willemstad, is an open bay, naturally protected from prevailing winds and sea.

PILOTAGE: Compulsory.

ANCHORAGE: In the bay 650 ft. out of the coast in 130 ft. water is laid a S.P.M. buoy, which gives a good anchorage to vessels up to 350,000 d.w.t. which, because of dangerous cargo, quarantine or because of a defect cannot enter another port of Curacao.

BERTHING: Vessels are moored with their stern to the buoy and their bow anchors are heaved out to hold the foreship from the coast.

REPAIRS: Repairs or handling cargo can be carried out by way of barges. A landing jetty for barges is available.

GENERAL: Other services as tugboats, lighterage, stevedoring, etc. are rendered from Willemstad.

AUTHORITY: Curacao Port Authority, N.V., Werf de Wilde Z/N, P.O.Box 689, Willemstad, Curacao, Netherlands Antilles. *Tel:* (9) 611133, 614422. *Telex:* 3339 Curpa Na. *FAX:* 613907. *Contact:* Mr. E. Voges, Managing Director.

WILLEMSTAD/EMMASTAD, Curacao: 12.06 N. 68.56 W. **(See Plan)**

DOCUMENTS:

For Immigration:

2 copies of Crew List.

2 copies of List of Passengers. Passenger Lists should indicate full names, age, sex, civil state, and occupation. Passengers must show proof of citizenship (a passport, voter's registration or birth certificate is acceptable).

For Customs:

1 copy of List of Stores (deck, engine and stewards department).

Manifest of Cargo for Curacao, if any, in duplicate, on special form called "Vrachtlijst" itemising the cargo by lots of the same mark and showing numbers, kind of packages, general description of contents and weights in kilograms or pounds of each lot.

Manifest of Cargo for Curacao, in transit, for transhipment through Curacao to other ports, if any, in duplicate for each different port separately on special form and itemised as indicated above.

Manifest of Cargo on board, in transit, if any, in duplicate on special form as indicated above, showing only the total number of packages on board, general description of the merchandise and total weight in kilograms or pounds; if the cargo is in bulk, this is indicated accordingly.

2 copies of tally books of cargo for discharge at Curacao, if any.

1 copy of Crew List plus 1 copy of Personal Effects List.

1 copy Passenger List landing at Curacao.

If the ship is in ballast, only the Stores List is required.

The Customs Officer will then make out his "Akte van inklaring" (Certificate of Entry).

The above documents have to be signed by the Master. They may be made out in Dutch, English, Spanish or French.

PILOTAGE: Pilotage is compulsory. Rendered day and night. Pilots are government officials and are stationed at Willemstad. The Harbour Master is also the head of the Pilot Service.

Vessels must provide a lighted, manned, properly secured and clean pilot ladder, fitted with sufficient spreaders.

A lifebuoy fitted with a Holmes light, as well as a reliable heaving line, should be placed close to the pilot ladder and the embarkation and disembarkation should be supervised by an officer. Vessels arriving or leaving with a freeboard exceeding 30 ft. must use the accommodation ladder in conjunction with the pilot ladder (Safety of Life at Sea Convention 1960).

Vessels bound for Curacao should proceed to Willemstad Harbour except when they have specified orders for another bay.

Vessels in sight of Willemstad will be contacted by the signal station at Fort Nassau for further orders. From this same station, lights are shown to direct the traffic in port.

Vessels should stay 1 mile off shore S.W. of the harbour entrance to await Pilot. Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence the manoeuvring ability of the vessel should be reported before entering to the Harbour Master.

The pilot motorboat is identified by a blue flag with the letter "L" in daytime, and a red light above a white light at night.

ANCHORAGE: As a rule there is no anchorage area in the harbour, but in the Eastern part of the Schottegat there is a dolphin with mooring buoy on each side available to await berth or orders for limited time, subject to permission and conditions from the Harbour Master.

4 vessels, 2 vessels alongside each other can be safely moored at these buoys. Depth: 40 ft.; distance between each buoy and dolphin 1,000 ft. Furthermore, in the Southern part of the harbour a set of 2 dolphins can accommodate 2 vessels with length up to 600 ft. and a max. draft of 20 ft.

RESTRICTIONS: The harbour of Willemstad consists of a 1,400 yd. long and min. 270 ft. broad channel, the Santa Anna Bay, with depths from 50 ft. to 79 ft. and an adjacent inner bay, the Schottegat, a 150-acre body of water with a depth of more than 10 ft. and a maximum of 79 ft.

The navigable portion of the entrance of the port is 865 ft. wide, marked on either side by a light-buoy, and the minimum depth is 50 ft.

Required minimum draft for tankers arriving, shifting and sailing:

g.r.t.	fwd. ft.	aft. ft.
up to 11,000	10	16
11,000–15,000	11	18
15,000–19,000	13	19

g.r.t.	fwd. ft.	aft. ft.
19,000–25,000	14	20
25,000–29,000	15	21
29,000–35,000	17	23
35,000–43,000	18	24
43,000–45,000	19	25
45,000–47,000	20	25
47,000–50,000	21	26
50,000–55,000	22	28
55,000–60,000	22	29
60,000–65,000	23	30
65,000–70,000	23	31
more than 70,000	24	32

Maximum trim for tankers: 10 ft. by the stern, 2 ft. by the head.

BRIDGES: Santa Anna Bay is crossed by 2 bridges, the Queen Emma floating pontoon bridge and the new Queen Juliana fixed bridge.

The pontoon bridge opens day and night for in and outgoing vessels. There will no longer be any waiting period at the harbour entrance. Automobile traffic will be diverted to the new bridge and those on foot will have continuous ferry service available. Ships will have overall preference for openings.

The fixed arch bridge, dominating Willemstad's skyline and the entrance to Schottegat Bay, is 183 ft. high, (clearance 180 ft.) enabling the biggest vessels to pass under. The bridge is of box girder construction and is open to automobile traffic only. Glare-proof lights are installed to prevent interference with light signals that harbour Pilots rely on when bringing a ship through the channels.

Tankers passing through the Santa Anna Bay must have all tank-lids properly closed, even if they are gas free. This is a harbour regulation.

MAX. SIZE: Length 850 ft., draft 45 ft. Vessels with a LOA of 1,000 ft. have been piloted in the harbour.

HEALTH: The Port Doctor will visit only if there is a case of quarantinable disease on board. The Netherlands Antilles Bill of Heaith is free of charge.

RADIO: VHF Radio-telegraph and radio-telephone. PJC Coast Station operated by the Netherlands Antilles.

Location : Curacao.
Call Sign : PJC.
Frequencies (Telegraph) : 438/500 kHz, 4334, 8694, 13042.5 and 17170.5 kHz. Schedules as indicated in the List of Coast Stations.
Frequencies (Telephone) : 2182, 2550, 4125, 4379.1, 8725.1, 13119.4 and 17251.5 kHz. Schedules as indicated in the List of Coast Stations.
Watchkeeping : 24 hours.
Range : Mid-Atlantic and Caribbean area.

VHF: *Port Operations Station (Operated by Harbour Authorities):* Location, Fort Nassau. Call sign, Fort Nassau. Frequencies, International Channels 16 (156.80 MHz), calling and safety; 12 (156.60 MHz), working, first choice; 14 (156.70 MHz). Watchkeeping, 24 hours on Channel 16. Type of operation, Simplex, Frequency modulated. Range, 20 to 25 miles.

Main Private Station. Operated by Isla (Refineria Isla Curacao S.A.): Location, Emmastad. Call sign, Refinery Isla Curacao. Frequency, international Channel 19 (receiving, 156.950 MHz); (transmitting, 161.55 MHz). Type of operation, Duplex working, frequency modulated; operated by remote control from Isla's telephone exchange; ask operator for connection with party desired. Range, 20 miles. Watch-keeping, 24 hours on Channel 19; normal daily business, 0730 hrs. till 2400 hrs.; urgent business only, 2400 hrs. till 0730 hrs.

Tug Base Station:

Location : Bullenbay Grote Werf.
Call Sign : Marine Department – For tug movements only and in an emergency to direct the tugs at Refineria Isla (Curacaò) S.A. Watchkeeping during office hours on Channel 19.
Sleepboat Central Scharloo on Channel 14, or Fort Nassau on Channel 16.
Central Post – For tug movements only. Watchkeeping 24 hours on Channel 19.
Tugboat Jaro II/Tugboat Lima – For emergency calls to tugs on Channel 14 and Channel 19. Watchkeeping 24 hours on Channel 14 and 19. Telephone 612848/612849.
Frequency : International Channel 14 (156.700 mHz)
Operation : Simplex.

Tug Mobile Stations: Location, 1 on each tug. Call sign, Piku, Lima, Jaro II and Buni. Frequency, International Channels 16, 12, 14, 9, 8 and 6. Watchkeeping, 24 hours on Channel 14. Operation, Simplex – frequency modulated.

Curacao Drydock Co.

Location : Koningsplein (Schottegat Harbour).
Call Sign : Curacao Drydock.
Frequencies: : International Channels 13 (156.650 MHz), and 6 (156.300 MHz).
Watchkeeping : 0730 hrs. till 2400 hrs.
Operation : Simplex.

TUGS: Compulsory for all tankers exceeding 3,000 g.r.t. Tankers exceeding 700 ft. LOA and all tankers which are not gas-free, must make one tug fast forward before entering.

S.I.A. (Smit International Antilles N.V.) has 2 modern powerful tugs stationed at Bullen Bay, for rendering services to tankers calling at Bullen Bay.

The "Piku", 4,000 h.p., 59 tons bollard pull, built in 1974.

The "Buni", 4,000 h.p., 59 tons bollard pull, built in 1975.

They are also used by "ship-to-ship transfer" in the coastal waters South of Curacao.

All tugs are provided with extensive firefighting and salvage equipment, and each tug carries some 25 tons of oil dispersant together with a spray system to be utilised in case of oil spill.

K.T.K. (Kompania di Tou Korsou) has 2 seagoing motor tugs stationed at Willemstad, and 4 pilot launches, of which two launches can be used as tugs (348 h.p.).

The "Lima", 2,250 h.p GRT 162, bollard pull 30 tons.

Jaro II, 4,450 h.p., bollard pull 63 tons, built 1990.

The tugs can be engaged for rendering towage assistance both inside and outside the harbour. As a rule, however, all vessels dock or undock at all wharves and enter or leave the port without tug assistance. In case of abnormal circumstances or in case the Harbour Master may require tug assistance.

Tugs can be requested by the Master for speeding up docking or undocking the vessel.

There are about 20 small harbour tugs available, varying from 60 h.p. to 300 h.p. and about 80 lighters, to receive cargo or bring it alongside a vessel, varying from 60 tons to 250 tons capacity.

Also see "Services".

BERTHING: There are berths on either side of the Santa Anna Bay North of the pontoon bridge, with depths varying from 18 ft. to 33 ft. alongside, generally used for bunker, cargo and passenger ships.

On the Eastern side four wharves: the Handelskade, depth 18 ft.; the Kleinewerf, depth 24 ft.; Grotewerf, depth 31 ft.; and Salazarwerf, depth 24 ft.

On the Western side there are 6 wharves: the Matheywerf, depth 23 ft.; Westwerf I, 25 ft.; Westwerf II, 36 ft.; Nieuwewerf, 33 ft.; Motetwerf, 33 ft.; Oranjewerf, 19 ft.

In the Schottegat there are seven more berths, generally used for bunker, cargo or passenger ships.

Prins Hendrikwerf which closes the Western corner Santa Anna Bay/Schottegat, has a depth of 34 ft.; however, ships with a draft of more than 35 ft. can be moored by way of placing rafts of 10 ft. width between vessel and the quay.

At the Eastern part of the Schottegat are the Admiral Brion Wharves, which have 3,000 ft. docking space available with 33.5 ft. depth alongside.

In the Schottegat on the peninsula of Asiento are situated the 10 jetties owned by Isla, which are mostly used by tankers; however, other vessels are able to use these jetties for bunker facilities. Jetty No. 1 may be used for general cargo.

The Schottegat also has about 6,000 ft. of quay available for repairs. The names of the wharves, lengths and depths alongside are: Beatrix I and II, 1,300 ft. (each) – 20 ft.; Beatrix III, 400 ft. fore, 10 ft. aft – 35 ft.; Beatrix IV, 350 ft. – 31 ft.; Beatrix V and VI, 1,000 ft. (each) – 35 ft.; Repair Quay, 1,650 ft. – 35 ft.

There are sufficient covered and open storage places available on the wharves to load or unload a ship, generally dry cargo. Total covered storage area: 57,650 sq.ft., open storage: 500,000 sq.ft.

These areas can be used for transit as well as local cargo.

In the N.E. part of the Schottegat LASH lighters can be moored at 2 sets of buoys, depth 20 ft.

Storage capacity for liquid petrol products is 4,600,000 tons in tanks of Isla Refinery.

All Isla piers are modernly equipped to handle oil in bulk, safely, and speedily, in order to make the turn around of the vessels as short as possible. Sufficient hose connections are installed to load or discharge oil, water-ballast or residue, and to supply steam and fresh water.

The wharves in Santa Anna Bay and the Brion Wharves are all modernly equipped to supply different kinds of bunkers and also handle cargo simultaneously. Normally, general cargo is handled with the ship's gear.

Sufficient pallets and fork-trucks are available. Mobile cranes are available if needed up to 140 tons.

At the container terminal there is a modern container gantry crane with capacity 50 tons (40 tons with spreader).

Docking of cruise ships and cargo vessels in Willemstad harbour: The following piers operated by Curacao Port Services Inc., are regularly used by cruise ships and rarely by cargo ships:

Nieuwewerf, Motetwerf: West side St. Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, stelcon plates floor. Length: 1,200 ft. Draft: 33 ft. Height above water: 4 ft. One transit shed each: Nieuwewerf, width 65 ft., length 216 ft., area 14,000 sq.ft. Motetwerf, width 65 ft., length 216 ft., area 14,000 sq.ft. Open space area 200,000 sq.ft. One warehouse facility 6,500 sq.ft.

Oranjewerf: On West corner St. Anna Bay/Schottegat. Type: Quay. Construction: Iron piles, concrete top, concrete floor. Length: 418 ft. Draft: 19 ft. Height above water: 6 ft. Special bunker pier.

Prins Hendrikwerf: In the Schottegat near West corner Santa Anna Bay. Type: Quay. Construction: Iron piles, concrete top, concrete floor. Length: 690 ft. Draft: 34 ft. Height above water: 5 ft. One transit shed: width 65 ft., length 385 ft., area 25,000 sq.ft. Open space area 120,000 sq.ft. No warehouse facilities. Bunker facilities, water.

Admiral Brion Wharves: Nos. 1, 2, 3, 4, 5 and 6 situated at the East side Schottegat. Type: Quay. Construction: Sheet iron cells with concrete top, asphalt floor. Total length: 3×1,000 ft. Depth: 34 ft. Height above water: 5 ft. Two transit sheds; one with width 65 ft., length 680 ft., area 44,000 sq.ft.; one with width 65 ft., length 210 ft., area 13,650 sq.ft. Open space area 500,000 sq.ft. Two platforms for Ro-Ro ships are available. Max. draft 23 ft. – 33 ft.

Kleinewerf, Grotewerf, Salazarwerf: East side of St. Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Total length wharf: 1,470 ft. Maximum depth alongside 24 ft. – 31 ft. Height above water: 2 ft. One transit shed, width 65 ft., length 330 ft., area 21,500 sq.ft. Open space area 154,000 sq.ft. No bunkering facilities.

Matheywerf: West side Santa Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Total length wharf: 640 ft. Draft: 23 ft. Height above water: 4.5 ft. Open space area: 36,000 sq.ft.

Westwerf I: West side Santa Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Length: 480 ft. Draft: 25 ft. Height above water: 4.5 ft. One transit shed: width: 61 ft., length: 396 ft. Area: 20,000 sq.ft. Open space area: Nil.

Westwerf II: West side Santa Anna Bay. Type: Quay. Construction: Sheet piling, concrete top, asphalt floor. Length: 430 ft. Draft: 36 ft. Height above water: 4.5 ft. Open space area: 18,000 sq.ft.

Bunker facilities. Water only available through fire hose from Nieuwewerf.

Container Terminal: This terminal offers a 500 m. (1,650 ft.) quay length with 1 Lo-Lo berth, 1 Ro-Ro berth and 1 combined Ro-Ro/Lo-Lo berth. The Ro-Ro berths are 25 m. length, each with a depth alongside of 40 ft.

At the terminal, an area of 100,000 sq.m. (about 25 acres) of container storage space, including reefers and modern repair and maintenance facilities is available.

A very modern gantry crane (capacity 40 tons) now handles approximately 25 moves per hour, in order to despatch ships as fast as possible.

The reefer parking area is to be equipped with 195, 220, 380 and 440 volt connections for 28 reefer containers.

Designed for up to 50,000 moves per year (with possibilities for further extension), the terminal is now handling 25,000 TEU moves each year.

Cruise Terminal: Located on the Mattheywerf in the Santa Anna Bay.

The terminal has a covered area of 745 m. (8,080 ft.) and is provided with all necessary facilities to embark and disembark passengers and has Customs and Immigration offices and counters, telephone (local and international) and tourist information office.

An extensive facelift is presently under way at the Matthey Cruiseship Wharf which is conveniently located within walking distance of the downtown area. When completed, facilities will include a covered open-air area with chairs, a snack bar and kiosks offering information on Curacao and booking for sightseeing trips, car rentals, etc., as well as restrooms.

Cargo handling and bunkering can be carried out simultaneously.

Besides the wharves mentioned above, there are 10 oil piers in the Schottegat for discharging crude oil and feedstocks for the Isla Refinery and loading products. These wharves are therefore used mainly by tankers. They are all equipped to provide bunkers.

All main grades of marine lubricants are stocked at the Port of Curacao. Shell Marine lubricants and Marine technical service with laboratory facilities for the examination of used oil samples are available 24 hours a day.

STEVEDORES: Gangs must be engaged between 0600 and 0630 hrs. for the day, on weekends and Saturdays. For work on Sundays and holidays, gangs must be ordered between 0600 and 0630 hrs. on Saturday or the workday preceding the holiday. Masters of vessels carrying out cargo operations are consequently recommended to advise Agents their ETA well in advance of above deadlines.

MEDICAL: 750 bed hospital available.

TANKERS: Besides the wharves mentioned in "Berthing", there are 10 oil piers in the Schottegat. Pier No. 1 for discharge of chemicals for Isla Refinery, Pier No. 10 for discharge of slops and tank cleaning, and Piers No. 2 – 9 for discharging of crude oil, loading of products and supply of bunkers.

All main grades of marine lubricants are stocked at the port of Curacao. Marine lubricants and Marine Technical Service with laboratory facilities for the examination of used oil samples are available 24 hours a day.

Name	*Max. Draft* (ft.)	*Max. Displ.* (tons)	*Max. Length* (ft.)
Isla Jetty 1	27	25,500	580
Isla Jetty 2	31.5	25,500	575
Isla Jetty 3	33	25,500	575
Isla Jetty 4	38	54,000	775
Isla Jetty 5	45	100,000	850
Isla Jetty 6	39	54,000	750*
Isla Jetty 7	31	25,000	560
Isla Jetty 8	45	100,000	850
Isla Jetty 9	33.5	40,000	850
Isla Jetty 10	For'd 21 Aft 31	40,000	850

* Max. LOA at Jetty No. 6, when Jetty No. 7 is occupied, is 665 ft.

SLOP RECEPTION FACILITIES: Available at Jetty No. 10.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day, Carnival Monday (February), Good Friday, Easter Monday, Coronation Day (April 30th), Labour Day, Ascension Day, Flag Day (July 2nd), Christmas Day, Second Christmas Day. "No work", holidays for cargo operations: New Year's Day, Good Friday, Labour Day and Christmas Day.

FRESH WATER: Fresh water for drinking and use in boilers is available day and night in sufficient quantities. Fresh water is distilled from sea water by one of the biggest distillation plants in the world. The quality is very good and chemically pure.

Fresh water is delivered alongside by means of water barges. 5 water barges are available. Each barge can deliver 50/100 tons of fresh water per hour. The rate of delivery depends on the quantity required and how many barges can simultaneously deliver fresh water to the vessel. It also depends on the amount of connections on board the vessel and the height above water to be lifted. Vessels must advise Agent of requirements in advance.

On the *Motetwerf, Nieuwewerf* and *Prins Hendrikwerf* water can be delivered by means of a pipe-line.

FUEL: Besides the Isla piers there are 2 bunkering installations: namely, the "Admiral Brion Wharves" comprised of 6 berths and the "Motet" bunkering installation comprised of 4 berths.

The "Admiral Brion Wharves" bunkering installation is directly supplied from the refinery by means of 2 pipe-lines with diameters of 12 in. and 8 in. The pipe-lines run the full length of the piers, each with 5 bunkerpits, from which the oil can be delivered directly to the ships via a mobile blending unit if this is required. The capacity of the pipe-line and the pumps is 600 t.p.h. for fuel oil and 300 t.p.h. for diesel oil. Gas oil is also available.

The bunkering facilities of the "Motet" installations in Otrabanda, which are comprised of 7 storage tanks and pumping facilities, are supplied through 2 pipe-lines of 12 in. and 6 in. diameter from the refinery. The rate of delivery, by gravity and pumps, is 600 t.p.h. for fuel oil and 500 t.p.h for diesel oil.

Modern fuel blending facilities are available at all installations in Willemstad.

Note: Vessels calling exclusively for bunkers have free wharfage, provided they do not discharge and/or load in total more than 2 tons of cargo, land and/or embark in total more than 5 passengers. (Not valid at Refinery wharves).

REPAIRS/DRY DOCKS: The Curacao Drydock Company Inc. has repair yards, 2 graving docks laid out in the Schottegat and 1×10,000 ton capacity floating dock.

The largest graving dock is 919 ft. long, width of entrance between wheel fenders 152 ft. and a depth of water over sill of 27 ft. Suitable for up to 155,000 d.w.t. Movable cranes of 25 and 75 tons lifting capacity are fitted alongside the dock.

The Curacao Drydock Company Inc. has 6,000 ft. of repair wharf with varying depths up to 40 ft. Cranes alongside up to 75 tons lifting capacity. Mobile truck cranes of 140 tons are also available.

Electric shore-power A.C., D.C. 110, 220 or 440 volts can be supplied directly from shore at wharves of Isla and at other wharves from generators on barges. Isla can also supply steam directly from the shore at a pressure of 8–15 kg./cm.

SURVEYORS: A.B.S., Lloyd's, N.V., B.V., R.I., G.L. and others.

Caleb Brett, Independent Marine Bureau, Redwood, Saybolt, Chas. Martin, Caribbean Marine Consultants, J. Mesas and R. Lapre.

AIRPORT: There are daily international flights from Dr. Albert Plesman Airport.

ALM: Frequent daily trips to Aruba and Bonaire. Daily flights to Miami and New York. Regular air services to St. Maarten, Caracas, Maracaibo, Colombia, Haiti, Sto. Domingo, Puerto Rico, Trinidad and Paramaribo.

Eastern Airlines: Daily flights to Puerto Rico and Miami and transfers to all points.

American Airlines: Daily flights to New York and transfers to all points.

VIASA: Regular scheduled flights to Caracas, Sto. Domingo, Paris and Amsterdam.

Avianca: Daily flights to Colombia.

LAV: Many daily flights to Caracas.

KLM: Daily flights to Amsterdam, Lisbon, Madrid, Frankfurt, Zurich and Central and South America.

Ferry: Ferry's Del Caribe S.A. runs a regular service with a new modern ferry which carries 1,200 people and 120 automobiles. This ferry has regular service between Curacao and Coro, Venezuela on Monday, Tuesday, Wednesday and Thursday. On Thursday the ferry also goes to Aruba and Punto Fijo, Venezuela.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel: 44444. Ambulance Tel: 625822.

EMERGENCY CO-ORDINATION CENTRE: Curacao is a major Search and Rescue Centre in the Southern Caribbean and has the following resources at its disposal:

Communications: Curacao Radio listens on the standard frequencies (VHF Channel 16) – (2182 kHz. (voice) and 500 kHz (morse) Fort Nassau (Channel 12 and 16) is the harbour traffic control centre.

Co-Ordination: KLU (Royal Netherlands Air Force) Rescue Co-Ordination Centre (Curacao Rescue) at the Dr. Albert Plesman International Airport. Tel: 81628 (24 hours service).

During the emergencies the following frequencies are being used: 2182 kHz and VHF Channel 16.

The Curacao RCC maintains a communication link with the United States Coast Guard RCC in San Juan (Puerto Rico) and can use the AMVER information.

Air Search: In case of a missing aircraft or vessels the following forces are available for conducting Search and Rescue missions under control of the Curacao RCC:

2 Fokker F-27 maritime aircraft of the RNN long range patrol type. (Both aircraft can communicate on Channel 16 and 2182 kHz).

Coast Guard Auxiliary (CITRO) short range aircraft. Consisting of single and twin-engined light aircraft flown by Civil Pilots under RCC direction. Some of them can communicate on Channel 16.

Helicopters are unavailable.

Rescue Units: Commercial tugboats. Coast Guard Auxiliary (Citizens Rescue Organisation of the Netherlands Antilles – CITRO), using private boats.

Royal Netherlands Navy. If available the station vessel (a destroyer and a minesweeper) will be despatched for emergencies.

Merchant Navy ships of convenience; in general Merchant Navy vessels which will be directed by the aircraft described before, to emergencies. This in accordance with the Mersar-booklet on Search and Rescue.

REGULATIONS: Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence manoeuvring abilities of the vessel should be reported before entering, to the Harbour Master.

Dangerous Cargo: Explosives, ammunition, fireworks, radio active material and other dangerous cargo.

All vessels carrying explosives or other dangerous cargo, for discharge at Curacao, for transhipment or in transit without transhipment, *require special permission in writing, obtained prior to arrival,* for entering any port in the island of Curacao. Full details must be furnished in advance.

Only limited quantities of explosives, etc., are permitted in the port of Willemstad. For calls with larger quantities outports are used. Details of the regulations in force on the subject will be furnished on request by shipping Agents.

Entry permit required for ships carrying dangerous and/or hazardous cargo. Cost of form including stamp is fls. 4.00. Additionally administration fee is charged on the following basis:

Cargo in transit not being off-loaded from the ship – Nil. Local cargo to be discharged from the ship:

Up to 500 kilos	NAfls. 5.00
500 kilos to 5 tons	NAfls. 15.00
5 tons up to 25 tons	NAfls. 30.00
25 tons to 50 tons	NAfls. 45.00
over 50 tons	NAfls. 60.00

Transhipment cargo landed from one ship and reloaded on another ship: Double the local charge, indicated above.

At the discretion of the Harbour Master a special guard may be assigned onboard vessels handling or having dangerous and/or hazardous cargo on board. The charge, if and when incurred, is NAfls. 15.00 per hour in straight time and NAfls. 30.00 in overtime. Please note that this happens very seldom.

SERVICES: *Salvage, etc.:* A supply vessel is permanently stationed at Willemstad by "Smit Tak International Antilles N.V." on a 24 hours service base. She is provided with extensive salvage equipment such as pumps, hoses, burning and welding equipment and an hydraulic crane with a capacity of 10 tons.

Facilities for divers such as compressors, decompression tank, etc., are on board. The ship is furthermore very suitable for bringing stores, spare parts, packed oil products, crew on board, passing, or on the roads, waiting ships.

Underwater Cleaning/Underwater Services:

Cleaning of submerged hull sections of ships while afloat. This cleaning can take place while the ship is moored in the main harbour at Willemstad and also at other locations, such as Caracas Bay, Bullen Bay and St. Michiels Bay.

Cleaning of cruise ships takes place while bunkering and the passengers are ashore.

A local company has developed its own underwater cleaning apparatus which cleans ships up to 250,000 d.w.t. within 24 hours. Also the rudder and propeller are properly cleaned. The cleaning does not affect the paint but only removes the very thin upper layer of spent anti-fouling paint, leaving the active anti-fouling exposed.

The company carries out various kinds of underwater works e.g. sealing off sea-intakes and ropeguard, all other kinds of cutting and welding works, underwater inspections, made by certified divers, which can be combined with photographing of bottom condition in colour and black and white. Closed circuit underwater television with video-tape recorder is available.

It is the largest professional salvage and underwater cleaning company in the Netherlands Antilles and has experienced divers able to make certified damage reports. (Contact via Curacao Drydock Co. Inc.).

Peteres Divers Company Ltd.: The following underwater services are carried out by Peters Divers Company Ltd. Underwater hull cleaning by means of the "Scamp" makes it possible to clean the largest VLCC's during loading or discharging.

The average cleaning time for a VLCC is 12 hours. Underwater T.V. system for underwater surveys and inspections are available.

Further underwater services are: welding, cutting, photographing of the bottom condition, etc. in colour and black and white, sealing of intakes, etc. All inspections are carried out by licensed marine engineers.

GENERAL: Customs Officers remain on board on duty during the vessel's stay in port. They must be fed by the ship and are entitled to the equivalent of officers' mess or first-class dining saloon.

SHIPMASTER'S REPORT: November 1986.

For "off-limits" call at Curacao stores and spares come out on pilot boat. Customs official will be on boat, and Agent or ship chandler will board. No official papers required, just sign and stamp Customs' stores receipt.

SHIPMASTER'S REPORT: January 1990.

Charts: B.A. Charts No. 702 and 1412.

Approaches: No particular difficulties from any direction. Willemstad easily identifiable with its oil refinery, bridge over Sint Anna Baai and hotel on the S.E. entrance to Sint Anna Baai.

Anchorages: None. Aruba, which is approximately 60 miles to the N.W., has a shelf of about 24 m. at the N.W. end, some parts of which are under 'Port Control'. The S.E. shelf is very exposed to prevailing winds and swell.

There is an area 50 miles to S.W., off Venezuela, giving reasonable anchorage, but this is in Venezuelan waters.

Most vessels waiting drift off the South coast of Curacao. We drifted 7 miles off the coast, starting South of Caracas Bay, and in 11 hours drifted to about 6 miles South of Kaap St.Marie.

Pilot: Pilot boards from workboat with white and blue upperworks, 0.5 miles off Sint Anna Bay entrance.

Fort Nassau Signal Station on VHF Channel 12.

Procedure: Isla Refinery (VHF Channel 19) requires cargo grades and amounts, draft, agent, if gas-free, loading rate in cubic metres, tank preparation, facilities required (slops, bunkers, fresh water).

Note: Trim not to be more than 10 ft.

A tug is necessary if trim exceeds 10 ft. and/or vessel not gas-free, and if vessel over certain dimensions. Even if vessel advises necessary information, a tug often appears and should be rejected, otherwise vessel will be liable for a fee.

Tugs: Four tugs available. All are modern Smit harbour tugs, based in Sint Anna Baai, near the Pilot Station at Salazar Wharf.

Max. Size: Pilots reported that present maximum size of vessel to pass through Sint Anna Baai into the Schottegat, is length 936 ft., breadth 160 ft. and draft 45 ft.

Berth: Berth No. 9: For lube oils, maximum size 40,000 displacement tons (near to dockyard). Port side too. After rounding Berth No. 8 dolphin, approach head on with starboard anchor ready. Depending on pilot, a good or poor approach can be made with or without anchor. Care should be exercised aft, as vessel landed heavily on a fender support bracket, which thereafter penetrated the ship's side. Best to hold off and land very gently on large rubber fender.

Two headlines and 2 springs are compulsory forward and aft.

Berth No. 2: Gas oil and Av. Jet, starboard side too. West end of Schottegat.

Berth No. 3: Gas oil and Av. Jet, port side too. West end of Schottegat.

Berth No. 7: Gas oil and Av. Jet, port side too.

All berths have gangways. Mooring boat used at all berths.

Cargo: Berth No. 9: Lube oil. Vessel has loaded up to 6 grades through Chicksans, maximum 4 grades at any one time.

For No. 1 tanks, Chicksans landed on deck and connected to manifold by hoses, otherwise manifold liable to damage due to unsupported Chicksan weight.

Vessel should always request "First foots" and give letter to this effect on arrival. Tank Survey for lube oil is strict.

A lot of paperwork procedure on berthing. Delays can be expected in sampling. At completion sampling/documentation can take up to 5 hours.

As a guide, lube oil rate for large quantities around 2250 bbls./hr., for small quantities 1,000 bbls./hr. At Berths No. 2, 3 and 7 loading rate reported high.

Officials: Agent deals with most paperwork.

Water Police (Immigration) board on arrival.

Documents:

2 Crew Manifests.
2 Bond Lists.
2 Stores Lists.
1 Health Declaration (sited by Immigration).
2 Cargo Manifests.
4 Crew Lists.

If bond or beer being taken, Customs board to seal.

Shore passes required to pass through refinery (free service to be used, no walking inside refinery). Special forms made out by Master.

Two Customs Clearance Forms given by agent on departure, original to be handed to pilot.

General: Radio Holland will not board for repairs on Sundays and public holidays.

Refinery now owned by Curacao Government/Venezuelan partners with refining agreement until 1995.

New floating dry dock at Curacao dry docks (Berth No. B5).

Pontoon bridge across Sint Anna Baai out of commission, due East landing area being damaged by ship.

AUTHORITY: Curacao Port Authority N.V., Werf de Wilde Z/N, P.O.Box 689. Willemstad, Curacao, Netherlands Antilles. *Cables:* Harbour Office Curacao. *Tel:* (9) 611133, 611740. *Telex:* 3339 CURPA NA. *FAX:* 613907. *Contact:* Captain R.F.Frankel, Harbour Master.

AGENT: SEL Maduro & Sons (Curacao) Inc., Maduro Plaza, P.O. Box 3304, Willemstad, Curacao, Netherlands Antilles. Tel: 599-9-76564/76352. Telex: 1092, 3325 or 3393. Selms NA. FAX: (5999) 371266. Cables: "Maduroship".

New Caledonia

BABOUILLAT: 20.23 S. 164.08 E.

SHIPMASTER'S REPORT: October 1983.

LOCATION: Babouillat is a village located at the Northern part of the Island of New Caledonia at approximate position Lat. 20° 23.2′ S., Long. 164° 07.6′ E., at Baie De Nehoue which is incompletely surveyed. There is a chrome ore mine nearby operated by International Nickel France.
DOCUMENTS: Last Port Clearance, 1 Health Form, 2 Store Lists, 2 Personal Effects Lists, 3 Crew Lists. Customs Officers and Agents board vessel on arrival at anchorage. As Agents come from Noumea, 450 km. away from Babouillat (takes 5 hours by car), they come only on arrival and on departure. Any contact should be made by telegram through Noumea Radio Station.
PILOTAGE: Pilot is picked up on arrival at Deverd Passage, Lat. 20° 44′ S., Long. 164° 12′ E., marked by Fl.4s. light buoy. An accurate ETA message is required 24 hours prior to arrival as Pilot comes from Noumea by tug.

Only day time pilotage is possible to Babouillat. Vessels with draft not exceeding 25 ft. can use Inner Route, otherwise the vessel must drift outside Gazelle Passage with Pilot aboard and pass through Gazelle Passage in daylight. Vessels can also await daylight at anchor in Deverd Passage with the Pilot aboard.

For departure, Noumea Pilots require 24 hours' notice. Latest departure time is 1530 hrs.; earliest departure time 0545 hrs. Pilot disembarks at Gazelle Passage.

Also see "VHF".
ANCHORAGES: The anchorage is located at Lat. 20° 22.2′ S., Long. 164° 06.1′ E., 3 cables South of Ilit Ti (80 m. high), with depths from 13.5 m. to 18 m. and good holding ground.

Vessels load high grade low silica fines (refractory), which are chrome ore concentrates of Tiebaghi Area, at the anchorage from barges.
RADIO: Noumea Radio Station.
VHF: Pilot has a portable VHF with Channel 16. Tug which brings Pilot from Noumea has no VHF.
BULK CARGO FACILITIES: Loading effected by ship's gear (cranes) and shore equipment (shovel like 12 tonne capacity equipment which are filled in the barge with a bulldozer and mechanically discharged into the hold). It is possible to load 3,000 to 3,500 tonnes per day with 3 gangs and work from 0500 hrs. to 2200 hrs.
MEDICAL: Doctor is available at Coumac Hospital located at Lat. 20° 34′ S., Long. 164° 16.5′ E. The boarding representative of shippers can make the necessary arrangements.
REPATRIATION: All facilities exist to foreign countries for crew changes and repatriation through Noumea Airport.
AUTHORITY: Province Nord du Territoire de la Nouvelle Caledonie, P.O. Box 41, Kone. *Tel:* 35 54 44. *FAX:* 35 54 75. *Contact:* Christian Ricardo, Secretary General (Kone).
AGENT: Establissement Ballande. Telex: Ballande 025 NM. Cable Address: Ballande, Noumea.

NOUMEA: 22.16 S. 166.27 E. (See Plan)

PORT LIMITS: *Port Area:* Main Harbour as far as entrance between Port Lestelle and Point Kongou.

Secondary Harbour and Orphelinat Bay as far as the entrance between Brun Islet and Point Denouel.
DOCUMENTS:
8 Copies Cargo Manifest.
2 Copies Manifest of parcels to be unloaded for New Caledonian Residents.
2 Copies List of Personal Objects.
(detailing photographic material, audio-visual equipment, watches, etc.).
2 Copies List of Foreign Currency.
2 Copies List of Provisions.
2 Copies Inventory of Consumable Matter.
2 Copies List of Drugs and Narcotics.
(which *must* remain on board).
2 Copies List of Weapons and Ammunition.
(under Master's responsibility).
4 Copies List of Crew Members.
4 Copies List of Disembarking Passengers.
(or notification of no Disembarking Passengers).
4 Copies Transit Passenger List.
1 Copy Maritime Health Certificate.
2 Copies Declaration of Vessel's Specifications.
1 Copy Submission Form.
PILOTAGE: Compulsory for foreign vessels (exemption for vessel with French Registery under 60 m. LOA), pilotage rendered day or night. Ladder to be 1.5 m. above water.

Pilot boats are wooden launches about 15 m. long, with black hull, equipped with VHF (permanent reception on Channel 16. Channels 12, 14 and 17 working). Pilot boats also transmit on 2182, 4072.3 and 8207.4 and receive on 2197.5, 4366.7 and 8731.3

Two access channels to Noumea through reef.
Boulari Channel: (Lat. 22° 30′ S., Long. 166° 26′ E.)
Pilot boards 1 mile off, on the Leads of Amedee Lighthouse.
Havannah Channel: (Lat. 22° 21′ S., Long. 167° 03′ E.)
Pilot boards off Goro Lighthouse on the Leads of Cap N'Dua by day, and off Port Boise at night.

In bad weather, pilot launches remain on leads as close as possible to entrance.

Pilot should be ordered at least 6 office hours before departure or moving.
ANCHORAGES: In Great or Small Road. Prohibited zone shown on chart in vicinity of underwater sealine.
RESTRICTIONS: Vessels may enter and anchor at any time, mooring may be effected at night, except for tankers at buoys.
MAX. SIZE:
Cargo Vessels: Max. draft 10.30 m.
Tankers: Max. LOA – 300 m. Max. draft 14.80 m.
HEALTH: If vessel is "healthy", Pratique is accorded by the Pilot at the entrance, or by the Harbour Master (VHF).

In the case of contagious disease or death on board the Harbour Master must be notified by radio (VHF) before entering inner reef and the vessel must anchor at the Quarantine Station at N'Die (East of Freycinet Islet in Dumbea Bay).
Port Regulations: All vessels must comply with current Quarantine Regulations and if necessary undergo fumigation and disinfestation before tying up.

Before docking, any vessel arriving from a country infected by Rhino Beetle (*Oryctes Rhinoceros*) must:
(a) Anchor 400 m. from the coast between sunrise and sunset, keeping holds closed.
(b) Be visited by a Quarantine Inspector and if necessary disinfested.
(c) Holds must remain closed 2 hours after fumigation.

Infected Countries: Fiji, Tonga, Samoa, Wallis/Futuna, Bismarck Archipelago (New Britain, New Ireland, New Hanover), Sarmi, Manokwari Sorenarwa (Western Irian Jaya), Palau Islands (Carolines), Indonesia, Philippines, Taiwan, Japan, Dominican Republic/Haiti, Cuba.
(d) Any ship coming from Japan is inspected to prevent contamination by *Papillia Japonica*.
(e) Any vegetable goods to be unloaded must be accompanied by a Quarantine Clearance Certificate.
(f) Special permit is necessary from the New Caledonian Agricultural Department prior to importation of plants and seeds, etc.
Hygiene: All ships alongside must be equipped with rat guards.
RADIO: All messages by Coast Station Noumea, call sign FJP. Harbour Master's Office equipped with VHF Channels 16, 12 and 14, operated during normal working hours.
Arrival Advice: To Agent 48 hours before arrival: Indicate: Arrival time at Pilot pick-up point; name of pass; overall length; forward and aft drafts of vessel; damage or mechanical problems, if any to vessel's apparatus and cargo; tonnage to be unloaded; dangerous cargo, explosives, etc.

Note: This information must be lodged with the Harbour Master's Office 24 hours before arrival.

VERY IMPORTANT: Tankers carrying hydrocarbons must notify their Agent as to whether they have or have not the International Certificate for Prevention of Pollution by Hydrocarbons.

To Agent and Pilot Station 24 hours prior to arrival: Confirmation of arrival time at Havannah Passage or passes outside the Southern Zone.

12 hours prior to arrival: Confirmation of arrival time at Boulari Pass.

Note: Application for a Pilot must be made to the Pilot Station during official office hours (Monday to Friday 0700 hrs. to 1100 hrs. and 1330 hrs. to 1730 hrs.; Saturday 0700 hrs. to 1100 hrs.), either by telephone or telegram by the ship's Master addressed to the Pilot Headquarters and transmitted to the Coastal Communications Centre (Tel: 27.32.74).
TUGS: Tug's service is compulsory for vessels over 60 m. LOA. One tug of 1,200 h.p. and 2 of 400 h.p. available to assist. Tugs equipped with VHF Channels 16, 12 and 14.

BERTHING:
Petite Rade (Small Road):

Berth	*Length* (m.)	*Depth* (m.)
Main Wharf (Berth Nos. 1–3)	428	5.50 – 7.00
Coaster Wharf	190	3.50 – 5.50
Coastal Trader Wharf	140	3.50 – 4.50
Tourist Vessel Wharf	75 (with 2 dolphins 155 m. apart)	9.50 (For vessels up to 170.0 m. LOA)
Grande Rade (Great Road):		
Fishing Vessel Wharf	121	8.00
Coaster Wharf	140	3.80 – 5.00
Main Wharf (Berths Nos. 4–7)	694	10.00 – 10.50

Note: Access to Berth No. 4 limited to 8.80 m. by shoal 70 m. off wharf.

There is one mooring buoy 160 m. from the N.W. corner and in line with the main wharf.

BULK HANDLING FACILITIES:
Grain: 3 grain silos of 815 tonnes each.
Cement Berth: Private berth located in Baie de Numbo (position: Lat. 22° 15′ S., Long. 166° 25′ E.). Initially designed for vessels of LOA 135 m. but can handle vessels with a max. LOA not exceeding 168 m. and draft not exceeding 9 m. Vessels berth alongside 3 dolphins 110 m. apart with mooring buoys fore and aft. Middle dolphin equipped with crane, hopper and conveyor. Fresh water available.
Usine le Nickel: Private wharves with 3 berths for ore carriers, tankers and freighters.

Quai Sud: 1 berth, length 170 m., depth 9 m. Equipped with 3 shore cranes for unloading ore carriers.

Quai Nord Ouest: 2 berths. Total length 397 m. Berth No. 3/4 depth 9 m. Berth No. 5/6 depth 10 m. Loading of processed metal and unloading of tankers on behalf of Shell.

Also see "Tankers".

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

SBM: (Societe le Nickel): In the entrance to Grande Rade (position: Lat. 22° 14′ 15″ S., Long. 166° 23.4′ E.). Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m. Pumping rate for No. 2, heavy fuel oil 3,000 cu.m./h.

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

Also see table below.

Black oil	7	7	10	—
	These two terminals are operated by Mobil Oil and are used for discharging and loading tankers as well as for bunkering all types of vessels.		Terminal owned by SLN who makes available its berthing Master. Follow instructions SLN/SIE 146, September 1979.	For tankers containing products for Shell.

LPG Terminal:

Gas carriers berth port side to wharf, against the jetty and the 4 dolphins which make up the Mobil Oil installations in Bay des Dames. Limits: Overall length : 100 m. Draft: 5 m.

Capacity of reservoirs: 3,115 tons. Sphere No. 1: 330 tons; Sphere No. 2: 560 tons; Sphere No. 3: 2,225 tons.

All the spheres can be used for stocking butane.

Sphere No. 1 can also stock propane.

Average density of butane gas: 0.580.

Maximum pressure of liquid: 15 kg/sq.cm.

Normal delivery pressure: 7 kg/sq.cm.

Maximum vapour pressure: 5 kg/sq.cm.

Pumping speed: Maximum 70 t.p.h. Minimum speed: 10 t.p.h.

Hoses used by vessel: 1 hose for liquids 4 in. diameter; 1 hose for vapours 3 in. diameter.

Obligatory requirements for tankers carrying Hydrocarbons: Masters of all vessels carrying hydrocarbons and on the point of entering New Caledonian waters are under obligation to send to the Marine Commander in Noumea (F.U.J.), a message, indicating:

(1) Intended course.

(2) Navigation and manoeuvring possibilities.

6 hours before entering territorial waters.

6 hours before sailing.

Note: During sojourn or transit in New Caledonian waters, permanent radio contact is observed; international radotelephonic call frequency on the maritime metric band.

Tankers must use the following passes:

Havannah or Boulari: Tankers carrying less than 8,000 tons of petroleum products and less than 8 m. draft.

Pilot pick-up point 5 nautical miles off Boulari:

1. Entry via Boulari Pass if less than 20,000 tons of petroleum products and draft under 10 m. (night or day);

2. Entry via Dumbea Pass if more than 20,000 tons of petroleum products or more than 20 m. draft (daytime only).

Thio and Poro:

Tankers: Less than 20,000 tons of products and draft under 10 m.

Very Important:

Docking of tankers is in accordance with the possession of:

International Certificate for the Prevention of Pollution by Hydrocarbons; consequently:

This must be indicated to ship's Agent 48 hours prior to arrival.

Certificate must be shown to Pilot at the entrance, and to the Harbour Master or his representative upon docking.

STEVEDORES: Service provided by three private companies. 2 or 3 days' notice required to arrange work.

Working Hours: Normal Hours: Monday to Friday 0700 hrs. – 1100 hrs. and 1300 hrs. – 1700 hrs. Overtime: Monday to Friday 1800 hrs. – 2300 hrs., Saturday 0700 hrs. – 1100 hrs. and 1300 hrs. – 1700 hrs.

MEDICAL: Clinique de Magenta, Rue du 18-Juin, Magenta, Box H5. Tel: 28.49.29.

Clinique Magnin: Route Territoriale No. 13, Vallee des Colons, Box 64. Tel: 27.26.01.

Hospital Gaston-Bourret, Avenue Paul-Doumer, Noumea, Box C5. Tel: 27.21.21.

Polyclinique de l'Anse-Vata, Route de l'Anse-Vata. Tel: 26.14.22.

Note: Numerous dispensaries located in villages and mining centres of the interior. If necessary, urgent medical evacuation possible by plane or helicopter.

DENSITY: 1026.

FRESH WATER: Supplied by pipe-line at the quays in the Commercial Port, S.L.N. and Numbo Private Cement Factory; rate, 40 t.p.h.

FUEL: Refuelling with marine diesel oil (M.D.O.) or bunkering fuel oil (B.F.O.) is possible.

Authorisation previously obtained by the shipowner from the Australian or French Head Offices of the 3 companies present in Noumea can aid local formalities:

Mobil Tel: 27.31.52

Shell Tel: 28.57.20

Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m., draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

CONSULS: Australia, 19-21 Avenue du Marechal-Foch, Noumea. B.P. 22. Tel: 27.24.14. Cables: Austcom. Telex: 087 NM.

Belgium, 13 Rue Jules-Ferry, Noumea. Box 2683. Tel: 28.46.46.

Indonesia, 4 Rue de Strasbourg, Noumea. Box 26. Tel: 28.25.74.

New Zealand: 4 Boulevard Vauban, Noumea. Box 2219. Tel: 27.25.43. Cables: Kereru. Telex: 036 NM.

REPAIRS: Many engine, hull and electronic repairs can be effected. Slipway for small vessels. One slipway, to lift vessels of 1,000 tonnes.

SURVEYORS: *Marine Surveyors:*

Bureau Naval Serve, 32 Rue du General-Gallieni, Noumea. Tel: 28.25.02.

Bureau Veritas, 21-23 Rue de l'Alma, Noumea. Tel: 27.20.31.

Lloyd's Register of Shipping, 7 Rue Anatole-France, Noumea. Tel: 27.20.83.

For all problems relating to cargo and/or vessel damages.

Draft surveys for estimation of nickel ore loads per ship.

Classification Societies:

Lloyd's Register of Shipping, Societe W. A. Johnston, 7 Rue Anatole-France, Noumea, Box 445. Tel: 27.20.83. Cables: Johnston. Telex: 070 NM.

Bureau Veritas, Societe des Etablissements Ballande, 21-23 Rue de l'Alma, Noumea, Box C4. Tel: 27.20.31. Cables: Ballande. Telex: 025 NM.

Germanischer Lloyd and Nippon Kaiji Kyokai. Bureau Naval Serve, 32 Rue Gallieni, Noumea, Box 2387. Tel: 28.25.02. Cables: Surveyor. Telex: Gemar 065 NM.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.
CARGO GEAR: Ship's gear normally used. Possibility of hiring cranes 10 tons – 104 tons.
REPATRIATION: All facilities available for crew change and repatriation.
AIRPORT: Tontouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.
TIME: GMT plus 11 hours. N.B. Daylight saving is sometimes introduced between December and February.
HOLIDAYS: 1st January, Easter Monday, 1st May, Pentecost Monday, Ascension Day, Whit Monday, 14th July, 15th August, 24th September, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.
POLICE/AMBULANCE/FIRE: Police, Tel: 17; Fire, Tel: 18; Ambulance, Tel: 27.21.21.
EMERGENCY CO-ORDINATION CENTRE: Call "Noumea Marine" on VHF Channel 11.
BANKS: Banque de l'Indochine et de Suez, Corner of Rue de l'Alma and Avenue du Marechal-Foch, Noumea. Box G5 Tel: 27.22.12. Cables: Indosuez. Telex: 023 NM.

Banque Nationale de Paris/Nouvelle-Caledonie. 60 Avenue de la Victorie, Noumea. Box K3. Tel: 27.55.55. Cables: Natio Par. Telex: 022 NM.

Banque de Nouvelle-Caledonie Credit Lyonnais. 75 Rue de Sebastopol, Noumea. Box L3. Tel: 28.50.69. Cables: Calbank. Telex: 091 NM.

Banque de Paris et des Pays-Bas-Nouvelle-Caledonie. Corner Rue del'Alma et Rue Georges-Clemenceau, Noumea. Box J3. Tel: 27.51.81. Cables: Paribas. Telex: 086 NM.

Societe Generale Caledonienne de Banque. 56 Avenue de la Victorie, Noumea. Box G2. Tel: 27.22.64. Cables: Pacsoge. Telex: 067 NM.
STORING: See "Prelims".
1. By Truck.
2. None.
3. Yes.
4. Yes.
5. Duty Free.
6. Yes.

WEATHER: *Wind:* The prevailing wind is the South-Easterly Tradewind blowing regularly from June to October.

N.B.: The Tradewind freshens with the sun.
Close to shore: Maximum around 1400 hrs.
Open Sea: Maximum around 1800 hrs.

Cyclone Season: From November to April (variable winds, rain, gusty conditions).
Rainfall: Dry season: Minimum 50 mm./month.
From January to March: Heaviest rainfall owing to the Cyclone season.
Rainfall varies between coasts depending on their exposure to winds.
Temperature: Average temperature: 24°C.
The maximum temperatures are during the month of February: 34°C.
Tides: Semi-diurnal type affected by daily inequalities. The high and low April tides are on an average 0.40 m. higher/lower than the October tides.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Recommended that crew carry Seamen's Books.

SHIPMASTER'S REPORT:
Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Shore Telephone. Service available as receivers can be connected.

VHF. Available to Harbour Office and pilot station during office hours 0700 hrs. to 1100 hrs. and 1300 hrs. to 1700 hrs. Monday to Friday. Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.
Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.
Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.
Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.
Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length. No limit at berth.
Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 hrs. to 1100 hrs. then 1300 hrs. to 1700 hrs. and overtime from 1800 hrs. to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.
Documents:
1 Cargo Manifest.
1 List of Dangerous Cargo.
2 Crew Lists.
1 Crew Personal Effects List, this list to include currency held, (French Forms accepted).
1 Bonded Stores List.
1 Health Form.

OUTPORTS: (See Plan).
For Ore loading vessels:
Nepoui: Lat. 21° 20.1′ S., Long. 164° 25.5′ E.
LOA vessel 163 m. Draft 8.7 m. Telescopic shuttle clearance 12.5 m. Loading rate 1,250 t.p.h.
1 Launch available.
Tankers: 6 in. flexible hose, weight 2 tons, 8 in. pipe-line. Pumping rate 200 t.p.h. Pressure 7 kg./sq.cm.

Thio: Lat. 21° 37.5′ S., Long. 166° 15.5′E.
LOA vessel 170 m. Draft 10.8 m. Telescopic shuttle clearance 11 m. Loading rate 686 t.p.h.
1 Launch available.
Tankers: 6 in. flexible hose weight 2 tons. 6 in. pipe-line. Pumping rate 130 t.p.h. Pressure 7 kg./sq.m.

Kouaoua: Lat. 21° 24′ S., Long. 165° 49.8′ E.
LOA vessel 150 m. Draft 8.5 m. Telescopic shuttle clearance 10.5 m. Loading rate 628 t.p.h.
2 Launches (1 shared with Poro) available.

Poro: Lat. 21° 19′ S., Long. 165° 44′ E.
LOA vessel 169 m. Draft 9 m. Telescopic shuttle clearance 11.05 m. Loading rate 900 t.p.h.
2 Launches (1 shared with Kouaoua) available.
Tankers: 8 in. flexible hose, weight 2 tons. Pipe-line 6 in. Pumping rate 130 – 150 t.p.h. Pressure 7 kg./sq.cm.

Baie Ugue: Lat. 21° 09′ S., Long. 165° 33′ E.
LOA vessel 170 m. Draft 11 m. Telescopic shuttle clearance 12 m. Loading rate 600 t.p.h.
1 Launch and 1 tug 400 h.p. available.

Loading of Ore by Lighters:
Vessels anchored in bays, sheltered from the ocean swell by the barrier reef, but not sheltered from heavy seas caused by wind.
West Coast: Poum/Paagoumene, Karembe, Teoudie, Poya, Bourail (anchorage and mooring buoy), Bay N'Go (anchorage and mooring buoy).
East Coast: Moneo, Kouaoua, Nakety, N'Goye, Ouinne (anchorage and mooring buoy).
Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.
1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.
Depending on:
1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plan).
Art Island – Wala Wharf: Lat. 19° 43′ S., Long. 161° 19′ E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35′ S., Long. 166° 33′ E. Wharf orientated W.N.W./E.S.E., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Lifou Island – We Wharf: Lat. 20° 55′ S., Long. 167° 17′ E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Mare Island – Tadine Wharf: Lat. 21° 33′ S., Long. 167° 53.5′ E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7′ S., Long. 167° 26′ E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Touho Bay: Wharf orientated E.N.E./W.S.W., parallel to shore – 4 bollards. Length 12.6 m. Width 6.7 m. Wharf top 4 m. above low tide. Deep water at 20 m. from end of wharf.

Paagoumene Wharf: Lat. 20° 29.2′ S., Long. 164° 10.5′ E. Wharf orientated N.E./S.W. Length 15.6 m. N.E. section: Length 30.5 m. S.W. section: Length 43 m. Overlapping landing stage, 2.14 m. Wharf top 3.83 m. above low tide.

AUTHORITY: Port Autonome de Noumea, Avenue Cook, P.O.Box 14, Noumea. *Tel:* 27.59.66. *Telex:* Care of "Comin" 045 NM. *Contact:* Andre Courtot, Port Director. Jean Louis Boglio, Port Captain.

NOTES

Please also advise Shipping Guides Ltd.

New Zealand

GENERAL: All ports.

AGRICULTURE:

Masters of all vessels are required to notify the Ministry of Agriculture and Fisheries, located at the place of their expected arrival, a minimum of 12 hours before the estimated arrival time.

The New Zealand Ministry of Agriculture and Fisheries requires a Shipmaster's Bond and Guarantee (Form Ag.L35) to be completed in triplicate if vessel is carrying animals, i.e. cats, dogs, fish, birds, etc.

In addition, the Masters of all overseas vessels are required to complete in duplicate a Ship's Meat Locker Certificate (Form Ag.L36). Ship's Meat Lockers (chambers) containing prohibited meat from overseas countries are sealed on arrival at the first port in New Zealand, and must remain sealed during the vessel's stay on the New Zealand coast.

All goods of an agricultural nature must be held until they have been inspected and a Permit to Land (Form Ag.G.78) issued by the Ministry of Agriculture and Fisheries.

Crews signing-off are required to check with the Border Protection Officer and obtain Release/Treatment of any agriculture items which they wish to take ashore.

Authority: Ministry of Agriculture and Fisheries, P.O.Box 12108, Wellington. *Tel:* (04) 738996. *Telex:* MAF WN NZ 31532. *FAX:* (04) 732975. *Contact:* National Manager, Border Service.

NOTE: New regulations will be introduced during 1990/91. This will require new forms and changes to control measures for animals and animal and plant products on board. These changes will be published in the Ministry of Agriculture and Fisheries Port Information Manual.

SHIPMASTER'S REPORT:

Health: Coming from an Australian port the clean Bill of Health was accepted.

Documents: 2 Poison Lists (if there is poison in the cargo). 2 Reports of Pillaged Cargo (marks and numbers).

Cargo Gear: When working general cargo with derricks "in union purchase" without preventer guys, ship (via Agent) must seek an exemption from Regulation 2 (a) of the General Harbour (Safe Working Load) Regulations 1935 Amendment No. 5 by applying for dispensation from the Chief Surveyor of Ships, Marine Department, Ministry of Transport, Private Bag, Wellington.

AUCKLAND: 36.51 S. 174.45 E. (See Plan)

PORT LIMITS: South of a line drawn from Toroa Point to the S.W. Point of Rakino Island.

DOCUMENTS:

3 Copies Passenger List.
3 Copies Crew List.
1 Copy Search List (Form 2).
1 Copy Stores List (Form 3).
1 Copy Prohibited and Restricted Immigrants.
1 Copy Poisons List.
1 Copy Animals and Birds List.
1 Copy List of Firearms (not cargo).
1 Copy Arrival Manifest (Form 1), plus 2 for other ports visited (Reg. Form 16 refers).
1 Copy of List showing the gross tonnage of cargo for discharge in New Zealand.
3 Copies Shipmaster's Bond and Guarantee (Form Ag.L35).
2 Copies Meat Locker Declaration (Form Ag.L36).

Ship's Register to be presented to the Harbour Master on first visit to the port.

Also see "Health".

PILOTAGE: Vessel approaching port to give 24 hours' notice by radiotelegraphy and addressed "Shipping Services Manager Auckland". A second notice by radiotelephone confirming or amending first to be sent 4 hours before expected time of arrival. Signal Station on Mt. Victoria, call sign "Auckland Harbour Radio", calling frequency 2182 kHz, working frequency 2012 kHz. VHF, call sign "Auckland Harbour Radio", Channel 12 and 16. Continuous listening watch on Channel 16.

Pilot boat is 13.0 m. long "Stockcraft", painted blue and white, speed 30 knots. Reserve pilot launch is 20.0 m. long, single mast, painted white. Name is *Akarana.* Standard flag and lights are shown. Word "Pilot" painted in black on white above cabin.

Pilots board 1 mile North of Rangitoto Beacon, but will proceed farther when necessity arises. Good pilot ladder with manrope required to within 1.5 m. of water-line with proper lighting at night. Heaving lines will be needed for mail.

ANCHORAGES: For vessels waiting Pilot: (Bearings and distances from Rangitoto Beacon). Gulf Anchorage No. 1 bearing 000° distance 2 miles; No. 2 bearing 006° distance 2.5 miles; No. 3 bearing 012° distance 3 miles.

All inner anchorages in pilotage area can be indicated by Pilot. All anchorages are in 11 m. – 18 m. with good holding ground.

RESTRICTIONS: Ships may enter harbour at any time of day or night. Main channel has least depth of 11 m. chart datum. Vessels with greater draft must wait for tide to make and enter at Harbour Master's orders. Tankers not berthing immediately on arrival anchor as directed at one of Gulf Anchorages.

See "Bridges".

MAX. SIZE: No limits, within reason, on the length or breadth. Controlling depth at chart datum: entrance 11 m.; Rangitoto Channel 11 m.; anchorages 9.8 m. – 15.0 m.; berths 6.09 m. – 12.20 m.

HEALTH: 12 – 24 hours before arrival time, despatch message to Port Health, Auckland. Message to state ETA, last port, and date of departure therefrom, number of crew, number of passengers and state of health and indicate if there is a doctor amongst the crew. 12 hours before arrival confirm ETA.

Doctor boards by way of vessel's shipside gangway (not pilot ladder) when in harbour. This gangway to be ready immediately on arrival in order to avoid any delay. A responsible person should meet doctor at head of gangway and conduct him to appropriate person. In most cases vessels now cleared alongside if pratique not granted.

Papers Required:

Completed Maritime Declaration of Health.
Derat Certificate.
Complete Crew List with dates of last vaccinations.
N.B. Crew and Passenger Lists to be certified as being correct by the Master.
List of Addresses of Disembarking Passengers.
List of Dangerous Cargo on board.

Pratique is granted initially, and covers all subsequent coastal movements in New Zealand for that voyage. Radio Pratique can be granted only after prior approval from New Zealand Health Department.

Vessels requesting Pratique should exhibit appropriate International Code Signals by day and night until Pratique is granted.

RADIO: Station for routing traffic to the Auckland area is Auckland Radio. Call sign ZLD. Working both W/T and R/T on continuous watches.

VHF: See "Pilotage".

RADAR: Radar station with range of 72 km. located on Mt. Victoria Lat. 36° 49′ 42″ S., Long. 174° 47′ 57″ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on radar screen. Responsibility for the use of this information rests entirely with Master of vessel.

TUGS: 3 working tugs available, 1 on stand-by. Tugs join vessel East of Eastern Tide Wall. Tugs supply lines at no extra charge.

BERTHING: Tankers berth at Wynyard Wharf depot. Tankers must arrive at pilot station not later than 30 minutes before sunset, otherwise berthing will be postponed until following morning.

Depth of Water: Bledisloe 10 m.; Captain Cook 8 m. – 10.5 m.; Hobson 4 m. – 6 m.; Jellicoe 10 m. – 11 m.; Bledisloe West 12 m.; Marsden 3.5 m. – 8 m.; Princes 10 m. – 11 m.; Queens 9 m. – 11 m.; Wynyard 9 m. – 11 m.; Freyberg 10 m. – 11 m.; Fergusson 12.2 m.

CRANES: At Fergusson Container Terminal there is 1 twin lift container crane of 45.72 tonnes capacity and 2 single lift container cranes of 40.64 tonnes capacity. In the conventional cargo port quay-side cranes of 5 tonne capacity are provided at Freyberg and Jellicoe only. At the bulk fertiliser berth there are 5.5 tonne capacity multi-wire grabbing cranes and at the bulk sugar berth there is a 5 tonne capacity gantry grabbing crane.

BULK CARGO FACILITIES: *Cement:* A special berth is provided where bulk cement is discharged pneumatically via pipe-line to privately owned silos. Depth at chart datum 6.0 m., quay length 94 m.

Sugar: Bulk sugar is discharged at Chelsea Wharf. This wharf is equipped with a 5 tonne capacity gantry grabbing crane and a conveyor system connected to the refinery store. Depth at chart datum 9.9 m. Quay length 91 m.

Fertiliser: 1 berth is set aside for the discharge of bulk fertiliser bases. 5.5 tonne capacity multi-wire grabbing cranes are available. Depth at chart datum 11.0 m. Quay length 335 m.

4 other berths can also be made available for discharge of dry bulk cargo as required.

See "Bridges".

SPECIALISED CARGO HANDLING FACILITIES:

Tanker Terminals: 2 berths are at a continuous quay 486 m. long, depth at chart datum 9 m. – 11 m. The berths are connected by pipe-line to adjacent tank farms.

Container and Ro/Ro Facilities: Fergusson Wharf Container Terminal: Quay length 610 m. Depth at chart datum 12.2 m. The terminal is equipped with 3 Vickers Hoskins/Paceco gantry container cranes, 2 single lifts of 40.64 tonnes capacity and a twin lift of 45.72 tonnes capacity. Total back-up area of the terminal is 21.71 hectares of which 17.41 hectares is used for container handling and storage and 4.30 hectares is used for container repairs and LCL containers. Included in the latter area is the Monash Street Container Base which provides 7,432 sq.m. of covered transit storage for LCL cargo. Rail exchange sidings are located immediately adjacent to the terminal. There are power outlets for 1,424 refrigerated containers. Container terminal equipment includes 17 straddle carriers as well as various tractors and fork lift trucks. The terminal is operated by the Port Authority.

Freyberg Wharf: A common user Ro/Ro berth for quarter ramp vessels up to 228 m. in length is provided at Freyberg Wharf.

Bledisloe Ro/Ro Terminal: Quay length No. 1 Berth 137 m., No. 2 Berth 224 m. Depth at chart datum 9.5 m. Each berth is equipped with a link span with a fork lift axle load capacity of 56.9 tonnes and a low loader capacity of 182.9 tonnes. No. 2 Berth can accept ships equipped with a port quarter ramp. A total back-up area of 4.8 hectares is provided including a cargo shelter of 4,000 sq.m. and rail exchange sidings.

Bledisloe West Wharf: Length 285 m. Depth alongside 12.3 m. Handles ships with unitised cargo, including container ships. A total back-up area of 2.8 hectares is served by 1 × 35 ton Samba gantry crane and 4 heavy duty forklift trucks.

BRIDGES: Navigation in daylight hours only under Auckland Harbour Bridge. Navigation span is 45.2 m. – 43 m. above MHWS for 76 m. each side of centre. Only ships berthing at Chelsea Wharf sugar berth need pass under the bridge.

STEVEDORES: Labour commences at 0730 hrs. In order to ensure labour for this time ETA should be received at Agent's office before 1500 hrs. previous day, or before 1500 hrs. previous Friday for a Monday start. Delays on radio messages may be up to 3 hours.

MEDICAL: In case of urgent medical attention being required, Agents can arrange for doctor to board in stream at any notice. Hospital and ambulance services available 24 hours.

TANKERS: See "Special Cargo Handling Facilities".

Any size pipe-lines can be used, oil companies have all reducing pieces needed.

No facilities for slop discharge.

DENSITY: Always 1025.

FRESH WATER: Fresh water always available. Delivery rate 80 t.p.h., through canvas hoses. Ports of Auckland supplies all equipment.

FUEL: Light fuel oil, diesel, gas oil and heavy fuel are available. To be ordered in ETA notice.

FIRE PRECAUTIONS: In addition to usual precautions, Class 1 tankers are under extra security with a nightwatchman from Harbour Master's staff in addition to the normal tanker guard.

CONSULS: (Consuls, Trade Commissioners, etc.): Australia, Belgium, Brazil, Costa Rica, Denmark, El Salvador, Fiji, Finland, France, Germany F.R., Greece, Ireland, Italy, Japan, Korea (South), Nauru, Netherlands, Norway, Peru, Philippines, Portugal, Sweden, Switzerland, Tonga, Turkey, U.K., U.S.A., Venezuela, Western Samoa.

REPAIRS: Ship repairs can be carried out. Private slipways are available to 1,000 tons.

DRY DOCKS: Max. size of vessel that can be accommodated in Calliope Dry Dock, operated by the Ministry of Defence, is 181.35 m. LOA and 19.8 m. beam. Water on sill at MHWS 10 m.

SURVEYORS: American Bureau of Shipping, Bureau Veritas (Paris), China Corporation Register of Shipping, Det Norske Veritas, Germanischer Lloyd, Lloyd's Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale, USSR Register of Shipping.

GANGWAY/DECK WATCHMEN: Watchmen are necessary. Best to use crew. Also see "Fire Precautions".

OPENING/CLOSING HATCHES: Crew open completely mechanical hatches only. All other hatches opened by waterside workers.

CERTIFICATES: Register, Derat, Load Line, Safety Equipment, Safety Radio, Articles of Agreement, are main Certificates required.

CUSTOMS ALLOWANCES: 1 bottle of spirit (in use) *or* 1 bottle of wine (in use) *and* 12 quart bottles (or the equivalent) of beer, 200 cigarettes *or* half a pound of tobacco *or* 50 cigars. For ship use only. To be declared on Search List. Also gifts up to a total value of $100.0 may be landed.

CARGO GEAR: Preventer guys must be entirely wire. All blocks and shackles must be moused. Safety strops on all heel blocks. All wires, ropes, chains and blocks to have Certificate of Test.

REPATRIATION: All facilities exist for repatriation.

AIRPORT: 23 km. from harbour to airport. Served by all major international airlines.

TIME: Local time is GMT plus 12 hours, add 1 hour for Summertime, October to March.

HOLIDAYS: Only the Container Terminal works during the following holidays. New Year's Day (1st January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Labour Day (fourth Monday in October); Boxing Day; Waitangi Day (early February). In addition, each Province has an Anniversary Day and a Waterside Workers' Picnic Day. In Auckland these are in last half January.

POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.

TELEPHONES: Telephones at all berths. Cost is $3.02 fee phone per day, plus the cost of any overtime incurred in connecting or disconnecting any such telephone. Telephones (coin operated) may be hired for use of crew on application to Post Office.

SERVICES: Services include tank cleaning, compass adjusting, all cargo surveying, average adjusting, etc. Tank washings may be pumped to road tankers.

SHORE LEAVE: Crew members may go ashore.

IDENTIFICATION CARDS: Not required.

REGULATIONS: All guests aboard vessel in the evening must have passes signed by the Master. All visitors' passes expire at 2300 hrs. All ships in port are subject to the Rules and Regulations contained in the Harbours Act 1950, and the By-laws of Ports of Auckland Ltd. On first visit to the Port copies of these and other relevant Regulations are supplied to ships.

DELAYS: There are seldom any delays awaiting berths.

GENERAL: *Refuse Disposal:*

It is important that no refuse be allowed to pass into tidal waters either directly or indirectly. This is covered by strict Government Regulation.

Masters should ensure that refuse is lowered into refuse boat "Manui" and not thrown into boat from any great height.

No refuse will be collected from stern of vessel as this is hazardous for collection craft. A suitable site in way of the flat side of the vessel on off shore side should be chosen.

DEVELOPMENTS: An additional container crane will be installed in 1992.

AUTHORITY: Ports of Auckland Ltd., P.O.Box 1281, Auckland, New Zealand. *Tel:* 3660055. *FAX:* 375822. *Contact:* G. J. Bissell. Secretary. G. R. Mowday, Public Relations Manager.

BLUFF: 46.37 S. 168.22 E. (See Plan)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory. Pilots board vessels from launch in position Lat. 46° 39′ S., Long. 168° 21′ E. Arrangements regarding boarding will be made by VHF Channel 16 with Bluff Harbour Radio.

Vessels, other than those which are exempt from pilotage, must not proceed within the pilotage area without a Pilot.

A 24 hour pilotage service for tidal conditions. Vessels generally enter and leave the port at slack HW and slack LW.

Caution: Vessels stopping to pick up a Pilot are particularly warned not to approach entrance shoal too closely, especially during flood stream as stream sets strongly on to entrance shoal, North-Eastward.

Coastal Pilots: Coastal Pilots are available on 24 hours' notice for piloting service from Tairoa Head to Milford Sound.

Stewart Island Pilotage: The area within the Stewart Island Pilotage District is a Compulsory Pilotage District. The definition of this area can be obtained from the South Port NZ Ltd. who are the Stewart Island Port Authority and provide Pilots.

ANCHORAGE:

Southward of Stirling Point: In fine weather, vessels missing tide may anchor in 10 to 12 fathoms with Stirling Point lighthouse bearing about 356° and Dog Island lighthouse bearing about 108°.

Eastward of Dog Island: Anchorage for vessels delayed longer than 6 hours awaiting to enter Bluff is situated 5 miles East of Dog Island.

Safe anchorage in heavy Westerly weather may be found off the N.W. coast of Stewart Island between Otaku Point and Gull Rocks, position: Lat. 46° 47′ S., Long. 168° 02′ E.

RESTRICTIONS: The safest time to enter the harbour is at slack water. Strict attention should be paid to radio messages passed from the Harbour Authority Operations Office. No vessel should attempt to enter without a Pilot, unless possessing local knowledge.

Least depth in fairway is 8.53 m. on Northern edge of Channel Rocks; also 7.62 m. (about 1 cable West North-Westward of the tidal beacon).

MAX. SIZE: Length 198 m., beam 29 m. Vessels of over 182 m. length and/or 28 m. beam are restricted to HW arrival and departure. Vessels up to Panamax size 225 m.×33 m. will be handled at a reduced draft at the Manager – Operation's discretion.

Max. draft is 9.7 m. ordinary HW and up to 10.0 m. at HW Springs. LW max. draft is 7.0 m. up to 7.5 m. at Neap tides.

HEALTH: Radio Pratique available at Berth.

RADIO/VHF: A continuous watch is maintained by the Harbour Authority Operations Department and vessels can communicate by radio-telephone or VHF. Call sign is "Bluff Harbour Radio", calling frequency is 2182 kHz, and the working frequency is 2012 kHz. VHF radio having Channels 16 and 12. A continuous watch is maintained on 2182 kHz and VHF Channel 16.

TUGS: Two tugs are available. Both twin-propulsion Voith Schneider vessels of 1,200 i.h.p. and 15.3 tons static pull and 2,600 h.p. and 30 tons. Both vessels are equipped for fire fighting and salvage. Tugs supply towing lines.

BERTHING:

Wharves	*Length Wharf* (m.)	*Max. Length Vessel* (m.)	*Berth Depth MLWS* (m.)	*Max. Draft* (m.)	*Deck Above MLWS* (m.)
Island Harbour No. 1	160	150	8.0	7.7	4.37
Island Harbour No. 2	190	170	8.0	7.7	4.37
Island Harbour No. 3A	152	150	9.4	9.15	4.37
Island Harbour No. 3 Island Harbour No. 4	426	198	10.0	9.7	4.37
Island Harbour No. 6	135	90	8.0	7.6	4.37
Island Harbour No. 5	213	198	10.0	9.7	4.37
Island Harbour No. 7	100	90	9.1	8.5	4.37
Island Harbour No. 8	230	198	11.0	10.0	3.77
Town Wharf No. 11	210	192	10.0	9.7	3.46
Town Wharf No. 12	183	180	9.0	8.7	3.46
Town Wharf No. 14	157	140	8.3	8.0	3.46
Ferry Wharf	200	150	7.0	6.5	4.19
Tiwai Wharf – (273 m. including mooring dolphin)	200	250	11.5	11.0	5.68

Vessels of a greater length may berth at these berths at the Manager – Operation's discretion.

All Island Harbour Berths except Nos. 6, 7 and 8 have rail access. No rail at Tiwai Wharf or Town Wharf.

Bulk phosphate or sulphur cargoes are discharged into hoppers thence road trucks.

A Ro/Ro linkspan is situated at Berth No. 1.

A bulk grain facility serves Berth No. 2. Silo capacity 6,600 tonnes, loading rate 500 tonnes/p.h. Bulk tallow is loaded at Berth Nos. 3 and 3A. Ten storage tanks with total capacity of 4,775 tonnes are connected to ship's side by a 300 mm. diameter heated pipe-line giving a loading rate of 400 tonnes/p.h.

Four all weather meat-loaders are situated at Berth No. 5.

Berth No. 8 is a bulk woodchip loading facility (via conveyor) and also serves the log and sawn timber trade. Grain and coal are also loaded at No. 8 Berth via truck ramp to conveyor.

Bulk cargoes for Tiwai Aluminium Smelter are discharged at the Tiwai Wharf by a mobile twin unit pneumatic unloader with a capacity of 300 tonnes/p.h. A dedicated vessel "TNT Altrans" discharges alumina via air slide to smelter at over 800 t.p.h.

STEVEDORES: Agents require ETA in advance to arrange labour for cargo handling. Two stevedoring companies are available.

MEDICAL: Port doctor available through Agents. Nearest hospital is at Invercargill City, 16 miles from Bluff. Medical service whilst at sea through Awarua radio.

TANKERS: Tankers are berthed at Berth No. 11 Town Wharf. Side connections are to be used. Only 1 pipe-line connection on wharf. Black products are handled through 250 mm. lines, white products through 200 mm. lines. Bitumen tankers discharge at No. 12 Berth.

No vessel carrying a cargo of motor spirit or having discharged such cargo will be handled during the hours of darkness without prior agreement with Port Company and Master of vessel.

Oil cargoes for Tiwai Point discharged at Tiwai Wharf via manifold and 300 mm. pipe-line.

DENSITY: 1025.

FRESH WATER: Available alongside all berths, rate 20 tonnes/p.h.

FUEL: Bunkering facilities are available. Boiler fuel is supplied by 8 in. diameter pipe-line located at Berth No. 11, Town wharf. Delivery rate 240 t.p.h. Limited quantities of coal, light diesel oil and lubricating oil can be arranged for delivery by road or rail to the wharves.

Gas oil available by pipe-line at Berth Nos. 11, 12 and 14 and by road tanker at all other berths.

GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Carried out by crew if automatic hatches. Otherwise by stevedores.
CUSTOMS ALLOWANCES: See "Auckland".
REPAIRS: Major repair work can be undertaken by various machine shops situated at Bluff and Invercargill. A diver is available for underwater inspections through Agents.
DRY DOCKS: The Board operates a "Syncrolift" docking facility capable of accommodating vessels with a displacement up to 1,000 tonnes on a platform 40.3 m. × 13.4 m. The installation is designed for future extension to a capacity of 1,700 tonnes on a platform 65.6 m. × 13.4 m.
REPATRIATION: Facilities exist.
AIRPORT: Internal air services from City Airport, Invercargill, 16 miles by road connecting with international airports of Christchurch, Wellington and Auckland.
TIME: GMT plus 12 hours. Summer Time GMT plus 13 hours from November to March (actual day may vary).
HOLIDAYS: The following days will not be worked at Bluff: Christmas Day, New Year's Day, Good Friday, Anzac Day and Picnic Day (usually 4th Monday in January).

Other statutory holidays worked by arrangement.

POLICE/AMBULANCE/FIRE:

	Tel. (Emergency)	*(Other)*
Ambulance	111	Inv'gill 83099
Police	111	8844*
Fire Brigade	111	8050

* If no reply ring Invercargill 44039.

TELEPHONES: All vessels can be connected with telephone system, through their agent.
SERVICES: Compass adjusting, refuse collection daily.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
AUTHORITY: South Port NZ Ltd., P.O.Box 1, Bluff, New Zealand. *Tel:* 02137-8159. *Telex:* 5206 Onebluf NZ. *FAX:* 02137-8685. *Contact:* N.C. Cantrick, General Manager. Captain J.A. Henderson, Manager, Operations and Chief Pilot.

GISBORNE: 38.42 S. 178.02 E. (See Plan)

PORT LIMITS: All of Poverty Bay within a line from the Northern point of Young Nick's Head to Tuaheni Point.
DOCUMENTS: See "Auckland".
PILOTAGE: Telegraphic address – General Manager, Gisborne. Advance notice – 24 hours before ETA. VHF Channel 16 and 12.

Pilot boat is painted white with word "Pilots" on both sides, 13.71 m. in length; exhibits pilot flag or lights. Pilot boards on line of leads (332°) 2 miles from breakwater light.

ANCHORAGE: Vessels awaiting Pilot and berth anchor with Tuaheni Light bearing 084° 3.2 miles in 18.29 m. of water.
RESTRICTIONS: Vessels may be berthed at night according to size, draft and weather conditions.
MAX. SIZE: Maximum length 173.72 m. Beam, no restriction. Draft, 8.6 m. at HW, 7.0 m. at LW. Contact General Manager for current situation as there can be slight variations according to heights of tide and weather conditions.
HEALTH: Same procedure as "Auckland".
RADIO: Auckland Radio ZLD, Wellington ZLW.
VHF: Signal station not permanently manned. Listening watch Monday–Friday 0800 – 0815 hrs.; 1130 – 1145 hrs.; 1330 – 1345 hrs.; 1600 – 1615 hrs. Signalman in attendance 1 hour before vessel's arrival. Call sign: "Gisborne Harbour Radio", Channel 16 and 12.
TUGS: Tug joins vessels in channel outside breakwater. Normally use tug's lines, no extra charge.

A twin screw Schottel Rudder/Propeller 22 m. steel tug is in service. Bollard pull 14 tonnes, 1,000 h.p.

BERTHING: 213.35 m. at 9.75 m. depth at LW; 426.7 m. at 5.49 m. – 6.1 m. depth at LW.
Moorings: Shore hawsers placed on vessels on arrival.
SPECIALISED CARGO FACILITIES: Two 1,000 tons silos for bulk grain, etc. behind Berth No. 7 and a conveyor for loading grain, etc. in ships. Loading rate 400 t.p.h. There is also a fish unloader, rate 40 t.p.h.
STEVEDORES: Advice of ETA and particulars of stowage required in order that required number of gangs can be ordered. Hours of work, Monday to Friday, 0700 – 1200 hrs., 1230 – 1530 hrs.; Saturday, 0700 – 1200 hrs. Extended hours by agreement.
MEDICAL: No advance advice required for medical attention. Full hospital facilities available.
TANKERS: Tankers discharge petrol and diesel oil.
DENSITY: 1025 at all stages of tide.
FRESH WATER: Available by 63 mm. (2.5 in.) hoses at approx. 20 t.p.h. per hose.
FUEL: Fuel is at present only available by rail tanker and should be ordered through ship's Agent in advance.
CONSULS: None.
REPAIRS: Normal maintenance repairs.
DRY DOCKS: One 400 ton slipway.
SURVEYORS: 1. Ministry of Transport Surveyors in Napier for grain cargo. Private surveyors available in Gisborne.

2. Lloyd's Register available on request, also A.B.S.

GANGWAY/DECK WATCHMEN: Ships provide own watchmen.
OPENING/CLOSING HATCHES: Stevedores normally carry this out.
CUSTOMS ALLOWANCES: See "Auckland".
REPATRIATION: Full facilities available for effecting crew changes and repatriation.
AIRPORT: 3.5 miles. Regular internal service.
TIME: Standard Time is 12 hours ahead of GMT. Daylight time GMT plus 13 hours from last Sunday in October to first Sunday in March normally.
EMERGENCY CO-ORDINATION CENTRE: Local Police Station for minor emergency operations otherwise all Search and Rescue Co-ordinated from Wellington.

Local Police	Tel: 79059 or 111
Wellington S.A.R.	Tel: 721 – 253

STORING: See "Prelims".

1. By truck or launch – only.
2. Not applicable.
3. Trucks can come alongside at berths, only restricted for Tankers.
4. Fork Lifts available and used.
5. Customs clearance required for bonded goods.
6. Yes.

IDENTIFICATION CARDS: Not required.
AUTHORITY: Port Gisborne Ltd., P.O.Box 549, Gisborne, New Zealand. *Tel:* (06) 86-85129. *FAX:* (06) 86-78084. *Cables:* Harbour Board. *Contact:* Mr. B.M. Tahata, General Manager.

LYTTELTON: 43.35 S. 172.42 E. (See Plan)

PORT LIMITS: All those tidal waters of the Port of Lyttelton comprised within the area enclosed by the arc of a circle having a radius of 3 nautical miles from the Northernmost point of Adderley Head.
DOCUMENTS: Customs procedure: Overseas vessels, on arrival in New Zealand, should have following papers ready to produce to Customs Officers:

Particulars of Ship's Certificates.
List of Persistent Oils (Tankers only).
Notification of Liability to pay entry tax (Fishing vessels only).
Register.
Names of Owners and Agents.
Crew List.
Passenger List.
List of Prohibited or Restricted Immigrants.
Search List.
Stores List.
List of any stock or birds on board.
List of Poisons.
List of Firearms.
Statement of excess Tonnage of Cargo.
Statement of quantity of Fuel Oil in double bottoms.
Declarations by Passengers arriving in New Zealand.
Baggage Declarations by Passengers for duty purposes.

On departure for overseas, Master or his Agent is required to produce:

Manifest of Cargo.
Stores List.
Crew List.
Passenger List (if any).
Clearance from the Marine Department (if a British ship).

A home trade vessel under *transire* is required to produce her cargo book to Collector of Customs and such particulars as to passengers, crew, and cargo as the Collector may at any time demand. Cargo book shall contain name and port of registry of ship, Name of Master, and date of arrival at, and departure from each port. Particulars as to dates of arrival and departure must be entered not later than 24 hours after time of such arrivals and departures.

PILOTAGE: Masters of vessels requiring the services of a Pilot, must notify the Marine Services Manager of their estimated time of arrival and maximum draft not later than 1600 hrs. on day prior to arrival (Monday to Friday). If estimated time of arrival is on a Saturday, Sunday or any public holiday which falls on a Monday, notification must be given before 1600 hrs. on previous Friday. Marine Services Manager to be notified of any change in estimated time of arrival. Telex NZ4141 or Facsimile 03 28 8627.

Pilots will board vessels at the harbour entrance. Pilots embark and disembark on pilot ladders in accordance with New Zealand Pilot ladder regulations. Ladders should be rigged 1.0 m. above water. Boatrope is not required, and the use of tripping line is strictly prohibited. In adverse weather, or for large bulk vessels, a helicopter may be used.

The pilot vessel – "Wairangi" – has the word "Pilot" painted on the sides.

The limit of pilotage is a line joining Godley and Adderley Heads.

ANCHORAGES: *Outside Godley Head:* A vessel awaiting the arrival of a pilot should anchor about 1.5 miles to seaward of Godley Head in depths from 16 m. to 18 m.

Camp Bay Anchorage: Permission must be obtained from the Marine Services Manager before using this anchorage, and draft of vessel is restricted to 8.5 m. All vessels drawing more than 8.5 m., whether awaiting Pilot or not, must use the outside anchorage. Vessels using Camp Bay Anchorage should anchor with the anchorage lighted leading beacon, situated on the Southern shore of Camp Bay, in transit, bearing 195.5°. Each beacon is painted white, and each exhibits a fixed red light. Vessels may anchor to the Westward of this bearing, but must not proceed Westward of a line bearing 345° from rear anchorage beacon. In fog, or poor visibility, Camp Bay shall not be used by vessels wishing to anchor.

Note: Anchoring in or near the dredged channel, which extends from 1 mile inside the heads, is not permitted.

RESTRICTIONS: Tankers are berthed during daylight only. All vessels can depart from their berths during darkness. Vessels holding pilotage exemptions may also enter or depart during the hours of darkness.

The following are the controlling depths at mean low water springs, mud bottom in each case;

Entrance to port	14.6 m.	
Dredged channel	12.0 m.	
Camp Bay Anchorage	11.0 m.	soft mud
Inner Harbour Berths	9.8 m. – 12.6 m.	
Cashin Quay Berths	13.5 m.	

MAX. SIZE: Max. permissible draft for entering or leaving:

Cashin Quay Nos. 1, 2, & 3	12.00 m. at H.W. 10.46 m. at L.W.	(May be increased at Marine Services Manager's discretion).
Inner Harbour	11.28 m. at H.W. 9.75 m. at L.W.	

Maximum size permissible for entry is at discretion of Marine Services Manager to the Inner Harbour and 294 m. at Cashin Quay, beam no limit.

HEALTH: Master of every ship about to enter a New Zealand port shall, not later than 12 hours and not earlier than 24 hours before expected time of arrival at that port, inform Port Health Officer by radio of last port of call, date of departure therefrom, and state of health of vessel.

Arrival of vessels: On arrival, vessel showing International Code quarantine signal, should proceed to inspection area to await arrival of Port Health Officer. Inspections are normally carried out at berth.

Radio Pratique: Certain ships may be granted Pratique by radio and hence need not be visited by a Port Health Officer, provided that medical officer carried as part of ship's complement.

Maritime Declaration of Health: Masters of all vessels arriving in New Zealand from any port beyond New Zealand shall complete and deliver to Port Health's Officer a Maritime Declaration of Health countersigned by the ship's medical officer, if required.

Crew List and Passenger List: Master of every ship liable to quarantine should be prepared to furnish Port Health Officer a list of all passengers, showing in respect of each passenger, name, sex, race, age, and port of embarkation; and a list of crew giving the name, nationality, and rating of each member.

RADIO/VHF: Wellington Radio, call sign ZLW; Awarua, call sign ZLB; or Auckland, call sign ZLO.

Signal Station: A signal station is situated on the tower of the Container Terminal Administration Building. It is connected by telephone to Lyttelton and Christchurch. The International Code of Signals or the Morse Code may be used for communicating with this signal station. On request, the Marine Services Manager will arrange for the signalling of messages to vessels, circumstances permitting. Call sign is ZMH61, 2182 kHz and working frequencies.

Radio – Telephone: The station is equipped with a radiotelephone and VHF. The call sign is Lyttelton Harbour Radio, the calling frequency is 2182 kHz., and the working frequencies are 2012, 2045, and 2162 kHz. VHF Channels 16, 14 and 12.

VHF Channel 12 is used for the exchange of messages in or near the port relating to the operational handling, the movement and the safety of ships and in emergencies.

TUGS: The port company has 2 modern tugs fully equipped for harbour duties:

"Purau"	A twin Z–Peller right angle drive diesel tug powered by two 1,120 kW. engines, built in 1986. Fully equipped for harbour duties and fire fighting. Max speed 11.6 knots, max. bollard pull 37 tonnes.
"Godley"	A twin Schottel right angle drive diesel tug powered by two 745 kW. engines, built in 1977. Fully equipped for harbour duties and fire fighting. Max. speed 11.5 knots, max. bollard pull 28 tonnes.

Communication with the tugs is by VHF Channel 12.

BERTHING: No vessel is to enter and take up a berth unless signalled to do so from the signal station. These signals may be sent either by radiotelephone, VHF or the Morse Code.

All vessels to contact Signal Tower 5 minutes prior to sailing for clearance.

STEVEDORES: Three companies with their own permanent labour provide stevedoring services in the port. Contact details are:

Lyttelton Port Company Limited	Tel: (03) 28 8198.
New Zealand Stevedoring Limited	Tel: (03) 28 7149.
Pacifica Shipping (1985) Limited	Tel: (03) 28 8059.

CARGO HANDLING FACILITIES: *Cashin Quay No.1:* Bulk export berth for coal, grain and woodchips. The berth is equipped with shiploader and conveyor system with a maximum design capacity of 1,250 tonnes/hours. Bulk commodities may also be loaded directly from road transport into the dump hopper.

The berth is equipped with wharf cranes.

The Lyttelton grain silos and bulk material stockpile area are situated nearby.

Cashin Quay No.1 is also a multi-purpose berth with transit shed and flat land for storage. It is intended to re-deck this berth to accommodate heavy axle loads by 1992.

An 18 m. road transport weighbridge is situated nearby.

Cashin Quay No.2: Heavy duty multi-purpose berth with storage and cargo handling area.

Cashin Quay No.3: (Lyttelton Container Terminal). Heavy duty concrete wharf. Maximum vessel length is 278 m., with the berth depth 13.5 m. below MLWS. Maximum vessel beam is limited only by the container crane outreach.

The berth is equipped with a 46 tonne SWL Vickers Hoskins Paceco single lift portainer crane fitted with either a telescopic spreader (2 available) or a 46 tonne SWL Ramshorn Hook.

Outreach from berth face – 32.38 m.
Length of crane travel – 224.33 m.
Clear span between legs – 15.24 m.

Gladstone Pier: General cargo operations and small multi-purpose vessels. Linkspan for Roll-on/Roll-off vessels.

No.1 Breastwork: Designated bulk cement discharge berth and general cargo berth.

No.2 Jetty: A finger pier – this berth is used in the main for dry bulk import discharge and as a general cargo berth when required.

Bulk cargoes are discharged by 5 tonne cranes into mobile hoppers. The 3 mobile hoppers have a height of 8.61 m. above wharf decking. Their capacity varies between 60 tonnes and 100 tonnes, depending upon the type of cargo.

There is a linkspan at No.2 Jetty-West.

No.3 Jetty: Lay-up and general conventional berth (restricted loadings).

No.4 Jetty: Lay-up and Roll-on/Roll-off berth.

No.7 Jetty: Convertional berth equipped with wharf cranes and Roll-on/Roll-off facilities.

Z Berth: General cargo and fishing berth.

The deck level of all wharves is – Inner Harbour 4.08 m. above M.L.W.S. Cashin Quay 4.18 m. above M.L.W.S.

Cashin Quay and No.7 Jetty are connected with the railway system; the distance from the outside fence of all wharves in Inner Harbour to centre of first rail track is 3.05 m., Cashin Quay 4.72 m.

MEDICAL: Hospital facilities are available at Christchurch, 12 km. from port, and international regulations apply in regard to inoculations, vaccinations, etc. Agents can be notified at any time of medical allocation required, preferably with 24 hours' notice.

TANKERS: *Oil Wharf:* The oil wharf is used for the loading and unloading of liquid bulk cargoes as well as bunkering.

All tankers berth at the Oil Wharf. Maximum draft 12.0 m.

Three 200 mm. nominal bore marine unloading units are provided: 2 units for "white" products and 1 unit for "black" products. These can be connected during hours of darkness; they are not allowed to be disconnected until daylight, unless permission has been given by the Marine Services Manager. Slop or oily residue facilities are not available.

Boiler Fuel Oil: Suppied by 100 mm. and 150 mm. diameter hose.

Diesel Oil: Bunker hose connected to a 200 mm. diameter pipeline located on the Oil Wharf.

Delivery rate: Boiler oil 200 tonnes per hour. Diesel oil 60 tonnes per hour.

An LPG Marine unloading arm is situated on the oil wharf. LPG is pumped direct to Christchurch.

DENSITY: 1025, salt water.

FRESH WATER: Available at all berths at the Port of Lyttelton. Supply rate is approximately 60 tonnes per hour.

FUEL: See "Tankers"

FIRE PRECAUTIONS: Tankers are not permitted to immobilise engines at the oil wharf. Repairs may be carried out at other wharves with Marine Harbour Manager's permission. Boiler and galley fires are not required to be extinguished when loading or discharging. All scuppers are to be plugged and cemented in case of spillages.

CONSULS: At Christchurch.

Belgium	486772	Japan	665680 or 669030
Denmark	557657	Netherlands	669280
Finland	660709	Norway	797720
France	482059 or 516259	Sweden	798600
Italy	579372	U.S.A.	790040 or 661097

REPAIRS: A complete service for industrial or marine construction, steel fabrication, machinery design and repairs, and electrical contracting is available. Lyttelton has a long history as a port renowned for high quality repair work undertaken by private contractors.

DRY DOCKS: Lyttelton has the only graving dock in the South Island. It is used by various classes of coastal and overseas vessels. Its dimensions are: Floor length 137.15 m., width 14.0 m., top length 146.75 m., entrance width 18.90 m., maximum draft 5.00 m. Electric pumps take 4.5 hours to pump the dock dry.

SURVEYORS: Representatives of the major classification societies are available for survey examinations. Divers are available for underwater inspections.

GANGWAY/DECK WATCHMEN: All ships must be provided with a watchman whilst at oil wharf; a shore watchman is also required. Watchmen may be ordered at any time by contacting Union Maritime Services, Tel: (03) 28 7149.

OPENING/CLOSING HATCHES: By waterside labour.

CUSTOMS ALLOWANCES: 250 grams and/or 200 cigarettes per person, 1 bottle of wine and/or 1 bottle of spirits, 24 cans of beer per person on arrival. Every 10 days: 200 cigarettes per person, 12 bottles of spirits per ship (regardless of crew size) and 2 cans of beer per person per day.

REPATRIATION: Facilities available.

AIRPORT: Distance from Christchurch – 12 km., served by regular airlines.

TIME: Local time is 12 hours ahead of GMT. N.Z. daylight time from 0200 hrs. (NZST) on last Sunday in October until 0200 hrs. (NZST) on the first Sunday in March – 13 hours ahead of GMT.

HOLIDAYS: 1st January (New Year's Day); 2nd January (Statutory); 3rd Monday in January (Port Holiday); 6th February (Waitangi Day); Good Friday; Easter Monday; 1st Monday in June (Queen's Birthday); Second to last Monday in October (Labour Day); 2nd Friday in November (Canterbury Anniversary); 25th December (Christmas Day); 26th December (Boxing Day).

Many operations work on public holidays.

POLICE/AMBULANCE/FIRE: For emergency calls from ship's telephones, dial 111 and ask the operator for service required.

TELEPHONES: All vessels may be connected to the Telecom New Zealand system.

SERVICES: *Garbage:* Sterilised drums are provided to all ships. These are emptied daily and the contents incinerated.

Electricity: Shore electricity is available. Type A.C., 50 Hz, 415 Volts, 3 phase or 230 volts single phase.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Passes are necessary at oil wharf but not required otherwise.

GENERAL: *Hours of Work:* The Port of Lyttelton is open 24 hours a day, 7 days a week. The hours of operation vary according to the cargo being worked.

Security: A continuous listening watch is maintained on 2182 kHz and VHF Channel 16.

AUTHORITY: Lyttelton Port Company Limited, Norwich Quay, Lyttelton. Postal Address: Private Bag, Lyttelton, New Zealand. *Tel:* 3 28-8198. *Telex:* NZ 4141. *FAX:* 3 28-8627. *Contact:* Captain W.T. Oliver, Marine Operations Manager/Harbour Master.

NAPIER: 39.29 S. 176.54 E. (See Plan)

DOCUMENTS: See "Auckland".
PILOTAGE: Pilotage is compulsory.

Pilot boards in position: Lat. 39° 28′ S., Long. 176° 57.6′ E. Refer to New Zealand Port Information Manual Part I, Admiralty Pilot No. 51 (New Zealand Pilot), Chart NZ 5713.

ANCHORAGES: No. 1 Anchorage – 2 miles East of breakwater with Southern Leading Beacons in line. 9.5 fathoms, sand, mud.

No. 2 Anchorage – 1 mile NE of North Pania Buoy with Northern Leading Beacons in line. 11 fathoms, sand.

RESTRICTIONS: Vessels are berthed between 0500 hrs. and sunset. Other times by arrangement. Vessels up to 8.6 m. draft may berth at any state of tide.
MAX. SIZE: Max. LOA 230 m.; beam, no limit; draft, 10.4 m.
HEALTH: Cable Port Health Napier 24 hours before arrival. Port Health will board on arrival.
RADIO: Radio telephone - Napier Watch tower listens on 2182 kHz for 15 minutes. Call sign "Napier Harbour Radio ZMH 75" at following times; 0400, 0800, 1200, 1600, 2000, 2400 hrs., and by arrangement. Working frequency is 2162 kHz. VHF listening watch as above for R/T and continuous during office hours.
TUGS: Two tugs available.
BERTHING: Vessels at max. draft limited to HW for arrival and/or departure. Vessel's ETA must be given to Harbour Master, Napier, 24 hours before arrival or on departure from previous port if less than 24 hours, and amended 4 hours prior to arrival. Max. draft arrival to be included.

Vessels arriving during a weekend, ETA to be given by 1500 hrs. Friday and at 1500 hrs. on a day preceding a public holiday.

SPECIALISED CARGO FACILITIES: *Woodpulp Storage:* Adjacent Higgins Wharf, Shed Nos. 7 and 9. Total capacity, 49,000 tons.
Bulk Fertiliser Storage: Adjacent Higgins Wharf, Shed No. 8 – rock phosphate, capacity 60,000 tons; Shed No. 10 – fertiliser bases, capacity 32,000 cu.m.
General Cargo Sheds: Adjacent Geddis, Herrick & Kirkpatrick Wharves, Shed Nos. 1, 2 and 3, size 5,300 sq.m.
Container Packing/Devanning: Adjacent Kirkpatrick Wharf, Shed No. 5, size 3,000 sq.m.

Electric power and storage for 240×20 ft. reefers. 4 acre paved dry box yard. Serviced cleaning yard for 20×20 ft. reefers.

Tanks for tallow and edible oils.

Cement Silos.

Mobile Plant: 1 mobile container crane, capacity 30 tons at 40 m. radius.
Installed Plant: 2 spiralveyor units. Integrated automated all weather materials handling system for import and export of cartonned, bagged and carcass products.

STEVEDORES: ETA required for discharging ships 24 hours before arrival. Loading ships 48 hours before arrival with proposed stowages and vacant spaces. Advise number of gangs able to work. All work done by ship's gear.
MEDICAL: No prior notice required for medical attention. Hospital facilities available. Advice would be needed of any contagious disease on board in advance, in accordance with Port Health Regulations.
TANKERS: Standard size discharge lines. All connections supplied by oil companies. 5 berths available: 2 berths, max. length 200 m., draft 10.4 m.; 1 berth, max. length 230 m., draft 10.0 m.; 2 berths, max. length 180 m., draft 9.2 m.
DENSITY: Variable, generally 1020 – 1025.
FRESH WATER: Available all berths 20 t.p.h. per hose.
FUEL: 220 and 1,000 sec. Oil available ex-pipe-line at 110 t.p.h. Marine diesel and gas oil ex-road tanker. All at immediate notice. Lubricating oil available. 1 week's notice. Residue service available when tank vessels discharging/loading or having hazardous goods in transit.
FIRE PRECAUTIONS: Watchman supplied on wharf at ship's expense.
REPAIRS: First class service available.
GANGWAY/DECK WATCHMEN: All ships must have gangway watchmen. Cargo and deck watchmen available on request.
OPENING/CLOSING HATCHES: Hatches normally opened and closed by stevedores unless automatic type.
CERTIFICATES:

- Ship's Register.
- Health Certificate.
- Cargo Safety Certificate.
- Radio Safety Certificate.
- Load Line Certificate.

CUSTOMS ALLOWANCES: See "Auckland".
REPATRIATION: On arrangement with Customs and vessel's Agents.
AIRPORT: Hawke's Bay Airport, served by internal airline 3 miles from port.
TIME: Winter GMT plus 12 hours. Summer GMT plus 13 hours.
HOLIDAYS: New Year's Day; 2nd January; Picnic Day (last Monday in January); Anniversary Day (2nd to last Monday in January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (nearest Monday 25th October); Christmas Day; Boxing Day. Vessels berthed but cargo not worked on any of these holidays.
POLICE/AMBULANCE/FIRE: Emergency telephone 111.
TELEPHONES: Connections at all berths.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Port of Napier Limited, P.O.Box 947, Napier, New Zealand. *Tel:* (070) 351-190. *Telex:* NZ3694 Napharb. *FAX:* (070) 351-728. *Contact:* Captain J. Hazell, Harbour Master. G. J. Marshall, Commercial Manager.

NELSON: 41.16 S. 173.17 E. (See Plan)

PORT LIMITS: Within 3 miles radius of Old Lighthouse on Boulder Bank.
DOCUMENTS: See "Auckland".
PILOTAGE: Compulsory for vessels of 100 g.r.t. and over. 24 hours' notice of ETA to Harbour Master. Confirm ETA before 1500 hrs. Friday if arriving during weekend or public holiday.

Radio telephone 2182 kHz and 2162 kHz, call sign "Nelson Harbour Radio". Listening watch 10 minutes every 4 hours commencing at 0000 hrs. After contact has been established a further listening schedule can be arranged.

VHF on Channel 16 listening and Channel 12 working. Pilots board inward-bound vessels 2 miles to seaward of main entrance.

Anchorage awaiting Pilot in depth about 30 ft., and with Old Boulder Bank Lighthouse (conspic.) bearing 180° distance 1.8 miles. By night landfall light (K 4224) bearing 160° distance 2 miles. Pilot vessel 40 ft. planing hull, speed 19 knots, painted orange.

ANCHORAGES: Anchorage as indicated in pilotage or further seaward according to weather conditions, draft and length of stay at anchor.
RESTRICTIONS: Vessels may enter, berth, unberth, or leave during hours of darkness. Overseas vessels (over approx. 116 m.) enter port on flood tide and usually swing and berth port side to.
MAX. SIZE: Max. permissible length 200 m. Beam 32.5 m. Draft limits 9.2 m. Max. draft at Main Wharf is 7.9 m.
Note: Max. draft of 9.2 m. may be exceeded at Harbour Master's discretion.
HEALTH: Radio Pratique usually granted. Pratique automatic after clearance at first port. If suspected disease or fever on board advise Medical Officer of Health, Nelson, by radio and await instructions.
RADIO: ZLW Wellington Radio; ZLB Awarua Radio; ZLD Auckland Radio.
TUGS: Two tugs available, join vessel inside harbour. Tug's own line used on berthing. Tugs are equipped for fire-fighting.

Also see "Ship Supply Service".

SPECIALISED CARGO-HANDLING FACILITIES: Facilities are available at one general cargo berth for discharging motor spirits and oil. Another berth is used for loading wood chips pneumatically (the loading equipment is owned by Nelson Pine Forest Limited, Nelson). Common user Roll-on/Roll-off Linkspan.
STEVEDORES: Labour ordered 0700 hrs. for weekday work; 0900 hrs. Friday for Saturday work. ETA should be received by Agents before these times.
MEDICAL: Advise Agents of any medical attention required, giving up to 24 hours' notice. Hospital facilities are obtainable.
TANKERS: Diameter of discharge pipe, 10 in. white products; 8 in. black oil. No slop discharge facilities. Oil tanker berth, one only. Max. draft at berth 7.9 m.
DENSITY: Average sea water, 1025.
FRESH WATER: Obtainable at any time. Approximately 20 t.p.h. delivery rate.
FUEL: Marine fuel oil, gas oil. Notice required, 24 hours.
REPAIRS: Deck and engine repairs are possible. Limited underwater repairs available and hull cleaning service.
DRY DOCKS: Slipway available for up to 1,500 ton vessels.
GANGWAY/DECK WATCHMAN: Watchman necessary but usually provided by ship's crew. Shore watchman can be engaged if requested by vessel. Cost in accordance with national award.
OPENING/CLOSING HATCHES: By stevedores only.
CUSTOMS ALLOWANCES: See "Auckland".
REPATRIATION: Facilities exist.
AIRPORT: Distance 3 miles. Served by internal airline only.
TIME: GMT plus 12 hours. Daylight saving in Summer months, advance clocks 1 hour to GMT plus 13 hours.
HOLIDAYS: New Year's Day (1st January); 2nd January; Picnic Day (usually near end January); Anniversary Day (1st Monday in February); New Zealand Day (6th February); Good Friday; Easter Monday; Queen Elizabeth II Day (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day. No cargo work on these days.
POLICE/AMBULANCE/FIRE: Police 88309; Ambulance 88299; Fire 81589; Emergency calls, dial 111.
EMERGENCY CO-ORDINATION CENTRE: S.A.R. Emergency Centre situated in Wellington covers the whole country.
TELEPHONES: Can be connected on board.
STORING: Vessels can be stored by truck (no barges available) which may proceed alongside (except tankers). Fork lift trucks available, however no riggers available.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
SHORE POWER: 400 v., 3 h.p. 50 Hz, 60 amps maximum.
SHIP SUPPLY SERVICE: The Nelson Harbour Board operates 2 tugs and one pilot vessel. The larger tug, "Huria Matenga", is 3,000 h.p. Niigata Z pellar, the smaller tug, "W. H. Parr" is 1,500 h.p. Schottel, and the pilot vessel, "Waimea" is a 40 ft. planing hull vessel with a top speed of 19 knots.

Nelson also has a locally based helicopter firm of Helicopters (N.Z.) Ltd. based at Nelson Airport, who undertake contract work, as well as emergency work. Their helicopters also have marine VHF Channel 16.

AUTHORITY: Nelson Harbour Board, P.O.Box 844, Nelson, New Zealand. *Tel:* NN 82099. *Telex:* Nelharb NZ 31066. *Cables:* Nelharbour. *Contacts:* Harbour Master, Captain B. J. Westbrooke (after hours *Tel:* 4-6877). Deputy Harbour Master, Captain J. G. Tregidga (after hours *Tel:* NN 521125).

NEW PLYMOUTH, Port Taranaki: 39.03 S. 174.03 E. (See Plan)

PORT LIMITS: All waters contained within the area of a circle with radius 2.5 nautical miles whose centre is the trig station on Mount Moturoa in position Lat. 39° 03′ 56.8″ S., Long. 174° 01′ 44.9″ E.

DOCUMENTS: *Customs:* See "Auckland".

Agriculture: Shipmaster's Bond List. Meal Locker Declaration Form AGL 36 (2 copies).

Health: Maritime Declaration of Health (issued by Port Health Officer).

PILOTAGE: Compulsory. Telegraphic address "Harbour Master, New Plymouth". 3 days' notice preferable with 1 day confirmation. VHF Channel 16. R/T 2182 kHz.

Pilot boat white with buff deckhouse and "Pilot" in black on side. Pilot taken on board about 1.5 miles due North of Main Breakwater Head.

ANCHORAGE: Vessels can anchor to the West of a line due North from the Main Breakwater head seaward of the 10 fathom line. Good holding on sandy bottom. Not recommended in Northerly weather conditions.

RESTRICTIONS: Ships not berthed during hours of darkness although permitted to sail. Max. draft 9.65 m. may be exceeded after prior consultation with Harbour Master. Ships under 21 ft. not affected by state of tide. In range 21 ft. to 31.5 ft. time of berthing relevant to high tide.

MAX. SIZE: Max. LOA 700 ft. (213.4 m.), breadth no limit.

HEALTH: Port doctor boards on arrival at berth. In event of suspected disease on board, will board in pilotage area. Pratique automatic if vessel has already called at another New Zealand port.

RADIO: Radio telephone system operates watches for 15 minutes every 4 hours from midnight. Call sign New Plymouth Harbour Radio, call frequency 2182 kHz. Working frequency 2012 and 2162 kHz. 24 hour watch maintained on VHF Channel 16. ETA cables generally received through Wellington Radio. All outward messages routed through Wellington Radio.

Oil and chemical tankers must send cargo details 48 hours prior to arrival.

TUGS: 2 tugs available. 1×7 ton and 1×30 ton bollard pull.

BERTHING: In general all ships are swung in basin coming alongside berth stern first. Shore moorings are used.

Breakwater: Length 122 m., width 10 m., depth alongside LWOST 6.5 m. For use by oil field barges, supply vessels and fishing vessels. Road transport only.

Moturoa Wharf: Length 335 m., width 27.4 m.

East side of wharf: 1 berth 260 m. long, depth alongside LWOST 10 m. Urea loader with capacity 500 tonnes/p.h. 1 berth 76 m. long, depth alongside LWOST 6.5 m.

West side of wharf: 1 berth 137 m. long, depth alongside LWOST 7.9 m. Bunkering point on No. 2 berth. Road and rail transport may be used to load and discharge dry cargo.

Newton King Wharf: Tanker use only. Max. LOA 211 m. Motor Spirit, Bitumen, Oils, Caustic, Chemicals. Exports: Condensate, Methanol and LPG, Synthetic Petrol. Depth alongside LWOST 11.5 m.

Blyde Wharf: West side of the wharf: See "Container Handling Facilities".

East side of the wharf: Length 80 m., width 5.5 m. and 13.4 m., depth alongside LWOST 5.5 m. Road transport only. For use by oil field supply vessels.

Two mobile heavy lift cranes, capacity 70 tonnes each, available for use on Blyde Wharf and Breakwater Berth.

CONTAINER HANDLING FACILITIES:

Berth: Blyde Wharf.

Length:	425 m.
Depth:	10.5 m.
Max. Draft:	9.65 m.

Equipment available for gearless ships:

2 crawler cranes with the following capabilities:

2 tons at 30 m. from berth face.
10 tons at 25 m. from berth face.
18 tons at 14 m. from berth face.
24 tons at 11 m. from berth face.
30 tons at 7.5 m. from berth face.

3×D.55 forklifts with 20 ft. and 40 ft. spreaders, max. lift 24 tons stack 3 high.

2×D.25 forklifts with side frames, max. lift 6 tons 3 high.

Gearless vessels of 900 T.E.U. regularly use the berth with exchanges of 500-700 T.E.U. and with careful attention to stowage weights do not have to turn around. On a mixed load and discharge of full boxes, average rate is 10 boxes per gross hour per crane, empties 20 boxes per gross hour per crane.

Storage for 76 reefer slots and 66 integrals are available plus storage for in excess of 2,000 T.E.U. A cleaning and repair facility is also available.

A local 2 shift agreement is in operation, 7 days per week.

F.C.L. boxes are delivered throughout the North Island within 24 hours of discharge.

Rail access to ship's side and yard.

STEVEDORES: Labour must be engaged between 0700 – 0900 hrs. Monday to Friday. Agents should be advised ETA at least 24 hours, preferably 72 hours, in order arrange cargo if vessel loading. Normal cargo working hours Monday – Friday 0700 – 1200 hrs., 1300 – 1700 hrs. Saturday 0700 – 1200 hrs. Supplementary hours may be worked Monday – Friday 1700 – 2300 hrs.

MEDICAL: Hospital services available.

DENSITY: Sea water.

FRESH WATER: Available all berths from main supply at about 100 t.p.h. Cost 80 cents per tonne.

FUEL: Gas oil line at Blyde No. 3, Moturoa Berths and Newton King Wharf.

FIRE PRECAUTIONS: Tanker berths closed to public. Harbour Board watchman in attendance.

TANKERS: *Newton King Tanker Terminal:*

Number of Berths: Two.

Operator and Owner: Taranaki Harbours Board.

Maximum Size:

	Max. LOA		*Max. Stern to Loading Arm*		*Max. Bow to Loading Arm*	
Berth	No. 1	No. 2	No. 1	No. 2	No. 1	No. 2
Condensate/ Crude (SBPT Loading Arm)	211 m.	211 m.	102 m.	92 m.	113 m.	113 m.
Synfuel	211 m.	211 m.	111 m.	101 m.	104 m.	104 m.
Methanol	211 m.	211 m.	125 m.	115 m.	90 m.	90 m.
LPG	–	–	–	62 m.	–	–

Maximum Displacement: 50,000 tonnes.
Max. Draft Arrival: 9.65 m.
Max. Draft Departure: 9.65 m.
Max. beam at 9.65 m. draft: No. 1 – 35 m. No. 2 – 35 m.

Hours of Operation: Berthing in daylight only. Departures any time. Both dependent on draft/tide combinations. Loading/discharging on 24 hour basis.

Tugs: 1 Liaan Compass thruster tug, 30 tonne bollard pull.
1 Voith Schneider tractor tug, 7 tonne bollard pull.

Ballast Facility: Max. ballast receiving capacity 22,000 tonnes. Ballast must be lead free.

Special Conditions: Arrival drafts to be not less than normal sea-going ballast condition. No excessive trim at any time. All vessels use shore wire coirs. One ship's line each end only used for berthing/unberthing. Marine diesel is available. Fuel oil is not available. Fresh water is available.

Products Handled:

	Avg. S.G.	*Avg. Temp. (°C.)*	*Loading Rate (t.p.h.)*	*Connection*
Kapuni	0.7658	19	1,300	Loading Arm
Maui (12 in.)	0.7468	19	1,300	Loading Arm
McKee	0.829	28	1,600	Loading Arm
Synfuel (12 in.)	0.7316	19	1,400	Loading Arm (dedicated)
Methanol (10 in.)	0.7924		1,000	Loading Arm (dedicated)
LPG (6 in. and 6 in.)	0.532	20	150	Loading Arm (dedicated)

In addition to the above, a variety of other products are also shipped, namely small parcels of caustic soda and other chemicals through flexible hoses. Tallow is also occasionally transhipped across the wharf.

CONSULS: None available locally.

REPAIRS: All repairs except underwater work of a major nature.

SURVEYORS: Surveyors can be arranged.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Stevedores must carry out this work.

CERTIFICATES:

Normal Safety Certificates.
Ship's Register.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: Facilities exist.

AIRPORT: 7 miles from city, 10 miles from port. Served by domestic service only, 2 flights Northbound and Southbound each daily.

TIME: 12 hours ahead of GMT. N.Z. Daylight time observed.

HOLIDAYS: New Year's Day; 2nd January; Stevedores Picnic (4th Monday in January); Waitangi Day (6th February); Provincial Anniversary Day (2nd Monday in March); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day.

POLICE/FIRE/AMBULANCE: Telephone numbers respectively, 75449, 75505, 75439.

EMERGENCY CO-ORDINATION CENTRE: Police, Tel: 75449. Co-ordinate S.A.R. and emergencies other than fire.

TELEPHONES: Can be connected on board.

STORING: By road or rail truck to shipside. Tankers by road to wharf gate and hand truck to shipside approx. 400 ft. Customs available. Ship's crew to be used for stores.

SHORE LEAVE: No restriction.

IDENTIFICATION CARDS: Not required.

GENERAL: Ship's garbage must be in covered containers supplied by Harbour Board and removed daily. Any meats on board vessel on arrival which have been supplied from other than Australia or New Zealand will be sealed off and fresh supplies obtained.

AUTHORITY: Taranaki Harbours Board, P.O.Box 348, New Plymouth, New Zealand. *Tel:* (067) 510-200. *Telex:* NZ 3500. *FAX:* 510-886. *Cables:* Taragate. *Contact:* Captain R. Barlow, Harbour Master.

ONEHUNGA: 36.56 S. 174.47 E. (See Plan)

PORT LIMITS: All that area of water contained within an area bounded to seaward by an arc of a circle 4 miles radius from the Southern extremity of Paratutai Island.

DOCUMENTS: See "Auckland".

PILOTAGE: Not compulsory, but arrangements can be made with the Harbour Master at Auckland to supply the services of a Pilot if required. A Pilot will then board a vessel off Te Pirau, situated about 2 miles N.E. of South Head main light.

Pilotage District: All those waters of the Manukau Harbour contained within a line drawn 180° to the South shore from Jackie Hill on Kaiteke Point 015.5° – 2.85 miles approximately from the Southern extremity of Paratutai Island.

The signal station is equipped with both medium frequency and VHF radiotelephone. Call sign is "Manukau Harbour Radio" and VHF Channels 10, 11, 12, 13, 14 and 16.

Listening watches are maintained as follows:

0800 to 0820 – Call 2182 kHz, work 2012 kHz.
0830 to 0900 – Calling and working 2012 kHz.
1800 to 1830 – Calling 2182 kHz, working 2012 kHz.
1830 to 1900 – Calling and working 2012 kHz.
0800 to 0900 – VHF Channel 16.
1800 to 1900 – VHF Channel 16.

Other times by arrangement.

Note: Should a vessel be crossing the bar during the scheduled watch periods, the signalman will be working on 2012 kHz with that vessel and not listening on 2182 kHz.

Vessels equipped with radiotelephone must maintain contact with the signal station while crossing the bar.

Weather conditions permitting, information concerning bar conditions will be supplied on request from the signal station. Such information can only be regarded as a guide, as observations are made from the signal station which is situated about 5 miles from the bar and elevated 243.84 m. (800 ft.).

Radiotelephone – Onehunga: A radiotelephone is installed at the office of the Officer-in-Charge at Onehunga. The call sign is "Onehunga Harbour Radio" and the working frequency 2012 kHz.

Vessels equipped with radiotelephone, when within Puponga Point, must maintain a listening watch on 2012 kHz for information relative to berthing, harbour traffic or other harbour conditions.

No regular watches are maintained.

ANCHORAGES: After crossing the bar it is not advisable to anchor until after rounding Puponga Point, if proceeding to Onehunga; or after rounding Kauri Point (situated about 15 miles S.E. of Puponga Point), if proceeding to the Southward.

Prohibited Anchoring and Fishing Area: Within an area extending 2 miles from Destruction Gully front beacon in a 182° direction and having a width of 152 m. (500 ft.) on each side of the transit of Destruction Gully beacons.

Prohibited Anchorage: Within 91 m. (300 ft.) of a sewage submarine pipe-line laid in a 152° direction across Wairopa Channel about 1 mile Westward of Onehunga Wharf. On the Northern shore, 2 white triangular beacons, each bearing the word "Sewer" in black letters, mark the middle of the Prohibited Anchorage. The pipe-line lies approximately 3 m. (10 ft.) to the Eastward of the beacons when in transit.

Prohibited Anchoring and Fishing Area: Anchoring and fishing are prohibited within an area bounded by a line commencing at the South end of Renton Road (Lat. 37° 00.08′ S., Long. 174° 45.2′ E.); thence running 180° for 2,590 m.; thence 090° for 5,291 m.; thence 050° to the shore. The Northern boundary commences at Nganui Point (Lat. 37° 00′ S., Long. 174° 48.4′ E.); thence 090° to the opposite shore.

The above area, adjacent to Auckland International Airport, is marked by following lights and beacons, bearings and distances from Aero light (37° 00′ 48″ S., 174° 47′ 31″ E., approx.).

Light F. 058° 45′ – 1,936 m.
Beacon 259° 30′ – 3,185 m.
Beacon 220° 45′ – 2,848 m.
Beacon 183° 15′ – 1,890 m.
Beacon 143° – 2,317 m.
Light Beacon Qk.Fl. 239° – 3,642 m.
Light Beacon Fl.R.2 secs. 122° 45′ – 3,466 m.
Light Beacon Fl.R.2 secs. 112° 45′ – 3,261 m.
Light Beacon Fl.R.2 secs. 108° 30′ – 2,453 m.

RESTRICTIONS: Berthing and unberthing during the hours of darkness is not recommended.

	Controlling Depths Below Chart Datum	*Nature of Bottom*
Entrance to port (Southwest Channel)	5.48 m.	Sand.
Anchorages	5.486 m. – 7.62 m.	Mud, Shell, and Sand.
Channel	3.048 m.	
Approaches to berth	3.048 m.	
Berth (Onehunga)	3.3 m. – 4.7 m.	

MAX. SIZE: LOA, 95 m. Beam, No limit. Draft 4.7 m.

HEALTH: See "Auckland".

RADIO: See "Auckland".

VHF: See "Pilotage".

RADAR: A radar station having a maximum range of 72 miles is operated by Ports of Auckland Ltd. at South Head Signal Station Lat. 37° 03.2′ S., Long. 174° 32.6′ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on the radar screen. Responsiblity for the use of this information rests entirely with the Master of the vessel.

TUGS: 1 twin screw tug is available. 52.5 tonnes gross, 400 b.h.p., static pull 3.5 tonnes. Tug is equipped with both medium and VHF Radiotelephone.

BERTHING: The principal wharf is situated at Onehunga and is a ferro-concrete structure 293 m. in length which includes a launch jetty of 17 m. at the Eastern end, and with a width of 49 m. A grid for the use of small craft has been constructed immediately North of the wharf. There is a small jetty at Cornwallis.

The deck level of the wharf is 6.401 m. above chart datum.

The wharf is connected to the railway system and the distance from the outside face of the wharf to the centre of the railway track is 3.73 m.

CRANES: No quay-side cranes. One 12.5 tonne capacity mobile crane available. For heavier loads cranes available for hire from outside port.

BULK CARGO FACILITIES: Eastern end of quay is equipped with a pipe-line for the discharge of bulk cement to adjacent privately owned silos.

SPECIALISED CARGO HANDLING FACILITIES: No facilities.

BRIDGES: None.

STEVEDORES: Arranged by Agents. See "Auckland".

MEDICAL: See "Auckland".

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Boiler fuel oil, diesel oil, and lubricating oil are available from tank wagons; delivery at the rate of 13,500 litres per hour through a 50 mm. hose. Coal is not kept in stock but can be obtained.

CONSULS: See "Auckland".

REPAIRS: Outside firms are available to do machine shop and foundry work.

DRY DOCKS: No facilities.

SURVEYORS: See "Auckland".

GANGWAY/DECK WATCHMEN: See "Auckland".

HATCHES: See "Auckland".

CUSTOMS ALLOWANCES: See "Auckland".

CARGO GEAR: See "Auckland".

REPATRIATION: Full facilities exist.

AIRPORT: 8 km. from port. Served by major international airlines.

TIME: See "Auckland".

HOLIDAYS: See "Auckland".

POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.

SERVICES: No special services.

SHORE LEAVE: Crew members may go ashore.

IDENTIFICATION CARDS: Not required.

REGULATIONS: See "Auckland".

DELAYS: Seldom any delays.

DEVELOPMENTS: None currently in progress.

AUTHORITY: See "Auckland".

OPUA: 35.19 S. 174.07 E. (See Plan)

PORT LIMITS: Commencing at Northern extremity of Cape Wiwiki, thence by a straight line to the Eastern extremity of the Nine Pins, thence by a straight line to the North Western extremity of Cape Brett.

DOCUMENTS: See "Whangarei".

PILOTAGE: Compulsory Southward of a line from the Western extremity of Kororareka Point following a true bearing of 253° towards the flagstaff at Waitangi Treaty House. Pilotage shall be optional within the waters contained Northward of the above mentioned line and Westward of a line commencing from the Eastern extremity of Tapeka following a 350° True bearing to the Eastern extremity of the Black Rocks, thence in 271° True direction to the mainland. Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal weekday working day. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies Harbour By-laws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth. Pilot vessel under private contract. No VHF contact. Pilot from Whangarei.

ANCHORAGE: Renown Anchorage as per Bay of Islands Chart N.Z. 5122.

RESTRICTIONS: Veronica Channel dredged to 7 m. at Chart Datum. Max. draft is 8.53 m.

RADIO: See "Whangarei".

TUGS: Available by arrangement with Northland Harbour Board, Whangarei. At least 72 hours' notice required.

BERTHING: Total length 214 m., width 12.5 m., overseas berthage on Eastern side of wharf. Depth at berth is 9.45 m. at MLWS. Wharf is serviced by rail.

CARGO HANDLING: Ship's own gear. 2 permanent gangs available subject to Stevedore requirements as per Whangarei.

MEDICAL: Hospital and Ambulance at Kawakawa, 12.8 km. (8 miles) from Opua. Port Doctor at Paihia, 8 km. (5 miles) away.

DENSITY: 1025.

FRESH WATER: Fresh water available – 200 tonnes in storage. 60 cents per 1,000 litres.

FUEL: By arrangement with oil companies via road transport.

CONSULS: See "Whangarei".

SURVEYORS: See "Whangarei".

CUSTOMS ALLOWANCES: See "Whangarei".

REPATRIATION: See "Whangarei".

AIRPORT: See "Whangarei".

TIME: See "Whangarei".

HOLIDAYS: See "Whangarei".

POLICE/AMBULANCE/FIRE: See "Whangarei".

TELEPHONES: Telephones available.

SHORE LEAVE: See "Whangarei".

REGULATIONS: See "Whangarei".

DELAYS: See "Whangarei".

AUTHORITY: Northland Harbour Board, Private Bag, Whangarei, New Zealand. *Tel:* (089) 487-099. *Telex:* NZ 2955. *FAX:* (089) 485-769. *Cables:* "Harbour". *Contact:* Captain P. J. R. Wavish, Harbour Master.

OTAGO, (includes Dunedin, Port Chalmers and Ravensbourne): **(See Plan)**

PORT CHALMERS: 45.49 S. 170.38 E.
DUNEDIN: 45.53 S. 170.31 E.

PORT LIMITS: The harbour limits are defined by a line extending from Heyward Point Trig Station in an 020°T direction for 3 miles thence 126°T for 1.75 miles thence 200°T to the shore off Howlett Point.

The entrance to Otago Harbour is situated in the bay between Heyward Point and Taiaroa Head.

Within the entrance the harbour extends about 13 miles South-Westward and at its head stands the city and Port of Dunedin. The town and port of Port Chalmers is situated about 6 miles within the harbour entrance.

About 1 mile Southward of Port Chalmers, the Portobello Peninsula, with Quarantine Point at its head, together with the adjacent Quarantine and Goat Islands, form a natural barrier across the Otago Harbour inlet. That part of the harbour which lies North-Eastward of this barrier is the "Lower Harbour" and that which lies South-Westward is the "Upper Harbour".

DOCUMENTS: See "Auckland".

PILOTAGE: Address "Chief Pilot, Dunedin." Through coastal radio stations ZLW (Wellington) or ZLB (Awarua) giving ship's name, draft, and ETA. First message 72 hours out, revise 24 hours out: if from another New Zealand port (coastwise) similar message as soon as possible after leaving that port. Subsequent contact with port private radio station Taiaroa Heads on 2182 kHz or VHF Channel 16. Pilot boat is 16.76 m., white launch, also fitted with VHF frequencies, which meets vessels as required but does not remain on station otherwise. Boarding position is with Taiaroa Head Lighthouse bearing 180° distant 2 miles; good anchorage with Taiaroa Head Lighthouse bearing 160° – 2 miles, depth 12 fathoms. Pilots can board in this vicinity provided Master has ship under way at slow speed and obeys Pilot's instructions. Vessels arriving to work general cargo should endeavour to embark Pilot by 0500 hrs. in order to be alongside berth ready to take labour on board at normal commencing hour of 0700 hrs.

ANCHORAGES: *Anchorage Outside the Harbour Entrance:* A recommended anchorage which is considered safe in all winds except rare Easterly gales is, in a least depth of 13 fathoms (23.8 m.), sand, with Taiaroa Head Lighthouse bearing 160°T and Heyward Point Light Tower bearing 220°T.

Note: There is no anchorage inside the Harbour entrance, but in a case of emergency, vessels up to 500 ft. (152.4 m.) long may be able to anchor in the swinging basin at Port Chalmers.

Prohibited Anchorage: Anchorage is prohibited in the vicinity of a submarine power cable laid between Battery Point, Port Chalmers, and Quarantine Point at the North-Western end of Portobello Peninsula.

The cable is marked on its North-Western end by 2 beacons situated approximately 1.5 cables South by West and approximately 2.25 cables South by East from Observation Point. Both beacons are rectangular in shape and painted in green and white horizontal stripes. The latter beacon also serves as No. 31 channel beacon, and exhibits a flashing green light – these beacons when in line bearing 139.5° T indicate the route of the power cable across the channel.

APPROACHES: *Harbour Entrance Channel:* A sand bank extends about 1.25 miles Northward of Taiaroa Head, and the dredged entrance channel effectively divides this into Eastern and Western banks. There is a least depth of 21 ft. (6.4 m.) on the Eastern bank, and the sea can break dangerously over it in heavy weather. The Western bank has a least depth of 28 ft. (8.5 m.).

The entrance channel extends from the seaward (Northern) edge of the bank to a gap between North Mole and Taiaroa Head. The channel is dredged to 45 ft. (13.7 m.), and is 600 ft. (183 m.) wide – it is unprotected and sea and swell can cause vessels to pitch, roll, and lift bodily in the approaches.

North Mole, an artificial rock breakwater, extends about 4,000 ft. (1,219 m.) N.E. from the low sand spit on the Western side of the entrance. The underwater toe extends about 400 ft. (122 m.) N.E. of the visible head.

The tidal range in the entrance channel is 6.5 ft. (2.0 m.) at Springs, and 4.3 ft. (1.3 m.) at Neaps. Tidal streams run generally along the axis of the channel at rates up to 2 knots on flood and ebb but, near the harbour entrance, vessels may be set to the Westward on the flood stream, and to the Eastward on the ebb stream.

RESTRICTIONS: Tankers proceeding to or from the oil jetty at Dunedin make passage of the upper harbour in daylight hours only. Also see "Max. Size".

Entering and Leaving: Any vessel wishing to enter, leave, or move within the Port of Otago must first obtain permission to do so from the signal station at Taiaroa Head, or that at Dunedin, and this directive shall include any boat or yacht exceeding 11 m. in length wishing to enter the Upper Harbour.

Upper Harbour – Overhead Power Line: An overhead power line from Port Chalmers to Portobello crosses the channel via Goat and Quarantine Islands, supported by steel lattice-work towers painted in bands of orange and silver. The vertical clearance beneath the power line where it crosses the channel is 168 ft. (51.2 m.) at MHWS.

Upper Harbour – Submarine Power Cables: A power cable buried 10 ft. (3.1 m.) below the sea bed runs across Victoria Channel between beacons No. 40 and 41. From Beacon No. 41 the cable is laid on the sea bed in a 280°T direction to the shore. From Beacon No. 40, 3 cables are laid on the sea bed in 115°T, 118°T, and 131°T directions to the shore. Anchoring is prohibited in this vicinity.

MAX. SIZE: *Lower Harbour to Port Chalmers:* Vessels up to 850 ft. (259 m.) length overall, and 38.4 ft. (11.7 m.) draft can transit the Lower Harbour to and from Port Chalmers by day and night. Longer vessels may be handled by prior arrangement with the Harbour Master.

The maximum draft permissible at LW is 36 ft. (11 m.) which may be further reduced to a minimum of 32.5 ft. (9.9 m.), if there is a heavy swell in the entrance channel.

Upper Harbour to Dunedin: Vessels up to a maximum of 604 ft. (184 m.) length overall, 90 ft. beam (27.4 m.) and 26 ft. (7.9 m.) draft can transit the Upper Harbour channel to Ravensbourne and Dunedin. Non gas-free tankers, and vessels over 550 ft. (167.6 m.) in length transit the Upper Harbour in daylight hours only, but all other vessels can be handled both day and night. The maximum draft permissible at LW is 21 ft. (6.4 m.).

HEALTH: Master to radio to Port Health Officer (entry port in N.Z. only) 24 hours before ETA requesting Free Pratique or declaring adverse state of health. Agents will advise Port Health Officer and Health Department inspectors who will board vessel on arrival, alongside actual wharf if Free Pratique requested. N.Z. regulations will require sealing of domestic meat chambers and purchase of local meats for use coastwise.

RADIO: Through Awarua Radio ZLB or Wellington Radio ZLW.

RADAR/VHF: A signal station is situated on Taiaroa Head about 1 cable Southward of the lighthouse. Vessels can communicate with the signal station by flashing lamp or radiotelephone.

VHF and MF radiotelephones are fitted in the signal station and continuous watch is maintained on VHF Channel 16 (156.8 MHz) and 2182 kHz. The call sign is "ZMH 32".

If using VHF, initial contact should be made on Channel 16 (156.8 MHz), and Channels 14 (156.7 MHz) or 12 (156.6 MHz) should be used for subsequent working.

If using MF, initial contact should be on 2182 kHz, 2162 or 2012 kHz should be used for subsequent working. In addition to these frequencies the MF radiotelephone is fitted with the following crystal tuned frequencies:

Transmitter: 2045, 2129, 4125 and 4419.4 kHz.
Receiver: 2045, 2129, 2444, 2638, 4125, 4419.4, 6215.5 and 6218.6 kHz.

Dunedin Signal Station: A radio station is situated in the Otago Harbour Board Office at the Western end of Birch Street Wharf. Watch is maintained on VHF Channel 16 (156.8 MHz) from 0830 hrs. – 1700 hrs. Monday to Friday, excluding public holidays., and Channels 14 (156.7 MHz) and 12 (156.6 MHz) are fitted as working frequencies. The call sign is "Dunedin Harbour Radio".

Notice of Arrival: Estimated times of arrival together with maximum draft must be passed to the Harbour Master by radio 12 hours, and confirmed 4 hours, before reaching the pilot station. This is in addition to any previously submitted notification. Radar operated at station on request has range in excess of 20 miles to North and East.

TUGS: 2 tugs, each 2,000 h.p. (30 ton bollard pull). Tug's used in vicinity of wharves turning, berthing and unberthing, etc. Tug's lines used without charge.

Port Chalmers

Beach Street Wharf: 2 berths with a total length of 375 m., each with road and rail connections. 2×5 ton electric cranes and a large transit shed 152.4 m.×30.48 m. Half the shed is used as a container packing depot, the remainder being available for use by conventional cargo vessels. The outer berth is supported by 9 acres of reclaimed land used mainly for the storage of export logs and woodchips. Depths alongside are 10 m. LWOST.

Container Terminal: A 274.3 m. concrete container berth has been constructed at Port Chalmers capable of accommodating vessels up to 260 m. in length at a maximum draft of 11.68 m. LWOST. 2×46 tonne portainer cranes in operation and a 12.54 hectare storage area.

Also see "Developments".

Dunedin:

Wharves with a total length of 950 m. Depths alongside being 8.53 m. at main berths and 7.62 m. to 6.10 m. at coastal berths. All berths have transit sheds with a total floor space of 3,600 sq.m. All berths have roads at sheds, Victoria Wharf has a rail connection. There are 6 × 5 ton electric cranes, 16 fork lift trucks and 10 tractors available for use at wharves.

Roll-on/Roll-off Terminal: A special Ro/Ro ferry wharf 152 m. long with adjustable stern ramp is supported by 2.83 hectares of paved storage and sheltered shed. Depth alongside being 7.4 m. LWOST.

Ravensbourne Wharf: Situated 1 mile from Dunedin is available for the discharge of bulk phosphate and sulphur via hoppers and conveyor belt direct into works. Maximum size of ship for this jetty 184.1 m. overall. Depth alongside 8.0 m.

LPG Berth: A dedicated berth for coastal gas tankers has been constructed 300 ft. (91.5 m.)×106°T from end of Ro/Ro wharf.

All berths in the port have fresh water connections, ample floodlighting and telephone facilities.

CRANES: The Container terminal is equipped with 2 Vickers Hoskins Paceco 40 tonne Mach Container Gantry Cranes with an outreach of 33.22 m. and a backreach of 10.67 m.

Also see "Berthing".

STEVEDORES: Labour for Saturday work must be ordered by 0830 hrs. Fridays, otherwise by 1530 hrs. for following day. Advise Agents of firm ETA in time to judge this.

Wharf working hours are the same as for most other New Zealand ports: 0700 – 1200 hrs. and 1300 – 1700 hrs. Monday to Friday inclusive with option of additional work 1800 – 2100 hrs. to finish a vessel. 0700 – 1200 hrs. on Saturday, with option of additional work 1300 – 1700 hrs. to finish a vessel.

No wharf work on Sundays or public holidays, but ships are berthed or sailed as required.

Container Terminal shifts: 0700 – 1430 hrs. and 1430 – 2200 hrs. every day of the year.

MEDICAL: Emergency medical services and full hospital services always available at short notice. Emergency advice by radio available. Top priority given arrangements for landing urgent cases for medical treatment.

TANKERS: Diameter of lines 200 mm.; minor slop facilities only; one tanker discharge berth 220 m. long, 7.5 m. depth alongside at low water. Max. size 184 m. long.

DENSITY: Harbour density 1024 at all states of tide.

FRESH WATER: Fresh water is available at all berths. Delivery rates are approximately 15 tonnes/p.h. at Dunedin wharves and 25 tonnes/p.h. at Port Chalmers.

FUEL: Marine diesel, heavy and light fuel oils, and lubricating oils are usually available. Small quantities can be delivered to any berth by tank trucks, and larger quantities can be loaded by pipe-line at the Oil Jetty at a rate of about 100 tonnes/p.h.

CONSULS: Consular Agencies: Denmark, France, Germany F.R., Italy, Netherlands, Norway, Portugal, Sweden.

REPAIRS: Private companies capable of undertaking all forms of repair work are established in Dunedin and Port Chalmers. There is no dry dock, but a 500 tonne slipway capable of accommodating vessels up to 191 ft. (58.2 m.) long is available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Shore watchman not normally required except at entry to oil jetty, such watchman arranged for by ship's Agents. Ships required to maintain own gangway surveillance.

OPENING/CLOSING HATCHES: Automatic hatch gear may be operated by ship's personnel. Manual hatches by shore labour only.

CERTIFICATES: Normal cargo gear and equipment certificates as required for British ports; also Fumigation (Derat) or Exemption Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: Repatriation arrangements can be made.

AIRPORT: Dunedin is served by all internal main airlines with connections to overseas via Christchurch, Wellington and Auckland. Airport 35 minutes (25 km.) from Dunedin City by car.

TIME: N.Z. Standard Time throughout year is GMT plus 12 hours, except that Summer time now operates from last Sunday in October to third Sunday in March. (Add 1 hour).

HOLIDAYS: As for all N.Z. ports, i.e. January 1st and 2nd; Good Friday and Easter Monday; Anzac Day (April 25th); 1st Monday in June; Labour Day (Monday, nearest October 24th); Christmas Day and Boxing Day; Waterside Picnic Day (Monday at end January). Where New Year and Christmas holidays coincide with Saturdays and/or Sundays, holidays are taken following Monday and/or Tuesday. General cargo not worked on these days nor on Sundays; tankers discharge 365 days; ships arrive and depart regardless of holidays. Container ships worked all days except Good Friday and Anzac Day.

POLICE/AMBULANCE/FIRE: Police 776011; Ambulance 777111; Fire Brigade 779111; Hospital 740999; Emergency (serious) dial 111 and ask for any service needed.

TELEPHONES: Slot telephones can be put on board with all local calls free, others by cash in slot.

SERVICES: Radar and gyro compass technicians available. Good shop and providore facilities. Compass adjuster usually available. Divers employed by a private company are available for underwater inspections.

IDENTIFICATION CARDS: Not required for British subjects. Alien identification cards to be retained on board in case of need.

REGULATIONS: No special local regulations, but all N.Z. ports have very strict rules for garbage collection and disposal, etc. and against oil spillage.

GENERAL: No special moorings are required. Harbour, though tidal, is landlocked and there is no surge at any berth. Tide rise averages 6 ft. above datum (extremes 1.52 m. and 2.44 m.).

Harbour Chart: N.Z. 6612 Otago Harbour.

Adjacent Coastal Charts: N.Z. 64 Banks Peninsula to Otago Peninsula. N.Z. 66 Taiaroa Head to Nugget Point. N.Z. 661 Approaches to Otago Harbour.

Sailing Directions: New Zealand Port Information Manual. New Zealand Pilot.

Communications: Dunedin and Port Chalmers are connected with the post, telegraph, telephone, and telex systems.

State Highway No. 1 and the main trunk railway line both pass through Dunedin. Regular road and rail services operate to other South Island towns.

SHORE LEAVE: Crew members not restricted ashore.

DELAYS: Ample berths normally available. Occasional delays for labour shortage or wet weather (rainfall average 762 mm. per year). Small quantities bunkers available ex-tank wagons at any berth. Larger quantities obtainable by shifting to oil jetty outside cargo work hours or as otherwise convenient.

DEVELOPMENTS: The depths at most berths are presently below standard due to siltation but it is intended that restorative dredging will be implemented to achieve the following objectives in due course:

Berth	*Intended Depth*	
George Street	12.2 m.	(40 ft.)
Beach Street	10.7 m.	(35 ft.)
T & U	8.5 m.	(28 ft.)
Oil Jetty	8.5 m.	(28 ft.)
Ravensbourne	8.5 m.	(28 ft.)

Container Wharf: Construction of a second container berth commenced in February 1990. Length of berth 296.5 m. (see "Plan").

AUTHORITY: Port Otago Ltd, P.O.Box 1, Dunedin, New Zealand. *Tel:* (024) 740-881. *Telex:* NZ 5250. *Cables:* Koputai. *FAX:* (024) 771419. *Contact:* Captain K. Plate, Chief Executive. Captain J. M. Harger, Chief Pilot. Captain M. McCabe, Container Terminal Manager. Mr.G.Grenfell, General and Bulk Cargo Manager.

PICTON: 41.17 S. 174.00 E. (See Plan)

PORT LIMITS: Inside straight lines from Cape Jackson to Cape Koamaru and from East Head to West Head at Tory Channel Entrance.

DOCUMENTS: See "Auckland".

PILOTAGE DISTRICT: *Queen Charlotte Sound:* Inside a straight line drawn in a 303° direction from Paparoa Point on Arapawa Island to the opposite shore, and the arc of a circle radius 1 mile centred on West Head Light.

Pelorus Sound: Inside a straight line drawn in a 121° direction from Paparoa Point (East of Harding Point) to Alligator Head.

PILOTAGE: Pilotage is compulsory inside a straight line drawn in a 180° direction from Snake Point to the opposite shore, including all the waters of Tory Channel. Pilotage in the Outer Reaches of Queen Charlotte Sound and in Pelorus Sound is optional. Unless otherwise requested, Pilot will board vessels in a position 090°T, 0.6 miles from Motuara Island Light Tower. By arrangement with the Harbour Master, Pilots will board vessels in a position 045°, distance 2.5 miles from Deiffenbach Point Light Tower, East of Snake Point, where a Pilot is not required in the optional pilotage area. By arrangement with the Harbour Master, vessels may enter and leave via Tory Channel, subject to weather, when Pilot will board and leave in a position 135°T, distance 1 mile from West Head Light Tower. Application for a Pilot must be made at least 4 hours before the estimated time of arrival. For vessels arriving at night or during the weekend, application should be made no later than 1530 hrs. on the last previous working day. Pilot boat 14.6 m. in length equipped with VHF radio Channel 16. Call sign "Picton Pilot Launch".

ANCHORAGES: Except during strong N.W. winds, there is a good anchorage Northward of Mabel Island in 16 fathoms for vessels of all sizes.

Quarantine Anchorage: Within the navigable area to Westward of Mabel Island enclosed between the foreshore and a line from Kaipupu Point 047° to the Western extremity of Mabel Island, thence 349° to Wedge Point. Vessels not in quarantine can use this anchorage.

RESTRICTIONS: Controlling depth in approaches to anchorage is 13 m. MLWOS.

MAX. SIZE: Max. length 201 m. Draft 11 m. aft, 8 m. – 10 m. forward depending on length. Vessels of this size can berth at any state of the tide. Longer vessels may be accommodated by arrangement with the Harbour Master.

HEALTH: First entry at a New Zealand port Pratique is granted after vessel berths provided she has a clean bill of health from her last port, otherwise vessel would anchor in the Quarantine Anchorage, where port Health Officer would board. Once clear at the first port in New Zealand no further Pratique is required.

RADIO: Port is equipped with medium frequency and VHF, call sign "Picton Harbour Radio", calling frequency 2182 kHz. Watch is maintained Monday to Friday, 0900 to 0933, 1140 to 1203, 1540 to 1603 hrs. daily and at other times by arrangement. In addition the following schedule is maintained for communication with the road/rail ferries: 0103, 1140, 1640, 2020, 2050 hrs. Sundays only: 1603 hrs.

TUGS: None.

BERTHING: One overseas wharf 240 m. length with accommodation for 2 vessels. Depth at wharf up to 11.58 m.

Two road/rail ferry berths 152 m. long with modern terminal facilities for Roll-on/Roll-off traffic.

STEVEDORES: Agents will provide gangs and other facilities provided Master gives prior notice of his requirements.

MEDICAL: It is necessary for Master to give his Agent as much advance notice as possible. Two doctors reside in the port. Hospital at Blenheim, 35 km. by road. Ambulance service available.

DENSITY: 1025.

FRESH WATER: Supplies available at 30 t.p.h. Cost 50 cents/tonne.

FUEL: By tank wagon only.

CONSULS: At Wellington.

REPAIRS: Small repairs undertaken by three companies.

SURVEYORS:
1. Cargo Surveyors available.
2. Lloyd's Register available. Other societies available from Wellington.

GANGWAY/DECK WATCHMEN: Required by general harbour regulations and is generally carried out by ship's deck hands.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

CARGO GEAR: Marine Department control this and regulations are issued accordingly. These regulations are very similar to those in the United Kingdom.

REPATRIATION: Crew changes can be made.

AIRPORT: Woodbourne – 36 km. by road from Picton, served by feeder services to Wellington – Christchurch. Local seaplane service from Picton Harbour. Local airline to Wellington.

TIME: GMT plus 12 hours. Daylight saving time, plus 1 hour, in force from October to March.

HOLIDAYS: New Year's Day, Anniversary Day, Good Friday, Easter Monday, Labour Day, Sovereign's Birthday, Christmas Day, Boxing Day, Anzac Day, Waterside Workers Picnic Day, New Zealand Day.

POLICE/AMBULANCE/FIRE: Police Tel: 111. Ambulance, through doctor or in case of emergency Tel: 111.

EMERGENCY CO-ORDINATION CENTRE: S.A.R. Co-ordination Centre, Wellington. Tel: 881035. If in port contact Harbour Master.

TELEPHONE: Facilities exist to place telephones on board.

BANKS: Bank of New Zealand, High Street, Picton.

STORING: See "Prelims".
1. Storage from trucks only available.
2. No restrictions on storing.
3. Trucks can proceed alongside berth.
4. Forklift trucks can be used to handle stores.
5. Purchase of stores requires Customs Dept. approval.
6. Stevedores available for loading stores.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

SHIP SUPPLY SERVICE: No ship supply services operate in this area.

Notwithstanding the above, there are a number of commercial operators in the district who have the capability to provide a variety of supply services.

There are sheltered areas in the outer reaches of the Marlborough Sounds which would be ideal for vessels transiting Cook Strait to take advantage of a ship supply service, incurring a minimum of delays in the process.

The Customs Department have advised that by prior arrangement it would be possible for a vessel in transit to take aboard mail and/or goods from a launch without completing full Customs formalities.

1. *Emergencies:*
   Contact: Port Marlborough New Zealand Ltd.
   Telegrams: "Marlharb" Picton.
   Radio Call Sign: "Picton Harbour Radio".
   Radio frequencies: MF 2182 kHz or VHF Channel 16.
   Notice Required: 4 hours if possible.
   (NB: Helicopter available ex-Wellington).
2. *General Supply Services:*
   Various Commercial launch and barge services are available from Picton (Queen Charlotte Sound and Approaches) and Havelock, (Pelorus Sound and D'Urville Island). For further information contact Port Marlborough New Zealand Ltd.

Rendezvous points would depend on the needs of the vessel requiring the service, survey limits of the vessel providing the service and weather conditions prevailing at the time.

DEVELOPMENTS: 6 deep water berths may be built at Shakespeare Bay with depth alongside 20.0 m.

AUTHORITY: Port Marlborough New Zealand Ltd, P.O. Box 111, Picton, New Zealand. *Tel:* (057) 38000. *FAX:* (057) 37695. *Contact:* Mr.B.Fitzpatrick, Managing Director. Mr.M.Santaana, Manager Operations.

TAHAROA: 38.11 S. 174.42 E.

LOCATION: The Port of Taharoa is situated on the West Coast of the North Island of New Zealand, in Lat. 38° 10.7′ S., Long. 174° 42.4′ E. It is one of the few ports in the world where a solid cargo, ironsand, is pumped in a slurry form and loaded into ships moored at a single point mooring buoy.

Kawhia Extended River Limits: Taharoa Harbour lies within the Kawhia Extended River Limits, which is delineated by a straight line commencing near Taranaki Point in a 270° direction to the East Point of Gannet Island, then 180°×15.5 miles, thence 090° to the shore.

PORT LIMITS: The port limits is the arc of a circle radius 2 miles centred on the pumping station, Lat. 38° 10.7′ S., Long. 174° 42.4′ E. and the pilotage district is the arc of a circle of radius 3 miles also centred on the pumping station.

There are no known dangers in the pilotage district, and the sea bed depth increases at a reasonably uniform gradient from the beach seaward.

The Motunau Beacons, which are unlit, are established some 4 miles South of the SBM in line bearing 158° (T). This line passes 835 m. inshore of the SBM, and from the North to the point where it crosses the Southern prohibited anchorage line gives a least depth of 22 m.

A 1.5 m. diameter wave rider buoy, which is difficult to see, is positioned some 0.5 miles E.S.E. of the SBM.

PILOTAGE: Pilotage is compulsory in the Pilotage District. Application for a Pilot should be made to New Zealand Steel Mining Limited, telegraphic address "Ironsands Taharoa", via Awarua Radio.

Pilots embark and disembark by helicopter. Ships awaiting the Pilot, should lie, head to wind, about 3 miles W.N.W. of the buoy.

Depending on weather conditions ships can be berthed by day or night though much better conditions are required for night berthing. As a general but not absolute rule, ships can be berthed with a significant wave height of up to 3.5 m. and a maximum wind gust of 40 knots. While at night the maximum wave height must be less than 2.0 m., and the wind gusts less than 15 knots.

Also see "General".

ANCHORAGE: Ships awaiting the berth are normally anchored about 2 miles W.N.W. of the buoy in good holding ground. The anchorage is exposed to the Westward, and in weather conditions in which it is not possible to moor, ships should head out to sea.

Prohibited Anchorage: All that area bounded by straight lines, commencing at the low water mark in position Lat. 38° 10.8′ S., Long. 174° 42.4′ E. Thence to Lat. 38° 11.1′ S., Long. 174° 40.1′ E. Thence to Lat. 38° 10.3′ S., Long. 174° 42.15′ E., thence to the point of commencement.

The Northern and Southern limits are marked by rectangular beacons painted in red and white vertical bands. The Northern Beacons are in line bearing 088° (T), and the Southern Beacons in line bearing 081° (T).

NAVIGATION: *Lights:* Taharoa Main Light, exhibited from a 16 m. high frame work tower painted in red and white bands, in position Lat. 38° 10.1′ S., Long. 174° 42.15′ E. has the characteristics group flash 2 white every 20 secs. A fixed red obstruction light is also exhibited on the tower.

The SBM has white light flashing every 5 secs.

The wave rider buoy light has the characteristics group flash 3 white every 15 secs.

The prohibited anchorage beacons each exhibit a fixed red vertical light.

RESTRICTIONS: Arrival draft should be: Forward – 3 per cent of the vessel's overall length and Aft – propeller submerged.

HEALTH: *Quarantine:* 24 hours before the expected time of arrival, ships must send to New Zealand Steel Mining Limited for onward transmission to the Department of Health in Hamilton, a message detailing the last port of call, the date of departure, and the state of health on the vessel.

Vessels calling regularly at Taharoa are usually given Pratique by radio, though Quarantine Officers reserve the right to inspect the vessel at any time.

RADIO/VHF: *Communications:* Ship loading at Taharoa must advise New Zealand Steel Mining Limited of their departure from the last port before arriving in Taharoa, and give their ETA.

The ETA must be updated 7 days, 3 days and 24 hours before arrival.

The ETA 3 days before arrival is particularly important, as special shift patterns have to be set for loading, which by agreement with the unions, are based on this arrival time.

The Port Operations Centre, which is manned only when a ship is in port or expected, is equipped with radio. (Medium frequency 2182 kHz, single side band, and VHF Channels 9, 10 and 16).

Ships calling at Taharoa should maintain a listening watch on 2182 kHz, at 0833 hrs. and 1503 hrs. New Zealand standard time, the day before arrival, and call up the Port Operations Centre, call sign "Port Taharoa", on Channel 9 when 2 hours out.

Radio messages to New Zealand Steel Mining Limited should be addressed to "Ironsands Taharoa", via Awarua Radio, or alternatively Auckland Radio.

BERTHING: The berth is a single point mooring buoy, 11 m. in diameter designed by SBM Inc., using a catenary anchor leg mooring (CALM), to secure it to the sea bed. It is capable of mooring ships up to 150,000 tonnes deadweight.

There are 6 anchor legs, arranged radially 60° apart, each consisting of some 347 m. of 102 mm. chain, attached to a 9,000 kg. Bruce Mk II anchor. Each leg is pre-tensioned to 220 tonnes, and has a holding power of 400 tonnes.

The buoy is 1.64 miles offshore in position: Lat. 38° 10.6′ S., Long. 174° 40.25′ E. The depth of water at the buoy is 30 m. at MWL.

Loading: Loading rate 1,200 dry tonnes/p.h. on each line. Sand density 4.64 average.

MOORING: *Mooring Rope:* The mooring rope is a 52 m. endless grommet of 168 mm. diameter two-in-one braided nylon rope, which has a breaking strain of 1,000 tonnes. One end of the grommet is attached to the buoy, and the other end, when the ship is moored, is placed over the ship's single centreline mooring post.

The ship's end of the rope has a 5.5 m. soft eye protected with a chafing sleeve. An heaving eye, which is attached to a 60 m. heaving tail of 80 mm. two-in-one braided polypropylene rope, breaking strain 76 tonnes, is attached 1.5 m from the crown on one part of the ship end eye.

Ship's Equipment: To moor at Taharoa, a ship should be fitted with a mooring post (700 mm. diameter) on the centreline, between 2.0 m. and 3.5 m. from the fairlead. The post should be about 750 mm. in height and the top should slope forward.

The centreline fairlead should have minimum dimensions of 1,400 mm.×1,700 mm., and the bearing surface lined with stainless steel; if this lining is not fitted, all paint should be removed from the fairlead, and the bearing surface coated with tallow, before the ship arrives. Tallow will be supplied by New Zealand Steel Mining Limited, but the ship must provide a suitable bucket, so that it can be transported from the Operation Centre on the helicopter.

A roller on a stand, 1 m. in height, should be positioned about 2.0 m. abaft the mooring post, and set slightly off the centreline.

The ship should have a 300 m.×80 mm. strand polypropylene messenger line, either on a warping drum, or suitably flaked out. To one end of the messenger line a 16 mm. polypropylene heaving line should be attached. The heaving line is then passed through the centreline fairlead, and led down the ship's side, (usually the port side, though the Pilot will confirm this when he boards) to about the after end of No. 1 hatch, from where it will be passed to the service vessel.

MOORING PROCEDURE: The service vessel will have checked the buoy, mooring rope and hoses before the ship arrives, and when the Pilot boards will stand off and wait for the ship to close the buoy. The Pilot will manoeuvre the ship to approach the buoy usually along the line of the hoses, and when about 300 m. from the buoy will instruct the service vessel to pick up the heaving line. The service vessel will then manoeuvre close alongside abreast of where the heaving line is prepared. The heaving line should be thrown to the service vessel foredeck, from where the crew will pass it aft to their winch. When this is done, the service vessel will steam ahead, to a position about 100 m. ahead of the ship, winching in the mooring messenger until there is about 6 m. inboard.

As both the ship and the service vessel steam slowly towards the buoy, the line should be paid out so as to keep the rope slack at all times, but at no stage should the rope be allowed to run aft of the ship's stern.

When the service vessel is close enough, the messenger line will be connected to the heaving tail. As the ship will be moving ahead while this is being done, any slack should be picked up, but under no circumstances should the rope be lifted out of the water between the ship and the service vessel.

As soon as the connection between the messenger and the heaving tail is made, the service vessel will steam clear, and the rope should be heaved in at a steady rate. Normally, the mooring line is stored on a platform on the buoy, so that sufficient weight must be put on the messenger to heave the mooring line into the sea. Once the mooring rope is clear, it is important that as the ship closes the buoy, only the slack in the ropes is picked up.

When the ship is about 15 m. from the end of the main mooring rope, the ship's end eye and 2 flotation covers may be lifted out of the water. Gradually, as the ship moves closer to the buoy, a little more of the rope may be lifted out of the water, until with the ship end eye of the main rope at the bull nose, there is about 15 m. from the stem to the point where the rope touches the water. Should the bows pay off, or the ship move astern, the heaving tail should be slacked down immediately, so as to maintain a minimum distance of 15 m. from the stem to the point where the rope touches the water.

When the rope is actually being made fast, it should hang almost vertically from the centreline fairlead.

HOSES: *Equipment:* The ship's manifold should be on the starboard side, abreast No. 1 hatch, loading through either 1 or 2 lines. The flanges must be standard 150 lb. ASA 12 in. flange, with 12×1 in. holes, 1 hole at the exact top. The hose handling derrick should be capable of plumbing over the manifold with sufficient height to lift a 10.7 m. hose just clear of the deck, and have a SWL of 8 tonnes.

4×15 mm. wire pennants 3.0 m. long, and 4 chain blocks, or tackles, will be required to make fast the hose hang off chains.

Picking up the Hose: As soon as the ship is fast, the service vessel will put a dinghy in the water, to bring the No. 1 hose pick-up line to the ship's side. An heaving line should be passed to the dinghy, so that the pick-up line can be brought on board. The pick-up line, which is a 55 m. length of 56 mm. square line polypropylene rope is then used to winch the first hose of the string to deck level where the derrick hook can be attached, and the hose lifted to its full extent.

In marginal weather conditions, a second heaving line should be passed to the dinghy, while the first is still being heaved in. This, when attached to the No. 2 hose pick-up line, is secured to the rail, and can be heaved in later. The dinghy can then be released, reducing the time it has to spend in the water.

When lifting the hose, the derrick should be plumbed about 1.5 m. inboard from the ship's side. This keeps the hose against the ship's side thus reducing the oscillating effect in marginal weather conditions.

With the first hose in the string lifted to its full extent, the hang-off chains can be grappled, brought on board and secured to a 15 mm. diameter wire pennant, attached to a chain block or tackle, so that the length of the unit can be adjusted if necessary.

Letting go the Hose: A small wire strop is passed through one of the eyes on the hose nipple, and anchored by an 80 mm. long by 24 mm. diameter stainless steel bar, to which is attached a heaving line. The lifting wire is hooked into the strop, and when all the connecting bolts are removed, the hose is lifted to its full extent and wire pennants disconnected from the hang off chains. The hose is then lowered into the water and when the weight comes off the lifting wire, the bar can be pulled clear.

MEDICAL: There is no resident doctor or nurse. The nearest hospital is in Te Kuiti about 1 hour's drive away over a bad winding road.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

GENERAL: *Provisions:* Supply of provisions, which come from Hamilton, can be arranged if adequate notice is given.

Weather: The prevailing wind is Southwesterly. The winds are usually stronger in Winter and Spring than at other times of the year, though gales can occur at any time, from any direction.

The significant height of the combined sea and swell is above 1.5 m. for 50% of the time, and the maximum recorded sea height has been 12 m.

Customs and Agriculture: Officials from the Departments of Customs and Agriculture will clear the vessel on arrival, and before departure.

Regulations: The general harbour regulations for New Zealand are applicable.

Tidal Streams and Currents: The tidal stream sets Northward with a rising tide and Southward with a falling tide, but these are weak and generally do not affect mooring.

During Southwesterly weather an intermittent current sets Northward parallel to the coast, and can reach a velocity of 1.0 – 1.5 knots.

Agency: New Zealand Steel Mining acts as its own Agent, and will act for others when prior arrangements have been made.

Administration: The Port is under the jurisdiction of the Marine Division of The Ministry of Transport, but is leased to New Zealand Steel Mining Limited, who own the buoy and the loading equipment.

The Pilots are contracted to New Zealand Steel Mining Limited, and remain on board during the time the ship is moored, acting as Loading Masters. A change of Pilots usually takes place at 0630 hrs. and 1830 hrs.

OPERATOR: New Zealand Steel Mining Ltd., Taharoa, Te Anga, Private Bag, Te Kuiti, New Zealand. *Tel:* Te Anga (0813 67) 859. *Telex:* NZ 21172. *FAX:* Auckland (09) 393 794 (Group 3). *Cables:* Ironsands Taharoa. *Contact:* P.C. Brady, Operations Manager.

TAURANGA (Mount Maunganui): 37.39 S. 176.11 E.

(See Plan)

PORT LIMITS: The arc of a circle radius 2 miles centred on the summit of Mount Maunganui (Lat. 37° 37.9′ S., Long. 176° 10.3′ E.), from the N.E. Coast of Matakana Island to a position 093° from North Rock Light (4.25 cables NNE of Mount Maunganui summit), thence 273° to the light and thence South to the coast of Mount Maunganui.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
1 Search List (on regulation form).
1 Bonded Store.
1 Gift List.
1 Declaration by Master of Restricted Immigrants.
1 M.O.T. Declaration of Safety Certificate.
1 Maritime Declaration of Health.
1 Cargo Manifest (for each Port of discharge).
1 Derat Certificate.
1 Clearance, Last Port.
1 Poisons on Board.
1 Firearms on Board.
1 Ship's Papers.
2 Master's Certificates (Form AGL36).
2 Master's Bond and Guarantee (only if animals are being carried).

PILOTAGE: Pilotage is compulsory for merchant vessels of over 100 tons gross tonnage; Pilot boards vessel about 2.5 miles N.E. of Mount Maunganui light structure. All vessels inward bound must give 24 hours' notice by radio of their ETA off the port limits. If bound from Auckland or near ports, vessels send their ETA immediately on departure from that port.

A second message confirming or amending the first is to be sent 4 hours before the ETA. Should, however, the vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before the ETA given in her original message.

All communications, which should be addressed to "Harbour Master, Tauranga", will be attended to at all hours of the day or night.

Two pilot launches. One with length 14.6 m. speed 10 knots, painted international rescue orange. And the other, length 13.7 m., speed 18.5 knots, aluminium hull, with cabin painted international rescue orange. Both fitted with radar, VHF standby on Channels 16, 12. Working Channels 14 and 11.

Vessels awaiting to enter Port may find suitable anchorage in 12 fathoms, 2 miles N.E. of Mount Maunganui. The holding in sand and shells is good in all but extreme conditions.

RESTRICTIONS: Vessels can berth and unberth by day and by night, but those over 100 m. in length are handled at slack water.

MAX. SIZE: Max. length permissible is 225 m. (over 225 m. at Harbour Master's discretion), no restrictions on beam. Max. arrival and departure draft at high water is 10.7 m. and at low water 9.20 m.

HEALTH: Radio notification to be sent to "Port Health Tauranga", regarding state of health of crew and ETA 24 hours before arrival requesting Radio Pratique.

Pratique is granted by Port Health Officer on arrival if Radio Pratique not requested or granted. Notification should be made by radio to Port Health in case of suspected disease or fever on board.

Pratique is automatic if vessel has been previously cleared at another New Zealand port.

RADIO: Nearest coastal radio station to Port of Tauranga is "Auckland Radio" – call sign ZLD.

The Port of Tauranga Signal Station is fitted with radar, VHF and R/T and is manned 24 hours a day. Listening watch on 2182 kHz, 4125 kHz and VHF Channels 16 and 12.

RADAR/VHF: Radar in signal station, pilot launches and two tugs. VHF in Signal Station, pilot launches and three tugs. Channels 16, 14, 12 and 11.

TUGS: 2 tugs are available, each with a bollard pull of approximately 28 and 15 tons. They usually join inward vessels in the vicinity of the Harbour entrance. Tug's lines are normally used, for which there is no extra charge. A third tug (bollard pull 15 tonnes) available if requested.

BERTHING: Berthing normally takes place 30 minutes after negotiating harbour entrance at HW or slack LW. The quay type concrete wharf 2,055 m. in length, (nominally 11 berths), is fitted with wooden spring piling and rubber buffers. A linkspan is situated in the centre of the wharf area.

A 40 tonne SWL multi-purpose crane is in operation on the Southernmost 450 m. of Mount Maunganui Wharf.

Mobile cranes are available for hire.

Berthing Facilities: Commencing from the North, berths are numbered accordingly.

No.	*Length* (m.)	*Distance from North End* (m.)	*Depth* (m.)	*Max. Draft at HW* (m.)
1	170	0 – 170	10.4	9.8
2	170	170 – 340	10.4	9.8
3	170	340 – 510	10.4	9.8
4	170	510 – 680	9.5 – 10.4	9.0 – 9.8
5	228	680 – 908	10.4	9.0
6	150	962 – 1112	10.4	9.8
7	160	1112 – 1272	10.4	9.8
8	180	1272 – 1452	11.6	10.7
9	180	1452 – 1632	11.6	10.7
10	200	1632 – 1832	11.6	10.7
11	223	1832 – 2055	11.6	10.7
Cement/Tanker			11.6	10.7

STEVEDORES: ETA to stevedoring companies is usually worked in conjunction with ETA to Agent.

MEDICAL: Unless specifically required for arrival, Agents do not require advice. Local medical practitioners are consulted and services of one public and one private hospital are utilised.

TANKERS: Discharge of black and white products is carried out at a specially built tanker berth, permissible draft presently 10.7 m. Both products are discharged through 250 mm. pipe-lines. The flexible connection to ship is 200 mm.

Chemical tankers discharge and load at the same facility. There are no slop facilities available.

Cement/Woodchips: Bulk cement discharged via pipeline on tanker berth to adjacent silos. Woodchip carriers loaded by conveyor across tanker berth from adjacent stockpile.

DENSITY: Salt water, 1025.

FRESH WATER: Fresh water is supplied by pipe-line at 20 tonnes/p.h., prior arrangements must be made with the Operations Manager for quantities in excess of 1,000 tonnes.

FUEL: Bunkering connections are placed at all berths. Quantities of L.F.O., 200 secs, Redwood No. 1 and H.F.O. 1,000 secs, Redwood No. 1 can be supplied by prior arrangement with the Oil Companies.

FIRE PRECAUTIONS: The tanker berth is securely fenced and the gate is manned by the Company's Security Staff to prevent entry by unauthorised persons. A pass system operates. Normal precautions are taken. The berth is equipped with a remotely controlled foam monitor and 2 of the Board's tugs are equipped with foam.

REPAIRS: All types of engine and deck repairs are possible. A slipway can take vessels of 610 tonnes displacement and up to 56 m. length.

SURVEYORS: *Registered Cargo Surveyors:* Camping & Rutherford, P.O.Box 5001, Mount Maunganui. Tel./Fax: Tauranga 756988.

Caleb Brett & Sons Ltd., New Zealand. Representatives: G. W. Dunsford & Associates Ltd., 42 Custom Street, Auckland. Tel: 797-171. Telex: NZ 2437. Cables: Dunship, Auckland.

Classification Societies – Surveyors: American Bureau of Shipping: Surveyor N. K. Farell, P.O.Box 1974, Auckland. Tel: 31284. Telex: 21638. Cables: "Record".

Bureau Veritas: Surveyor – J. C. Edwards, P.O.Box 1284, Auckland. Tel: 779-095. Telex: NZ 2531. Cables: "Randship".

Lloyd's Register of Shipping, Principal Surveyor: P. Betteridge, P.O.Box 2682, Auckland. Tel: 733-311. Telex: NZ 21157. Cables: "Lloydsreg".

United States Salvage Association Inc., Non-exclusive Representatives: G. W. Dunsford and Associates Ltd. P.O.Box 4076, Auckland.

OPENING/CLOSING HATCHES: Usually performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco or 50 cigars. 1 part bottle of spirits or wine and 2 cases of beer. Vessels are entitled to an issue of duty free stores every 10 days while remaining on the coast.

REPATRIATION: All facilities exist.

AIRPORT: The airport is situated 1.6 km. from the wharf and is served with regular internal flights to other main centres where overseas flights may be connected with.

TIME: GMT plus 12 hours. GMT plus 13 hours in Summer.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day and Anniversary Day, both in latter part of January; Waitangi Day, 6th February; Good Friday; Easter Monday; Anzac Day, 25th April; Queen's Birthday, early June; Labour Day, late October; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: All connected through automatic exchange, Emergency No. 111.

EMERGENCY CO-ORDINATION CENTRE: When vessels are in port, any queries should be directed to the Port Company's Signal Station which is manned 24 hours per day. For specific emergencies (Fire, Police, Ambulance) dial 111.

TELEPHONES: Telephones are placed on board all ships when they arrive.

SERVICES: Local compass adjusters are available. Ship's stores can be provided by local Providore firms. Fumigation can be arranged. Ships' garbage is collected daily. No facilities for discharge of tank washings exist.

STORING: Vessels can be stored by truck – barges not used. Trucks can proceed alongside at the berth and remain close alongside if not interrupting cargo operations.

Forklift trucks may be used to handle stores but normally not necessary. Customs regulations in force when Bonded Stores are being loaded. Not customary for local riggers to be employed to assist with storing.

SHORE LEAVE: Crew are permitted ashore at Master's discretion.

IDENTIFICATION CARDS: Not required, but crew list should be handed to the Security Staff. At the Master's discretion temporary passes may be issued for crew guests to gain access to the berth.

SHIP SUPPLY SERVICE: A small scale launch service is available when required for the ship-to-shore transport of personnel and/or essential stores and/or sick crew members. This can be arranged through local shipping agents.

DEVELOPMENTS: Sulphur Point Wharf Development (Lat. 37° 39.5' S., Long. 176° 10.0' E.): Two new berths due for completion March 1991 with length 340 m. and depth alongside 14.5 m.

AUTHORITY: Port of Tauranga Ltd., Post Bag 1, Mount Maunganui. *Tel:* (075) 751-899 (Tauranga). *Telex:* Patga NZ 2378. *FAX:* (075) 751 800. *Cables:* "Harboard". *Contact:* John M. Halling, Chief Executive. Captain D. E. Sayle, Operations Manager/Harbour Master. A. J. Herbert, Secretary.

TIMARU: 44.24 S. 171.19 E. (See Plan)

PORT LIMITS: 2.5 miles radius with centre at Eastern Extension Light.

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory, and Pilots are available day and night. A vessel requiring a Pilot should remain 1.5 miles seaward of Eastern Extension Mole, near and to South of Fairway Beacon. Vessels should not proceed Northward of line of leading lights on Benvenue Cliff.

Contact Pilot on VHF Channels 16 and 12 ("Timaru Harbour Control"). Pilot boards vessel at Fairway Beacon.

ANCHORAGES: A vessel should anchor in a depth of not less than 12.8 m., sand, and Eastward of harbour light structure, and not within 1.5 miles of Eastern Extension Mole.

RESTRICTIONS: Swell and tidal conditions may affect time of entering harbour.

MAX. SIZE: Length, 200 m. (LOA 227 m. if fitted with bow and stern thrusters); Beam, no limit; Max. permissible draft 10.0 m. Time of berthing vessels of over 8.4 m. draft will depend on swell and tidal conditions and at Harbour Master's discretion.

HEALTH: Due to exposed nature of anchorage, incoming vessels are examined and Pratique is granted after a vessel berths. In event that vessel is quarantined, she will be required to return to anchorage without any contact being made with shore.

RADIO/VHF: Port of Timaru Ltd. has a radio telephone station equipped with both medium frequency and VHF installations.

Call sign "Timaru Harbour Radio", calling frequency 2182 kHz, working frequency 2162 kHz. Fixed watches maintained for a period of 15 minutes every 4 hours, e.g.: 0345 – 0400, 0745 – 0800, 1145 – 1200, 1545 – 1600, 1945 – 2000, 2345 – 2400 hrs. (New Zealand Standard Time) and at other times mutually arranged. VHF call sign is "Timaru Harbour", Channels 16 and 12.

TUGS: 1 tug, 2,238 kW. and Pilot launch/tug, 350 kW. available.

BERTHING: Berthing space available with depths alongside at LWOST, 190 m. with 10.25 m. depth; 400 m. with 10.00 m. depth; 545 m. with 9.75 m. depth; 212 m. with 9.5 m. depth; 195 m. with 8.0 m. depth and 160 m. with 6.0 m. depth., railway lines on all wharves. Rail to Christchurch and Dunedin.

SPECIALISED CARGO HANDLING FACILITIES: *All Weather Mechanical Loaders:* 4 all-weather mechanical meat loaders. Each machine is capable of loading 720 units per hour, to a max. of 2,500 units per hour. Also butter, cheese, frozen vegetables and fish can be handled. Can be used to unload suitable cargoes, e.g. fruit.

Ro/Ro - Lo/Lo Container Terminal: Terminal for handling Ro/Ro and container vessels. Mobile pedestal crane (SWL 47 tonnes) and forklifts for container handling, otherwise loading/unloading by ship's equipment. Port currently has services to Japan, Korea, Taiwan, South-East Asia, South America and the Pacific Islands. Container cleaning and inspection facilities available.

BULK HANDLING FACILITIES: Grain silos and shiploader: 10 silos with total storage capacity 19,500 tonnes. Ship loading rate 700 tonnes per hour via conveyor/shiploader.

Bulk discharge equipment: 6 mobile hoppers (27 cu.m. capacity each hopper), normally used for discharge of fertiliser/sulphurs. Mobile pedestal crane equipped for loading/discharge by grab.

Bulk tallow facility: Storage capacity 6,000 tonnes, ship loading rate 300 tonnes per hour through 8 in. delivery pipe.

CRANES: One multi-purpose mobile pedestal crane equipped for handling containers, bulk and general cargoes. SWL 47 tonnes at 29 m. radius, 30 tonnes at 41 m. radius. Also 1×30 tonnes mobile crane, 1×48 tonne crawler crane and 1×30 tonne crawler crane.

STEVEDORES: Two stevedoring companies operating. Labour must be ordered before 0700 hrs. weekdays and before 1500 hrs. Friday for weekend work.

MEDICAL: Full medical facilities are available as required, including an excellent public hospital.

TANKERS: 1 tanker berth, discharge through 8 in. hoses.

DENSITY: Specific gravity 1025 at all states of tide.

FRESH WATER: Available at all berths, delivered at up to 25 t.p.h. (cost $5.96 per 1,000 litres).

FUEL: Bunkers available, heavy and medium fuel oil. 24 hours advance notice required.

FIRE PRECAUTIONS: When tankers are discharging, access to wharf is prohibited except to those holding passes. Fire-fighting equipment is placed in readiness on wharf.

REPAIRS: Most deck and engine repairs can be undertaken.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.

AIRPORT: 8 km. from port. Daily flights to and from Christchurch and Wellington. 160 km. by road to Christchurch International Airport.

TIME: Approximately March-October New Zealand Standard Time (GMT plus 12 hours). Approximately November-February New Zealand Daylight Saving Time (GMT plus 13 hours). Actual dates of changeover to and from Daylight Saving Time decided annually.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day (port holiday Monday of the week in which 29th January falls); New Zealand Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Dominion Day (third Monday in September); Labour Day (last Monday in October); Christmas Eve (work ceases midday); Christmas Day; Boxing Day. Work can be arranged only by private negotiation on a voluntary basis.

POLICE/AMBULANCE/FIRE: Emergency No. 111 and ask operator for service required. Other than emergency calls: Police, 6884199 Timaru; Ambulance, 6847129 Timaru; Fire Brigade, 6847089 Timaru.

EMERGENCY CO-ORDINATION CENTRE: If within the port area contact Harbour Master's Office, in Ritchie Street. Tel: 6844199.

TELEPHONES: Can be supplied to vessels at all berths, rental N.Z.$12.00 per day.

STORING: See "Prelims".

1. Storing by truck only.
2. N/A.
3. Yes.
4. If necessary.
5. None.
6. If necessary.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

SHIP SUPPLY SERVICE: Port Company craft will assist with transfer of crew.

DEVELOPMENTS: A 150 m. extension to the North Mole Berth is programmed for construction. This is a heavy berth with planned depth alongside of 11 m.

AUTHORITY: Port of Timaru Ltd., P.O.Box 544, Timaru, New Zealand. *Tel:* (03) 6844199. *Telex:* NZ 4773 Timport. *FAX:* (03) 6845615. *Contact:* The Chief Executive.

WANGANUI: 39.57 S. 175.00 E. (See Plan)

PORT LIMITS: Arc of a circle of 3 nautical miles radius centred at the flagstaff at Castlecliff, sited Lat. 39° 56′ 49″ S., Long. 174° 59′ 23″ E.

DOCUMENTS: See "Auckland".

PILOTAGE: If Wanganui is first N.Z. port, initial application for Pilot and vessel's ETA should be passed to local Agent by radio through one of three Post Office radio stations. If not first N.Z. port, this information should be given to local Agent by Agent at previous port. Final details settled when R/T contact made between pilot station and ship.

Pilot launch "Karere", LOA 41 ft. painted white, high midship wheelhouse. Pilot boards at anchorage position. International signals for Pilot should be used if no R/T contact made.

ANCHORAGES: One anchorage for vessels awaiting to enter.

RESTRICTIONS: Port worked day or night at HW when bar conditions are suitable.

MAX. SIZE: Length 120 m., beam 20 m., draft dependent on bar depths at particular time but usually 5.0 m. max. at HWS. No installations outside main port area.

HEALTH: See "Auckland".

RADIO: Wellington Radio ZLW. R/T frequencies 2182, 2162, 2012, 2045, 4419.5 and 6818.8 kHz.

VHF: Channels 16, 12, 9, 68 and 14.

TUGS: No tug available. Pilot launch used for swinging.

BERTHING: Berthing takes place at HW.

SPECIALISED CARGO HANDLING FACILITIES:

No. 6 Berth: Pipe-line for bulk cement connecting wharf with adjacent silos.

No. 1 Wharf: Direct handling into cool store. Fishing berth and fish unloader for hire and rail sidings..

Portable hoppers used for bulk cargoes to load directly into road trucks.

There are no facilities for containers, Roll-on/Roll-off traffic, liquid chemicals or LPG carriers.

CRANES: One mobile crane, capacity 4 tons. 3–20 ton from contractor.

STEVEDORES: Requirements for labour by arrangement.

MEDICAL: 24 hours' notice required if possible. Hospital facilities available. Inoculations, certificates, etc.

DENSITY: 1020 at HW. 1005 at LW. These figures vary greatly according to amount of fresh water in river.

FRESH WATER: Plentiful supply through wharf hose connections. Rate of delivery depends on height of ship's filling pipe above wharf level.

FUEL: All grades available but ship has to pump out of road tankers. Amount of notice depends on grade required.

REPAIRS: Minor deck and engine repairs possible.

GANGWAY/DECK WATCHMEN: Watchman necessary, either crew member or shore watchman.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

REPATRIATION: Facilities exist but more easily accomplished at a main port.

AIRPORT: About 4 miles. Airport caters for internal services only which can connect with international services.

TIME: N.Z. Standard Time (12 hours in advance of GMT). N.Z. Daylight Time (13 hours in advance of GMT) is kept from last Sunday in October until first Sunday in March.

HOLIDAYS: As Auckland, except Anniversary Day holiday which is that held in Wellington Province. No cargo is worked on these days.

POLICE/AMBULANCE/FIRE: Ambulance, 53909; Police, 54488; Fire Brigade, Wanganui, 58505; Fire Brigade, Emergency 111.

TELEPHONES: Arrangements can be made for placing telephones on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

DELAYS: Fresh onshore winds could make entrance unworkable for a vessel waiting to enter. Cargo work stops in rain and in unusually strong wind. Bunkering would be slow if large amount of bunkers required.

DEVELOPMENTS: Development plan in course of preparation but as yet no details of size of any possible new installations or draft increases.

AUTHORITY: Wanganui Harbour Board, P.O.Box 8001, 507 Heads Road, Castlecliff, Wanganui, New Zealand. *Tel:* (064) 45562. *Cables:* Harboard. *Contact:* Captain T. H. Gibson, Port Captain.

WAVERLEY HARBOUR: 39.51 S. 174.36 E.

The port of Waverley Offshore Terminal has been permanently closed to shipping. All port operations have ceased, and all aids to navigation have been discontinued and removed.

WELLINGTON: 41.17 S. 174.47 E. (See Plan)

PORT LIMITS: All waters within an arc of a circle of 3.85 nautical miles radius having its centre at a point on Outer Rock at the South end of Barretts Reef.

DOCUMENTS:

Port Health:

Completed Maritime Declaration of Health.

2 copies of Poison List, if there is poison in the cargo (i.e. Class 6, 7 or 8 substances) or a Declaration.

Crew List, stating name, rank, sex, nationality and dates of last vaccinations.

Current Derat Exemption Certificate.

List of addresses of disembarking passengers.

List of any dangerous cargo on board.

Customs:

3 copies Passenger List.

3 copies Crew List.

1 copy Search List (Form 2).

1 copy Stores List (Form 3A).

1 copy Poisons List or Declaration.

1 copy Animals or Birds List or Declaration.

1 copy List of Firearms (not cargo) or Declaration.

1 copy Arrival Manifest, plus 2 copies for other ports visited.

1 copy of Cargo List, showing gross tonnage of cargo for discharge in New Zealand or a Declaration.

1 copy Form 1A - General Declaration.

1 copy MOT Form - Particulars of Ships.

Certificates (see also "Certificates").

1 copy MOT Form 5743 - Declaration of Insurance (for Tankers only).

Agent:

Varies, but at least 1 Crew List.

1 copy Cargo Manifest.

Agriculture:

3 copies Shipmaster's Bond and Guarantee (Fm. Ag. L35).

2 copies Meat Locker Declaration (Fm. Ag. L36).

Customs: Wellington is a designated Customs port. The practice of boarding all commercial vessels arriving from and departing for overseas has been replaced by a selective system known as 'Discretionary Entry/Clearance'.

When the vessel's agent has been advised that the vessel has been afforded Discretionary Entry or Clearance, the Master, Owner or Authorised Agent is required to lodge all arrival or departure documents (known as the Inward/Outward Report) at the Customs Office.

Discretionary Entry is granted depending on the vessel's last port, crew and voyage history. It is applied in most cases for coastwise voyages.

PILOTAGE: Pilotage is compulsory within that area of the Pilotage District being Northward of a line drawn 090° from Gordon Point through the Rear Lead Light on Hope Shoal to the Eastern shore, for all merchant vessels over 200 tons gross, except vessels whose Masters have Pilotage Exemption Certificates and to which exemption applies.

Note: It is intended to increase the tonnage to 500 tons gross.

Pilotage District: The outer limit of the Pilotage District is an arc of a circle 3.0 miles in radius centred on Outer Rock.

Pilot Transfer by Helicopter: A Bell 212 twin turbine helicopter is used for most Pilot transfers in the Port of Wellington. A full 7 day service is in operation. The pilot launch 'Tiakina' provides the back-up service to those vessels which are not considered suitable.

The helicopter has a single engined hover capacity in the event of an engine failure during the hover. *All transfers are by winching.* VHF Channel 13 is used as the communication channel during the transfer.

The helicopter is painted orange and white with the word 'Pilot' marked on the side and bottom.

A separate information booklet for the guidance of ship's Masters is available through the Pilotage service, or the Port of Wellington Ltd., which details the service more fully.

Notice for Requiring Pilot: All vessels requiring a Pilot are required to give 24 hours notice by radio of their estimated time of arrival (ETA), at the pilot boarding area.

An updated ETA is required 4 hours before arrival in every case and again 1 hour before arrival. (This second call is to confirm with the vessel whether a launch or helicopter will be used).

If the vessel will be late arriving, a new ETA must be sent 4 hours before the original ETA.

All ETA communications sent through a Coastal Radio Station addressed to "Port Services Manager – Portops Wellington" will be attended to at all hours.

After hours the Coastal Radio Station receiving such ETA messages, direct these messages to Wellington Harbour Radio (Beacon Hill) for actioning – this station is manned 24 hours. It is preferable that all communications be directed through a Coast Radio Station but vessels with the appropriate equipment may use direct telex or facsimile links, however such messages directed in this manner may only be attended to during office hours.

Telex number:	NZ 30504
Facsimile number:	04.734.549

Vessels coming from the North down the East coast of the North Island will have to make contact with a coastal radio station (ZLW, etc.) to forward these messages until South and West of Cape Palliser when VHF can generally be used.

Vessels approaching from the West through Cook Strait will also have to use a coastal radio station until in the area of the Brothers when direct VHF contact can usually be made with Wellington Harbour Radio.

Vessels approaching from the South and West may find they can establish VHF contact with Wellington Radio (ZLW), who listen on VHF Channel 16 (working Channels 68 and 71), at a greater range.

Vessels fitted with cell (transportable) telephones may telephone such information to Wellington Harbour Radio direct on (04) 734.547 or in office hours, direct to the Duty Pilot on (04) 738.976. Wellington Harbour Radio is also equipped with a facsimile (04) 884.310.

Note: If no Notice of Arrival is sent it may be up to 2 hours after a vessel is sighted by Beacon Hill before a Pilot can board.

Pilot Transfer Area – Launch and Helicopter: The transfer area is situated on the extension of the leading line (Front Lead and Rear Lead in transit) and approximately 3 miles from the entrance buoy, where the leading line extended meets Pilotage Limits.

Lat. 41° 24′ S. Long. 174° 49.5′ E.

This position provides adequate searoom for ship maneouvring under most conditions.

Vessels approaching for an inwards Pilot are requested to stay in the general area of this point, and in particular outside the 2 nautical mile range from Pencarrow Head Light, unless directed otherwise by Wellington Harbour Radio or the Pilot.

In heavy Southerly weather it is recommended to stay to seaward of the Pilotage Limit unless directed.

In heavy Southerly weather it may be necessary to embark or disembark the Pilot in smoother water between the Compulsory Limit and the Front Lead. The Master will be advised by the Pilot if this is necessary and a lead from the launch or helicopter will be offered.

The Pilot launch 'Tiakina' has a speed of about 10 knots.

Anchors should be cleared away before passing Pencarrow Light and remain on standby for berthing.

Note: In some extreme Southerly conditions, and particularly on an ebbing tide, a considerable short steep sea builds up at the entrance and in the outer part of the channel which may cause some handling problems to some vessels. Vessels will be advised by the Pilot if, in his opinion, this is the case and in the interests of safety these vessels may be advised to stand-off to seaward until conditions moderate or the tide changes.

Appraisal of Local Weather – ETA's: Vessels coming down the East coast of the North Island and not familiar with Cook Strait weather should consider local weather forecasts carefully when estimating times of arrival, particularly when in light draft or low powered. Experience has shown that in some circumstances only light Westerly winds may be blowing down the East coast until rounding Cape Palliser when a full gale from ahead may be experienced which may greatly influence the ETA.

Timing of Sending of ETA's – Pilotage and Exempted Vessels: Masters and Port users are reminded that vessels arriving over a weekend or holiday and requiring to berth before 0800 hrs. on a Monday or working day after a holiday, are required to advise their Estimated Time of Arrival (ETA) to the "Port Services Manager – Portops Wellington". Telex: NZ 30504. Fax: (04) 734.549 by 1430 hrs. on the Friday or last working day preceding a Public Holiday.

Such notification may be made directly to the Duty Pilot by the vessel's Port Agent.

This facilitates operational planning and the ordering of tugs and linesmen over the weekend or Public Holiday.

Although a basic gang of linesmen are available to service small vessels at short notice, extra linesmen to complement the mooring gangs have to be pre-ordered.

Under usual circumstances, once ordered, linesmen's time of commencing work cannot be brought forward.

Pilotage by Leading or Signalling: An extract from the Wellington Harbour Byelaws 1985, Part 3, 3.5 reads:

> "3.5 Pilotage by Leading:
>
> The leading of ships by or signalling to ships from a pilot boat under the conduct of a Pilot shall be pilotage which may be requested by a Master as a service for his ship if:
>
> (a) by reason of adverse sea or weather conditions or otherwise the Pilot available to pilot the ship decides that he is not or will not be able with safety to board or disembark from the ship requesting his services.
>
> (b) the number of ships requesting the services of a Pilot exceeds the numbers of Pilots available."

Should the helicopter be used in place of the pilot launch for leading, the helicopter will usually position itself in a slow advance behind the vessel and offer guidance from this position, or it may hover over the general area of the Front Lead so as to keep the vessel and entrance in constant view and offer guidance from this position.

Pilot Launch Signals: In addition to the signal flag 'H', the pilot launch when leading by day will fly code flags 'UF' which is the International Code signal meaning 'you follow me'. By night the usual pilot boat signals only are displayed.

The pilot launch has a red hull, wooden decks, yellow deck housing with an orange top.

The word 'Pilot' in white is painted on the hull.

Pilot Leaving Times: When using the launch, the Pilot launch leaves its base at King's Wharf one hour before the vessel's scheduled ETA.

When there is more than one arrival one hour or more apart which are to be serviced by launch, the Pilot for the second vessel may join the Pilot launch at Seatoun Wharf, approximately 30 minutes before the second or subsequent arrival.

If vessels are arriving less than one hour apart, the Pilot for the second vessel will leave on the launch with the Pilot for the first vessel.

When using a helicopter, the helicopter will leave its base at Queen's Wharf approximately 10 minutes before the arranged ETA.

Because of the short flight time it is important that communications are already established between the vessel, the pilot and Wellington Harbour Radio before the helicopter takes off. The co-ordinating station in this situation is Wellington Harbour Radio.

Convoy Movements: Due to the numbers of foreign fishing vessels which visit the port, these vessels, when numbers require, are sailed in a convoy system, usually at 1230 hrs. on Saturdays, Sundays and holidays, and at 1530 hrs. on weekdays.

Depending on convoy numbers and Pilot availability, a Pilot may be on the launch at the beginning of the convoy, with another Pilot or Pilots being on board selected vessels.

Mariners may meet such foreign fishing vessels proceeding inward to the anchorage on their own without waiting for a Pilot. Such vessels may or may not respond to VHF calls.

Pilot Transfer by Launch: Do not approach closer than 2 miles range from Pencarrow Head without Pilot's instructions.

Make a good lee for the Pilot launch with the wind and swell abaft the beam on the weather side and with a ship's speed of about 5 knots. The Pilot will advise you of an appropriate heading and boarding ground. The launch 'Tiakina' has a service speed of about 10 knots, so Masters should bear in mind that their way needs to be reduced in good time down to the working speed required.

Pilot Ladder: The Pilot ladder is to be constructed and rigged in accordance with IMO requirements, Regulation 17, SOLAS 1974 for Pilot ladders and The New Zealand Shipping (Pilot Ladders) Rules 1974. The ladder should be clean, properly fitted with spreaders, well clear of discharges and outlets, and all outboard fittings which may foul the Pilot Launch.

The ladder must be placed well amidships on the flat part of the hull. The Wellington launch is 25 m. in length and it requires a similar 25 m. length of flat hull to land astern of the ladder.

The bottom of the ladder should be 2.0 m. above the water.

Two *clean manilla* manropes of at least 20 mm. diameter are to be securely made fast to the ship and must not be made fast to the ladder at any point. *Manropes are to be without knots and be no longer than the ladder.*

PILOT TRANSFER BY HELICOPTER:

Helicopter Guidelines – Different Vessels: Due to several factors including deck obstructions, size of vessel and owners/underwriters restrictions, not all vessels are suitable for transferring to or from by helicopter.

As a result of operating experience to date, Pilots have set operating guidelines relating to different vessels. These guidelines are:

Vessel/Vessel Type	*Comments on Helicopter Use*
Container vessels – medium/ large	Transfer OK day or night
Tankers	There is no swell restriction
Container vessels – small	Transfer OK day or night, but in swell not exceeding 2.0 m. in height. No transfers at night if there is no clear deck space
General cargo vessels and small chemical tankers	Transfers in daylight only and with swell not exceeding 1.5 m. in height
Stern trawlers	Transfers in daylight only and in swell not exceeding 1.0 m. in height
All vessels on first visit for which no information is available	Transfers not approved for arrival. OK on departure subject to scrutiny by helicopter crew and pilots.

Transfer Requirements: All transfers are by *winching*. It is outside the scope of this guide to copy directly all contents of the ICS Guide, but Masters are advised to consult the latest edition of the International Chamber of Shipping Guide to Helicopter/Ship Operations (the ICS Guide), prior to any Pilot transfer by helicopter taking place.

Use of the ICS Guide Check List is recommended.

Masters should ensure that ship's personnel are adequately briefed in respect to safety procedures prior to the transfer.

Ship's Masters should give their ETA in the usual manner.

In addition, Ship's Masters should contact Wellington Harbour Radio on VHF Channel 16 (Channel 14 working) one hour prior to arrival at the designated transfer area.

Wellington Harbour Radio will then confirm with the Ship's Master that
(a) the transfer will take place by helicopter
or (b) that the transfer will be by launch

This will give the vessel time to make the required and appropriate boarding arrangements.

Once airborne (approximately 10 minutes before the scheduled ETA) the helicopter will contact the vessel on VHF Channel 14 and VHF Channel 13 will be requested for ship-helicopter communications whilst the transfer takes place.

Once established on a working channel it is essential that a careful listening watch is maintained on this working channel until cleared off this channel by the helicopter. This is particularly important for night operations. The transfer will not take place without this communication being maintained.

For air-traffic control purposes the helicopter has been designated the call sign (Pilot Alpha) but may also use the call signs 'Wellington Pilot Helicopter' or just 'Wellington Pilot' in its communication with other stations.

The helicopter may request information from the vessel on
- ship's speed in knots.
- ship's course.
- relative wind speed and direction.
- any significant pitch or roll.
- ship's position if not at the designated boarding area and distance from this boarding area.
- location of a preferred boarding area on board the vessel.

An alteration of heading and course may be requested by the helicopter to facilitate the transfer.

Finally, before boarding, the Harbour Pilot or Helicopter Pilot will ask for approval from the vessel for the transfer to take place. This ensures that the vessel is ready in all respects for the Pilot.

Permission should only be given by the ship's Master when he is satisfied that the vessel is ready to accept the Pilot.

Ship Manoeuvring for the Transfer: See "Plan".

Weather Criteria: The Bell 212 helicopter as used in Wellington can safely perform transfers *in relative winds up to 50 knots,* and many transfers have taken place in these conditions.

True wind direction and speed is a lesser consideration than the *relative* wind and speed, and vessel may be asked to alter headings to provide the most suitable *relative* wind conditions for the helicopter operation.

Daylight Transfer Requirements:
(a) Markings – no specific requirements.
(b) A flag, as a wind indicator, is to be flown in a prominent position.
(c) An Officer must be in attendance at the winching area – this Officer must have radio contact with the ship's bridge.
(d) Safety Equipment – hoses, fire party, etc. The helicopter operators do not have any specific requirements. However, provision of firefighting and safety equipment, as specified in the ICS Guide, is recommended.

Night Tranfer Requirements:
(a) Markings – no specific requirements.
(b) An *illuminated* flag is to be hoisted in a prominent position.
(c) An Officer must be in attendance at the winching area. This Officer must have radio contact with the ship's bridge.
(d) Safety equipment – as for the daylight transfer.
(e) Lighting – the ship's floodlighting should be used to illuminate the operating area. The helicopter Pilot may request that some lighting be reduced or switched off, but this is a decision which the helicopter Pilot alone will make and request. The helicopter is equipped with a movable high powered floodlight which operates from a position on the bottom of the helicopter – it may or may not be used.

Caution: Floodlighting must NOT be directed towards the helicopter.

Caution: Floodlighting is TO BE LEFT ON after the transfer until the helicopter Pilot advises the ship that he is clear of the vessel. This is to allow an orderly transition for the Pilot from visual hover reference to instrument flying in some dark conditions.

Caution: Camera flash equipment MUST NOT be used as it will interfere with the helicopter Pilot's night vision at a critical time. Ship's Masters should ensure that crew and passengers are aware of this restriction.

Additional Requirements for Tankers: Cargo tanks and pumprooms are to be battened down.

All tanks adjacent to the winching area should be vented to the atmosphere within 30 minutes of the transfer in order to prevent automatic venting of the petroleum gases whilst a transfer is taking place.

Firefighting equipment as specified in the ICS Guide must be provided by tankers carrying petroleum products and flammable chemicals prior to the transfer taking place.

Safety: Under usual circumstances ship's crew will not be required to handle the winch wire. However it should be made known to all crew *that under no circumstances is the winch wire to be made fast to any part of the ship.*

Harbour Pilots do not usually require any physical assistance from the ship's crew during the transfer. Ship's crew should remain outside the manoeuvring zone during the transfer unless the Harbour Pilot indicates that he requires assistance.

Camera flashlight equipment *must not* be used.

Loose equipment, such as dunnage and rubbish, deck chairs, etc., should either be removed from the manoeuvring area or properly secured against the (sometimes considerable) downwash from the helicopter.

ANCHORAGES: Depth in anchorages 15 m. to 22 m.

Fairway: Within portion of harbour lying inshore and to Westward of a line drawn from Post Point, the Easternmost point of Oriental Bay, in a 349° direction, to Kaiwharawhara Shore.

Inner Anchorage: Within portion of harbour lying between the Seaward boundary of Fairway and a line drawn from Point Jerningham, in a 359° direction to Kaiwharawhara Shore.

Outer Anchorage: Within portion of harbour Eastward of Inner Anchorage.

Note: Vessels anchoring in Outer Anchorage should take up a position well up towards Kaiwharawhara.

Explosives Anchorage: Within that portion of the harbour contained in a circle with a radius of 0.3 nautical miles having as its centre a point bearing 000° true, distant 1.45 nautical miles from Point Halswell Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions.

Caution When Anchoring: It is advisable when anchoring (especially when in light draft) to anchor with 2 anchors well spread in a general West and East direction, as it frequently blows hard with heavy gusts of wind off the high land, causing a vessel to sheer about.

Depending on the vessel's draft, 7 shackles veered on one anchor and 3 shackles veered on the other will make the vessel lie much easier.

A strict visual and radio watch should be kept and the short anchor should be raised (and veered again later if required) should the wind change direction to a marked degree, for example when the wind backs from the Northwest to the South on the passage of a front.

Prohibited Anchorages:
(a) Anchorage is prohibited within 150 m. (500 ft.) of the jetty situated on the Northeastern side of Somes Island.
(b) Within one cable of any power or telephone cable.
(c) Within 50 m. of the Greta Point sea water intake, marked with a white triangle on the shore.

White triangular beacons, situated on the foreshore, mark the ends of the power cables.

RESTRICTIONS/MAX. SIZE: Entering and Leaving – Controlling Factors:

Maximum Draft: The maximum draft in the channel is 9.8 m. This maximum draft is when the tide gauge (Wellington) reads zero – that is, at Chart Datum.

The maximum draft for any time can be obtained by adding the current tide gauge reading to the 9.8 m. constant.

The tide gauge is situated at Queen's Wharf and Beacon Hill Signal Station is equipped with a remote tide gauge and can give readings on request.

The usual maximum drafts for channel passage are between 11.2 m. and 11.4 m., depending on the height of the tide, and providing there is no excessive swell condition in the area between Steeple Beacon and the Front Lead – Southerly swell conditions may affect these maximums.

Under Vessel Clearances:

In the entrance channel 1.5 m.

At the berth 0.9 m.

Length and Beam: Subject to any berth limitations there is no limit to length or beam for entrance to the Port.

Port Operational Hours: Subject to the operation of Port Operational Hours, vessels may enter or depart at any time.

The usual hours of operation of tugs and linesmen are between 0600 hrs. and 2330 hrs. daily. These hours may be amended where specifically required on application to the Port Company.

Pilotage is available 24 hours a day, although pilotage is generally undertaken to fit in with the above stated port operational hours.

Deep draft vessels which are subject to tidal constraints, vessels with emergencies, sickness, etc., are handled at any time.

Small non-commercial vessels (i.e. foreign fishing vessels requiring bunkering only or storing) are generally, but subject to other Port movements, only piloted within the pilotage hours of 0700 – 1800 daily.

Tides: Masters wishing to know the height of the tide at any time may direct their request to Wellington Harbour Radio (Channel 14).

For information concerning heights and times of high water refer to the New Zealand Nautical Almanac.

Tidal Range: Neaps 0.8 m. Springs 1.00 m.

Tidal stream in entrance channel: Min. 0.3 knots.
Max. 0.8 knots.

HEALTH: 24 hours before arrival, despatch message through a Coastal Radio Station (ZLW, etc.), to Port Health, Wellington. Radio Pratique can be granted at the discretion of Port Health. The request for pratique is to state ETA, last port with date of departure, number of crew, number of passengers, state of health of all crew and passengers, and indicate if there is a doctor on board. Once pratique is granted it covers all subsequent coastal movements on that voyage.

Vessels requesting Pratique should exhibit the appropriate international signals until Pratique is granted.

Vessels are usually cleared by the authorities once berthed alongside.

Health Officers Examination Ground: Within that portion of the harbour contained in a circle with a radius of 0.2 nautical miles, having as its centre a point bearing 347° True, distant 0.56 nautical miles from Point Jerningham Lt. Beacon, or such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to relevant circumstances. Until Pratique has been granted, vessels arriving from ports beyond New Zealand must not proceed inwards beyond the limits of this area.

RADIO: *Beacon Hill Signal Station:* A signal station (call sign 'Wellington Harbour Radio' and marked as 'SS' on Chart NZ 4633) is situated on Beacon Hill, at an elevation of 131 m., and about 2 miles North-Northwestward from Pencarrow Head.

A 24 hour watch is maintained visually, on VHF Channel 16, VHF Channel 14 and MF 2182 kHz (working 2012 kHz). Channel 14 is the local working channel.

Shipping movements, berthing information, local weather and sea conditions at the entrance, tide heights and navigational information can be obtained on request.

Frequencies available – M/F (Range 100 miles):
TX 2182, 2162, 2012, 2045, 2129, 4125 kHz (calling 2182).
RX 2182, 2153, 2012, 2045, 2129, 4125 kHz (working 2012).

Frequencies – VHF (Range 30 miles):
Calling – Channel 16 (international).
Channel 14 (local call).
Working – Channel 14 (local working).
Channel 12 – (tugs, etc.).
Channel 13 – (helicopter/ship Pilot transfer).
Other Channels used – 10, 9, 62, 68 and 71.
Routine – Continuous service on M/F and VHF. Monitors M/F 2182 and VHF Channels 16 and 14.
Monitors Channel 13 during helicopter/pilot transfers.

RADAR: A radar with ranges 0.25 to 72 nautical miles is situated at the Signal Station.

The radar is installed for the information of the signalman only.

VHF: *Port Operations:* To avoid unnecessary VHF channel changing, all vessels within Wellington Harbour limits are requested to use VHF Channel 14 for receiving and transmitting harbour traffic.

All vessels arriving at the port are requested to make their initial call on Channel 16 and then change to Channel 14 and remain on that channel whilst in harbour limits (unless actually working with tugs or the Pilot helicopter).

Where possible they should also monitor Channel 16 as this still remains the International Safety Channel.

All Wellington Harbour Board and Port Company floating plant, including the pilot helicopter, will initially listen and transmit on VHF Channel 14.

The tugs/ship manoeuvring channel is Channel 12.

The Pilot helicopter/ship working channel is Channel 13.

Beacon Hill Signal Station will inform the Masters of all ships arriving at the port of the need to remain on Channel 14 whilst in harbour limits.

The Duty Pilot can be contacted on Channel 14 during office hours (call "Port Operations Pilots Office"). Linesmen can also be contacted on this channel (call "Shipping Supervisor" or "Boatmen Mobile").

While helicopter Pilot transfers are in progress Wellington Harbour Radio monitors the helicopter/ship working channel (Channel 13) as a safety requirement, and during the period of such transfers may not respond immediately to other calls on Channel 14.

Also see "Radio".

TUGS: The Port of Wellington Ltd. owns 3×2,700 h.p. (2,200 kW) Voith Schneider water tractor tugs, ('Kupe', 'Toia' and 'Ngahue'). Bollard pull is 28 tonnes and each has a free running speed of 11 knots, with a steaming endurance of approximately 9 days. Two tugs are equipped for fire fighting, deep water towage and salvage duties. The tugs are painted bright red.

The Port Company Tug Hire Agreement allows the Port of Wellington Ltd. to act as the hirer's agent in engaging the services of a tug or tugs for a vessel. The Harbour Master may also direct a vessel to take a tug and direct the manner in which it is used.

Harbour tow lines (hawsers) are provided by the tug.

Tugs usually meet vessels approximately 40 minutes from the usual Pilot boarding area.

BERTHING: (Max. drafts using criteria of 0.9 m. underkeel clearance).

Wharf	*Berth* No.	*Berth Length* (m.)	*Max. Draft* (m.)
Overseas Terminal	2	238	9.2 & 8.4
Overseas Terminal	3	255	9.2
Taranaki Breast		234	7.5
Taranaki Wharf		152	7.4
Queen's Wharf	1	224	7.4 & 6.5
	2	93	4.8
	3	92	5.2 & 4.3
	4	114	7.0 & 5.5
	5	79	4.8 & 2.8
Waterloo Quay	2	110	6.0 & 6.1
Waterloo Quay	3	107	5.0
Inter Island Wharf	2	150	6.9
Inter Island Wharf	3	213	8.4 & 7.5
Glasgow Wharf	2	218	8.4 & 6.3
Glasgow Wharf	3	240	8.4 & 7.2
King's Wharf	2	251	8.5 & 6.5
Thorndon Container	1	292	11.1
Thorndon Container	2	292	10.6
Aotea Quay	1 – 6	1,115	9.8 to 8.4
Seaview		250	11.2
Burnham		257	8.2 & 4.9
Miramar West		165	9.0 & 7.3

Notes: Tankers use berths at Seaview, Burnham and Aotea Quay No. 1.
Harbour Service craft using King's No. 2.

Berths at Overseas Terminal to Waterloo Quay (inclusive) are owned by another Company, but are used under an operating agreement by the Port of Wellington Ltd.

CRANES:

Wharf Cranes:

Wharf	*Distance of Centre First Rail Track from Outside Face of Berth*	*Cranes* No.	*SWL* (tonnes)	*Outreach Past Wharf Fender*
Glasgow 2	3.84 m.	1	3.0	18.5 m.
Glasgow 3	3.63 m.	2	3.0	18.5 m.

(Maximum radius 22.8 m. Minimum radius 6.1 m.)

Thorndon Container Wharves	– (D crane)	1	46.00	32.2 m.
	– (C crane)	1	46.00	32.2 m.
	– (B crane)	1	52.83	32.2 m.
Aotea Quay 1, 2, 3 only	4.57 m.	5	4.5	15.5 m.

(Maximum radius 15.5 m. Minimum radius 7.6 m.).
(3 cranes rigged for grabs with SWL 2 tonnes).

Mobile Cranes: The Port of Wellington Ltd. has 3 mobile cranes available for cargo operations with capacities of 20,000 kg., 5,000 kg. and 4,000 kg.

CARGO HANDLING FACILITIES:

Thorndon Container Berth: This area comprises 2 berths with a total length of 585 m. Maximum draft alongside is 11.1 m. (SW). The berth is served by 3 container cranes with maximum lifting capacities of 46, 46 and 52.8 tonnes. Crane outreach is 32 m. The berth is served by a back-up area totalling 24 hectares. There is maximum storage for 6,284 containers, including 1,370 refrigerated containers.

Usual working hours within the terminal are 0730 – 2230 on weekdays and 0800 – 2200 hrs. on other days, including holidays.

The berth is a common user berth but is owned by a consortium of 10 major shareholders involved in the New Zealand container trade.

The cranes are owned by the Port of Wellington Ltd. The Terminal operators are: Container Terminals Ltd., P.O. Box 563, Wellington (Manager: Mr. R. McKee).

Bulk Petroleum Products: Tanker terminals are provided at Seaview, Burnham and Aotea Quay. Maximum drafts alongside these berths (when tide is at chart datum) are Seaview – 11.2 m., Burnham – 8.2 m. and Aotea Quay – 9.8 m.

Also see "Tankers".

Roll-on/Roll-off Berths: There are two dedicated Roll-on/Roll-off berths provided for the inter-island rail ferry link. Vessels with quarter ramps may use Glasgow Wharf No. 3 (length 235 m. – max. draft 8.4 m. with open areas of 4,200 sq.m. with 2,000 sq.m. adjacent), Aotea Quay No. 4/5 (length no limit, max. draft 8.4 m. with open back-up area of 9,500 sq.m.) or Aotea Quay No. 1/Container Berth No. 2. There is also a dedicated Roll-on/Roll-off Inter-Island Wharf No. 2.

BULK CARGO FACILITIES: *Cement:* There are 3 dedicated cement manifolds at Aotea Quay No. 5/6, discharging to storage and packing areas.

Wheat and other bulk cargoes: There are available 2 wheeled mobile hoppers with a capacity of 25 tonnes. Three cranes at Aotea Quay are fitted with grabs, SWL 2 tonnes.

General: There are available several areas of open stacking area (see above under "Roll-on/Roll-off Berths" suitable for stacking of any bulk cargo and containers. Aotea Quay has 2 cargo sheds (Sheds 49 and 51) with a combined floor storage area of 10,400 sq.m., suitable for general cargo, served by internal cranes with a capacity of 5 tonnes.

STEVEDORES: There are 4 main stevedoring companies based in Wellington, one of which is a dedicated container terminal operator.

1. Container Terminals Ltd. This is the operating division of a consortium of major shipping companies involved in the container trades.
   Manager: Rex McKee.
   Telephone: 722.395.
   Facsimile: (4) 499.0524.
2. Wellington Cargo Services. A subsidiary of Port of Wellington Ltd.
   Cargo Manager: Roger Sullivan
   Telephone: 499.2279 (Harbour Office switchboard)
   Facsimile: (4) 734.549 (Harbour Office)
3. New Zealand Stevedoring Co. Ltd.
   Manager: Roger Taylor
   Telephone: 739.088
   Facsimile: (4) 499.2000
4. Pacifica Shipping Ltd.
   Local Manager: Peter Tait
   Telephone: 728.381
   Facsimile: (4) 731.966

From time to time stevedoring companies from other ports may operate in Wellington, mainly on specialised cargoes.

Watersiders Working Hours:

Hours of work are as follows:

1st period 0730 – 1600 hrs.
2nd period 1600 – 2330 hrs.
3rd period 2330 – 0730 hrs.

Watersiders are available to work 7 days per week. A maximum of 2 hours overtime can be worked after the first shift, with an extension of a further hour if the vessel is sailing.

A 30 minute meal break is taken within the shift.

Stevedoring Equipment: The Port of Wellington owns most of the stevedoring equipment available in the port. This is hired out as required.

Major equipment available:

1 × 30 tonne forklift truck with 40 ft. (12.2 m.) and 20 ft. (6.1 m.) spreaders (SWL under the spreader is 25 tonnes).
2 × 25 tonne forklift trucks with forks and 20 ft. side frames.
4 × 7 tonne forklift trucks.
6 × 4 tonne forklift trucks.
4 towing tractors with drawbar, capacities 7,000 kg. – 3,000 kg.
5 × 20 tonne trailers (TEU compatible).
24 × 2 – 5 tonne capacity trailers.
5 Mobile cranes with capacities ranging from 4 tonnes to 20 tonnes.

Also see "Cranes".

MEDICAL: Wellington is a main centre and all medical facilities are available. With adequate notice Agents can arrange the service required. Wellington Public Hospital is a main facility. Helicopter evacuation facilities are available using the Port of Wellington Pilot helicopter (Bell 212) – endurance 2 hours, (approximately 70 nautical miles radius from refuelling base).

TANKERS: Tanker terminals are provided at Seaview, Burnham and Aotea Quay No. 1.

Aotea Quay No. 1 is primarily a general cargo berth. When used as a tanker terminal the berth is fenced off with barriers, and the overhead electric crane line isolated.

Tankers are berthed and sailed at Seaview and Aotea Quay during the hours of darkness – see "Restrictions/Max. Size" – "Port Operational Hours" for more specific detail on berthing and sailing hours. Tankers are also sailed from Burnham during the hours of darkness up to 2200 hrs. and after 0630 hrs., provided they are berthed bow North, that is, starboard side to, but are *NOT* manoeuvred for berthing during the hours of darkness in Evans Bay.

As Evans Bay is in the direct approach or departure route for aircraft using Wellington International Airport, all vessels moving in Evans Bay are required to report their air-draft to Wellington Harbour Radio who will forward this height to the airport Control Tower.

Depending on the strength of the prevailing weather, tankers are usually berthed starboard side to at Seaview, so as to utilise the solid apron for landing gangways. Vessels are also usually berthed starboard side to at Burnham, that is, they are swung on berthing so as to have their bows North. Vessels may berth either side to at Aotea Quay No. 1 but it may be desirable, when weather allows, to berth starboard side to so as to have the gangway nearer the berth exit.

Oil Spills: Contact Wellington Harbour Radio (Channel 14 – 24 hours) with particulars. This station will advise the appropriate personnel.

General: Side hose connections are to be used at all berths, and ship's cranes or derricks are required for hose lifting and brow gangways (where used).

Boiler and galley fires are not required to be extinguished.

All precautions must be taken to avoid pollution of the harbour. Scuppers must be plugged and absorbent material kept at hand in the event of spillage.

The General Cargo Regs. (1968/240, para. 106) state that all tankers should have towing hawsers placed overside when berthed at any berth. These towing hawsers should be of such size as to be able to accept the tugs in the Port of Wellington. These tugs have a bollard pull of approximately 30 tons and considerably more in some 'indirect pull' situations.

Seaview Wharf: Seaview Wharf is exposed to the weather and in the event of a Southerly gale special attention must be paid to the vessel's moorings.

Cargo Operations in Hours of Darkness: Subject to approval from the Harbour Master or his representative, discharge of oil and chemical cargoes is permitted during the hours of darkness. During these hours pipelines must not be disconnected without first obtaining the permission of the Harbour Master.

Discharging to Road Tankers at Seaview Terminal: Direct loading to a road tanker may be undertaken at Seaview providing the following procedures are complied with:

1. The vessel is completely shutdown and engaged in no other cargo operations before road tankers are allowed onto the jetty.
2. The vessel remains completely shutdown for the duration of the transfer, i.e. no sampling of other tanks will take place.
3. The road tankers will stay as far away as practicable from the vessel.
4. No more than 2 road tankers to be at the T-head of the jetty at the same time with their drivers in attendance throughout.

Concurrent operations are not permitted. This is a safety measure due to the restricted access and manoeuvring area for large road trucks on the berth and its approach road.

Tanker Berth Pipelines:

Details of industry pipelines serving the tanker terminals are as follows:

Seaview Terminal:	
1 × 100 mm./4 in.	Industry Chemical S/S
1 × 100 mm./4 in.	BST Chemical S/S
1 × 100 mm./4 in.	BST Chemical S/S
1 × 150 mm./6 in.	Industry Chemical S/S
1 × 200 mm./8 in.	Industry White Oil
1 × 250 mm./10 in.	Industry Lube Oil
1 × 350 mm./14 in.	Industry White Oil
1 × 350 mm./14 in.	Gas oil
Aotea Quay:	
1 × 200 mm./8 in.	Light Fuel Oil
1 × 300 mm./12 in.	Gas Oil
1 × 300 mm./12 in.	Spare line – not in use
Burnham:	
1 × 250 mm./10 in.	Jet A1 – Mobil
1 × 200 mm./8 in.	Bitumen – Shell

DENSITY: Density in the harbour varies between 1032 and 1036.

FRESH WATER: Fresh water is available at all berths on application to the Port Services Manager and after hours through Wellington Harbour Radio on Channel 14.

Water can also be supplied in small quantities from Port Company tugs.

Water is supplied from the city system and average loading rates are about 25-30 tonnes per hour, per hose, depending on line pressures.

FUEL: The following fuels are available:

Aotea Quay No. 1:
Light Marine Fuel Oil 40.
Marine Gas Oil.
Aotea Quay No. 5:
Light Marine Fuel Oil 40.
Marine Gas Oil.
Aotea Quay No. 6:
Marine Gas Oil only.
Seaview Terminal:
Marine Gas Oil only (by special arrangement with the Oil Companies concerned).

Small quantities of bunker and lubricating fuel may be taken by road tanker at all berths (but not concurrent with tanker operations).

Bunker Loading Rates: Bunker loading rates depend mainly on the ability of the vessel to receive the product.

The product may be either gravity fed or pumped aboard.

As a guide, a maximum of about 100 tonnes per hour by pipeline can be supplied at Aotea Quay berths using 100 mm./4 in. hoses.

CONSULS: Consular Representatives or Embassies in Wellington: Australia, Austria, Belgium, Brunei, Canada, Chile, Republic of China, Cook Islands, Czechoslovakia, Denmark, Ecuador, Fiji, Finland, France, Germany (F.R.), Greece, Iceland, India, Indonesia, Iran, Israel, Italy, Japan, Kiribati, Korea, Malaysia, Netherlands, Norway, Papua New Guinea, Peru, Philippines, Poland, Portugal, Singapore, Sweden, Switzerland, Thailand, Tuvalu, U.K., U.S.A., U.S.S.R., Vatican, Western Samoa, Yugoslavia.

REPAIRS: Major repairs can be undertaken. There are machine shops and foundries. Diving equipment and the services of trained divers are available for underwater inspections and repairs. Marine Radio and Radar Services, licensed compass adjusters.

Divers: Diving equipment and the services of divers are available for underwater video and photography inspections (with the provision of inspection reports), basic hull repairs, hull cleaning and underwater cutting (on wooden and metal hulls) using hydraulically operated and metal cutting equipment.

DRY DOCKS: None.

SURVEYORS: Marine Surveyors from the Ministry of Transport, Lloyd's Surveyors and private cargo surveyors are available.

GANGWAY/DECK WATCHMEN: Watchmen are available through Union Maritime Services who are the agents for the Shipping Federation of New Zealand who supply the watch personnel. Contact: Union Maritime Services, Wellington. Fax 04.845.853.

OPENING/CLOSING HATCHES: Work normally carried out by stevedores. Only time crew are to open and close top hatches is when advised by stevedores. In case of hydraulic hatches in tweendecks, crew are to open and close, not stevedores.

REPATRIATION: Facilities are available for crew changes and arranging any necessary repatriations.

AIRPORT: Situated 7 km. S.E. of City Wharves by road; regular internal and Australian services.

TIME: Local time is GMT plus 12 hours in Winter, (Daylight saving of one extra hour during Summer months, October to March).

HOLIDAYS: New Year's Day (1st January); 2nd January; Wellington Province Anniversary Day (22nd January); Waterside Workers Union Picnic Day (generally observed on Monday of the week 29th January falls); Waitangi Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday Observance (first Monday in June); Labour Day (fourth Monday in October); Christmas Day (25th December); Boxing Day (26th December).

Note: Pilotage services available public holidays. Container vessels at container berths work on public holidays.

CERTIFICATES: Customs Department require Ship's Register on arrival.

Marine Division, Ministry of Transport require:
Load Line Certificate.
Tonnage Certificate.
Certificate of Registry.
Convention Certificates, i.e.
  Safety Equipment Certificate.
  Safety Radio-telegraphy Certificate.
  Safety Construction Certificate.
  Exemption Certificate (if any).
  If passenger ship, Passenger and Safety Certificate.
Cargo Gear Register.
Certificates for all Cargo Gear, i.e. runners, spans, shackles, swivels, etc.
Derat Certificate.
Oil Pollution Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

POLICE/AMBULANCE/FIRE:

	Routine	*Emergency*
Wharf Police	723-000	Dial 111 and ask operator for service required
Ambulance	722-999	
Fire Brigade	850-188	

EMERGENCY CO-ORDINATION CENTRE: Contact Wellington Harbour Radio (Channel 14 – 24 hours) with particulars.

TELEPHONES: Vessels may be connected to the telephone system at all city berths on application to the Port of Wellington Ltd. (and attended to by the Shipping Services Co-ordinator). New Zealand coastal tankers only may be connected to the telephone system at the oil berths.

Depending on tonnage, up to three telephones may be connected per vessel, and these are included within the Port Tariff.

Telephones are usually provided for local calls only. Toll calls outside the local charge area may be made on selected telephones, but such calls are for the users account.

Telephones may be requested 'toll barred', where it is not possible to make toll calls, or 'toll free' calls.

SERVICES:

Shore Electricity: Available at all city berths on application to the Port of Wellington Ltd. – type AC/50 kHz, voltage 230 – 400 volts, amperage either 60 or 200 amps.

Storm Ropes: Two 96 mm. ropes with a breaking strain of approximately 72 tonnes are available for hire.

Weighbridge: A road weighbridge of 40 tonnes capacity is available on wharf.

Compass Adjusters: At least two licenced compass adjusters are available in the port.

Slop Removal: Small quantities of slop removal can be removed by road tanker. Arranged through private contractors.

Chart Supply: All New Zealand charts can be supplied at short notice.

Painting Punts: Small painting punts are available for hire through the Port of Wellington Ltd.

Steam Cleaning: The Port of Wellington has an industrial steam cleaning facility available.

Gangway: Brow gangways of varying lengths are available for hire.

Boat Hire: The Pilot craft 'Tiakina' is available for hire to transport personnel or stores to vessels at anchor when not required for piloting duties.

Nautical Publications and Safety Equipment: There are several ships providores in the port who can supply these requirements.

BANKS: The following banks have branches and agencies in Wellington:

	Telex
ANZ Banking Group N.Z. Ltd	NZ 3385
Bank of New Zealand	NZ 3344
National Bank of N.Z. Ltd	NZ 31388
Westpac Banking Corporation	NZ 3884

STORING: Vehicles can proceed alongside ships to load and unload stores.

SHIP SUPPLY SERVICE: *Helicopter:* The Port of Wellington has available a twin engined Bell 212 helicopter which is available for charter between piloting requirements. It has a passenger capacity of 14 persons and a lifting capacity (slung or internal load) of 1,500 kg. and is suitable for medical evacuation or offshore storing. Also see "Medical".

SHORE LEAVE: Crew members are allowed shore leave at all times.

IDENTIFICATION CARDS: Not required.

GENERAL: For nautical and more detailed information on New Zealand ports, refer to the following publications which are kept up to date by the issue of Notices to Mariners in respect of nautical matters:

New Zealand Port Information Manual
New Zealand Pilot
New Zealand Nautical Almanac

These publications and up to date charts are available from New Zealand Government Shipping Offices.

Charts and Navigational Information:

NZ 4633	Wellington.
NZ 4634	Wellington Harbour Entrance and Plans of wharves.
NZ 463	Approaches to Wellington.
NP 51	New Zealand Pilot 1987.
(annually)	New Zealand Nautical Almanac.

Regulations:

Wellington Harbour Bylaws 1985.
General Harbour Regulations (Nautical and Misc.) 1968/239.
General Harbour Regulations (Ship, Cargo and Dock Safety) 1968/240.
Health (Quarantine) Regulations 1983/52.
Marine Pollution Act 1974.
Dangerous Goods Regulations 1985.
(plus amendments).

Garbage: Garbage may only be disposed of in accordance with strict N.Z. Government Regulations. Heavy penalties are provided for those breaching the regulations.

The responsibility for the collection and incineration of all refuse is carried out by the Port of Wellington Ltd. under the supervision of the Ministry of Agriculture and Fisheries.

All vessels, unless fitted with a garbage incinerator or holding tanks approved by the Ministry, will receive and have collected suitably approved refuse bins on a daily basis, Sundays and holidays excepted, unless so requested by the vessel or the Ministry.

Cans must not be placed on the wharf.

The following *must not* be placed in cans for incineration:

(i) Chemicals or any dangerously combustible or explosive material.
(ii) Fuel, lubricating or other oils.
(iii) Bilge scrapings, metals, concrete or other non combustible solids.
(iv) Oil soaked rags and wastes.

Garbage Incinerator: An incinerator facility is available within the port, capable of burning approximately 16 tonnes of refuse a day.

AUTHORITY: Port of Wellington Ltd., P.O. Box 794, Wellington, New Zealand. *Tel:* (04) 728-912. *FAX:* (04) 499 0720. *Contact:* Griff Page, Managing Director. Paul Wright, Operations Manager. Captain R. Field, Executive Pilot.

WESTPORT: 41.45 S. 171.40 E. (See Plan)

LOCATION: The port is situated at the mouth of the Buller River and has a bar at its entrance. Two breakwaters approximately 155.5 m. apart form the entrance and farther within are 3 tide training walls.

Passage over the bar is considered impracticable when the river is in flood or during a N.W.'ly gale. In bad weather the sea breaks heavily over the outer part of the bar.

The town of Westport and wharves are situated on the Eastern bank of the Buller River, about 1.5 miles within the entrance.

PILOTAGE: Pilotage is compulsory. All vessels should notify the Harbour Master of their intention to enter at least 12 hours before arrival. No vessel must attempt to enter the port until authority to do so is received from the signal station. In the event of a Pilot being unable to board, a vessel will be led through the bar.

Pilotage District: All the waters comprised within the harbour of Westpor having as their outward seaward limit the arc of a circle running from the landward boundary of the foreshore Westward of the Western Breakwater and thence into the Tasman Sea and thence to the landward boundary of the foreshore Eastward of the Eastern Breakwater such arc being the arc of a circle 1.5 nautical miles radius having as its centre the signal station on the Western Breakwater.

Old Signal Station: The old signal station is in a square concrete building with a white lattice signal mast and is situated about 1.5 cables within the head of the Western Breakwater. It has a large white diamond painted on the seaward wall and white horizontal bands on the East and West walls.

New Signal Station: The new signal station is situated at the harbour office at the northern end of the main wharf, 1.2 nautical miles within the harbour entrance. Vessels can communicate by radiotelephone VHF, or by morse signalling lamp. Call sign: "Westport Harbour Radio".

Visual watches are maintained for pilotage purposes and for all vessels entering and leaving harbour (at the Harbour Office situated at the lower end of the Crane Wharf).

APPROACHES: *Cape Foulwind:* A light flashing every 12 seconds visible 21 miles (nominal range 14), is exhibited at an elevation of 70.40 m. (231 ft.) from a white concrete tower situated on Cape Foulwind, a headland about 6 miles Westward of the harbour entrance. The light is obscured when bearing more than 242°.

Main Harbour Light: A light flashing every 5 seconds (flash 1 sec.) visible 8 miles, is exhibited at an elevation of 19.8 m. (65 ft.) from a white lattice tower on the old signal station situated about 1.5 cables from the head of the Western breakwater.

Caution: At night, care must be taken not to mistake the powerful electric lights of a coal industry situated about 9 miles Eastward of Westport, or the lights of cement works about 3 miles Westward of Westport, for the harbour lights.

Directional Light (occasional): A fixed red, white, and green directional light is exhibited from the same tower as the Main Harbour Light. This light is redirected to suit the best water over the bar. The arcs of the sectors from East to West are red 12°, white 2°, and green 6°, and their nominal ranges 12, 16, and 12 miles respectively.

Radio Masts: Red fixed obstruction lights are shown from radio masts situated about 8 cables S.S.W. and 5.5 miles Westward of the main harbour light.

Landmark: Three chimney stacks, each 60.7 m. (199 ft.) in height, close together with two adjacent silos, are situated about 4 miles Westward of Westport. They are of white appearance and are conspicuous from seaward.

Entering: When within 2 miles of the harbour entrance or on the Harbour Master's advice, steer to bring the main leading beacons on the Eastern Full-tide Wall in line. On entering between the breakwaters, the inner leads will be in line at approximately abeam of the old signal station and course should be altered to starboard to maintain the inner leads in line. Pass the white flashing light on the Western Half-tide Wall on starboard hand. These inner leads direct ships between the Western Half-tide Wall and the Eastern Full-tide Wall. When abeam of the fixed light on the Eastern Full-tide Wall, this light will change colour to fixed green; on observing this change steer for the wharves.

Note: Wharf working lights close to the line of the outer leads will be extinguished as and when required for vessels which have notified their intention to enter.

Floodlights: Two powerful floodlights are exhibited from two lattice-work towers, 29 m. (95 ft.) in height, situated in the railway yards at Westport. These lights, about 3.75 cables apart, are in line bearing 163°. They must not be used for navigational purposes.

ANCHORAGES: Vessels can anchor in Buller Bay in depths from 18.3 m. to 23.7 m. (10 to 13 fathoms). A recommended berth is in a position 2 miles Northward of the old signal station.

Caution: There is poor holding ground Eastward of the entrance to the harbour and in the S.W. part of Buller Bay. Vessels should be prepared to proceed to sea directly there are signs of wind rising from the West to North quarter, as anchorage in Buller Bay is unsafe during N.W. gales. A falling barometer and lightning Westward and S.W. of Westport are almost certain indications of deteriorating weather conditions.

Quarantine Anchorage: In the open roadstead within the navigable area enclosed in a circle having a radius of 2 nautical miles from the old signal station, or such other position within the aforesaid area as may be indicated by the Westport Harbour Authorities in accordance with existing local weather conditions.

RESTRICTIONS: All vessels, may, depending on weather, bar and draft conditions, enter, berth, unberth, and depart during the hours of darkness. Vessels berth and unberth at or near HW.

MAX. SIZE: LOA 131.7 m. Beam 20 m. – 25 m., depending on bar condition.

Bar Depths: Depths over the sand and shingle bar vary between 1.8 m. (6 ft.) and 3.6 m. (12 ft.) at chart datum.

River Depths: There is ample depth in the river for all vessels which can cross the bar. Vessels up to 106.7 m. (350 ft.) in length can turn in the harbour at HW neaps provided they do not draw more than 4.9 m. (16 ft.) forward; vessels up to 131.7 m. (432 ft.) in length can use the port, but there is only swinging room if drawing not more than 4.6 m. (15 ft.) forward.

VHF: Westport Harbour Radio and tug on VHF.

RADAR: A radar station, operated by Westport Harbour Staff, has been established at the new signal station (position of scanner: Lat. 41° 44′ 50.77″ S., Long. 171° 35′ 40.31″ E.). Range 12 miles. Masters of vessels equipped with VHF or radiotelephone may request from the Harbour Master's Office, during conditions of restricted visibility, particulars of their bearing and range as shown on the radar screen. The information given will be in the following form:

According to my observation you are bearing .... degrees .... miles from the Westport Radar Station.

TUGS: A single-screw tug of 329 h.p., the "James O'Brien", is equipped with VHF and radiotelephone. The tug can be made available for use at short notice. The radio call sign is ZMYT; watches are kept only when the tug is in use.

BERTHING: *Crane Wharf:* A quay-type wharf 670.6 m. (2,200 ft.) in length of wooden construction which has 243.8 m. (800 ft.) of usable berthage with depths of 5.8 m. (19 ft.) below chart datum alongside. The bottom is shingle.

The deck level is 7.2 m. (23 ft. 6 in.) above chart datum.

Merchandise Wharf: A quay-type wharf of wooden construction situated about 243.8 m. (800 ft.) farther Southward to Crane Wharf. Maximum berthage is 152.4 m. (500 ft.) with depths alongside of from 4.3 m. to 5.2 m. (14 ft. to 17 ft.) below chart datum. The bottom is shingle.

The deck level is 6.5 m. (21 ft. 3 in.) above chart datum.

In the inlet to the lagoon, from the seaward end of the Crane Wharf, there is a wharf used for Harbour Authority vessels.

CRANES: 1×15.2 tonne and 1×12 tonne movable electric crane with 18.3 m. (60 ft.) outreach are situated on Crane Wharf.

MEDICAL: Local hospital for minor ailments. Base hospital at Greymouth. Dentist locally available.

FRESH WATER: Available.

FUEL: Diesel and lub oil available in limited quantities in drums.

REPAIRS: One machine shop for minor repairs.

SURVEYORS: Stationed at Christchurch.

GENERAL: *Berthing Signals:* These are given from the new signal station. Vessels drawing more than 2.4 m. (8 ft.) must inform the new signal station on arrival of their draft.

Tidal and Bar Information: All information regarding bar conditions and tides is communicated by radiotelephone, VHF, or morse signalling lamp.

Tides: Heights of tides above chart datum are:

MHWS	3.30 m. (10.8 ft.)	MHWN	2.54 m. (8.33 ft.)
MLWS	0.28 m. (0.91 ft.)	MLWN	0.91 m. (2.98 ft.)
Range	3.12 m. (10.23 ft.)	Range	1.63 m. (5.35 ft.)

A tidal gauge, situated in the Harbour Master's Office, shows automatically the depth above chart datum.

For information concerning heights and times of high and low water see New Zealand Nautical Almanac.

Tidal Streams and Currents: Outside the bar the flood stream sets Westward and the ebb stream Eastward. The rate of the tidal stream is least about the time of HW and during 1 to 2 hours before and after HW.

During river freshes, which may occur at any time of the year, the river current in the harbour attains a rate of from 8 to 10 knots.

The tides rise highest with Easterly winds and lowest with Westerly winds.

Currents set across the bar according to the direction and force of the wind. Strong winds from the West and S.W. cause Easterly sets with rates of up to 6 knots; Easterly winds cause sets to the Westward with less effect.

Berthing Light: A small quick-flashing amber light is placed on the berth at night to indicate where the vessel's bridge should be placed alongside.

Garbage: Refuse must be kept on board. No arrangement is made for its collection.

Communications: Westport is on the railway. For freight purposes only, there are connections to Christchurch and Greymouth and Nelson by bus on weekdays. The domestic airport lies South of the port with flights to Wellington and Nelson most days.

Customs: Westport is a Customs sub-port controlled by the Collector of Customs, Christchurch.

REGULATIONS: The Master of any vessel which touches the bar when outward bound shall inform the Harbour Master by radiotelephone, VHF, or morse signalling lamp after he is clear of the bar. This will be acknowledged by the Harbour Master or the watchkeeper on duty at the Harbour Master's Office.

AUTHORITY: Westport Harbour Authority Administered on their behalf by: Buller Port Services Ltd., P.O.Box 335, Main Wharf Harbour Office, Westport, New Zealand. *Tel:* (0289) 7249. *Contact:* Captain C. S. Baugh, Harbour Master.

WHANGAREI: 35.45 S. 174.21 E. (See Plan)

PORT LIMITS: From a point due South of the summit of Sentinel Rock, thence to a point 5 cables due East of Sentinel Rock, thence to a point 5 cables due East of Bream Head, thence to a point 5 cables due East of Tutukaka Head, thence to Tutukaka Head.

DOCUMENTS:
- 3 copies Passenger List.
- 3 copies Crew List.
- 1 copy Search List (Form 2).
- 1 copy Stores List (Form 3).
- 1 copy Prohibited and Restricted Immigrants.
- 1 copy Poisons List.
- 1 copy Animals and Birds List.
- 1 copy List of Firearms (not cargo).
- 1 copy Arrival Manifest (Form 1).
- 1 copy List showing the gross tonnage of cargo for discharge in New Zealand.

PILOTAGE: Compulsory. Pilots embark on the line of leads 141°/321° at the seaward extremity of Pilotage District, i.e. up to 1.5 miles South-Eastward of the Fairway Buoy. In heavy Easterly weather, it may be necessary for pilot vessel to lead ship in through the Outer Channel and embark in the lee of Frenchman Island.

Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal week-day working hours. Second notice confirming or amending first to be sent 4 hours before expected arrival or during the previous working day if possible. The Pilot supplies a set of Harbour bye-laws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth.

Pilot boat is equipped with VHF. Working frequency is Channel 11, but Channels 6, 8 and 16 are also fitted. Pilot vessel *Ngapuhi* – call sign ZM2146. Range approximately 20 miles. *Ngapuhi* painted blue, white housing, yellow capping rails.

Pilot ladder with manropes required.

ANCHORAGE: Situated 5 to 10 cables Eastward of the Fairway Buoy in 12 to 20 fathoms (21.63 m. – 36.57 m.) of water in the section enclosed by the Fairway Buoy bearing 225° T to 315° T. Holding ground good in fine sand, but exposed to Easterly weather.

Harbour Anchorage: At Marsden Point, 2 cables West of Passage Island Light, in 5 fathoms (9.14 m.) of water. Max. draft 7.31 m. (24 ft.). Good holding ground, sand and shell bottom.

RESTRICTIONS: Controlling depth in entrance channel 15.24 m. (50 ft.) MLWS. Depth in upper harbour channel maintained at 8.53 m. (28 ft.) MLWS.

MAX. SIZE: Marsden Point: Oil Refinery dolphin berths, LOA no restriction, draft 15.24 m. (50 ft.), Cargo berth LOA 182.88 m. (600 ft.), draft 8.52 m. (28 ft.)

Port Whangarei: LOA 182.88 m. (600 ft.), draft 9.44 m. (31 ft.).

HEALTH: All vessels examined by Health Officer on arrival.

VHF: The station is Marsden Point, Whangarei. Call sign "Whangarei Harbour Radio" Continuous 24-hour watch is maintained on VHF Channels 16 and 11, range 40 miles.

RADAR: Tugs and pilot boat *Ngapuhi* fitted with radar.

TUGS: Available. Tugs equipped with VHF. Tugs usually secure to vessels entering in vicinity of Frenchman Island. Numbers of tugs normally used are: 1 tug for vessels up to 25,000 d.w.t., 2 tugs for vessels from 25,000 – 70,000 d.w.t., 3 tugs for vessels over 70,000 d.w.t. Unberthing: 1 tug is normally required for vessels under 25,000 d.w.t., and 2 tugs for all other vessels, subject weather conditions. These parameters are under examination.

BERTHING: Marsden Point Oil Berths (2) – operated by the New Zealand Refining Company, Marsden Point. LOA no restriction. Max. draft 15.24 m.

Marsden Point Cargo Berth (1), LOA 190 m., max. draft 8.53 m.

Port Whangarei berths (3), LOA 190 m., max. draft 9.44 m.

Portland berths (2), bulk cement berth; LOA 82.89 m., max. draft 5.63 m. cargo berth; LOA 106.68 m., max. draft 5.63 m.

SPECIALISED CARGO HANDLING FACILITIES: Portland bulk cement loading jetty.

Port Whangarei, 7 portable hoppers for use discharge of bulk cargoes.

STEVEDORES: Confirmation of arrival time 4 hours before ETA or revised ETA, whichever is earlier is required. Notice of arrival during a week-end or public holiday must be given not later than 1400 hrs. on the last working day preceding arrival.

MEDICAL: Hospital and dental services available.

TANKERS: *ETA Advice:*

96 hours before arrival:

(a) ETA to Agent, and if more than one grade, state discharge preference.

Whether the vessel can discharge two grades simultaneously if required.

Best estimate of discharge and ballasting times including details of any mechanical defect which may hinder the discharge.

Quantity and origin of "slops" on board.

Amount of free water in the "slops" and stowage of same, i.e. in a special "slop" tank or commingled with the cargo. If the latter is the case, the total contents of the tank is also required.

Amount of water in the main cargo.

Also arrival draft fore and aft.

(b) Request for permission to lie alongside for repairs if so required.

(c) Bunker, fresh water, stores, medical, repairs, and all other requirements.

(d) If ship's first visit then advise full details of manifold connections.

24 hours before arrival:

Confirmation of ETA to Agents and Port Corporation. If ETA is Saturday, Sunday or a Monday Public Holiday, notice must be given before 1400 hrs. on previous Friday. Also, advise that vessel is oil tight.

4 hours before arrival:

Final ETA to Port Corporation, confirming or amending 24 hour advice.

Also see "VHF".

Berthing: Marsden Point Oil Berths – Vessels up to approximately 30,000 d.w.t. are berthed at any state of the tide and swing bow to tide before berthing.

Vessels in excess of 30,000 d.w.t. are berthed at high and low slack water only. Max. draft LW 13.1 m.; max. draft HW 15.24 m. Vessel's deadweight may be increased dependent on weather.

The Pilot will board approximately 1.5 hours before high or low water for vessels in excess of 30,000 d.w.t.

Restrictions: Due to limited operating height of hose gantry at both berths, vessels must at all time restrict the vertical distance from top of manifold to waterline to 15 m. or less. Experience has shown that, as a general rule, vessels with a moulded depths of 17.4 m. (57 ft.) or less, can comply, whereas vessels over this moulded depth would have to work ballast and cargo concurrently, either permanent ballast only, or permanent ballast and cargo tank ballast. On some ships, the latter may necessitate suspension of discharge to avoid cargo contamination.

During the ballasting operation a safe trim must be maintained and every care must be taken to ensure that no oil escapes into the waters of the harbour.

Loading/Discharging: Slop reception facilities are available. Diameter of load/dischage line 10 in. ASA.

Regulations: Vessels must be oil tight. Prior to entering an inspection is made by the pilot boat to confirm this.

All deck scuppers must be plugged and made oil tight.

Masters must ensure that all doors, openings, etc. are kept closed during discharge/loading or ballasting operations.

All tank openings, sighting and ullage ports must at all times be fitted with antiflash gauze covers.

DENSITY: 1025.

FRESH WATER: At Northland Port Corporation wharves by hose 15 – 20 t.p.h. at 40 cents per 1,000 litres. Refinery jetties limited and arranged by Refinery.

FUEL: Available from berths (viscosities 3,500 secs. Red 1. 1,500 secs. Red 1 and MDO), usually by road tanker.

FIRE PRECAUTIONS: Tugs have fire-fighting capability. Tankers to have fire wires fore and aft.

CONSULS: None.

REPAIRS: Most repairs undertaken.

DRY DOCKS: None. One slipway capable of receiving vessels up to 1,500 tonnes/d.w.

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 250 gm. tobacco or 50 cigars permitted each crew member. Wine/spirit: one opened bottle wine/spirits for each crew member.

A New Zealand flag ship arriving from overseas may have a concessionary allowance.

REPATRIATION: Facilities exist.

TIME: GMT plus 12 hours. Daylight saving time observed from early October to early March.

HOLIDAYS: The following are recognised holidays: New Year's Day; 2nd January; Anniversary Day (usually last week in January); Waitangi Day (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday (first Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day; Waterside Workers Picnic Day.

POLICE/AMBULANCE/FIRE: Telephone 111 for emergency, and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: Contact any harbour radio station or police station.

TELEPHONES: Available at wharves.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Refinery passes are required when berthed at the Refinery wharves. Passes are brought on board by Agent.

SURVEYORS: 1. Cargo Inspectors are readily available and are employed by ships' Agents, usually in the form of a reputable Master Mariner working for the Harbour Authority.

2. Surveyors for Lloyd's, American Bureau, Bureau Veritas, etc., should be arranged through the offices of the surveyor required in Auckland.

AIRPORT: 12.8 km. (8 miles) from Port Whangarei; regular daily internal flights.

SERVICES: Tank cleaning, radio and radar repairs. Compass adjuster from Auckland.

SHIP SUPPLY SERVICE: Harbour Board craft will assist with transfer of crew and stores in an emergency.

REGULATIONS: Issued by Pilot on arrival.

DELAYS: Tidal delays and berth vacancies.

AUTHORITY: Northland Port Corporation (NZ) Ltd., P.O. Box 848, Whangarei, New Zealand. *Tel:* (089) 481-279. *FAX:* (089) 487-067. *Telex:* NZ 2955. *Contact:* T.W. Archer, General Manager. P.T. Barling, Marine Operations Superintendent.

NOTES

Please also advise Shipping Guides Ltd.

Nicaragua

GENERAL

DOCUMENTS: *Consular Documents:*

The Consular Law of October 26, 1904, amended by a decree of September 5, 1952, provides that "Nicaraguan Consuls must, regardless of the flag of the vessel, visa, certify or draw up in conformity with the Master; the Crew List and the Passenger List, or the "no passengers" declaration, or changes in any of the lists, when for that voyage, the lists were visaed, certified or formulated by the Nicaraguan Consul, or where there is none, by the Consul of a friendly country".

There is much confusion in enforcing of the Consular Regulations, since often consular clearances in ports of loading that are not the last port of call before reaching Nicaragua are complete, that is with visa of all forms, not merely the manifest. Visa of the original bill of lading by the shipper is also required, a procedure that is later monitored by Customs through the import policy. The fine for failure to comply with this requirement is 100% of the FOB value of the goods.

Required Prior to Arrival:

Arrival Notice:

48 hours before the vessel's arrival in the Pilot Waiting Area, the Shipping Agency must submit to the Port Authority the form entitled "Arrival Notice" in 5 copies.

24 hours before, the ship's arrival is reported in writing to the Captain of the Port, Customs, Maritime Health and the Delegation of the Agricultural Ministry.

Information on Cargo for the Port:

The arrival notice is accompanied by a stowage plan, if any, plus a breakdown of the cargo to be unloaded. At least the total tonnage of cargo to be handled is to be reported.

Additional Requirements:

If the ship carries export cargo, that fact must be reported to the Port Authority 2 to 6 days in advance, according to the amount of cargo, so that the ship can tie-up at the pier most suitable for unloading its cargo.

On Arrival:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*Security*	*Maritime Health*	*Agriculture*	*Port Authority*	*Total*
General Declaration	1	3	–	–	1	2	7

Maritime Health Declaration	–	–	–	1	–	–	1
Mail List	–	–	–	–	–	–	1
Additional Documents:							
Clearance from Last Port(b)(c)	1	1	–	–	–	–	2
Consular Manifests	–	3(d)	–	–	–	–	3(d)
Crew List(c)	–	1	–	–	–	–	1
"No Passenger" Declaration	1	2	–	–	1	1	5
List of Passengers or "No Passengers" Declaration(c)	–	1	–	–	–	–	1
Manifest of Missing or Extra Packages	5	–	–	–	–	2	7
Sets of Bills of Lading	–	–	–	–	–	1	1
Dangerous Cargo List	–	–	–	–	–	2	2
List of Cargo to be Loaded	–	–	–	–	–	–	1
Stowage Plan of Cargo to be Loaded	–	–	–	–	–	2	2
Tally Books	1	7	–	–	1	7	16

(a) This form is not required, but if it is available, carry 3 copies.

(b) Customs checks the clearance from the last port and remits it to the Captain of the Port.

(c) With consular visa.

(d) 3 visaed manifests for each port of loading are required, but 1 visaed and 2 without visa are acceptable.

Other Requirements:

In the port of Corinto, the following documents must be submitted: *Basic Forms:* Cargo Manifest, 20 copies, 3 of which must be visaed. Crew List, 8 copies, 3 of which must be visaed. Passenger List, 8 copies, 3 of which must be visaed. Ship's Stores List, 8 copies, 3 of which must be visaed. Maritime Health Declaration, 2 copies.

Additional Documents: Clearance from the last port, certified. Ballast Manifest, 12 copies, 5 of which must be visaed. Voyage Memorandum, 10 copies. Bill of Lading, 3 sets for each port of loading. Stowage Plan, 3 copies. List of Cargo Distribution, 4 copies. Tally Books, 10 copies.

Prior to Departure:

Before clearance, a report is submitted to Customs on export cargo, so that it can be compared with the export policies.

The vessel's clearance permit is requested from the Captain of the Port, which requires payment of 84 cordobas for this service, and for the official visit.

Customs considers the ship cleared and countersigns the clearance permit when the following payment vouchers have been submitted to it:

Mayor's Fee	300.00 cordobas
Municipal Welfare Fund	300.00 cordobas
Maritime Health Official Visit	56.00 cordobas
Agriculture Official Visit	30.00 cordobas
Customs Administration Fees	14.00 cordobas for unloading 21.00 cordobas for loading and unloading or, loading only

Certification that the vessel's documents were approved by the Nicaraguan Consul at the last port of call before arrival in the country. If there is no consulate, the Port Captain's declaration is accepted. If the documents are visaed and stamped "fees to be collected in Nicaragua", the fees amount to 207 cordobas (U.S.$31), which are divided as follows:

Clearance Permit	U.S.$ 9.00
Manifest	U.S.$10.00
Crew List	U.S.$ 6.00
Passenger List	U.S.$ 6.00

If consular visa is not obtained, Customs charges twice the rates mentioned.

If the cargo comes from other ports and is bound for Nicaragua, only a visaed manifest is required, which costs U.S.$10. Failure to comply with this requirement is punishable by a fine of U.S.$50 for each manifest.

PIRACY: Report dated 1982.

"Our vessel was off the East coast of Nicaragua at Lat. 14° 10′ N., Long. 83° 07′ W., on the morning of January 31st. The main engine was stopped for minor repairs when an armed motor boat with seven men and no identification attacked our ship, putting hundreds of bullet holes in the bridge, funnel and elsewhere but not injuring any crew. The attack commenced at 1115 hrs. and was broken off at 1145 hrs., when the vessel got back under way".

CORINTO: 12.30 N. 87.11 W. (See Plan)

ARRIVED SHIP: Vessels are considered as arrived only after having negotiated the entrance channel and are safely inside the proper harbour; vessels at the Pilot station are not considered as having arrived.

DOCUMENTS: (Also see "General" before first port).

For the official clearance, the following authorities will board the vessel:

The Port Captain
The Operations Chief
The Public Health Delegate
The Delegate from the Ministry of Agriculture and Livestock
A representative of the Port Authority
Two Customs Officers
A representative of the steamship agency.

Each vessel must present documents legalised by the Nicaraguan Consul from the port of origin of the cargo as well as from the last port of call before Corinto. The documents required are the following:

From the port of origin of the cargo:	Legalised	Non-legalised
Cargo Manifest	3	18
Bills of Lading	—	2
Tally Books	—	14
From the last port of call:		
Manifest	3	18
Clearance	1	—
Crew List	—	6
Passenger List	3	6
Stores List	—	6
Health Declaration	—	1
Voyage Memorandum	3	10

In the cases where there is no Nicaraguan Consul at the port of origin of the cargo or at the last port of call, the documents may be legalised by the Consul of a friendly nation or can be certified by some competent authority of the port certifying that there is no Nicaraguan Consul in said port. When a vessel brings cargo for Corinto from the last port of call, then it must also bring both sets of documents mentioned above, the manifest in the second group being replaced by the Cargo Manifest.

Once these documents are satisfactorily received, the vessel is declared in "Free Pratique" or rather, officially cleared and numbered by the Port Authorities.

Vessels are cleared, numbered and attended in their successive order of arrival with the exception of vessels loading perishable cargo (bananas). In Corinto there is no preferential treatment given to these vessels since they operate on their own special berth.

To clear the vessel for sailing, the only requirement is the presentation of a Customs Solvency Certificate and the Clearance for the next port of call extended by the Port Captain.

Customs: Customs assigns 2 Customs Guards to each vessel docked or anchored, the vessel being under the obligation to provide these guards 3 meals daily. Besides meals, guards on anchored vessels must be given a cabin since watches are made in shifts.

PILOTAGE: The Port Authority must receive in writing from Agents advice regarding vessel's ETA 72 hours prior to vessel's arrival and a confirmation 12 hours prior to arrival. All advice must be sent through Agents by cable via Balboa or Limon Station. Pilotage is compulsory on all vessels exceeding 500 g.r.t or exceeding 7 ft. draft. Pilot boards 1 mile off Isla de El Cardon.

ANCHORAGES: The anchorage inside the harbour can accommodate 5 vessels, depending on size and draft.

RESTRICTIONS: The port is open 24 hours; however, entry is restricted in accordance with tide and vessel's draft. Access channel and turning basin dredged to 13.5 m. Due allowance should be made for heavy swell if necessary. Speed limit 8 knots in Corinto Bay, and 5 knots in the vicinity of berths or other craft.

MAX. SIZE: Maximum permissible length 650 ft., 80 ft. beam. Draft controlled by depth of water in approach channel and state of swell (typical draft 13.5 m.).

RADIO: ETA cables are generally routed via NBA Balboa Station or TIM Limon Station.

VHF: The Port Authority has a VHF station to communicate directly with all vessels nearing the port.

HEALTH: After entry and vessel has berthed or anchored, 3 long blasts are given requesting Free Pratique; after these blasts the Authorities board the vessel together with the Agent's representative and proceed with distribution of the documentation. In the event of any suspected disease on board, the action to be taken will be given by the Representative of the Health Department. There is no automatic Pratique even though vessel is proceeding from another port in the same country.

Although the port is open 24 hours, vessels arriving after 2100 hrs. are not boarded by the Authorities until 0600 hrs. the following day, unless the vessel will berth and commence operations immediately. This being the case, Free Pratique is granted regardless of the hour. This arrangement is restricted to 0100 hrs. as gangs are not allowed to commence operations after that hour.

TUGS: Compulsory for berthing and unberthing. The tug joins vessel just after vessel passes Buoy No. 7. Tug's lines are generally used: however, at times ship's lines are used. There is no charge for use of tug's lines. 1 tug of 2,182 h.p. (30 ton bollard pull), 1 tug of 1,100 h.p. and one launch of 167 h.p. available.

BERTHING: There is no preferential berthing, and berthing is indicated by the Port Authority. Vessels are attended to in the manner "first come first served".

Berthing facilities are as follows:

1. Container Pier, length 240 m. Depth alongside 13 m. (Designed for 25,000 d.w.t. vessels).
2. Concrete Pier (Container Pier extension of this Pier). Length 370 m. (2 berths). Depth alongside 12.1 m.
3. A special berth with conveyor-belt system for loading of carton boxes such as bananas, frozen meat, as well as the handling of inbound and outbound cargoes such as fertiliser and cottonseed meal. Bananas can be loaded into 4 hatches at one time at a rate of 4,500 boxes per hatch per hour. Depth alongside at LW is 11.2 m.

Port Authority equipment includes fork-lift trucks with capacity up to 7,000 lb., 6 tractors with 5,000 lb. capacity, 95 trailers with 4,000 lb. capacity, 10 trailers of 40 tons for 20 ft. and 40 ft. containers, 3 front end loaders for 20 ft. and 40 ft. containers and 3 barges (2×60 ton and 1×80 ton capacity).

CRANES: Two mobile cranes, capacity 30 tons and 25 tons and 1×40 ton crane for containers.

STEVEDORES: *Working Hours:* The Port gives service 24 hours a day under the following schedule:

From 0700 to 1200
From 1300 to 1800
From 1900 to 2400
From 0001 to 0600

Each shift is of 8 hours. Meal hours are from 0600 to 0700; 1200 to 1300 and 1800 to 1900. The first shift commences at 0700 and is completed at 1600; the second shift is from 1600 to 2330. When a vessel announces with sufficient notice its intention to work during night-time continuously until the following day then a second shift does not work a full 8 hours but is relieved at 2200 hrs. and completely new gang takes over from 2200 until 0600 the following day.

When a vessel does not wish to work during the entire night, it may do two things: (1) Suspend all operations at 2330; (2) Work with the gangs of the second shift up until 0230 hrs. of the following day after which time the gangs of said second shift cannot continue working. Normally gangs are called at the following fixed official hours: 0630, 0930, 1230, 1530, 1830 and 2130, however on special occasions and with the approval of the syndicate, it is possible to integrate gangs at any hour of the day.

Average Cargo Handling Rates:

Exports:	Tonnes per gang hour
Cottonseed meal in bulk	48
Raw sugar in bulk-dumped by hand	48
Cottonseed in bags	45
Coffee in bags	45
Sesame seed in bags	45
Cotton in bales of 250 kilos each	40
Frozen meat	28
Lumber	12

Imports:	Tonnes per gang hour
Drums	40
Wire rolls	40
Bulk cargo (discharged by clam-shells)	35
Fertilisers – insecticides in bags	30
Vehicles (by weight)	30
Paper rolls	27
Wheat (by aspirators)	20
Oats (by aspirators)	15
General cargo	15

TANKERS: The only tankers which frequent this port are those of Esso Standard and Parcel Tankers. There is one tanker berth; depth alongside 12.2 m. and each of the above-mentioned companies have their particular load/discharge lines.

The Esso tankers only discharge oils, the Parcel tankers discharge solvents and occasionally others load cotton seed oil.

There are 9 lines belonging to the consignees ranging from 4 in. to 12 in.

Loading rates:		Tonnes per hour
Molasses	12 in. pipe	140
Bunker or asphalt	8 in. pipe	409
Aviation gasoline	6 in. pipe	237
Hexane	6 in. pipe	240
Aromatics	6 in. pipe	203
Chemical Products	6 in. pipe	210
Turpentine	6 in. pipe	125
Coconut oil	4 in. pipe	60
Lubricants	4 in. pipe	45
Tallow	4 in. pipe	35

MEDICAL: There are several doctors in the port and most of the Agents have a particular doctor to their service. Hospital facilities are also available. No particular inoculation is required.

DENSITY: (Average) Rainy season 1014, dry season 1020.

FRESH WATER: Fresh water is available and is supplied from connections on the pier, by gravity, at a rate of approximately 10 t.p.h.

FUEL: Corinto cannot supply bunkers. In emergencies small quantities of bunkers and/or diesel oil may be supplied by private firms.

CONSULS: In Corinto:

Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Honduras
Mexico
Sweden
Venezuela

REPAIRS: There are no shipyards; no large scale repairs available. Small motors and generators may be repaired in shops in Corinto and Chinandega.

GANGWAY/DECK WATCHMEN: After entering, 2 Custom Officers are placed on board all vessels and their meals must be furnished on board.

OPENING/CLOSING HATCHES: If vessel is equipped with regular hatch boards or pontoons, stevedores open and close hatches as well as swing out booms. However, if covers are of the MacGregor type or mechanical, the crew has to do the job.

CERTIFICATES: Ship's Registry Certificate is required from ships making their first call at the port.

CUSTOMS ALLOWANCES: There is no limit on tobacco allowance to be held out of Bond but crew members are only permitted to take 2 packages of 20 cigarettes ashore. Crew not permitted to take any alcohol ashore. Anyone trying to do so will be subjected to heavy fine through Master of their vessel.

AIRPORT: The airport at Managua is approximately 150 km. from the port and served by regular airlines with daily flights.

REPATRIATION: Can be effected.

SERVICES: *Provisions:* There are several ship chandlers operating in the port who are in position to supply vessels with provisions necessary and required by stewards, engine or deck departments.

Laundry: The same ship chandlers can take care of any amount of laundry. Drycleaning can be done by these suppliers in the nearby city of Chinandega.

Cleaning: There are special gangs of labourers in the port who work on vessels doing odd jobs such as cleaning, chipping, painting, etc.

Transportation: For anchored vessels, there is a very efficient ship-to-shore launch service.

There is taxi service available for transportation by day or night to any part of the country. There is an air-conditioned express bus service between Corinto and Managua under the following schedule:

From Corinto	0400 hrs.	arrive Managua	0645 hrs.
From Corinto	0600 hrs.	arrive Managua	0845 hrs.
From Managua	1445 hrs.	arrive Corinto	1800 hrs.
From Managua	1745 hrs.	arrive Corinto	2030 hrs.

Hotels: There is a small third-class hostel in the port, however in the city of Chinandega there is the Hotel Cosiguina with all the modern conveniences and facilities desired. Chinandega is connected to Corinto by a modern highway.

TIME: Local time is Central Standard Time, GMT minus 6 hours. There are no alterations during the year.

HOLIDAYS: Official holidays are: January 1st (New Year's Day); Holy Thursday; Good Friday; May 1st (Labour Day); May 3rd (Local Patron Saint's Day); July 14th (Annullment Chamorro-Bryan Treaty); September 14th (San Jacinto Independence Battle Day); September 15th (Independence Day); October 12th (Columbus Day); December 25th (Christmas Day).

In accordance with regulations, no work will be done on these days, however, from experience, with the only exception of May 1st (Labour Day), all other holidays are workable under special arrangement.

POLICE/AMBULANCE/FIRE: Police 269; Ambulance 313; Fire 421.

SHORE LEAVE: Allowed. See "Identification Cards".

IDENTIFICATION CARDS: Crew members allowed ashore if they wish to do so after being previously identified by means of a Seaman's Book or a Passport. This document is kept by the Customs Guard at the foot of the gangway and given back to the crew member when he returns to the vessel.

DEVELOPMENTS: Projected installation of bulk handling plant, additional warehouses and extension of pier by 1,500 ft. with 2 transit sheds, new administration building, stevedores shed, equipment shed and repair shops; re-designing of range lights and buoys and increasing amount of same, also area for Industrial Park.

A 40 ton container handling crane, 70,000 lb. capacity front loader, tractors and trailers have been ordered for the container berth.

SHIPMASTER'S REPORT: August 1981.

Documents:

12 copies Ship's Particulars.
3 Legalised and 7 without Visa Ballast Manifests.
3 Legalised and 7 without Visa Passenger Lists.
10 copies Negative List.
3 Legalised and 7 without Visa Crew Lists.
3 copies Crew Declaration List.
3 Legalised and 7 without Visa Stores Lists.
7 copies Mail List.
Vaccination List.
Health Declaration Form.

Pilotage: Compulsory. Pilot boards by Buoy No. 2. Notice required 72 hours.

Anchorage: 3 miles West of Isla Cardon Lt. Depth at LW is 48 ft.

Max. Size: LOA 700 ft., max. draft 28 ft., mean tidal range 8 ft.

Restrictions: Vessels may enter and leave anytime, day or night.

Radio: Limon Radio.

VHF: Port Authority on Channel 16.

Tugs: None available at time of visit.

Berthing: Vessel berthed at Banana Pier (Lat. 12° 28.6′ N., Long. 87° 10.2′ W.). Distance from entrance to berth is 4 miles. Max. LOA 600 ft., max. draft 25 ft. Least depth in Channel to berth 26 ft. 6 in. Density 1016.

Services: The following are available: Fresh water, fresh provisions, Lloyd's Surveyor, telex, diesel oil (expensive), doctor and hospital.

General: On arrival at the Pilot Station the Pilot will board accompanied by a member of the Quarantine Department who will insist on going into every cabin, Store Room, etc., armed with a pressurised can of insecticide for fumigation purposes. This will take approximately 1 hour. The vessel is not allowed in the channel until the Quarantine fumigation formalities are over so it is advisable to approach the Pilotage Station No. 2 Buoy at right angles to the channel.

Once safely secured and if in convenient position to lower the accommodation ladder it must be lowered or B.O.T. gangway rigged to one of the dolphins. Ensure that the Board of Trade ladder is in good condition and the wheels running free as the vessel tends to roll a little at the Banana Pier if there is any swell outside. No official or stevedore labour will climb a pilot ladder so it is essential to have one of these access ready on arrival.

The Doctor will board and after medical clearance the Port Officials (Army) and Immigration Officer will board. They will browse through the various documents whilst Immigration Officer will check all Passports, I.D. Cards, etc., and eventually he will physically check that everyone is on board. These Officials and Immigration Officer do not speak a word of English, the Agent is conversant in English and is most helpful.

On completion of Immigration formalities, 2 Ship's Officers are required to escort two groups of Port Authority Officials who will search every cabin except the Master's for drugs. On completion the Customs Officer will seal the bond and beer lockers. Beer is allowed out of the locker before it is sealed. There is no set allowance for cigarettes and spirits within reasonable bounds.

Shore leave; if anyone requires shore leave a form is furnished by the Immigration Official which must be filled in. Shore leave is allowed from 1700 hrs. to 2200 hrs. Anyone extending this period will be fined U.S.$25.

Time taken for clearance is approximately 2 hours.

Clearing vessel outwards most Immigration Officers want to physically check everyone on board, this takes 1.5 hours.

It is essential that rat guards are fitted to *all* ropes, if not a heavy fine will be imposed.

Navigation: Pilots are satisfactory. The depths of water on the Chart are dubious. Have echo sounder on at all times. If docking or undocking between tides, both Ebb and Flood tides are very strong and there is no tug.

At the Banana Pier there is an unprotected dolphin (solid concrete) at the North end and one at the South end, the others are fendered.

SHIPMASTER'S REPORT: February 1987.

1. On anchoring, the Pilot, doctor and assistant board the vessel. After inspecting vaccination lists, and all cabins are sprayed, permission is given to weigh anchor.
2. Pilot very capable. 1 tug available.
3. Documents required when alongside:
   14 copies Manifest in Ballast.
   17 copies Manifest of Cargo (3 copies visaed).
   14 copies Bills of Lading.
   17 copies Crew List (3 copies visaed).
   17 copies Stores List (3 copies visaed).
   8 copies Money List.
   8 copies Personal Effects Lists.
4. During our stay at La Guaira the following were visaed: Crew Lists, Passenger Lists, Arms and Ammunition Lists, Narcotics List. The Nicaraguan Consul at Caracas charged U.S.$175.00 for this service.
5. Authorities were polite. Before sealing stores it was possible to take out immediate requirements (cigarettes, spirits, etc.).
6. All crew members to be present and passed by Immigration Officer one by one, in order to obtain shore passes.
7. Shore leave possible at following times: Master/Chief Officer/Chief Engineer from 0800 – 2400 hrs. Others 0800 – 2200 hrs.
8. All cabins and decks inspected by 1 Customs Officer and 2 soldiers.
9. It is possible to contact Agent 24 hours a day on VHF Channels 16 and 12, even on holidays.
10. Departure depends on Immigration Officer. All crew members to be passed by the Officer.
11. Pilot boards after clearance given.
12. It is possible to shift cargo, even containers, via the quay.
13. All stevedores equipment is up to date.
14. Consult "Guide to Port Entry" for further navigation details.

AUTHORITY: Autoridad Portuaria de Corinto, Apartado Postal No. 11, Corinto, Nicaragua. *Tel:* 211-214. *Telex:* 1294. *Contact:* The General Manager.

Empresa Nacional de Puertos, Apartado Postal No. 3570-2727, Managua, Nicaragua. *Tel:* 74452, 74430, 74383. *Telex:* 2422. *Contact:* Cesar Delgadillo Machado, Director General.

PUERTO CABEZAS: 14.01 N. 83.23 W.

DOCUMENTS: (Also see "General" before first port).

1 Clearance from Last Port.
10 Voyage Memorandums.
11 Crew Lists.
10 Passenger Lists.
10 Stores Lists.
1 Bill of Health.
12 Ballast Manifests.
13 Manifests of Cargo.
4 Bills of Lading.
10 sets Tally Books.

PILOTAGE: ETA required 24 hours before arrival at the port. The Pilot uses a boat with an outboard motor and boards about 1 mile off the port. Agent advises the Pilot the date of arrival, he goes out when he sees vessel.

ANCHORAGES: Vessels can anchor about 0.5 mile South of the wharf. Depths in anchorage 20 ft. – 22 ft.

MAX. SIZE: Max. length 400 ft. Draft 19 ft. 6 in. Difference between high and low tide is 18 in.

HEALTH: The inspection takes place on arrival. It is not necessary when the vessel comes from another port in Nicaragua.

RADIO: The Port has a radiotelephone for personal use, but they make contacts with vessels. The frequency is 2738 kHz..

TUGS: There is no tug service.

BERTHING: One wooden quay, length 683 m. Width 8.4 m. and depth 6.7 m. at the seaward end. There is wreck in front of the wharf. The location is: Lat. 14° 0′ 57″ N., Long. 82° 22′ 4″ W., 1,200 yd. from wharf end.

STEVEDORES: The Agent advises stevedores of arrival of vessel. They discharge 8 tons of general cargo each hatch (one gang) per hour.

MEDICAL: Not necessary to advise the need of a doctor, only for emergencies. One hospital and two other doctors, apart from the official doctor of the port.

TANKERS: There are 2 pipes of 6 in. diameter on the wharf. There is no special berth for oil tankers.

DENSITY: 1025.

FRESH WATER: Fresh water is carried to the wharf by truck or from one pipe on the wharf. Boiler water is carried to the vessel by the pipe on the wharf.

FUEL: Gasoline, diesel oil and lubricants are supplied by Texaco. Arrangements are made when the vessel arrives.

CONSULS: Only consul of Panama available locally.

REPAIRS: Minor repairs only can be effected.

GANGWAY/DECK WATCHMEN: Not compulsory. It is customary to have two Customs guards on the gangway.

OPENING/CLOSING HATCHES: The opening and closing of hatches is done together by the crew of the vessel and the stevedores.

CUSTOMS ALLOWANCES: Each of the crew can have 2 packs of cigarettes with the seal broken, and one bottle of wine or liquor opened.

REPATRIATION: It is possible and only a passport needed. Necessary to go to the capital by air, thence to any part of the world.

AIRPORT: Distance to airport from wharf is about 2 km. Service every day to the capital except Sundays and holidays. The name of the only airline is Aeronica.

TIME: Local time is Central Standard Time, GMT minus 6 hours.

HOLIDAYS: Holidays are 1st January; Holy Thursday; Good Friday; 1st May; 14th July; 14th and 15th September; 12th October and the 25th December.

SHORE LEAVE: The crew is allowed to go ashore after the vessel is received by the Authorities.

IDENTIFICATION CARDS: Not needed, just passport or Seaman's Book.

DELAYS: Delays in berthing can be expected due to bad weather.

DEVELOPMENTS: A hydrographic survey has been completed in the port zone and surrounding area to establish the best place for future port facilities or whether expansion should be made to the existing port. This survey is being effected in view of projected installation of paper and pulp industry and forthcoming development of agricultural and mineral products which could be exported through the port.

The Port Authority is taking the necessary steps to get technical and financial help to make a general survey of the zone in order to find an adequate and/or protected site to place the new port installations. Port plans are combined with the paper and pulp industry, which is supposed to be installed in the next few years.

AUTHORITY: Empresa Nacional de Puertos, Apartado Postal No. 3570, Managua, Nicaragua. *Tel:* 74430, 74452, 74383. *Telex:* 2422. *Contact:* Cesar Delgadillo Machado, Director General.

PUERTO SANDINO: 12.12 N. 86.46 W. (See Plan)

DOCUMENTS: (Also see "General" before first port).

Clearance from previous Port.
6 copies Voyage Memorandum.
6 Stores Lists.
6 Passenger Lists or negative declaration, 3 to be visaed.
6 Crew Lists.
8 Cargo Manifests, 3 to be visaed.
8 Tally books.
6 Lists of Mail, Explosives or Drugs if carried.

9 Crew Lists and 6 Stores Lists should be despatched by the Nicaragua Consul at loading port if possible, otherwise they are forwarded by Agents from the Panama Canal.

PILOTAGE: Optional; by local Pilots. Leading lights are installed, at the entrance to the port, prominently sited on a hill. Several buoys indicate exact anchorage positions.

Tankers: A Pilot is provided by the oil company in agreement with the Panama Canal Authority. Pilot boards about 0.5 mile West of the sea berth.

ANCHORAGES: About 1.75 miles off port entrance, depth is 30 ft. at low water, and about 45 ft. at high water.

APPROACHES: *Shipowner's Report:* 1981. Charted positions of the mooring buoys, navigation aids and other coastal landmarks are unreliable and may be off by two miles.

It is strongly recommended that approach to the coast not be made at night-time unless radar-assisted navigation is possible. The radar should be used while making the approach. Vessels may anchor about one mile S.W. of the radar/light buoy No.1 which is positioned W.N.W. of the mooring buoys.

Vessels are cautioned against proceeding North and East of the radar/light buoy No.1. The recommended approach to the anchorage and the pilot boarding area is made on a course of 045° with volcano Momotombo dead ahead.

If a night-time approach to the anchorage is made, it is best to determine well in advance (using radar and visual means) that the sea-buoy is lighted. There have been reported instances of this light being extinguished on occasion.

RESTRICTIONS: Port is open day and night without exception.

MAX. SIZE: Tankers at Sea Line Terminal up to 850 ft. length and 41 ft. draft.

HEALTH: Port Health Inspector boards all vessels on arrival.

RADIO: Nicaragua does not have a coast radio station. All traffic should be sent via Balboa. Ships transitting the Panama Canal bound for Puerto Sandino shall give the agent at the Panama Canal, prior to departure from Balboa, their ETA message for transmittal to Nicaragua.

VHF: The office of the Captain of the Port has a VHF. Normally Channel 6 and 16 are used for calling. If no answer try Channel 13 as this is usually the channel used for communication. If VHF communication cannot be established proceed to anchorage.

TUGS: Not available for manoeuvring vessels. 5 small tugs employed for shifting lighters.

BERTHING: No quays for ocean-going vessels. Vessels work cargo to lighters at the anchorage.

2 lighters (100 ft. × 30 ft.) each with capacity of 400 tons.

STEVEDORES: Port has 4 gangs of 40 men each for boarding vessels.

MEDICAL: Doctor available in case of emergency. Nearest hospital at Leon, 35 km. away.

TANKERS: *Sealine Terminal:* The sea berth is situated in approximate location Lat. 12° 10′ N., Long. 86° 49′ W., about 2 miles offshore in a depth of 47 ft. Discharge rate 7,500 bbls./p.h.

Strong winds may delay berthing or cause vessel to vacate the berth once moored. Sailing at night is not recommended for safety reasons. The discharge hose is lifted on the port side by ship's crew.

Mooring Masters: The services of a Mooring Master/Adviser is provided by Esso.

The Mooring Master will either board ship West of the sea berth or prior arrangements will be made with owners and/or Agent to have the Mooring Master embark and disembark at Balboa, and accompany vessel for the voyage.

The Mooring Master and Refinery Representative will remain aboard at all times while the vessel is moored in the berth. A mooring launch is kept standing-by the ship to let go lines in case it should become necessary to vacate the berth due to bad weather. It is imperative that this launch be kept at the ship at all times.

Moorings: The sea berth consists of 5 mooring buoys, 2 forward and 3 astern. Usually 4 to 5 lines are required forward and 8 lines aft. The approach to the berth with the Mooring Master on board is made on an Easterly course, turning Southward between Buoys No. 3 and 4. The ship's starboard anchor is occasionally dropped, to steady her head in the berth. One or two shackles of chain are used. 2 line boats take the ship's lines to the buoys, usually in the following sequence. (See "Plan")

(1) 2 lines to Buoy No. 5; 2 lines to Buoy No. 1.
(2) 2 lines to Buoy No. 3; 2 lines to Buoy No. 2.

The crew should be ready to bend mooring lines together, so as to reach the forward buoys. Once berthed, the tankers should have the following mooring lines out:

Buoy No.	Nos. of Lines	Approximate Distance, Ship to Buoy	
1	2 – 3	855 ft.	250 m.
2	2	700 ft.	200 m.
3	2	330 ft.	100 m.
4	2	430 ft.	130 m.
5	4	300 ft.	90 m.

Steel mooring wires cannot be used as the size and capability of the line boats prohibit this.

Vessels moor and unmoor in daylight hours only.

Tugs: Not available.

Hoses and Ship's Boom: Ship's crew assists with hose connecting. A 12 in. diameter submarine hose is lifted on the port side.

The ship's boom (minimum 5 tons SWL) must be in readiness for hose lifting on the Port side.

Gangway: It is necessary to rig an accommodation ladder. A good clean pilot ladder is satisfactory. If the ladder is rigged on the port side, it must be shifted to starboard after vessel is secure in the sea berth.

Oil Pollution Prevention: The usual sensitivity as to oil pollution exists in this area. There are no oil dispersants or spray equipment available ashore. A customs guard remains aboard each ship during entire port stay and reports any oil spills to his supervisors ashore.

Bunkers and Fresh Water: Not available.

Fire Fighting: Ships should have all fire fighting equipment in readiness while in berth. There are no floating fire fighting units available in this area to assist tankers.

Repairs: No ship repair facilities are available. Divers can be made available with advance notice.

Ship's Stores and Provisions: No facilities.

FRESH WATER: Not available for supply to ships.

FUEL: Not available for supply to ships.

CONSULS: Nearest at Leon, 35 km. distant.

REPAIRS: Small items for repair can be sent to Leon.

OPENING/CLOSING HATCHES: Normally performed by stevedores. Mechanically operated hatches are opened by ship's crew.

CUSTOMS ALLOWANCES: Each crewman allowed two packets of cigarettes. No wine/spirits allowed to be taken ashore.

REPATRIATION: No facilities for crew changes. If crew member left behind, Agents are responsible for his repatriation at vessel's expense.

AIRPORT: Las Mercedes international airport at Managua, 75 km. away.

TIME: Central standard time, GMT minus 6 hours. No alterations.

HOLIDAYS: All holidays can be worked.

POLICE/FIRE/AMBULANCE: Police available locally. Nearest fire and ambulance stations are at Leon, 35 km. away.

IDENTIFICATION CARDS: Seaman's Book required for going ashore.

SHIPMASTER'S REPORT: 1976.

Port Authorities board the vessel at 0600 hrs., either at outer anchorage or at discharging anchorage. There is no night work performed unless the vessel reaches discharging anchorage with last daylight.

In general, stevedores are well acquainted with handling cars. Vessels carrying cars for Pto. Sandino should avoid loading No. 1 hatch for this port, as there is a permanent swell at anchorage, barges cannot lie safely under No. 1 hatch.

There is a Pilot available, on request, who also acts as stevedore-foreman.

SHIPMASTER'S REPORT: 1978.

Approach: Coastwise from the North, no difficulties being encountered.

Anchorage: Vessel anchored in position with the rear leading light bearing 088°(T) – 2.1 miles, starboard anchor used, 4 shackles in 8 fathoms of water.

It is advisable to run in to the anchorage slightly to the North of the leading line, thus avoiding the shoal patches on and to the Southward of the line. The anchor should, however, be let go right on the leads, otherwise the vessel will be required to shift anchorage, as happened in our case.

Buoyage was as per B.A. Chart 1960.

Point Penas del Tiscuco: Now has a large power station on it, not shown on the Chart. This is a good land mark when making the port. The shape of the point, as observed on Radar, appeared slightly different from the shape shown on the Chart.

Pilotage: Pilot is available if required, but was not used. I would advise a deep draft vessel to take a Pilot.

Communications: For long distance communications, it is best to maintain radio watches.

The Charterer's Agents have a VHF set in their office at Corinto and contact can be maintained for day to day matters in this way.

Charterer's Agents: They have a resident water clerk at Pto. Sandino, who can be contacted on Channel 27, VHF. He is available from 0800 to 1200 hrs. and from 1400 to 1800 hrs.

Under normal circumstances, a representative from Corinto will meet the vessel on arrival and visit her prior to departure, but this was not possible on this occasion.

Documents required: As per "Guide to Port Entry".

Officials: Were helpful. 1 Customs guard is on duty at all times, but the Guards are regularly relieved from the shore and the ship is not required to provide accommodation for them.

Cargo Work: Continuous and fast. Large, modern lighters, towed by powerful tugs, were used. Due to the swell, these lighters ranged heavily alongside. Although the lighters were well fendered, several indentations were caused in the ship's side. Delays due to lack of lighters were minimal.

Rate of discharge, net of delays, was 60 tons per gang hour, steel coiled rod.

Pratique: Granted on arrival.

Provisions: Not purchased.

Fresh Water: Unobtainable.

Shore Leave: Under normal circumstances, can be arranged by using the lighters.

AUTHORITY: Empresa Nacional de Puertos, Apartado Postal No. 3570, Managua, Nicaragua. *Tel:* 74430, 74452, 74383. *Telex:* 2422. *Contact:* Cesar Delgadillo Machado, Director General.

SAN JUAN DEL SUR: 11.15 N. 85.53 W.

SHIPMASTER'S REPORT: December 1984 (Updated 1986).

DOCUMENTS:

10 copies Passenger Declaration.
10 copies Ballast Declaration.
10 copies General Declaration (Ship's Particulars).
6 copies Provision and Store Lists.
6 copies Personal Declaration.
1 copy Ammunition List.
12 copies Crew List.
Clearance from last port.

Authorities: The following Authorities board after anchoring: Customs Immigration, Captain of the Port, Doctor, Military.

A Customs search will probably be made. It takes 4 hours to clea vessel.

PILOTAGE: Pilot available. We arrived after dark and had to wait unt 0600 hrs. the following day for the Pilot.

ANCHORAGES: Vessel anchored about 1.5 miles out in 15 fathoms t await Pilot.

Discharging anchorage is about 0.5 miles from the jetty in 5 fathom We anchored about 1 mile from the jetty in 10 fathoms as another vess occupied the innermost anchorage. Walking back anchor to bottom an paying out cable as ship falls astern is recommended. When anch was dropped in 15 fathoms area it took some time to hold.

The holding ground at the working anchorage was good, both vesse lying to 1 anchor in Force 6 – 7 winds and choppy seas.

APPROACHES: Straight in from sea on an 067° (T) course to anchorage. At the time of the vessel's visit the light on the headland South of the bay (Fl. 6 secs.) and 1 red leading light were extinguished.
TUGS: There is a small tug which is used to tow barges, also numerous launches.
EQUIPMENT: 3 barges of 150 tons – size about 24 m. × 5 m. 2 barges of 40 tons – size about 12 m. × 3 m.

Barges are open and are fitted with tyre fenders. Barges can also be obtained from nearby ports.

4 Fork lift trucks of 8 tons and 2 of 2.5 tons capacity. (Not all of these trucks were sighted).

3 mobile cranes for discharging barges ashore. There are also tractors ashore.

Storage: There is a large storage shed and an unsurfaced storage yard.
STEVEDORES: Port Authority stevedores. The port works 24 hours a day as follows:

From 0700 – 1200 hrs. Straight time.
From 1300 – 1800 hrs. Straight time.
From 1900 – 2200 hrs. Straight time.
From 2200 – 0600 hrs. Double time.
Sundays and holidays triple time.

Labour works 24 hours and are then replaced by other gangs.

Meal hours are from 0600 – 0700, 1200 – 1300 and 1800 – 1900 hrs., however, these hours are flexible often expanding to 2 hours. Labour go ashore for their meal hour.

The steel was discharged at about 35 tons per gang hour.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
REPAIRS: Noted that barges were being constructed at San Juan and it is possible that steel work could be done in an emergency.
GANGWAY/DECK WATCHMEN: One armed military guard, an Immigration Officer and 1 Customs Officer live on the vessel during vessel's stay.
OPENING/CLOSING HATCHES: MacGregor hatches opened by the crew, we also used crew for pontoons.
CERTIFICATES: Certificates inspected on board, not taken ashore.
CUSTOMS ALLOWANCES: Not known. The Master of another vessel advised that the Customs were quite generous.
AIRPORT: At Managua some 2 hours by road.
TIME: GMT minus 6 hours.
SHORE LEAVE: Passes are issued to the crew. 3 senior officers are given 24 hour passes, other officers and crew required to be on board by 2200 hrs.
DEVELOPMENTS: It is planned to build a pier in order that vessels may berth alongside.
GENERAL:
Charts and Publications: General Chart B.A. 1049 – Ellana Bay to San Jose.

Harbour Chart BA 1960 – Plans on West Coast of Central America.
Port Information: Admiralty Sailing Directions Vol. 8, Eighth Edition, "Pacific Coasts of Central America" and United States Pilot.

Weather: Winds from N.E. Force 6 – 7 from December to February.
Winds from S.W. in July and August.
Squalls experienced in May and October.
Refer to Admiralty Sailing Directions.

Hotels: One small third class hotel and a number of boarding houses. A tourist hotel is being built but is not complete.
Communications: Post Office can place telephone calls internally and internationally, reception on international line bad.

The Post Office is equipped with an internal telex machine.

Operations: Good. The speed at which a vessel can be discharged depends on the availability of gangs and lighters. The turnaround time of barges is quite rapid and the gangs work well. We achieved 35 tons per gang hour and the other vessel, discharging bagged beans, did equally as well.

NOTES

Please also advise Shipping Guides Ltd.

Nigeria

GENERAL

TERRITORIAL WATERS: The territorial waters of Nigeria shall for all purposes extend to 30 nautical miles from the coast of Nigeria (measured from low water mark), or the seaward limits of inland waters.

RADIO:

Accurate ETA Required:

The following circular has been received from the Nigerian Ports Authority (N.P.A.):

Quote:

It is observed with regret that ships arrive in our territorial waters/roads long before their published Expected Time of Arrival, thus building up unnecessary congestion which Decree 40 of 1975 (now Act 40) was promulgated to check. The effect of this phenomenon is that the control built into the 'Ship Entry Notice' is neutralised and abused.

To give the desired effect to the control of ships inflow as intended in the 'Ship Entry Notice' no ships arriving 7 days earlier or later than their Expected Time of Arrival will be treated as Arrived Vessels and therefore will not be accorded berthing facilities. Action will be taken to clear such ships from our roads to the high seas and such Owners or Agents will be blacklisted.

With the Federal Government's relaxation of import restrictions which is followed by a progressive rise in the number of ships calling, the need for rigid application of the provisions of Act 40 cannot be overemphasised. It will therefore be in the best interest of all concerned to co-operate in this direction with a view to controlling a possible build-up of waiting vessels.

Shipping companies are invited to take advantage of other ports outside Lagos and Port Harcourt, where facilities are under-utilised, such as Calabar and the Delta ports.

Fines will be imposed if vessels arrive early.

Unquote.

Notice: Issuance of Ship Entry Notice (SEN) and Decree (ACT) 40 of December 1975 (amended July 1986).

The following received from the Nigerian Port Authority is for Principals information and guidance.

Efficient port operation which is necessary to give the desired quick turn round to ships can, among other steps, only be attained through effective allocation and use of available resources in terms of berthing facilities and other port inputs. In addition there is also the need on the part of all port users to abide with laid down rules and procedures for maximum benefit. In view of the foregoing and in order to rationalise sailings to all Nigerian ports, you are hereby reminded on the provisions of Decree (ACT) 40 of December 1975 which stipulates:

3 weeks' notice to be given for applications for ships scheduled to Nigeria before they could be considered for SEN (Ship Entry Notice).

You are also advised to take advantage of the facilities available at the under-utilised ports of Warri, Port Harcourt and Calabar, which equally have connecting links with the hinterland of the country.

Note: The SEN is not applicable to vessels carrying crude oil or petroleum products in bulk.

ANCHORAGE:

Thefts from Vessels at Anchorage: There have been recent reports of vessels being boarded and robbed of ship's stores (tarpaulins, paint, ropes, etc.) while the vessels were laying at anchor in the Lagos Roads and the Bonny River.

In some cases the thieves were seen to be armed.

We regret to have to caution Masters of the danger of theft, and to ensure attractive goods are kept under safe lock. Guards should be posted at night, whether in port or in the Roads. Alternatively, while in the roads, vessels could steam out a further few miles, out of reach of small boats. Also see "Bonny" – "Piracy".

CARGO GEAR: N.P.A. inspect all cargo gear certificates on arrival.

SURVEYORS: If a Lloyd's Surveyor is required at any port other than Lagos at least 3 days' notice is required to make travel arrangements.

BONNY RIVER PORTS: *Compulsory Pilotage:*

Pilotage is now compulsory for all classes of vessels including service boats, fishing boats, etc. Harbour Master Bonny has been instructed that no vessel shall be allowed to enter Bonny town anchorage until all NPA dues are fully paid in advance and clearance for entry is received from the Chief Port Harbour Master, Port Harcourt.

All vessels will therefore be piloted to their various berths by Nigerian Ports Authority Pilots only and no exception will be granted and all genuine unexpired local pilotage licences are now revoked.

REPATRIATION/CREW CHANGES: Immigration Authorities now insist that expatriate crew members should obtain entry visa prior to coming into Nigeria to join any vessel trading within Nigerian Territorial Waters. The entry visa should be valid for 3 months and at the expiration can be extended for another 3 months and no more.

DOCUMENTS: The Port Authorities have to be provided with 26 copies of the Cargo Manifest 14 days before the vessel berths (distribution: NPA 17 sets, Customs 5 sets, Agencies 2 sets and Container Control 2 sets).

From Port Manager – River Ports.

Central Planning and Information Centre: It will be mandatory on all Shipping Companies Agents and others intending to work their vessels in our ports to submit the underlisted documents to the Principal Traffic Officer in charge of C.P. & I.C. at the former office of the Deputy Dock Superintendent inside the wharf at least 7 days before the commencement of discharging operations of their vessels:

(a) Ship's Entry Notice (SEN).
(b) Ship's Manifest.
(c) Stowage Plan.
(d) Hatch List.
(e) Bulk Item List.
(f) Special/Valuable Cargo List.
(g) Hazardous/Dangerous Cargo List.

This stipulation came into effect as from 22nd August, 1983. It should be emphasised that as from that date preference is given to any ship which complies with the above stipulation.

Port State Control: The Surveyor of Ships, Federal Ministry of Transport, has issued the following circular letter:

"Following the ratification of SOLAS 1974 and Resolution A466 (XII) by the Federal Government of Nigeria, the Maritime Administration has decided to implement Port State Control which entails:

1. Maritime Surveyors boarding all flag state ships in the harbours for purposes of inspecting all international certificates of ships.

a. International Cargo Ship Safety Certificate,
b. International Cargo Ship Radio Telegraphy Certificate,
c. International Load Line Certificate,
d. International Safety Construction Certificate,
e. Classification Certificate, and
f. Certificate of Registry.

2. Manning: (a) particulars of Masters, (b) particulars of Chief Engineer.

3. General inspection – if the Surveyor considers the ship to be sub-standard and if found un-seaworthy, vessel will be detained until defects are rectified.

4. It is therefore pertinent that all shipping Agents bring this new dimension of safety inspection by national Surveyors to all their shipping Masters calling at any port in Port Harcourt and all other ports in Nigeria where we have our Surveyors".

Report: 1986.

Master's only to declare cargo for Nigerian port and not to include In-transit cargo in order to avoid difficulties with the N.P.A.

LOADING: *Oil Terminals:* A new regulation which took effect from 3rd December 1984, applies to all oil terminals in Nigeria. Vessels must load up to 90% of their deadweight. The remaining 10% being allowance for bunkers/water. Vessels are permitted to load part cargo at more than one terminal/port within Nigeria. This means that a vessel can load part cargo at one terminal and then complement loading at another terminal also within Nigeria. Vessels coming into Nigeria to load crude oil must arrive in ballast without part cargo from another country, otherwise such a vessel will not be allowed to load.

Since introducing the law that vessels with part cargo from another country cannot call at a Nigerian terminal the following new regulations have come into force.

Quote:

Tankers coming into Nigeria may now come in with part cargo provided that:

1. The quantity of the cargo to be brought in and its source are given at the time the tanker is nominated.

2. All details about the incoming cargo are declared to the Customs on arrival at the Nigerian terminal.

3. Such vessels will be fully loaded within the operational tolerance limit as set in (1) above before departing from Nigeria.

However, still in force is the 90% loading at offshore terminals of d.w.t. for tankers which arrived in ballast. Vessels are not permitted to load part cargo but can complement loading at more than one terminal provided within Nigeria.

Unquote.

Report: November 1989.

Vessels loading at offshore terminals are required to load to 90% of their deadweight. Vessels at inshore terminals are required to load to 60% of their deadweight due to draft restrictions.

FUEL: Some companies have now been licensed for the purpose of bunkering vessels. The stipulations in NPA Harbour Master's Notice No.2/83 (see "Lagos") must however be strictly adhered to. The Master should contact the Agent in this regard.

BOYCOTT: Any vessel which has called at any South African Port, cannot call at any Nigerian Port until a period of 6 months has elapsed between the time the vessel called at a South Africa Port and her call to a Nigerian Port.

WATCHMEN: Compulsory. Tankers require 4 men and general cargo vessels 16 men.

SHIPMASTER'S REPORT: 1978.

No ship is to enter Nigerian waters unless issued with a Ship's Entry Number.

ANTAN TERMINAL: 04.13 N. 08.20 E. (See Plan)

LOCATION: Antan Oil Terminal is located offshore of Nigeria, at Lat. 04° 13′ N., Long. 08° 20′ E. in a water depth of 126 ft.

The terminal consists of the tanker-based floating production, storage and off-loading system "FPSO VI" of 285,000 d.w.t., moored by means of a stern yoke to a platform mounted single point mooring. The "FPSO VI" has a crude oil storage capacity of some 230,000 tons. The "FPSO VI" contains equipment necessary for production, storage and transhipment of crude oil. The Antan Marine Terminal offices, testing laboratory and accommodation for terminal personnel are also located on board the "FPSO VI".

To comply with international regulations, during the hours of darkness the "FPSO VI" will show lights with the distinctive characteristics of the Morse code letter "U". In periods of poor visibility the fog signal will sound the Morse code for the letter "U".

Vessels using the terminal will be moored in tandem, bow to bow, to the storage tanker and loading will be by means of a floating hose between the vessels.

OCUMENTS: The following forms are required by Customs and Health fficials:

1 copy Vessel Registration Certificate
1 copy Last Port Clearance
8 copies (for past 6 weeks) Ports of Call List
3 copies Stores List
7 copies Arms and Ammunition List
4 copies Master's Declaration
9 copies Crew List
3 copies Crew Declaration List
9 copies Passenger List
9 copies Kroo Boy List
3 copies Stowaway List
3 copies Vaccination List
5 copies Animal List

ote:

(a) Also on arrival, 20 copies of Notice of Readiness.

(b) Before sailing and immediately upon completion of loading, vessel ust provide 20 copies of Ullage Report. Government Officials epresenting various departments may, at their discretion, board the essels in the Terminal area.

SSENTIAL REQUIREMENTS: *Summary of most essential equirements to be met by tankers lifting oil at Antan Oil Terminal:*

1. Berthing and unberthing shall only be permitted at the discretion of BM's Terminal Superintendent.

2. No dirty ballast disposal.

3. Advise arrival time by radio.

4. SBM's Mooring Master together with Custom Officials meet ships n suggested anchorage area.

5. Make a lee for SBM's Mooring Master and Officials to board.

6. Have ready: 2 messenger lines forward; ship's derrick on port side, ort manifold with 16 in. connection.

7. Vessel's Master responsible for safety of own ship at all times.

8. Lifting vessel's crew performs all operations of mooring, connecting nd disconnecting hoses, and unmooring aboard lifting vessel.

9. Do not close valves against crude flow.

10. Emergency flow stop signal if all communications fail will be a ontinuous sounding of ship's whistle from either lifting vessel or "FPSO I".

11. No shore leave or crew changes are permitted.

12. When arriving: by day fly flag "Q"; by night display red light over hite light for Quarantine Service.

13. Vessel's anchors to be secured against accidental use from the me the SBM Mooring Master boards.

14. All vessels must exhibit the Nigerian National Ensign from their oremast or other appropriate place while in the vicinity of the moorings.

15. Smit bracket of lifting vessel if fitted, is free, greased and ready for se. A large 14 lb. hammer should also be available.

16. During loading: by day fly flag "B"; by night display red light.

17. Vessel must arrive with no less than 30% ballast/cargo on board nd be able to maintain this condition during the loading period.

ote:

Antan local time is GMT plus 1 hour throughout the year.

No supplies of any kind or medical services (except in case of mergency and subject to a doctor being available), or other services f any kind are available at Antan Oil Terminal.

ILOTAGE: Pilot boards at the anchorage.

NCHORAGE: Suggested anchorage area consists of a circle radius .5 miles, positioned 4 miles due South of the FPSO VI mooring latform, in postiton Lat. 04° 14′ N., Long. 08° 19′ E.

AX. SIZE: The terminal is designed for tandem off-loading of shuttle ankers from 100,000 d.w.t. to 270,000 d.w.t. Although there is no pecific allowable maximum draft, shuttle tankers berthing at the terminal re expected to have sufficient ballast/or cargo already on board of up o 30% deadweight.

Minimum size 100,000 d.w.t. Max. size 270,000 d.w.t. There is no raft restriction.

EALTH: The vessel shall have a clean Bill of Health or equivalent ocument from the last port of call. The vessel's Master and all members f the crew shall possess International Certificates of Health showing uch valid Vaccination Certificates as all required by current Nigerian aw. From time to time Cholera Vaccination Certificates may be required nd it is, therefore, prudent that all crew members be in possesion of alid Cholera Vaccination Certificates.

ADIO: 1. It is most important that incoming tankers advise their ETA, 2 hours, 48 hours, 24 hours and 4 hours in advance of arrival, stating MT or local time.

Call sign 3EYH3.

Terminal listens to Portishead Radio at 0900-1000Z and 2100-2200Z aily on 17236 kHz.

Local R/T Frequency: 6,992.1 A3J 24 hours.

Inmarsat Telex No: 1331763. Answerback 1331763 FPSO X.

Selcall No: 1C 21876.

VHF working channel: 6.

Once direct communication has been established, the terminal will rovide a pre-arrival message.

The following information shall be included in the message given 2 hours in advance:

(1) Name of tanker and radio call sign.
(2) ETA.
(3) Cargo requirements.
(4) Deballast time.
(5) Maximum loading rate capabilities in t.p.h.
(6) Estimated draft on arrival.
(7) If there is any sickness aboard or clean bill of health.
(8) Last port of call.
(9) Any hull, bulkhead, valve or pipe-line leaks on vessel which could egatively affect loading or cause pollution.
(10) Distance in feet from the bow to tanker's loading manifold, and rom port rail to manifold.
(11) Agreement of Compliance with these Antan Oil Terminal user Regulations and Procedures.,

All vessels shall confirm ETA 24 hours and 4 hours distant or any time a 1 hour change of ETA is determined.

2. On receipt of the first message from the lifting vessel, Ashland Oil (Nigeria) Company will respond to the tanker giving preliminary requirements of the Terminal. Vessel's Masters will comply with these requirements in all details in order to facilitate Vessel turnaround and government formalities.

3. Once ships are within 4 hours of Antan Oil Terminal, communication should begin with the "FPSO VI" on VHF Channel 16. When contact has been made on this channel, further communication will be conducted on a mutually compatible channel, normally Channel 6.

4. The SBM Mooring Master will carry a VHF/FM Radio-Telephone when he boards the Tanker.

5. The 4 hour signal should confirm information on the time required to discharge ballast after arrival and should establish a better ETA.

6. Insufficient or inaccurate ETA messages can cause delays as Government officials have to come from elsewhere. Acceptance of Notice of Readiness may be affected by such insufficiency or inaccuracy.

RESTRICTIONS: Day and night-time mooring/unmooring of vessels at the terminal is possible. However, night-time mooring is permitted only at the sole discretion of the Terminal Superintendent, weather conditions permitting.

TUGS: *Mooring Launches:* The terminal maintains boats to assist in mooring and unmooring vessels. These boat are directed by the Mooring Master, to whom requests by the lifting vessel for action or assistance must be directed.

TERMINAL FACILITIES: 1. Vessels using the terminal will be moored bow to bow (tandem), to the "FPSO VI" by means of a 150 ft. nylon mooring rope. On the outer end of the mooring rope is a short length of chain ending in a triangle plate for connection to the lifting vessel's Smit bracket. For vessels not equipped with a Smit bracket or chain stopper, extra equipment consisting of a 82 ft.×17 in. snotter, with special shackle can be supplied.

2. During the period the lifting vessel is on the berth a tug/supply vessel furnished by the terminal will remain secured to the stern of the lifting vessel. The lifting vessel shall have no authority to direct or control the tug/supply vessel.

3. The loading hose connection is ASA 150 16 in. I.D.

4. Loading rates at the terminal will be governed by either the lifting vessel's maximum loading rate, or the maximum pumping rate of the "FPSO VI" whichever is the lesser.

5. The companies do not perform general agency functions. Owners or Charterers of vessels calling at the terminal must arrange for their own Agents.

BERTHING: 1. Lifting vessels will normally be accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast, if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped, manned and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

2. Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Radio Telephony Station at Antan Oil Terminal, in order that they may be available when the weather is fit for resumption of operations. SBM reserve the right to load vessels out of turn followng the return of good weather. Further, SBM reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

3. The decision of SBM's Terminal Superintendent on berthing will be final.

4. A lifting vessel will be expected to have ready on the forecastle head the following equipment: windlass ready for use, Smit bracket free, open and greased: a large coil of messenger line and a large 14 lb. hammer.

5. On approaching the berth, the messenger line is lowered to a small boat. This boat will take the end of the messenger line and attach it to the end of a floating rope. SBM Mooring Master will then instruct the crew to heave in the ropes successively until the chafe chain is in the fairlead and the triangle plate is in a position to be fitted to the Smit connector.

6. Once the lifting vessel is connected to the mooring, its engines, on request of SBM's Mooring Master, may have to be run "very slowly" astern in order to avoid contact between the two vessels until the tug/supply vessel has been made fast to the stern of the lifting vessel.

VESSEL'S GEAR: 1. SBM's Mooring Master may reject a ship if it is not, upon inspection, properly equipped or if it is not suitably manned or if he deems it to have dirty ballast or tanks unsuitable for receiving the cargo. A vessel is suitably manned only if it has a full complement of officers and crew in a sober condition, competent and willing to carry out their duties and orders, and sufficient English is spoken so that SBM's Mooring Master can understand and be understood.

2. All vessels must be equipped with a good working propulsion unit as passed by an appropriate classification society. Inoperative vessels or partially inoperative vessels will be rejected. Should vessels become inoperative while on the berth, they may be removed from the terminal area by the Company at the expense of the Owners or Charterers of the vessel.

3. Additionally, a vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyds" or "ABS" standards although they may be in fact classified by other societies. On instruction from SBM's Mooring Master, the vessel's anchors must be properly secured against accidental dropping.

4. All vessels must carry suitable stoppers for all manila or synthetic lines for mooring use.

5. All vessels must have suitable winches or capstans in good operating condition on the forecastle deck.

6. All vessels must be adequately equipped with a 10 ton derrick boom, blocks, tackles, wire runners and sundry equipment on both sides to efficiently hoist the hoses to the loading position. Sundry equipment should include wrenches, drift pins, nuts and bolts, wire and fibre strops, drip pans, gaskets, etc. To assist in vessel's turnaround, the vessel should have all necessary booms and cargo gear rigged and ready before being boarded by SBM's Mooring Master. All vessels which consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. This does not relieve the vessel of the necessity to provide adequate lifting gear as already described for Antan Oil Terminal operations.

7. The vessel's manifold should be prepared for 16 in. 150 ASA hose connection prior to the vessel's arrival. Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. Vessels equipped with smaller than 16 in. hose connections at the loading manifold should arrive with such hose connections suitably adapted for 16 in. hose so that maximum flow through the 16 in. cargo hose will be achieved.

Vessels equipped with larger than 16 in. hose connections at the loading manifold should provide their own reducers.

MOORING/UNMOORING:

1. The terminal is normally open 24 hours a day, 7 days a week, weather conditions permitting. The Terminal Superintendent shall be the final authority as to when the terminal is open or closed for normal working due to weather conditions. Night time berthing will only be permitted at the sole discretion of SBM's Terminal Superintendent.

2. Vessels to be moored, anchored or manoeuvred at Antan Oil Terminal will be boarded by SBM's Mooring Master in the close vicinity of the suggested anchorage area as shown in the "Plan Section". The anchorage area consists of a circle of radius 1.5 miles positioned 4 miles due South of the FPSO VI mooring platform in position Lat. 04° 14′ N., Long. 08° 19′ E. No lifting vessel may enter the terminal area unless SBM's Mooring Master is on board. SBM's Mooring Master will advise the vessel's Master on approaches to the berth, mooring, unmooring, tug handling, connecting and disconnecting the hoses and other operations within the anchorage and terminal area. All such manoeuvring of vessels shall be carried out only in accordance with the advice of SBM's Mooring Master, except where the vessel's Master believes such advice to be contrary to the proper navigation and safety of the vessel and crew, and subject to the understanding that in all cases and circumstances the Master of the vessel being manoeuvred shall remain solely responsible on behalf of his vessel's Owners or Charterers for the safety and proper manoeuvring of the vessel. The vessel's Master or one of his designated qualified deck officers specifically appointed by him at the time must be on the navigation bridge at all times while the vessel is being manoeuvred.

3. Vessels will provide a lee for the SBM Mooring Master's boat while the Mooring Master is boarding and leaving. All vessels are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Mooring Master's boat. A combination of a pilot ladder and vessel's accommodation ladder so arranged that personnel can first use the pilot ladder part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large vessels. A light line should be ready to take aboard the Mooring Master's portable radio. There should be adequate lighting at night.

4. The SBM Mooring Master will be in direct control of all the vessel's communications while in the terminal area. Any unauthorised communications will at the option of SBM's Mooring Master be cause for the cessation of all operations except clearing of the berth, and the vessel's Notice of Readiness will immediately be nullified.

5. Raising, lowering, connecting and disconnecting of oil loading hoses, as well as all other labours and duties on board will be performed by the vessel's crew under advice of the SBM Mooring Master (see "Vessel's Gear").

6. The Mooring Master may refuse to accept a vessel for loading, if he considers the vessel's condition to be unsatisfactory. In the event the Master of lifting vessel and SBM's Master can not agree to a procedure by which the vessel can meet satisfactory loading conditions, both Ashland and the charterer of the vessel shall be immediately contacted so that corrections can be made. The time required to bring the vessel into satisfactory condition shall not count as used lay time.

7. The services of SBM's Mooring Master are provided without charge upon the express understanding and conditions that when the Mooring Master goes on board the vessel for the purpose of assisting such vessel, he becomes for such purposes the servant of the Owners or Charterers of the vessel, and the Companies shall not be liable for any damage or injury resulting from any advice or assistance or actions given or made by the Mooring Master.

8. SBM's Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring or both, or for infringement of these Terminal Regulations.

9. Various combinations of wind, sea and tidal conditions, also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Antan Oil Terminal. All these factors have to be evaluated before a final berthing decision is made and agreed by the vessel's Master and SBM's Mooring Master. All time lost, as a result of weather conditions, shall count as half time in laytime or demurrage calculations.

HOSES: *Connecting Hoses:* 1. After the vessel is securely moored the cargo hose will be hoisted aboard, normally on the port side. The berth is equipped with a single 16 in. loading hose string, the weight of the hose lift being approximately 7 tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 10 tons. The hose is lifted by vessel's gear and crew, and all connecting of the hose will be carried out by them. The lifting derrick, equipment, tackle, etc., should be topped off and ready on arrival. Terminal loading hoses are fitted with ASI 150 flat face flanges with Camlock couplings and vessels should have adapters and fittings to enable these hoses to be connected to the vessel's manifold. SBM's Mooring Master advises the vessel's personnel on hose lifting and connecting procedures; however, a vessel's Master or deck officer must be present and must direct the vessel's crew in all handling. SBM's Mooring Master may reject a vessel for unsatisfactory hose handling.

2. When SBM's Mooring Master is assigned to a vessel, the vessel at her cost will supply him with meals at the same time and in the same manner as for comparable personnel of the vessel. The vessel will also provide a suitable cabin and smoking facilities.

LOADING: *Loading Readiness and Arrival Time:* 1. SBM will make every effort to moor offtaking vessels upon arrival in daylight, weather permitting. Night-time berthing shall only be permitted at the discretion of SBM's Terminal Superintendent.

2. Notice of Readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load including compliance with all terms of these Antan Oil Terminal Regulations. Arrival time will be considered as the time when SBM's Mooring Master boards the vessel, or the time the vessel reaches the deep water Anchorage area, whichever occurs first. The approved Anchorage area is shown (see "Plan"). Notice of Readiness shall be in English.

3. During loading the International Code Flag "B" shall be displayed from a top-most signal halyard during daylight hours. During hours of darkness a red light shall be displayed; visible at a distance of at least one mile and show an unbroken light all around the horizon.

BALLAST: *Regulations require either:*

1. Segregated or dedicated ballast facilities.
 or
2. Ballast able to be discharged and cargo loaded concurrently.
 or
3. Tanker arrives partially loaded.

All vessels must maintain a minimum of 30% Summer deadweight at all times while at the terminal.

Disposal of Ballast: 1. Owners and Masters are responsible for complying with all International Conventions and Nigerian Laws concerning pollution of the sea, having particular regard for the offshore sector. The Nigerian Authorities are becoming increasingly concerned at the rising level of pollution in these waters and any infringement of the International Laws regarding pollution of the sea by oil will be dealt with most severely. Pollution of the sea by dirty ballast water, bilge discharge or any other means will result in heavy fines being imposed, and in severe cases may result in imprisonment or confiscation of the vessel concerned.

2. Vessels must arrive with clean ballast only. There are no facilities for disposal of dirty ballast. It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residue from previous voyages or any other matter that may result in pollution of the sea. Any fines imposed or third party claims shall be for the vessel's account.

3. In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness will illuminate the area around the vessel to the satisfaction of the SBM Mooring Master, in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide suitable floodlights for work on deck during night operations.

4. If evidence of oil appears during deballasting, the vessel will be rejected forthwith and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection or during progress of loading it is revealed that the vessel's tanks are not tight or that oil is leaking from the vessel, the vessel may be rejected or refused further loading. The vessel will not be later accepted for loading, unless satisfactory evidence of repair is submitted, duly certified by "Lloyds", "ABS", or other recognised surveyors. Any vessel rejected because of dirty ballast or sea pollution will automatically nullify her "Notice of Readiness" and will lose any priority of position for loading. SBM at its sole discretion may suspend, delay or unberth any vessel which is under suspicion of oil pollution. The Companies will not be liable for any demurrage, loss claims or demands resulting from such suspension, delay or unberthing.

5. Vessel should have segregated ballast facilities and be capable of maintaining a minimum of 30% draft at all times and be capable of discharging clean ballast in accordance with MARPOL either concurrent with loading or separately.

6. If the vessel cannot comply with the above conditions then it should arrive at the terminal at least 30% laden with cargo.

7. All spillage of oil must be reported immediately to the SBM Terminal Superintendent and a detailed report must be written, signed and submitted by the Master of the lifting vessel concerned.

DENSITY: 1025.

SURVEYORS: Watson Gray and Caleb Brett available from Port Harcourt.

WATCHMEN: The Terminal Regulations stipulates the shuttle tanker is to have not less than 1 deck officer and 3 seamen on duty and available at all times. One of the seamen shall also keep watch at the bow to avoid shuttle tanker contact with FPSO IV (Antan Terminal).

WEATHER: The navigator is referred to published sailing instructions for this area for information on winds, tides and currents, viz: United States Hydrographic Office Publications 121 and 123, "Sailing Directions for the South Atlantic Ocean" and "Sailing Directions for the South West Coast of Africa" published by the U.S. Government Printing Offices Washington D.C. British Admiralty: Africa Pilot Vol. 1, Published by the Hydrographer of the Navy London.

Tides: The maximum range of tide in this area is about 6.5 ft.

Currents: The general set of current in the area is Eastward except during the Harmattan season, from November to February, when it is Westward. Within depths of 50 ft. or 60 ft. the current is irregular with many eddies. Outside those depths the speed of the current is about half a knot.

Winds: The Guinea Monsoon is the prevailing Southwesterly to Westerly wind (average speed 5-10 m.p.h.) which is strongest in the months March through November (average speed 10-20 m.p.h.). During the months of July through September the Guinea Monsoon is strengthened in speed because of the Saharan heat blow. The Guinea Monsoon is moisture laden and causes heavy rainfall in Nigerian area. Waves and swell in the area are mostly Westerly.

Harmattan winds occur intermittently during December-February period. The Harmattan winds are dry and often laden with Saharan dust. They are offshore winds and do not develop waves of significant height.

Waves: Waves are generally from Westerly direction and average about 2 to 4 ft., increasing in height with the stronger Monsoon wind during the months of July through November when the average height is about 4 ft. to 6 ft.

Rainfall: The heaviest average rainfall is in July (442 mm.). During the Harmattan season in January the rainfall averages about 42 mm.

GENERAL: *Charts:* British Admiralty Charts Nos. 1357 and 1860 and U.S. Navy Charts No. 57160 and 57163.

Repairs: Should it be necessary to supply divers, a boat, materials, equipment or labour, to carry out repair work to enable the vessel to continue loading, any costs involved will be charged to the vessel's account at rates to be established at that time. These services will only be provided in emergencies.

Services: There will be no bunkers, no fresh water, no small boat hire, no shore leave, no shore services, and no medical assistance (except in cases of emergency) available at the Terminal. Information on port services in the area should be obtained from the vessel's Agents.

Shore Leave/Repatriation: Crew members cannot leave the vessel at Antan Oil Terminal except in cases of extreme urgency. Even in an emergency it should be noted that Seamen's books may not be valid under the local Government Law. A valid Passport is required. No crew changes will be permitted during the period a vessel is in the terminal area.

Documents: After each tanker lifting, the terminal will prepare all necessary loading documents. Documentation will be finalised on board the lifting vessel as soon as practicable after loading operations are completed.

Visitors: Visitors must obtain a special pass from the SBM Terminal Superintendent at least 48 hours before visiting the terminal. Visitors will be restricted to a minimum due to the hazards involved

OPERATOR: Ashland Oil (Nigeria) Company, P.O.Box 2629, Lagos, Nigeria. *Tel:* 613334, 612657, 614277. *Telex:* 21877, 21103 and 22175, attention General Manager. *FAX:* 616816. *Contact:* The General Manager.

BONNY: 04.26 N. 07.09 E. (Inshore Terminal)
04.11 N. 07.14 E. (Offshore Terminal)

(See Plan)

IMPORTANT NOTICE: The Company, as Operator for the NNPC/Shell Joint Venture, has been directed that the following vessels will not be permitted to enter Nigerian Waters to load Nigerian Crude Oil:

(A) Any vessel which is owned directly or through subsidiaries or chartered or managed by Companies or Persons in South Africa, Namibia or Israel, or is registered in any of these countries.

(B) Any vessel which has called at a port in South Africa, Namibia or Israel during a period of 6 weeks immediately preceding her arrival off any of the Company's Terminals. (A Port Call includes the calling off or near a port for the purpose of receiving services from the shore by helicopter or launch/boat.)

(C) Any vessel which has among its officers, crew, passengers or supernumeraries any person who is a national or resident of South Africa, Namibia or Israel or who has visited any of these countries as evidenced by an entry in that person's passport or other identity document.

Vessels arriving off the Company's Terminals are subject to check by Government Authorities to ensure that the above-mentioned provisions have been adhered to. Any infringement is liable to cause serious consequences for the Master, Manager, Charterer and/or Owner of the vessel.

Vessels lifting crude oil must in addition comply with any other restrictions that may be generally imposed by the Government of the Federal Republic of Nigeria on vessels entering Nigerian Waters for any purpose whatsoever.

DOCUMENTS:

3 Stowaway Lists.
6 Crew Lists.
3 Vaccination Lists.
1 Maritime Declaration of Health.
4 Lists of Last Port of Call (6 weeks).
5 Lists of Birds & Animals.
5 Passenger Lists.
4 Stores Lists.
4 Personal Effects Lists.
5 Arms & Ammunition Lists.
3 Narcotics Lists.
3 Kroo Boy Lists.
1 Clearance Last Port.

Agent: Requires NPA Lights and Buoy Dues form.

PILOTAGE: *Inshore berths:* Pilotage is compulsory. Pilots board off Fairway Buoy; incoming ships must *not* enter Bonny Channel without a Pilot on board.

Offshore berths (SBMs): Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout and acts as Loading Master. On arrival at anchorage contact Berthing Master on VHF Channel 10, call sign "Ocean Berthing Master".

N.B. Also contact Bonny Terminal on Channel 8 on arrival at Offshore anchorage to ensure vessel's arrival, etc. is recorded.

ANCHORAGES: *Inner Berths:* Consult chart.

Outer Berths: 3 miles South of manifold platform in position Lat. 4° 11.2′ N., Long. 7° 14.2′ E.

Vessels must not proceed inshore of this position without a Pilot. When at anchor listening watch must be kept on VHF Channel 8 and this Channel must not be used for inter-ship communication.

RESTRICTIONS: *Inshore berths:* Tide, no night pilotage.

Offshore berths: Worst weather period June – September, when heavy swell may be encountered.

Inshore berths: The maximum draft to which a vessel can load at Bonny is governed by three factors *viz.*

1. Datum Depth in Bonny Channel.
2. Height of the tide.
3. The underkeel clearance allowed.

Datum depth of the Bonny Channel is dependent on the amount of dredging; at present time the Datum depth is 10.2 m. (33 ft. 04in.)

Note: This depth can change and Operators and Charterers of vessels stemmed for the Inshore berths are reminded to ensure that they are in possession of the latest depths which can be obtained on application from their Agents.

Tide is variable but the relevant factor is the height of the tide at the time the vessel will transit the Channel. The underkeel clearance allowed is dependent on the time of the year and is related to the height of the swell expected to be encountered in the Bonny Channel.

The present allowances during the year are as follows:

1/1 to 15/2 = 2 ft. 6 in. – 0.76 m.
16/2 to 15/3 = 2 ft. 9 in. – 0.84 m.
16/3 to 31/3 = 3 ft. 0 in. – 0.91 m.
1/4 to 30/4 = 3 ft. 3 in. – 0.99 m.
1/5 to 15/5 = 3 ft. 6 in. – 1.07 m.
16/5 to 31/5 = 3 ft. 9 in. – 1.14 m.
1/6 to 31/8 = 4 ft. 0 in. – 1.22 m.
1/9 to 15/9 = 3 ft. 0 in. – 1.14 m.
16/9 to 30/9 = 3 ft. 6 in. – 1.07 m.
1/10 to 15/12 = 3 ft. 3 in. – 0.99 m.
16/10 to 31/10 = 3 ft. 0 in. – 0.91 m.
1/11 to 15/12 = 2 ft. 9 in. – 0.84 m.
16/12 to 31/12 = 2 ft. 6 in. – 0.76 m.

Thus it can be seen that the maximum draft at any particular time is equal to:

Datum Depth plus Height of Tide minus Underkeel Clearance Allowance.

A typical calculation would be as follows:

		ft.	in.
Datum Depth	=	33	4
Height of Tide	=	+ 7	0
Underkeel		40	4
Clearance Allowance		– 3	9
Max. Draft	=	36	7

HEALTH: "Q" flag to be shown on arrival, except if from another Nigerian port, yellow fever inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisable. Valid Yellow Fever Certificates to be produced for all crew members. Also Derat Exemption Certificate.

RADIO: ETA messages of tankers, which are to load at Bonny (inshore and offshore), are to report their ETA direct to Shell Lagos Telex No. 21235 Attention: MRCL, 72 hours before arrival, using Satcom when available on board. Experience has shown that this system improves communications considerably. 48 hours before arrival at the Fairway Buoy a further ETA message should be sent to Lagos Agents. When approaching or anchored at the Fairway Buoy vessels should contact Bonny Terminal on Channel 8 and Bonny Harbour Master on Channel 14 when bound for the Bonny Inshore Berths passing date and time of arrival, thereafter keeping watch on VHF Channels 8 and 16. Failure to comply with the requirements for ETA messages may result in delays in berthing the ship.

ETA by Radio for all Ships: In view of communication difficulties with our terminals at Bonny and Forcados and in order to avoid undue delays, in addition to normal W/T advices to Agents and Shell Lagos we wish to inform you about the possibility of passing to us your ETA via M.V. "Oil Maintainer", call sign GYEU.

The "Oil Maintainer" (Golf Yankee Echo Uniform) keeps a daily listening watch on R/T on following frequencies and times:

From 1600 to 1620 hrs. local time 16587.1 kHz (Tx/Rx)
From 1620 to 1640 hrs. local time 12435.4 kHz (Tx/Rx)
From 1640 to 1700 hrs. local time 8294.2 kHz (Tx/Rx)

Please advise 72 hours before arrival Bonny:

1. Vessel's Name.
2. ETA.
3. To load .... tons .... grade.
4. Last Port.
5. First Nigerian port to load.
6. Any other Nigerian ports to load.
7. Name of Shipping Agency.
8. Next discharge port.

The "Oil Maintainer" will acknowledge only, and further calls are not required unless ETA changes by 2 hours or more.

VHF: NPA Bonny Harbour Master – Channels 14 and 16. Bonny Terminal – Channels 8, 16 and 10.

Special Regulations: It is essential for ships proceeding to inshore berths to pass time of arrival on VHF Channel 14 as soon as possible on arrival off Fairway Buoy.

Also see "Radio".

Shipmaster's Report: 1987.

The following are alterations to VHF Channels at Bonny Offshore Terminal.

Channel 10 – Bonny Offshore Terminal and Bonny Offshore Pilot.
Channel 8 – Shell Bonny.
Channel 14 – Bonny Signal Station.

Bonny Signal Station must be called before arrival/departure giving all usual information on ship's particulars, cargo information required when loaded, voyage details, etc.

DEADFREIGHT: Due to draft limitation at Bonny Inshore, Deadfreight applies (when necessary). This means that the Terminal will obtain approval from the Minister of Petroleum and Energy for the Deadfreight.

Also see "General".

MAX. SIZE: *Inshore Terminal:* Min. size approximately 18,000 tonnes SDWT or 161 m. (530 ft.) LOA. Max. length 320 m. (1,050 ft.). Max. beam no restriction. Max. SDWT – 135,000 tonnes, subject to review during wet season, i.e. May to October. Max. draft, see "Restrictions", draft may be reduced due to silting (mud and sand shifting, caused by current).

Offshore Terminal: Min. SDWT 45,000 tonnes. Max. SDWT 320,000 tonnes. Max. length no restriction. Max. beam no restriction. Max. draft 22.8 m. (75 ft.).

Also see "Port Harcourt" – "Report".

TUGS: None available.

BERTHING: *Inshore Terminal:* There are 3 berths (CBMs) designated A, B and C, from upstream. A and C consisting of 5 buoys (1 astern, 1 on each quarter, 1 ahead and 1 on the inshore bow). A and C are flood tide berths. B is ebb and flood tide berth consisting of 6 buoys, the 6th buoy is on the offshore bow or quarter depending on which direction the ship is berthed.

Tankers berth on the flood tide (or ebb at berth B) using the offshore ship's anchor as an additional mooring point. Ships moor by means of 40 mm. wires (provided by the Terminal). One 40 mm. wire is picked up from each of the buoys and ship's ropes are not normally used. Mooring is carried out by ship's crew; and care must be taken to ensure that the mooring wires are laid out in a seamanlike manner to prevent the formation of runs and kinks. Mooring wires must not be kept on tension winches, but stoppered off by means of Carpenter's stoppers provided by the Terminal, and then "turned up" on the bitts. Two men from the Terminal are put on board the vessel to assist the ship's crew to position and set up the Carpenter's stoppers.

Vessels must be equipped with hose handling derricks with a SWL of not less than 5 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny. Slops cannot be accepted ashore. Maximum loading rate: 5,000 t.p.h.

Grades handled: both light and medium crudes.

Offshore Terminal: 2 SBMs fitted with 2 OCIMF standard 15 in. nylon moorings and 1 hose string terminating in 2×16 in. diameter end hoses.

No. 1 SBM is S.S.W. of the Platform. No. 2 SBM is S.S.E. of the Platform and they are designated Bonny West and Bonny East respectively.

Berthing effected under guidance of Berthing Master and assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to re-align vessel.

Vessels must be equipped with hose handling derricks with a capacity of not less than 10 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny. Slops cannot be accepted ashore. Max. loading rate: 6,000 t.p.h. Grades handled: Bonny light crude.

HOSES: *Inshore Terminal:* (Amidships). Vessels should endeavour to present 2×12 in. diameter 150 ASA connections on the port side of the vessel when berthing at A and C berths. On B berth 2×12 in. 150 ASA connections should be provided on the port or starboard sides of the vessel – dependent on whether the vessel is berthing on ebb or flood tides. Vessel's hose handling derrick to be rigged and plumbed overside. Hoses will be connected by shore labour, but winchmen must be supplied to operate the ship's lifting gear. The derrick runner must be equipped with a suitable hook. The estimated weight of each hose string at berths A and C, when lifting with the ship in light condition is between 3 tonnes and 5 tonnes. Ships fitted with only 5 tonne derricks should exercise care when lifting to avoid shock loads. On "B" the estimated lifting weight is between 5 tons and 7 tons.

Weight of Hoses: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil S.G. 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker *d.w.t.*	*12 in. I.D. Hoses* *tonnes*
100,000	5.1
70,000	4.9
50,000	4.7
35,000	4.5
18,000	4.2

Offshore Terminal: Port or starboard side amidships (dependent on which SBM is used). Vessels should endeavour to present 2×16 in. standard 150 ASA connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick SWL at least 10 tonnes must be rigged ready on both port and starboard sides and plumbed clear of the side. Derrick runner must be equipped with suitable hook.

Weight of Hoses: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil S.G. 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker *d.w.t.*	*16 in. I.D. Hoses* *tonnes*
500,000	11.4
330,000	9.4
270,000	9.1
200,000	8.7
100,000	7.5
70,000	7.1

SHORE LINE SYSTEM: *Inshore Terminal:* Crude oil is loaded at berths A and C via 32 in. submarine lines and 2 strings of flexible hoses consisting of 6 lengths of 12 in. hose and 5 lengths of 12 in. hose respectively.

At Berth B, loading is via a 28 in. submarine line and 2 strings of 12 in. flexible hose, each consisting of 7 hose lengths. Reducers are made available by the Terminal on request.

Offshore Terminal: Vessels load through SBM from shore through a 48 in. diameter line, thence through a 24 in. diameter floating hose which is terminated by a "Y" piece and two 16 in. diameter hose tails which connect to the ship's manifold. Loading rates up to 6,000 t.p.h. may be expected. The 48 in. submarine loading line from the Terminal is some 20 miles in length, therefore great care must be exercised during loading when ship's valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ship's manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

BALLAST: No facilities for dirty ballast, no tank cleaning facilities.

MEDICAL: Hospital at Bonny.

DENSITY: *Inshore Terminal:* 1020 at HW. 1015 at LW during rainy season.

Offshore Terminal: Salt.

FRESH WATER: Available by barge at rate of 15 t.p.h. 48 hours' advance notice required as barge comes from Port Harcourt.

FUEL: Available only by barge from Port Harcourt.

CONSULS: Nil.

REPAIRS: Nil. See "General".

WATCHMEN: Whilst berthed at the SBM a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness, to raise the alarm and advise the Berthing Master on the approach of local small craft. Instances have occured at Nigerian offshore terminals where a nylon mooring rope has been cut and stolen with the vessel in the berth. The Berthing Master should also be advised in the event that the vessel rides up to the SBM. Also see "Notice" and "Piracy".

CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 bottle of wine or 1 bottle of spirits per officer per 7 days.

REPATRIATION: Possible via Port Harcourt and Lagos.

AIRPORT: 28 miles by river, to Port Harcourt, then 30 km. by road, flights twice daily to Lagos, 5 international flights per week to London, Rome and Amsterdam.

TIME: GMT plus 1 hour, no change.

POLICE/AMBULANCE/FIRE: Contact via Harbour Master, or Shell on VHF Channel 8.

SHORE LEAVE: Not permitted.

IDENTIFICATION CARDS: Crew to carry Passport or Seaman's Book whilst ashore.

GENERAL: Accommodation ladder must be rigged – used in conjunction with pilot ladder at offshore terminal – and for direct access in inshore terminal.

Limited medical assistance available but in extreme emergencies only. Treatment of minor ailments and vaccinations, etc. is under no circumstances available. It may be possible in the event of an accident to obtain medical advice.

Pollution of the sea by dirty ballast, bilge discharge or any other means will result in heavy fines, or in severe cases, imprisonment.

Any attempt on the part of the boarding officers to persuade the Master to supply more than normal representation should be resisted. In the event of any problem arising over such a matter full details should be *reported to the Agent.*

Nigerian flag to be flown.

Air letter forms are not acceptable unless with Nigerian stamps.

Delays: Inshore berths: None if the channel buoys are lit. Otherwise, only daylight pilotage.

Offshore berths: Worst weather period June–September when heavy swell may be encountered.

Immobilisation of engines: Not permitted at the inshore berths. Not permitted at SBMs. Not advised at sea anchorage due to indifferent holding ground and the existence of obstructions and foul ground in the vicinity.

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as the Company can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ship's personnel. However, as further guidance and in absence of any instructions to the contrary, ships are accepted by the Company on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during loading operations and is provided with walkie-talkie radio to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Company's Tanker Port Performance Time Sheet by ship and shore personnel. Only crude oil is handled at Company's terminals, loading temperatures and specific gravities of the two grades of crude, Bonny Light and Bonny Medium are reasonably constant and are approximately:

Bonny Light	0.8365 at loading temperature
Bonny Medium	0.9044 at loading temperature

Early Departure Procedure: There is no Early Departure Procedure at either Bonny Inshore or Offshore Terminals.

Documents are brought to the ship for signature after completion at loading.

Customs and Agency representatives will normally board vessels before commencement of loading. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials.

NOTICE: *Special Notice to all Masters:*

There have been recent cases of serious theft from vessels in the Port of Bonny. It appears that the intruders who invariably gain access to the vessel via the anchor hawse pipe have on occasions been armed.

In your own interest we would advise you to arrange to have a strong jet of water running down the hawsepipe of the anchor in use. The other anchor should be stowed in the pipe and not left hanging off. In addition, you should implement the normal standard precautions of augmenting deck watches and arranging over-board floodlights where possible. Jets of water around the stern will also deter intruders from gaining access by other means.

All the assaults on ships have been made from canoes; therefore we suggest that traders and other persons in canoes be discouraged from coming close to your vessel.

Should unauthorised persons gain access to your vessel, instruct Shell Company Radio Operator to contact the terminal who in turn will contact the local police. Also see "Piracy".

PIRACY: February 1986: An act of piracy took place at Bonny Offshore in February 1986. About 8-10 pirates were involved, they boarded the vessel via the hawse pipe. A seaman was bound hand and foot and guarded while the other pirates went to the ship's stores. It is suggested that Shipowners and Operators urge their ships' crews to take extra care when in this vicinity.

April 1987: Vessel attacked by 6 pirates at night whilst waiting to load.

August 1987: A vessel lying 15 miles South of Bonny Fairway Buoy was boarded by 30 armed men who attacked and seriously injured 2 crewmen and made off with some walkie talkies and the hawsers.

February 1988: Whilst waiting at anchor at Bonny River Fairway Buoy to proceed to Port Harcourt, vessel was boarded by a gang of about 10 pirates who broke the locks/chains to the Fore Peak strong room. The gang left the vessel when discovered by the vessel's watchmen who sounded the ship's whistle and flashed the searchlights.

Notice issued by N.P.A. at Port Harcourt:

Sea Piracy at Bonny Fairway Buoy: While the Nigerian Navy is geared to combat the ugly situation of piracy on board deep sea vessels anchored offshore of Bonny awaiting berth, it is recommended that the Masters of such vessels should screen all the visitors accompanying Customs/Immigration and Security Agents and unscrupulous men be kept out of the vessels.

As a precaution against undesirables having easy access to the vessels, it is also recommended that the Pilot ladder is hoisted back aboard the vessel after use and not left hanging over the ship's side.

SHIPMASTER'S REPORT: January 1983.

Pilot on arrival and departure requires 4 copies NPA Master's Declaration.

Immigration liable to check all Discharge Books.

Health Doctor liable to check all vaccination dates in books.

Shore boat keeps a constant check on ballast discharge.

According to Customs no 'Ladies' are allowed to visit and if any found on board then Customs are liable to rummage vessel.

There was no night navigation in channel as buoys were unlit.

Vessels normally unberth at half tide and if waiting for daylight channel navigation, will anchor in the Prohibited Anchorage Area off berths.

SHIPMASTER'S REPORT: November 1983 (Updated 1990).

Documents: Also required:

3 copies Kroo Boy List (People under 18 years.)

3 copies Currency List.

Pilotage: Inshore Terminals: In nearly all cases pilots request Masters' of vessels to proceed to Buoy No. 29. However, in cases where Masters are not familiar with the Bonny Channel, pilots will still board at the Fairway Buoy when requested to do so.

Pilots also advise Masters of vessels regarding the situation of the buoys in the Bonny Channel (missing, not in position, un-lit, etc.).

SHIPMASTER'S REPORT: February 1990.

Vessel which is a 40,000 tonnes deadweight tanker loaded in Bonny, Nigeria, during the last week of February. My orders were to load a maximum cargo consistent with high water sailing draft, of low pour low sulphur fuel oil.

On the run into Bonny, the Brass Oil Terminal gas line flare was clearly seen at night at over 13 miles (BA Chart No. 1863), approximate position Lat. 03° 56′ N., Long. 06° 24′ E., as was the Bonny gas line flare in approximate position Lat. 04° 16′ N., Long. 07° 19′ E. There was no Racon observed in operation at Bonny Offshore Terminal. The Fairway Buoy was observed in approximate position Lat. 04° 13′ N., Long. 07° 01′ E. (BA Chart No. 3287) and later noted to be unlit, anchorage South of the buoy is spacious in greater than 10 fathoms. This anchorage position will place a vessel over 10 miles off the coast, but this is no protection from Bonny River pirates. A few days before our arrival a vessel was attacked in this very anchorage by a canoe – full of assumed locals but were beaten off by the crew with the help of parachute flares and line throwing guns during a battle which lasted for an hour. After reporting in, the ship's agent was contacted and I was advised to go out at night to 30 miles off the coast. This was done and the vessel drifted during the night with an alert 3 man deckwatch plus bridge officer. No incident occurred and vessel re-anchored at dawn off the Fairway Buoy. Some ships appeared to leave the anchorage at night. We berthed port side to alongside anchored storage tanker "Tuma" (130,000 d.w.t.) in approximate position Lat. 04° 25′ N., Long. 07° 08′ E. The "Tuma" has Yokohama type fenders and berthing was routine.

Two flexible hoses of 10 in. and 8 in. were used to load and the rate was about 1,700 tonnes p.h. Specific gravity 0.9507 at 15° C. and loading temperature around 42° C.

Unfortunately "Tuma" developed problems so we anchored at Bonny Town where loading was completed by "Tuma's" replenishment tanker "Delfi". Bunkers were taken ex-barge whilst at anchor and fresh water is also available here but not at the Fairway Buoy Anchorage. There was a lot of small boat traffic in the river and a deck watch was kept and hawse pipes were securely blocked. Plentiful supplies of local fruit can be bartered for from the canoes and this was taken advantage of (bananas, pineapples, papayas, coconuts, etc. were fresh and of good quality).

During loading the ship is assigned a Cargo Co-ordinator who proved to be extremely helpful and was able to provide or would find out all necessary information required. In other words he did co-ordinate loading operations and he also does the cargo papers. Surveyors were SGS. One bit of information which was not forthcoming was the maximum draft I was allowed to exit the channel, which is dredged to 36 ft. The tidal prediction for my sailing day was 2.4 m. or 2.5 m. and the density at the anchorage was observed to be 1018. Cargo was arbitrarily stopped by "Delfi" and vessel sailed drawing 11.7 m. even keel at 1018 density. Least depth observed under the keel when transiting the channel was never less than 2.5 m. (slightly more than 46 ft. total).

The following buoys were missing on departure – Nos. 24, 21, 17, 12, 11, 10, 9, 8, 7, 3 and 2. No lighthouses were lit at night.

Entry and boarding officials: Fairly efficient and fairly routine, make sure that you have "Nil Declarations" for everything you don't have, such as animals, mail, stowaways, arms and ammunition, passengers and "Boat People". The usual "presents" were requested but denied. The government is trying to crack down and there are jingles on the local radio station.

AUTHORITY: Nigerian Ports Authority.

Operator: The Shell Petroleum Development Company of Nigeria Ltd., Freeman House, 21-22 Marina, Private Mail Bag 2418, Lagos, Nigeria. *Tel:* 601600 (17 lines), 601820 (9 lines). *Telex:* 21235. *Cables:* "Shell, Lagos". *Contact:* M.P.J. Hage, Marine Co-ordinator.

BRASS TERMINAL: 04.04 N. 06.17 E. (See Plan)

LOCATION: Brass Terminal is an open mooring located 13.5 miles off the South Nigerian coast at: Lat. 4° 04′ N., Long. 6° 17′ 10″ E.

Chart of the area is BA 1863.

Brass Terminal operates on a 24 hours, seven days a week basis, including public holidays.

PORT LIMITS: The limit within which a vessel is considered arrived and to be within operational waters is 3 miles seaward of the BOP.

FLAG: All vessels are required to fly the Nigerian Flag on the foremast during daylight hours.

GENERAL:

Description: Brass Terminal consists of 2 SBMs. These buoys serve as a single mooring point for a tanker and enables it to freely rotate a full 360° angle while handling cargo. Each ground mooring consists of 6 sets of radial chains, each set is attached to an anchor pile. The 6 mooring legs are made of 3.25 in. diameter chain. Water depth is approximately 90 ft. Two strings of floating hoses connect each buoy with the header at the end of the sea line. The system is built to provide a safe mooring for tankers up to 300,000 d.w.t. under the following environmental conditions:

(a) Max. wind speed of 30 knots and max. significant wave height of 9 ft.

(b) Max. wind speed of 20 knots and max. significant wave height of 10 ft.

(c) Max. wind speed of 10 knots and max. significant wave height of 11 ft.

However maximum overall length should be 1,200 ft., and the minimum 720 ft.

Signals: Each single buoy is equipped with:

Radio Beacon – Racon (the ship's radar must operate at X band 3 cm., 9300 to 9500 MHz and with horizontally polarized radiation. The controls for radar gain, sea clutter and differentiator FTC should be set at normal position).

NOTICE OF READINESS: Notice of Readiness will be tendered on arrival provided that vessel is ready to load in all respects and after Free Pratique has been granted. Lay time will commence 6 hours after acceptance of Notice of Readiness for vessels arriving within agreed ETA range or when loading commences whichever is earlier.

PILOTAGE: The Mooring Master will board the tanker in the anchorage area and all manoeuvring of ships within the Terminal area shall be done only in accordance with advice of the Mooring Master subject to the understanding that in all cases and circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety and proper manoeuvring of the vessel and possible damage to the Terminal or service boats.

The Berthing Master and 3 local assistants remain on board throughout loading operations and accommodation to be provided.

DOCUMENTS: To be submitted on arrival:

Maritime Declaration of Health
4 copies Vaccination List
8 copies Arrival Crew List
6 copies port of call list —for the past 6 weeks or 3 previous ports with dates of Arrivals/Departures)
6 copies Passenger List
6 copies Animal or Livestock List
6 copies Arms and Ammunitions List
4 copies Stores List
4 copies Crew Declaration List signed by all crew members
Customs Clearance for last Port of Call.

The Naval Office in charge of the task force on crude oil liftings at Brass Terminal has advised that all tankers calling at Brass from other Nigerian Ports must obtain, in addition to the normal Customs Clearance, a Health Clearance Certificate from the first Port of Call.

ANCHORAGE: Vessels awaiting the Mooring Master should anchor in a position approximately 2.5 miles N.E. of the terminal. Depth of anchorage area range from 15 fathoms to 16 fathoms. Holding ground is fairly good.

Un-nominated Vessels: Tankers arriving at the terminal un-nominated, that is, not yet formally programmed to load at Brass River for that current month or vessels standing-by awaiting instructions from Owners/ Charterers or under-going repairs are advised to anchor outside the terminal operational waters as given in "Port Limits".

APPROACHES: *Agbara Field:* One drilling Platform, has been installed in position 03° 56.5′ N., 06° 23.8′ E. (about 10.12 miles S.E. of the NAOC BOP). This structure is equipped with necessary navigational aids including warning lights and fog horn.

HEALTH: Masters are advised, for avoidance of delays, to have valid cholera and yellow fever papers before departure last port of call. However, medical and health requirements are to be included in notices of ETA transmitted to Agents. Such information is also to be confirmed by VHF Radio immediately on arrival to the port.

RADIO: VHF radio telephone Channel 16 (156.8 MHz) is in use 24 hours a day as a stand-by Channel. A not too busy Channel (6, 8, 10, 12 or 14) will be used as working channel by the Marine Office/ Berthing Master acting as Loading Master during Mooring/Loading operations. They are provided with walkie talkie radios to ensure adequate ship/shore communications.

Cablegrammes: Cables to Brass Terminal may be sent to LAGOS RADIO and addressed to AGIPOIL LAGOS and FREIGHT LAGOS.

Acceptance Procedures: The following vessels are not permitted to enter Nigerian territorial waters:

(a) Any vessel which is owned directly or through subsidiaries or chartered or managed by companies or persons in South Africa, Namibia or Israel, or is registered in any of these countries.

(b) Any vessel which has called at a port in South Africa, Namibia or Israel during a period of 6 weeks immediately proceeding her arrival off any of the Nigerian Terminals (a port call includes the calling off or near a port for the purpose of receiving services from the shore by helicopter or launch boat).

(c) Any vessel which has as officers, crew, passengers or supernumeries who are nationals or residents of South Africa, Namibia and Israel.

All vessels must give the Company at least 5 days' notice of arrival at Brass; this ETA to be updated 72, 48 and 24 hours prior to arrival by cablegramme sent via Lagos Radio and addressed to: AGIPOIL LAGOS and FREIGHT LAGOS.

The messages should specify cargo requirement, ANSI diameter of flanges used for loading connections, safe working load of port derrick, advise whether a Smit's towing bracket is available, last port of call and final (discharging) port, sickness on board if any.

Vessels should contact the Brass Marine Office by VHF as soon as possible.

Upon arrival of vessel off the Terminal, Government Authorities shall check to ensure that the above mentioned provisions, set in points (a), (b) and (c), have been adhered to. Any infringement of said provisions may have serious consequences for the Master, Owner or Charterer of the vessel.

Shipping Agents: The only Shipping Agent – Alraine Agency, operating in the port for and on behalf of other shipping Agents has been provided with marine VHF Radio set. Masters of vessels when within range can contact the Agent on Channel 16. Advance report of ETA to the port must be made available to the Agent through their office in Lagos: Mail address – 26 Creek Road, Apapa., P.O.Box 2206, LAGOS; Telex 21244 and 22330; Freight – Lagos.

BERTHING:

Mooring: *Fore:* Each single buoy mooring is equipped with a mooring line system. The chain is fitted with a special open link which can be used if the vessel is equipped with Smit's bracket.

Aft: Whilst berthed, mooring rope must be ready on the poop deck so that the mooring launch (line boat) may in the event of the vessel riding up on the SBM make fast and tow to realign vessel. Whilst berthed at an SBM a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness to raise the alarm and advise the Berthing Master on the approach of any local small craft.

Instances have occurred at Nigerian offshore Terminals where a nylon mooring rope has been cut and stolen with the vessel in the berth.

LOADING: The line boat will tow the end of the floating hoses to the point below the tanker's port cargo manifold. The safe working load of the tanker's port derrick should be at least 7 tons.

Loading Operations can commence only after the Loading Permit is issued by the Custom Authorities, NNPC inspectorate and Navy Commander.

Ships are requested to load cargo as rapidly as possible by day and night in accordance with the terms of their Charter Party.

Ships are expected and nominations of vessels are accepted by NAOC on the understanding that ships will be able to accept a bulk loading rate per hour of not less than 10% of the Summer d.w.t. of the vessel or at the optimum terminal loading rate, whichever is lower.

It is extremely dangerous to close ship's valves against the oil stream as such operation may create excessive pressure in terminal piping and hoses.

Should damage result from failure to observe this precaution the Master of the vessel will be held responsible.

During the loading operations the following signals shall be displayed:

International Code Flag "B" during daylight. By night a red light, visible all round the horizon at a distance of at least 2 miles.

Brass Blend crude oil loading temperature is reasonably constant as well as API gravity at approximately:

Brass Blend 85°F 40.00 API R.V.P. 10.00 (approx.)

The approximate loading rate is 5,000 t.p.h.

Also see "General" before first port.

POLLUTION: Pollution of rivers and beaches by oil is a serious matter. The Mooring Master shall inspect tanker's ballast so that there will be no chance of even a small amount of pollution when the ballast is pumped out, thereby lessening any possibility of infringement of the pollution restrictions envisaged by Nigerian law.

Pollution of the sea by dirty ballast, bilge discharge or any other means will result in heavy fines or in severe cases, imprisonment.

MEDICAL: Although medical assistance is normally not available locally, Agency will provide medical assistance to the tankers' personnel when required in advance. In case of emergency the Terminal medical facilities will be at tanker's disposal.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: There are no facilities available in the Terminal for vessel repairs. However, in case of necessity contact Agent.

REPATRIATION: Permitted only in cases of emergency and only if the person concerned holds the necessary documents, i.e. Yellow Fever Certificates.

MAIL: Ship's mail and personal mail will be handed through vessel's Agent.

SAFETY:

Smoking, lighters, matches: Smoking is prohibited on board during loading operations except those areas in the accommodation jointly agreed to by the Master and the Terminal Representative. Personnel on board the vessel other than in the accepted areas, must not carry lighters or matches.

Portable equipment: Any electrical equipment which is not wholly within an approved explosion proof container, an approved air pressurised container or any equipment which is not intrinsically safe, must be disconnected from the power supply.

Hand Torches: Only those hand torches provided with a Certificate of Approval delivered by a recognised authority are allowed.

Radio transmitters, radar: The main transmitting aerials must be grounded. VHF apparatus are allowed provided their output power is not higher than one watt.

Portable radio transmitter must be of approved type for safe operation in flammable gas areas.

Radar must be switched off.

Doors and portholes: Amidship doors and portholes are to be kept closed during loading operations except for entering or leaving accommodation.

Doors and portholes on the fore-end of the after accommodation must be kept closed.

Access to the after accommodation may be from the stern or from the side doors.

Air conditioning: Central air-conditioning is allowed but air intakes must be shut off and full circulation must be adopted.

All window type coolers must be disconnected unless the units are safe to operate in flammable gas areas (as certified by a recognized authority).

Ventilators: Should any doubt arise that flammable gases may enter the area, ventilators must be completely closed.

Galley: Gas, oil or coal fires are prohibited. Only approved flame-proof electrical equipment or steam heated galleys are permitted.

Lights: During loading operations vapour-proof electric lights only are allowed.

Moored vessels discharging ballast or loading cargo during period of darkness will brilliantly illuminate the sea around the ship so that any pollution can be readily observed.

Cargo and unused connections: A deck officer is also requested to inspect cargo connections and hoses to ensure that they are in good condition.

All unused connections must be blanked.

Cargo tanks: All tank lids are to be kept closed. The method of venting requested by the terminal is the closed system.

Should the ship not be equipped with the closed venting system, tank portholes will be opened for intermittent periods but such portholes will be protected with flame arresters.

Main engines: The ship's engines must remain ready for immediate use in case of emergency. Therefore no engine repairs or overhauling are allowed.

Boilers: Blowing of boiler tubes is forbidden whilst moored.

Vessel maintenance: During the time a vessel is moored at Brass Terminal, use of tools which may cause sparks or fire is forbidden in dangerous areas.

Fire fighting: The Master of the vessel must keep a continuous fire watch during loading operations. All fire equipment must remain ready for immediate use.

Unsafe operations: The Master of the vessel will remain solely responsible for damage of any sort that may occur and which is due in whole or in part to infringement of aforesaid safety regulations.

Lifebuoys: Lifebuoys should be available in loading manifold area and at the entry and exit from ship, e.g. at the pilot ladder.

Scuppers: All scuppers must be plugged with leak-proof plugs, and remain plugged until all hoses are disconnected.

WEATHER: *Climate:* The weather is generally fine from November to April, but it is unfavourable during the remaining period of the year owing to the high humidity degree. The temperature varies comparatively little from 70° F to 100° F and averages over 80° F.

Winds: Most winds are from South-Westerly direction with a normal speed range 5 to 18 knots.

Tides: The tidal mean range is 4.6 ft. Main values (referred to chart datum) are as follows:

Mean LW spring level	0.2 ft.
Mean HW spring level	6.1 ft.
Lowest LW level	−0.6 ft.
Highest HW level	7.1 ft.

Currents: Maximum total strength of the current (tidal + density + wind drift) is about three knots.

Direction: North-North Westerly for approximately 75% of the year, South-South Easterly for the remainder. The currents often reverse direction very quickly causing the tanker to swing heavily at the buoy.

SHORE LEAVE: Crew members cannot leave the vessel at Brass except in cases of emergency.

SHIPMASTER'S REPORT: 1976.

Documents:

1 Maritime Declaration of Health.
2 Vaccinations Lists.
6 Crew Lists.
4 Passengers Lists.
2 Stores Lists.
2 Personal Effects Lists.
4 Arms and Ammunitions Declarations.
4 Lists of Animals and Birds.
4 Lists of Ports of Call (last 6 weeks).
Clearance from last port.

Approaches: Coast line is well defined on high definition radar at a distance of 12 miles to 15 miles and sounding machine will assist efficiently while approaching.

Terminal consists of a central platform showing 2 flashing lights (one red and one white) – letter "U".

Two SBMs: No. 1 situated 1 mile East of the platform is equipped with a Racon (letter "A"). No. 2 situated 1 mile West of the platform.

Pilotage: Berthing Master will board the vessel 2.5 miles North East of the platform. Contact "Brass Terminal" on VHF Channel 16 for berthing instructions and immediately on anchoring to ensure that vessel's arrival is recorded.

Anchorage: 2.5 miles N.E. of the platform.

Restrictions: Vessels berth in daylight hours only.

Max. Size: About 250,000 d.w.t.

Pratique: Agent, Health and Customs Officers board at same time as Berthing Master.

Radio: ETA to be given via Lagos Radio, 120, 72, 48 and 24 hours before arrival at the Terminal anchorage.

Tugs: None available.

Berthing: Effected under the guidance of Berthing Master assisted by a party of 4 Nigerian people and ship's crew.

Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch, in the event of the vessel riding up on the SBM, may make fast and tow to realign the vessel.

Each SBM is fitted with 2 nylon mooring ropes connected on a single chain and two hose strings with 16 in. end hoses. Position of hose connection: amidships port side. Vessel should endeavour to present on arrival 2×16 in. connections on port side. A derrick of 7 to 10 tons SWL with a suitable hook must be rigged ready on port side.

Medical: No facilities but assistance may be given on an emergency basis.

Density: About 1025.

Fresh Water: Not available.

Fuel: Not available.

Repatriation: No crew changes possible.

Shore Leave: Not permitted.

General: Crude oil handled is: Light Nigerian Crude API=44.0. Temperature about sea temperature, R.V.P.=10.5. Two of the four Nigerian crew stay on the forecastle head and maintain security watch throughout loading operations. Accommodation must be provided for Berthing Master and 2 men. Accommodation ladder is not required. Pilot ladder or pilot hoist are more suitable because of the swell. Immobilisation of engine is not permitted at SBMs.

Early Departure Procedure: Masters are required to sign all documents in blank. On completion of loading, seals are controlled by customs officer and Agents complete Master's and Consignee's copies of documents whilst ship is disconnecting and leaving berth.

SHIPMASTER'S REPORT: May 1980.

Documents: 5 each of Passengers or Nil passengers, Nil stowaways, Nil distressed seamen, Nil birds and animals, Narcotics List, Ports of Call, Clearance Last Port and 3 copies Deviation Cable.

Customs: All lengths of cloth to be placed under seal.

AUTHORITY: *Operator:* Nigerian AGIP Oil Co. Ltd. Head Office, 9/11 MacCarthy Street, Lagos. P.O.Box 1268, Lagos. *Tel:* 600880/9 (10 lines) *Cables:* Agipoil – Lagos. *Telex:* 21268. *Contact:* Captain G. Palchetti, Marine Superintendent.

District New Base: Mile 4 – Port Harcourt, P.O.Box 923. *Tel:* 300400/20 (21 lines). *Cables:* Agipoil – Port Harcourt.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road, Apapa. P.O.Box 265, Apapa and P.O.Box 2206, Lagos. Tel: 234 1 877 580/873887. Fax: 234 1 874 542. Telex 21244 and 22330. Cables: "Freight Lagos".

BURUTU: 05.21 N. 05.31 E. (See Plan)

No commercial vessels are today using the Port of Burutu. Future developments include the construction of a major ship repair facility with graving dock, capacity 150,000 d.w.t.

CALABAR: (See Plan)
Old Port: 04.58 N. 08.17 E.
New Port: 05.04 N. 08.16 E.

LOCATION: New Calabar Port (Lat. 05° 04′ N., Long. 08° 17′ E.) is situated about 84 km. from the Fairway Buoy in Calabar River going through a well marked channel by 58 buoys (IALA System). The channel is dredged to 8.0 m. chart datum with 150 m. width. Old Port is 74 km. from Fairway Buoy.

DOCUMENTS:

Nigerian Ports Authority:

7 copies of Manifest.
1 SEN (Ship Entry Notice).
  Agent to pay in advance for ship.
  Clearing Agent to pay wharfage and wharfinger.
4 Stowage Plans.
4 Hatch Lists.
3 Hazardous Cargo Lists.
4 Container Lists.
8 Master's Declarations, (4 inward, 4 outward)
5 Passenger Lists.

Customs:

2 Crew Lists.
2 Stores Lists.
  List of Ports of Call.
1 Animals List.
1 Arms and Ammunition List.
1 Passenger List.
1 Crew Personnel Effects List.

Quarantine:

2 Crew List.
1 Inoculation List.
2 Derat Certificates.
1 Clearance from Last Port of Call.
1 Stores List.
  Vaccination Certificates.

PILOTAGE: Compulsory pilotage from anchorage area which is between Buoys No. 24 and 25 (near Parrot Island). Ship calls Calabar Port Control on VHF Channel 16 asking for advice from 0600 – 1800 hrs. Ship will be advised when the Pilot will board her, normally it takes about 1.5 hours for the Pilot to reach the ship. There is a pilot vessel and a pilot cutter flying "H" flag. The vessel is normally allowed to enter after the Agent books a Pilot, and dues are paid,.

ANCHORAGES: The area between Buoys No. 24 and 25 is a good area for anchorage. The depth is about 7.6 m. – 8 m., with 3 – 4 shackles the ship holds well. There is a deeper area called "Parrot Deep" which varies between 10 m. – 11 m. chart datum.

RESTRICTIONS: When a vessel arrives at the Fairway Buoy Lat. 04° 18′ 31.7″ N., Long. 08° 14′ 51.3″ E., which can be passed on either side, the vessel can call "Calabar Port Control" or "Harbour Master's Office" on VHF Channel 16 and if no contact made, vessel may proceed to Parrot Island. No night navigation in channel.

MAX. SIZE: Length 170 m. and draft 7.6 m. at HW. Old Port: LOA – 170 m.

RADIO/VHF: No radio service in Calabar at present. "Port Control" operates from 0600 – 1800 hrs. on VHF Channel 16. Steps are in hand to extend the service for 24 hours and to establish S.S.B. 2182 kHz.

RADAR: No radar service.

TUGS: 4 small tugs of 240 h.p. 1 manoeuvring tug of 2,400 h.p. Ship's lines to be used if towing, at a charge.

STEVEDORES: Supplied on request of Agent round the clock if required.

MEDICAL: Port Authority clinic and Government Hospitals. Swiss Air Ambulance also available for repatriation.

BERTHING: Old Port:

Ashland Oil Co. – Mellerio Wharf (Private): Length 51 m., max. draft 8 m. Can accommodate vessels up to 150 m. LOA.

Ashland Oil Co. – Jackson Wharf (Private): Length 27 m., max. draft 8 m. Can accommodate vessels up to 100 m. LOA.

Calcemco Wharf (Private): Jetty 75 m. but the depth is affected at the moment, and draft is restricted to 4 m. Can accommodate vessels up to 160 m. LOA.

MacIver Jetty (Private): 55 m. long, max. draft 5.5 m. Used by lighters.

New Port: Length of berth 860 m., can accommodate 4 – 5 vessels of 150 m. LOA with a depth alongside of 9 m. Distance between bollards 30 m.

Pool: 11 mooring buoys can accommodate 10 vessels, length between buoys varies from 220 m. to 130 m.

CARGO FACILITIES: 3 transit sheds, each 175 m. long by 40 m. wide. 2 warehouses of the same dimensions, fire station, fully equipped with up-to-date fire fighting appliances.

Cargo Equipment: 19 forklift trucks, 3 – 6 tons capacity. 6 mobile cranes, 25 tons capacity. 20 trailers of 40 – 60 tons capacity. 6 Mafi tractors. 3 freight lifters of 25 tonnes and 6 freight lifters of 13 tonnes. 6 Portal cranes 10 – 25 tons capacity. 2 tower cranes 36 tons capacity.

Modern Gear Store with new cargo handling gear including spreaders and wires for 20 ft. containers plus lorry and lifting gear. (Note: Shipping Companies should provide their own gear for heavy lifts and 40 ft. containers).

Barges and Pontoons: There are a number of barges and pontoons for seaward-side or mid-stream discharge – tonnages vary between 60 tons and 500 tons.

Container Areas:

A.	Pack I	5,500 sq.m.
B.	Pack II	4,000 sq.m.
C.	Pack III	4,000 sq.m. for empty containers only.

FRESH WATER: Can be supplied in the New Harbour. (2 water tanks, 2,400 litres each).

FUEL: Diesel oil can be supplied by motor tankers (30 tons each).

REPAIRS: Deck and engine repairs can be carried out. Under water repairs can be carried out on vessels not exceeding the following dimensions: Length 62.5 m., breadth 12.5 m. and draft 1.5 m.

DRY DOCKS: Graving dock available. Size: Length 62.5 m., breadth 12.5 m., draft 1.5 m.

Slipway: Capable of taking vessels up to 25 tons.

SURVEYORS: Lloyd's and Bureau Veritas are available.

WATCHMEN: Security men are compulsory and supplied by the Agent.

OPENING/CLOSING HATCHES: By crew.

REPATRIATION: A good air link from Calabar International Airport to different places in the world via Lagos, Douala and Libreville.

POLICE/AMBULANCE/FIRE: Ambulance: Contact Harbour Master. Fire: Port Fire Service operates on VHF Channel 14. Port Fire Officer Tel: 221573 (Office). Police: Tel: 221575 Office, 223196 House.

CUSTOMS ALLOWANCES: See "Lagos".

SHORE LEAVE: See "Lagos".

IDENTIFICATION CARDS: See "Lagos".

DEVELOPMENTS: Steps in hand to bring the depth to 9 m. chart datum and to widen the channel.

SHIPMASTER'S REPORT: October 1986. (Updated 1990).
Re: "Buoyage System at Calabar River".

1. For a Vessel approaching Calabar Fairway from South it is very difficult to distinguish the Fairway Buoy at night (missing since 1985), because of the density of platforms and pipes and also their dense illumination. On the other hand, for vessels approaching from Westwards (their draft permitting), it is easier sailing between the shoreline and the platforms determining their position by land and on their arrival at Fairway Buoy having a fix with the West Point. The Fairway Buoy lies near and S.E. of a platform the position of which is: Lat. 04° 21.70′ N., Long. 08° 14.80′ E.

Position of the Fairway Buoy: Lat. 04° 20.70′ N., Long. 08° 15.30′ E.

2. Because of the strong tidal currents prevailing in the area of the river's estuary, the lateral buoys constantly drift, and as a result of this, their charted positions are not to be relied upon and some of them do not even exist. (In March 1990, No. 11 Buoy was missing).

3. The positions of the following buoys were altered as follows:

No. 6. Red. In position: Lat. 04° 27.38′ N., Long. 08° 20.82′ E.

No. 7. Green. In position: Lat. 04° 27.40′ N., Long. 08° 20.63′ E.

No. 13. Constantly drifts between the positions: Lat. 04° 32.17′ N., Long. 08° 23.18′ E. and Lat. 04° 32.27′ N., Long. 08° 23.08′ E. (Missing in March 1990).

No. 16. Red. In approx. position Lat. 04° 37.61′ N., Long. 08° 22.35′ E. (Missing in March 1990).

No. 17. In its position is now No. 14.

4. The following buoys were found in their correct positions:

No. 18 Red. Lat. 04° 40.45′ N., Long. 08° 21.75′ E.

No. 19A Green. Lat. 04° 40.55′ N., Long. 08° 21.90′ E. (Missing in March 1990).

No. 19 Green. Lat. 04° 41.92′ N., Long. 08° 21.32′ E.

No. 20 Red. Lat. 04° 41.85′ N., Long. 08° 21.20′ E.

No. 21 Green. Lat. 04° 43.90′ N., Long. 08° 20.55′ E.

No. 22 Red. Lat. 04° 44.70′ N., Long. 08° 20.11′ E.

From Buoy No. 22 to Parrot Island the channel buoys are in their positions.

5. During the navigation from No. 19 buoy all the way through to Parrot Island anchorage, extreme caution is needed because of the floating tree trunks drifting outwards and inwards in the river following the current, of which only a small part is distinguishable above water.

6. Because of the doubtful positions of the buoys the safest way to navigate is determining the vessels' position by the river banks' line as shown on the radar. The following points are characteristically conspicuous on the radar screen especially with HW, all of them lying on the port side for inbound vessels:

1. West Point.
2. Okposo.
3. Tom Shot Point.
4. The edge of Red Cliff.
5. Jackdaw Point.
6. Sandy Point (on the starboard side).

AUTHORITY: Nigerian Ports Authority, P.M.B. 1014, Calabar, Cross River State, Nigeria.

Managed By: Port Administrator *Tel:* 221179, 222429, 225111-5 Office; 223124 House. Traffic Manager Tel: 220189 Office; 221570 House. Chief Port Harbour Master Tel: 221562 Office; 222480 House. Pilot Officer Tel: 225444 House. Calabar Exchange Code 087. *Telex:* Calport 65170. *Cables:* Genports, Calabar.

AGENT: Intertrans (Nigeria) Ltd. P.O.Box 10, Calabar. Tel: 087-222-554. Telex: Via Lagos 21244. Attn: Calabar.

DEGEMA (Including Abonnema): 04.44 N. 06.46 E.

LOCATION: Degema and Abonnema are very close to each other on the Sonbreiro River and are divided by a Creek through which launches and small craft sail to Port Harcourt.

PILOTAGE: Compulsory through Boler Creek. Pilots embark at Bonny.

BERTHING: The ports are approached from Bonny via Boler Creek, which has a depth of 4.88 m. at HW. Anchorages for 3 vessels in harbour to load/discharge, max. draft 16 ft. (limited by depth of Boler Creek). Cargo is handled by lighters.

Bulk Oil Plants of Nigeria Ltd. operate a berth for the loading of bulk palm oil onto main line vessels.

AUTHORITY: Harbour Master, Port Harcourt.

ESCRAVOS: 05.30 N. 05.00 E. (See Plan)

DOCUMENTS:

8 Crew Lists.
7 Passenger or "Nil" Passenger Lists.
7 Animal Lists.
5 Narcotics Lists.
5 Arms and Ammunition Lists.
4 Stores Lists.
4 Crew Declaration Lists.
Documents concerning cargo if any aboard.

Following paper's, required by the terminal operating company, Gulf Oil Company (Nigeria) Ltd., will be supplied by the Mooring Master:

The Master of tankers calling for the first time at Escravos will be supplied with the terminal information booklet.

The Master is requested to sign the "Conditions of Entry and Use of Escravos Terminal, Nigeria" and the "Safety Requirements" forms prior to start of berthing.

Before the loading operations are commenced, the Master must also sign two letters concerning the loading and stoppage of cargo procedured.

Other papers to be filled up and signed by the Master are:
Ship's Reports.
Master's Declaration.

At completion of loading, only in event of cargo ship/shore difference over ± 0.5%, the Master will be required to sign the "Certificate of Undertaking".

PILOTAGE: Compulsory. Boarding area is in a position approximately 3 miles W.N.W. of the Berth Operations Platform. Also see "General".

NAVIGATION AIDS: *Berth Operations Platform:* This is a conspicuous steel structure 85 ft. high (Position 05° 30′ 32″ N., 05° 00′ 19.5″ E.), between the berth and the shore. On top of this structure is a heliport, which at night is surrounded by red lights. In the event of a power failure a green intermittent light will be shown from one corner of the seaward side of the platform.

A RACON reflector is mounted on this platform for easy identification of the Gulf sea loading area. Radar transmission from the incoming vessel triggers the RACON Unit which responds with the Morse Code letter "G" (– – ·), followed by a solid tail. This signal is observed visually on the ship's radar screen and appears very close to the point where the radar echo of the berth operations platform itself should appear.

The racon is, however, most of time out of service. An RDF, located at the local airport for air traffic purpose, can be useful for Escravos Terminal approach in poor visibility conditions. Such RDF, working on 305 kHz frequency with ES (. ...)signal, is of limited power, being not an official navigational aid, and can be detected at a distance of about 30 miles.

Berth No. 2 – SBM: Light: White. Light 6.0 secs., Eclipse 4.0 secs. Range 5 miles. Radar Reflector.

Foghorn: Electric air oscillator. Range 0.5 miles, letter "U" every minute.

Berth No. 3 – SBM: Light: White. Light Fl. 10 secs. Range 4.5 miles. Radar Reflector.

Foghorn: Range 2 miles, letter "U" every minute.

Charts: B.A. 1862 and B.A. 3304.

ANCHORAGE: Vessels required to anchor on arrival will anchor in position approx. 3 miles W.N.W. of the Berth Operations Platform, i.e. in a position Lat. 05° 31′ 00″ N., Long. 04° 57′ 30″ E., or as otherwise instructed.

On approaching the terminal, VHF contact can be established with the Mooring Master on Channel 10, and the vessel will be advised of which berth has been nominated for her cargo. At the same time, the vessel will be advised where the Mooring Master will board. In cases where VHF contact is not made, the vessels will remain in the anchorage area until such time as contact is made by radio or the pilot boat. Vessels are advised to anchor only in the stated area due to the existence of submarine pipe-lines in other areas.

Mooring Master's office is presently equipped with only Channel 10 for communications with the incoming tankers, but it is expected that in the future a marine set with all the VHF channels will be installed.

Anchorage is forbidden in the mooring area.

RESTRICTIONS: Mooring and unmooring operations will be undertaken by day and by night under normal weather conditions.

Notice of Readiness will be accepted by the Company representative on boarding, providing that the ship is in all respects ready to load.

MAX. SIZE: The Escravos Terminal consists of two Single Buoy Mooring Berths Nos. 2 and 3 only, the conventional Sea Berth (Berth No. 1) having now been de-commissioned.

The location of the Sea Terminal Berth No. 2 (SBM) for vessels up to 120,000 d.w.t. is off the North of the Escravos River in a position Lat. 5° 30′ 37″ N., Long. 4° 59′ 25″ E., and has a minimum depth of water of 65 ft. at LWS.

Berth No. 3 (SBM) is situated 4.25 miles W.S.W. of No. 2 berth in a position Lat. 5° 29′ 29″ N., Long. 4° 55′ 54″ E., and will accommodate vessels up to 300,000 d.w.t. in a minimum depth of 100 ft. at LWS on a year round basis, but during the dry season, October to March, vessels up to 350,000 d.w.t. will be accommodated on receipt of their acceptability by the Terminal.

RADIO: Vessels bound for Escravos must advise their ETA to Gocon, Lagos, 72 hours and 24 hours before arrival – the message to contain the vessel's name, ETA, Master's name. A 24 hour watch is maintained on VHF Channel 10, in the Senior Mooring Master's Office, and ships are usually able to make contact on this Channel at a distance of 20 miles to 40 miles on the seaward side of the Berth Operations Platform. Channels 10 and 10A used for internal traffic and ship berthing operations. Also see "Anchorage".

Incoming vessels may be advised by the Mooring Master to keep outside Nigerian territorial waters where no official nomination or clearance has yet been received by the terminal. In such cases, the vessel is required to monitor continuously VHF Channel 10 and await permission to proceed to the anchorage.

HEALTH: Arriving vessels will be required to supply information for dispatch in the Inward Pratique to the local government agencies, such information (i.e. name of vessel, nationality, Summer d.w.t., arrival time, last port of call, next port of call, owner's name and address, quantity of cargo required, destination of cargo, crew nationality, home port, Master's name, Certificate of Registry, bunkers on arrival, draft on arrival, cargo on board) should be at hand on the bridge and passed by VHF Channel 10 at the Mooring Master's request.

MOORING: Before arrival at the pilot boarding area, it will be necessary to ensure that the following moorings are ready for use on arrival at the berths:

Forward: 2 mooring ropes on forecastle – buoyant lines if possible, e.g. polypropylene, on the forecastle head.

When the vessel is within reasonable distance of the buoy, 1 ship's line will be carried by the mooring launch to the floating buoy lines and secured to same, this line will then be heaved aboard. As the buoy rope comes clear of the water it will be noted that a chain is attached to it. This chain is to be secured to either a bow stopper or a towing bracket if fitted on the vessel otherwise terminal provided Pelikan hooks will be used, the latter being secured to a set of bitts on the vessel. This chain is to be secured in such a manner that the mooring rope is outside of the extreme length of the vessel; i.e. so that the chain will absorb any chafing if the buoy line crosses the bow.

Because of the mooring chain weight, incoming vessels are requested to particularly check the efficiency of their bow winches.

Power must be available at all times on deck winches and windlass while vessel is at the berth.

Aft: A mooring line must be available aft, secured to the bitts and of sufficient length to enable a tug-boat to pick up the eye and tow on it to realign the vessel if necessary. If available, a buoyant line is also preferred in this position.

There are no special arrangements for unmooring.

MEDICAL: Not available except in an emergency.

CARGO: Nigerian Light Crude - API 36.5° approx. Temperature 90°F. (fairly steady throughout the year).

HOSES: Lifting, connecting, disconnecting, lowering and other handling of hoses will be performed by the ship's crew, as advised by the Company representative, and the Company will provide a pipe-line gang to assist the ship's crew. At all times a deck officer must be in attendance.

Port derrick must be rigged and ready for use on arrival and vessels are cautioned that the weight of each hose is at least 7 tons under favourable conditions. In any case, members of the ship's crew will be required to operate the winch or winches.

Particular care should be taken during the hose handling operations in order to avoid serious damage to the hoses, on the plate edges, rails, etc. The cargo hoses are fitted with Camlock connections and blank flanges.

As no equipment will be supplied from the shore; it is essential that all vessels nominated for this port have an adequate supply of gaskets, nuts, bolts, spanners, tools, etc. ASA reducers for use with the Camlock connections can be supplied in an emergency in the standard sizes. Failure to have these items will lead to delay in berthing and could even lead to a situation where the vessel may no longer be accepted by the terminal. Such delays would be for the ship's account.

Before hose handling operations begin, materials must be near the manifold and remain near the manifold to cope with any escape of oil, i.e. drip trays, sand, detergent, etc., and must in the event of a spill be utilised as rapidly as possible.

Berth No. 2: Loading is through an SBM which is approx. 40 ft. in diameter and held in position by 4 chains secured to piles sunk into the seabed. 1×24 in. floating hose is secured to buoy and has 2×16 in. tail pieces attached to it; they are also fitted with Camlock connections.

Berth No. 3: Same as No. 2 but improved type and more heavily moored with 8 chains secured to piles sunk into the seabed. There is 1×24 in. floating hose with 2×16 in. tail pieces. There are ASA flanges with Camlock connections, similar to those at Berth No. 2.

There are 2 SBM Berths only at this terminal – the conventional berth (No. 1) has been de-commissioned. The max. loading rate is 30,000 b.p.h. (approximately 4,000 t.p.h.).

LOADING/BALLAST: Deballasting and Loading Procedures: Vessels proceeding to Escravos to load must arrive with sufficient clean ballast for safe manoeuvring. A vessel arriving with dirty ballast will incur costly delays as it is not permitted to discharge dirty ballast to the sea. The "Load on top" system is accepted at this terminal and vessels are requested to arrive with the slop tank "settled out" as far as is possible and so avoid any chance of pollution of the Terminal waters from this particular tank.

The Nigerian Government has very strong views on pollution and vessels are warned that a very careful watch is kept at all times to ensure that pollution does not take place, or that if pollution should occur it is controlled as quickly as possible.

An Oil Pollution Monitoring Inspector is assigned to each vessel on behalf of Nigerian Ports Authority.

All vessels are cautioned to keep a close watch on the floating hose (or hoses) towards the end of deballasting, as it is possible, under certain conditions of weather and tide for the hose to become trapped under the fore-foot of the vessel. Should this situation appear likely to arise vessels are requested to attempt to keep the fore-foot submerged by transfer of water or bunkers, etc. If the hose becomes foul, it must be disconnected and towed clear causing considerable delay to the vessel.

During the hours of darkness it is requested that searchlights from bridge wings and approved floodlights be used to illuminate the surrounding water to facilitate detection of oil and assist generally in loading operations. Vessels are advised that failure to supply sufficient lighting could result in cargo operations not being allowed during the hours of darkness. Such delay would be for the ship's accounts.

After the ballast tanks have been inspected and found to be satisfactory, deballasting will commence on the advice of the Company Representative. When all the ballast has been discharged, the tanks will again be inspected and if ready for cargo a Dry Certificate, if presented, will be signed by the Company representative. In any case, cargo will be loaded when both ship and shore are ready to commence operations. In no circumstances will the vessel be expected to load at a faster rate than that requested by the Master. It is the ship's responsibility to check that the requested loading rate is not being exceeded. The Company for their part will make every effort to maintain the requested rate and will advise of any alteration of loading rate immediately; prior warning being given if circumstances permit.

Simultaneous Deballasting and Loading: In order to reduce the turn around time at this Terminal, but with close attention to safety, vessels will be permitted to load cargo and discharge ballast simultaneously, provided that no contamination of cargo or pollution of the Terminal waters can occur. Vessels desirous of adopting this method of loading can do so, but will be required to advise the Company in writing, stating that the vessel accepts full responsibility if this method of loading results in contamination of cargo and/or pollution of the Terminal waters.

Throughout the deballasting and cargo operations, a deck officer must be on deck with sufficient crew members to safely handle the operation. Company representatives will be on board throughout to co-ordinate terminal and marine operations and will be in constant communication with the terminal by portable and/or ship's VHF sets. Before loading commences the amount of cargo required must be given to the Company Representative in writing and the Terminal will, in conjunction with the vessel, arrange to stop the flow of cargo at this predetermined figure. *THERE ARE NO FACILITIES AVAILABLE TO DISCHARGE EXCESS CARGO SHOULD THE VESSEL OVERLOAD.*

When requesting the tonnage required in writing, a statement should be included, and will be deemed to include, that Gulf Oil Company (Nigeria) Limited will not be held responsible for any errors or any costs or claims arising directly or indirectly from such errors. Such statement is a condition of loading. It is recommended that frequent checks are made on the loading speed and the quantities received and required so that, if possible, adjustments can be made.

The Company Representative will advise on the detailed procedure for shutting down and disconnecting, but briefly, after cargo is completed and oil has ceased to flow, loading valves on the shore and Berth Operation Platform (BOP) will be closed. Then and not before, the vessel's manifold valves may be closed.

Do not close ship's valves against incoming oil as such procedure creates excessive pressure which may damage hoses, terminal facilities, or ship's piping. Vessels will be held liable for damages resulting from failure to observe this precaution. In addition to the above, serious pollution could result which will involve the vessel in further claims and/ or fines. Therefore, for the sake and safety of all parties concerned, please use the utmost care and vigilance when loading at this terminal.

Figures taken after completion will be passed to the shore by VHF and a ship/shore difference obtained. Full sets of cargo papers will be prepared and delivered to the Master as speedily as possible. However the briefer form of documentation can be used, but only with Master's acceptance, the remainder of the documents will be forwarded by airmail. At the same time the Company will arrange clearance for the vessel.

Loading signal to be displayed is the International Code flag "B" from a conspicuous halyard during the hours of daylight. During the hours of darkness a red light visible all around the horizon at a distance of at least one mile is to be exhibited.

REPAIRS: No facilities of any kind are available at this port.

Under no circumstances are engine repairs or the immobilisation of main engines permitted within the port limits.

REPATRIATION: Not permitted except in grave emergency and then only if the person concerned holds all the necessary valid certificates and documents, e.g. valid Cholera and Yellow Fever Certificates.

WEATHER AND CURRENTS: Wind and swell are mostly from a South-westerly direction. The weather is generally good from November to May, but is unfavourable during the wet season, i.e. May to November. For approximately 75% of the year the current sets in a N.N.W. direction and for the remainder of the year it is reversed, i.e. S.S.E. The strength of the current varies from 0.5 to 1.5 knots, and the currents frequently reverse direction very quickly causing the vessel to yaw (swing) heavily at the berth.

FRESH WATER: Not available.

FUEL: Available. A fuel barge from Warri can go alongside vessels whilst still at anchor.

STORES: Stores are not available at this Terminal and urgent spares/ equipment forwarded by air can take up to 3 weeks to clear formalities. In view of this it is essential that Gulf be advised of the airwaybill number at the earliest opportunity to avoid further delays.

NATIONAL FLAG: Available from the Company.

TIME: Local time is GMT plus one hour throughout the year.

SHORE LEAVE: In view of the isolated positions of the buoy moorings (approx. 15 and 19 miles from shore) Masters are strongly advised not to grant shore leave. The weather and swell conditions could result in persons being injured either embarking or disembarking from the vessel, and in addition the boat journey will take approx. 2.0 – 2.5 hours. Should the weather deteriorate, it could mean delay to the vessel as outward clearance would not be granted until all the crew were on board the vessel. As the terminal does not own any suitable boats, it would be necessary for the vessel to charter one for shore leave purposes.

In view of the foregoing, the terminal does not recommend shore leave being granted.

GENERAL: In view of the exposed location of the berths, the Mooring Master and pipe-line gang will have to remain on board throughout the vessel's stay at the berth and, therefore, it will be necessary for the vessel to arrange food and accommodation for this period. A pipe-line gang will usually consist of four men, but this number may be varied at the discretion of the Company.

It is assumed that the Mooring Master will be accommodated in the Pilot Room; but where such a room does not exist on board, then accommodation equivalent to a minimum standard required for a Senior Officer is to be provided. In the case of meals, due allowance and provision is to be made for the fact that irregular hours of work by day and night may be involved.

AGENCY: Owners of vessels calling at the terminal must arrange for their own agents. Principle Agents are: Gulf Agency and Shipping Ltd., Lagos, and Elder Dempster Agency, Lagos.

OPERATOR: Gulf Oil Company (Nigeria) Limited. *Telex:* 21314. *Cables:* Gocon.

FORCADOS (Offshore Terminal): 05.10 N. 05.10 E. (See Plan)

IMPORTANT NOTICE: The Company, as Operator for the NNPC/Shell Joint Venture, has been directed that the following vessels will not be permitted to enter Nigerian Waters to load Nigerian Crude Oil:

(A) Any vessel which is owned directly or through subsidiaries or chartered or managed by companies or persons in South Africa, Namibia or Israel, or is registered in any of these countries.

(B) Any vessel which has called at a port in South Africa, Namibia or Israel during a period of 6 weeks immediately preceding her arrival off any of the Company's Terminals. (A Port Call includes the calling off or near a port for the purpose of receiving services from the shore by helicopter or launch/boat.)

(C) Any vessel which has among its officers, crew, passengers or supernumeraries any person who is a national or resident of South Africa, Namibia or Israel or who has visited any of these countries as evidenced by an entry in that person's passport or other identity document.

Vessels arriving off the Company's Terminals are subject to check by Government Authorities to ensure that the above-mentioned provisions have been adhered to. Any infringement is liable to cause serious consequences for the Master, Manager, Charterer and/or Owner of the vessel.

Vessels lifting crude oil must in addition comply with any other restrictions that may be generally imposed by the Government of the Federal Republic of Nigeria on vessels entering Nigerian Waters for any purpose whatsoever.

DOCUMENTS:

	Customs	*Health*	*Agent*
Vaccination List	1	1	3
Maritime Declaration of Health	1	1	3
List of Last Port of Call (6 weeks)	1	1	3
List of Arms and Ammunition	2	–	3
List of Animals and Birds	2	1	3
Crew Labour List	–	–	3
Passenger List	1	1	3
Stowaway List	1	1	3
Personal Effects List	1	–	–
Clearance from Last Port of Call	1	–	–

Derat Exemption Certificate to be produced.

Vaccination Booklets for all crew to be sighted.

APPROACHES: An efficient sounding machine and a high definition radar will assist in making the terminal for the first time. A heavy cluster of radar echoes from the Escravos area may be recorded on passing the 100-fathom line. On making the 20 fathom line, it is reported that the coastline from North Point to Moore Point and from South Point to Ajamabri shows on the radar screen with good chart comparison.

Once the vessel's position is ascertained and the course for Forcados adopted, the first and most obvious sighting, at night, will be that of the platform, which is marked with numerous fixed lights at several levels. The platform, which also serves as a helicopter platform, is in close proximity to the two SBMs.

PILOTAGE: Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout. Contact Berthing Master on VHF Channel 8. Call sign "Forcados Offshore Pilots". *N.B.:* Also contact "Forcados Terminal" on Channel 8 immediately on anchoring to ensure that vessel's arrival is recorded and that berthing turn will be in correct sequence.

Arriving tankers are to make a good lee for the embarking Pilot. Boarding facilities such as pilot ladders must not be made of nylon rope.

ANCHORAGES: 3 miles West of or 2 miles N.W. of Production Platform in position Lat. 5° 10′ 17″ N., Long. 5° 10′ 42″ E.

Vessels must not proceed inshore from these positions without a Pilot. When at anchor a listening watch is to be maintained on Channel 8 and this Channel must not be used for ship-to-ship exchanges.

Note: A 14 mile × 48 in. pipe-line extends from the coast at South Point near Forcados to the manifold Platform and thence to the SBMs. Vessels are warned not to anchor in the vicinity of the pipe-line.

RESTRICTIONS: Vessels berth at any state of tide, night or day.

Also see "Max. Size".

MAX. SIZE: Minimum size 45,000 tonnes Summer d.w.t. Max. size 320,000 tonnes Summer d.w.t. Vertical distance bow fairlead to water line not to exceed 60 ft. at any time. No restriction on length and beam. Max. draft 65 ft.

PRATIQUE: Health and Customs Officers board at a convenient hour and come from Forcados, 20 miles distant from the buoys. Normally travel by high-speed launch, but may occasionally use helicopter.

RADIO: All ships to radio their ETA via Lagos Radio to the Lagos Agents at least 72 hours before vessel's ETA at the terminal anchorage.

ETA also to be reconfirmed 48 hours prior to arrival.

ETA by Radio for all Ships: In view of communication difficulties with our terminals at Bonny and Forcados and in order to avoid undue delays, in addition to normal W/T advices to Agents and Shell Lagos as contained in Port Information Book, we wish to inform you about the possibility of passing to us your ETA via M.V. "Oil Maintainer", call sign GYEU.

The "Oil Maintainer" (Golf Yankee Echo Uniform) keeps a daily listening watch on single side band R/T on following frequencies and times:

From 1600 to 1620 hrs. local time 16587.1 kHz (Tx/Rx)
From 1620 to 1640 hrs. local time 12435.4 kHz (Tx/Rx)
From 1640 to 1700 hrs. local time 8294.2 kHz (Tx/Rx)

Please advise 72 hours before arrival Forcados:

1. Vessel's Name.
2. ETA.
3. To load ...... tons ...... grade.
4. Last Port.
5. First Nigerian port to load.
6. Any other Nigerian ports to load.
7. Name of Shipping Agency.
8. Next discharge port.

The "Oil Maintainer" will acknowledge only, and further calls are not required unless ETA changes by 2 hours or more.

TUGS: No tugs required and none available.

BERTHING: Effected under guidance of Berthing Master and local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a suitable buoyant mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to realign vessel.

Two SBMs each fitted with 2 OCIMF standard 15 in. × 150 ft. nylon grommet ropes and 1 hose string some 870 ft. long with 2×16 in. end hoses. No. 1 SBM is South of platform and No. 2 is West.

Position of hose connections: Amidships on starboard side (See "Shipmaster's Report" dated December 1989). Vessels should endeavour to present 2×16 in. (400 mm.) (150 ASA) connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick, SWL at least 10 tonnes, must be rigged ready on both sides and plumbed clear of ship's side. Derrick runner must be equipped with suitable hook.

In the case of vessels with a heavy multisheaved block a short wire strop of adequate strength with a hook should be provided.

Weight of Hoses: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil of SG 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker	*16 in. Inside Diameter Hoses*
500,000 d.w.t.	11.4
330,000 d.w.t.	9.4
270,000 d.w.t.	9.1
200,000 d.w.t.	8.7
100,000 d.w.t.	7.5
70,000 d.w.t.	7.1

Loading: Load-on-top system operates at Forcados. Slops cannot be accepted ashore. Vessels must arrive with clean ballast. Maximum loading rate 11,000 t.p.h.

A single grade of crude oil is handled which is known as "Forcados Blend".

Shore Line System: Vessels load through SBM from shore through 48 in. line to SBM. The 48 in. submarine line to the SBM is some 14 miles in length, therefore great care must be exercised during loading when ship's valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ship's manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

MEDICAL: Limited medical assistance available but in extreme emergencies only. Treatment of minor ailments and vaccinations, etc. is under no circumstances available. It may be possible in the event of an accident to obtain medical advice. Contact Terminal VHF Channel 8 in first instance.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: No crew changes possible.

SHORE LEAVE: Not permitted.

GENERAL: Nigerian flag to be flown.

Air letter forms are not acceptable unless used with Nigerian stamps.

Freeboard: The maximum forward freeboard is 60 ft. while vessel is moored to the SBM. Masters are requested to comply with this limitation.

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as the Company can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ships' personnel. However, as further guidance, and in absence of any instructions to the contrary, ships are accepted by the Company on the understanding that ships will be able to accept a bulk loading rate per hour of not less than 10% of the summer deadweight of the vessel.

At Offshore Berth the Berthing Master acts as Loading Master during Loading Operations and is provided with "walkie-talkie" radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Company's Tanker Port Performance Time Sheet by ship and shore personnel. Only crude oil is handled at the Company's terminal, loading temperature and specific gravity of the grade of crude, Forcados Blend is reasonably constant and is approximately: 0.8837 at loading temperature.

Immobilisation of Engines: Not permitted at SBMs. Not advisable at sea anchorages as there are many obstructions if vessel drags anchor.

Restrictions Which May Cause Delays: Weather. Worst period June–September when heavy swell may be encountered.

Early Departure Procedure: There is no Early Departure Procedure at Forcados Terminal. Completed documents are brought to the ship for signature after completion of loading.

Customs and Agency representatives will normally board vessels during daylight hours. Government regulations require that all vessels are cleared inwards before commencement of loading. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials. Any attempt on the part of the boarding officers to persuade the Master to supply more than normal representation should be resisted. In the event of any problem arising over such a matter full details should be reported to the Agent.

WATCHMEN: Whilst berthed at an SBM, a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness to raise the alarm and advise Berthing Master on the approach of local small craft. Instances have occurred at Nigerian Offshore Terminals where nylon mooring ropes have been cut and stolen with the vessel in the berth. The Berthing Master should also be advised in the event that the vessel rides up to the SBM.

SHIPMASTER'S REPORT: The SBMs are sited about 11 miles offshore.
Moorings: Starboard derrick topped and doubled up. If accommodation ladder rigged, then on port-side. Not necessary for vessels up to 50,000 d.w.t.
Hoses: All sizes of reducers available.

SHIPMASTER'S REPORT: 1979.
Documents: Ship's stamp to be on all documents.

5 lists ports of call; 5 arms and ammunition (3 for Agent, 2 for Customs); 4 each of vaccinations; nil passengers; nil stowaways; crew labour list (presumably DBS); 1 copy of diversion cable; 4 lists "Nil" animals or birds.
Pilotage: Require accommodation ladder with pilot ladder for large vessels due to swell.
VHF: Channel 8 for all communications with Pilot, Loading Terminal, and Cargo Operations.
Berthing: Line required aft should preferably be polypropylene or one that floats.
Tankers: Loading temperature about 99°F, will vary slightly depending on loading rate.

SHIPMASTER'S REPORT: December 1989.

EDP not in operation. On completion of loading, vessel leaves the SBM and anchors awaiting papers, normally about 8 hours. All documents prepared ashore to Loadmaster's advice, and delivered by launch to be signed on board. No security pinhole punch allowed. Destination terminal requires SCAC code before loading, and they put it on the Bills of Lading ashore.

Fourteen officials board before berthing to give clearance, Check last Port Clearance and Discharge Books, etc.

2 SBM's in use but only one loads at a time. SBM No. 1 – hoses starboard side, and SBM No. 2 – hoses port side. Draft and freeboard restrictions enforced.

Loading pumps ashore are turbines driven by gas from oilfields, so load rate fluctuates according to gas pressure ashore. The maximum is about 9,000 t.p.h.

Currents in the vicinity of the SBM's are irregular, and can cause problems during approach. Expatriate Loadmasters and local surveyors attended vessel. We were unable to make contact with Shell, Nigeria, or 'Oil Maintainer'. Bunkers available by barge.

OPERATOR: The Shell Petroleum Development Co. of Nigeria Ltd., Freeman House, 21-22 Marina, Private Mail Bag 2418, Lagos, Nigeria. *Tel:* 601600 (17 lines), 601820 (9 lines). *Telex:* 21235. *Cables:* Shell, Lagos. *Contact:* Marine Co-ordinator.

KOKO: 06.01 N. 05.29 E. (See Plan)

DOCUMENTS: See "Lagos".
APPROACH: Escravos Fairway Buoy Lat. 05° 30′ N., Long. 05° 04′ E. for entry to Escravos River. Present draft limit 6.4 m. Dredging of channel from Escravos down to 10 m. expected to be completed soon.
PILOTAGE: Compulsory for all vessels. Whenever ships are bound for Koko Port, Masters should send telegram at least 7 days in advance before ship's arrival at Escravos Fairway Buoy to Chief Pilot, Escravos Pilot Station, P.O.Box 368, Warri, Nigeria via 'Lagos (50W)' confirming Ship's name, Call Sign, Flag, LOA, Draft, Port of destination, Last Port and accurate ETA at Escravos Bar. When Chief Pilot at Escravos Pilot Station is aware of ship's ETA, he will arrange a reliable Pilot for the ship, before her arrival at Escravos Bar. On approaching Escravos Fairway Buoy, Masters should contact Chief Pilot, Escravos Pilot Station direct on VHF Channel 16 to report Vessel's arrival and request the name of the pilot boarding. After which the Pilot will be sent onboard outside the Breakwater to pilot the vessel up river to Koko Mid-Stream Anchorage, where the Sapele Harbour Pilot normally comes onboard to take vessel alongside. Berthing operations are carried out during daylight hours only.

The mouth of Escravos River (5° 31′ 30″ N., 5° 07′ 20″ E.) is the main entrance for the Niger Delta Ports of Warri, Burutu, Koko and Sapele. Before entering any of the rivers, creeks and channels from Escravos to the above Ports, vessels will embark a Pilot from the Pilot's Station before proceeding up river. Positions should be broadcast at frequent intervals and vessels should keep constant VHF listening watch on Channel 16. The Pilot Station at Escravos is located 0.5 miles South of the Escravos Beacon and operates from 0700 hrs. – 1800 hrs. daily. Pilot boards inward bound vessels about 2.0 miles S.W. of the Breakwater from a motor boat flying 'SG' in international code flags. Ships are advised to hoist the same 'SG' Flags on the Mast, on arrival at Escravos Bar. Positions and movements can be exchanged with other vessels in the vicinity on VHF.

In foggy weather periods, vessels are advised to proceed inside the Breakwater to the Pilot Station to embark a Pilot, as the pilot boat is not equipped with navigation aids. The IALA Maritime Buoyage System 'A' (Red to Port) is adopted after the entrance down the Escravos River. Vessels should sound 3 prolonged blasts followed by one short blast (– – – ·) on the whistle as "Pilot Call Signal" on arrival at Buoys No. 11/12, when proceeding to the Pilot Station at intervals of 10 minutes. In such cases, the pilot will board inward bound ships after 1.0 miles from Buoys No. 13/14. Vessels sometime drop anchor at the Pilot Station and wait for further instructions from Koko Port Control before proceeding up river to Koko Mid-Stream Anchorage. On arrival of vessel at the Pilot Station a pilot usually boards with one helmsman and they may stay onboard until the ship sails back to Escravos Pilot Station. In most cases, the helmsman stays onboard and the Pilot comes back when the ship is ready to sail.
RADIO: See "Lagos" for ETA advices to Agent. Warri Harbour Master at Warri, or Beach Master at Koko, to be contacted on VHF Channel 16.
VHF: Contact Pilot VHF Channel 16. Contact Agent in Warri on VHF Channel 16.
BERTHING: Two hard quay berths giving a total quay length of 137 m. and max. draft of 7.32 m. Berthing during daylight hours only.
MEDICAL: Facilities available.
FRESH WATER: Available and delivered by barge.
FUEL: Diesel oil available locally and delivered by barge. Fuel oil available by barge from Warri and arranged through Agent, both products in limited supply.
FIRE PRECAUTIONS: No local facilities.
REPAIRS: No local facilities. See "Warri".
GANGWAY/DECK WATCHMEN: Compulsory during the night while in port.
REPATRIATION: By road to Benin or Warri, both connected with Lagos by regular air service.
TIDE: Range approx. 2 m., and velocity up to 3.5 knots.
DENSITY: Salt.
SHORE LEAVE: See "Lagos".
IDENTIFICATION CARDS: See "Lagos".
TELEPHONES: Not available for placing on board. Available in Post and Telegrams Office in Sapele, and at Agent's Office at Warri.

SHIPMASTER'S REPORT: 1977.
Documents: Livestock List also required.
Pilotage: Request Creek Pilots through Escravos Pilot on VHF Channel 16. The Pilots are local fishermen and race each other to the vessel to offer their services. They will not proceed beyond the breakwater. Special care must be taken when entering, as many of the buoys are out of position.

A strong N.W. current runs by the breakwater, also there is a heavy swell which makes steering difficult.

Draft varies but seems to be not less than 18 ft. at LW to 24 ft. at HW. In Escravos not only a Pilot boards the ship but a helmsman too. The latter is quite useful especially in the narrow part of Nana creek.

Koko has a VHF station Channel 16 for port operations.

Cargo shed capacity is insufficient, so more often than not this shed is full and cargo is discharged into "direct delivery". But because of the bad infrastructure of this port and the frequent lack of lorries, this discharge is a slow operation (sometimes less than 100 tons per day).

Ships waiting for berthing at Koko can anchor downstream or upstream of the berth. The anchorage is good and the "Creekpilots" stay onboard, i.e. they stay till the ship's return to Escravos, where they boarded.
Repatriation: By road to Warri and there by small plane to Port Harcourt or Lagos.

LAGOS (including Apapa and Tin Can Island): 06.27 N. 03.24 E. (See Plan)

DOCUMENTS:
Documentation Procedures:

(1) By Federal Decree 3 weeks prior to vessel's arrival the Agent requires certain information from Principals in order to register the vessel with NPA for obtaining the Ship Entry Notice (SEN). Not applicable to vessels carrying petroleum products in bulk, or in ballast.

Without SEN the vessel cannot enter Nigerian territorial waters (30 nautical miles).

Information required is as follows: Name of ship, nationality, g.r.t., n.r.t., draft, LOA, Port of Registry, Certificate of Registry Number, Owners and/or Agents in Nigeria, Port of Origin, Port(s) desired in Nigeria, ETA, Total Tonnage of Cargo to be Carried (Outward and Inward), Description of Landings and Loadings for which permission is sought, e.g. General Cargo, Containers (in container vessel or mixed cargo vessel). Cement, Bulk Liquid, etc.

In addition, for preparation of preliminary Manifest, the following are required: Shipper, name and address, Consignee, name and address, Cargo Marks, Cargo Quantities (numbers), Cargo Description, whether Freight Prepaid or Collect, Estimated Time of Departure from Port of Loading.

(2) 14 days prior to arrival Agent requires:
10 Manifests.
3 Stowage Lists.
3 Hatch Lists.

(3) On arrival at Lagos, Master must be prepared to present:
5 Ports of Call Lists (last voyage).
5 Crew Lists.
4 Kroo Boy Lists.
4 Animal Lists.
*4 Arms and Ammunition Lists (if none on board only 2).
1 Extra Manifest for transhipment (if applicable).
1 Stores List.
1 Crew Declaration List (personal effects).
1 Declaration of Health.
1 Vaccination List.
1 Narcotics List
1 Parcel List.
5 Passengers Lists.
1 Stowaway List.
1 Declaration – fuel in double bottom tanks.
Currency List (for National Safety Organisation). Foreign currency may have to be deposited ashore.

*Ship's Master allowed 1 gun and 100/150 rounds of ammunition.

Where not applicable all documents still to be prepared bearing the marking "Nil".

Other forms prepared by the Agent and furnished on arrival.

(4) For departure all documentation prepared by the Agent.

Berthing Procedures:

(1) Master to cable Agent via Lagos Radio ETA 7, 4, 2 and 1 day prior to arrival enabling Agent to declare vessel at the Berthing Committee Meeting well in advance.

(2) Master to contact Agent on VHF Channel 16 prior to arrival at anchorage (range approximately 30 miles).

(3) On arrival at anchorage Master to contact Lagos Port, Call Sign "East Mole Station" giving all vessel and cargo particulars, Agent's name, SEN No. and date of issue. Vessel also to cable Harbour Master's Office for identical information. Thereafter watch on VHF as per Agent's instructions.

(4) Only on arrival and strictly after declaration can Agent book Pilot and time for boarding will be advised.

(5) The pilot station (Call sign "Chief Pilot's Office") will contact vessel well in advance to allow her to proceed to the Fairway Buoy for boarding of Pilot.

(6) The Agent with the Health, Immigration and Customs and Excise Authorities board the vessel after berthing.

Unberthing Procedures:

(1) Agent prepares (outward) Customs clearance and delivers a copy to Master.

(2) Agent books Pilot and advises time for boarding.

(3) Vessel keeps continuous watch on VHF for instructions from the Chief Pilot's Office.

PILOTAGE: Compulsory. Hoist "G" flag. Contact Pilot by VHF Channel 16. No pilot boat stationed outside. Daylight service only (until 1600 hrs.).

Only on arrival, and strictly after declaration, can Agent book Pilot; time for boarding will be advised.

The pilot station (call sign "Chief Pilot's Office") will contact vessel well in advance to allow her to proceed to the Fairway Buoy for boarding of Pilot.

ANCHORAGES:

	Length	Draft
Pool 1	480 ft.	24 ft.
Pool 2	600 ft.	28 ft.
Pool 3	450 ft.	26 ft.
Pool 4	450 ft.	26 ft.
Badagry Creek	380 ft.	22 ft.

Vessels not permitted to remain at anchor at Pool 1 during hours of darkness due to poor holding ground.

4 vessels, maximum length 380 ft. can anchor at Badagry Creek Anchorage. Max. draft 22 ft.

RESTRICTIONS: Max. draft Pool Anchorage 8.23 m., Bruce Mooring Buoys 8.23 m., Marina Mooring Buoys 8.23 m., Apapa Hard Quay Nos. 1 – 14, 8.23 m., Apapa Hard Quay Nos. 15 – 20 10.50 m. and Tin Can Island Berth Nos. 1 – 10, 9.50 m.

MAX. SIZE: Max. draft 10.0 m. (salt water)

HEALTH: Port Health Officer boards vessel on arrival. ETA's must be advised by ship or Agent direct to Port Health. Pratique automatic when from Nigerian port. Also see "General".

RADIO: Master to cable Agent via Lagos Radio ETA 7, 4, 2 and 1 day prior to arrival, enabling Agent to declare vessel at the Berthing Committee Meeting well in advance.

Master to contact Agent on VHF Channel 16 prior to arrival at anchorage (range approx. 30 miles).

On arrival at anchorage, Master to contact Lagos Port, call sign "Signal Station" giving all vessel and cargo particulars, Agent's name, SEN No. and date of issue. Vessel also to cable Harbour Master's Office identical information. Thereafter watch on VHF as per Agent's instructions.

TUGS: No specific joining position, depending on tide and on Pilot's request, otherwise close to berth. Normally ship's line used. 1 tug 1,800 h.p., 1 tug 1,226 h.p., 1 tug 825 h.p. and several smaller tugs for towing lighters. 24 hour service available. Also see "General".

BERTHING: Daylight hours only.

No specific arrival time is required for berths, except for Petroleum Wharf where tankers need high water. Berthing on ebb tide required for Fish Wharf and Ijora Wharf.

Unberthing: See "Documents".

Apapa Berths: 19 general cargo berths, 1 bulk cargo berth at Ijora, 6 container berths including 1 Ro/Ro ramp. Also 3 petroleum berths, 1 gas oil, 3 bulk oil and 1 grain berth, 5 storage sheds, although no cold storage available. Quay cranes not operative. The third Apapa Wharf extension is now completed and in full use. Container Quay 1,005 m. 2 gantry cranes with 40 tons lifting capacity have been installed and are in use with stacking area for Ro/Ro and containers. General cargo quay 525 m. Depth alongside 10.5 m. Vessel's Agent to make arrangements for discharge of 40 ft. containers due to lack of equipment.

Tin Can Island Berths: Tin Can Island Port (TCIP) is situated N.W. of Apapa, North of Badagry Creek.

Draft Restrictions: Berths 1 – 10, 9.50 m.

Tugs: 2 of 1,400 h.p.

Accommodation: Area 73 hectares, quay length of 3.5 km. Extensive quay apron 40 m. wide with berthing capacity for 10 – 15 vessels, of which 3 for Ro/Ro, depending on size of vessels and one of which has fixed stern ramp. Bulk berth for handling bulk commodities. Two service berths for tugs and light craft.

Dredged Channel is 200 m. wide with turning basin.

Two fresh water wells (250 m. deep) with purification plant.

Ten quayside cranes – 8 of 6 tonnes at 28 m. radius, 2 of 10 tonnes at 25 m. radius, transit sheds and warehouse each of 7,000 sq. m. area.

No cold storage.

Midstream Berth: 8 Marina Buoys and 1 Bruce Buoy.

CRANES: 1 floating crane of 100 metric tonnes and 1 of 250 metric tonnes. Apapa and Tin Can Island equipped with mobile cranes, forklift trucks, tractors, freight lifters, conveyors, trailers and container handlers.

250 ton crane: 50 ton lift at 31 m.
100 ton lift at 28 m.
150 ton lift at 21 m.
250 ton lift at 10 m.

STEVEDORES: Available. First shift: 0730 – 1530 hrs.; 2nd shift: 1530 – 2230 hrs.; 3rd shift: 2230 – 0730 hrs. Overtime is paid for 2nd and 3rd shifts. Saturdays 0730 – 1530 hrs.

Overtime, Sunday and third shift not always worked as NPA making cutbacks.

MEDICAL: Agents to be given advance notice of medical attention required as early as possible. Hospital facilities available. International Certificates of yellow fever required.

TANKERS: 3 berths operated by the Port Authority. Length 177 m. Max. draft 7.62 m. No night berthing. Water and bunkers available. (Subject to tidal restriction).

Atlas Cove Berth: The Atlas Cove Jetty has 2 berths of LOA 180 m. and 80 m. and draft of 10.7 m. and 6.3 m. respectively.

Report: October 1981

Facilities for tankers discharging clean products.

(a) No Ship Entry Notice is required for tankers coming into Nigeria to load/discharge cargo.

(b) There are three main oil tanker jetties available in Lagos namely PWA, NOJ and BOP each with max. LOA of 175 m. and max. draft. 7.6 m. There is also another jetty called "Ijora Wharf" from which Mobil Oil mostly take delivery of their cargo. This jetty has max. LOA of 115 m. and 18ft. 6 in. draft.

(c) Bunkers are supplied to vessels at these jetties by pipe-line as well as by barges.

(d) Fresh water is also available from both NPA and private barges but difficult in most cases.

DENSITY: 1012.

FRESH WATER: Delivery by barges at between 20 to 40 t.p.h. Advance notification needed. Available by pipe-line at Tin Can Island.

Notice: February 1984.

It is hereby notified to Owners/shipping companies including their Agents that owing largely to the limited quantity of available fresh water in the port, the maximum quantity of fresh water to be approved to any vessel for one request is 50 tons only.

Other new requests for the same vessel will not be approved until all requests previously recorded before them are supplied. The Assistant Harbour Masters will not allow any request for more than 50 tons of fresh water to be paid for. Please ensure strict compliance.

FUEL: Fuel oil available by barge only, coal bunkers obtained from Ijora Wharf. A guarantee of sufficient bunkers to last the period of stay on a berth will be one of the conditions to be satisfied before a vessel is allocated a berth.

SEN also required for vessels taking bunkers only.

Also see "General – Notice No. 2/83".

FIRE PRECAUTIONS: Tankers and vessels with explosives: fire-boat always in attendance with fire-control depot ashore working in conjunction with the Harbour Master on VHF Channel 16. Port area tugboats also equipped for fire fighting.

CONSULS: Most countries maintain Embassies/High Commissions or Consuls.

REPAIRS: Major repairs available. Spares often in short supply.

DRY DOCKS: Authority maintains large, well-equipped dockyard, which, while primarily for maintenance of Authority's own fleet, provides facilities to commercial interests. There is a modern floating dock which has lifting capacity of 4,000 tons. Max. draft 18 ft. Synchro-lift available lifting capacity 100 tons max.

In addition to facilities offered by Authority's dockyard, major shipping agencies in port maintain dockyard installations, including slipways for taking smaller vessels and lighters; can provide first-aid repair for main line vessels.

Bull Nose – No. 1 – can accommodate a vessel of 380 ft. in length and max. draft 16 ft. 6 in.

Bull Nose – No. 2 – can accommodate a vessel of 250 ft. in length and max. draft 16 ft. 6 in.

GANGWAY/DECK WATCHMEN: Compulsory during night while in port. Recommended at night also for vessels anchored Lagos roads unless at least 20 miles offshore as pirates may attack vessel.

If vessel is attacked blow whistle continuously to attract attention of Security Agents, and call Port Authority on VHF Channel 16.

OPENING/CLOSING HATCHES: Stevedores/crew.

CUSTOMS ALLOWANCES: Tobacco allowance: 200 cigarettes per person, re-issue after 7 days. Wine/Spirit: 1 part bottle, re-issue to officers after 7 days.

REPATRIATION: Facilities available for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Ikeja 14.4 km. from port, served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Fixed: New Year's Day (1st January); National Day (1st October); Christmas Day (25th December); Boxing Day (26th December). Variable: Good Friday; Easter Monday; Eid-El-Fitir Festival; Eid-El-Kebir Festival; Maolud Nabiyyi (Mohammed's Birthday). Port closed on National Day, Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police Apapa 45798, Lagos Custom 20030; Ambulance Apapa 41341/227; Fire Apapa 41741, Lagos Custom 20777, General Emergencies 199.

TELEPHONES: No arrangements for telephones on board.

SERVICES: Small services available.

SHORE LEAVE: Crew members allowed ashore after clearance by Port Health and Immigration Authorities.

IDENTIFICATION CARDS: Passports or identity cards.

GENERAL: Notice issued by the Harbour Master in May, 1976:
Will all ships' Agencies note that from the date of this circular letter, Lagos Radio has been instructed to reject any telex messages from any ship addressed to the Harbour Authority unless the itemised particulars are included:

(a) Ship's name.
(b) Ship's call sign.
(c) Ship's Agent's name.
(d) Ship's length overall.
(e) Ship's tonnage loaded.
(f) Ship's draft.
(g) Nature of cargo (i.e. cement, general cargo, etc.).
(h) Last port of call.

Notice issued by the Nigerian Federal Ministry of Health in May, 1976:
Please communicate to all Masters that request for Radio Pratique either by international sanitary codes or otherwise must state clearly the following:

(a) Last port of call.
(b) Number of crew.
(c) Vaccination and inoculation of crew.
(d) Date and time of arrival.
(e) Condition of ship.
(f) Number of passengers onboard.
(g) Name of Agent.

Notice dated 1982 issued by NPA.

The following documents must be despatched with manifest from the last loading port in order to report vessel in advance to the Department of Customs and submit advance manifest to facilitate payment of NPA dues to berth vessel on arrival.

1. Crew Declaration.
2. Crew List.
3. List of Arms and Ammunition.
4. Passenger List.
5. Animals List.
6. List of Ports of Call.
7. Mail List.
8. Authority to Act as Agents.

Two copies of each of the documents are necessary.

NPA Harbour Master's Notice No. 2/83:
"BUNKERING IN PORT

Further to my previous circulars concerning bunkering in port, it is still observed that Masters/Agents of vessels calling at port of Lagos are not advising the Harbour Master before bunkering the vessel about their intention to bunker the vessel.

It is imperative that Masters/Owners of vessels/Agents should, before 'repeat' before bunkering the vessel, forward to the Harbour Master, the N.N.P.C. document showing that the supplier is an authorised one and the NPA Licence permitting the barge to supply vessels with bunkers.

This notice should also be in good time before bunkering the vessel to enable the Harbour Master to advise the Chief Fire Officer about the operation. This instruction should be carried out whenever a vessel is getting bunker to ensure that N.N.P.C. instructions and NPA regulations are complied with, failing which heavy fines must be imposed."

AUTHORITY: Nigerian Ports Authority, Private Mail Bag 12588, 26-28 Marina, Lagos, Nigeria. *Tel:* 655020. *Cables:* Genports.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road, Apapa, Lagos. P.O. Box 2206, Lagos. Tel: 877580, 873887. Cables: "Freight Lagos". Telex: 21244 and 22330. Fax: 874542.

PENNINGTON OFFSHORE TERMINAL:

04.15 N. 05.36 E. **(See Plan)**

COURTESY FLAG: All vessels must exhibit the Nigerian National Ensign from their foremast or as appropriate while in the vicinity of the moorings.

LOCATION: The floating storage vessel, is the VLCC m.v. "Oloibiri" (272,535 d.w.t.) moored to SPM–A, one of two single point mooring berths.

1. SPM-A is located approximately 20 miles off the mouth of Fishtown River in a position
Lat. 4° 14′ 35.2″ N.
Long. 5° 36′ 53.2″ E.

2. The Export Tanker Buoy (SPM-B) is capable of accommodating vessels up to 250,000 displacement tons and is located at
Lat. 4° 15′ 0.0″ N.
Long. 5° 36′ 10.5″ E.
on a bearing of North 60° West and a distance of approximately 5,000 ft. from SPM-A. The minimum water depth at SPM-B is approximately 88 ft.

APPROACHES: Incoming tankers should make their terminal approach from a Westerly direction to a point not less than 2 miles Westward of the Export Tanker Berth. At this location the Mooring Master will board the vessel, or will direct the vessel to the Anchorage (2.5 miles S.W. of the terminal).

Pilot's Report: June 1986. B.A. Chart No. 1863. – 10 fathom depth reported by Pilot to extend 1.5 nautical miles to seaward of the charted position.

DOCUMENTS: Following documents required by Customs and Health Officials.

Last Port Clearance.
Ship's Register.
3 copies Vaccination List.
1 copy Stores List.
1 copy Crew Declaration.
4 copies Crew List.
4 copies Passenger List.
5 copies Animal List.
4 copies Ports of Call (last 6 weeks).
5 Arms and Ammunition List.
3 copies Stowaway List.
3 Crew Labour Lists.
20 Copies Dry Tank Certificate.
Also on arrival, 20 copies of Readiness Letters.

Before sailing and immediately upon completion of loading, vessel must provide 20 copies of Ullage Report.

Government Officials representing various departments may, at their discretion, board the vessels in the Terminal area.

PILOTAGE: (See "Approaches"). The Company Mooring Master, together with Customs Officials will board incoming vessel about 2 miles Southwestward of the Terminal Export buoy. Vessel's Master will be advised on approach to the berth details in respect of mooring, unmooring, connecting and disconnecting hoses, loading operations and departure from the berth.

Vessels are requested to have a combination ladder safely and securely rigged for immediate use, and long enough to reach the Mooring Master's launch. A light line should be ready to take on board the Mooring Master's radio and/or briefcase.

The Mooring Master will remain on board during loading operations and he will be in direct control of all ship communications while in Terminal area.

RESTRICTIONS: Operation of the terminal is on a 24 hour, seven days a week basis, weather and other circumstances permitting.

MAX. SIZE: Max. displacement 250,000 tons.

RADIO: Vessels proceeding to be loaded at the Terminal must cable their ETA to the Company (Cable Address: "Topcon – Lagos") 96 hours and again 24 hours prior to arrival. The Company in Lagos will then notify the Marine Superintendent Topcon, Warri. Also as early as possible prior to arrival, vessels should establish direct communication with the Terminal. The Terminal radio station watch keeping is for 5 minutes at 0700 – 1100 – 1500 – 1900 hrs. GMT.

Call Letters: 5 NDF (Oloibiri)
On A1 Listen on 8362 – 8365 kHz
On A2 Listen on 500 kHz.

Terminal equipped with SATCOM No. 1772103 OLOI X (Atlantic).

Ship to Terminal communication while vessels are in the export tanker berth will be by portable VHF radio-telephone units, provided by Terminal.

The Company Mooring Master will advise ship's Master regarding emergency whistle signals set up for use in event radio-telephone units become inoperative. Use of ship's radio station and/or battery charging is prohibited while loading is in progress.

VHF: When in VHF range vessels shall contact the Terminal on VHF Channel 16 (156.8 MHz).

TUGS: *SPM Vessels:* The Terminal will have available 2 line handling vessels and one SPM-Hose maintenance vessel. These 3 vessels are under the control of the Mooring Master and are used to assist the mooring of the Tanker as required. These service vessels are not available to the Tanker for any other work.

READINESS: The Company will make every effort to load vessels upon arrival, or as promptly as berth is available, weather permitting.

"Notice of Readiness" will be accepted as at time of arrival, provided vessel is in all respects ready to load and subject to task force clearance.

Arrival time will be considered as at the time Mooring Master boards vessel, or at the time vessel anchors off the terminal, which ever occurs first.

The Mooring Master may reject a vessel if in his judgment she is not properly equipped or suitably manned, or if, upon inspection, he deems her to have dirty ballast or tanks unsuitable for cargo. However, Company will not issue any certificate or representation purporting to state that vessel's tanks, pipes and pumps and appurtenances are clean or acceptable for receiving cargo nor will the Company assume any responsibility for "contamination of cargo aboard ship caused by condition of ship's tanks, pipes, pumps or appurtenances".

The vessel shall have in readiness one nylon rope with a minimum diameter of 1 in., approximately 600 ft. long and terminated with a 2.25 in. joining shackle to attach and retrieve the SPM mooring line.

Vessels must be adequately equipped with blocks, tackle and booms to hoist the floating hose string in a safe, efficient and expeditious manner. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect cargo hoses system.

BALLAST: Absolutely no provision is made for dirty ballast. Vessels with dirty ballast will be rejected and all costs therefrom will be to the vessel's account.

It is the Ship Master's responsibility to see that no oil or oily ballast is pumped or spilled overboard. Drip pans must be used at all times and all scuppers must be plugged. The waters in and adjacent to the Terminal must not be polluted, and only clean oil-free ballast and/or clean bilge water may be discharged at the Terminal.

As soon as practicable after arrival, and prior to acceptance for loading, all vessel's tanks will be inspected for evidence of oil in ballast, and during discharge of ballast, similar inspections will continue. If evidence of oil appears at these inspections, the vessel may have to vacate berth. Upon her return, vessel will be obliged to tender new "Notice of Readiness".

If, during the first inspection or during process of loading it is revealed that vessel's tanks are not oil-tight, she will be rejected, or refused further loading.

In addition to lights usually displayed, vessels discharging ballast or loading cargo during darkness will illuminate the area around the ship to satisfaction of the Mooring Master, in order that any oil on the surface of the sea may readily be detected and appropriate action taken. Vessels unable to illuminate sea satisfactorily may not discharge ballast during darkness. Vessels should provide suitable floodlights for working on deck during night operations.

In the event any vessel should accidently discharge dirty ballast or spill oil in the vicinity of the Terminal, the Company shall have the right to take any action that may be necessary to clean up or remove any contamination or pollution resulting from such discharge of dirty ballast or spillage. In addition, the Company shall have the right to settle any claims of third parties arising from such contamination or pollution. All costs and expenses incurred by the Company to carry out the cleaning up of such contamination or pollution or the settlement of third party claims, shall be the joint and several liability of the Vessel, its Owners and Managers, and the Company shall be entitled to claim reimbursement accordingly in any jurisdiction.

Vessels properly equipped will be encouraged to discharge clean ballast and load simultaneously.

BERTHING: All manoeuvring of vessels within the loading berth area is to be done only in accordance with advice of the Company's Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety and manoeuvring of the vessel. Vessel's Master or a qualified Deck Officer must be on bridge at all times during manoeuvring.

EXPORT TANKER BERTH FACILITIES: The Export Tanker Buoy is a conventional SBM which is 10 m. in diameter and held in position by 6 chains secured to piles sunk in the seabed. One mooring hawser with one chain and a single floating hose string extend from the buoy.

CONNECTING MOORING LINES: When the vessel is within reasonable distance of the SPM-B, ship's line will be carried by a line handling launch to the floating buoy line and secured. This line will then be heaved aboard. As the buoy ropes come clear of the water it will be noted that the chain is attached to it. This chain is to be secured to the bits in such a manner that the nylon is outside of the extreme length of the ship; i.e. so that the chain will absorb any chafing if the buoy line crosses the bow. Power must be available at all times on all winches and windlass while vessel is at the berth.

HOSES: The hose system is 910 ft. long (26 sections)×16 in. hose.

LOADING: During loading, the International Code Flag "B" shall be displayed from top-mast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile, and showing unbroken light all around the horizon.

Raising, connecting, disconnecting and lowering of the floating hose system will be performed by vessel's crew under direction and supervision of an appropriate vessel's Officer as advised by the Mooring Master, who will remain on board while the vessel is in moorings.

After the vessel is securely moored the floating hose will be lifted to the rail on the port side amidships. The weight of the lift is approximately 7 tons and is lifted with the vessel's gear. The Mooring Master advises the vessel's personnel in the lifting, connecting, disconnecting and lowering of the hose system. A vessel's Deck Officer must be present, and direct the crew in all hose handling. There must be sufficient crew on deck to perform this work.

The vessel's Master is responsible for own vessel at all times. The max. loading rate is about 22,000 bbls.p.h. and the Company Mooring Master will advise in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the Terminal facilities. Manipulation of the vessel's valves is the direct responsibility of vessel's personnel.

Prior to commencement of loading, the Chief Officer will assure the Mooring Master that sea suction valves are *closed* and he will make note to that effect in Mooring Master's log before cargo loading is started. Final ullaging and computation of cargo will be done by an Officer of the vessel who will hand this information to the Mooring Master for transmittal to the Terminal for use in comparing metered-out cargo.

Caution: The incoming oil stream is controlled by the Terminal and it is extremely dangerous to close a cargo valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hoses, piping or Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Emergency Signal: When normal ship-to-Terminal communications fail, the emergency signal to stop the flow of oil will be a continuous blast on the whistle until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations will be shut down until communications can be re-established.

Fire on Board of Export Tanker: The emergency signal must be given immediately to the Terminal. A vessel's Deck Officer with sufficient crew members must be ready and when so ordered by Mooring Master, close the manifold, disconnect the hose and standby on fo'castle ready to let go of the mooring line.

Terminal Stops: Request for the Terminal to stop the flow of cargo at a predetermined tonnage must be made in writing. Requests must include the statements that the Company will not be held responsible for any error and in case of overloading, the excess cargo cannot be pumped back to the Terminal. Some delays are always incurred when such a Terminal stop request is made.

SAFETY: The vessel's personnel are responsible for the safety of the vessel, and must take all necessary precautions whether or not so advised by the Mooring Master. Any safety precautions imposed by the Company Mooring Master and disregarded by ship's Officers or Crew, will be considered just cause for rejection of the vessel and all expenses and liabilities related thereto will be for account of the tanker.

Not less than 1 Deck Officer and 3 seamen shall be available on deck at all times while vessel is in the moorings.

One of those to be kept always on look-out on the bow to avoid contact with the SBM.

Power must be available at all times on deck winches and windlass while vessel is in the moorings.

The presence of unauthorised craft alongside is extremely hazardous and Masters are requested to require all unauthorised craft to clear the vessel's side prior to ballast pumping and cargo loading.

Mooring Masters are authorised to shut down loading operations during severe electrical storms, if another vessel or craft of any description comes alongside the loading vessel, and under any other circumstances which imperil loading operations.

MEDICAL: Medical assistance on an emergency basis only.

WEATHER/CURRENTS: Wind and swell are mostly from a Southwesterly direction. The weather is generally good from November to May but is unfavourable during the wet season months of May to November. The currents are irregular and at times strong. The Mooring Master will provide the Master with this information when boarding the vessel.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities of any kind are available. Pennington Offshore Terminal is considered an open roadstead and under no circumstances may engines be shut down for repairs while a vessel is moored in the Export Tanker Berth. The vessel must be able to depart from the berth immediately on instructions to do so.

STORES: Not available.

REPATRIATION: Not permitted except in grave emergencies.

SHORE LEAVE: Not permitted.

GENERAL: Cargo inspection services are available from several companies who have offices in Lagos. The use of this service will be for account of vessel or Consignee.

Cash and laundry service not available.

SHIPMASTER'S REPORT: December 1983 (updated 1988).

Radio: Export tanker radio transmits on 8385 kHz and receives on Channels 5/6. Advisable to give tanker a 2 day ETA.

Berthing: During vessel's stay 1 Berthing Master, 1 Cargo Surveyor and 2 Nigerians stay on board and require food and accommodation.

The 2 Nigerians keep a buoy watch together with the vessel's own watchman.

Loading: API is usually 36.9 at 60°F. Loading rate approx. 3,000 t.p.h at 84°F.

After loading there is no EDP and it is necessary to leave the berth, anchor and wait about 2 hours for paperwork.

Customs: Customs inspect store rooms.

SHIPMASTER'S REPORT: January 1986.

Vessel loaded 1,000,000 barrels of Pennington Light Crude Oil.

Documents: The authorities now require 6 copies Vaccination List, 4 copies Stores List and 11 copies Crew List.

Approaches: The Mooring Master boarded the vessel 1.2 miles West of the export tanker buoy.

Radio: The following Standard Messages were received from the storage tanker "Oloibiri":

Standard Message No. 1:
Quote
Note to Master –
On arrival have ready on starboard side the combination ladder (gangway plus pilot ladder) STOP on port side have boom ready to lift the mooring equipment STOP on forecastle have one 1 in. diameter messenger line 600 ft. long STOP on stern have towing line ready for handing to the tug STOP after mooring you will be connected with 1×16 in. hose on your port side STOP please call Pennington Terminal on VHF Channel 16 two hours before arrival STOP thank you STOP Pennington Terminal – MASTER Oloibiri/5NDF +
Unquote

Standard Message No. 2:
Quote
In addition to messages to Topcon Lagos please advise following information to this terminal –
1 – eta Pennington Terminal (4° 14′ 35.2″ N., 05° 36′ 53.2″ E.).
2 – cargo quantity to load.
3 – deballasting time.
4 – last port of call.
5 – next port of call.
6 – port at which cargo to be discharged.
7 – note – loading rate approximately 21,000 barrels per hour. Crude oil API 36.5. Approximate temperature 82° F. Any ballast to be discharged must be clear. – Topcon Warri – Master Oloibiri +
Unquote

Tugs: 2 tugs assist with berthing. 1 tug remains and tows aft throughout the entire stay at the SBM.

Hose Connecting/Mooring: In addition to the Mooring Master, 2 men board the vessel on arrival. They assist with mooring and connecting the hose. They stay on board all the time until the vessel is unmoored.

Surveyor: 1 cargo surveyor stayed on board whilst the vessel was at the SBM.

AGENCY: The Company does not perform general agency functions. Owners of vessels calling at the Terminal may arrange for their own Agents.

NOTE: Should any vessel or craft sink or become an obstruction in the vicinity of the Terminal or at the Terminal, the Terminal Operator shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the owners. All expenses of such removal shall be borne by the vessel or craft or by those owning it at the time of the accident causing the obstruction, and the Terminal Operator shall be entitled to reimbursement by them for any such expenses incurred by it.

OPERATORS: Texaco Overseas (Nigeria) Petroleum Company, P.O.Box 1986, 36 Gerrard Road, Ikoyi, Lagos, Nigeria.

PORT HARCOURT (incl. Okrika Refinery): 04.46 N. 07.00 E.

DOCUMENTS: Ship Entry Notice, See "Lagos".
14 days prior arrival Agent requires:

16 Manifests.
3 Stowage Plans.
3 Hatch Lists.

On arrival at Port Harcourt, Master to present:

7 Ports of Call Lists.
7 Crew Lists.
2 Kroo Boy Lists.
3 Animal Lists.
5 Arms and Ammunition Lists.
1 extra Manifest for transhipment is applicable.
4 Stores Lists.
3 Crew Declaration Lists (belongings).
1 Declaration of Health List.
4 Vaccination Lists.
3 Narcotics Lists.
2 Parcel Lists.
6 Passenger Lists.
2 Stowaway Lists.

Where not applicable, forms to be marked "nil". All other forms including departure documentation prepared by Agent.

PILOTAGE: Compulsory from Bonny Fairway buoy. The pilot station for Port Harcourt is at Bonny, 15 miles from Fairway Buoy, 28 miles from Port Harcourt. The Harbour Master keeps watch on VHF Channels 16 and 14 and on 2182 kHz from 0700 hrs. to 1800 hrs. Pilot boards at Fairway Buoy from pilot-cutter green hull, stone colour superstructure.

Position of Fairway Buoy: Lat. 4° 12′ 56″ N., Long. 7° 00′ 28″ E.

It should be noted that Bonny is an Oil Terminal and as such heavy traffic of tankers is continuous. In extreme circumstances vessels may be requested by Harbour Master to pass the channel from Fairway Buoy at Bonny, and anchor at Bonny without a Pilot, in which case latest Notices to Mariners should be studied in order not to damage oil pipelines in prohibited anchorage areas.

ANCHORAGES: Position West of Fairway Buoy, depths 8 – 9 fathoms. Also on Bonny River at Bonny Town.

RESTRICTIONS: Vessels for Okrika and Port Harcourt can only navigate during daylight.

MAX. SIZE: Also see "Berthing" and "Report". Max. draft is 7.32 m. at HW. Max. length 600 ft., no restrictions on beam. Ebb tide reaches a max. of 3 knots off the berths and 2.5 knots in the river, flood tide 2.5 knots off berths and in the river.

HEALTH: Q-flag to be shown on arrival, except if from another Nigerian port. Yellow fever inoculations compulsory.

RADIO: Master to cable "Agent" Lagos via Lagos Radio ETA 7, 4, 2 and 1 day prior arrival. Master to contact Bonny Harbour Master on VHF Channel 14 on arrival at anchorage giving all vessel and cargo particulars, Agent's name, SEN No., and date of issue.

Master also required to advise Port Harcourt Harbour Master identical information through Lagos Radio and to contact Port Harcourt Agent on VHF Channel 14, keeping watch on this Channel per Agent's instructions.

TUGS: 3 N.P.A. tugs of about 1,000 h.p.

BERTHING: *Port Harcourt:* 8 berths for general cargo at hard quays. Maximum practical draft 7.32 m.

8 dry cargo berths depth 33 ft. – 35 ft.

Mooring buoys, Dockyard Creek with 5 buoys, max. draft 7.62 m.; Dawes Island anchorage discharging for about 12 vessels, max. draft 8.23 m.; Pool 4 buoy berths max. draft 6.01 m.; Tanker buoy 1 berth.

B.O.P. Berth. This berth lies outside the Quay area, and is for the loading of palm oil by means of a direct pipe-line from the installation of Bulk Oil Plants (Nigeria) Limited. It consists of a central "T" jetty with dolphins and is capable of berthing vessels up to 480 ft. in length. It is also used for the discharge of explosives as such cargo is not permitted to be handled across the general cargo Quay.

Oil is supplied by a 6 in. diameter pipe at a maximum rate of 250 t.p.h.

Coal Handling Facilities: Facilities for loading coal have been completed and a conveyor capable of loading about 60 t.p.h. is working. Max. draft at the coal berth is 7.62 m. This berth is situated at the Northern end of the port, berth No 8.

Okrika Oil Refinery: (Lat. 04° 44′ N., Long. 07° 05′ E.). Okrika lies on the Bonny River, 56 km. from the sea. The approach over the bar is by a channel 12.8 km. in length. Depth in channel: See "Bonny". The river from Bonny to Okrika has been dredged as necessary to a depth of 8.84 m. Chart Datum. The bar channel and river are well buoyed with light buoys, port and starboard. There are also beacons in the river. Jetty at the oil refinery suitable for berthing coastal and ocean tankers up to 33,000 d.w.t. The jetty is "L" shaped with a square dolphin at the end of the arm. Ocean tankers secure on the outside of the jetty making fast to two sets of mooring dolphins each end. The coastal vessels and barges are berthed on the inside of the jetty. Oil is supplied via gantry hoses on either side.

Max. draft limit for tankers sailing from port 9.67 m., draft for berthing 7.92 m.

Fresh water available from the jetty.

The tugs based at Port Harcourt are available if required.

Pilotage is compulsory from the Fairway Buoy to the Refinery Jetty except for Naval vessels and vessels of less than 1,000 tonnes whose Master holds a licence issued by the Nigerian Ports Authority. All vessels using the Refinery Jetty will berth and unberth on the flood tide only during daylight hours until further notice.

Also see "Report".

STEVEDORES: Gang requirements and hatch distribution should be included in 48 hours ETA cable to Agent. Discharging general cargo 8 tons per gang/hour, cement 15 tons per gang/hour, bagged cargo 20 tons per gang/hour, loading produce 15–20 tons per gang/hour.

MEDICAL: Doctors available 24 hours, but limited supply of medicines available. Yellow fever vaccination required.

TANKERS: See "Berthing".

DENSITY: Approx. 1015.

FRESH WATER: Limited supply by barge.

FUEL: Most standard lubricants available, fuel and gas oil available by barge or road tanker. Requirements by 48 hours ETA cable.

REPAIRS: Only very minor repairs available, no spares.

GANGWAY/DECK WATCHMEN: Compulsory. Tankers take 4 watchmen and cargo vessels take 16 watchmen. Acts of piracy have taken place at the port. See "Bonny" – "Piracy".

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 bottle spirits per officer per 7 days.

REPATRIATION: Possible via Lagos or Port Harcourt.

AIRPORT: Port Harcourt International Airport 30 km. from port. International and domestic flights.

TIME: GMT plus 1 hour, no changes during the year.

HOLIDAYS: See "Lagos".

POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999.

SHORE LEAVE: Allowed provided crew carry Passport or Seaman's Book.

IDENTIFICATION CARDS: Crew to carry Passport or Seaman's Book whilst ashore.

REPORT: September 1984.

(a) Okrika sailing draft now 31 ft. 9 in.
(b) Compulsory pilotage for all classes of vessels including service boats is now in force.
(c) All vessels are to direct radio messages/cables advising ETA's to the port of destination and not to N.P.A. headquarters in Lagos to avoid delays.
(d) Station Tanker "Maryland" – 152,035 d.w.t., LOA 915.34 ft. Summer draft, 58 ft. and operating on max. draft of about 40 ft. with which she is capable of lifting 85,000 tonnes of product. Vessel's position is approximately Lat. 4° 25′ N., Long. 7° 08′ E. at Bonny Inner Anchorage.

SHIPMASTER'S REPORT: 1977.

The ETA for this port should be sent via Lagos Radio, but much earlier than 48 hours. Better as soon as possible, for communication between Lagos and the out-ports is poor.

The normal practice at the moment is that the Master enters the Bonny River himself after permission from Bonny Harbour Master. The anchorage position on Bonny roads is given by Harbour Master and vessel can proceed as far as buoy 1A. (A few miles up Bonny River).

Discharging at Port Harcourt not only occurs alongside, but from Dawes Island upwards to Port Harcourt. Ships are discharged while laying at anchor. No buoys available. The cement cargo ships especially are discharged this way.

At Dawes Island the Bonny River Pilot leaves the ship and is replaced by a Port Harcourt Pilot.

Tugs are not available for mooring.

SHIPMASTER'S REPORT: May 1982.

Documents: 6 Crew Lists, 5 Passenger Lists (or negative), 8 Arms and Ammunition Lists (or negative), 6 Livestock Lists (or negative), 7 Ports of Call Lists, 2 Bonded Store Lists, 5 Vaccination Lists, 2 Crew Declarations.

As we were a tanker in ballast we did not present any Manifests and Bills of Lading. However, the Immigration Officer asked for a declaration from Master that there were no stowaways on board. No special form used.

Pilotage: Pilot keeps watch on Channel 14 and all traffic passed from this Channel to others (12, 13). As there is a shortage of Pilots, sometimes one Pilot comes out at Fairway Buoy and boards the first vessel to enter. The two or three other vessels entering at same time are directed to follow the vessel with the Pilot on board through the entrance channel to Bonny. When no Pilot waits at "N" buoy, the Pilot on board the first vessel will direct the others to the anchorages at Bonny as far as Buoy 1A.

During our stay it was observed that sailing out was performed at any hour but sailing in was only performed during daylight hours.

As the channel from Fairway Buoy and Bonny is a one-way channel all traffic is controlled by Bonny Signal Station who keep watch on VHF Channel 14 continuously and gives permission to vessels who intend to use the channel regarding the other vessels who are using it.

The Pilot from Port Harcourt to Bonny will normally disembark at Bonny outward bound. However, if another vessel is waiting at the fairway buoy to proceed inward or if requested by Master, Pilot will take vessel to the Fairway Buoy.

Our Pilot left at Bonny Pilot Station and vessel can proceed to sea after getting permission from Bonny Signal Station to do so. If outward channel is not clear from inbound vessels you are requested to wait until the last vessel reaches "N" buoy. In some circumstances they will allow vessels to cross each other near "M" buoy but no further than that.

On this occasion it was noted that "L" buoy (starboard) was missing.

Tankers between Bonny and Port Harcourt can only proceed with Pilot and during daylight hours. When proceeding to Okrika the Pilot boards at Bonny Pilot Station or at Bonny Anchorage and conducts vessel up river to Okrika and berths vessel. If possible he starts from Bonny when tide begins flooding up river, it takes about two hours for tide to reach Okrika and vessels take about same time in steaming, so when we reached Okrika the tide begins flooding.

Tankers berth port side to and use starboard anchor to make the turn. Pass a line to a mooring buoy so that it will be on starboard bow when the vessel is berthed to assist the berthing. After completion of berthing this line is taken in, as it has no more use and on account of thieves. Vessels remain secured by 3 breast lines to dolphins forward and aft and 1 spring line to jetty forward and aft.

When sailing, after taking in all lines, the last ones being one breast line forward and aft, the starboard anchor will assist the vessel to leave the jetty and reach the middle of the channel.

Maximum draft for sailing out of Okrika Terminal is 32 ft. (9.75 m.), when berthed port side to the jetty. If berthed starboard side to the jetty the maximum sailing draft is 25 ft. (7.60 m.). It is convenient when sailing at maximum draft to go to the jetty always port side as if going starboard side to when loaded to 25 ft., vessel has to stop loading, unberth, turn and berth one more time and all these operations must be performed only during daylight hours and at special stages of tide.

Sailing out from Okrika with 32 ft. will be performed in daylight and vessels must leave jetty two hours before high tide at Bonny.

The channel from Okrika to Bonny has been kept dredged to the Chart Datum, it was well buoyed and was made by the vessel loaded without any difficulties. Our sailing draft was 32 ft.

Health: "Q" flag to be shown on arrival, on river and on berth, till the Health Authorities board the vessel and give clearance.

Okrika Jetty: Further to the information above there is a new jetty, down river, close S.E. of the former, which is ready as a normal quay, but will have to have oil loading facilities and pipe-lines, connected to the existing ones at the middle of the connection to shore of the former jetty. The new jetty is provided with six buoy fenders (cylindrical type), four of them in the middle, (the small type) and two (large type) near the extremities of jetty. It is expected that the mounting of pipe-lines, oil loading facilities and other facilities will take about 2–3 years.

Density: During our stay, May 6th – 9th, we experienced the following: at LW 1018; at HW 1019; water temperature 30°C.

Fuel: Fuel oil, diesel oil and gas oil are available. We took gas oil without difficulty but fuel oil takes a long time as occasionally they need to flush all lines and this takes time. Orders must be placed well in advance as it takes a long time to get confirmation from Lagos about the supply.

Shore Leave: No difficulties, but recommended in daylight hours.

Communications: Between Lagos and Port Harcourt are very poor. Telex lines were inoperative at time of our stay and all messages between Lagos and Port Harcourt Agency Offices were passed by radio or telephone with delays.

AUTHORITY: Nigerian Ports Authority, Private Mail Bag 5043, Port Harcourt, Nigeria. *Tel:* 300370/516. *Telex:* 61348. *Cables:* Genports. *FAX:* 335402. *Contact:* Port Administrator.

AGENT: Alraine (Nigeria) Limited, P.M.Bag 622, Port Harcourt. Tel: 084 222.531. Telex: 61120.

QUA IBOE: 04.20 N. 07.59 E. (See Plan)

LOCATION: The Terminal is located on the Eastern side of the estuary of the Qua Iboe River in approximate position Lat. 4° 33′ 00″ N., Long. 7° 59′ 30″ E.

The crude oil storage facilities consist of seven tanks each of 500,000 barrels capacity.

IMPORTANT FEATURES AT QUA IBOE TERMINAL:

1. There are 2 loading SPM's for handling VLCC's up to 300,000 d.w.t.
2. Approximate average API 36.0, average loading temperature 89°F. to 92°F.
3. Vessels proceeding to the safe anchor area should approach from the Southeast, and when instructed to anchor should drop anchor 3 miles Southeast of the Berth Operation Platform (BOP). The BOP is equipped with a Racon, transmitting the letter "K".
4. The Pilot at Qua Iboe Terminal will moor/unmoor and supervise all other operations and movements of the vessel at the Single Point Mooring Buoy and at the anchorage.
5. Safety rules are strictly enforced. The safety requirements are based on the ISGOTT standard regulations.
6. Display of quarantine signals on approach to Qua Iboe Terminal must be maintained until Free Pratique is granted. By day the flag of Nigeria must be flown throughout the vessel's stay in the Terminal area.
7. SPM No. 1 (Berth No. 2): Single Point Mooring (SPM) buoy is located in position Lat. 4° 13′ 05″ N., Long. 8° 02′ 45″ E., approximately 19.4 nautical miles, 170° of the Terminal Tank Farm. Depth of water at the manifold is 85 ft.
   Vessel's max. draft 72 ft.
8. SPM No. 2 (Berth No. 3): Single Point Mooring (SPM) buoy is located in position Lat. 4° 13′ 30″ N., Long. 8° 03′ E., approximately 18.8 nautical miles, 165° from the Terminal Tank Farm. Depth of water at the manifold is 85 ft.
   Vessel's max. draft 72 ft.
9. Charts and Publications: Masters of vessels proceeding to load at Qua Iboe Terminal should obtain the latest sailing directions, charts and hydrographic bulletins for the area.
   In this respect attention is drawn to the following editions of:
   (a) British Admiralty Chart: No. 1860.
   (b) British Admiralty sailing direction: African Pilot Vol. 1.
   (c) U.S. Naval Oceangraphic Charts: No. 2352, 2353.
   (d) U.S. Naval Oceangraphic sailing directions: No. 50 S-West Coast.
   (e) Latest edition of Guide to Port Entry.
   (f) Up-to-date and appropriate tide tables.

ESSENTIAL REQUIREMENTS AND QUESTIONNAIRE FOR TANKERS ARRIVING FOR LOADING:

1. No dirty ballast.
2. Nigerian time is GMT plus 1 hour.
3. All vessels must exhibit the Nigerian National Ensign while in the vicinity of the Qua Iboe Terminal moorings.
4. Vessel to radio the following information prior to arriving at Qua Iboe Terminal Anchorage:
   a. Tanker's name.
   b. Port of Registry/Country.
   c. Summer deadweight.
   d. Last port of call.
   e. Port of destination.
   f. Cargo requirements.
   g. Loading rate required.
   h. Deballasting time prior to commence loading.
   i. Arrival time at anchorage.
   j. Anchoring time.
   k. Master's name.
   l. Master to confirm whether or not Early Departure Procedure is accepted.
5. Vessel to have ready prior arrival:
   a. Port side derrick.
   b. Port side manifold for 2×12 in. hose connections.
   c. Combination ladder or pilot hoist.
   d. One floating ship's rope astern to tie-up tug.
   e. Two ship's ropes at the bow or a long 1.5 in. diameter nylon messenger.
6. Mooring Master and/or Government Officials will meet the vessel in the suggested Safe Anchorage Area.
7. Vessel to provide a good lee for the Mooring Master and/or Government Officials.
8. The Master of the vessel is fully responsible for the safety of his ship at all times.
9. Ship's crew to perform all operations of mooring/unmooring, connecting/disconnecting hoses on board the vessel.
10. Sufficient crews and at least one suitable deck officer must be on duty at all times while the vessel is moored to the SPM.
11. An Agent will be available, if requested by the Charterer/Ship's Operator.
12. The following services are not available:
    a. Shore leave.
    b. Crew changes.
    c. Supply of stores, fresh water, bunkers.
    d. Medical assistance, only on extreme emergency basis and will be debited to the vessel's account.
13. The following personnel live on board throughout the stay of the vessel.
    1 Pilot.
    1 Cargo Surveyor.
    1 N.P.A. Environmental Inspector.
14. Lineboat is tied up astern using a ship's rope.

DOCUMENTS:

The following documents are required by the Nigerian Government Customs Representative at Qua Iboe Terminal:

4 copies Crew List.
4 copies Ports of call within the last three months.
4 copies List of Birds and Animals.
4 copies Passenger List.
4 copies Stores List (with attached list of narcotics).
4 copies List of Arms and Ammunitions.
4 copies Crew Personnel Effects List.
4 copies Vaccination List.
1 copy Sailing Clearance, last port of discharge.
1 copy Loading Instructions (telex).

In addition the Task-force Officials and the Agent require one copy each of the above listed documents.

PILOTAGE: Vessels loading at Qua Iboe will be boarded by a Company Mooring Master either at the anchorage or where directed.

The Mooring Master will advise the ship's Master in regard to the approaches to the berth; and the mooring, unmooring, connecting, disconnection of hoses, departure from the berth and loading operations.

All vessels must have upon arrival a pilot ladder in good, clean condition safely and securely rigged. A vessel arriving with freeboard of 30 ft. or more must use its accommodation ladder in conjunction with the pilot ladder unless a "pilot hoist" or similar arrangement is available.

In the event that a vessel is deemed by the Mooring Master to be improperly or insufficiently equipped with adequate mooring facilities, lines or gear, then he shall so inform the ship's Master. In such an event the vessel will not be brought into the mooring until satisfactory gear or equipment is provided.

ANCHORAGE: Numerous submarine pipe-lines and structures exist in the approaches and close vicinity of the loading berths.

Under no circumstances whatsoever should vessels anchor except in the approved anchorage described below.

The safe Anchorage Area is located 2 miles S.E. of the Berth Operation Platform (BOP) and clear of the SPMs between the parallels of Latitude 4° 10′ North and 4° 13′ North and the meridians of Longitude 8° 03′ East and 8° 07′ East.

Vessels bound for the Qua Iboe Terminal should proceed with extreme caution from the S.E. to the safe Anchorage Area. If uncertain of the vessel's position because of poor visibility stay S.E. and clear of the safe Anchorage Area until visibility has improved.

HEALTH: Pratique may be granted by radio (Lagos Radio).

The vessel should have a clean Bill of Health or an equivalent document from the last port of call. The vessel's Master and all members of the crew shall possess International Certificates of Health showing valid Cholera and Yellow Fever Vaccination Certificates.

MAX. SIZE:

Berth	*Length*	*Beam*	*Draft*
No. 2 (SPM1)	No restriction	No Limit	72 ft.
No. 3 (SPM2)	No restriction	No Limit	72 ft.

RADIO: Cable address: Mobiloil Lagos. Telex: 21228, 22608 and 21801.

Vessels proceeding to load at Qua Iboe must radio:

1. Mobiloil, Lagos indicating their cargo requirements, last port of call and ETA 7 days prior to arrival. When their passage time is such as to not permit a 7 day ETA then the maximum possible advance notice must be given.
2. Mobiloil, Lagos, confirming or amending the ETA given in (1) above at 72 hours and 24 hours prior to arrival.
3. The Nigerian Government Port Health Officer at Lagos at least 72 hours before arrival advising the following:
   (a) Vessel's name and call sign.
   (b) ETA Qua Iboe Terminal.
   (c) Last port of call.
   (d) Cargo requirements.
   (e) Number of crew and whether healthy or not.
   (f) Whether or not a doctor on board.
   (g) Requesting Free Pratique.

If the request for Free Pratique is granted, the Port Health Officer will so advise by radio. If the request has not been radioed to the vessel, the yellow flag "Q" by day or red over white lights by night must be displayed on arrival at Qua Iboe.

In addition, as soon as possible prior to arrival, vessels should establish direct communication with the Terminal ("Qua Iboe Control") on VHF international calling Channel 16 (156.8 MHz) or call on Channel 84 (Qua Iboe Terminal).

Vessels not equipped with VHF or whose equipment is not fully functional should advise Mobiloil, Lagos, at the time of their ETA messages previously referred to.

The (BOP) Berth Operation Platform is fitted with a Racon and transmits the Morse signal "K" (– · –). All vessels equipped with 3 cm. radar will be able to pick this up on their radar screen at a distance of approximately 17 miles – 20 miles.

After direct contact has been established with the vessel, Qua Iboe Control will transmit preliminary requirements and berthing instructions.

VHF: The primary system of communication with the terminal while in berth shall be through the Mooring Master by means of a portable VHF unit provided by the company.

TUGS: None. Terminal launches assist in berthing.

BERTHING: All vessels must be equipped with adequate on-deck and overside lighting. A spotlight should be rigged on the bridge when berthing during the hours of darkness.

To assist in the vessel's turnaround, tankers should have all booms and cargo gear rigged on the port side before the ship is boarded by the Mooring Master.

Berthing Requirements: Berth Nos. 2 and 3: All vessels proceeding to the SPM must secure their anchors with chain stoppers or compressors.

Floating hoses taken aboard on the port side.

The moorings have been designed in general accordance with the recommendations of the SPM Forum. The mooring lines consist of 2×18 in. braided nylon ropes each 160 ft. long with floats attached.

In order to heave the mooring lines aboard, the vessel must have ready on the forecastle a ship's rope or a rope messenger not less than 1.5 in. in diameter and a minimum length of 720 ft. The rope/messenger is led through a fairlead, large enough to permit the entry of a 3.25 in. diameter chafing chain, on port side or centre line (Panama Lead) down to the water clear of the ship's bulbous bow. This rope must have a good lashing attached to the eye.

The terminal line boat assisting in mooring, will proceed to the vessel, as soon as she is within her reach, to pick up the ship's rope and to make the connection with the terminal provided 12 in. circ. polypropylene rope. The ship will then heave steadily on the rope until the chafing chain lies across the fairlead of the vessel.

Tenders by vessels to load crude oil cargo at Qua Iboe, will be normally accepted and berths assigned to vessels in chronological order of arrival providing such vessels have current nomination for cargo valid at the time of tender, carry clean ballast, if any, and have cargo tanks in a fit condition to receive cargo. Also they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

HOSES: Berth Nos. 2 and 3 SPMs are equipped with 2 floating hose strings, 870 ft. long on the left hand and 840 ft. long on the right hand facing the buoys. The over-the-rail hoses have a 12 in. ASA connection provided with a butterfly-valve at the end.

Tanker on Light Draft: Weights of Hose Strings for SPM: Indication of hose strings approximate weights of hose strings in *long tons* (including fittings and floats) with all hoses full of crude oil S.G. 0.850. Assumed total lift 25 ft. above deck level.

Size of Tanker	Inside Diameter of Hoses 12 in. – 16 in.×30 ft.
285,000 d.w.t.	6.8 tons
200,000 d.w.t.	6.0 tons
100,000 d.w.t.	5.2 tons
80,000 d.w.t.	5.0 tons
50,000 d.w.t.	4.5 tons

LOADING: All vessels must be adequately provided with bollards or cruciforms and suitable leads to facilitate the hanging off of the hoses during the lifting operation.

The Mooring Master will inspect the vessel's cargo tanks and will sign the Dry Certificate prior to the commencement of loading.

The Mooring Master may reject a vessel if it is not upon inspection properly equipped or if it is not suitably manned or if deemed to have dirty ballast or tanks unsuitable to receive cargo. Any vessel rejected because of being insufficiently equipped, will automatically nullify her (NOR) "Notice of Readiness" and will not be accepted until satisfactory evidence is produced, that the vessel's gear is in good working condition.

The ship's Master or a suitable Qualified Officer must be on duty on the bridge at all times while the ship is manoeuvring, mooring and unmooring or whenever requested by the Mooring Master.

All mooring, unmooring and hose connection and disconnection must be carried out by the ship's crew under the supervision of a suitable Qualified Officer acting on the advice of the Mooring Master.

Ship's loading manifolds should be prepared for 2×12 in. hose connections prior to arrival at the Qua Iboe Terminal. Sundry equipment should include tools to connect the hoses, nuts, bolts, gaskets and rope strops as none of these items are supplied by the Terminal. All 12 in. hoses have ASA flanges.

The Notice of Readiness will be signed by the Mooring Master on behalf of the Company. The time for giving the Notice of Readiness is the time of the vessel's arrival at the usual anchorage, or the time of boarding of the Mooring Master, whichever is the earlier. Notice of Readiness will not be accepted unless the vessel is ready to load.

Loading normally commences with one booster pump until it is confirmed by the deck officer that the crude oil has entered the ship's tank, loading rate then will be gradually increased until the maximum or requested rate has been reached.

Pumping rate at both SPM's can be expected to be up to 62,000 bbls.hr.

The vessel must give 30 minutes notice to the Mooring Master prior to completion of loading and shall advise if a decrease in loading rate is desired. The Mooring Master will advise the vessel of the expected gross API and the approximate loading temperature.

Upon completion of loading, the vessel will be required to leave the berth immediately after disconnecting hoses to await shore figures and outward clearance at the anchorage.

Pressure Surges: Because of the long lengths and large diameters of the pipe-lines, ships' loading valves must not be closed against the flow of oil.

Vessels provided with mechanically or hydraulically operated valves whose closing time is less than 30 seconds must advise the Mooring Master accordingly. In such circumstances the loading rate may have to be reduced.

EARLY DEPARTURE PROCEDURE: The Early Departure Procedure will be used at the Qua Iboe Terminal. The procedure is as follows:

1. Official Declaration indicating acceptance will be signed by the Master on arrival.
2. The following documents will be prepared in advance according to documentation instructions and delivered to the vessel prior to departure.
   One copy each: Captain's copy.
   Copy via Master to Receiver.
   a. Bill of Lading.
   b. Certificate of Quality.
   c. Certificate of Quantity.
   d. Certificate of Origin.
   e. Ullage Report.
   f. Tanker Time Sheet.
   g. Cargo Manifest.
   h. Receipt for Sample.
   i. Receipt for Documents.
   j. Transmittal Letter.
   All copies to be retained on board the vessel and completed and signed by the Master after sailing.
   The Original Documents to be completed by Terminal Documentation Department after the vessel has sailed, and finally be signed on behalf of the Master by authorised personnel of the company.
3. Although Early Departure Procedure is used, vessel has to wait until final shore figures have been radioed and checked against the ship's figures, after which Customs Outward Clearance will be received. This can involve a wait of several hours.
4. In case of disagreement of ship/shore cargo figures, the Master may submit a Letter of Protest to the Terminal.
5. Vessels which do not comply with Early Departure Procedure Regulations as defined above will have to wait for the Original Documents to be completed at the Terminal and delivered to the vessel for the Master's signature. This may cause a significant delay, since helicopter/boat service discontinues at 1700 hrs. daily and resumes at 0700 hrs. the following day. All delays awaiting Original Bill of Lading preparations will be on behalf and account of the vessel.

BALLAST: *There are positively no facilities for disposal of dirty ballast.*

It is the ship's Master's responsibility to see that no oil of any kind is pumped or spilled overboard from the ship.

This includes oily water from bilges, crude residual from previous voyages or any other matter that may result in pollution of the sea. Any fines imposed shall be to ship's account.

As soon as it is practical, all vessels' cargo tanks will be inspected by the Mooring Master for oil in the ballast, and during discharge of ballast similar inspections will continue.

If evidence of oil appears at any of these inspections the ship will be rejected forthwith and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection or during progress of loading it is revealed that ship's tanks are not tight or that oil is leaking from the ship, the ship may be rejected or refused further loading.

Any vessel rejected because of dirty ballast or sea pollution will automatically nullify its "Notice of Readiness" and will lose any priority of position for loading.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of behaviour of his own vessel, the Master may come to the terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels at the mooring discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will readily be noticeable.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load simultaneously, providing approval is first obtained from the company Operations Superintendent.

DENSITY: 1015 – 1018.

FRESH WATER: Not available.

FUEL: Not available.

STORES: Not available.

MEDICAL: Only emergency medical facilities.

TIME: Nigerian local time is GMT plus 1 hour throughout the year.

CUSTOMS ALLOWANCES: Nigerian Government Customs Officials will board the vessel as soon as possible after arrival to give inward clearance and "Free Pratique" service. Nigerian Government Regulations are strictly enforced.

Cigarettes, cigars, tobacco, matches, spirits, wines, perfumes, arms, ammunition and possible other items have to be locked under Customs seal from time of arrival of ship in port until time of leaving territorial waters.

Each person is allowed 200 cigarettes per week of stay or equivalent amount of tobacco or cigars in lieu thereto. Each person is allowed 1 bottle of spirit and 1 case of beer. Special allowances are made for Masters under special circumstances. If the slop chest items and the bonded store items are not combined in one locker, the Customs Officer has to be informed.

REPATRIATION: Crew changes not possible.

SHORE LEAVE: Not possible.

WEATHER: *Tidal Streams and Currents:* Tidal streams and currents occur throughout the year in irregular directions, however, predominating in an Easterly/Westerly direction with occasional rates of 2 knots to 3 knots.

Winds: Southwesterly to Westerly winds predominate from May to September and at their strongest average between 25 knots and 30 knots. From October to April the winds are variable and unpredictable in force and direction. From December to February winds are mainly from the North and their weakest average is 5 knots to 10 knots.

Squalls: Squalls of varying intensity are common between March and November. These squalls are unpredictable in force and direction and are accompanied by torrential rain, thunder, lightning and sudden shifts in wind direction. During these squalls winds of 55 knots to 60 knots have been recorded.

Masters of vessels are therefore advised to keep a lookout for these unexpected changes in the weather conditions, keeping the engine on constant readiness to be able to leave the berth under full power on short notice.

Sea Swell: Throughout the year a long low Southwesterly swell is prevailing. During the wet season, June to October, this swell together with a rough sea becomes very high, especially during heavy squalls.

Rain: The rainfall is very heavy with a yearly average of about 3,700 mm. There are basically two seasons, a wet season from June to October and a dry season from November to May.

Fog and Visibility: Fog is virtually non-existent. Visibility is good except during heavy rains and during the dry season, when the visibility drops occasionally to 4-5 cables.

Temperature and Humidity: The average temperature is between 28° and 30° celsius. The daily range is from 22° to 35°. The humidity is high, 75% to 85%.

The surface sea temperature is between 26° and 28° celsius.

The sea bottom temperature is between 22° and 24° celsius.

GENERAL: *Agency:* The Company will handle documentation requirements for vessels loading at the Terminal. It does not carry out general vessel agency functions. Ship's mail and personal mail will be handled through the Mooring Master.

"B" Flag: During loading, the International Code Flag "B" must be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red all around light must be displayed where it can best be seen.

SHIPMASTER'S REPORT: December 1984 (Updated 1990).

1 Pilot, 1 N.P.A. Environmental Inspector and 1 Cargo Surveyor live on board.

Immigration and Customs Officials board for usual formalities and store room inspection.

Lineboat tows astern most of time using ship's line.

Although EDP is supposedly used, vessel does not obtain clearance until ship's figures checked against shore figures, after which, Customs Clearance is received. This can involve a wait of several hours. Vessel has to complete consignees' papers after sailing. Supernumeraries may cause difficulties with Immigration, it is best to have everyone signed on.

For vessels waiting, a good anchorage can be obtained in position 03° 55′ N., 05° 46′ E., taking care to avoid the 120 fathom hole in position 03° 55.5′ N., 05° 42.9′ E. When hove up, the cable was very clean with only a little mud on the anchor.

OPERATOR: Mobil Producing Nigeria – Qua Iboe Terminal, Marine Office, c/o Bookshop House, 50 Broad Street, Private Mail Bag 12054, Lagos Nigeria. *Tel:* 600560, 600561, 600562. *Telex:* 21801, 21228 and 22608. *Cables:* Mobiloil Lagos. *Contact:* Captain P.F. Obersteller, Marine Superintendent. Captain P.B. Etim, Senior Mooring Master, Qua Iboe Terminal. S.A. Aworinde, General Manager – Lagos. F.O. Esi, Area Operations Manager – Eket.

SAPELE: 05.55 N. 05.42 E. (See Plan)

PORT LIMITS: Escravos Fairway Buoy.

DOCUMENTS: See "Warri".

APPROACHES: Escravos Fairway Buoy Lat. 05° 30′ N., Long. 05° 04′ E. for entry to Escravos River. Present draft limit 6.4 m. Dredging of channel 100 m. from Escravos down to 10 m. expected to be completed soon.

PILOTAGE: Compulsory for all vessels. Whenever ships are bound for Sapele Port, Masters should send telegram at least 7 days in advance before ship's arrival at Escravos Fairway, to Chief Pilot, Escravos Pilot Station, P.O.Box 368, Warri, Nigeria, via 'Lagos (50W)' comfirming Ship's name, Call Sign, Flag, LOA, Draft, Port of destination, Last Port and accurate ETA Escravos Bar. When Chief Pilot at Escravos Pilot Station is aware of ship's ETA., he will arrange a reliable pilot for the ship, before her arrival at Escravos Bar. On approaching Escravos Fairway Buoy, Master should contact Chief Pilot, Escravos Pilot Station direct on VHF Channel 16 to report vessel's arrival and request the name of the Pilot boarding. Afterwhich the Pilot will be sent onboard outside the Breakwater to pilot vessel up river to Koko Mid-Stream Anchorage, where the Sapele Harbour Pilot normally comes aboard to take vessels alongside. Berthing operations are carried out during daylight hours only.

The mouth of Escravos River (5° 31′ 30″ N., 5° 07′ 20″ E.) is the main entrance for the Niger Delta Ports of Warri, Burutu, Koko and Sapele. Before entering any of the rivers, creeks and channels from Escravos to the above Ports, vessels will embark a Pilot from the Pilot Station before proceeding up river. Positions should be broadcast at frequent intervals and vessel should keep constant VHF listening watch on Channel 16. Pilot Station at Escravos is located 0.5 miles South of the Escravos Beacon and operates from 0700 hrs. to 1800 hrs. daily. Pilot boards inward bound vessels about 2.0 miles S.W. of the Breakwater from a motor boat flying 'SG' in international code Flags. Ships are advised to hoist the same 'SG' flags on the mast, on arrival at Escravos Bar. Positions and movements can be exchanged with other vessels in the vicinity on VHF.

In foggy weather periods, vessels are advised to proceed inside the Breakwater to the Pilot Station to embark a Pilot, as the pilot motor boat is not equipped with navigation aids. The IALA Maritime Buoy System 'A' (Red to Port) is adopted after the entrance down the Escravos River. Vessels should sound 3 prolonged blasts followed by one short blast (– – – ·) on the whistle as "Pilot Call Signal" on arrival at Buoys No. 11/12. when proceeding to the Pilot Station, at intervals of every 10 minutes. In such cases the Pilot will board inward bound ships after 1.0 miles from Buoys No. 13/14. Vessels sometimes drop anchor at the Pilot Station and wait for further instructions from either Koko or Sapele Port Control, before proceeding up river to Koko Mid-Stream Anchorage. On arrival of vessel at the Pilot Station, the Pilot usually boards with one helmsman and they may stay onboard until the ship sails back to Escravos Pilot Station. In most cases the helmsman stays onboard and the Pilot comes back when the ship is ready to sail.

ANCHORAGES: At Koko with max. LOA 170 m. and max. draft 6.4 m.

MAX. SIZE: Max. permissible length 170 m., draft 6.4 m., depth alongside berths 10.0 m.

HEALTH: See "Lagos".

RADIO: See "Lagos" for ETA advices to Agent. Port Authority Sapele to be contacted on VHF Channel 16.

TUGS: A tug is available as Koko to Sapele is a compulsory pilotage district.

BERTHING: Six berths (incl. one Ro-Ro) at new port. Mooring during daylight hours only.

MEDICAL: NPA Port Clinic with a doctor and a number of para-medical staff available Monday to Saturday.

FRESH WATER: Available in Sapele and supplied by water hydrant and by barge.

FUEL: Fuel oil available by barge from Warri. Diesel available locally. Both products in limited supply.

REPAIRS: No facilities.

DRY DOCKS: None.

GANGWAY/DECK WATCHMAN: Compulsory during hours of darkness while in port or at Koko Anchorage.

CLOSING/OPENING HATCHES: Either by crew or stevedores.

CUSTOMS ALLOWANCES: See "Lagos".

REPATRIATION: By road to Benin, or Warri, both connected with Lagos by regular air service.

TIME: GMT plus 1 hour.

POLICE/FIRE: Police/fire services are available in the port every day throughout the year.

TELEPHONES: External (P. & T.) and internal telephones are available in the port.

SHORE LEAVE: See "Lagos".

IDENTIFICATION CARDS: See "Lagos".

AUTHORITY: Nigerian Ports Authority, Sapele Port Complex, Private Mail Bag 4024, Sapele, Nigeria. *Cables:* Genports. *Contact:* The Port Manager.

AGENT: Alraine (Nigeria) Ltd., P.O.Box 4030, Sapele.
Tel. (234) 5441788. Telex: Lagos 21244.
N.B. Correspondence should be addressed to Warri office.

WARRI: 05.30 N. 05.44 E. (See Plan)

DOCUMENTS:

(a) Ship Entry Notice, SEN. (See "Lagos").

(b) 14 days prior arrival Agent requires:
- 12 Copies of Manifest.
- 5 Stowage Plans.
- 5 Hatch Lists.

(c) On arrival Master to present:
- 7 Ports of Call Lists.
- 8 Crew Lists.
- 5 Kroo Boy Lists.
- 2 Vaccination Lists.
- 5 Animal Lists.
- 4 Arms and Ammunition Lists.
- 1 Extra Manifest for Transhipment (if applicable).
- 1 Stores List.
- 1 Crew Declaration List (crew belongings).
- 1 Maritime Declaration of Health.
- 2 Narcotics List.
- 2 Parcel Lists.
- 5 Passenger Lists.
- 1 Stowaway List.

All above to be prepared and if not applicable to be marked nil. Other forms prepared by Agent and furnished on arrival.

(d) Warri Ro/Ro Terminal Company require:
- 12 Copies of Manifest.
- 4 Copies of Dangerous/Hazardous Cargo List.
- 4 Copies of Discharge Plan.
- 2 Copies General Arrangement Plan for each vessel.

PILOTAGE: Compulsory for all vessels. Whenever ships are bound for Warri Port, Masters should send telegram at least 7 days in advance before ship's arrival at Escravos Fairway Buoy to Chief Pilot, Escravos Pilot Station, P.O.Box 368, Warri, Nigeria, via 'Lagos (50W)' confirming Ship's name, Call-Sign, Flag, LOA, Draft, Port of destination, Last port and accurate ETA at Escravos Bar. When Chief Pilot at Escravos Pilot Station is aware of ship's ETA, he will arrange a reliable pilot for the ship, before her arrival at Escravos Bar. On approaching Escravos Fairway Buoy, Master should contact Chief Pilot, Escravos Pilot Station direct on VHF Channel 16 to report vessel's arrival and request the name of the Pilot boarding. After which the Pilot will be sent onboard outside the breakwater to pilot vessel up river to Bennett Island, where the Warri Harbour Pilot normally comes aboard to take vessels alongside. Berthing operations are carried out during daylight periods only.

The mouth of Escravos River (5° 31′ 30″ N., 5° 07′ 20″ E.) is the main entrance for the Niger Delta Ports of Warri, Burutu, Koko and Sapele. Before entering any of the rivers, creeks and channels from Escravos to the above ports, vessels will embark a pilot from the Pilot Station before proceeding up river. Positions should be broadcast at frequent intervals and vessel should keep a constant VHF listening watch on Channel 16. The Pilot Station at Escravos is located 0.5 miles South of the Escravos Beacon and operates from 0700 hrs. to 1800 hrs. daily. Pilot boards inward bound vessels about 2.0 miles S.W. of the breakwater from a motor boat flying 'SG' in international code flags. Ships are also advised to hoist the same 'SG' flags on the mast, on arrival at Escravos Bar. Positions and movements can be exchanged with other vessels in the vicinity on VHF.

In foggy weather periods, vessels are advised to proceed inside the breakwater to the Pilot Station to embark a Pilot, as the Pilot Boat is not equipped with any navigation aids. The IALA Maritime Buoyage System 'A' (Red to Port) is adopted after the entrance down the Escravos River. Vessels should sound 3 prolonged blasts followed by one short blast (– – – ·) on the whistle as "Pilot Call signal" on arrival at Buoys No. 11/12, when proceeding to the Pilot Station, at frequent intervals of every 10 minutes. In such cases, the Pilot will board inward bound ships after 1.0 miles from Buoys No. 13/14. Vessels sometimes drop anchor at the Pilot Station and wait for further instructions from Warri Port Control before proceeding up river to Bennett Island. On arrival of vessel at the Pilot Station, the Pilot usually boards with one helmsman and they may stay onboard until ship sails back to Escravos Pilot Station. In most cases, the helmsman stays onboard and the Pilot comes back when ship is ready to sail.

ANCHORAGES: 1 anchorage known as "the pool", opposite Okorodudu Town; max. draft for pool anchorage 14 ft. MLWS. Further anchorage at Forcados for vessels waiting to proceed to Burutu or Warri.

APPROACHES: Escravos Fairway Buoy Lat. 5° 30′ N., Long. 5° 04′ E. for entry to Escravos River. Present draft limit 6.4 m. Dredging of channel from Escravos down to 10 m. expected to be completed soon.

MAX. SIZE: LOA 156 m., and due to Escravos bar max. draft 6.4 m.

HEALTH: International Pratique Regulations prevail. Pratique *not* necessary when coming from another port in Nigeria.

RADIO: See "Lagos" for ETA advices to Agent. Contact Port Authority and Agent via VHF Channel 16.

TUGS: NPA's 2,100 h.p. tug with fire fighting equipment on board.

BERTHING:

Warri: The new Warri Port facilities now include:

11 hard quay berths of which 1 equipped with ramp for Ro/Ro.

10 buoy berths. Berthing daylight hours only. New Warri Port quay length 1,600 m. and depth alongside 11.50 m. 4 new sheds with total 28,800 sq. m.

Warri Refinery: 2 oil loading jetties and 2 cargo jetties specially for refined products. Berthing only during daylight hours. Refinery jetties total quay length 121.2 m. and depth alongside 7 m. Products available for lifting: AGO, HPFO, LPFO, DPK, PMS, LPGO Butane and Propane. Fresh Water available.

Private Jetty: Delta Steel Corporation at Aladja can accommodate vessels with max. draft 6.4 m.

CRANES: NPA Warri has got one 250 metric tonne floating crane and portal cranes of 10 metric tonnes and 6 metric tonnes. Mobile cranes also available.

UNBERTHING: Agent prepares outward Customs Clearance Certificate and delivers copy to Master. Agent books Pilot and advises Master time of boarding. Vessel to keep continuous watch on VHF Channel 16 for instructions from Harbour Master and Agent.

STEVEDORES: See "Lagos".

MEDICAL: Facilities available.

TANKERS: See "Berthing".

DENSITY: Brackish.

FRESH WATER: Available; delivered by barge or via hydrant.

FUEL: See "Lagos".

FIRE PRECAUTIONS: NPA provides modern fire-fighting equipment.

REPAIRS: Minor repairs only. *N.B.* Spare parts in short supply.

GANGWAY/DECK WATCHMAN: Compulsory in port and at anchorage Bennet Island during darkness.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: See "Lagos".

REPATRIATION: Regular airline services between Warri and Lagos.

TIME: GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: All these services available in port area.

TELEPHONES: Not available – see Agent.

SHORE LEAVE: See "Lagos".

IDENTIFICATION CARDS: See "Lagos".

SHIPMASTER'S REPORT: January 1983.

The vessel departed from Apapa, Nigeria, on the 13th January, 1983, drawing 8 ft. 6 in. forward and 13 ft. 1 in. aft, arriving at Escravos, the entrance of Warri River, on the morning of the 14th January, 1983.

The approach to the Fairway Buoy (Escravos Pilot Station) was impaired by very limited visibility (Harmattan) and the presence of numerous oil platforms and tanker buoys, their positions being unreliable. The coast near the breakwaters has extended by about 1.5 miles, whilst the position was impossible to fix through the lack of a clear picture on the radar screen (Raytheon – 10 cm.), which was in an optimum condition. The Satnav provided the best aid and navigating prudently the Fairway Buoy with "Escravos" painted on it, was sighted. To double check, course was set to Buoy No. 1, which verified our position.

The Agency at Apapa had advised us to engage a Pilot named Bob Gula, but on approach, when calling him over the VHF, numerous rival Pilots tried to contact us. A pilot launch, near us and carrying a placard "Delta Pilots" and flying "U.P." was contacted and a Pilot engaged, there being no sign or word from Bob Gula. The Pilot proved to be a very capable navigator. Fully informed about all aspects concerning the directions to Warri and keeping in close contact with Warri Harbour Control about shipping movements, most essential in these narrow waters.

The Delta Pilots Union is a branch of the Nigerian Union of Seamen and Transport Workers which has a roster of 35 Pilots. Their aim is, and they are succeeding, to provide an efficient and reliable service to vessels and to eliminate the so-called "Pirate" Pilots, who refuse to join the Union and who create chaos on the VHF.

The entrance to Warri River, near the breakwaters, which on departure disappeared from our radar screen at 1.5 miles, very low, is now marked by a pylon, Qk. Fl. (unlit) Nauto, and a pair of buoys, red and green, Nos. 5 and 6. The next ones are numbered 7 and 8, etc. B.A. Charts 3304 and 3305 were used, albeit positions and numbers were incorrect. Except for a few buoys all are unlit, hence only daylight pilotage. At some parts buoys are in pairs, at some parts only single buoys. Least depth sounded was 28 ft., reduced to mean level 24 ft. We were told that 24 ft. vessels are being berthed.

At Bennett Island a Harbour Pilot boards the vessel for berthing. One large and several small tugs are available.

The River Pilot remains on board for the return trip. Accommodation plus food has to be provided.

If anchoring is required, 3 anchorages are available in the vicinity of:
- a. Excravos Lighthouse.
- b. Warri Point.
- c. Bennett Island.

AUTHORITY: Nigerian Ports Authority, Burutu.

AGENT: Intertrans (Nigeria) Ltd., 4 Khalil Road, POB 374, Warri. Tel: (234) 53232039. Telex: 43517.

GENERAL:

REGULATIONS:
The following was translated by Shipping Guides Ltd.

REGULATIONS FOR NAVIGATING AND APPROACHING THE MARITIME DISTRICT OF GRENLAND:

Compiled by the Fisheries Department on 21st January 1988 in accordance with Section 6 of the Law of 8th June 1984, No. 51 covering ports and navigable waters.

Section 1:
Geographical and Appropriate Scope of Effect:

The Regulations are valid for navigable waters to the North of a straight line through the Northernmost point of Molen and the Northernmost point on Sasteinen.

The Regulations are valid for vessels over 50 g.r.t. or where the vessel is not measured with the greatest length over 24 m. with lesser other dimensions as determined in the individual paragraphs. They are also valid for tugs with the greatest length or beam exceeding 24 m. Vessels which push, or those which are pushed shall be reckoned as a vessel in accordance with these regulations.

Within the category of vessels with hazardous cargoes shall also be included those which have very combustible gases on board with a flash point lower than 23° C and which in ballast are not gas-free.

For the transport of bulk chlorine on all occasions the special regulations appertaining thereto are also valid.

Section 2.
Definitions:

Vessels are deemed in these regulations, and as governed by the Law of 8th June 1984 covering ports and navigable waters, to be any floating installation which can be used as a means of transport, navigation, support, production or storage, including underwater vessels of every kind. Also included are hovercraft. The Department, on application will determine by individual resolution or further regulations, what may be determined as a vessel.

G.R.T. means gross registered tons in accordance with the Ships' Measurement Convention of 1947. Conversion of gross tons in accordance with the 1969 Convention to gross registered tons shall be effected in accordance with the Maritime Navigation Directorate Regulations of 14.6.1982 covering measurement of vessels, with subsequent amendments.

For vessels with International Measurement Certifications (1947 Conventions) showing two different gross registered tonnages, the greater tonnage shall be deemed to be valid.

Hazardous Cargo shall be termed as:

1. *Packed hazardous goods and solid bulk loads* which are covered by the terms set out in the International Maritime Safety Convention SOLAS 1974 Chapter VII, Part-A and which are listed in the respective code International Maritime Dangerous Goods Code (IMDG-code) and Code of Safe Practice for Solid Bulk Cargoes (BC-code) Appendix B, with subsequent amendments, the quantity of which is 10 tons or more.

2. *Liquid bulk chemicals* which are covered by the terms set out in the International Maritime Safety Convention SOLAS 1974, Chapter VII, Part B. The materials are set out in codes:

For new vessels (built after 1st July 1986) International Code for the Construction and Equipment for Ships Carrying Dangerous Chemicals in Bulk (IBC Code) Chapter 18 with subsequent amendments.

For existing vessels (built before 1st July 1986) Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (BCH-code) Chapter 6 with subsequent amendments.

3. *Liquid gases in bulk* which are covered by the terms set out in the International Maritime Safety Convention SOLAS 1974 Chapter VII, Part C. The materials are set out in codes:

For new vessels (built after 1st July 1986) International Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (IGC Code) Chapter 19 with subsequent amendments.

For existing vessels (built after 31st October 1976, but before 1st July 1986) Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (Gas Carrier Code) with subsequent amendments.

For existing vessels (built before 31st October 1976) IMO Code for existing gas carriers with subsequent amendments.

Materials which have a flashpoint of 23° C or more shall not be considered as dangerous cargoes.

Furthermore, the following materials shall not be considered as hazardous cargoes.

Product name	*Chemical formula*	*UN No.*	*UN Class*
Ammonium nitrate	NH_4NO_3	1942	5.1
Amm. nitrate fertiliser		2067	5.1
Amm. nitrate fertiliser		2068	5.1
Amm. nitrate fertiliser		2069	5.1
Amm. nitrate fertiliser		2070	5.1
Amm. nitrate fertiliser		2072	5.1
Amm. nitrate fertiliser		2071	9
Argon	Ar	1006/1951	2
Potash lye	KOH	1814	8
Carbon dioxide	CO_2	1013/2187	2
Formic acid	HCOOH	1779	8
Magnesium granules	Mg	2950	4.3
Sodium hypochloride	NaOCl	1791	8
Sodium lye	NaOH	1824	8
Spent caustic			8
Nitrogen	N_2	1066/1977	2
Salmiac spirit	NA_4OH	2672	8
Nitric acid	HNO_3	2031	8
Salt acid	HCl	1789	8
Sulphuric acid	H_2SO_4	1830	8
Titanium trichloride	T_1Cl_3	2441	4.2

The Coastal Directorate will be able to determine whether new materials may be considered as hazardous cargoes. Their deliberations will be based on whether possible damage may result to the environment as the consequence of grounding, collisions, etc.

Section 3
Traffic Centre:

The Traffic Centre at Brevik can set in motion the safety measures considered to be necessary to afford maritime traffic the highest degree of safety at all times. The Traffic Centre cannot actively intervene in the sailing and navigation of a vessel. These regulations do not detract in any way from the responsibility of a Ship's Master for her movement, navigation and manoeuvring.

The Traffic Centre shall see to it that these regulations and orders are complied with.

Vessels approaching or already in navigable waters must address all information and inquiries concerning their sailing and navigation to the Traffic Centre by VHF radio telephone Channel 80, or by telephone or telex. Radio traffic concerning a vessel's commercial operations must be directed over the nearest coastal radio station.

Section 4
Permission:

Vessels wishing to use the navigable waters, must seek prior permission from the Traffic Centre. Permission must be requested in good time and at least 1 hour prior to the arrival of the vessel in the navigable waters or before leaving her berth, anchorage or other mooring installation in the navigable waters.

Vessels carrying hazardous cargo must, however, report their arrival in the navigable waters 24 hours in advance.

The Traffic Centre can, where necessary to ensure safe traffic development, amend, withdraw or set special conditions for permission.

The Traffic Centre can, in individual cases, give a vessel permission to use parts of the navigable waters.

When applying for permission, the following details must be given to the Traffic Centre:

a. Name of Vessel.
b. Call Sign.
c. Nationality.
d. Name of Master.
e. Length Overall.
f. Beam.
g. Draft.
h. GRT.
i. Port of destination.
j. Type of cargo.
k. Amount of hazardous cargo in tons.
l. Estimated time of arrival.
m. Estimated time of departure.

Vessels are required to give further information which the Traffic Centre may deem essential for a safe and effective development of traffic or which the Master of the vessel considers to be necessary.

Section 5
Position reporting and requirements for listening:

Vessels intending to use the navigable waters, must be equipped with fully operative maritime VHF radio telephone.

Such VHF radio installations must be operated from the vessel's mains voltage, but must have the facility for rapid changeover to battery operation, or the vessel must be equipped with portable VHF with battery charger. Such portable VHF must have sufficient range.

All communications with the Traffic Centre on VHF Channels 80, 16, 14, 13 and 12 are automatically recorded on magnetic tape.

Vessels must send a position report on:

a. Passing the Southern limit of the navigable waters.
b. Leaving the quay, anchorage or mooring installation.
c. Arrival at the quay, anchorage or mooring installation.
d. Passing other positions which may be determined by the Traffic Centre.
e. In the event of accident.
f. The request of the Traffic Centre.

Reports must contain the following information:

On entry:
Name of vessel.
New time of passing the Southern limit of the navigable waters.
New estimated time of arrival at the quay, anchorage or mooring installation.
New time of arrival at the quay, anchorage or mooring installation.

On sailing:
Name of vessel.
Time of leaving the quay, anchorage or mooring installation.
Estimated time of passing the Southern limit of the navigable waters.
Actual time of passing the above limit.

On sailing within the navigable waters:
Name of vessel.
Sailing time from quay, anchorage or mooring installation.
Estimated time of arrival at the quay, anchorage or mooring installation.
Time of arrival at the quay, anchorage or mooring installation.

The position report must be addressed to the Traffic Centre on VHF Channel 80.

If this position report cannot be given directly to the addressee VHF station, it must be transmitted without delay by another means, in port by the use of telephone or telex, and at sea over Tjome Radio.

Vessels underway in the navigable waters must listen out continuously on VHF Channels 16 and 80.

This requirement is valid for all vessels equipped with VHF radio telephones, irrespective of the vessel's size.

Section 6
Limitation of visibility:

Where visibility is less than 1 nautical mile (1,852 m.) in the navigable waters or a part of them, the Traffic Centre will hold back all vessels with hazardous cargoes.

Where an anchored vessel with hazardous cargo has free visibility to the quay or mooring installation, the Traffic Centre may, nevertheless, permit her to proceed to such quay or mooring installation where the Centre considers it to be appropriate. The same holds good for movement from the quay or mooring installation to a nearby anchorage.

Section 7

Capacity limitations:

On passing Dypingen, Kalven and Brevikstrommen, no vessel may have an overall length, beam and draft exceeding those quoted below:

Dypinen:

LOA	198.1 m. – 650 ft.
Beam – vessel with hazardous cargo	27.4 m. – 90 ft.
Beam – other vessels	30.5 m. – 100 ft.
Draft	10.4 m. – 34 ft.

Kalven:

LOA	274.3 m. – 900 ft.
Beam	45.7 m. – 150 ft.
Draft	13.4 m. – 44 ft.

Brevikstrommen:

LOA	198.1 m. – 650 ft.
Beam – vessel with hazardous cargo	27.4 m. – 90 ft.
Beam – other vessels	30.5 m. – 100 ft.
Draft	9.9 m. – 32.5 ft.

Pilots in Grenland can, in special circumstances, give vessels with a draft up to 10.4 m. (34 ft.), without hazardous cargo, permission to pass Brevikstrommen in daylight.

Section 8

Traffic separation:

The Traffic Centre indicates which course the vessel must use between Langsundsbukta and Brevik when she applies for permission to enter the navigable waters.

Section 9

Anchoring:

Vessels may only anchor if it is necessary. Before a vessel proceeds to an anchorage, permission must be obtained from the Traffic Centre. The Traffic Centre, on the grounds of safety, may indicate a specific anchorage to which the vessel may proceed. Anchoring, with undernoted exceptions, may only take place in the following areas and positions:

Helgerofjord:

A. Amlirogna Light in a straight bearing 062°, 0.6 nautical miles distant.

B. Amlironga Light in a straight bearing 046°, 0.4 nautical miles distant.

Eidangerfjord:

C. North on a line running East-West through Southernmost point of Orviktangen.

Frierflaket:

D. Ringsholmen Light in straight bearing 192°, 1.1 nautical miles distant.
E. " " " " " 207°, 1.1 " " "
F. " " " " " 202°, 0.9 " " "
G. " " " " " 212°, 0.9 " " "
H. " " " " " 219°, 0.7 " " "
I. " " " " " 226°, 0.9 " " "

Herrebukta:

J. Rafsnes Quay No. 3 in straight bearing 125°,0.7 nautical miles distant.

K. Rafsnes Quay No. 3 in straight bearing 125°, 0.4 nautical miles distant.

Traffic Centre can in special cases indicate other anchorages.

A vessel may anchor outside these areas where it is necessary to avoid danger. The Traffic Centre must then be informed immediately.

The Traffic Centre can refuse to give vessels at anchor permission to leave the anchorage, and can order already expedited vessels to leave anchorages.

Section 10

Use of Tugs:

Vessels over 500 g.r.t. carrying liquid condensed gases and vessels over 2,000 g.r.t. carrying hazardous cargo in bulk as defined in these Regulations must have tugs attached during entry and leaving and during manoeuvring to and from quays, mooring installations or anchorages.

The Traffic Centre can instruct a vessel which is under the above-mentioned tonnage limits and which is carrying gas or other hazardous cargoes in bulk to use tugs.

On entry, the tow lines must be connected immediately after the Pilot has come on board, insofar that wind and sea conditions do not prevent it. On sailing, tugs must be attached before vessels leave the quay, mooring installation or anchorge, and until they have passed Aroya.

The Traffic Centre can, when from a safety aspect it is deemed necessary, order the use of several tugs.

Vessels without hazardous cargo, but which exceed one or more of the following dimensions,

LOA	182.9 m. – 600 ft.
Beam	26.2 m. – 86 ft.
Draft	9.9 m. – 32.5 ft.

must have tugs attached when underway in a zone which in the South is limited by a line on bearing 045°/225° True, through Gjermesholmen Light and in the North limited by a line on bearing 270° True, through Saltbuodden Light.

Tugs used must have the capacity to control the movements of a vessel at all times.

Section 11

Tow lines:

During entry and sailing, vessels with hazardous cargo must have attached and lowered to the water fore and aft a spark-preventing and fire-resistant tow line with eye.

Section 12

Pleasure boat traffic:

Pleasure boats and open craft must refrain from entering the paths of large vessels and vessels navigating at night. They must as far as possible sail along the coast within a distance of 100 m.

Pleasure boats and open craft must not cross the path or course in such a way that the progress of a vessel which can only sail safely in such path or course is prejudiced. Sea Navigation Regulations 44 and 9 also apply.

The current section covers pleasure boats and open craft irrespective of their size.

Section 13

Dispensations:

In very special cases, the Coastal Directorate can give dispensation from these regulations. Application for dispensation must be submitted in writing to the Coastal Directorate as far as possible 1 month prior to the vessel's arrival. The Traffic Centre may in very special circumstances grant dispensation from the terms covering permission in accordance with Section 4.

Section 14

Penalties:

Where intentional or inadvertent transgressions of these regulations occurs, penalties in accordance with Penal Law Section 418 will be applied, unless stronger penalties are deemed necessary.

Section 15

Validity:

These Regulations enter into force on 1st March 1988. From that date, the Regulations covering entry in the port districts in Grenland as promulgated by the Fishery Department on 1st March, 1984, are cancelled.

(Coastal Directorate/Nautical Department, Oslo, 5th February 1988).

PILOTAGE:

REGULATIONS FOR THE USE OF PILOTS IN THE GRENLAND AREA

Issued by the Fishery Department 25th March 1988 in conjunction with the law governing the use of pilots of 9th April 1948. No. 2 Section 5, confirmed by Royal Resolution 29th April 1977.

Section 1

State Pilots must be used by vessels over 100 g.r.t. navigating in the waters to the North of a line through the North point of Molen – North point of Sasteinen. Furthermore, to the South of a straight line from Herreelva in Bamble to the Southern end of the Western Quay at Porsgrunn Factory.

Section 2

Vessels in these regulations are, in the law covering pilot usage of 9th April 1948 Section 1, also include lighters, loaded barges, pontoons, drilling platforms and similar floating installations, floating docks and dredgers.

G.R.T. means gross registered tons in accordance with the Ships' measurement Convention of 1947. Conversion of gross tonnage in accordance with the 1969 Convention to gross registered tons is effected in accordance with the Maritime Directorate Regulations of 14th June 1982 covering measurement of vessels, and subsequent amendments.

For vessels with International Measurement Certificate (1947 Convention) which indicates two different gross registered tonnages, the highest tonnage shall be taken as that valid.

Section 3

The Coastal Authority's No. 1 District or those which it authorises can give dispensation from the conditions in Section 1 for vessels under 500 g.r.t. which are not carrying hazardous cargo, when the ship's Master can prove that he frequently visits ports in the area and has therefore gained knowledge of the navigable waters and has always complied with the rules and conditions valid on each occasion for sailing and navigating in the navigable waters.

Furthermore, dispensation can also be given for vessels under 2,000 tons g.r.t. which are not carrying hazardous cargoes or cargoes covered by the rules in the International Convention governing the prevention of Pollution for ships MARPOL 73/78, where the Master or Chief Officer can prove that he has frequently visited ports in the area and has gained navigational knowledge of an adequate nature, and that he is well acquainted with the regulations and conditions which on every occasion are valid for navigation and sailing in the navigable waters. For Chief Officer it is required that in such cases they fulfil the conditions for acting as Masters of incoming vessels.

Dispensation may also be forthcoming on some strict conditions from the terms of Section 1 for vessels of 2,000 g.r.t. or more which are not carrying hazardous cargoes or cargoes which are covered by the rules in the International Convention covering prevention of Pollution from ships MARPOL 73/78. Ships' Masters or Chief Officer must in such cases also be able to prove that within the last 24 months they sailed in the navigable waters under the guidance of a State Pilot in the vessel in question or corresponding with at least 8 voyages in the navigable waters. Furthermore, ships' Masters or Chief Officer must present themselves to the Pilotage Authority in Grenland for examination concerning knowledge of the navigable waters and current regulations. The Coastal Directorate will give more precise details of this on application.

Requests for dispensation must be sent through the ship's Agent to the Pilotage Authority in Grenland. Dispensations given are valid for up to 2 years but can, however, be extended.

Section 4

When dispensation is used, there must be a navigator on the bridge who, in accordance with the conditions of Section 3, fulfils the requirements for navigation in the area without the use of a State Pilot.

Section 5

Where intentional or inadvertent transgressions of these regulations occur, penalties in accordance with Penal Law Section 418 will be applied, unless stronger penalties are deemed necessary.

Section 6

These regulations permit no alterations in the rules for the use of a state pilot for foreign non-military vessels over 50 g.r.t. as per Royal Resolution of 9th February 1968 covering forbidden maritime areas on Norwegian territory.

Section 7

These regulations come into force on 1st April 1988.

From the same date, the Regulations covering the use of pilots in the Grenland area as promulgated by the Fishery Department on 21st June 1978 with subsequent amendments are cancelled.

AUTHORITY: Coast Directorate (Harbour, Lighthouse and Pilotage Services), P.O.Box 8158, 0033 Oslo 1, Norway. *Tel:* (02) 11 40 90. *Telex:* 21555 KDIR N. *FAX:* (02) 42 48 35. *Cables:* Kystdirektoratet, Oslo, Norway.

AAHEIM: 62.02 N. 05.32 E.

SHIPMASTER'S REPORT: January 1989.

LOCATION: Aaheim, a small ore exporting village, lies in the Vanelvs Fjord. The berth is well sheltered by the islet of Torvhl in the West and the mainland to the South and East.

DOCUMENTS:

Ship's Register.
Stores List, 2 copies.
Private Property List, 2 copies.
Crew List, 2 copies.
Maritime Declaration of Health.

PILOTAGE: Give 24 hours notice of ETA to Kristiansund Pilots. (See "Notice"). When approaching from the South, the Pilot boards in position Lat. 62° 12′ N., Long. 05° 18′ E. When approaching from the North, the Pilot boards off Runde Island.

ANCHORAGE: None available outside. If due to strong winds vessel is unable to berth, then it is possible to anchor about 0.5 miles West of Fiskaahl Light (North of Slagnes).

MAX. SIZE: Max. permissible draft 13.5 m.

TUGS: One tug is available at all times. If a second tug is required, it may be called from Alesund.

BERTHING: Vessels normally berth port side to. The length of the quay available for loading is limited. Hence one shore fibre line has to be picked up and made fast at the stern. This acts as a stern line. As the stern extends outside the jetty, the remaining lines are all back springs. At least one breast line should be given due to the possibility of strong offshore winds.

LOADING: For loading lump olivine, only one shore loader is available, which runs on rails over a length of 75 m. The loader has an outreach of 16 m. The vessel has to be shifted frequently to enable loading at all hatches. The rate is claimed to be 1,000 tonnes p.h. but averages about 800 tonnes p.h. due to frequent conveyor breakdowns. For the finer grades (0 – 3 mm.) a rate of 2,500 tonnes p.h. can be achieved.

DENSITY: 1025.

FRESH WATER: Excellent drinking water available. No charge. Shore hoses available.

FUEL: Not available.

REPAIRS: Only minor repairs possible.

REPATRIATION: By taxi to Alesund and a 45 minute flight to Oslo.

CUSTOMS ALLOWANCE: 1 bottle spirits and 200 cigarettes per person.

GENERAL: Olivin (Magnesium Silicate + 7% Iron Ore). The world's largest deposit is found in Norway.

The annual world consumption of olivin is about 5 million tonnes and 2.1 million tonnes is shipped every year from Norway, thereby meeting almost 40% to 45% of the world's needs.

Holds/Tunnel Wash: No restrictions. Possible to wash down cargo holds and tunnel when alongside. However, the Agent has to be informed.

Stores: Not available.

NOTICE: Dated: July 1988.

INFORMATION ABOUT THE PILOT SERVICE IN MORE AND TRONDELAG:

The Coast Directorate has established new Regulations regarding ordering of pilot services.

As it will take some time before an official translation into English language is ready for distribution from the central authorities, we give below some information about the main points:

Vessels approaching from the sea, and vessels in port, which desire a pilot or due to national regulations are enjoined to use pilot in restricted areas, shall order the pilot with at least 24 hours notice.

The order shall be confirmed 6 hours before arrival/departure and a final confirmation should be given 2 hours before arrival at the pilot station (boarding ground) or departure port.

When ordering a pilot the following information should be given about the vessel:

(a) Name.
(b) Call sign.
(c) Nationality.
(d) LOA and beam, or gross registered tonnage.
(e) Draft.
(f) Type of cargo.
(g) Destination.
(h) Purpose of call.
(i) ETA pilot station (boarding ground)/ETD port.
(j) Whether one or two pilots are required.

If the pilot has been ordered to report to a certain place at a certain time, but has to wait for the ship, waiting money has to be paid according to the Regulations for Coastal fees.

If long waiting time occurs, the pilot may be called back, due to lack of available pilots. A new pilot must then be ordered.

The new Regulations are implemented 1st August 1988.

More and Trondelag Pilot District includes the pilot stations Trondheim, Kristiansund N., Aalesund and Runde. The office is situated in Kristiansund and ordering of pilots from the stations mentioned should be given to Kristiansund.

Post address: Losoldermannen i More og Trondelag,
Kaibakken 1,
6500 Kristiansund N.,
Norway.

Telephone: 073 – 70800.

Out of office hours the pilot cutter, if the cutter is in port, receives orders for pilot on the same telephone number. If she is at sea, mobile telephone number 090 – 32997 may be used.

For direct communication between vessels and pilot cutter, maritime VHF radio-telephone may be used.

Signed: Pilot Master.

OPERATOR: A/S Olivin, N-6146 Aaheim, Norway. *Tel:* 070-24016. *Telex:* 42307. *Cables:* Olivine. *FAX:* 070-24266. *Contact:* Mr. H. Berget (private tel. 070-24152), Mr. S. Solheim (private tel. 070-24182).

AGOTNES: 60.25 N. 05.01 E. (See Plan)

DOCUMENTS:

1 General Declaration.
2 Cargo Declarations.
1 Stores List.
1 Health Declaration.
1 Personnel Effects.
2 Manifests.

PILOTAGE: Usual entrances to port at Korsfjord and Fedje.

Provisions for Advance Reports in connection with the ordering of Pilots. Issued by the Director of Pilotage.

1. Vessels approaching from the sea and desiring a Pilot should order the Pilot at 24 hours notice insofar as possible and confirm arrival at pilot station at 2 hours notice.

The advance order can be sent in the following manner:

a. From ships at sea over radio direct to the sea pilot watch (calling frequency 2182 kHz from 2 minutes past until 10 minutes past each full hour, or over VHF-radio telephone, calling frequency 156.80 MHz, Channel 16).
b. From ships at sea over coastal radio station to pilot station or pilot office.
c. From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey the report to the sea pilot station.

2. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours notice.

3. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order state the name and destination of the vessel and whether 1 or 2 Pilots are desired.

4. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.

5. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.

ANCHORAGE: About 1,600 ft. North of CCB Quay, depths 29 m. – 74 m.

RESTRICTIONS: No special restrictions upon entry to the port.

MAX. SIZE: Water depths up to 60 ft. at quayside.

HEALTH: No Certificates required. In event of any disease or fever, contact Agents.

RADIO: All messages to Agents via Bergen Radio or Rogaland Radio.

VHF: Bergen Radio on Channel 16 or direct on Channel 10 (24 hour service).

TUGS: Available upon request. Vessel's lines usually used. No extra charge for tug's line.

BERTHING:

West side, quay of 180 m. long. Depth of water 60 ft.
East side, quay of 105 m. long, Depth of water 14 m.
North West side, quay of 120 m. long. Depth of water 7.2 m.
South side, 2 berths, each 60 m. long. Depth of water 10 m.

CRANES: 1 Mobile crane 210 tons lifting capacity. 4 Mobile cranes 50 tons – 100 tons lifting capacity.

BULK CARGO FACILITIES: For drilling mud and cement only.

SPECIALISED CARGO HANDLING FACILITIES: Loading/unloading carried out by mobile cranes and trucks.

BRIDGES: Bridge between Knarrevik and Drotningsvik. Height at mean level 50 m.

STEVEDORES: Provided by Coast Centre Base.

MEDICAL: 4 hospitals available (Bergen). No advance notice except serious illness.

TANKERS: Bunker line 6 in. No slop facilities.

DENSITY: About 1024.

FRESH WATER: Can be supplied alongside the quay, rate 70 t.p.h.

FUEL: New tank of 5,000 cu.m. 3 ships may take bunkers at the same time at a rate of 120 cu.m./hr.

No advance notice required.

CONSULS: (in Bergen). Belgian, Brazilian, British, Danish, Finnish, French, Greek, Islandic, Netherlands, Panama, Peruvian, Portuguese, Spanish, Swiss, Swedish, Turkish, German (F.R.), Uruguay, Austrian.

REPAIRS: All repairs possible.

DRY DOCKS: Available in Bergen. 3 Dry docks 365 ft. long with 12.5 ft. – 21 ft. depth on blocks.

1 floating dock for vessels up to 10,000 g.r.t. and 2 smaller floating docks. Largest vessel 51,839 g.r.t. Draft 34 ft. 4 in.

Drafts up to 35 ft. can be accommodated.

SURVEYORS: Lloyd's, A.B.S. and Norske Veritas.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: 0.75 litres of spirit and 200 cigarettes for each member of the crew.
REPATRIATION: All facilities available for crew changes.
AIRPORT: 35 km. from Bergen Airport served by regular airlines.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Years Day (January 1st); Maundy Thursday; Good Friday; Easter Monday; May 1st; May 17th; Ascension Day; Whit Monday.

Cargo work can be arranged with special agreement.

POLICE/AMBULANCE/FIRE: Bergen 002; Bergen 003; Bergen 001 respectively.
EMERGENCY CO-ORDINATION CENTRE: Tel: Bergen 002.
TELEPHONES: No arrangements for connection on board ships. Telephone box on quayside.
SERVICES: Compass adjuster, Radio/Radar service. Also calibration of the Direction Finder, Ships laundries.
BANKS: Bergen Bank, 5364 Kystbasen – Agotnes.
STORING: See "Prelims".

1. Vessel can be stored by barge or truck.
2. No special regulations regarding storing.
3. Trucks can proceed alongside at the berth.
4. Forklift trucks are available.
5. No special regulations regarding customs.
6. Local riggers can be employed on request.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No particular or unusual regulations.
DELAYS: No particular reason for delays.
DEVELOPMENT: A new Ro/Ro berth is planned at Dock No. 31.
AUTHORITY: KS Coast Center Base, P.O.Box 55-CCB, 5364 Kystbasen, Agotnes. *Tel:* (05) 92 30 00. *Telex:* 42 835 ccb n. *FAX:* (05) 335191. *Contact:* Knut Aas, Managing Director. Hans Agotnes, Harbour Master.

ALESUND: 62.27 N. 06.09 E. (See Plan)

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Customs Documents.
1 Health Documents.
3 Manifests.
3 Bills of Lading.
1 Ship's Papers.
1 Stores Lists (provisions).

PILOTAGE: From open sea, Pilot is taken on board at Rundo Pilot Station. Watch 24 hours a day. To be called 3 – 4 hours before ETA by VHF 16, or radio.
ANCHORAGE: On the North side of the town in Valderhaugfjorden in depths of 20 m. – 60 m.; bottom, sand and mud.

On the South side of the town in Aspovagen in depths of 20 m. – 40 m., bottom mud.

RADIO: Alesund Radio 2182 kHz and VHF Channel 16. Harbour Office (VHF Channels 16 and 12) is manned 24 hours. Tel: 21425.
TUGS: Meet vessel normally before entering the harbour, or by order.
BERTHING: *Storneskaia:* East side, length 85 m., depth 6 m. – 14 m. On this side Ro/Ro berth available ramp width 22 ft. South side, length 153 m., depth 10 m. – 14 m. West side length 60 m. depth 5.0 m. Warehouse capacity 1,600 sq.m.
Prestekaia: South side, length 220 m., depth 13 m. – 16 m. West side, length 40 m., depth 5 m. – 13 m. North side length 41 m. Depth 5 m. – 13 m. Warehouse capacity 4,100 sq. m.
Skutvika: Special quay for fishing vessels, length 330 m., depth 4 m. – 6 m. Only mooring on N.E. side. Quay, length 80 m., depth 4 m. – 7 m.
Sjogata: Mooring quay, length 180 m., depth 8 m. At Northern Harbour there is one commercial quay.
Skansekaia: North side, length 195 m., depth 10 m. – 13 m. West Side, length 60 m. Depth 4 m. – 8 m. South side, length 130 m., depth 4 m. – 5 m. This quay forms protection for a small inner harbour with several smaller quays.
Flatholmen: Length 50 m. Depth 7 m. Dirty ballast facilities available.
Brunholmkaia: Length 100 m., depth 4.0 m.
Skansegata: Length 200 m., depth 6.0 m.
Spjelkavik Kai: Length 90 m., depth 7.0 m.
STEVEDORES: Obtained by Agent who requires ETA 12 hours before ships arrival.
CRANES: Mobile crane to lift 18 tons available. Floating crane to lift max. 100 tons available.
CONTAINERS: Depot for containers.
FRESH WATER: Available. Tel: 071-21425.
FUEL: Bunkering facilities from all major oil companies. Loading by barge or pipe-line at berth.
REPAIRS: Available.
DRY DOCKS: 2 dry docks, lifting capacities 2,750 tons and 8,000 tons.
SURVEYORS: Det Norske Veritas. Tel: 071-25290.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: This work is normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle of spirits.
AIRPORT: Alesund Airport, Vigra. Passenger flights (3 times a day) to and from Oslo. Trondheim, Bergen.
TIME: GMT plus 1 hour, GMT plus 2 hours in Summer.
HOLIDAYS: 1st May; 17th May.
POLICE/AMBULANCE/FIRE: Police 21321; Ambulance 25560; Fire 22000.
TELEPHONES: No arrangements for placing telephones on board.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Alesund Havnevesen, Skansekaia, 6002 Aalesund, Norway. *Tel:* 071-21832 or 21425. *Contact:* Lars Alvestad, Harbour Master. Tel: 071-45561 (Private).

ALVIK: 60.26 N. 06.24 E.

Alvik located in inner part of Hardangerfiord. Ferrosilisium works. Vessels from abroad may call Haugesund for Inward Customs' Clearance.
DOCUMENTS: See "Bergen".
PILOTAGE: Compulsory. Belonging to Bergen Customs' District.
BERTHING: Quay No.1: Length 80 m. 2 cranes, 7.5 and 9.5 tons. Quay No. 2: Length 90 m. 1 crane 7.5 tons. Depth alongside 7.5 m.
AUTHORITY: Alvik Port Authority, Bjolvefossen a/s, N-5614 Aalvik, Norway. *Tel:* 05-557200. *Telex:* 42146. *FAX:* 05-557305. *Cables:* Ferro Aalvik. *Contact:* Arvid Auganaes, General Manager.

ARDALSTANGEN: 61.14 N. 07.42 E. (See Plan)

LOCATION: Ardalstangen Aluminium works located in innermost part of Sognefiord. Lat. 61° 14′ 03″ N., Long. 7° 42′ 28″ E.
DOCUMENTS:

Receivers:	Bills of Lading.
	Manifests.
Customs:	Crew List.
	Bills of Lading.
	Manifests.
	Health Documents.
	Ship's Certificates.
	Ship's Papers.
	Ship's Stores Declaration.
	General Declaration.
	3 Crew Lists.
	Crews Personal Effects Declaration.
	Inward and Outward Clearance.

PILOTAGE: Compulsory. Pilots belong to Bergen Customs District.
ANCHORAGE: Depth 500 ft.
RESTRICTIONS: No berthing after 2100 hrs. or before 0600 hrs.
RADIO: 12 hours notice of ETA required.
VHF: Channel 16.
TUGS: None available. Local lineboat available if required at a cost of NoK. 1,000.
BERTHING: One quay, length 600 ft., depth alongside 40 ft. 1×14 ton crane, 1×5 ton crane and 1×25 ton crane.

One quay, length 300 ft., depth alongside 36 ft. 1×30 ton crane.
The berths are ice free.

STEVEDORES: No work Saturdays, Sundays and holidays.
MEDICAL: Advance notice required if medical attention needed. Tel: 47-56-61388.
DENSITY: 1026.
FRESH WATER: Available, cost NoK. 200 per filling.
OPENING/CLOSING HATCHES: By crew.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: 1 hour 20 minutes by ferry to airport at Sogndal.
CARGO GEAR: Loading/discharging by shore gear.
TELEPHONES: Available if required.
AUTHORITY: Hydro Aluminium Aardal Verk, P.O. Box 175, 5875 Ardalstangen, Norway. *Tel:* 056-59000 (47-56-59000). *FAX:* 056-59753 (47-56-59753). *Cables:* Ardalverk, Ardalstangen. *Contact:* K. Ulvestad, Harbour Master (056-61164).

ARENDAL: 58.28 N. 08.46 E. (See Plan)

DOCUMENTS: See "Bergen".
PILOTAGE: The pilot boat *Arendal* is stationed at Arendal. Contact may be made on VHF/RT or telephone 21071–23668 or out of office hours via Kristiandsand Radio or Tjome Radio.
ANCHORAGE: Safe anchorage ground is readily available and there are numerous mooring places for vessels not docking alongside the quays.

MAX. SIZE:

	Depth (ft.)	*Length* (m.)
Nye Tollbodkaien	33	230
Batterrikaien	33	110
Hotellbryggen	30	77
Malmkaien	28	30

Gamle Tollbodkaien	20	45
Kallevigs Brygge	20	43
Langbryggen	15	120
Ferjekaien	26	30

No tide even in exceptional weather conditions, increase in water level never exceeds 3 ft.

TUGS: 2 small tugs. 500 h.p. and 300 h.p.

RADAR/VHF: Radar at Pilot station. VHF see "Pilotage".

CRANES: 1×3 ton crane and 1×20 ton mobile crane and 1×15 ton truck at Nye Tollbodkaien. At Vindholmen, 1 crane 100 tons capacity and 1 crane 60 tons capacity.

MEDICAL: Advance notice required for medical attention.

FRESH WATER: Available all quays.

FUEL: Advance notice required.

CONSULS: Sweden, Denmark, Finland.

REPAIRS: Port has well-equipped workshop to carry out engine repairs as well as hull work above water line.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Crew or stevedores.

CERTIFICATES: Normal International Certificates required.

CUSTOMS ALLOWANCES: 200 cigarettes, ½ litre spirits.

AIRPORT: Kjevik 60 km.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police 22030; Fire Station 22255.

TELEPHONES: Can be placed aboard.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Arendal Havnekontor, P.O.Box 33, 4801 Arendal, Norway. *Tel*: (041) 21071, 23668. *Contact*: Harbour Master (Tel: 041-16154).

BATSFJORD: 70.38 N. 29.44 E. (See Plan)

PORT LIMITS: Straight line from the light at 'Makkaur' to the 'Kolneset' defines the port limits.

DOCUMENTS:

3 copies Maritime Declaration of Health.
4 copies Cargo Declaration.
3 copies Ship's Stores Declaration.
3 copies Crew Effects Declaration.
3 copies Crew List.
2 copies General Declaration.
Clearance from last port.
3 copies Passenger List.

PILOTAGE: Not necessary. Harbour pilotage is optional, but if required, 24 hours' notice should be given.

ETAs to be reported 24 hours and 3 hours prior to arrival. Information given should include:

(a) Name/call sign of vessel.
(b) Nationality.
(c) Length, draft and g.r.t.

Pilot boarding ground 2 miles off entrance.

ANCHORAGES: Unlimited anchoring available at the Outer Harbour. Very good anchor conditions for fishing vessels in bad weather.

RESTRICTIONS: No restrictions other than maximum draft.

HEALTH: Cable Agent with following information: Ports of call during voyage, nature of cargo, number of crew and passengers, port of destination and Agent, condition of health of all on board with details of any sickness.

RADIO: Vardoe Radio, VHF and MF.

VHF: Pilct and pilot boat use Channels 16 and 12. All communications with Harbour Authorities should be conducted on Channel 12.

TUGS: One tug available. Will be ordered by Pilot on request.

BERTHING: Pilotage optional. Berths are arranged by Harbour Master. Linesmen and boatmen are arranged through Harbour Office.

Berth Number	*Wharf Length* (m.)	*Depth at LW* (m.)

CRANES: Mobile cranes available on request. Stationary cranes on most private piers.

STEVEDORES: Arranged through Harbour Authorities.

MEDICAL: No advance notice required except in case of serious illness which is to be included in arrival cable. Doctor and dental facilities available.

TANKERS: Discharge lines: 6 in. Slop removal possible.

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: Fuel delivered by pipe-line at 4 berths, and by tank trucks at all other berths. Major grades of bunker fuel and diesel as well as marine lubricants can be obtained through suppliers.

REPAIRS: Most deck and engine repairs can be carried out.

DRY DOCKS: Size: 70 m. × 25 m.

SURVEYORS: Norwegian Ship Control Office.

GANGWAY/DECK WATCHMEN: Usually carried out by ship's crew, but watchmen available. Ship's gangway used, but shore gangway available.

HATCHES: Opening/closing by ship's crew.

CUSTOMS ALLOWANCES: Check with Agent.

REPATRIATION: Crew changes and repatriation can be carried out without difficulty.

AIRPORT: Distance 5 km. Served by 3 flights daily.

TIME: GMT plus 1 hour. Summertime kept.

HOLIDAYS: New Year's Day, "Skjaertorsdag" and Good Friday, Easter Monday, 1st May, 17th May, Whit Monday, Christmas (2 days).

POLICE/AMBULANCE/FIRE: Police: 83131. Ambulance: 83116. Fire: 51122. Area Code: 085.

EMERGENCY CO-ORDINATION CENTRE: Bodo Rescue Centre: Tel: 081-25000.

Rescue Vessel Station in Batsfjord: 83498 or VHF Channel 16.

TELEPHONES: No arrangements for telephone on board.

SERVICES: Compass adjusting, radar repairs, R/T repairs, gyro compass repairs, all types of electronic equipment repaired.

Divers available for surveys and underwater repairs. Several ship chandlers, ice delivery, freezing plant, Forwarding Agent, weekly arrival of UK-Continent liner.

BANKS: A/S Fiskernes Bank, P.O. Box 56, 9991 Batsfjord. Tel: 085-83451. Telex: 64378.

Ost-Finnmark Sparebank, P.O. Box 310, 9991 Batsfjord. Tel: 085-83369.

SHORE LEAVE: No restrictions.

SHIP SUPPLY SERVICE: The port renders full service for transport of passengers and goods.

For transport of sick and injured people from ships, the port is equipped with the rescue vessel m.v. "Sjofareren" all the year round.

Telephone numbers for these services are as follows:

Passenger/goods transportation: 085-83385 or 085-83607 also VHF Channels 16 and 12.

Sickness/injuries: 085-83498 also VHF Channel 16.

For helicopter services, this will be covered by the Rescue Station in Bodo, Tel: 081-21267.

Tug services will be carried out by the "Sjofareren" – see above.

AUTHORITY: Port of Batsfjord, P.O. Box 68, N-9991 Batsfjord. *Tel:* 047/85-83385 or 83607. *FAX:* 047/85-83789. *Cables:* Harbour Master, Batsfjord. *Contact:* Harald Aas, Harbour Master, Fjellvn. 2, 9990 Batsfjord. Tel: 085-83553.

BERGEN: 60.24 N. 05.19 E. (See Plan)

DOCUMENTS:

1 Provisions List.
1 List of Bonded Stores.
1 Health Declaration.
2 Manifests.
2 Crew Lists.
2 Passenger Lists.
Certificate of Tonnage.
Dangerous Cargo List.

PILOTAGE: Compulsory. Main entrance to port at Marsteinen Lighthouse (pilot station) Lat. 60° 24′ N., Long. 5° 18′ 50″ E. 24 nautical miles from town, but vessels from South may enter at Skudesnes (88 nautical miles) and from North at Fedje Pilot Station (32 nautical miles). VHF Channel 16. Practically no tide. Port free of ice throughout whole Winter and well sheltered from all winds. Sound signals for Pilot, 3 long and 1 short. Harbour pilotage not compulsory but advisable.

ANCHORAGE: Puddefiord. Good holding grounds. Depth 10 fathoms to 50 fathoms of water.

RESTRICTIONS: Vessels can enter day and night.

MAX. SIZE: Max. draft 35 ft. Vessels up to 50,000 tons have been berthed at Dokkeskyaersquay. Oil installation up to 30,000 d.w.t.

HEALTH: See "Documents". If vessel carries quarantine flag on contagious diseases, radio communication should be sent to Agents for instructions, otherwise no special regulation.

RADIO: Communication to Agent should be sent through Rogaland Radio or Bergen Radio.

VHF: VHF radio for port operations. Call sign "Bergen Port Radio".

TUGS: 2 tugs, 1×1,900 h.p. and 1× 1,000 h.p. available. Ship's lines to be used, contractors Bukser og Beredskap A/S. Tugs normally join vessel at Puddefiord or subject to requirements.

BERTHING: Berthing instructions from Harbour Authorities through Agent's office.

CONTAINER FACILITIES: Container terminal at Dokkeskjaerskai area. The quay is 210 m. long with a depth of 9 m. at MW. 1×50 ton container crane. It is intended for bow/stern loaders and is equipped with a Ro/Ro bridge with an axle load of 60 tons and 25,000 sq.m. area for storage and container handling.
BRIDGES: A bridge between Knarrevik and Drotningvik is completed. Height of bridge from the water is 50 m. at mean water level. Bridge position is 5 miles from harbour in the entrance to port from South.
STEVEDORES: Stevedoring arranged by Agents subject to requirements. 24 hours notice, important obtain in good time accurate ETA. Ordinary working hours at port 0730 hrs. – 1530 hrs. Saturdays until 1300 hrs.
CRANES: 5 shore cranes, lifting capacity 6 tons. One heavy lift crane 50 tonnes capacity.
MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.
TANKERS: Discharge lines usually 6 in. and 8 in. No slop (residues) discharge facilities. Number of tanker berths 5: Shell, Esso, Fina, Mobil Oil, and BP. Max. drafts 30 ft.
DENSITY: Salt water.
FRESH WATER: From all quays and wharves with exception of some oil berths where water barge necessary.
FUEL: All grades of diesel, fuel and gas oil including lubricating oil available at all wharves in main entrance. Supplies also from barge subject reasonable notice.
FIRE PRECAUTIONS: No special precautions. Special harbour fire-fighting boat. As usual no smoking permitted during discharge operation.
CONSULS:

2. No regulations.
3. Yes.
4. Yes.
5. Only bonded stores.
6. Yes.

SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not needed.
REGULATIONS: *Regulations requiring the use of Pilot Services in the Grenland Area.*

In pursuance of Section 5 of Act No. 2 of 9th April 1948 relating to the Pilot Service, cf. Royal Decrees of 29th April 1977, the Ministry of Fisheries lays down the following regulations:

Section 1:

State Pilots shall be used by vessels of 100 g.r.t. and above navigating the waters North of a line through the North point Molen – North point Sasteinen.

Section 2:

The Coast Directorate or anyone it so empowers may grant exemption from the provisions in Section 1 in respect of vessels of under 500 g.r.t. which are not carrying dangerous cargo, provided that the Shipmaster is able to satisfy the authorities that he has obtained, through regular calls at ports in the area, a comprehensive knowledge of these waters and is conversant with the rules and regulations currently applicable with respect to passage and navigation in these waters. Requests for exemption shall be addressed to the Coast Directorate and forwarded via the Pilot Master in Porsgrunn.

Exemption thus granted may be revoked at any time.

Section 3:

Anyone wilfully or negligently violating these regulations shall be punished in accordance with Section 418 in the Penal Code, unless stricter penal provisions are applicable.

Section 4:

These regulations do not entail any changes to the rules concerning the use of State pilots for foreign non-military vessels of 50 g.r.t. and above laid down by Royal Decree of 9th February 1968 concerning provisions on prohibited zones in Norwegian territorial waters.

Section 5:

These regulations shall enter into force on 1st September 1978.

Also see "General" before first port.

AUTHORITY: Porsgrunn Havnevesen, P.O.Box 20, 3951 Brevik, Norway. *Tel:* 03-571080/571088. *Cables:* Porsgrunn Havnevesen. *FAX:* 03-571703. *Contact:* Hans Roe Edvardsen, Port Director.

DRAMMEN: 59.49 N. 10.13 E. (See Plan)

DOCUMENTS:

Bill of Health.
2 Crew Lists.
2 Passenger Lists.
2 Customs Lists for crew members and passengers.
Bills of Lading.
3 Manifests for every port of discharge.

PILOTAGE: Give 6 hours notice by R/T 2182 kHz or VHF Channel 16 to "Faerder Pilot". Coast stations "Tjome Radio" LGT or "Farsund Radio" LGZ can also be used. Harbour Pilots ordered through ship's Agents. Harbour pilotage is not compulsory.
ANCHORAGES: Pilot service supplies information regarding anchorages.
RESTRICTIONS: Svelvikstrommen Channel, depth 10 m., equipped with beacons and radar reflectors for safe navigation.

During ice-breaker season, which may last from end-December, to mid-March, ice breaker is in radio contact with port and with ships needing assistance.

MAX. SIZE: Max. draft for main harbour 30 ft., otherwise no restrictions.
HEALTH: International procedure followed to obtain Pratique. In case of suspected diseases or fever inform Port Authorities, Tel: 81 88 90. When arriving from a Norwegian port Pratique automatic.
RADIO: Tjome Radio, call sign "LGT" Farsund Radio, call sign "LGZ". Oslo Port Radio or VHF Channel 16.

Port Authority maintains VHF radio-telephone watch: Monday – Friday 0630 hrs. – 1630 hrs. and Saturday according to requirement. Call sign "Drammenhavne Radio". Not on holidays.

RADAR/VHF: VHF Channel 16 and 12 when communicating with Drammen Port Authorities. No port radar service.
TUGS: Under normal conditions not necessary except for large vessels, but available on request. Normally ship's hawsers or lines used for towing. Tugs ordered through Agent.
BERTHING: *Main Harbour*

Quays	*Depth* (m.)	*Length* (m.)	*Remarks*
Tollbukaia	7.0	110	Coastal/local traffic. Railway lines available.
Kranbrygga	7.0	200	General cargo. Railway lines available.
Myrakaia	7.0	155	General cargo and bulk. Railway lines available. Electric crane 23 tons for bulk cargoes.
Langbrygga	8.0	260	Paper, General cargo Railway lines available.
Tjomekaia	7.0	165	Paper. Railway lines available.
Holmen South	9.0	486	Gen. cargo. Air conditioned. Containers. Railway lines available.
Holmen South Ro/Ro Ramp S.E. end.	9.0	—	New Berth. Cars, Trailers. See "Container and Ro/Ro Facilities".
Holmen South Oil Berth	7.0	70	New Berth. Tankers. Size of vessel determined by water depth alongside.
Risgardkai Ro/Ro	10.0	151	Cars, Trailers
Holmen East Ro/Ro	7.0	60	Cars, Trailers
Kattegat Ro/Ro	10.0	168	Cars, Trailers,Containers. 1× 50 ton mobile crane.

Container and Ro/Ro Facilities: Three Ro/Ro quays for containers, vehicles and trailers.

1. Holmen South Ro/Ro:
   Max. Depth 9.0 m.
   Length (Approx.) 486 m.
   Beam 20 m.
   Height of working ramp 0.5 m. – 2.0 m.
   Mooring boat advisable when berthing.
2. Holmen East Ro/Ro:
   Max. Depth 18 ft.
   Length (Approx.) 350 ft.
   (i) Inside ramp: Beam 30 ft., Height 5 ft.
   (ii) Outside ramp: Beam 30 ft., Height 1 ft. 6 in.
3. Risgarden Ro/Ro:
   Max. Depth 30 ft.
   Beam 105 ft.
   Length of vessels berthing depends on max. draft.
   Height of working ramp 6 ft.
4. Kattegatkaia Ro/Ro:
   Max. Depth 30 ft.
   Beam 70 ft.

Fruit Storage 21,600 sq. ft. Air conditioned fruit-storage.

Also see "Tankers".

CRANES: 2×50 ton cranes (1 mobile, 1 electric). (50 ton at 35 m. – 10 ton at 40 m.). 2×23 ton electric cranes, one each situated at Holmen South Quay and Myrakaia Quay.

9×3 ton electric cranes; 1×4 ton electric crane; 1×6 ton electric crane.

BULK HANDLING FACILITIES: The 23 ton crane "Hendrik" located at Myrakaia can be adapted for bulk handling with a capacity of approximately 1,000 tons per day.
STEVEDORES: Labour must be ordered latest 1500 hrs. day before arrival. Saturdays before 1000 hrs. Working hours: Monday to Friday from 0700 to 1500 hrs., with breaks from 1100 to 1130 hrs. and 1500 to 1530 hrs.

Saturday from 0700 to 1230 hrs. with break from 0900 to 0930 hrs. Overtime can be arranged through Agent.

MEDICAL: In case of emergency, notice regarding required medical treatment must be given as soon as possible. First class hospital facilities available. No special inoculation or fever certificates necessary, except those according to international health regulations.
DEPTHS: Chart depths vary only slightly owing tidal fluctuations. Exceptional conditions, such as snow melting in Spring, heavy rainfall and prevailing strong Southerly or Northerly winds will cause stronger currents and a variation in water levels.
TANKERS:
Holmen South Oil Berth

Concrete quay, max. draft 29.53 ft. (9 m.). Fresh water available.

Pipe-line connections: Gas oil 8 in.; light fuel oils 8 in.; paraffin 6 in. heavy fuel oil 4 in.

B.P. Berth, Solumstrand

9 m. wide quay at end of pier, max. draft 16.4 ft. (5 m.).,

Pipe-line connections: Propane 2 in.

Folakroken Quay: New Berth: Gullaug explosives factory. Situated 6 nautical miles North of Svelvik Narrows on East side of Dramsfjorden

Length	114 ft. (35 m.)
Depth alongside	19 ft. (6 m.)

FRESH WATER: Delivery by hose, available anywhere.
FUEL: Available at Holmen South. Fuel 2,000 sec. and marine diesel 200 sec.
FIRE PRECAUTIONS: International danger signals and precautions practised. Wires for towing must be ready for immediate use. In case of fire on board or in vicinity, vessel must leave quay and harbour as soon as possible.
CONSULS:

Denmark	Iceland	Netherlands
Finland	Monaco	Germany F.R.

All other consulates situated in Oslo.
REPAIRS: Shipyard facilities for all kinds of deck and engine repairs available.
DRY DOCKS: 2 floating docks, 20,000 tons and 3,000 tons capacity. Nearest dry docks in Horten and Oslo. Distance by sea respectively 24 miles and 46 miles.
GANGWAY/DECK WATCHMEN: Watchmen recommended, through Agent.
OPENING/CLOSING HATCHES: If necessary hatches can be opened or closed by stevedores, but usually by crew.
CERTIFICATES: Usual ship's certificates according to international regulations.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes/100 grams of tobacco allowed weekly. Wine or Spirits, 1 bottle wine or spirits usual weekly allowance.
CARGO GEAR: International Safety Regulations followed.
REPATRIATION: All facilities available.
AIRPORT: Nearest airport Oslo Airport, Fornebu, situated 16 miles by road from Drammen. Regular services to all parts of the world.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: On Saturdays work stops at 1230 hrs., but if ships can be finished, loading and discharging is continued to 1900 hrs.

All Sundays; 1st January; Maundy Thursday; Good Friday; Easter Monday; 1st May; Ascension Day (17th May); Whit Monday; Christmas Day; 26th December.

On Easter, Whit, Christmas, and New Year's Eve work stops at 1400 hrs.
POLICE/AMBULANCE/FIRE: Fire-alarm accidents 832020; First-aid station 831585; Hospital 834585; Police 838170; Taxi 835060.
TELEPHONES: Telephones can be connected if ordered through Televerket. Tel: 832380.
SERVICES: Ice-breaker assistance available during Winter months.
SHORE LEAVE: No restrictions on shore leave when all formalities in order.
IDENTIFICATION CARDS: Not required.
DELAYS: Delays may occur, when very heavy traffic cause shortage of labour.
GENERAL: Notice will be given to local Agents regarding changes or new developments which can affect usual procedure in port.
AUTHORITY: Drammen Havnevesen, Hans Kiaersgaten 1A, N-3000 Drammen, Norway. *Tel:* (03) 818890-94. *Contact:* H. E. Hansen, General Manager.

EGERSUND: 58.27 N. 06.00 E.

DOCUMENTS: Health Certificate (forms obtainable from Customs when entering harbour). Crew List, Dangerous Cargo List, Ship's Register. Vessels bound for Egersund must be provided with document signed by Master, setting out specification of cargo to be discharged Egersund, also quantities all provisions and stores on board. Document must include name, tonnage, port of registration, last port, next port, and number of crew and passengers on board.
PILOTAGE: Pilot – if necessary – to be ordered latest 3 hours prior arrival pilot station. Order to be given to Pilot Office – telephone 04-477377 or to ship's Agent, giving ETA, name of vessel, gross tons, where Pilot required, draft in feet, and discharging/loading place. Vessels entering Egersund liable to inward and outward pilotage dues, mileage money according distance piloted; and pilot dues, whether services of Pilot used or not. Pilot station lying on Eigeroy – and Pilot available for Southern and Northern entrance, from pilot boat. Southern entrance mostly used, max. draft 37 ft. In case of using Northern entrance, ship has to pass bridge between Eigeroy and the continent. Max. height 23.5 m. Max. draft 16 ft.
ANCHORAGE: Any place in harbour available for anchorage. Especially used is Hovlandsviken – 36 ft. draft.
MAX. SIZE: Largest vessel which has entered Egersund – 45,000 d.w.t. Max. draft 31 ft. In harbour there are 2,000 ft. of quayage with 18 ft. – 27 ft. alongside.
RADIO: Rogaland Radio and Farsund Radio.
TUGS: Not available in Egersund.
BERTHING: 3,000 m. of quay frontage. Facilities for container and Ro-Ro vessels. 30 tonne fork lift.
STEVEDORES: Ordered by Agent – no ETA to stevedores necessary. Time for ordering gangs for next morning must be given by 1300 hrs. day before.
FRESH WATER: Can be delivered at most discharging/loading places.
FUEL: Gas oil and Light Marine Diesel oil available.
CONSULS: Denmark and Sweden.
REPAIRS: All minor repairs possible. Service station for electronic aids.
GANGWAY/DECK WATCHMEN: Available – but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CERTIFICATES: On first call Registered Tonnage Certificate necessary – thereafter not required unless gross/net tonnage changed.
CUSTOMS ALLOWANCES: (Dependent size – destination, etc.) each crew member is allowed 100 cigarettes, 20 cigars or 100 grams tobacco and one bottle spirits.
CARGO GEAR: No additional requirements. One 150 ton crane, one 30 ton crane and some mobile cranes 5 tons – 15 tons available.
HOLIDAYS: Work can usually be arranged on all holidays.
POLICE/AMBULANCE/FIRE: Police 49.16.00; Fire 49.15.00; Hospital/Ambulance Tel: 49.00.22.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Egersund Havnevesen, Havnebygget, Strangt. 2, P.O. Box 117, 4370 Egersund, Norway. *Tel:* (04) 49.13.28. *Telex:* 33084. *Contact:* Odd Hansen, Harbour Master.

FIBORGTANGEN (Skogn): 63.43 N. 11.10 E.

(See Plan)

PORT LIMITS: Holsandbukta.
DOCUMENTS:

1 Crew List
1 Passenger List
1 Crew Personal Effects List.
1 Stores List
1 List of Animals
Last Port Clearance
Safety Certificates:
Safety Equipment, Load Line, Radio, Construction.

PILOTAGE: Pilotage is compulsory for all foreign vessels.

Notice of ETA and request for Pilot can be made to the local Agents, not less than 24 hours before ETA at Grip Lighthouse.

Confirmation of ETA is required 2 hours before arrival at Grip Lighthouse.

Channel 16 VHF is continuously watched by Kristiansund Radio and Pilot boat.

The usual pilot boarding point is inside Grip Lighthouse Lat. 63° 16′ N., Long. 07° 36′ E.

Pilot boat has orange upper works, white hull with the word "LOS" on each side.

The usual international signals may be employed by vessel requiring a Pilot.

In case of bad weather the pilot boat will lead ahead to sheltered waters. There is no anchorage for vessel awaiting a Pilot.
ANCHORAGES: At the bay North and N.E. of the wharf in about 20 m. of water, bottom sand, good holding ground.

Electric power cables cross from Valoya – Hestoya, anchorage in this area is prohibited.
MAX. SIZE: Vessels up to 160 m. LOA (vessels with LOA 214 m. have berthed) and 10.40 m. draft can be accepted at the North side of the wharf. On the East side 215 m. LOA, 6.4 m. draft.
HEALTH: Vessels will be cleared alongside.
RADIO: Kristiansund Radio is the long range area station.
VHF: Kristiansund Radio and Orland Radio. Continuous watch. All calling should be on Channel 16. Pilot boat also monitors Channel 16.
TUGS: Can be ordered by the local Agents.
BERTHING: The wharf is made of concrete. The North berth is 141 m. long, depth 10.4 m. The East berth is 215 m. long, depth 6.4 m. Permissible wheel loading for standard type vehicles is 12 tonnes.
STEVEDORES: *Working hours:*

Monday – Thursday	0700 – 2400
Friday	0700 – 2030

MEDICAL: Full hospital facilities available without prior notice.
FRESH WATER: Good quality water is available in unlimited quantities at about 20 tonnes per hour per connection.
FUEL: Not available, but can be ordered from Trondheim.
SURVEYORS: Cargo Inspectors: Can be ordered by local Agents.

Bureau Veritas	Tel: 07-525030
Norsk Veritas	Tel: 07-917500
Lloyd's Register	Tel: 07-520124

GANGWAY/DECK WATCHMEN: Can be ordered by the local Agents.
OPENING/CLOSING HATCHES: Normally handled by ship's crew.
CARGO GEAR: Discharging and loading is by ship's gear, however, some mobile cranes up to 30 tonnes capacity are available for extended hire at short notice.
REPATRIATION: Scheduled aircraft connected with direct overseas flights leaves from Trondheim Airport several times a day.
TIME: Local time is GMT plus 1 hour. Summertime is used.

POLICE/AMBULANCE/FIRE: All emergency services are available through the gate watchman.

Automatic fire alarms are installed at the wharf.

BANKS: Fokus Bank. Tel: 076-85163. Telex: 55219. Levanger Sparebank. Tel: 076-85137.

STORING: Vessel can be stored by truck during loading or discharging. Fork lift trucks can be used on the jetty to handle stores. Local Riggers cannot be employed to assist with storing.

EMERGENCY CO-ORDINATION CENTRE: Call nearest radio station.

SHORE LEAVE: When Immigration and Customs have been satisfied, there is no restriction on crew's shore leave as long as they rejoin the vessel before departure.

AUTHORITY: Norske Skogindustrier A.S., 7620 Skogn. *Tel:* 076-87000. *Telex:* 55216 Skogn N. *FAX:* 076-87100. *Contact:* Gjermund Lyngfelt, Terminal Manager (Private Tel. 076-84244).

FLORO: 61.31 N. 05.02 E. (See Plan)

DOCUMENTS:
2 Manifests.
Crew List.
Provisions List.
Health Document.
Passenger List.

PILOTAGE: Pilotage is not compulsory when coming into Floro. Ships usually enter by Kvanhovden light. (See Admiralty Chart No. 3037.) Vessels can also enter at Fedje.

Nearest station Fedje (Lat. 60° 51′ N., Long. 04° 37′ E.). Distance to Floro Harbour about 52 nautical miles. Pilot boat a white-painted cruiser-type marked "OS" on both sides of bow.

Fixed watch on Fedje Island covers both Holmengra and Hellesoy. VHF Channels 8, 12 and 16. Listening first 10 minutes of every hour. ETA 24 hours before arrival. Telegram "Feielos". If bad weather, Pilot to be picked up on Eastern side of Fedje Island.

ANCHORAGE: No anchorages close to pilot station. Floro Harbour: space of about 1 sq.km., depths from 15 fathoms to 30 fathoms.

RESTRICTIONS: Tide difference about 1.5 m. Max. draft entering Floro Harbour 40 ft.

MAX. SIZE: Entering Floro Harbour: No restrictions in main harbour concerning length and breadth. Max. draft berthing: "Gunhildvagen" 25 ft. and length of 120 m., Ewos A/S produce feed for fish farms and Skaarfish A/S export fish.

NB. – "Gunhildvagen" lies outside main harbour, and has narrow entrance. Weather permitting, ships of 100 m. length and breadth 20 m. can pass.

BERTHING: *Vestlandske Kjopelag:* A bulk grain/molasses terminal for vessels up to 6,000 d.w.t. Berth length, 100 m. Depth alongside 7.0 m. Storage capacity 20,000 tons of Grain/Molasses.

Fugleskjaerskaia: The deep-sea pier to the West of Fugleskjaerskaia (61° 36′ N., 05° 02′ E.). Fugleskjaerskaia now offers 500 m. of pier frontage, depth from 16 ft. to 43 ft. New section: 36 m., 18 ft. depth; 140 m., 33 ft. depth; and 1 berth 43 ft. depth. Cranes of 30 ton and 45 ton capacity available.

The extension of Fugleskjaerskaia provided 21,000 sq.m. new cargo handling space. A Ro/Ro facility is also provided, max. axle load 60 tons, width 18.0 m.

Fjord Base A/S: Located at Botnaneset. Address: P.O.Box 323, 6901 Floro. Tel: (057) 43-811, 43-866. Fax: (057) 43-825. Telex 40189 fb n.

Quay A	Length 100 m.	Depth 10.0 m.
Quay B	Length 50 m.	Depth 19.0 m.
Quay C	Length 60 m.	Depth 8.0 m.

Mobile cranes with capacity 35 tons – 115 tons.

STEVEDORES: ETA before 1600 hrs. for gangs required next morning.

MEDICAL: Hospital close to harbour, and available any time.

TANKERS: Harbour is only used by small tankers, about 500 to 1,000 reg. tons.

FRESH WATER: Only available alongside berth. Delivery about 30 t.p.h., possibility of 60 t.p.h. At Fugleskjaerskaia fresh water available at a rate of 200 t.p.h.

FUEL: Available at Fjord Base.

CONSULS: None.

REPAIRS: Most repairs possible.

DRY DOCKS: None. There is a berth at Kleven Shipyard. Length 85 m. Depth alongside 14 m.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Mostly done by crew.

AIRPORT: Regular service with De Haviland Twin Otters, 2 flights to Oslo, 5 flights to Bergen and 2 to Aalesund each day. (Runway 860 m.).

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: Cargo work can be arranged any time, holidays included.

POLICE/AMBULANCE/FIRE: Police 42011; Ambulance 41011; Fire 001.

TELEPHONES: Can be arranged on board alongside wharf.

SERVICES: Servicing for all kinds of ships navigation instruments can be arranged, except adjusting radio bearings.

SHORE LEAVE: Permitted.

CREW IDENTIFICATION CARDS: Not required.

SHIP SUPPLY SERVICE: The port has 6 small passenger vessels (50 ft. – 60 ft.), all capable of 20 – 27 knots, one or more are vacant at any time, and willing to take on assignments.

Services can be ordered through K. Jansen, 6900 Floro. Tel: (057) 43555. Fax: (057) 43860.

Helicopters can obtained from Helicopterservice, Bergen.

AUTHORITY: Floro Havnevesen, P.O.Box 17, 6901 Floro, Norway. *Tel:* 41428. *Contact:* N. A. Hovland, Assistant Harbour Master.

FRAFJORD: 58.51 N. 06.17 E. (See Plan)

SHIPMASTER'S REPORT: May 1979. Also see "Agents Report" below. Vessel loading stones.

The berth at Frafjord is situated at the Eastern end of the Fjord leading to Frafjordsoyr (Lat. 58° 50′ 40″ N., Long. 06° 17′ E.) and consists of an angled quay 15 m. in length.

The Pilot is embarked at Kvitsoy Pilot Station and vessel then proceeds to Stavanger for Customs Clearance and Agency work due to the remoteness of the loading berth. Pilots are changed at Stavanger and this Pilot remains on board until Kvitsoy outwards.

Approach to the berth is made at right angles with 3 shackles out on the starboard anchor until the headline and forward spring can be passed to the quay, the vessel is then turned on the anchor.

The quay is made of wood and is in poor condition with one end and bollard damaged. On the quay a single fixed conveyor is situated with a mobile extending arm and this is fed from a bin filled by tip-up lorries. The approximate lorry load is 13 tonnes. The extending arm can be remotely controlled in and out but is not quite long enough to adequately fill the outboard side. If loading mixed stones the lighter stones can be projected outboard. The loading foreman tended to be inexperienced and care has to be taken not to let the height of the stow build up too much and also along the inboard side as a slight starboard list is preferable due to the shallow areas of water on the inboard side and slack ropes aft will facilitate a general movement to the deeper water, (by sliding off the bottom).

No. 2 hold is loaded completely and then the stern is canted into deeper water in order to load in No. 1. The sequence that was adopted by this vessel was to load 750 tonnes in the after end of No. 1 followed by 750 tonnes in the forward end of No. 2 and then 700 tonnes in the after end of No. 2. This increased the after draft to approximately 6.3 m. The stern was then canted out into deep water and the final 800 tonnes was loaded forward. The vessel has to be constantly moved along the quay in order to get an even stow height approximately one-third the way up the hatch coaming.

The bollards on the beach are very badly positioned and the ones on the quay which were used for the springs were on the verge of being ripped out, one already having done so on the damaged end of the quay.

Loading commenced at 1600 hrs. on 11th May and ceased at 2215 hrs. that day, resumed at 0720 hrs. on 12th May and completed at 1000 hrs. on 12th May. 3,010 tonnes of stone chippings were loaded, final draft being, forward 5.32 m., aft 5.66 m. No gangway can be used, only pilot ladder.

Little wind was experienced during our stay but I would consider that any adverse weather conditions during berthing, loading or unberthing must make this a dangerous operation.

AGENT'S REPORT: August 1984.

The Pilot can be embarked at Kvitsoy, Tananger or Skudesnes Pilot Station.

Vessel proceeds direct from pilot station to loading berth (Pilot stays on board during loading), which normally takes 6 hours for a vessel of 3,000 tons. Agency/Customs clearance is now performed at Frafjord.

The loading berth is now of concrete and extended – mooring points are new, and there is no need to use anchor when approaching the berth. Official draft limitation is 18 ft.

The max. length allowed at the berth is 95 m.

The loading foreman is now well experienced and is conducting the loading/shifting with professional skill.

AGENT: Odd H. Torjusen A.S., P.O.Box 523, N-4371 Egersund, Norway. Tel: (04) 492400. Telex: 33084. Fax: (04) 491614. Cables: Torjusen.

FREDRIKSTAD: 59.12 N. 10.57 E. (See Plan)

DOCUMENTS:
Bill of Health.
2 Crew Lists.
2 Passenger Lists.
2 Custom List for Crew Members and Passengers.
Bill of Lading.
3 Manifests for each port of discharge.

PILOTAGE: Compulsory. Pilot boarding at Faerder Lighthouse, 59° 02′ N., 10° 32′ E. or between Tresteinene Lighthouse and Vidgr. Lightbuoy, 59° 01′ N., 10° 56′ E. Agents report vessel's ETA to pilot station and vessel to give 2 hours' notice by R/T 2182 kHz or VHF Channel 16 to Faerder Pilot and Fredrikstad Pilot (Herfol Pilot). Coast station Tjome Radio LGT or Farsund Radio LGZ can also be used. Harbour Pilot and tugs, when necessary, will be arranged by Agents to meet at Belgen.

ANCHORAGES: Safe anchorage for larger vessels Belgen, East entrance. For smaller vessels anchorage to be pointed out by Pilot or Harbour Master.

RESTRICTIONS: Max. draft, East entrance 36 ft.; West entrance, 17 ft. Otherwise no restrictions.

HEALTH: See "Documents".

If vessel carries Quarantine Flag for contagious diseases, radio communication should be sent to Agent for instructions, otherwise no special regulations.

RADIO: Communication to Agent through Tjome Radio or Rogaland Radio.

VHF: Fredrikstad Port Control, Ora Quay, Tel: 09-324990 or VHF Channels 16 and 12.

TUGS: Three tugs, 750 h.p., 1,200 h.p. and 2,700 h.p. More powerful tugs can be ordered from Oslo if necessary.

BERTHING: As instructed by Harbour Master through Agent, depending on vessel's draft and size.

East River Berths:

Oera Quay:

Southern part, max. draft 34 ft.

Northern part, max. draft 28 ft. – 33 ft.

Denofa Lilleborg Quay:

Max. draft 33 ft. (5 m. off the quay).

Additional Facilities:

4 warehouses, each at 2,000 sq.m., 1 warehouse of 600 sq.m. and 1 warehouse of 10,000 sq.m.

4 ordinary cranes up to 3 – 6 tons (radius 8 m. – 26 m.).

1 mobile harbour crane up to 36 tons at 18 m. radius, with container spreader for 20 ft. and 40 ft. containers.

1 mobile harbour crane up to 40 tons at 28 m. radius, with telescopic container spreader.

1 × 37 tons fork lift, with telescopic container spreader.

1 × 32 tons fork lift.

2 × 28 tons fork lifts.

2 × 30 ton fork lifts.

30 × 2 ton – 12 ton fork lifts, 8 equipped to handle bales and reels.

5 Tugmasters, capacity 120 tons.

2 Ro-Ro terminals with an open area of about 40,000 sq.m.

1 passenger and car ferry, between Fredrikstad and Fredrikshavn during daytime.

STEVEDORES: To be arranged by Agent subject to requirements. 24 hours' notice important to obtain in good time accurate ETA.

Ordinary working hours 0700 to 1530 hrs., Monday to Friday. Saturday from 0700 to 1400 hrs. 100% overtime and from 1400 hrs. for a minimum of 8 hours – 100% overtime.

Bulk cargoes are usually discharged in shifts until Saturday 2200 hrs.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Discharge pipe-lines usually 6 in. and 8 in. No slop (residues) discharge facilities. Tanker berths are at NUROL and Denofa/Lilleborg.

Sulphuric Acid is loaded at Oera Quay.

DENSITY: Brackish water, 2.7% salt water.

FRESH WATER: From shore or by barge. Tel: 09-346027.

FUEL: All grades available. For larger quantities, delivery arranged by barge. Tel: 09-346027, mobile 094-51764.

CONSULS: Danish, French, Finnish, Netherlands, Swedish.

REPAIRS: All repairs possible.

DRY/FLOATING DOCKS:

A/s Fredrikstad mek Verksted: Dry dock 945 ft. length, 126 ft. breadth, 25 ft. draft when docking.

Sarpsborg mek Verksted: Floating dock, 3,000 tons, 380 ft. length; 55 ft. breadth; 18 ft. draft when docking.

GANGWAY/DECK WATCHMEN: Obtainable.

OPENING/CLOSING HATCHES: Crew members allowed to open and close hatches.

SHIP'S CERTIFICATES: To be produced to Customs Authorities on arrival.

CUSTOMS ALLOWANCES: *Tobacco:* 20 cigarettes or 20 gm. tobacco per man, per day.

Wines/Spirits: 1 bottle of spirits or wine for consumption on board per crew member.

REPATRIATION: All facilities available.

AIRPORT: Fornebo, Oslo, 110 km. from Fredrikstad. Frequent connection by train.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (1st January); Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May); Constitution Day (17th May); Christmas Eve; Christmas Day; 2nd Christmas Day; New Year's Eve.

POLICE/AMBULANCE/FIRE: Police, Tel: 317700; Doctor, Tel: 313000; Hospital, Tel: 10300; Fire, Tel: 310345.

TELEPHONES: May be installed on board at the quay of Oera.

SERVICES: Compass adjusting, laundry, ship chandler for delivery of provisions and bond stores.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required, except at the quay of Defona/Lilleborg, when Master, upon arrival, will receive a sufficient number of cards for filling-in for each crew member, to be shown when passing the gate.

AUTHORITY: Fredrikstad Havnevesen, Oraveien 27, P.O. Box 1205, 1631 Gamle Fredrikstad. *Tel:* 09-324990. *Telex:* 09-324930. *FAX:* 09-324930. *Contact:* Gunnar Umbach Hansen, Harbour Master/Port Manager.

GLOMFJORD: 66.50 N. 13.57 E.

DOCUMENTS:

3 Crew Lists.

Customs List.

Shipping Manifest.

Health Statement.

Bill of Lading.

Ship's Certificate of tonnage.

PILOTAGE: Pilot station, approach from South, is Aasvaer, 66° 17′ N., 12° 18′ E. VHF Channel 16 and radio telephone, frequency 2182.

Pilot station, approach from North, is Fleinvaer, 67° 13′ N., 13° 42′ E. Order Pilot over Bodo Radio, Tel: Bodo 22115.

ANCHORAGE: No berth for anchoring in Glomfjord but possible anchor at Sandaabukten close to Glomfjord.

HEALTH: Health certificate – only for first port in Norway.

RADIO: Sandnessjoen or Bodo Radio station.

VHF: On quay. Call: Hydro Glomfjord Port Station on Channel 16.

TUGS: None.

BERTHING: No specific requirements relating to berthing. Quay length 317 m. and depth 8 m.

STEVEDORES: In accordance with Charter Party.

MEDICAL: Medical aid in Glomfjord, and hospital in Bodo.

TIDE: Difference between high and low water about 3 m.

FRESH WATER: Alongside quay.

FUEL: None.

CONSULS/REPAIRS/REPATRIATION: None.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Usual certificates.

CUSTOMS ALLOWANCES: 200 gm. tobacco or 200 cigarettes per man. 0.75 litre spirits or 0.75 litre wine per man.

CARGO GEAR: Discharging and loading by conveyor.

AIRPORT: Airport in Bodo.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: See "Drammen".

POLICE/AMBULANCE/FIRE: Police station 52100 Meloy.

TELEPHONES: On quay.

IDENTIFICATION CARDS: Usual Passport necessary.

REGULATIONS: No particular or unusual regulations. Control by passing gate between dock area and surrounding field.

SHIPMASTER'S REPORT: 1976.

Anchorage: The nearest anchorage to the berth, which is part of Norsk Hydro's chemical plant is Sandabukta, about 6 miles away. It is safe and sheltered and the Agent will board there. Communication with Glomfjord is by VHF Channel 16 or via the local boatman with whom private arrangements for shore leave are possible.

Clearance: Ship is boarded on arrival at the anchorage by the Glomfjord Customs Officer who also acts as Immigration and Port Health.

Pilotage: There are no Harbour Pilots at Glomfjord. If proceeding direct to berth, Sea Pilot will put ship alongside. If awaiting berth at Sandabukta Anchorage, Pilot leaves there and it is normal for ships to complete the passage unaided. A Pilot can be obtained from Bodo but is not always available. If another ship is arriving at the anchorage, Pilot will transfer.

AUTHORITY: Norsk Hydro a.s. Glomfjord, 8160 Glomfjord, Norway. *Tel:* (081) 52 321. *Telex:* 64061 Hydro N. *FAX:* (081) 52654. *Cables:* Norskhydro. *Contact:* Shipping and Clearance Office.

HALDEN: 59.08 N. 11.25 E. (See Plan)

DOCUMENTS: See "Bergen".

PILOTAGE: Pilot boat at Faerder light station. Pilot boat at Herfol Losstation-Hvaler. Ordering usually over Radio Land Station. Tjorne Radio = LGT (also VHF). Signals according to ordinary international requirements. Exact area for Pilot boat: Faerder light station (Store Faerder); Herfol pilot station; Hvasser pilot station.

ANCHORAGE: At Faerder light station in Oslofiord-Singlefiorden West side.

RESTRICTIONS: No special restrictions but larger vessels have to take necessary care with passing Svinesund. The tide current altering according to high and low water time.

MAX. SIZE: For the harbour inside Svinesund (Main Harbour) length 560 ft., beam 70 ft., draft. 25 ft.

HEALTH: Pratique, ordinary.

TUGS: If required tugs join outside Sponviksskansen light at the entrance to Svinesund. Usually ship's lines.

RADIO: All radio services over Tjome Radio-Land Station (use the ordinary international frequency — (600-705-800 m.).

VHF: Port Authority on Channels 16 and 12.

BERTHING:

MEDICAL: Hospital facilities available at Hammerfest.
TANKERS: Discharge line 8 in.
DENSITY: Salt water.
FRESH WATER: Capacity 300 t.p.h. at Harbour Board Quay. No water barge available.
FUEL: All grades except heavy fuel oil available.
CONSULS: French, Danish, Finnish, Icelandic, Netherlands and Swedish Vice-Consuls.
REPAIRS: Slipway for smaller ships, up to 200 ft. Only minor repairs and radar repairs available.
DRY DOCKS: None.
CUSTOMS ALLOWANCES: See "Stavanger".
REPATRIATION: Daily connection by ship and air.
AIRPORT: Hammerfest Airport. Regular service several times a day.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Hammerfest Havnevesen, P.O.Box 123, 9601 Hammerfest, Norway. *Tel:* 084-11201/11202. *Contact:* Harbour Master.

HARSTAD: 68.48 N. 16.39 E. (See Plan)

PORT LIMITS: Inside a straight line from Trondenes Church to Stangnes Light.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Derat Certificate.
PILOTAGE: If entering via Andenes, 12 hours' advance notice of ETA in order to arrange Pilot. If entering via Lodingen, 2 hours' notice. VHF Channel 16 both at Lodingen and on pilot-cutter at Andenes. 24 hour watch maintained.
ANCHORAGE: Inside harbour limits, fairly good anchorages available, Pilot will assist.
RESTRICTIONS: No restrictions, except all foreign ships must have a Coast Pilot on board in inland waters.
MAX. SIZE: Any size vessel can anchor in harbour.
HEALTH: In case of suspected disease doctor has to be called by radio before entering. After calling at another Norwegian port and no disease, Pratique is not necessary.
RADIO: Routing of ETA cables to Agents at Harstad is best over Harstad Radio. VHF installed at Harbour Office.
TUGS: Two small tugs available.
BERTHING: Public quays of 680 m. Private quays of 1,200 m.
MEDICAL: No advance notice required. Hospital facilities available. No medical information required if no suspected disease on board.
SPECIALISED CARGO-HANDLING FACILITIES: One coal bunkering station; draft about 24 ft.; equipped with crane.
Two mobile cranes, capacity 30 tons each.
Trucks: 1×20 tons, 1×10 tons. Also fork lift trucks between 1 ton and 6 tons.
TANKERS: Two berths. Esso 33 ft. Norol 36 ft.
TIDE: Rise in tide about 6 ft.
FRESH WATER: Available at most quays day and night.
FUEL: All grades available. In the Winter 3 – 4 hours' notice required.
CONSULS:
Danish Vice-Consulate:
Samasjovn 22, 9400 Harstad. Tel. 0 82 64560 or 64219.
Finnish Vice-Consulate:
Rikard Kaarb 05 gt. 2 – 9400 Harstad. Tel. 0 82 64990
German Vice-Consulate:
Torfinns gt. 7 – 9400 Harstad. Tel. 0 82 61472.
REPAIRS: All types of repairs possible.
DRY DOCKS: 1 dry dock 110 m. long, 17 m. wide. Capacity: 8,000 d.w.t.
SURVEYORS: Cargo Inspectors available.
Lloyd's Register and Det Norske Veritas in Harstad.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Usual international certificates.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or equal amount of tobacco. Wine and/or Spirits: Spirit half a bottle per person.
REPATRIATION: Facilities available.
AIRPORT: Airport of Evenes, about 45 minutes (45 km.) drive from Harstad by road.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: Cargo work can be arranged on holidays, except 1st an 17th May, Easter Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police: 62010; Ambulance: 64900 Fire: 64580.
EMERGENCY CO-ORDINATION CENTRE: The nearest emergenc centre is Hovedredningssentralen in Bodo. Tel: 081-21 267.

Local contact in Harstad is the Harbour Office. Tel: 082-62 880/6 459 or Senja Police Office. Tel: 082-62 010.
TELEPHONES: Available, can be arranged by Agent or Dockyard.
SERVICES: Harbour Office: Tel. 082 62880 and 62459. The Norwegia Government has decided that Harstad is to be the main base for mos of the oil activity North of 62° N., and the town and the harbour ar under construction to meet future requirements in this connection.
BANKS: One bank in Harstad which is operating internationally. Berge Bank, Sjogaten 5, 9400 Harstad. Telex: 64002.

In addition there is A/S Fiskernes Bank, Tromsbanken A/S, Harsta Sparebank and Trondenes Sparebank.
STORING: See "Prelims".
1. Vessel can be stored by barge and/or truck.
2. No special regulations.
3. Trucks can proceed alongside the berth.
4. Fork lift trucks can be used on the jetty to handle stores.
5. No special regulations.
6. Local riggers can be employed to assist with storing.

SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not needed.
DEVELOPMENTS: *Sor-Stangnes:* New harbour development area o about 40 acres. It will be possible to build a quay of 550 m. length an a minimum depth of 10.0 m.
AUTHORITY: Harstad Havnevesen, Box 193, 9401 Harstad, Norway. *Tel:* 082-62 880, 62 459. *Contact:* Ragnar Tonder, Harbour Master.

HAUGESUND: 59.25 N. 05.16 E. (See Plan)

DOCUMENTS:
3 copies Maritime Declaration of Health.
4 copies Cargo Declaration.
3 copies Ship's Stores Declaration.
3 copies Crew Effects Declaration.
3 copies Crew List.
2 copies General Declaration.
Clearance from last port.
3 copies Passenger List.
PILOTAGE: 24 hours notice addressed to Kopervik Pilot Station, who keep a 24 hours watch on VHF Channel 16, working Channel 13.

Pilot boards vessels off Skudenes (59° 07′ N., 05° 16′ E.) in Skude Fjord, or off Rorver (59° 27′ N., 05° 03′ E.).

Vessels proceeding to the Lay-up Area at Bovaagen, take Pilot off Skudenes.

Shipmaster's Report: September 1990.

Pilot Station now centralised on Kvitsoy Pilot Station. Tel: 04-515397. VHF Channel 13.

Rorver Pilot Station is closed.

No pilot required if arriving or sailing to the North. Pilot is required if arriving or sailing from the South (Military Zone).
ANCHORAGE: Anchorage in Karmsundet off the city can generally only take place after agreement with the Harbour Office. Alternatively safe Anchorage is possible 1 mile North of Kopervik in 30 m. of water.
MAX. SIZE:
Entrance from the North: No restrictions as to height. Minimum depth in the Harbour is 23 m.
Entrance from the South: The bridge between Haugesund and Karmoy, crossing at Salhus, free height of 45 m. Minimum depth of water 11 m. (just North of the bridge).
RADIO: Rogaland Radio.
VHF: Rogaland Radio on Channel 16. Kopervik Pilot on Channels 16 and 13. Haugesund Harbour Office on Channels 16 and 12, throughout 24 hours.
TUGS: Two tugs available in the Port and further tugs can be called from Stavanger.
BERTHING:

Berth	*Length* (m.)	*Depth at LW* (m.)
Garpeskjar – West	418	10.0
Garpeskjar – North	213	7.0
Garpeskjar – East	268	7.0
Inner Harbour	220	6.4
Killingoy Offshore Base East	120	10.0
Killingoy Offshore Base South	111	10.0
Killingoy Offshore Base West	157	15.0

At Garpeskjar – West, there is a Ro/Ro Terminal with landing point for ships ramps with a width up to 15 m.

At Garpeskjar – East, there is a Reefer Store.

There are several private Companies in the port with berthing facilities with depths between 5 m. and 7 m.

Lay-Up Areas: A well recommended Lay-up Area is situated at Bovaagen Bay, just to the South of the Bridge between Haugesund and Karmoy (2 miles to the South of the city).

The Lay-up Area can accommodate vessels up to 250,000 d.w.t. The depth in Bovaagen Bay is from 23 m. to 40 m., with good holding ground.

The Bollards are certified from 200 – 400 tons holding capacity.

There is a 380 volt current supply and telephone connections are available. Fresh water is supplied by boat. Entrance to the Lay-up Area in general takes place from the South, limited by a link-span 47 m. high.

To the West side of Storasundskjaerene is an excellent lay-up area for oil rigs. Bollard of 250 tons. 380 volt current supply, fresh water and telephone.

CRANES: Mobile cranes of all sizes available. Floating crane of 80 tons available.
STEVEDORES: To be ordered by local Agent in ordinary Office hours (07.30 – 15.30).
MEDICAL: Doctor and hospital facilities available at any time.
FRESH WATER: Available ex-wharf or by boat.
FUEL: Available ex-wharf and by boat or truck.
CONSULS: Denmark, Finland, France, Germany (F.R.), Iceland, Sweden and United Kingdom.

Countries not mentioned above are in general represented in Stavanger.

REPAIR/DRY DOCKS: HMV Shipyard offers dry dock facilities for vessels up to 155,000 d.w.t. and a floating dock for vessels up to 17,000 d.w.t.

Drilling Rigs can be berthed alongside the yard's 100 m. long "deep water quays".

There are also several smaller repair yards in the Port.

At Killingoy (offshore base) there are repair facilities in general and also service on offshore underwater works (diving operations, etc).

AIRPORT: At Karmoy, 15 minutes drive from Haugesund.
AUTHORITY: Haugesund Harbour Authority, P.O.Box 186, N 5501 Haugesund, Norway. *Tel:* (04) 714744. *FAX:* (04) 712819. *Contact:* A.J. Simonsen, Harbour Inspector.

HEROYA: 59.07 N. 09.38 E. **(See Plan)**

DOCUMENTS:

Clearance documents – forms obtainable from Custom Officers on arrival.
Derat Certificate.
Bill of Lading.
Manifest.
2 Crew Lists.
Ship's Register.

PILOTAGE: Vessels approaching from the sea and desiring a Pilot shall, as far as possible, order a Pilot 24 hours in advance and thereafter confirm arrival at Pilot Station 2 hours in advance.

Vessels lying in port and desiring a Pilot shall, as far as possible, order a Pilot 4 hours in advance and thereafter confirm departure from the port 2 hours in advance.

Orders for Pilots shall be addressed to "Brevik Control" (Channel 80).

Also see "Brevik – Regulations".

Pilot boat located 1 mile S.E. of Langoytangen Lighthouse (position: Lat. 58° 59′ 30″ N., Long. 9° 45′ 30″ E.).

ANCHORAGES: All anchoring at Frierfjorden. Also see "General" before first port (Agotnes).
RESTRICTIONS: No restriction on night entry except for large vessels when Pilots prefer daylight. Also see "General" before first port (Agotnes).
MAX.SIZE: Max. draft 32 ft. 6 in., max. length 600 ft. entering Kjortingen between Langesund and Brevik. Also see "General" before first port (Agotnes).
HEALTH: See "Documents". Norwegian Health Certificate required on clearance inwards.
RADIO: Cable Agents giving ETA, draft and cash required via Tjome Radio/LGT or Farsund Radio/LGZ.
TUGS: Tugs join at berthing place. Ship's lines used.
BERTHING: No specific requirements relating to berth.
CARGO HANDLING FACILITIES: On the East side of the river, a berth of 800 ft. length, 20 ft. to 21 ft. alongside. A new quay for vessels up to 10,000 tons, 26 ft. to 27 ft. depth, specially for handling bulk cargoes.

No berth equipped for handling Ro/Ro traffic, but berth available for liquid chemical and LPG carriers.

Norsk Hydro A/S Oil Pier, vessels up to 20,000 d.w.t.

Norsk Hydro A/S Main Quay, length 1,838 ft., draft 26 ft. to 34 ft. 6 in.

Norsk Hydro A/S Western Quay, length 1,263 ft., draft 26 ft. to 32 ft. 6 in.

CRANES:

Norsk Hydro A/S Main quay:

4 cranes reaching 10 m.-11 m. outside quay border capacity 6 tons.
2 cranes reaching 18 m. outside quay border capacity 6 tons.
3 elevators for loading of bagged cargo reaching 16 m.

Norsk Hydro A/S Western Quay:

2 cranes reaching 18 m. outside quay border capacity 7 tons.
1 crane reaching 15 m. outside quay border capacity 8 tons.
1 crane reaching 9 m. outside quay border capacity 3 tons.
3 elevators for loading of bagged cargo reaching 8 m.

Deep Water Jetty:

2 cranes reaching 16 m. outside quay border capacity 10/12 tons for bulk cargo only.
1 crane capacity 5 tons for handling of stores, etc.

BRIDGES: Brevik Bridge max. height 45 m. Porsgrunn Bridge (VHF Channel 12) only when proceeding to Menstad, Borgestad, Waterloo and Skien, liftbridge with breadth of 30 m. Sound signals for passing bridge inward, 1 long and 2 short. Outward signals, 1 long and 1 short.
STEVEDORES: Ordered by Shippers/Receivers or Agents.
MEDICAL: All medical assistance to be arranged via Agents.
TANKERS: Discharge lines 4 in., 6 in., 8 in.
DENSITY: Brackish 4 in. – 6 in. allowance.
FRESH WATER: Obtainable various quays.
FUEL: All grades available.
FIRE PRECAUTIONS: Tankers discharging, smoking only by Officers in saloon, crew in messroom.
CONSULS: Belgium (03) 520083 (Skien), Denmark (03) 550069, Germany F.R. (03) 525093 (Skien), Netherlands (03) 522742 (Skien), Finland (03) 552620.
REPAIRS: Repairs possible.
DRY DOCK: Draft 14 ft., length 155 m., breadth 20 m., also 4 smaller docks.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew normally open and close. Otherwise according Charter Party.
CERTIFICATES: Registered Tonnage Certificate; Derat Certificate. Otherwise normal international certificates.
CUSTOMS ALLOWANCES: 400 cigarettes for the Master and 200 for each crew member. *Wine and/or Spirits:* 4 bottles spirit for Master and half bottle for each crew member.
CARGO GEAR: No additional requirements, but using vessel's rain tents.
REPATRIATION: Facilities exist for effecting crew changes and repatriation.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day, Maundy Day, Good Friday, Easter Eve (half day), Easter Monday, Christmas Eve (half day), Christmas Day, 26th December, New Year's Eve (half day).
POLICE/AMBULANCE/FIRE: Police 560000; Ambulance 550170; Fire 551522. Other numbers: Pilot Station 571233; Tug Station 571144; Norsk Hydro Central 562000; Porsgrunn Bridge 552492; Custom House 554540; Taxi 556900; Harbour Office: 571080 – 571088.
IDENTIFICATION CARDS: Only necessary at quays belonging to Norsk Hydro. Special identification cards will be delivered to Master on arrival.

SHIPMASTER'S REPORT: December 1988.
Pilotage: Pilot boards about 2 miles South of Langoytangen Lighthouse (near Langesund), from a fast sea cutter painted orange. Call "Brevik Control" on VHF Channel 80, working Channel 13.

One pilot is used for the complete passage into Frierfjord, which serves Rafnes, Porsgrunn and Heroya.

When unberthing or sailing from the inner anchorage, the pilot and tugs require 2 hours notice through "Brevik Control".

Anchorage: The anchorage is located in Frierfjord off Versvik, in a depth of 20 fathoms. The anchorage is sheltered.

It is difficult to anchor outside the Pilot Limits as the water is deep and the coast is exposed to the prevailing winds.

The pilot advised that the only suitable anchorage outside is at Sasteinflak Bank, about 2.7 miles S.W. of Langoytangen Lighthouse. This anchorage is exposed to S.W. winds and swell. If vessel anchors at this location it is to report to "Brevik Control" prior to anchoring.

Approaches: The pilotage time to Rafnes via Brevik Fjord for vessels with a draft of less than 32 ft. is 1 hour. Due to restrictions at Kjortingen Passage and Brevik Bridge, vessels in excess of 32 ft. draft use Kalven Passage to the East of Brevikfjord. However, vessels can only go as far as Brevik.

The Pilot reports that the waters never ice over as the water is salt and currents are always running.

Tankers which are not gas free must have a minimum visibility of 1.0 nautical miles in order to make a passage.

Tugs: A safety tug is compulsory for all tankers which are not gas free. Large vessels require 2 tugs.

Tugs join vessels off Aroy Island and make fast astern with 2 ship's lines from the centre lead.

Fire wires are required, forward and aft, when proceeding from the pilot station to Rafnes, and vice versa.

There are 4×3,500 h.p. tugs available and one is always on stand-by at Rafnes when tankers are alongside. When vessels are alongside and not loading or unloading (cooling down does not count as loading) a charge of about £60.00 per hour is made for the stand-by tug and this is for the vessel's account.

Berthing: There are 3 berths for gas and product tankers at the Norsk Hydro Refinery at Rafnes, on the West side of the Fjord.

Largest vessel handled 32,000 cu.m. (gas vessel).

The main imports are propane and butane and the main exports are ethane, sodium and sulphuric acid.

The berths are No. 1, No. 2 and No. 3, from North to South. Berths No. 2 and No. 3 have a depth of 12.0 m. The berths are well constructed and have good fenders. The berths are 'T' shaped jetties with mooring dolphins connected by catwalks either side of the jetty.

Vessels normally berth port side alongside. Shore gangway provided.

There is a fairly strong South flowing current along the line of the jetties.

Cargo: Ethylene is loaded at Berth No. 3 from ethane Chicksan, at about 150 t.p.h. at −100°C.

The liquid and vapour Chicksans are 6 in. (150 ASA).

As handling of ethane and ethylene is through the same Chicksans, a period of 18 hours is required for shore line purge between products.

Ethylene is stored at −95°C. and is further cooled through expansion valves to −100.5°C. in order to arrive at the ship's rail at −100°C.

Stoppages for "First Foot" and "75% samples" varies due to shore loading requirement. We did not stop, due requirement for cold product and in order to avoid line heating.

Vapour return by ship's compressor, mainly at 100% compressor loading.

Ethylene is not normally exported, although it is sometimes imported. It is used for VCM, but not at the present time due to VCM cracker explosion.

Vessels are not normally allowed to stay alongside for cooling down as other vessels are usually waiting and there is a charge for a stand-by tug.

General: VHF: Whilst at anchor Tjome Radio, VHF Channels 25 and 62, was used.

Stores: Stores are expensive.

AUTHORITY: Porsgrunn Havnevesen, P.O.Box 20, 3951 Brevik, Norway. *Tel:* (03) 571080/571088. *FAX:* (03) 571703. *Contact:* Hans Roe Edvardsen, Port Director.

HORTEN (on West Side Oslo Fjord): 59.24 N. 10.28 E.

DOCUMENTS: Health Certificate, Provisions List, etc., all forms obtainable from Customs Officer boarding on arrival. Ship's Register and 2 copies of Manifest (with or without freight).
PILOTAGE: Compulsory for foreign ships over 50 g.r.t. Pilot station at Hvasser (Sandosund) outer Oslofjord, Tel: Hvasser 178 via Tjome Radio, VHF Channel 16 and RT 2182 kHz. Cutter or motor cruiser at Faerder Lighthouse bearing 3 miles N.N.E. White hulls with word LOS in black letters. Pilot usually ordered through Agent. Inner Harbour, Horten, compulsory Harbour Pilot ordered through Agent.
ANCHORAGE: Langgrunn outside Horten, any size vessel.
RESTRICTIONS: No restrictions night entry, but Inner Harbour at Horten only entered with Harbour Pilot on board.
MAX. SIZE: Ships up to max. length 900 ft. (anchored moorings outside jetty). Deep-water Wharf, length of N.E. side 530 ft. Draft 28 ft.
HEALTH: See "Documents". Advise Agent if suspect any disease or fever.
RADIO: Cable Agent giving ETA via Tjoeme Radio. Local Harbour Master's Office can be contacted by VHF Channel 16. Hortens Brygge's "Pilotboat" when in service VHF Channel 16.
TUGS: Tugs if required use ship's line. Tugs ordered through Agent.
BERTHING: Max. draft alongside quay 28 ft.
STEVEDORES: Ordered by Agents.
MEDICAL: No special notice required, but preferred if urgent. Local hospital-Horten Sykehus Tel: 43191.
DENSITY: About 1022.
FRESH WATER: Available at most berths and from lighter.
FUEL: All grades. Direct from Installation and also by lighter. If large quantities, give earliest possible notice.
FIRE PRECAUTIONS: Usual restrictions and no smoking inside Cleaning Installation gate.
CONSULS: Only Finnish Consul in Horten Tel: 42189, but most Consulates in Tonsberg – 18 km. distant. British Vice-Consul, Tonsberg Tel: 11605, Netherlands Vice-Consulate Tel: 13224.
REPAIRS: Any kind can be carried out.
DRY DOCKS: Dry docks for vessels up to about 60,000 d.w.t.. at A/S Horten Verft.
GANGWAY/DECK WATCHMEN: Available, not compulsory.
OPENING/CLOSING HATCHES: Usually opened/closed by vessel's crew.
CERTIFICATES: Ship's Register and usual certificates.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes or 250 grammes tobacco, 200 cigarette papers for persons over 15 years only. Wine and/or Spirit, Spirit of max. 60% 1 bottle (1 litre) and 1 litre wine (1.25 bottle) – 2 litres of wine if no spirits and 2 litres of beer (for persons over 21 years only).
CARGO GEAR: No additional requirements except when extra heavy lifts (20 tons).
REPATRIATION: Crew changes, etc., can be arranged.
AIRPORT: Nearest international Airport is Oslo Airport (Fornebu) and Torp Airport (Sandefjord). Charter flights may be arranged to and from Sandefjord Airport – any size of plane, and small aircraft at Jarlsberg Airfield. Distance to Sandefjord about 30 km., to Jarlsberg about 18 km.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Thursday before Good Friday; Good Friday; Easter Monday: 1st May; Ascension Day; 17th May; Whit Monday; Christmas Day; 26th December. 24th December is half holiday – work stops at noon or 1300 hrs.
POLICE/AMBULANCE/FIRE: Fire 001, Police 002 and Ambulance 003.
TELEPHONES: Can be placed on board at Deepwater Wharf, the Cleaning Installation and the Dockyard (A/S Horten Skip & Dokkservice A/S) at comparatively cheap rates.
SERVICES: Adjusting of all kinds of ship's instruments.
SHORE LEAVE: Crew members are allowed on shore.
IDENTIFICATION CARDS: Not needed.
REGULATIONS: Compulsory harbour Pilot when calling at Inner Harbour.
DEVELOPMENTS: Committee at present working with plans for building more berths for ferries and traffic.
GENERAL: Important Electronic Industry.
AUTHORITY: Borre Havnevesen, Post Box 167, N-3191 Horten. *Tel:* 033-41021. *FAX:* 033-44727. *Contact:* Kjell Fjellin, Harbour Master.

HOYANGER: 61.10 N. 06.04 E.

LOCATION: Hoyanger Aluminium Works located North of Bergen in outer part of Sognefiord. Lat. 61° 10′ 18″ N., Long. 6° 04′ 07″ E.
DOCUMENTS: See "Bergen".
PILOTAGE: Compulsory. Belonging to Bergen Customs District and unless otherwise arranged before hand vessels from abroad must call Bergen for inward clearance.
BERTHING: Length of Quay: 600 ft. (approx.) Depth alongside: 36 ft. Cranes. Ice free.
AUTHORITY: Hydro Aluminium, Hoyanger Verk, Postboks 114, N-5900 Hoyanger, Norway. *Tel:* Int+47+5715000. *Telex:* 42584 hoal n. *FAX:* Int+47+5713080. *Contact:* Torfinn Laegreid, Manager – Shipping Department.

HUSNES: 59.52 N. 05.46 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
2 Bills of Lading
2 Manifests.
PILOTAGE: No pilotage in port. Sea Pilots in stations at Skudesnes (59° 05′ N., 05° 19′ E.), Kvitsoy (or Kopervik) and Utsira.
ANCHORAGE: Lat. 59° 53′ N., Long. 05° 45′ E. in 20 m.
MAX. SIZE: 70,000 tons.
HEALTH: Customs Authorities in Bergen to be advised on entrance.
RADIO: Best radio stations: Rogaland Radio. ETA to Receiver's cable address: "Soeraluminium, Husnes".
VHF: Vessels may contact harbour Channel 9.
TUGS: Normally not necessary. If wanted, can be ordered from Bergen or Haugesund.
BERTHING: 240 m. Depth alongside: South 10 m., North 17 m. 2 cranes, on quay, each 8 tons at 20 m. and 1 pneumatic gear for discharging alumina. Capacity 5,000 tons per 24 hours.
STEVEDORES: Normal working time: Monday-Friday 0700 – 1500 hrs.
MEDICAL: Hospital at Stord (about 1 hour by ferry and car). Doctor at factory during daytime (0800 hrs. – 1500 hrs.).
TANKERS: Discharging line 9 in.
FRESH WATER: Available, direct from quay to ship.
FUEL: Not available.
CONSULS: None.
REPAIRS: Only small workshops.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Crew.
OPENING/CLOSING HATCHES: To be carried out by crew.
CARGO GEAR: Per Norwegian safety regulations for loading and discharging.
REPATRIATION: No facilities for obtaining new crew (Haugesund or Bergen).
AIRPORT: Bergen-Flesland. 2 hours – 2.5 hours from Husnes to Bergen by hydrofoil, and 0.5 hours by plane. Haugesund Airport 3 hours by car from Husnes.
POLICE/AMBULANCE/FIRE: Alarm telephone number 110 or 111.
TELEPHONES: Agent has one telephone in office on quay.
SERVICES: No services at quay. Tank cleaning at Bergen, compass adjusting at Haugesund.
SHORE LEAVE: Permitted. Crew required proceed direct from quay to gate of plant.
IDENTIFICATION CARDS: Crew need cards signed by Master.

SHIPMASTER'S REPORT: September 1979 (Type "Panamax").
Tugs: For large ore carriers 2 tugs ordered for arrival, and 1 tug on departure by Sor-Norge Aluminium A/S.
Stevedores: Normal working time for alumina carriers from Monday 0600 hrs. – Saturday 0600 hrs.
Fresh Water: Flat charge of Nkr. 800 for all water taken. Smaller vessels Nkr. 400.
Discharge Rate: The discharge rate for alumina is still in the region of 5,000 tonnes per day despite the reduction in working hours.

AUTHORITY: *Shippers/Receivers:* Sor-Norge Aluminium a/s.
AGENT: Sor-Norge Aluminium A/S P.O.Box 85, 5460 Husnes. Tel: 054-75000. Telex: 42420. Contact: Mr. A. Solbakken, after hours Tel: (054) 71193.

KARSTO (Kaarstoe): 59.16 N. 05.30 E. (See Plan)

DOCUMENTS:
Quarantine:
Completed Declaration of Health.
Valid Derating Certificate.
International Vaccination Certificates.
Customs:
Crew's Effects Declaration (RG-223).
Ship's Stores Declaration (RG-104).
General Declaration (RG-110).
Crew List.
Passenger List.
PILOTAGE: Compulsory. The sea pilot, also acting as harbour pilot, will board arriving vessels off Kvitsoey Lighthouse in position 59° 05′ N., 05° 19′ E. The pilot boat normally operates on VHF Channels 16 and 13 and medium wave radio telephone 2182 kHz. During passage, vessel must listen to VHF Channel 11 for communication with the terminal. Pilot for arrival arranged by agent (based on messages from Master). Pilot for departure arranged by terminal.
APPROACHES: From Boknfjorden to Falkeidflaeet. The main entrance to Karsto is situated between Flate Rova and Austreflu marked by light beacons. In addition the entrance is marked with green leading lights situated on Ognekalven.
ANCHORAGES: Vessels awaiting berth will be anchored at Falkeidflaeet or the Hervik Fjord. The place will be considered jointly between the pilot and the terminal.
RESTRICTIONS: Normally no restrictions on berthing at night time.
MAX. SIZE: *LPG/Naphtha Jetty:* Max. length 210 m., max. draft 11.3 m. There is also a small coaster and Ro-Ro jetty at the terminal. Water depth is 7.7 m. and 7.5 m. respectively.

HEALTH: Completed Declaration of Health and International Vaccination Certificates required.
RADIO: Rogaland Radio.
VHF: Channel 11 for communication with the terminal.
TUGS: Compulsory. Two tugs available, each of 42 tons bollard pull. Tugs lines used.
BERTHING: The terminal berthing facilities consist of one "T" jetty for handling LPG and Naphtha products and a coaster/module jetty for handling other cargoes.
Water Depths:
LPG/Naphtha Jetty: 13.5 m.
Coaster Jetty: 7.7 m.
Ro-Ro Jetty: 7.5 m.
Tide: Difference between high and low water is small in the area, maximum 1.0 m., normally below 0.6 m. at Spring tides.
Current: Currents in the vicinity of the jetties vary in direction according to wind and tides. Measurements indicate average current of 0.4 knots. Maximum recorded current is 1.7 knots setting S.E.
Wind:
Prevailing winds March-August: North-Northwesterly.
Prevailing winds September-February: Southeasterly.
MEDICAL: No advance notice except in case of serious illness to be included in arrival cable. Hospital facilities available.
TANKERS:

Product	*Flange*
Natural gasoline	10 in. ANSI 150.
Propane liquid	12 in. ANSI 150.
Propane vapour	10 in. ANSI 150.
N-butane liquid	10 in. ANSI 150.
N-butane vapour	8 in. ANSI 150.
I-butane liquid	8 in. ANSI 150.
I-butane vapour	8 in. ANSI 150.

DENSITY: 1025.
FRESH WATER: Available.
FUEL: Bunkers are not obtainable at the terminal. Marine lubricants can be obtained through supplier. Possible to supply bunkers in the area.
CONSULS: Denmark, Finland, Germany F.R., Iceland, Sweden and United Kingdom.
REPAIRS: Hot work is forbidden. Any repair or maintenance work which may immobilise the vessel is prohibited unless approved by Terminal Manager.
DRY DOCKS: Available at Haugesund. Max. docking capacity 150,000 d.w.t. Max. LOA 283 m. Beam 45.3 m.
SURVEYORS: Lloyd's Agents: Bergesen d.y. A/S, N-4001 Stavanger.
1) Cargo Inspectors: T.G.Soundings, Caleb Brett, SGS.
2) Norske Veritas, Lloyd's Register.
WATCHMEN: Ship's crew.
CUSTOMS ALLOWANCES: Tobacco and cigarette paper may be freely supplied for consumption on board for up to 10 days as follows:
Master of vessel: 400 cigarettes or 400 grammes of other tobacco goods and 200 cigarette papers.

LARVIK: 59.03 N. 10.02 E. (See Plan)

PORT LIMITS: The official port limits for the Port of Larvik is a line from Sandefjord in the East to Porsgrunn in the West. Notices of Readiness for loading or discharging, however, will be accepted when the vessel is anchored in any of the anchorages in inner Larvik Fjord.
DOCUMENTS:
Maritime Declaration of Health.
Tolliste, i.e. tobacco and curio list for total number of crew.
1 "Varefortegnelse med proviantliste", i.e. Cargo and Provisions List. (2 copies required for bulk cargoes.)
"General-varefortegnelse", i.e. List of General Cargo – 3 copies required.
3 Ship's Manifest.
3 Bills of Lading.
Customs Officer will accept Tobacco and Curio Lists, also Provision Lists filled in on foreign forms, if all goods correctly stated.
PILOTAGE:

1. Vessels approaching from the sea and desiring a Pilot shall order the Pilot at 24 hours' notice insofar as possible and confirm arrival at pilot station at 2 hours' notice:
   (a) by telephone or telegram from ship to the pilot office concerned or sea pilot station over an official coastal radio station.
   (b) by telephone or telegram from broker/shipowner to the pilot office concerned or sea pilot station.
2. For direct connection between ships desiring Pilot and the pilot service, VHF-radio telephone Channel 16 (156.8 MHz) shall be used for calling and reply, and a VHF-radio telephone ship-to-ship Channel or harbour Channel shall be used for conversations. Ships not equipped with VHF-radio telephone may use the distress and calling frequency 2182 kHz for calling pilot vessel, but both the ship desiring Pilot and the pilot vessel shall in such cases immediately turn to ship-to-ship frequency. At such connections minimum transmission effect shall be used.
3. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours' notice.
4. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order, state the name and destination of the vessel and whether 1 or 2 Pilots are desired.
5. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.
6. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.
7. These provisions came into force on the 1st April, 1984.

Description of pilot boat: White painted, orange wheelhouse, 2 masts, "Los" on both sides of bow. The pilot vessel is situated in Langesund Harbour on watch 24 hours every day. Pilot boards ships S.E. of Langoytangen lighthouse (58° 59.4′ N., 9° 45.8′ E.).

The Agent must in general order Pilot before 1200 hrs. and before 1530 hrs. Friday when Pilot is required before Monday morning.
ANCHORAGES: Safe anchorages at end of fjord, West side. Masters should consult Pilots and/or charts before anchoring. Ample water and good holding ground for all sizes of vessels.
MAX.SIZE: Largest vessel berthed at Larvik Canal Quay, LOA 644 ft. 8 in., breadth 83 ft. 3 in., max. draft 32 ft. 6 in.
HEALTH: Advise Agents of any suspected disease or fever on board by radio or telephone before entering. Vessel will then anchor in anchorage and be boarded by state doctor. When vessel is healthy, Customs Officer will grant Pratique.
RADIO: Tjome Radio LGT, Rogaland Radio LGQ.
TUGS: No tugs at Larvik. Tugs to be ordered via ship's Agents from Fredrikstad or Porsgrunn. If tugs required Agents should be given 12 to 24 hours' notice. Tugs join vessel in fjord off harbour breakwater. Extra charges for use of tug's lines.
BERTHING:
Revquay West (Vester Revkai): Length 118 m. Depth alongside 9 m. Newest quay for general and miscellaneous cargo. New warehouse, measuring 1,600 sq.m. Asphalted area outside measuring 10,000 sq.m. Railway track.

Adjacent to this quay is the Roll-on/Roll-off berth. Max. length vessels 170 m. Depth alongside 8 m.
Revquay South (Revkaia Syd): Length 70 m., depth alongside 10.0 m. Storage area measuring 52,000 sq.m. partly asphalted. One portal electric crane with capacity 50 tons.
Kanalquay (Kanalkaia): Kanalquay North – Length 335 m. Depth. 10 m. Kanalquay West – Length 120 m. Depth 6 m. Kanalquay South – Length 90 m. Depth 5 m.

Facilities available at Kanalquay and Revquay West: Railway tracks, 4 portable electric cranes, capacity 6 tons – 50 tons. Portable pneumatic grain discharging plant, capacity 85,000 tons. Warehouses measuring 4,000 sq.m.

Outdoor storage area: 20,000 sq.m.
East Pier (Ostre Brygge): Length 130 m. Depth 8 m. New Ferry quay with Roll-on/Roll-off facilities. Car park for 560 cars or 52 lorries/trailers 18 m. Passenger terminal. Customs.
West Pier (Vestre Brygge): Depth – East side 6 m. West side 7 m.

Ferry quay with Roll-on/Roll-off facilities on West side. Good parking.
Private Wharves: Treschow-Fitzoe Pulp Quays – West side: Length 50 m. Depth alongside 5 m. East side: Length 90 m. Depth alongside 6.3 m. 1 portable electric crane capacity 5 tons.
STEVEDORES: Gangs to be ordered before 1600 hrs. and cranes before 1500 hrs. for following day. During office hours 2 hours' notice required.
MEDICAL: No advance notice required, unless in urgent medical cases and when ambulance needed. No particular inoculations required.
TANKERS: For larger oil-tankers for asphalt works, 8 in. connections required; for coasting vessels, 6 in. connections used. No slop tanks. one berth for tankers. Max. draft in berth 32 ft. 6 in.
DENSITY: Salt water, brackish at times.
FRESH WATER: Delivered by hose from wharf.
FUEL: Fuel oil, gas oil, diesel oil, delivery rate by tank lorry 20 t.p.h.
FIRE PRECAUTIONS: Any vessel discharging benzine must have city fireguard on watch. 30 m. clearance required to next vessel.

Ships loading explosives require fireguards on watch on board.
CONSULS: Danish, Tel: 84040, French Vice-Consulate Tel: 82 030, Swedish and Netherlands Vice-Consulates Tel: 82 090, Finnish Vice-Consulate Tel: 81 000.
REPAIRS: Minor deck and engine repairs only.
GANGWAY/DECK WATCHMEN: Not compulsory, but recommended for larger overseas vessels.
OPENING/CLOSING HATCHES: Usually done by ship's crew.
CERTIFICATES: Vessels must have all usual International Certificates, no special certificates required.
CUSTOMS ALLOWANCES: Every crew member allowed one bottle wine or spirits, and 200 cigarettes out of bond for use in port. This allowance is for 10 days. After this period new tobacco allowance is granted, but no new spirit issue.
CARGO GEAR: No additional requirements.
REPATRIATION: Facilities for effecting crew changes and necessary repatriation by railway, continental ferry and by air.
AIRPORT: Distances from airport: Skien, regular service to Oslo 40 km. Torp, charter planes, 35 km. Fornebu, 130 km., world-wide service. Private airport open for small aircraft at Larvik.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday, Good Friday; Easter Monday; May 1st & 17th; Ascension Day; Whit Monday; Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Tel: Police 82204, Fire 81234, Ambulance 81288.
TELEPHONES: Arrangements exist for placing telephones on board; charges 132 kr. for one week's hire plus cost of phone calls.

Bill of Lading.

Goods Lists including Stores, 3 if general cargo and 1 if goods or oil in bulk.

PILOTAGE: Harbour Pilot available, ordered from Harbour Office, tel. 51278. No coastal Pilots in harbour. Coastal Pilots ordered from Bergen through Maaloy Skipsekspedisjon, tel. 51077, and must be requested at least 24 hours before arrival.

ANCHORAGE: Good holding ground in about 17 fathoms of water 300 m. off-shore from middle of harbour.

MAX. SIZE: Entrance from South through main channel 33 ft. and entrance from North about 60 ft.

RADIO: Nearest radio stations, Alesund Radio and Floro Radio.

VHF: Maaloy Harbour Radio on Channel 16 from 0800 – 1530 hrs. every day except holidays. After hours call for "Maaloy Port Control" over Floro Radio.

TUGS: No tugs operate in Harbour.

BERTHING: The main quay 160 m. long and from 24 ft. to 36 ft. deep alongside. No cranes available at the dock. Quay, length 110 m. Depth alongside 12 m. – 15 m.

New Quay: Length 152 m. (+54 m.) Depth 10.0 m. – 12.0 m.

Ro/Ro Quay: Length 132 m. Depth 7.0 m. – 10.0 m.

CARGO HANDLING: Special berth equipped with a Ro/Ro berth in connection with quay 225 ft. long, from 18 ft to 36 ft. depth alongside.

STEVEDORES: From Maaloy Skipsekspedisjon.

MEDICAL: Nearest hospital Nordfijordeid Sykehus, 1 hour by car.

FRESH WATER: Available at main quay and delivered from a fresh-water line at quay.

FUEL: Bunkers available from Esso, Shell and Mobil Oil. 3 bunker barges available.

CONSULS: None.

REPAIRS: Minor repairs only possible.

SURVEYORS: Surveyors and Cargo Inspectors available from Bergen.

GANGWAY/DECK WATCHMEN: Available in the harbour.

OPENING/CLOSING HATCHES: Done by crew.

CUSTOMS ALLOWANCES: Tobacco: Wine/Spirits: 200 cigarettes or 100 gm. tobacco. 1 bottle of spirit and 1 bottle of wine.

AIRPORT: Nearest airport Floro, 1 hour by boat, Sandane Airport 1 hour by car and Flesland Airport (Bergen) 8 hours night service by sea.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; Easter Sunday; Easter Monday; Thursday and Friday before Easter; 1st May; 17th May; Whit Sunday and Whit Monday; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Police Tel: 50211; Fire contact telephone No. 011. Ambulance Tel: 51458.

EMERGENCY CO-ORDINATION CENTRE: Contact Police Station Tel: 057-50211.

STORING: See "Prelims".

(1) Both. (2) Yes. (3) Yes. (4) Yes. (5) No. (6) Yes.

TELEPHONES: Can be placed on board and cost same as on shore.

SERVICES: No tank cleaning services available. Compass adjusting.

BANKS: Bergen Bank, Maaloy, Telex: No. 42291. Vagsoy Sparebank, Maaloy, Tel: 057-51433. Fiskernes Bank, Tel: 50244.

SHORE LEAVE: No restrictions on shore leave.

SHIP SUPPLY SERVICE: For the transport of sick crew members and as such, by helicopter or launch/tug, arrangements have to be made with the nearest coast radio station. Tug/rescue vessel R/S "Hjalmar Bjorge" operates from Maaloy Harbour. The vessel can be contacted 24 hours directly by radio or over Floro Radio.

AUTHORITY: Maaloy Havnevesen, P.O.Box 104, 6701 Maaloy, Norway. *Tel:* (057) 51278, 51852. *FAX:* 057-51852. *Contact:* Kristoffer Stokke, Harbour Manager. Vidar Endal, Port Captain.

MANDAL: 58.02 N. 07.29 E.

DOCUMENTS:

Bill of Measurement.
General Cargo List (2 copies).
Cargo and Provisions List (ship's stores).
Derat Certificate.
Maritime Declaration of Health.
Tobacco list.

PILOTAGE: Pilot station on Oksoy Lighthouse outside Kristiansand. Telephone 32834 via Kristiansand Radio.

ANCHORAGES: Mannefjorden. Depth approx. 30 ft. Bankefjorden, shallow entrance with approx. depth 15 ft.

MAX. SIZE: New berth at Gismeroya outside Kleven can accept vessels up to 20,000 g.r.t. Oil carriers to installations outside main port area up to 50,000 tons.

HEALTH: Contact Agent for Pratique.

RADIO: Farsund Radio or Kristiansand Radio.

TUGS: Two tugs available.

VHF: Harbour Office equipped with VHF Channels 16 and 12.

BERTHING: Mandal main harbour is Kleven, situated 1 km. East of Mandal town. There is also a harbour in Mandal River, running through town. Entrance to Mandal River is dredged to 15 ft. In South-easterly strong winds it can be impossible to go up the river. Kleven Harbour is a good harbour in all weather conditions. There is 1 × 97 m. quay 30 ft. deep and 1 × 45 m. quay 17 ft. deep.

Gismeroya: New berth and warehouse at entrance to Kleven Harbour is now the main harbour. Length 100 m. Depth alongside 10.5 m.

CRANES: One floating crane with up to 50 tons capacity and a wide range of mobile cranes available at short notice.

STEVEDORES: 6 hours notice to Agents to arrange gangs.

MEDICAL: No advance notice required. Hospital facilities available.

DENSITY: 1026.

FRESH WATER: Delivered by local firemen. Rate of delivery 20 t.p.h.

FUEL: At Oil installation inside Harbour limit.

CONSULS: Sweden 62521; Finland 61288; Denmark 61799.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Certificate of Nationality.

CUSTOMS ALLOWANCES: Tobacco: 200 gm. or 200 cigarettes. Wine and/or Spirits: 2 litre alcohol for ship's Master, 0.75 litre for crew.

AIRPORT: Kristiansand Airport at Kjevik. Distance from Mandal 64 km. Airport served by regular airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: The only holidays on which cargo work cannot be arranged are Christmas Eve (after 1400 hrs.), Christmas Day, Easter Day, 1st May, 17th May (Independence Day). The rest of the year cargo work can be carried out day and night.

POLICE/AMBULANCE/FIRE: Police 61211; Ambulance 61113; Fire 61112.

TELEPHONES: Telephones available at quay.

SERVICES: No services for tank cleaning. Compass adjusting and all kinds of electronic repairs.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

AUTHORITY: Mandals Havnevesen, Ballastbrygga, 4500 Mandal, Norway. *Tel:* (043) 62011. *Cables:* Mandal Havnevesen. *Contact:* Captain A. O. Johannessen, Harbour Master.

MO-I-RANA: 66.19 N. 14.08 E.

PORT LIMITS: The vessel is considered to be an "arrived vessel" when within the Hauknes Port Lighthouse – about 2 nautical miles from the port.

DOCUMENTS:

1 Cargo List.
1 Stores List.
1 Sealing Certificate.
1 Health Certificate.
2 Crew Lists.
2 Passenger Lists.

(All Forms obtainable from Agent by clearance on board).

PILOTAGE: Asvaer Pilot Station Lat. 66° 17' N., Long. 12° 09' E. (lighthouse). Order preferably through Agent or direct to station 24 hours before arrival. Tel. 086-40960. 1 boat "L/K 083" painted white with red top. "LOS 083" painted in black on both sides. VHF Channel 16.

Pilots embark at Asvaer Lighthouse. Pilots advise alternative place or anchorage if necessary. Pilot compulsory unless vessel ballasting for loading at another port in Norway.

ANCHORAGE: In the fjord at Nesna or at Utskarpen Bay to be advised by Sea Pilot. Anchorage in the inner harbour to be advised by the Harbour Pilot.
HEALTH: See "Documents". No animals allowed on shore.
RADIO: From South; Rogaland Radio/LGQ, LGW, LGB. Within 24 hours off; Rorvik Radio/LGD. From North; Vadso/LGV or Hammerfest/LGI or Tromso/LGE or Bodoe Radio/LGP.
VHF: At Harbour Office call sign. "Mo Port Radio" Channels 16 and 12. At A/S Norsk Jernverks quay call sign. "Jernverks quay" Channel 9.
TUGS: Available and recommended for vessels above 10,000 d.w.t. 24 hours' notice to be given. Ships' lines used.
BERTHING: Harbour Pilot recommended but not compulsory for small vessels. Details given through Pilot/Harbour Pilot.

Norsk Jernverk (Rana Gruber)	
Iron Ore	47 ft. depth alongside
Norsk Koksverk Pier	37 ft. depth alongside
Town Pier (Toraneskaia)	25 ft. depth alongside
Norsk Jernverk Pier (Steel)	26 ft. depth alongside
Andfiskaa Pier	23 ft. depth alongside

CARGO HANDLING FACILITIES: The harbour has the following facilities for handling cargoes:

A/S Norsk Jernverk (Rana Gruber) depth 47 ft. Shiploader for loading of Iron Ore only, vessels up to 80,000 d.w.t.

Norsk Koksverk A/S Pier depth 36 ft.; length 427 ft. and 295 ft., North and South side handling following cargoes: ore, coal, coke, tar, bensol, ammonia and oil.

A/S Norsk Jernverk Quay: handling ore, coke, steel products and general cargoes. Length of quay, 823 ft.; depth 25 ft.

A/S Bleivassli Gruber Pier, length 115 ft.; depth 23 ft. Has equipment and elevator for handling pyrites – fast loading.

The Town Quay (Harbour Board Quay), length 823 ft. and depth 18 ft. to 26 ft., handling general cargoes of all kind, with up to 15 ton lifts.
STEVEDORES: Ordered by Agents preferably in office hours 0900 – 1600 hrs. Exact time for commencement of work to be arranged with Agent. Vessels to pay for waiting hours for workers if delay not reported. If such report after office hours, vessel to pay for 2 hours.
MEDICAL: If in need of doctor/dentist preferably inform Agent from sea if vessel stays only 1 day.
FRESH WATER: Available at all piers from shore installations.
FUEL: All types available.
GANGWAY/DECK WATCHMAN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open/close.
CUSTOMS ALLOWANCES: Per 10 days in Norway per crew member – 200 cigarettes or 200 gm. tobacco and 2 packages cigarette paper, and 1 bottle spirits.
CARGO GEAR: Winchmen from shore required.
REPAIRS: Small repairs only.
AIRPORT: 12 km. to local airport "Rana Airport" connection with Bodoe (North) twice per day and Trondheim (South) twice per day.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Thursday before Good Friday; Good Friday; Easter Monday; Labour Day; National Day (17th May); Ascension Day; Whit Monday; Christmas Day and Second Christmas Day. No work can be arranged on any of these days.
TELEPHONES: Accidents/hospital: 51233; Ambulance: 51510; Fire: 51222 and Police: 51122.
SHORE LEAVE: No restrictions.
AUTHORITY: Rana Havnevesen, P.O.Box 185, 8601 Mo-I-Rana, Norway. *Tel:* 087-50867, 50866. *FAX:* 087-51797. *Cables:* Havnevesen. *Contact:* Per A. Nygaard, Harbour Master.

MOLDE: 62.44 N. 07.10 E.

DOCUMENTS:
Health Certificate.
Crew Lists.
Passenger List.
Dangerous Cargo List.
Ship's Register.
PILOTAGE: Telegraphic address "Alesund Radio". Address of pilot station "Rundo".
ANCHORAGE: A well-protected harbour. Depth from 15 to 20 fathoms. Tide rises about 6 ft.
MAX. SIZE: Passenger vessels of 35,000 g.r.t. berth at Storkaia.
RADIO: Alesund Radio.
VHF: Molde Harbour Radio, Channels 16 and 12.
TUGS: None. Tugs called from Alesund.
BERTHING: Depths alongside quay 25 ft. to 32 ft. LW.

A new port, 2 km. from the town. Two quays with Ro/Ro ramps. Depth alongside No. 1 – 6 m. and No. 2 – 12 m.
CRANES: 150 ton crane and 20 ton mobile crane.
STEVEDORES: Available, ordered by Agents.
MEDICAL: Hospital available.
DENSITY: 1025.
FRESH WATER: By shore installation.
REPAIRS: Most repairs possible.
SURVEYORS: Norske Veritas.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: By crew or stevedores.
POLICE/AMBULANCE/FIRE: Police 58111; Ambulance 52011; Fire 51100.
EMERGENCY CO-ORDINATION CENTRE: Telephone Police Station 58111.
AIRPORT: Aaro Airport, 4 km. from town.
STORING: See "Prelims".
(1) By truck.
(4) Yes.
(6) Yes.
SHORE LEAVE: Possible, no restrictions.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Molde Havnevesen, P.O.Box 281, 6401 Molde, Norway. *Tel:* 072-51860, 072-54386. *FAX:* 072-55965. *Contact:* Ottar Grotte, Harbour Master.

MONGSTAD: 60.49 N. 05.02 E. (See Plan)

OPERATORS: Oil refinery and crude oil terminal operated by Statoil Mongstad, 5154 Mongstad, owned by Den Norske Stats Oljeselskap a.s., P.B. 300, 4001 Stavanger and Norsk Olje a.s., Postboks 1176, Sentrum, 0107 Oslo 1.
DOCUMENTS:
3 copies Crew List.
1 copy Crew Effects Declaration.
2 copies Ship's Stores Declaration.
1 copy Health Declaration.
1 Passenger List (if any).
IMO standard forms in most cases required.

On ship's arrival the following documents must be available: Letter of Registry, Outward Clearance from last port of call, Derat or Derat Exemption Certificate, and Certificates of Insurance for Civil Liability for Oil Pollution Damage. Non-member registered ships of the International Convention on Civil Liability for Oil Pollution Damage, 1969, must after 30th June, 1976, carry a Certificate issued by Maritime Directorate, P.O. Box 8123, Oslo-Dep., Oslo, Norway. Before this date Certificates issued by Denmark, Sweden and U.K. covering non-Convention registered ships, will be recognised.
PILOTAGE: Compulsory. Pilots listen on VHF Channels 13 and 16. Vessels will be berthed/unberthed by Pilots from Fedje Pilot Station (Position Lat. 60° 51′ N., Long. 04° 39′ E.). Contact Pilots on VHF Channel 16, 2 – 3 hours notice required.
ANCHORAGE: N.W. of refinery area. However, not well sheltered and holding ground not good. No anchorage for VLCCs.
MAX. SIZE: Draft limitation at Jetty No. 1: 22.0 m.
HEALTH: International procedure followed to obtain Pratique. In case of suspected disease or fever on board, the Port Authorities to be informed in advance.
RADIO: Cable Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirement. For the refinery's guidance also cable flange dimensions on ships' headers, cargo quantities acceptable and order of loading, quantity of clean ballast and estimated time for discharge, size of cargo to be discharged and max. pumping rates, max. acceptable loading rates, quantity of tank washings and estimated time for discharge.
TUGS: Two tugs of 4,259 b.h.p. each (bollard pull 54 tons) situated at the refinery. Additional tugs available from Bergen.
BERTHING:
Berth No. 1 (crude): Draft limitation 22 m., min. length 124 m., depth 125 ft.
Berth No. 2 (products): Draft limitation 38 ft., min. length 69 m., depth 59 ft.
Berth No. 3 (products/coasters): Draft limitation 6.5 m., min. length 36.5 m., depth 25 ft.
Berth No. 4 (Pet. coke & LPG): Draft limitation 6.7 m., min. length 50 m.
Berth No. 7 (crude): Draft limitation 19.7 m., min. length 120 m.
Berth No. 9 (products: Draft limitation 16.4 m., min. length 80 m.
Berth No. 10 (Module Jetty): Draft limitation 10.3 m. at Ro/Ro part of jetty.
Berth No. 10 (Module Jetty): Draft limitation 4.9 m. at general cargo part of jetty, min. length 114 m.
CARGO HANDLING FACILITIES:
Berth No. 1: 4×16 in. plus 2×16 in./10 in. Woodfield Autoflowbooms.
Berth No. 2: 4×10 in. plus 2×8 in. Autoflowbooms.
Berth No. 3: 2×8 in. plus 2×6 in. Autoflowbooms.
Jetty No. 7: 4×16 in. and 1×10 in. Emco-Wheaton autoflow booms.
Jetty No. 9: 3×12 in. and 2×8 in. Emco-Wheaton autoflow booms.
BALLAST: Deballasting facilities available at Jetties No. 1, 2, 3, 7 and 9. Tankage capacity 99,999 cu.m. All ballast except SBT to be discharged ashore.
MEDICAL: Medical attention available. Hospital facilities at Bergen.
DENSITY: Salt water.
FRESH WATER: Available from all jetties except Jetty No. 10. Cost per ton Nkr. 2.50.
FUEL: All grades available.
FIRE PRECAUTIONS: Special safety regulation forms given when berthed.
CONSULS: Consuls available at Bergen from the following countries: Austria; Belgium, Brazil, Denmark, Finland, France, German F.R., Greece, Iceland, Italy, The Netherlands, Panama, Peru, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, Uruguay.
REPAIRS: Repair shop facilities available. Repair work must not be commenced without the agreement of the Port Captain.
SURVEYORS: The following Classification Societies represented by Surveyor at Bergen: American Bureau of Shipping, Bureau Veritas, Det Norske Veritas, Germanisher Lloyd and Lloyd's Register of Shipping.
GANGWAY/DECK WATCHMEN: Available.

CUSTOMS ALLOWANCES: 200 cigarettes or 200 gm. tobacco and 1 bottle spirit or 2 bottles of wine, each man.
REPATRIATION: All facilities. Bus or Taxi transport to international airport.
AIRPORT: Flesland Airport, approx. 86 km. (54 miles) distance from Mongstad. Distance Bergen to Mongstad approx. 45 km.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police, Tel: Knarvik 350504 and 350505. Ambulance and Fire fighting brigade available at the refinery.
TELEPHONES: No telephones on board. Long distance calls to be arranged via Agent. Local calls from Gatehouse.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes delivered on board on arrival.
PORT REGULATIONS: *Moorings:* Mixed moorings in the same direction are not allowed. Wire ropes shall have nylon "tails, forerunners" of about 10 m. – 15 m. Nylon "tails" are available for purchase. Due to occasionally heavy swell in the fjord, particular attention is paid to the moorings.
DEVELOPMENTS: *Jetty No. 4:* Project to make jetty available for LPG ships up to 6,500 cu.m. will be ready for use in late 1991.
AUTHORITY: Statoil Mongstad, N-5154 Mongstad, Norway. *Tel:* 05-361100. *Cables:* Stadimo. *Telex:* 42266 Stadm-n. *FAX:* 05-362127. *Contact:* Port Captain.

MOSJOEN: 65.51 N. 13.11 E. (See Plan)

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Ship's Register.
Cargo List.
Bonded Store List.
PILOTAGE: Pilot station at Asvaer, location 66° 15′ 9″ N., 12° 18′ 03″ E. Telegraphic address: Pilot Station, Asvaer. VHF Channel 16. Telegraph ETA 24 hours prior to arrival. Piloting around clock.
ANCHORAGES: Hellesvik. Location 66° 01′ 30″ N., 12° 54′ 20″ E.
RESTRICTIONS: No restrictions on night entry. If draft above 33 ft. enter on high tide and commence discharging immediately.
HEALTH: Free Pratique given automatically when "Q" flag not to be flown.
RADIO: Bodo Radio.
TUGS: Stationed at Sandnessjoen. Have to be ordered through Agents 24 hours prior to arrival. Normally used by vessels above 20,000 d.w.t.
BERTHING: Drafts over 33 ft. berthed only on high tide and commence discharging immediately. No restrictions on length and breadth.

Crane for bulk cargo (alumina), capacity 300 t.p.h. Mosjoen Aluminiumverk, private berth. Maximum outreach from quay – 15 m.

No other special facilities (Ro/Ro facilities may be constructed).
STEVEDORES: Ordered through Agents. No ETA to stevedores necessary.
MEDICAL: Master to advise prior to arrival if medical attention required. Hospital facilities available.
DENSITY: Brackish in port.
FRESH WATER: Supplied from installations at berth.
FUEL: Gas oil, delivered by lorries.
CONSULS: None.
REPAIRS: Minor repairs possible.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Performed by vessel's crew.
CUSTOMS ALLOWANCES: 1 bottle spirits, 200 cigarettes, 200 gm. tobacco.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

CERTIFICATES: Usual international certificates.
REPATRIATION: Organised by Seamen's Office.
AIRPORT: 4 km. from town. Regular service 3 times a day South and North.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 72151; Ambulance 72500; Fire 72000.
TELEPHONES: Can be placed on board.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Not needed.
STORING: Vessels may be stored by truck. Trucks may proceed alongside the berth. Fork-lift trucks and riggers available.
DELAYS: None expected.
AUTHORITY: Namsos Havnevesen, Postboks 107, 7801 Namsos, Norway. *Tel:* Office: 077-72400, Private 077-72401. *Contact:* John Holm, Harbour Master.

NARVIK: 68.25 N. 17.24 E. (See Plan)

The following information applies mainly to vessels arriving to load ore cargoes.

LOCATION: The Port of Narvik is located in position: Lat. 68° 25′ 30″ N., Long. 17° 24′ 00″ E.
DOCUMENTS: All ships arriving from a foreign port will be boarded by Customs.

The following documents should be completed prior to arrival:
Maritime Declaration of Health Form 1 – 1012.
General Declaration IMO Form 1 in quadruplicate.
Ship's Stores Declaration IMO Form 3 in triplicate.
Crew's Effect Declaration IMO Form 4 in triplicate.
Crew List in triplicate.
The above forms will be supplied by mail on request.
PILOTAGE: *Sea Pilot:* Sea Pilot will embark off Tranoy Pilot Station. Location: Lat. 68° 11° N., Long. 15° 34′ E.

Distance from Tranoy to Narvik 46 nautical miles.
Note: Vessels bound for Narvik will have to pass through Restricted Area. It is compulsory for all foreign non-military vessels of not more than 50 g.r.t. to have a Norwegian State Pilot on board when approaching Restricted Areas in Norwegian Waters.

The Sea Pilot will assist during undocking and leave the vessel off Tranoy Pilot Station.
Harbour Pilot: The use of Harbour Pilot is compulsory during docking. When docking on arrival, the Harbour Pilot will board the vessel inside the harbour limits.
Ordering of Pilots: Vessels approaching from the sea shall order the Pilot at 24 hours' notice in so far as possible and confirm arrival at pilot station at 2 hours' notice.
Provisions for Advance Reports in Connection with the Ordering of Pilots:

Issued by the Director of Pilotage, 10th May, 1963, amended 1st January, 1971.

1. Vessels approaching from the sea and desiring a Pilot shall order the Pilot at 24 hours' notice in so far as possible and confirm arrival at pilot station at 2 hours' notice:
   - (a) By telephone or telegram from ship to the pilot office concerned or sea pilot station over a coastal radio station.
   - (b) By telephone or telegram from Broker/Shipowner to the pilot office concerned or sea pilot station.

2. For direct connection between ships desiring Pilot and the Pilot Service, VHF radio-telephone Channel 16 (156.8 MHz) shall be used for calling and reply, and a VHF radio-telephone ship-to-ship channel or harbour channel shall be used for conversations. Ships not equipped with VHF radio-telephone may use the distress and calling frequency 2182 kHz for calling pilot vessel, but both the ship desiring Pilot and the pilot vessel shall in such cases immediately turn to ship-to-ship frequency. At such connections minimum transmission effect shall be used.
3. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours' notice.
4. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order, state the name and destination of the vessel and whether 1 or 2 Pilots are desired.
5. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.
6. The international provisions for summoning Pilots by signal flags or blue lights, etc. are still in force, but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.
7. These provisions come into force on 1st January, 1971.

Vessels in Port: Luossavaara-Kiirunavaara AB will notify the Sea Pilot in due time before completion of loading. LKAB will also arrange for Harbour Pilot to assist during docking or when otherwise required by vessel's Master.

ANCHORAGES: Anchoring must take place in the recommended areas as advised by the Pilot, i.e. inside the harbour basin or to the S.W. and West of "Framnesodden".

Warning: The bottom usually gives good anchorage but vessels are requested to keep continuous watch while at anchor. Frequent anchor bearings must be taken during adverse weather conditions.

Vessels at anchor inside the harbour basin are especially exposed to gusting winds from S.E. (locally named "Beisfjord-winds").

HEALTH: The Master of a ship arriving from a foreign port, must hand to the Customs Officers a Maritime Declaration of Health form signed by the Master. If there is a ship's Surgeon on board, the declaration to be countersigned by this person.

A valid Derat Certificate to be presented to the Customs on request.

RADIO: *ETA Notices:*

1. Please cable ETA to Malmexport Stockholm 6 days prior to arrival at loading port and to MALMEXPORT NARVIK as follows:

Sailing from last port and 48 hours and 24 hours before arrival.

If any change in ETA of more than 1 hour occurs after transmission of the 24 hour ETA, the vessel must send a corrected ETA.

2. Following should be included in the 48 hours ETA notice:
   a. Tonnage of cargo required and quantity in each hold.
   b. Cash advance requirement.
   c. Order for repairs, bunkers, stores, charts, etc.
   d. In case of repatriation, please state name of crew member(s) to be repatriated, destination and date of departure preferred.
3. Docking instructions – prospects.

Request for docking instructions, loading time, etc. should preferably be included in the 48 hours ETA.

Docking instructions will also be advised by Pilot on arrival Tranoy Pilot Station.

4. Estimated time for ballast pumping after arrival should be advised with the 24 hours ETA.

Other Vessels: Cable Agents giving ETA, draft and cash required. Radio station: Rogaland Radio/LGB but other stations can be used.

VHF: Contact with LKAB can be obtained by VHF (Channel 14) on a 24 hour basis. Vessels at anchor are requested to keep continuous VHF watch. It is also advisable for vessels alongside to have the VHF switched on. Messages to the Agent should be given by VHF.

Local and long distance calls can be ordered via Bodo Radio on VHF Channel 28.

Other Vessels: Local and long-distance calls may be ordered through Harstad Radio on Channel 16.

Port frequency is Channel 14, on which vessels may communicate with the port ferry launch and Agent (ore-loading vessels).

TUGS: Tug service is compulsory at LKAB's Ore Berths.

Luossavaara-Kiirunavaara AB reserve the right to order the number of tugs (maximum 3) which they consider necessary to ensure safe mooring and unmooring of a vessel.

Vessels above approximately 70,000 d.w.t. will normally be assisted by 3 tugs.

Main particulars of tugs available: M/V "Svarta Bjorn", g.r.t. 277, b.h.p. 1,640, bollard pull 23 tons, 11 knots. Fluid couplings and single reduction gearing. Reverse gear to screwshaft.

M/V "Rallaren", g.r.t. 435, b.h.p. 3,800, bollard pull 43 tons, 12.4 knots. Two Voith-Schneider directional propellers.

M/V "Rombak" g.r.t. 440, b.h.p. 4,000, bollard pull 47 tons, 12.5 knots. Two Voith-Schneider directional propellers.

Tugowners: A/S Bukserbater, Narvik.

Towing lines will be provided from the tugs.

Normal communication between tugs and Pilot is by VHF. Operating Channel 6 (156.3 mHz.).

Bilge Pumps: The tugs M/V "Rallaren" and M/V "Rombak" are equipped with 2 transportable bilge pumps. Average pumping capacity of each pump: 2,000 litres per minute.

Fire Fighting: Tugs M/V "Rallaren" and M/V "Rombak" are equipped with foam/water guns for fire fighting.

Other Vessels: Must be employed for tankers, 3 tugs available, capable of assisting vessels up to 250,000 d.w.t.

LOADING:

Docking Data for Ore Berths: (Measurements in metres, unless otherwise stated).

	Berth No. 3	*Berth No. 4*	*Berth No. 5*
Building completed (year)	1950 (Caisson in 1967)		1977
Type	Concrete Pier		Concrete Caisson Berth
Length	214.00	214.00	208.00
Breadth	13.50	13.50	Min. 8.25, Max. 18.00
Depth alongside at LWOST	*13.50	13.00	27.50
Height under shiploader (Airdraft) on HWOST	13.00	11.00	26.00
Max. outreach of shiploader from fender line	15.00	11.00	43.00 When perpendicular to wharf
Number of shiploaders	2	2	1
Suitable ship's size in d.w.t. (approx.)	40-75,000	5-45,000	70-250,000
Max. ship's size in d.w.t. depending on type and construction	90-100,000	45-50,000	over 300,000
Limitation of ship's length from bow (bulb) to aftermost loadpoint	200.00	175.00	No limitation
Max. length between ship's foremost and aftermost loadpoint loadable without warping	152.00	152.00	220.00

*Note: Maximum guaranteed draft at Berth No. 3 is 13 m. on LWOST (minimum 0.5 m. under-keel clearance required).

Loading to draft exceeding 13 m. may take place during favourable tide and weather conditions.

Apatite	1.50	0.667	0.043	23.5

Weighing: The ore is weighed continuously during loading by electronic belt scales.

Margin of error maximum ±0.25%.

All weights as well as quantities issued in the Bills of Lading are expressed in metric tonnes (1,000 kg.).

Load Line Zones:

Winter: 1st November – 31st March.

Summer: 1st April – 31st October.

BERTHING:

General Description: The Ore Berths, hereinafter described as Berth Nos. 3, 4 and 5, allow 3 ships to be berthed simultaneously.

The ore is transported from the stockyards to the shiploaders on conveyor belts. Both stockpiling and loading is automatically directed from a central control station. On the way to the pier belts, the ore is transferred via sampling stations which also include computer controlled screen analysis for pellets.

After having passed the sampling station, the ore is weighed by electronic belt scales with a very high degree of accuracy.

Mooring: Ships usually berth:

Starboard side to Berth No. 3.

Port side to Berth No. 4.

Starboard side to Berth No. 5.

It is the responsibility of the Ship's Master to provide for and make sure that his ship has sufficient mooring ropes and wires ashore at all times, and that the moorings are properly and evenly tightened.

Ships berthing at Berth No. 5 should preferably use floating mooring ropes (nylon, polypropylene or similar) for head- and sternlines.

Berth Nos. 3 and 4: Consists of a slender reinforced concrete pier, supported by 13 heavy concrete pillars resting on steel piles which are rammed through clay and silt to solid rock some 30 m. – 35 m. below the pier deck, above which the superstructure, carrying the conveyor belts, rises about another 15 m.

The outer end of the concrete pier deck is based on a caisson, placed on a reinforced concrete foundation slab, resting on steel piles driven to rock base.

The caisson as well as the pier itself is equipped with heavy rubber fenders of Seibu type and with heavy rubber tyre fenders.

Shiploaders: There are 2 travelling boom loaders on each side of the pier with a working area of approximately 150 m.

If 2 ships are loaded simultaneously, only 1 shiploader can be used on each side.

Designed capacity of each shiploader is 4,500 tonnes/p.h., but the average capacity should be calculated between 3,000 tonnes/p.h. and 2,000 tonnes/p.h. depending on the kind of ore being loaded.

Berth No. 4 – Olivine discharge: A construction consisting of 2 discharging bins connected to a conveyor belt system allowing self-discharging vessels to discharge bulk cargoes at a max. rate of about 700 t.p.h. is mounted on Berth No. 4. The unloading facilities are intended for olivine which is being used in the pellet production (KPBO), but the discharging system can also be used for other bulk cargoes.

Berth No. 5: Is a concrete caisson berth, parallel to the shoreline.

The basement of the berth consists of 5 cylindric caissons resting on foundations connected to solid rock.

The face of the berth is fitted with heavy Seibu fenders, dimensioned to obtain pressure of a 40% ballasted ship of about 350,000 d.w.t., approaching at a speed of 0.15 m. per second.

The Shiploader: Is of a linear slewing type, turnable around a fixed point in the rear. The loader travels on rails along the berth in a length of 140 m. The shiploader boom can be elevated to any suitable height over a vessel's hatch coamings. Maximum horizontal loading range is 220 m.

Designed capacity is maximum 11,000 tonnes/p.h. for lumpy ore and fines, and approximately 7,500 tonnes of pellets per hour.

Apatite Berth: The berth is located between Berth No. 5 (East side) and shore. Minimum depth 12 m. Vessels up to approx. 10,000 d.w.t. can load Apatite in bulk at this berth. One shiploader with designed capacity 800 metric t.p.h. The cargo is stored in a silo of 7,035 cu.m., containing about 11,000 tonnes apatite.

Loading takes place via a closed and dust free system through special openings in vessel's hatchcovers.

Fagerneskaien: There is a deepwater quay, "Fagerneskaien", located to the South of the harbour.

Length of quay 280 m.
Depth alongside on LW 15 m.

The quay has easy access from the shore side and suitable for ships taking onboard heavy goods and provisions as well as for ships carrying out repairs.

There is a workshop with structural, plate and welding factory situated at the quay.

The quay is directly connected to the main railway.

Fresh water is available with connections conveniently located.

STEVEDORES: Ordered by Agent. Not necessary to contact stevedores.

Working Hours: Ordinary working hours 24 running hours, except Saturday 2200 hrs. to Sunday 0600 hrs.

CRANES: Fixed crane, SWL 5 tons, is available at Fagerneskaien (deep-sea wharf), and mobile cranes can be hired from local companies.

DENSITY: 1022.

FRESH WATER: Can be supplied from all berths. Connections are conveniently located with hoses available on the dock.

Fresh water can also be delivered by tugs. An extra fee will then be charged.

Capacity per delivery: M.V. "Rallaren" 93 cu.m.
M.V. "Rombak" 112 cu.m.

FUEL: Bunkers are available on an emergency basis only. Orders for fuel and diesel should preferably be given in due time directly to the supplier. Fuel oil can only be supplied from coastal-tankers.

Diesel oil can be delivered by the tug M.V. "Rombak" at the daily market rate and from the supplier used by the tugboat company.

Capacity per delivery about 100 cu.m.

An extra fee will be charged for the tug per delivery.

It is also possible to supply diesel oil by tank wagons. Capacity per delivery about 10 cu.m. – 12 cu.m.

Lubricants: Can be procured, but due notice must be given as all types are not kept in stock.

CONSULS: See "Telephone Numbers".

REPAIRS: Minor repairs can be effected by local repair firms.

SURVEYORS: Lloyd's representative and surveyor are available at the port.

DRY DOCKS: None.

GANGWAY/DECK WATCHMAN: Not available.

OPENING/CLOSING HATCHES: May be handled by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 gm. tobacco and 1 litre spirits and 1 litre wine (or 2 litres wine only). Any excess of this quantity to be declared on Custom's List.

AIRPORT: Narvik Airport, 5 minutes by taxi from the port. Local commuter service with connection to the nearest major airports.

Evenes Airport, 1.5 hours by bus from Narvik. Regular service to Oslo (Fornebu Airport) and other major Norwegian airports.

REPATRIATION: Facilities exist for crew change and necessary repatriation.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; May 1st; May 17th; Easter; Christmas Day; December 26th. Also see "Customs of the Port".

POLICE/AMBULANCE/FIRE: Police 41060; Hospital 44044; immediate help 4300 (only at night time); Ambulance 43600; Fire 41122.

TELEPHONES: Vessels at berth may hire a telephone. A telephone watch should then be kept on board.

LAUNCHES: The Agent will supply a time table and tickets on arrival If a launch is required, the "B" flag or red light should be displayed from the signal mast.

SERVICES: Compass adjusting can be arranged when necessary.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes to be used when passing the LKAB gate will be supplied by ship's Agent.

CUSTOMS OF THE PORT:

1. The ships will generally be loaded in regular turn, providing they present with starting hatches opened and holds properly cleaned and do not have ballast pumping which will exceed expected loading time.

2. For establishing turn of vessels a ship will be considered "Arrived" at the time of passing a line between the S.W. point of "Framnesodden" and "Batberget", or if anchored outside the Harbour limit, at the time of anchoring.

3. The time of arrival stated in the Notice of Readiness shall be the time when a ship has moored alongside loading berth, (finished with engines) or when loading berth is not available, at the time of anchoring

4. Notice of Readiness shall be given by the Master on arrival whethe in berth or not any time SHINC with the exception of certain holidays.

5. Loading plans, duly dated and signed, stating quantity in each hatch and rotation of loading, must be presented to the Agent on arriva and to the loading foreman as soon as the ship has moored.

6. All weights shown on the Bill of Lading will be the same as recorded on the weighing facilities of Luossavaara – Kiirunavaara AB. The weights will be given in tonnes of 1,000 kilogrammes (metric tonnes).

7. Pilots and tugs will be ordered in due time before loading is finished The ship must leave the pier upon completion of loading when the cargo documents have been received. If any delays occur in preparing the cargo documents, or on occasion of missing crew members, or in case of any dispute or otherwise, the ship must leave the pier immediately when so ordered by the shippers, and matters will be settled while the ship is waiting in the roads.

8. Ore – Oil and OBO vessels will not be accepted for loading unless gas-free certificate has been obtained.

9. *Working Hours:*

Ordinary working hours 24 running hours.

Loading does not take place on the following holidays:

December 24th	1300 hrs.	–	December 26th	2200 hrs.
December 31st	1300 hrs.	–	January 1st	2200 hrs.
Maundy Thursday	1400 hrs.	–	Easter Monday	2200 hrs.
Whitsun Eve	1400 hrs.	–	Whit Monday	2200 hrs.
April 30th	2200 hrs.	–	May 1st	2200 hrs.
May 16th	2200 hrs.	–	May 17th	2200 hrs.

Note: The above stipulated working hours are subject to alteration without notice.

GENERAL:

Tide: Range of tide: Maximum approximately 4.50 m.
Minimum approximately 0.50 m.
Average 1.75 m.

Currents: The existing currents are mainly caused by tide water. The average speed of the current varies from 1 knot – 3 knots.

During May – June there is a constant Northwesterly flood-curren setting out from "Beisfjorden" (a narrow fjord to the South of the harbour).

This current reaches an estimated speed of 4 knots – 5 knots when it coincides with the fall of the tide.

The direction of the current in the harbour basin is exposed to seasona and local variations owing to snow-melting and changes in wate temperature.

It is important that the Ship's Masters are aware of the fact that the existence of variable currents in the harbour may affect the manoeuverability and bring vessels at anchorage in the bay to turn in dissimilar directions.

Winds: The local fall winds from Southeast occur suddenly and unexpectedly but are most frequent and strongest during the Winte season, when winds force 30 sec./m. have been measured.

Harbour Charts: Norwegian Chart No. 461 and British Admiralty Char No. 3753.

Garbage: Trucks will remove garbage from vessels at berth on request Garbage can also be removed by lighter if necessary from ships a anchor.

Launch Service: A regular launch service is operated and administrated by the Harbour Authorities.

Port Passenger Ferry Service: Until further notice is given, the Narvik Port Authority's passenger ferry service to/from all vessels anchored on the inner/outer roads is scheduled as follows:

INNER ROADS

Weekdays: Departure Ferryquay: 0715 – 0800 – 0900 – 1000 – 1200 – 1300 – 1400 – 1600 – 1800 – 2000 – 2200 – 2400.

Saturdays, Sundays and Holidays: Departure Ferryquay: 0800 – 1000 – 1200 – 1400 – 1600 – 1800 – 2000 – 2200 – 2400.

OUTER ROADS (outside Framnesodden)

Every day: Departure Ferryquay: 0800 – 1000 – 1200 – 1400 – 1600 – 1800 – 2000 – 2200 – 2400.

The ferryboat will call at your vessel *only* if passengers are to be pu on board, *or* if the ship by means of proper signals indicates that ferr service is required.

The proper "ferryboat requested" signals are:

In daylight: A red flag hoisted at the yardarm.
In darkness: A well visible red light.

Pilot Ladders/Gangways: For safe embarkation/disembarkation o passengers to/from any vessel anchored on the roads, the following regulations should be observed:

1. Either pilot ladder or gangway to be rigged on the leeward side o the vessel. In rough weather, both a pilot ladder and a gangway must be arranged on the leeward side in such a way that the ladder can be reached from the embarking/disembarking platform of the gangwa when lowered to the sea surface.

2. The pilot ladder is – when rigged – to be safely secured on the main deck, and extend to the sea surface. In order to prevent capsizing, every 4th rung of the ladder should be extended.

3. Properly secured on deck, 2 strong holding ropes should be arranged close to the pilot ladder, 1 on each side, and extend to the sea surface.

During darkness, proper lights to be rigged above ladder/gangway, so that embarkation/disembarkation may be carried out in a safe way.

4. The vessel's watchman should stand by the ladder/gangway during embarkation/disembarkation, in order to assist the passengers when necessary.

General: During unfavourable weather conditions, when the sea is rough, the captain of the ferryboat may have to cancel one or more scheduled calls at your vessel, until conditions have improved.

You may communicate with the ferryboat on VHF Channel 14.

With reference to the above regarding Ferryboat service, we regret that the last ferry from shore leaves at 2400 hrs.

Transport to the ship in the Roads between 2400 hrs. and 0715 hrs., respectively 0800 hrs. on Saturdays, Sundays and Holidays, can only be arranged in case of absolute emergency.

Officers and crew members on ordinary shore leave who miss the last ferry at 2400 hrs., will have to wait until the first ferry the following morning.

Provisions and Stores Available: Advance notice preferred.

Ship's Laundry: Can be taken care of.

Agency: Luossavaara-Kiirunavaara AB (LKAB) will handle the Agency and perform all normal service functions at this port. Tel: 082-41020. Cable address: "Malmexport Narvik". Telex: 64022. Answerback code: lkabn N. VHF (24 hour basis) calling Channel 14, Working Channels 12 and 14. Call sign: LKAB.

Advance funds sufficient to cover estimated compulsory port expenses and additional outlays, such as cash to Master, must be remitted prior to vessel's arrival.

Bank remittances should be sent to LKAB's account No. 6370.05.01045 with Christiania Bank og Kreditkasse Narvik. Cable address: "Kreditkassen Narvik". Telex: 64081. Answerback code: Cbknk n.

AUTHORITY: Narvik Havnevesen, P.O.Box 627, 8501 Narvik, Norway. *Tel:* 082-22370. *FAX:* 082-42981. *Contact:* G. Berntsen, Port Manager. K. Heggelund, Deputy Port Manager.

PILOTAGE: Compulsory. Pilot boards at Faerder Lighthouse, 50 miles from docks. Give 24 hours notice "Faerder Pilot". Pilot station on VHF Channel 13.

ANCHORAGE: Good sheltered anchorage in Western and Eastern Harbour Basins, depths up to 20 m.

RESTRICTIONS: Vessels may enter at any time. No tide or current.

MAX. SIZE: Vessels up to 34 ft. draft may berth at Filipstad Quay and Sjursoya Quay.

Tankers: Up to 36 ft. draft at Oslo, or 38 ft. draft at Fagerstrand.

HEALTH: International procedure followed to obtain Pratique. In case of suspected disease or fever on board, inform the Harbour Master's Office in advance. When arriving from a Norwegian port, Pratique is automatic.

RADIO: Communicate through Tjome Radio, call sign LGO. Harbour Master's Office equipped with VHF Channels 16 and 12.

TUGS: Sufficient tugs available for all requirements.

BERTHING: Instructions given from Harbour Master. Masters of ships are requested to send their ETA to the Harbour Master's Office through Oslo Havne Radio, VHF Channel 12, one hour prior to arrival.

Filipstad Quay: Up to 11 m. depth alongside.
Sjursoya Quays: Up to 12 m. depth alongside.
Vippetangen: Up to 8 m. depth alongside.
Pipervika: Up to 11 m. depth at Akershus Pier.
Bjorvika: Up to 7 m. depth at Lang Quay.
Bispevika: Up to 10 m. depth at Sorenga Pier.
Gronlia: Up to 9 m. depth alongside.
Kongshavn Quays: Up to 8 m. depth alongside.
Bekkelaget: Up to 13 m. depth alongside.
Ormsund: Up to 9.0 m. depth alongside.

BULK CARGO FACILITIES: Container traffic handled at Filipstad, Ormsund and Sjursoya North.

Sorenga Pier equipped for palletised cargo handling, containers and Ro/Ro.

15 berths for Ro/Ro traffic. 2 Container cranes for 20 ft., 30 ft. and 40 ft. units, up to 35 tons (net) and container handling equipment, quay cranes and mobile cranes and floating Ro/Ro ramp.

Sjursoya North: Cement, phosphate, grains, molasses and containers.
Sjursoya South: Gasoline and oil and propane gas.
Bekkelaget North: Molasses, general cargo and oil.
Sorenga: General cargo and containers.
Kongshavn: Building material.
Ormsund: Containers.

STEVEDORES: Arranged by Agents. Working hours 0700-1600 hrs., Saturdays overtime is voluntary.

TANKERS: Also see "Slagen".

Oslo: Oil pier at Sjursoya, depth alongside 15 m. or more. A tug required to stand by during discharge.

Fagerstrand: Terminal operated by Norske Braendselolje A/S situated in Oslo fjord, 12 miles S. of Oslo. 1 berth for tankers up to 30 ft. draft.

1 berth for tankers up to 38 ft. draft.

MEDICAL: All facilities available. Masters to advise by radio prior to arrival if medical attendance required on board.

DENSITY: Salt water, 1025.

FRESH WATER Available by pipeline from all quays.

FUEL: All grades available, ex-wharf at many quays. Can be delivered by barge.

FIRE PRECAUTIONS: 2 boats fully equipped with fire-fighting equipment.

IDENTIFICATION CARDS: Not required.

2 Tobacco/spirit Lists.

PILOTAGE: Pilot ordered by Faerder Losstasjon or Herfol Losstasjon via Tjome Radio. Harbour Office can be contacted by VHF.

Pilotage compulsory for all vessels of 100 g.r.t. and over.

ANCHORAGE: Between Struten Light and Stromtangen Light.
MAX. SIZE: 24 ft. draft.
HEALTH: No particular action necessary, but Agent to be informed.
RADIO: Tjome Radio.
VHF: Harbour Master's Office, Channels 16 and 12. Day and night service.
TUGS: Small harbour tug available.
BERTHING: A Roll-on/Roll-off berth has been built to handle vessels of up to 6,000 tons gross. Depth alongside 24 ft. Vessels will moor alongside the old Alvim Pier enabling them to work through the side doors and stern doors.
STEVEDORES: Ordered through Agent.
MEDICAL: If medical attention necessary Agent must be informed in advance.
FRESH WATER: Only at Alvim Kai, average 15 t.p.h.
FUEL: Fuel obtained only with tank cars.
CONSULS: Denmark, Finland, Iceland, Sweden and Greece have vice-consulates.
REPAIRS: Deck and engine repairs possible.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: No gangways from shore. Watchman can be obtained.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: 100 gm. tobacco or 200 cigarettes per crew member. Wine 1 litre per member or 1 bottle of spirit.
REPATRIATION: No facilities.
AIRPORT: Fornebu Airport 110 km. from Sarpsborg. Served by regular airlines.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 1st May; 17th May; 25th/26th December. No work on these days.
POLICE/AMBULANCE/FIRE: Police 52000; Ambulance 52040; Fire 51234.
TELEPHONES: No arrangements exist for placing telephones on board.
SHORE LEAVE: No restriction.
IDENTIFICATION CARDS: Have to be used for Melloes Quay only.
AUTHORITY: Sarpsborg Havnevesen, Strandgaten 2, P.O.Box 2034, 1700 Sarpsborg, Norway. *Tel:* 09-152311. *Contact:* Sven-Jan Johansen, Port Captain.

SAUDA: 59.40 N. 06.22 E. (See Plan)

DOCUMENTS:
Health Certificate.
Crew List.
Derat Certificate.
Ship's Register.

PILOTAGE: Skudefjorden Pilot Station, Tel: 047-58337 (or pilot boat "Skudefjord" on VHF). Kvitsoy, position Lat. 59° 05′ N., Long. 05° 20′ E.
ANCHORAGES: Safe anchorages everywhere in Sauda Harbour area.
RESTRICTIONS: No restrictions on night entry – but Sea Pilots usually refuse to take in vessels over 10,000 d.w.t. between 1800 hrs. and 0600 hrs. during Winter time, October-March.
MAX. SIZE: *Sauda Smelteverk A/S* (Private Quays): Draft 30 ft. – but vessels over 30 ft. are allowed to get alongside at owner's own risk. Length no restriction. Breadth, 75 ft.
Official Quays: Length of quays – 230 ft. and 200 ft. Max. draft 13 ft.
RADIO: Cable Agents giving ETA, draft and cash requirement via Rogaland Radio.
VHF: VHF installed in Agents office, Channels 16 and 9.
TUGS: Not necessary.
BERTHING: May take place at any time provided quay available.

(1) Import Quay: 250 m. long. 2 unloading towers with a capacity of about 3,500 tons ore per day.

(2) Export Quay: 115 m. long. 2 loading cranes with a capacity of about 1,600 tons ferro alloys per day. One loading machine with capacity 400 t.p.h.

STEVEDORES: Ordered by Agents. Normal working hours 0700 – 2300. Saturdays and Sundays – No work.
MEDICAL: Masters to advise by radio prior arrival if medical attendance required aboard. Modern hospital.
DENSITY: Brackish in port area, average salinity 2.39%.
FRESH WATER: Good fresh water available, delivery irrespective of quantity.
FUEL: No fuel available at Sauda, must be ordered from Stavanger.
CONSULS: No consulates at Sauda. Nearest in Stavanger.
REPAIRS: Minor repairs possible.
DRY DOCKS: No dry dock at Sauda. Nearest in Stavanger and Haugesund.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CERTIFICATES: Registered Tonnage Certificate required.
CUSTOMS ALLOWANCES: Master: 400 cigarettes or 400 gm. tobacco, 2 litres spirits/wine.

Crew: 200 cigarettes or 250 gm. tobacco, 1 litre spirits and 1 litre wine.

CARGO GEAR: No additional requirement.
REPATRIATION: Repatriation may take place.
AIRPORT: Stavanger and Haugesund.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (May 1st); National Day (May 17th); Ascension Day; Whit Monday; Christmas Day; Second Christmas Day (December 26th) (no work on these days).
POLICE/AMBULANCE/FIRE: Police 04-783266; Ambulance 04-782811 or 04-782511; Fire 04-783222
TELEPHONE: Not available to vessels.
IDENTIFICATION CARDS: Not necessary. Crew List at gate.
REGULATIONS: Strictly prohibited to throw wastes or garbage into sea within port area, fjords and on Norwegian coast.
DELAYS: All vessels loaded/unloaded in turn, very seldom any congestion in port.
AUTHORITY: Sauda Havnevesen, Raadhusgaten, N-4201 Sauda, Norway. *Tel:* 04-782585. *Contact:* John Henning Hansen, Harbour Master.

SKIEN (including Menstad and Vollsfjorden): 59.12 N. 09.38 E.

DOCUMENTS:
Clearance documents, forms obtainable from Customs Officers on arrival.
Derat Certificate.
Bill of Lading.
Manifests.
2 Crew Lists.
Ship's Register.

PILOTAGE: Ship's Agent gives ETA pilot station 24 hours before arriva and direct to Pilots 2 hours before arrival. Telegraphic address: Pilot station, Langesund. VHF Channel 16 to be used when contacting Pilots. Pilot boards at Steingrunnen light buoy, Langesund Bay, (58° 55′ N. 09° 44′ E.). Flag, sound and morse signal "G". Pilotage compulsory for all foreign vessels but dispensation can be obtained for smalle Scandinavian vessels.
MAX. SIZE: Between Porsgrunn and Skien, Norsk Hydro have loading place, Menstad, for vessels up to 425 ft. length and max. draft 18.5 ft. Between Menstad and Skien Grain Silo for vessels with max. length 425 ft. and max. draft 18 ft. 06 in. At Skien vessel's length must no exceed 280 ft., breadth 46 ft. and max. draft 17 ft.

Dispensation can be obtained for vessels with a breadth of less than 46 ft.

RESTRICTIONS: No restrictions on night entry for vessels of above mentioned sizes.
BRIDGES: On passage from sea, vessels pass Porsgrunn where there is a lifting bridge with breadth 30 m. Signals for passing bridge inward 1 long and 2 short sound signals. Outward signals, 1 long and 1 shor sound. There is also a bridge at Brevik: Max. height 45 m.
RADIO: Tjome Radio/LGT or Farsund Radio/LGZ.
TUGS: Modern tugs available.
BERTHING: Also see "Max. Size".

Vollsforden:
Bridges: From sea vessels pass Brevik Bridge, max. height 45 m.
Overhead Cable: At Kjeoya there is an overhead cable which permits an airdraft of max. 37 m. Dispensation for airdraft up to 40 m. can be obtained for daytime entry.
Tugs: A number of modern tugs are available.
Berthing: 2 quays. No. 1: Length 135 m., depth from 8.5 m. to 11 m. No. 2: Length of quay 165 m. but open to sea with mooring pillar at 250 m. from Ro/Ro ramp. This quay has Ro/Ro facilities with ramp of 30 m breadth, and depth of 11 m. for full length.
Cranes and Ro/Ro Materials: 2 stationary cranes of 6 tons capacity, any size of mobile crane and floating cranes up to 250 tons available. Container truck of 30 tons and 22 tons lift/capacity, 2 Tugmasters of 2 tons towing power, Forklifts from 3 – 6 tons, Warehouse 9,200 sq.m Unlimited open space.
Density: Practically fresh water.

MEDICAL: All medical assistance to be arranged via Agents.
STEVEDORES: Ordered by Agents.
DENSITY: At Menstad and Skien practically fresh water.
FRESH WATER: Obtainable.
CONSULS: Belgium, Netherlands, Sweden, Germany, Finland.
REPAIRS: All repairs possible. Dry dock: Lifting capacity: 2,000 tons. Radar/radio services can be arranged through Agents.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCES: 400 cigarettes and 4 bottles spirit for th Master. 200 cigarettes and half a bottle spirit for each crew member.
REPATRIATION: Facilities exist for effecting crew changes an repatriation.
AIRPORT: International at Oslo and Skien airport.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easte Eve (half day); Easter Monday; Labour Day (1st May); Ascension Day National Holiday (17th May); Whit Monday; Christmas Eve (half day Christmas Day; (26th December), New Year's Eve (half day).
AUTHORITY: Skien Havnevesen, Postboks 2634, 3701 Skien, Norwa *Tel:* 03-593184, 03-593160. *Mobile telephone:* (094) 50439. *FAX:* 03 593250. *Contact:* T. Holtan, Harbour Master.

SLAGEN: 59.20 N. 10.31 E. (See Plan)

LOCATION: Esso Norge a.s., Slagen Refinery is located on the West coast of the Oslo Fjord near Tonsberg, about 20 miles from the Ferder Lighthouse. The Marine Terminal, a finger pier, is located at Slagentangen, near the refinery.

DOCUMENTS:

Ship's Register (Certificate)	(For Customs examination)
Derat Certificate	(For Customs examination)
Health Declaration	(For Customs examination)
Cargo Manifest	(For Consignee)
Provision List, original and 3 copies	(For Customs information)
3 Copies Crew List	(For Customs and terminal information)
Personal Effects List, original and 1 copy	(For Customs information)

NOTE: Crew List to show date and place of birth for each crew member.

PILOTAGE: Pilotage is compulsory for all foreign flag ships. The pilot service is provided by the Norwegian Government. Request for Pilot minimum 24 hours in advance through Agent or direct to Hvasser Pilot Station. Tel: 033-93178 or Telex: 70304. The pilot boats lay in a harbour on Hvasser Island from where a radar and VHF watch is kept. The pilot station listens out on Maritime Channel 16 and 13 and when your ship is about 2 hours from Ferder Island (Store Faerder) contact should be made. You will be given instructions as to where and how the Pilot will board. The Pilot boards East of Ferder Island from a 20 m. long white boat marked "LOS" and capable of doing 18 knots. In bad weather, ships of less than 10,000 d.w.t. may have to proceed in as far as Fulehuk before a Pilot can board.

Choice Pilots are employed for berthing vessels of 20,000 d.w.t. or above and/or when tug assistance is required.

APPROACHES: The approaches to the Oslo Fjord via the Skagerrak are free of any particular navigational dangers and there is deep water close to the Norwegian coast.

Tankers of 40,000 d.w.t. or larger are requested to keep a minimum distance of 15 nautical miles off the Norwegian coast until entrance to the Oslo Fjord, where traffic separation scheme is in force inside territorial waters.

There are no particular navigational difficulties in the Oslo Fjord, all depths of less than 35 m. (115 ft.) can be easily avoided. Laden crude and black-oil vessels above 20,000 d.w.t. bound for or leaving Slagen, will be escorted by a tug while navigating in the Oslofjord, due to safety and environment risks.

Navigation Aids: Esso Norge a.s. has provided two leading light/marks, one on the jetty itself and one on shore at Stubrekk. These lights when in line bear 309°(T) and mark a deep approach (least depth 25 m., 82 ft.) between Lysboye and the Slagen Terminal Jetty.

ANCHORAGE: North of pier head. Particulars regarding anchorage will be given by Pilot.

MAX. SIZE: Tankers up to 350 m. length and 66 ft. draft can be berthed. Berth No.1 designed for vessels 250,000 d.w.t. Depth of water alongside 69 ft.

HEALTH: Clearance is effected on arrival. International procedure followed to obtain Pratique. In case suspected disease or fever on board inform port authorities in advance.

RADIO: 72 hours prior to arrival at pilot station, radio Agent ETA, cash, bunkers, dirty ballast, personnel, bonded stores, or other special requirements. ETA should be repeated 48, 24 and 12 hours prior arrival pilot station. All radio messages should be transmitted via Rogaland Radio, and when within closer range via Tjome Radio. When Pilot has embarked, contact should be established with Slagen Harbour Office via VHF Channel 16 or 14 for exchange of information prior to berthing, such as berth availability, current, wind, draft, ballast to be discharged, etc.

TUGS: A total of 8 tugs ranging from 1,100 to 5,200 b.p.h. can be made available to shipping at Slagen. However, none of the tugs are normally stationed at the terminal, except when a vessel of 20,000 d.w.t. or larger is discharging or loading. On such occasions one or two tugs will be kept on stand by at the terminal. If additional tugs are required they must be ordered from Horten or Oslo.

The number of tugs required for berthing are ordered by the Agent in accordance with the berthing Pilot's advice. All tugs are diesel powered, single screw, single rudder and suitable for towing on the hook or alongside. When on the hook, ship's towlines are used.

The tugs are normally made fast en route between the Slagentangen light buoy and the terminal.

Communications: All communications between Pilot, tugs and terminal should be on VHF Channel 14. Should there be any breakdown, ship's whistle will be used. It is very important that communications within the ship between bridge, forecastle head and poop be good, particularly on the larger ships.

BERTHING: The main effect on ship handling in the berth approaches comes from the current, which for most of the time sets S.E. across the jetty which is aligned North-South. Ships berthing on the West side of the jetty (Berth Nos. 2 and 3) will tend to set down onto the berth. The marine terminal has a current speed and direction meter and advises the Pilot.

A submersible oil boom enclosing the pier is anchored on the sea bed, and the boom and its system of anchorage will be damaged if vessel's anchors are dropped in the shaded area on "Plan". *Except in emergency situations anchors should not be used within the shaded area.* Manoeuvres to and from the berths should be discussed with the Harbour Office which will give you information on currents.

Ice affects navigation at the terminal about every 6 years, and Pilots use special manoeuvres to deal with ice situations.

The Terminal: The terminal consists of a finger pier. On the East side (Berth No. 1) the water depth is 21 m. (69 ft.) and vessels with max. length 350 m. (1,148 ft.) and max. draft 20.1 m. (66 ft.) can be accommodated. On the West side (Berth Nos. 2 and 3) there is a water depth of 11.5 m. (37 ft. 9 in.). The West side is mainly used for coasters and barges, but vessels up to a max. length of 192 m. (630 ft.) with max. draft 10.3 m. (34 ft.) can also be accommodated on this side of the pier.

Fendering: On Berth No. 1, the breasting face is protected with timber-faced gravity fenders and timber-faced panels backed by laminated rubber units. Berth Nos. 2 and 3 are fendered with timber-faced panels backed by rubber tubing.

Limitation on Berthing Speeds/Angles: On Berth No. 1, the *maximum* speed of approach ranges from 8.15 m. (26.5 ft.) per minute for a fully loaded 100,000 d.w.t. tanker to 5.19 m. (17 ft.) per minute for a fully loaded 250,000 d.w.t. tanker. (See "Plan"). For the larger tankers, the target should be 1 m. (3 ft.) per minute. The speed of approach is monitored by Doppler Radar and the Pilot is kept frequently informed of the speed. The angle of approach should be as small as possible, a parallel landing being the target.

Berthing: Tankers for Berth No. 1 are usually berthed port side to, by paying off the bow to starboard and having tugs push the ship bodily, against the prevailing current, on to the berth. Headlines are usually run out first to the Northern-most dolphin.

The larger ships berthing on Berths No. 2 and 3 usually go port side to berth with tugs on the hook holding the ship off against the current. The approach to Berth Nos. 2 and 3 is normally facilitated by the fendered sliding front.

Moorings: Moorings are taken ashore by mooring boats and lifted onto dolphin/jetty by power capstans.

Shore Moorings Used: On Berth No. 1 a 48 mm. (1.875 in.) diameter shore-based mooring wire is placed on board large tankers as an extra aft back spring. The wire has an eye which is put over the bitts after being taken on board by rope messenger. No shore moorings are used on Berths No. 2 and 3.

Gangway: At Berth No. 1, near the Southern end of the breasting island, there is a telescopic hydraulic operated gangway reaching a deck height of about 22 m. above sea level. Also a portable gangway is available to accommodate handy size vessels. Whenever the latter one or when the vessel's own gangway is used, the vessel shall provide a safety net under the gangway, and a lifebuoy with not less than 15 fathoms of line attached should be positioned near the gangway for use in an emergency.

Cautionary Advice, Mooring Supervision: Breast moorings at the jetty have a scope of only 25 m. (82 ft.). The offsetting current at Berth No. 1 makes the tending of moorings during the discharge of a tanker with large light freeboard a very important operation and should only be done under the supervision of a ship's officer.

The area dredged to 21 m. is limited, and a VLCC needs to take care that it does not get too far to the South. When in position, there is 25 m. (82 ft.) clearance between the stern and the edge of the dredged area. It is for this reason a shore wire backspring is provided.

It is of the utmost importance that large vessels, in particular, are moored adequately and that moorings are carefully tended.

Before hard arms are connected, the ship's moorings and the mooring equipment are checked by the terminal personnel.

Special Regulations: If the wind speed reaches 20 knots or offsetting current reaches 0.6 knots, the discharge of a VLCC is stopped and the arms drained. All tank lids and ullage plugs must be closed and a tug will be ordered to stand by.

If the wind speed reaches 25 knots or offsetting current reaches 0.7 knots, the arms will be disconnected and the ship ordered to stand by for possible departure.

Weather forecasts in addition to actual current and wind velocity readings are available from the terminal office.

Preparation of Manifold Area: All crude ships should arrive with manifold stripped to the outboard 12 in. flange. All derricks, stays, radio aerials, etc. should be removed from the vicinity of the manifold to be used.

Ullaging, temperatures, water finding, etc.: On arrival ullages, temperatures and water dips should be taken by ship's personnel in co-operation with terminal representative. Vessel equipped with an inert gas system will be requested to depressurise tanks sufficiently to allow for sampling, ullaging, temperature and water dipping on arrival, and for checking of oil and residues left on board after completion of discharge.

Deballasting Facilities: All ballast must be pumped ashore unless from segregated tanks. Maximum quantity receivable, if advanced notice given, is 12,000 cu.m.; any quantity greater than this will cause delays.

Ballast/slops, etc. mixed with any chemicals to be tested by the Refinery before discharge.

Any ballast/slops, etc. not accepted have to be discharged for owner's account. Advance notice to be given.

Restriction on concurrent loading, discharging, ballasting, deballasting.
Max. back pressure at ship's manifold:

No concurrent loading, discharging, ballasting, deballasting is allowed unless the two systems are entirely separate. Should a discharging ship require to reduce her freeboard due to weather or hard arm/hose limitation, she will be required to stop all cargo operations while ballast is taken on. The responsibility for ensuring remaining cargo is not contaminated by water rests with the ship. Maximum back pressure at ship's manifold is 10.55 kg./sq.cm. (150 p.s.i.).

HOSES:

Grades of Cargo, Bunkers Handled, Connections and Lines:

Crude oil and most grades of clean and dirty products and pressurised LPG are handled at the terminal.

Berth No. 1: Crude oil is received/shipped via 4×12 in. fully counterbalanced hard arms with 12 in. ASA flanges. Maximum pressure at ship's rail 12 kg./sq. cm. (170 p.s.i.).

Clean products are handled through 2×10 in., dirty products through 1×10 in. and bunkers through 1×8 in. all fully counterbalanced hard arms. The 8 in. bunker arm can also be used for loading dirty products. LPG is handled through 1×3 in. hose or through 1×4 in. hard arm.

Berth No. 2: Dirty products are handled through 1×10 in. and 1×6 in., clean products through 2×8 in. all half hose half metal arms.

Berth No. 3: (Coaster berth). Dirty products are handled through 1×6 in., clean products through 1×6 in. and 1×4 in. half metal arm. LPG is handled through 3 in. hose connection, or through 1×4 in. hard arm.

All flanges are to ASA Standard.

There is no vapour return.

There are no check (non-return) valves in the import lines; and, therefore, the contents of shore tanks which are situated on high ground will flow back into ship if allowed to do so.

The crude oil discharge rate is up to 10,000 t.p.h.

MEDICAL: Medical attention and hospital facilities available.

DENSITY: 1017 – 1020.

FRESH WATER: Fresh water is available ex-jetty at a rate of 30 cu.m. an hour. Water is supplied by 2 in. hose and is metered. Cost is $1 per ton. Quality is good. Quantity required must be included in arrival cable.

Distilled Water: Distilled water is not normally available and can only be supplied with great difficulty. Maximum notice must be given. It is expensive.

FUEL: All main grades of bunkers, lubricants and hydraulic oils are available. Quantities and specification required must be included in the cable of advice of ETA. Lubricants and hydraulic oil are available in bulk as well as barrels.

FIRE PRECAUTIONS: Special safety regulation forms given when berthed.

CONSULS: Denmark, Finland, France, Netherlands, Spain, Sweden and U.K. have representatives in Tonsberg. German F.R. Consul in Sandefjord. All countries represented in Oslo.

REPAIRS: All kinds of ship repairs can be undertaken by nearby ship yards. Service for radio, gyro, radar, echo sounder, data bridge, etc. available.

No ship may immobilise its engines, steering gear, etc. while alongside the Slagen jetty.

DRY DOCKS: Available at Horten about 5 miles from Slagen, max. size is about 60,000 d.w.t.

SURVEYORS: S.G.S., Caleb Brett, N.V., Lloyd's Register and A.B.S.

GANGWAY/DECK WATCHMEN: Oil Pollution/Safety Inspector placed on board all vessels over 20,000 d.w.t.

CUSTOMS ALLOWANCES: 200 cigarettes or 200 gm. tobacco and 1 litre spirits and 1 litre wine for each man.

REPATRIATION: Changes of crew are available. Transportation by train and plane from Oslo (about 100 km. from Slagen), passenger lines from Oslo. Hotel accommodation available at Tonsberg (10 km. from Slagen).

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May) 17th May; Ascension Day; Whit Sunday and Whit Monday; Christmas 25th and 26th: Discharging/loading all days.

POLICE/AMBULANCE/FIRE: Ambulance/Fire local at the refinery. Police Tonsberg 13355.

TELEPHONES: Ship to shore connections available.

SHORE LEAVE: Shore passes are issued on board on arrival and each crew member must be in possession of a shore pass before he goes ashore.

GENERAL: *Safety:* A safety inspector will attend the vessel upon arrival and complete a Safety Check List.

Oil Pollution, Clean-Up Facilities: A very serious view is taken of oil pollution of Norwegian coastal waters and every effort must be made to prevent it.

Should oil pollution occur, it must be reported and tackled at once.

The terminal has supplies of oil dispersant, spill booms, sawdust and two mechanical removal devices. These will be used to combat any oil pollution and costs will be billed to the ship if the ship is responsible for the pollution.

Garbage and Waste Materials: Container for this purpose is placed on the jetty.

Firefighting Facilities: The terminal is equipped with comprehensive fire fighting facilities including an 800 cu. m./hour fire pump, a supply of foam compound, remote-controlled elevated foam cannons and other fire hydrants, hoses, etc. A tug which stands by the terminal has fire fighting facilities and other fire fighting tugs can be summoned in an emergency.

Shore Steam, Shore Electricity: Normally not available.

Stores: All regular ship's stores, laundry and other similar facilities can be supplied by local ship's chandlers.

Tank Cleaning: Tank cleaning and gas freeing are not allowed alongside.

AUTHORITY: Esso Norge a.s., P.O.Box 388, N-3101 Tonsberg, Norway. *Tel:* 033-77300, 033-77557. *Telex:* 70558 ERAFF N. *Cables:* Essoship. *FAX:* 033-77558. *Contact:* Sigard Erdal, Harbour Master.

AGENCY: Several shipbroker firms are established in Tonsberg and may be called upon as acting Agents for owners and/or charterers. Esso Norge a.s., S & T Dept. act as general Agent for all Exxon owned tonnage, cable address "Essoship" Tonsberg.

SOLA (Tananger): 58.55 N. 05.35 E. (See Plan)

LOCATION: A/S Norske Shell's Sola Refinery is situated at Risavika Bay, on the West coast of Norway just West of Stavanger.

The Refinery, which was started up in 1968, has a capacity of about 3,000,000 tons a year of crude oil.

The Refinery's berthing facilities consist of a "T" head jetty situated in the following position: Lat. 58° 55′ 28″ N., Long. 5° 34′ 45″ E. The area is covered by a special issue of Norwegian Coast Chart No. 475.

There is another jetty in Risavika Bay at Shell's Tananger Depot in position: Lat. 58° 55′ 42″ N., Long. 5° 36′ 10″ E. This jetty is used for loading G.P.'s when Refinery Berth is occupied.

DOCUMENTS: One Crew List. Agent suppiies Customs Forms o arrival.

PILOTAGE: Pilotage to and from Risavika Bay is by law compulsory fo Norwegian registered vessels of 100 g.r.t. and above, arriving from foreign port, and for non-Norwegian registered vessels of 50 g.r.t. an above.

A combination of accommodation ladder and pilot ladder must b used. Pilot hoists are not acceptable, and the Pilot may refuse to boar if one is offered.

The Sea Pilot, who also acts as a Harbour Pilot, will board arrivin vessels off Feistein Lighthouse in position: Lat. 58° 50′ N., Long 5′ 26′ 30″ E.

The pilot vessel is painted white with orange superstructure an marked "LOS". The Tananger Pilot Station maintains a 24 hours VH watch on Channel 16. The pilot vessel can operate on VHF Channel 6, 8, 12, 13, 14, 16, 20, 21, 22, 24, 25 and 26. Channel 16 is used fo calling, then Channel 13 which serves as the communication channe

The pilot vessel is also equipped with marine radio telephone o 2182 kHz.

The Pilot, whilst serving on board incoming and departing ship carries a walkie talkie, operating on VHF Channel 11. With this h maintains communications with mooring boats, refinery jetty supervis and tugs.

APPROACHING: *Additional signals to be exhibited and sound signa to be used by certain tankers navigating in waters outside Risavika o Stavanger:* Tankers of 40,000 d.w.t. or above when navigating withi the territorial waters to and from Risavika shall in accordance with Ru 28 of the International Regulations for Prevention of Collision at Se show:

By Night:

In addition to the lights prescribed in Rule 23 of the Internationa Regulations for Preventing Collisions at Sea, and when these light are exhibited, three red lights in a vertical line one over the oth so that the upper and the lower lights shall be at the same distan from and not less than 2 m. above or below the middle light.

The lights shall be carried where they can best be seen and visib all round the horizon at a distance of at least 2 nautical miles.

By Day:

A black cylinder of not less than 0.6 m. in diameter and a leng of not less that twice the diameter where it can best be seen.

In addition to the above signals these vessels may, whether by da or night, use a sound signal consisting of one long blast followed by tw short blasts.

The above lights, shape and sound signal indicate that the vess using them is hampered in her ability to comply with the Steering ar Safety Rules of the Regulations and that other vessels must not impe her safe navigation.

ANCHORAGE: Vessels awaiting berth will anchor between the islan of Rott and Kolnesholmen if weather permits. Larger vessels will anch N.W. of Feistein Lighthouse. Pilot will give instructions on VHF.

RESTRICTIONS: Vessels over 40,000 d.w.t. normally berth and unber during daylight hours only. The depth of water off the jetty is 16.8 (55 ft.). At Tananger Depot Jetty depth is 11.6 m. (38 ft.).

MAX. SIZE: Max. d.w.t. 240,000 tons. Max. draft 52 ft. Max. LO 1,100 ft.

RADIO: Whilst engaged in Scandinavian coastal trade Masters a requested to keep the Agent well advised of changes in ETD/ETA.

All wireless/radio telephone messages are transmitted via Rogalar Radio (Tel: 04-67 30 11). Traffic lists being sent at following times (GMT 0705, 1105, 1505, 1905 and 2305 hrs. This list is also sent out on VH Channel 16. Working frequency of the radio telephone is 1729 kHz.

While the vessel is moored, the main transmitter may not be used.

VHF: Refinery VHF radio station: Risavika Port Radio. Calling: Chann 16, working: 11 – 12. The vessel can maintain communication wi Rogaland Radio during stay in port over VHF radio.

TUGS: Tugs are normally available. Additional tugs up to 2,700 b.h. (35 tons bollard pull) are normally available for larger vessels. The tu are stationed in Stavanger and must be ordered in advance by the ship Agent.

One or two mooring boats will be provided for both arrival a departure operations together with portable VHF and radio sets to enab radio links to be maintained between the ship, mooring boats, tugs, Pi and Jetty Supervisor.

BERTHING: Vessels normally berth port side to, if weather permits the to turn on arrival. The decision on this matter will be taken by the Mast after consultation with the Pilot.

For product carriers the decision on which side to berth to, shou also be based on consideration of matching of vessels and shore loadi and bunkering arrangement. It is therefore important that all informati regarding cargo and bunker connections are sent to the refinery pri to arrival.

At Tananger Depot jetty, vessels normally berth port side to, but th may swing and berth starboard side to.

MOORING: It is vitally important for the safety of vessels, terminal a personnel, that vessels are securely moored and maintained in t desired position at all times.

Mooring lines should be kept tight and fore and aft springs doubl to prevent any undue movement at berth caused by changes in wi strength or direction, current or tidal stream flow or surging acti created by a ship passing the berth. Any undue movement in berth, breaking away, may result in the rupture of cargo arms, manifold fitti or loading arm and cause spillage of oil and serious fire hazard.

Excess strain on moorings resulting from variations in level betwe ship's deck and shore mooring point due to vertical movement caus by tide and cargo handling shall be adjusted at regular intervals to avo damage to the fender system of the jetty.

Note particularly the vertical movement of the Yokohama fende which must be adjusted from time to time to avoid the above mention damage.

All vessels fitted with self-tensioning winches should apply brakes once vessel is moored and *not* leave in self-tensioning position.

Immobilisation of Engines: While alongside the vessel must be able if required to move under its own power. Permission to immobilise ship's boilers, main engine, steering machinery and other equipment essential for manoeuvring should be requested from the refinery beforehand, and if granted, would be given on the conditions that emergency towing wires are correctly positioned forward and aft and a suitable tug is on stand-by in Tananger Harbour or within Risavika Bay.

CARGO OPERATIONS: *Connecting:* The jetty is equipped with all metal loading arms. It should be noted that the arms cannot be crossed, simultaneous loading of different products and/or bunkering will often depend on the matching of ship's and shore's line-up. This matter should be studied before vessel is berthed as in some cases reversal of the side of berthing may facilitate efficient handling. Vessels are recommended to discuss this matter over the radio with the refinery before planning the berthing operation.

Suitable adaptor pieces should be fitted to the ship's manifold prior to arrival to match ship's with shore's flanges.

Line-up for the jetty's loading/discharging arms: (No. 9 arm to seaward)

Size	12″	12″	12″	12″	8″	8″	8″	8″	8″	6″	4″	3″
Arm No.	1	2	3	4	5	6	7	8	9	LPG[5]

Gasoil						★	★		★			
Diesel Oil						★	★		★			
Bunker Gas Oil					★						★[1]	★[4]
Bunker Fuel Oil	★	★	★	★	★							
Fuel Oil	★	★	★	★	★							
Crude Oil	★	★	★	★								
Ballast Water	★	★	★	★	★				★[2]			
LPG										★[3]		

Notes:

1. 4 in. hose connection.
2. White oil ships only.
3. 3 in. vapour return connection.
4. 3 in. Lub oil hose connection.
5. LPG arm in front of No. 6 arm.

All flanges are ASA flanges, 150 p.s.i. series.

Pitch circle diameter for the bolts of these flanges are:
8 in.: 11.75 in. (298 mm.)
12 in.: 17 in. (432 mm.)

White and black products are blended in the pump stations of the refinery directly into the ships.

Crude oil is received into underground storage or, about 20% of the time, into a tank above ground.

Ship's crew will be responsible for hose/arm coupling duties. Jetty operator will present the hoses or arms to the ship so that connection may be made to manifold, but it is emphasised that labour beyond this point, will not be available from the shore.

Leakage of oil or vapour from unused cargo/bunker connections constitutes a hazard and all such connections on ship and on shore should be properly blanked.

Loading/Discharging Rates: Max. receiving rate for crude is 14,000 cu.m.p.h. Max. loading rate for fuel is 2,000 cu.m.p.h., White products 800 – 1,200 cu.m.p.h. and LPG 400 cu.m.p.h.

De-Ballasting: The ballast tank ashore is sometimes limited in the quantity it can receive. For this reason and in order to minimise the de-ballasting time Masters are requested to arrive with the minimum quantity of ballast on board consistant with weather conditions prevailing.

De-Ballasting into the harbour is prohibited.

Max. ballast receiving rate is 1,500 cu.m.p.h. Max. back pressure 150 p.s.i. Max. ballast receiving capacity 16,000 cu.m.

Cargo Handling: When discharging or loading the vessel should fly signal flag "B" from sunrise to sunset, and from sunset to sunrise show an all round red light.

The Master must take all necessary precautions to prevent the vessel's tanks from overflowing during loading/tank transfers. The Master will be held responsible for damages incurred when an oil spill may be traced back to his vessel.

A refinery operator will supervise jetty/ship operations and should maintain contact with the Officer nominated by the Master to supervise the ship operations. Safe and efficient operations will depend on good co-operation at this working level, if it fails both the ship and shore are entitled to suspend operations until the situation is corrected.

POLLUTION: The refinery is located in an area which is very sensitive to pollution matters. Waters are confined and used by fishermen for keeping live fish and lobster, and any emission of smoke is visible over a wide range.

The utmost care must be exercised in handling cargo, ballast and bunkers in order to avoid oil spilling into the sea. Deck is not to be washed down during stay in port.

Scuppers must be plugged.

Scrubbing of the ship's underwater hull is not allowed.

Discharge of ballast or contents of bilges into the harbour is prohibited. Contaminated water should be retained on board or discharged into the shore de-ballasting system.

Sea valves to be shut and sealed during loading/discharging.

Emission of smoke must be kept at a minimum by proper combustion control.

Soot blowing of boilers is prohibited.

Disposal of garbage into the sea is prohibited.

In case an oil spill occurs the refinery should be notified immediately.

Violation of Norwegian Regulations on Pollution is likely to result in prompt action from local Authorities.

Oil Spills: Oil spills caused by ships moored alongside refinery jetty will be *the ship's* responsibility, but the refinery will take action as if the spill had been caused by the refinery, and the refinery personel will immediately start trying to limit the spill, and start cleaning up. All such work will be for the ship's account.

If an oil spill occurs while alongside the Tananger Depot jetty, the refinery will give assistance if asked by the person in charge of the Depot.

Several contractors will be available with manpower, in case refinery duty personnel and maintenance crew are insufficient.

The following equipment is available at refinery and Depot:
1 × 25 ft. boat with tank for oil. This boat can be used for setting of oil booms, towing, etc.
2 × 14 ft. boats.
1 vacuum truck at refinery.
Boats, barges and vacuum trucks are available from contractors.
1 aluminum raft.
1 Komara skimmer.
1 Skimmy skimmer.
Pumps and ejectors.
1,600 m. oil booms.
EXPANDI, WSA and T.T.
Oil absorbent.

Oil dispersents are available but will *not* be used without special permission from the Norwegian Authorities.

MEDICAL: Hospital at Stavanger, 16 km. away.

DENSITY: Average density off the jetty is 1028.

FRESH WATER: Available.

FUEL: All grades of gas oil, diesel oil, heavy fuel oil, and lubricating oil available, at the jetty.

Notify agent of requirement with original ETA.

REPAIRS: Hot work such as welding, burning etc. is only allowed on board if covered by a written permit issued by the refinery.

SURVEYORS: *Cargo Inspectors:* Caleb Brett Tel: 04-69 79 23 (after hours 04-59 18 45); SGS Tel: 02-41 61 42 or 04-56 41 04.

Classification Societies: Det Norske Veritas Tel: 04-50 60 00 (after hours 04-59 85 53, 04-59 76 88, 04-42 19 62). Lloyd's (at Bergen) 05-12 20 02.

AIRPORT: International airport at Sola, 3 km. away.

GANGWAY: For vessels over 30,000 d.w.t. a shore gangway will be available at the refinery jetty.

Vessels of less than 30,000 d.w.t. must be prepared to provide their own gangway while moored at the jetty. A safety net should be suspended underneath this gangway.

EMERGENCY CO-ORDINATION CENTRE: At Sola Airport.

TELEPHONES: For personal calls, a coin operated telephone connected to Stavanger exchange is placed in a kiosk at the refinery gate.

If requested by the ship, a telephone (No. 04-69 67 69) is available to be placed onboard. The Agent reads the meter and charges the ship. Before departure the ship's crew must place the telephone in the jetty house.

The jetty operator will keep contact with the control room by means of walkie talkie.

Also see "General".

SHORE LEAVE: See "General" – "Shore Transportation/Regulations".

GENERAL: *Stores:* It should be noted that all deliveries to the ship while handling cargo is limited by restrictions against approach by both powered road vehicles and powered boats, suitable arrangements for alternative transport, manpower, etc. must be made in advance.

Shore Transport/Regulations: Ship's crew will only be allowed to pass through the refinery area when possessing a pass. The pass will be handed to the Master by the Agent on arrival for issue by the Master. Photography in the refinery is prohibited. Intoxicated persons are not allowed inside the refinery gate.

Unauthorised or intoxicated persons are not to be admitted onboard. Such persons may be ordered from the jetty if their condition should so warrant. Vessels are expected to undertake their own precautions in respect of intoxicated persons appearing on deck. Ship's personnel are not allowed to walk through refinery.

For taxi see "Useful Telephone Numbers".

Motorised road traffic on the jetty and powered boats are not allowed to approach the vessel nearer than 50 m. (distance measured from the loading manifold and/or open hatches of ship's tanks into which oil is loaded/discharged) while cargo operations are in progress.

Launch Service: Whilst at anchor in the roads no launch service is available. In an emergency the Master can contact the pilot station or the pilot vessel, for transport to the shore.

Services: Services such as stores, laundry, doctor, etc. should be ordered in advance through the agent.

Steam and compressed air are not available at the jetty.

Current: Risavika being confined waters, currents are usually small, however influenced by strong winds. Highest measured velocity 0.7 knots in entrance of bay, setting to the North.

Tide: The average tidal range is 0.7 m. (2 ft. 3 in.). Highest observed level +1.6 m. and lowest −0.11 m.

Wind Directions: Prevailing winds are: April – October: Northwesterly. October – April: Southwesterly.

Emergencies: From the "Bird's nest telephone" fire/emergency can be reported by dialling 188 (control room). On the "railing" is attached a press button for remote stopping of all refinery's loading pumps, particularly intended for quick stoppage of loading operations in case of emergency onboard.

Fire: The refinery is equipped with fixed and wheeled equipment for applying foam, water and dry powder to fight fires. Floating firefighting equipment is normally not readily available, but some tugs and supply vessels are equipped with water pumps, monitors and foam making equipment and may be called in on short notice.

Safety: No loading/discharging to take place between the refinery and a tanker berthed at the jetty, if another tanker comes alongside for transfer of cargo.

The refinery representative will when boarding the ship bring the safety check list for joint examination with the ship's Officer in Charge.

Useful Telephone Numbers:

Taxi: Tananger Drosjeholdeplass:	04-69 61 92
Sola Drosjeholdeplass:	04-65 04 44

Police:	04-53 40 00
Norwegian Gov. Welfare:	04-54 25 83
A/S Norske Shell	04-69 30 00

Long distance and international calls must be arranged on the ship's VHF radio via Rogaland Radio, or on telephone supplied by Agent upon request.

AUTHORITY: A/S Norske Shell, Postboks 144, N-4051 Sola, Norway. *Tel:* Stavanger 47-4-693000. *Telex:* 33021 Sraff N. *FAX:* 47-4-693805. *Contact:* O. Torstrup, Port Captain.

STAVANGER: 58.58 N. 05.44 E. (See Plan)

DOCUMENTS:

Declaration of Health, 1 copy.

List of Goods, including stores, 1 copy.

Crew's Lists of Goods liable to duty, 1 copy.

List of Goods, 2 copies for each port of discharge. All Bills of Lading to be entered with marks, numbers, weight and quantity.

General List of Goods, 1 copy.

A form for entering ports of call where discharging will take place.

PILOTAGE: Vessels approaching from sea and desiring a Pilot should order at least 24 hours' notice in so far as possible and confirm arrival at pilot station at 2 hours' notice. Advance order can be sent in following manners:

(a) From ships at sea over radio direct to Sea Pilot watch or over VHF radio-telephone calling Channels 16 and 13.

(b) From ships at sea over coastal radio station to pilot station or pilot office.

(c) From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey report to sea pilot station.

Vessels lying in port and desiring Pilot will order Pilot from nearest pilot office during its office hours and if possible at 4 hours notice.

Vessels approaching from sea as well as vessels lying in port shall when making an advance order state name and destination of vessel and whether 1 or 2 Pilots are desired.

Pilot will be despatched to ships in accordance with advance orders, and vessels are therefore requested to comply with foregoing rules as far as possible in order to avoid having to wait for Pilot.

International provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to radio communications or as sole communication in emergencies.

Pilots are taken on board at:

A. Feistein Lighthouse, 19 miles South of Stavanger, or in bad weather 6 miles North of lighthouse under the lee of Rott.

B. Skudefjorden, 18 miles N.W. of Stavanger. In bad weather under the lee of Karmoy or Kvitsoy, as weather permits.

Pilot boats are stationed at Tananger and Skudesneshavn. No boats are out cruising.

ANCHORAGE: Found in the Byfjord, 3 nautical miles North of Stavanger. Pilots recommended when anchoring.

MAX. SIZE: Greatest depth alongside goods and passenger quays is 30 ft. Also see "Berthing" and "Tankers".

RADAR/VHF: Radar service for inner harbour.

TUGS: Normally used.

BERTHING: The port has a total quay length of approximately 3,400 m. The coasting and the foreign trade is located in the East and West harbour, comprising the 3 main quays namely the Bekhus Quay, the Skagen Quay and the Strand Quay. These quays measure 2,000 m. with depth alongside 24 ft. – 30 ft.

Cranes: 1 × 50 tons, 1 × 28 tons and 1 × 3 tons travelling cranes, 3 × 20-70 tons mobile cranes and 1 × 100 tons floating crane.

Grain: Rogaland Felleskjop: Capacity for storing 72,000 tons quay length 190 m., depth alongside 48 ft. Discharging capacity 200 t.p.h. Stavanger Havnesilo: Storing capacity 140,000 tons, quay length 170 m., depth alongside 51 ft. Discharging capacity 500 t.p.h.

Roll-on/Roll-off: Traffic is offered by a ferry berth constructed for ships up to 10,000 g.r.t., depth alongside 30 ft.

Containers: Sandvika Container Quay. Length 170 m., depth alongside 40 ft., also fitted with Ro/Ro facilities for vessels up to 20,000 g.r.t.

Offshore oil-exploration bases: Aker-Norsco A/S at Risavik, Tananger, North Sea Exploration Services A/S, Dusavik, Stavanger.

STEVEDORES: No particular ETA advices required.

MEDICAL: Agents should get advance notice to secure speedy service. Hospital facilities available.

TANKERS: *Esso Norske:* 3 nautical miles South of central harbour depth alongside 45 ft.

Norske Shell A/S: See "Sola".

Norske Braendselolje A/S: 7 nautical miles South of the central harbour

Texaco Oil: 1 nautical mile from central harbour, depth alongside 25 ft

A/S Kulimport: Coal and coke. Length of wharf 116 m., depth alongside 27 ft.

DENSITY: 1025, no change in relation to state of tide.

FRESH WATER: Delivered from quay or from water boat.

FUEL: Normal grades available without advance notice.

CONSULS:

	Tel. No.		*Tel. No*
Belgium	555334	Greece	525030
Denmark	57001	Iceland	532025
Finland	532030	Netherlands	520080
France	527500	Sweden	527500
German F.R.	522594	United Kingdom	525801

REPAIRS: All kinds of repairs available.

DRY DOCKS: One, 545 by 75 by 24 ft. Marine slipway up to 1,500 d.w.t

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 20 cigarettes per day. Wine and or Spirit: 2 bottles of wine or 1 bottle of brandy.

AIRPORT: 10 km. from port. Airlines to Continent, U.S.A. and U.K.

TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.

HOLIDAYS: 1st January; Maundy Thursday; Good Friday; Easter Monday; 1st May; 17th May; Whit Monday; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Police Tel. 534000; Ambulance 531000 Fire 522111.

TELEPHONES: There are arrangements for placing telephones on board.

SHORE LEAVE: No restrictions.

AUTHORITY: Stavanger Havnevesen, Nedre Strandtg. 51, 4000 Stavanger, Norway. *Tel:* (04) 507800. *Cables:* Stavanger Havnevesen *FAX:* 04-507822. *Contact:* O. M. Odland, General Manager. Edgard Bergsvik, Harbour Master.

STURE: 60.37 N. 04.51 E. (See Plan)

LOCATION: The Sture Crude Oil Terminal is located at Hjeltefjorden on the East side of Alvoy in the position Lat. 60° 37.2′ N. Long. 04° 51.5′ E.

The terminal is owned by a consortium of companies, and is operated by Norsk Hydro a.s.

The Sture harbour area is defined as the terminal's jetties with facilities, and the total sea area inside the seaward safety zone.

DOCUMENTS: See "Mongstad".

PILOTAGE: Pilotage is compulsory for all foreign vessels calling at the terminal. The pilot will embark in the vicinity of Fedje or Holmengra.

The terminal recommends that all Norwegian and NIS vessels also use a pilot.

ANCHORAGE: There is no safe anchorage in the vicinity of the terminal If the jetties are occupied, arriving vessels must wait outside the pilo area. Further particulars may be obtained from the pilot station.

APPROACHES: Two approach channels with very deep water, give good access to the Sture Terminal. The main approach is through Fedjeosen, South of Fedje. The other approach is North of Holmengra

RESTRICTIONS: Berthing and unberthing day and night, weathe permitting. All ships shall comply with IMO and Terminal Regulations All ships calling at the terminal must confirm that they are fully I.T.F approved.

The following ship types can be accepted:

1. Conventional tankers and product/crude combination carriers in the range from 30,000 d.w.t. to 300,000 d.w.t.
2. Combination carriers of O.B.O. and O.O. type which have used same tanks and lines for bulk liquids as will be used at the Sture Terminal, for the last three voyages.

The vessel shall be able to accept a minimum bulk loading rate pe hour:

For vessels of up to 89,999 tons s.d.w.t.: 7.5% of s.d.w.t. per hour.

For vessels of between 90,000 tons s.d.w.t. and 179,999 tons s.d.w.t. 6.6% of s.d.w.t. per hour.

For vessels of 180,000 tons s.d.w.t. and above: 5.8% of s.d.w.t. pe hour.

Traffic Regulations: No vessel, regardless of size, is permitted to move inside the Sture Harbour Area, unless authorised by the terminal.

MAX. SIZE: The terminal's berthing facilities consist of 2 jetties fo handling of crude oil.

Jetty No. 1:	DWT min/max:	30,000 d.w.t. – 300,000 d.w.t.
	Depth alongside:	26 m.
	Max. allowed draft:	23 m.
Jetty No. 2:	DWT min/max:	50,000 d.w.t. – 150,000 d.w.t.
	Depth alongside:	26 m.
	Max. allowed draft:	23 m.

HEALTH: See "Mongstad".

TUGS: There are 2, stern drive type, tugs available for handling berthing unberthing operations at all times. Each tug has a bollard pull o approximately 50 tons. Under normal circumstances, tugs towing hawsers will be used. Both tugs have fire fighting and oil recovery equipment.

Two mooring boats are available for handling of mooring lines.

RADIO: An arriving vessel must give proper notice through the agent or directly to the terminal by cable or telex.

The vessel must have received approval from the terminal to proceed inside Fedjeosen or Holmengra to the dedicated jetty.

Vessels proceeding inwards should be in constant communication with the terminal on VHF Channel 14.

During berthing operations, the vessel is in communication with the Shift Supervisor on VHF Channel 14 through the pilot's radio.

Pre-Arrival Information: 72 hours before arrival, the Master shall inform the terminal about the following, either via his agent or direct to the terminal on Telex No. 40192.

(a) Ship's name and call sign.
(b) Flag.
(c) Name of Master.
(d) Cargo number.
(e) Gross registered tonnage.
(f) Summer deadweight.
(g) Draft, fore and aft.
(h) Last port of call.
(i) Confirm ETA (local time and date).
(j) Whether loaded/part loaded or in ballast. If loaded, nature and quantity of cargo, if ballasted, type (segregated/oily) and quantity to be discharged ashore and estimated deballasting time.
(k) Quantity of cargo to be loaded, and requested loading rate.
(l) Length overall and beam, number, size, distance from bow to connections and position (above water line and from ship's side) of vessel's manifold connections.
(m) Defects in vessel or equipment affecting discharging/loading performance or manoeuverability.
(n) Confirmation that an Inert Gas System is fitted, fully operational, and that the oxygen content of all tanks does not exceed 8% by volume.
(o) Last three cargoes.
(p) Mooring equipment.

Also see "VHF".

VHF: The Sture Crude Oil Terminal will be manned 24 hours a day and can be contacted on VHF Channel 14.

V.T.S. in operation on Channel 9.

When moored alongside the jetty, a vessel will communicate with the terminal by means of a UHF radio handset provided by the terminal.

The Terminal Control Building is equipped with coin-operated telephones for public use. The agent can supply mobile telephone if required.

Each jetty is equipped with two telephones for internal use.

Communications: A portable radio hand set will be supplied by the terminal to the vessel for use during loading operation. A receipt will be required for the radio hand set. The radio will be used for contact with the Jetty Operator during normal loading operations and for notification of an emergency condition. The radio must be returned to the terminal operator when the documents are delivered onboard.

BERTHING: *Mooring Facilities:* The loading platforms and mooring dolphins are equipped with (high capacity) mooring hooks and pulleys. The hooks and pulleys have quick release facilities and capstans to haul in mooring lines. The release can be done locally or remotely from the control room.

The jetties are equipped with monitoring systems comprising:

(a) Wind and sea current sensors, detecting speed and direction.
(b) Berthing aid system, monitoring the tanker's approach velocity, distance to jetty and angle of approach during the final stage of berthing.
    Approach velocity max. 0.10 m./sec.
    Approach angle max. 7°.
(c) Sensor in the mooring gear to detect mooring line loads.
(d) Measurement of tanker surge movements and sway, when the loading arms are connected.
(e) Closed circuit television cameras.
(f) Area radar display.
(g) VHF/UHF radios.

All data from the monitoring systems are routed to the control room. The berthing aid data becomes available when the ship is at a distance of approximately 100 m. from the jetty.

Mooring Arrangements: It is of the utmost importance for safe operation that ships are securely moored and maintained in the correct position at all times.

The Master of the vessel shall ensure that his vessel's moorings are closely watched and tended as required to prevent undue movement of the vessel. Ensure that all moorings on self-tension winches are secured with winch brakes in locked position. Use of self-tension winches in automatic position is strictly forbidden.

All mooring lines in the same direction shall be of the same type and have the same working strength.

All mooring wires shall have rope tail ends, with minimum the same working strength as the wires.

Mooring diagrams for small, medium and large size vessels are shown in the "Plan Section".

Safety Towing Wires: Vessels, while secured alongside the jetty, must provide and rig towing wires with sufficient length and strength on seaward bow and quarter, with eyes maintained just above the water level, ready for emergency towing.

The wires must be securely fastened to the ship's bollards.

LOADING: *Jetty Details:* Each jetty has 4 loading arms which can be either locally operated from a fixed jetty head console or from a portable remote control panel.

Each loading arm is equipped with the following facilities:

(a) Loading arm stripping pump with 30 cu.m.p.h. design capacity.
(b) Hydraulically operated valves, couplings and quick release ("PERC") arrangements.

Loading Arms Flange Sizes and Safe Working Ranges:

Loading arms are equipped with adjustable flanges in the range of 12 in. – 16 in.

Ship's manifold connection must meet loading arm envelope configuration and must provide space and support on which to place loading arm support legs.

	Min.	Max.
Unencumbered distance from ship's side:	1.145 m.	8.145 m.
Height of centreline to deck or suitable working platform:	1.3 m.	2.4 m.

Min./Max. Loading Rates:

Loading rates:	Min.	800 cu.m.p.h.
	Max.	15,000 cu.m.p.h.
Loading arm design capacity:		3,750 cu.m.p.h.

Also see "Restrictions".

Pre-Operational Meeting and Inspection: Before any operations commence, a Pre-operational Meeting will take place between the terminal representative and the Master or the officer-in-charge of cargo operations. They will:

(a) Complete and sign the Ship/Shore Safety Check List.
(b) Discuss any deficiencies shown up by the above Check List and agree on any additional precautions required.
    The terminal reserves the right to refuse to load a vessel if the requirements are not met.
(c) Discuss and agree on procedures for taking ballast tank samples (see "Ballast"), and inert gas samples (see "Inert Gas Systems").
(d) Agree on a loading/discharging programme that includes:
    Quantities of cargo to be loaded.
    Loading rates.
    Deballasting procedures and rates.
    Procedures for emergency shut-down of operation.
(e) Discuss and agree on the means of communication to be used during the operation.
(f) Discuss and agree on connecting/disconnecting procedures.
(g) Discuss actions to be taken in the event of an emergency. This should include both communication and emergency procedures.

Operational Procedures: Loading/discharging will not commence until all the safety checks have been carried out to the satisfaction of the terminal representative and the Master or the officer-in-charge.

(a) Before any operation is carried out, the ship will be earthed.
(b) The jetty operator will be responsible for connecting the loading arms to the vessel's manifold as indicated by the officer-in-charge.
(c) The jetty operator and the ship's officer-in-charge must agree that systems are correctly lined up before operations can begin.
(d) Loading operations will be closely watched from the terminal control room.
(e) The vessel must give at least 10 minutes notice if required to stop or start any operation, unless under emergency conditions.
(f) The jetty operators will empty the loading arms onboard before disconnecting.
(g) A representative from the terminal and/or independent surveyors will witness the ship's dip/ullage/water dip/temperature/samples and quantity loaded according to ship figures.
(h) Preferably the ship must give notice to the terminal control room before any shut down operation is carried out.

Cargo Quantity Calculations: The cargo loaded will primarily be calculated according to the shore metering system, and the same figures will be entered on cargo documents.

Emergency Shut-down: If the vessel is loading, and it becomes necessary to manually initiate an emergency shut-down, the jetty system should, if possible, be used.

In the event of an emergency, jetty personnel should immediately be alerted to the situation, and the emergency stop, which is placed on the gangway, activated.

Manifold valves should not be closed until so advised by jetty personnel.

Inert Gas Systems: All vessels calling at the Sture Terminal must have a fully operational Inert Gas System. Prior to arrival, the vessel must confirm that all empty cargo tanks and those containing dirty ballast have been fully inerted and have an oxygen content of 8% or less by volume.

Random samples will be taken, and provided these are found to have an oxygen content of no more than 8% by volume, the vessel will be permitted to commence operations.

If the random samples indicate an oxygen content in excess of 8% by volume, then the oxygen content of all tanks will be checked.

If it is established that the vessel does not comply with these regulations, then she will be required to vacate the berth without delay and return to sea until an assurance can be given to the terminal that the required oxygen level has been achieved.

In such an event, Notice of Readiness will have to be re-tendered prior to re-entering the port.

Weather Precautions: Operations shall be stopped during severe electrical storms and all cargo valves and valves in the gas line riser shall be closed.

During periods of high winds and on the instructions of the Terminal Manager or Shift Supervisor, operations shall be stopped and loading arms disconnected.

BALLAST: Only clean ballast water contained in segregated ballast tanks will be permitted to be discharged into the waters in the terminal area. Random samples can be taken from segregated ballast tanks.

Contaminated ballast water, defined as such according to Norwegian law, will not be permitted to be pumped overboard in the vicinity of the terminal or into Norwegian waters, but will have to be pumped ashore to the terminal ballast tank. In order to minimise the de-ballasting time, Masters are requested to arrive with minimum ballast on board for safe navigation.

MEDICAL: Only limited services are available at the terminal. Any medical requirements for ship's personnel upon arrival should be arranged through the vessel's agent prior to arrival. Emergency medical services while berthed at the terminal may be arranged through either the vessel's agent or terminal operating personnel.

DENSITY: 1025.

FRESH WATER: Potable water can be delivered at a rate of 30 tonnes p.h. Ship's hoses are to be used.
FUEL: No bunkers of any kind are obtainable at the terminal.
FIRE PRECAUTIONS: In case of fire on board, the ship's responsible officer should:

1. Activate the ship's fire alarm.
2. Notify the terminal by UHF/VHF or other established line of communication.
3. Make a signal in the form of a series of prolonged blasts on the vessel's whistle.

In case of fire on the jetty or the terminal, the jetty operator will inform the ship's responsible officer accordingly.

In all events of fire, whether on board or onshore, all jetty operations will cease and loading arms be prepared for disconnection.

Fire Fighting Equipment on Jetties: Each jetty is equipped with 4 infrared detectors which will automatically stop loading pumps on the outbreak of fire. These monitors are electrically powered and remotely controlled, either from the main jetty fire fighting control panel, or a local control panel located on the jetty causeway.

Additionally each jetty is equipped with 4 remotely controlled fire foam/water monitors. Fire hydrants for water/foam with international ship/shore connection, and dry powder extinguishers both 12 kilos and 50 kilos are available.
CONSULS: At Bergen, 60 km.
REPAIRS: Hot work or any other repair work including tube cleaning, chipping and scraping, hull painting, testing or servicing of electrical equipment (including radar, radio and domestic electrical equipment), is prohibited on the vessel unless a written application, specifying the repair work to be carried out, has been submitted to the Terminal Manager and written permission granted.

If permission is granted, a list of specific repairs and a list of shore workmen employed on the vessel, must be given to the Terminal Manager before work commences.

Repairs and other work which may immobilise the vessel, must not be commenced without prior approval, in writing, from the Terminal Manager.

In all cases, adequate fire fighting equipment should be ready for immediate use.
SURVEYORS: S.G.S. Surveyor based at the terminal.
CUSTOMS ALLOWANCES: See "Mongstad".
REPATRIATION: Possible.
AIRPORT: Bergen, 60 km.
TIME: Norway uses Central European Time, therefore local time is one hour ahead of coordinated universal time (UTC). During the Summer period Norway uses local Summer time, which is 2 hours ahead of UTC.
STORING: Stores must preferably be handled before or after cargo operations. Only small items of ship's stores, if carried by hand, may be taken on board during cargo operations.

Vehicles will only be allowed on the jetty approach roadway or jetty head after permission from the terminal.

Close to the jetties there are designated parking areas for visiting vehicles.
SHORE LEAVE: *Access to Restricted Area:* The Master shall arrange for a current Crew List to be deposited with the terminal representative on arrival, and shall, when possible, include the names of all persons expected to visit the ship.

Only authorised persons, ship's crew, visitors or others with entry permits issued by the Terminal Manager, shall be allowed access to the external restricted area, and they must comply with any restrictions imposed upon them.

The terminal also reserves the right to require that unannounced visitors, or persons whose sobriety or conduct present a hazard to the terminal's property be personally identified by a responsible officer and escorted while in the restricted area.
WEATHER: *Tides:* Tide is semi-diurnal.
Normal tidal variance is of the order 0.9 m. – 1.0 m.
Max. astronomical tidal difference is in the order of 1.6 m.
Highest difference between extreme high and extreme low water is 2.6 m.
Tidal Currents: Tidal-generated currents in Hjeltefjorden have a maximum rate of 1.2 knots. The average rate is 0.4 knots. The dominant directions of the current are from South-Southeast and North-Northwest.
Wind: Prevailing winds are from South-Southeast and North-Northwest.
GENERAL:
Movement of Tugs and Other Craft: During operations, no vessel or small craft shall be allowed alongside the vessel unless authorised by the Terminal Manager or Shift Supervisor and agreed by the Master.

When tugs or authorised craft are alongside or assisting a vessel, all cargo system openings must be closed unless all tanks are gas free.
Damaged Vessels: The Master of an arriving vessel:

(a) which has sustained damage outside the entrances to Hjeltefjorden that affects or is likely to affect her seaworthiness;

or

(b) from which petroleum or any dangerous or flammable substance is escaping or is likely to escape;

shall give notice thereof to the Sture Terminal and the vessel shall not enter the entrances to Hjeltefjorden except with the permission of the Terminal Manager/Shift Supervisor and in accordance with his directions.

SHIPMASTER'S REPORT: June 1990.
Operator: Norsk Hydro A/S.
Documents:
3 copies Crew List.
1 copy Crew Manifest (only the amount in excess of allowances to be shown).
2 copies Stores/Bond List.
1 copy Health Declaration.

Agents and Customs board and check ship's papers. None are taken ashore and there is no port clearance.

Cargo Manifest and Bills of Lading completed by the terminal.

Pilotage: Compulsory. Pilot boards South of Fedje Island (one mile S.E of Hellisoy Lighthouse) or if weather does not permit, to the North o Holmengra.
Anchorages: None. Vessels must drift if berth is occupied.
Radio: Communications: ETAs to be sent 7 days, 3 days, 2 days and 1 day in advance to the Agent, or terminal direct (Telex 40192 Hydro N), who also require the following pre-arrival information before permission is granted to enter.

1. Ship's Name and Call Sign.
2. Flag/Nationality.
3. Master's Name.
4. Owner/Charterer.
5. Shipper of Cargo.
6. Voyage Number.
7. Gross Register Tons.
8. Summer Deadweight.
9. Draft forward and aft (Arrival/Departure).
10. Last Port of Call.
11. Loaded or in ballast condition; if in ballast, type segregated/dirty and quantity to be discharged ashore (dirty ballast facilities available). If loaded, type and quantity of cargo.
12. Estimated deballasting time required (usually 2 connections).
13. Quantity of cargo to be loaded and required rate of loading.
14. Length overall; beam; number of connections and size, distance from bow to manifold; height above water line of manifold distance from rail to manifold.
15. Any defects in equipment affecting cargo work and navigation etc.
16. Confirm IG system is fully operational, and all cargo tanks are under 8% oxygen content.
17. Last 3 cargoes carried.
18. Mooring arrangements/equipment.
19. Confirm ETA.

Tugs: Two stern drive type tugs available with bollard pull of 50 tons. Tugs have fire fighting and oil recovery equipment onboard.

Harbour Regulations require that a tug escorts the vessel at all times whilst in the pilotage area, arranged by terminal.
Berthing: Always head to wind at time of berthing. 3 tugs used, tug lines. No mixed moorings allowed in same direction and mooring wires must have rope tails. 4 head/stern lines, 2 breast lines and 2 back springs are the usual requirements. Jetty well fendered. Tower type shore gangway used.
Berths: There are 2 jetties, both have depths of 26 m. alongside and max. allowed draft of 23 m. Each jetty has 4 loading arms with adjustable flanges from 12 in. to 16 in. and designed loading capacity o 3,750 cu.m/hr. Jetty No. 1 to North is for tankers of 30,000 d.w.t. to 300,000 d.w.t. and Jetty No. 2 is for 50,000 d.w.t. to 150,000 d.w.t.
Tankers: Conventional tankers and product/crude combination carriers from 30,000 d.w.t. to 300,000 d.w.t. can be accepted.

Vessels are expected to be able to accept a minimum bulk loading rate of Summer d.w.t. per hour:
For vessels up to 89,999 s.d.w.t. – 7.5% of s.d.w.t. per hour.
For vessels between 90,000 s.d.w.t. – 179,999 s.d.w.t. – 6.6% o s.d.w.t. per hour.
For vessels of 180,000 s.d.w.t. and above – 5.8% of s.w.d.t. per hour

Vessels must have onboard at all times approximately 33% of Summer d.w.t., so vessels first load this amount of cargo before loading is stopped. Once this amount of cargo is aboard, vessel is allowed to deballast ashore from cargo tanks. On completion of deballasting, loading is resumed. During the deballasting, stores from quay are allowed to be taken, using the shore crane if required. Any stores can be carried up the gangway at any time. No stores allowed onboard by crane during the loading operation.
Cargo: Osberg Blend – API 34.1. Density 0.8542. Loading temperature about 8°C – 9°C.
Medical: Terminal will arrange on an emergency basis only. Agent needs plenty of notice to arrange a doctor, 24 hours if possible.
Fresh Water: Available from shore by ship's hose, rate 30 t.p.h.
Fuel: No bunkers are available.
Fire Precautions: As per terminal instructions and usual safety regulations.
Consuls: At Bergen.
Surveyors: At Bergen and Mongstad.
Watchmen: Not required.
Repatriation: All facilities available via Bergen.
Time: GMT plus 1 hour in Winter and GMT plus 2 hours in Summer.
Telephone: Agent supplies a mobile telephone on request for ship. Telephone also on quay in terminal office.
Stores: Available from ship chandlers in Bergen and locally through Agent.
Shore Leave: Shore passes supplied by terminal. Distance to Bergen about 60 km. (1.5 hours by car).
Agent: We used Ole R. Olsen, P.O.Box 65, N-5330 Tjeldstoe, Norway. Telex: 40610. Telephone 475-389430. Mobile Telephone: 060-80949 (The Head Office is in Bergen).

AUTHORITY: Sture Crude Oil Terminal, 5330 Tjelsto, Norway. *Tel* (05) 386000. *Telex:* 40314 and 40192 Hydro N. *FAX:* (05) 389420. *Contact:* F. Werner Johansen, Terminal Manager.

SUNNDALSORA: 62.41 N. 08.36 E.

DOCUMENTS:
2 Crew Lists
2 Passenger Lists
Declaration of Health
General Declaration
Cargo List
Cargo Manifest
Personal Effects List

PILOTAGE: Telegraphic address of Pilot Station: "Grip Pilot". Description of Pilot Boat: White hull, orange wheelhouse, length 43 ft., speed 18 knots. The Pilot has to be taken on board 1 nautical mile East of Grip Lighthouse (Lat. 63° 14′ N., and Long. 07° 37′ E.), no alternative area. No anchorage for vessel awaiting Pilot.
ANCHORAGE: Poor conditions in the Sunndalsfjord. Possible to anchor at Freifjord and Bolgsvaet West of Kristiansund.
RESTRICTIONS: No restrictions.
MAX. SIZE: Max. draft 31 ft. 06 in.
HEALTH: "Declaration of Health" to be issued before arrival.
RADIO: Rogaland Radio and (20–30 hrs. before arrival) Alesund Radio.
VHF: For inner harbour on Channel 16 (normally in use when mooring).
RADAR: No Port Radar Service.
TUGS: Not available in Sunndalsora. Nearest Alesund, steaming time about 12 hours. Tugs only required when Pilot/Master find it necessary.
BERTHING: Length of quay: 1,007 ft. Max. draft 31 ft. 06 in. Load/discharge normally by shore equipment.
CRANES: 1×10 tons, 1×15 tons and 1×25 tons.
BULK CARGO FACILITIES: 1 grab crane 400 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: No notice required.
MEDICAL: Doctors available in Sunndalsora. Nearest hospital: Kristiansund or Molde (60 miles from Sunndalsora).
TANKERS: The usual rules for tankers to be complied with.
DENSITY: Average density of the port 1019 – 1020.
FRESH WATER: Available.
FUEL: Available in smaller quantities (from Mobil and BP).
FIRE PRECAUTIONS: No specific precautions.
CONSULS: None. Nearest at Kristiansund: Denmark, Finland, France, German F.R., Netherlands, Portugal, Sweden and United Kingdom.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Nearest Kristiansund (Norske Veritas) and Bergen (Lloyd's).
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing to be carried out by crew.
CUSTOMS ALLOWANCES: Quantity permitted for each Crew member to be held out of bond: 200 cigarettes or 200 gm. tobacco, 1 bottle spirit and 1 bottle of wine.
CARGO GEAR: Load /discharge effected by shore gear.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: Kvernberget (Kristiansund) and Aro (Molde), both at 60 miles distance and with regular air service.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: May 1st and May 17th. No cargo work can be arranged on those days.
POLICE/AMBULANCE/FIRE: Police Tel.: 91166, Ambulance (doctor) 91346, Fire 001, Lifeguard 91933.
TELEPHONE: In harbour office.
SERVICES: Not available. Nearest Kristiansund or Molde.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Sunndal Verk a.s. demands identification cards, obtained from Dock Master.
REGULATIONS: Forbidden to take photographs within boundaries of Sunndal Verk a.s.
DELAYS: Usually no delay if notice of arrival given to Agent in good time.
DEVELOPMENTS: No developments expected in foreseeable future.
GENERAL: No cargo on Saturday and Sunday.
AUTHORITY: Sunndal Verk A/S, 6600 Sunndalsora, Norway. *Tel:* (073) 93000. *Telex:* 15222 Sual N. *FAX:* (073) 90086. *Cables:* Sunndal Verk, Sunndalsora. *Contact:* Eilif Gran, Tel: (073) 93330.

SVOLVAER: 68.14 N. 14.35 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Custom Documents.
Stores List.
Manifest.
Bill of Lading.
Ship's Papers.
Valid Derat Exemption Certificate.
Ships arriving from Finland, Denmark, and Sweden need Customs permit from last port.

PILOTAGE: Vessel approaching Svolvaer may call Bodo Radio, 2182 kHz. by radio asking for Svolvaer harbour pilot. Telegraph ETA Svolvaer 24 hours before arrival. All communication with harbour pilot boat on VHF Channels 16 and 12. Exact position for pilot boat is Lat. 68° 11′ 13″ N., Long. 14° 36′ 00″ E. Different types of pilot boats are used, but usually the pilot boat flies pilot flag. No special requirements for boarding, except usual pilot ladder.
ANCHORAGES: Boundaries for safe anchorage Lat. 68° 13′ 36″ N., Long. 14° 37′ 00″ E.; Lat. 68° 13′ 48″ N., Long. 14° 36′ 12″ E. Depth in area about 25 fathoms.
MAX. SIZE: Max. permissible length 520 ft., draft 30 ft. in the Oil Harbour.
HEALTH: Pratique is automatic, given by radio. Vessel only required fly yellow flag. In event of any suspected disease or fever on board call Svolvaer Harbour Master by telephone via Bodo Radio (2182 kHz).
RADIO: Call Bodo Radio by R/T 2182 kHz or VHF-Channel 16. Svolvaer Harbour office VHF-Channel 16/12.
TUGS: Small tugs available.
STEVEDORES: All information regarding gangs, loading and discharging rates can be obtained by calling ship's Agent in Svolvaer via Bodo Radio.
MEDICAL: Hospital facilities available.
TANKERS: There are discharging berths for oil carriers in Svolvaer. Diameter of lines at berth 6 in. and 8 in.
DENSITY: Density in port is 1025.
FRESH WATER: Delivered from piers by hose with a rate of about 20 t.p.h.
FUEL: All kinds of fuel oil are available.
CONSULS: Swedish and Italian Consulates.
REPAIRS: Nearly all types of engine and deck repairs. Both for internal combustion and turbine engines.
DRY DOCKS: No dry docks in port, only slipways for ships up to 240 ft.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally done by ship's crew but can also be done by stevedores.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: Tobacco: Quantity for each crew member is 20 cigarettes or 20 gm. tobacco and 20 leaves cigarette papers per day. Wine and/or Spirit: For crew members 1 bottle spirit or wine (0.75 litre) and for each passenger 0.25 litre.
REPATRIATION: Facilities for effecting crew changes are available.
AIRPORT: 4 km. from town. Nearest main airport is Bodo.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: Official holidays stated by Norwegian Government.
POLICE/AMBULANCE/FIRE: Tel. 70177.
TELEPHONES: Telephones on pier.
SERVICES: Compass adjusting.
IDENTIFICATION CARDS: Not required.
GENERAL: Svolvaer is the main port in Lofoten Island, and a typical fishing harbour. Radar, Decca, Radio and VHF service, and all other electrical services can be executed.
AUTHORITY: Vagan Havnevesen, P.O.Box 121, 8301 Svolvaer, Norway. *Tel:* 088-71011. *Cables:* Harbourmaster. *Contact:* Eilif Mosand, Harbour Master.

THAMSHAVN (Thamshamn): 63.20 N. 09.52 E.

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Stores List.
Bill of Lading.
3 Manifests.

PILOTAGE: 24 hours prior arrival Grip, Pilots can be ordered by cable to "Loskontoret, Kristiansund N." or by telephoning Kristiansund Pilot Office, tel. 74333 during office hours, and 74595 private. Pilots can also be ordered by radio through Kristiansund Radio or through Agents. Use Channel 16 for VHF., contact to Kristiansund Pilot Office, or pilot boat. Pilot boat equipped with radio telephone 2182, carries red and white flag during day and white and red light during night.
ANCHORAGES: Vessels should anchor 150 m. off piers where depth between 26 m. and 30 m. Anchoring between piers and buoys is not permitted.
MAX. SIZE: Depth at Import Quay 24 ft. MLW. Max. LOA 200 m. Max. Beam 23 m.
RADIO: Vessel should route ETA cables to Agent through Rogaland Radio or Aalesund Radio.
TUGS: No tugs needed or available.
BERTHING: Berthing only between 0700 hrs. and 2300 hrs.
CARGO HANDLING: 1 berth is specially equipped for handling of concentrates in bulk. Ships of 28 ft. draft can load at the pyrites quay. Loading by conveyor. There are no berths equipped for containers or Ro/Ro traffic, nor berths handling liquid chemicals or LPG carriers.
STEVEDORES: Arranged by Agent. No ETA to stevedores necessary.
MEDICAL: Hospital facilities available.
FRESH WATER: Available, delivered at berth.
FUEL: No fuel supplies available. Nearest port for such supplies is Trondheim.
CONSULS: Nearest consul available in Trondheim.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not compulsory, and this service is left to the discretion of the Master.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: Each crew member allowed 20 cigarettes on shore. When leaving ship, 200 cigarettes and 1 bottle of wine and 1 bottle of spirit permitted.
AIRPORT: Nearest airport, Vaernes, 62 miles N.E. Served by regular airlines with several flights per day.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: January 1st; Easter Holidays; Ascension Day; Whit Monday; 1st and 17th of May; December 25th and 26th.
POLICE/AMBULANCE/FIRE: All mentioned services obtained through Agent or by contacting local telephone exchange.
TELEPHONES: No facilities for placing telephones onboard ships.
SERVICES: Provisions available.
BANKS: Forretningsbanken A/S, 7300 Orkanger, Norway.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Not required.
AUTHORITY: (Private Wharves): Thamshavn Verk A/S and Co., P.O.Box 10, 7301 Orkanger, Norway. *Tel:* (074) 80400. *Telex:* 55628. *FAX:* (074) 81930. *Cables:* Thavn, Orkanger. *Contact:* Arne Lauritzsen, Shipping Manager.

TONSBERG: 59.16 N. 10.25 E.

DOCUMENTS:
Ship's Register.
Crew Lists.
Customs Manifest for each crew member (cigarettes, spirits, etc.).
Stores List. Cargo Papers. Health Certificate.

PILOTAGE: Sea Pilots obtainable from Ferder Pilot Station. Pilots normally take vessels to berth.
ANCHORAGES: Good anchorages at Byfjorden and Traela; anchorages for large vessels are found in Narverodbukten and Husoyflaker.
MAX. SIZE: 18 ft. draft for East entrance and 24 ft. draft for West entrance. Up to 30,000 tons in ballast.
RADIO: Cable ETA via Tjome Radio prior arrival.
TUGS: Available.
BRIDGE: 1 bascule bridge over East entrance. Working days open 0730 to 2000 hrs., holidays 0900 to 1700 hrs. Signal 1 long and 2 short to open bridge. Opening can also be arranged by VHF Channel 12. Horizontal clearance 88 ft., depth 22 ft.
MEDICAL: Medical, dental and hospital facilities available.
DENSITY: Occasionally brackish.
FRESH WATER: Available from hydrants at quays.
FUEL: Delivered by lorry.
CONSULS: (Vice-Consuls) France, Netherlands, Finland, Denmark, Sweden and Spain.
REPAIRS: All types of repairs available.
DRY DOCKS: At Kaldnesmek, a shipyard for total length of 515 ft. The shipyard is building ships up to about 50,000 d.w.t.
GANGWAY/DECK WATCHMEN: Available on request.
CUSTOMS ALLOWANCES: 200 cigarettes or tobacco and 1 bottle spirits, for each man.
REPATRIATION: Available by train from Tonsberg, plane and passenger lines from Oslo (about 100 km. from Tonsberg). Fairly good hotel accommodation in Tonsberg.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May); 17th May; Ascension Day; Whit Monday, Christmas (25th and 26th December). Mostly no working.
POLICE/AMBULANCE/FIRE: Police 13355; Ambulance 15388; Fire 16000.
TELEPHONE: Lines available on board vessel.
SERVICE: Mostly all services or equipment available from Tonsberg or Oslo. Inform prior arrival.
SHORE LEAVE: Crew members allowed to go ashore.
DELAYS: Ice during January and February, but port kept open by ice breakers.
AUTHORITY: Tonsberg Havnevesen, Nedre Langgate 36 B, N-3100 Tonsberg, Norway. *Tel:* 033-18000. *Cables:* Tonsberg Havnekontor. *FAX:* 033-18040. *Contact:* Reidar Sturod, Harbour Master.

TROMSO: 69.39 N. 18.58 E.

DOCUMENTS:
Trade Certificate.
Tonnage Certificate.
Certificate of Nationality.
Number of Crew and Passenger Lists.
Customs and Health Documents.
Manifest and Bills of Lading.

PILOTAGE: Telegraphic address of pilot station is "Tromso Pilot Station". Order latest 12 hours before arrival.
ANCHORAGES: Depth at anchorage is 15 m. – 35 m.
RESTRICTIONS: No restrictions on night entry.
RADIO: Harstad Radio, all VHF Channels.
VHF: Harbour Office Channel 16 and 12. 20 miles from town.
TUGS: If necessary, join vessel North or South end of harbour.
BERTHING: Ships can berth at quay, depths up to 34 ft., lengths of quay 100 m. – 300 m. New harbour at Breivika, equipped for container handling, truck 20 tons.
BRIDGES: Tromso Bridge, 60 m. wide, 36.5 m. high.
Sandnessundet Bridge, 120 m. wide, 41 m. high, min. dredged depth 10.4 m.
STEVEDORES: Ordered by Agent. No ETA to stevedores necessary.
MEDICAL: Master to advise by radio prior to arrival if medical attention required aboard. Hospitals in town (University).

TANKERS: There are 4 oil berths:
Norol – 20 ft. depth.
Mobil Oil – 21 ft. depth.
Esso – 31 ft. depth.
Shell – 39 ft. depth.

FRESH WATER: Most berths supplied by pipe-line.
FUEL: All grades available.
FIRE PRECAUTIONS: Ordinary restrictions.
CONSULS:

Belgium	81074–82417	Italy	85040-82604
Denmark	81148-82310	Netherlands	85040-82604
France	81144-85663	Sweden	85090-81336
Germany F.R.	81088-85665	U.K.	84050-82395

REPAIRS: All engine and instrument repairs. Shipbuilders' yard.
DRY DOCKS: 4 slipways 80 ft. – 222 ft. 1 small dock.
SURVEYORS: Lloyd's, N.V.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CUSTOMS ALLOWANCES: Crew members 200 cigarettes or 20 cigars or 100 gm. tobacco, and 1 bottle spirits.
AIRPORT: 5 km. from town.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: No work on New Year's Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 85080; Ambulance 81113 Fire 001. Port Officer 82537-75824, Mobile Tel. (090) 15728.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Not required. Seaman's Book.
REGULATIONS: Max. speed in port waters 6 knots. Ships size passing Tromso Bridge max. 7,000 tons displacement.
DELAYS: Minor delays only.
SERVICES: Compass adjusting, stores, etc.
AUTHORITY: Tromso Havnevesen, P.O.Box 392, Kirkegt. 1, 9001 Tromso, Norway. *Tel:* (083) 81191-83374. *FAX:* (083) 58529 *Contact:* Captain Knut A. Mortensen, Harbour Master.

TRONDHEIM: 63.25 N. 10.24 E. (See Plan)

DOCUMENTS: See "Bergen".
PILOTAGE: Pilotage is compulsory for all foreign flag ships. The pilo boats lie in Kristiansund Harbour, where a VHF watch is kept. The pilo station listens on Channel 16. When vessel is about 10 miles from Grip Lighthouse, contact should be made. Vessel will be given instructions as to where and how the Pilot will board. The Pilot boards from a 20 m long, white boat marked 'LOS', capable of doing 10 knots. In bad weathe vessel will be advised by VHF regarding Pilot procedures. The pilotage service is provided by the Norwegian Government. All the Pilots are recruited from the Norwegian Merchant Navy after they have obtained a 1st Mate's Licence.

Note: When approaching Trondheim from the North, ship will be i coastal trade with Pilot on board. Vessel will enter the Trondheim Fjord East of Halten Lighthouse.

RESTRICTIONS: The fjord is very deep and easy to enter. The channe is clear and ice-free throughout the year.

There are no speed limitations from Grip to Trondheim, bu consideration should be given to small ships and the narrow water.

MAX. SIZE: Controlled by depth at berth.
HEALTH: Call "Havne Kontoret" by radio for Free Pratique.
RADIO: Orlandet Radio (also VHF).
VHF: Harbour Pilot: Havne Kontoret, Tel: 520233 and 528015 or VHF Channel 16.
TUGS: Arranged by Agent.
BERTHING:
Pier 1: Ro/Ro Berth: Length 442 ft., depth 26 ft. New Quay: Lengt 460 ft., depth 26 ft.

River Harbour	Quays 1–10	Depth alongside up to 26 ft.
Outer Harbour	Quays 12–18	Depth alongside up to 18 ft.
Inner Harbour	Quays 19–24	Depth alongside up to 20 ft.
Ilha Pier	Quays 26–32	Depth alongside up to 34 ft.
Pier II	Quays A–D	Depth alongside up to 30 ft.
Ladehammer Quay	Length 760 ft.	Depth alongside up to 16.5 ft.
Strandvei Quay	Length 1190 ft.	Depth alongside up to 16.5 ft.
Transit Quay	Length 780 ft.	Depth alongside up to 29 ft.
Coal Crane Pier	Length 700 ft.	Depth alongside up to 23 ft.

BRIDGES: Skansen Bridge, Jernbanebrua, and Brattor Bridge divid Inner Harbour and Nidelven Bridge divides the river harbour.
STEVEDORES: Available.
MEDICAL: All facilities available.
TANKERS: Berth depth 9 m. – 12 m. Total length of quays 270 m. eas access. Mobil, Esso, Norsk Olje (Norol) and Shell installations.
Berth Approaches: The main effect on ship handling in the bert approaches comes from the current, which always sets along the jetty Current direction depends on the tide.
Berthing: All tankers usually berth with port side alongside and with tug on the hook. An anchor may be used under unfavourable conditions With wind Force 8 and above from an Easterly direction, vessels wi not be allowed to go alongside due to risk of damage to ship and jetty
FRESH WATER: By hose from quay.
FUEL: Available.
CONSULS:

Germany F.R.	Tel: 52 1120	U.K.	Tel: 96 8211
Greece	Tel: 29 771		

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: None.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirit, 1 bottle wine allowed each man.
REPATRIATION: Can be arranged.
AIRPORT: 35 km. away from port. Regular airlines.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas (2 days); Easter, (4 days); 17th May; Ascension Day; Whitsun, (2 days).
POLICE/AMBULANCE/FIRE: Police 514411 or 002; Ambulance 940800 or 003; Fire 521505 or 001.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
DEVELOPMENTS: Plans for reconstruction of Outer Basin with new bridges planned.
AUTHORITY: Trondheim Havn, Havnekontoret, Pirsenteret, 7005 Trondheim, Norway. *Tel:* 07-528015. *Contact:* Kurt Saether, Harbour Master.

VADSO: 70.04 N. 29.45 E. (See Plan)

DOCUMENTS:
Trade Certificate.
Tonnage Certificate.
Certificate of Nationality.
Number of Crew and Passenger Lists.
Customs and Health Documents.
Manifests and Bills of Lading.

PILOTAGE: Vessels approaching from sea and desiring Pilot should order at 24 hours' notice and confirm arrival to Pilot Office, Vadso, at 2 hours' notice. The advance order can be sent over Coastal Radio Station Vardo to Vadso Pilot/Harbour Master in Vadso, Tel: 085-51235 or 085-56904 (after 1500 hrs). Vadso Harbour Pilot on VHF Channel 16, working Channel 12.

The Harbour Pilot usually boards vessels within 0.5 miles of the harbour entrance, in fine weather conditions.

ANCHORAGE: West of harbour between Vadsoya and Lille-Vadsoy in depths of 16 m. – 20 m. The holding ground is good.
RADIO: Call via Vardo Coastal Radio Station.
VHF: Harbour Master's Office on Channel 16, working Channel 12, during working hours (0800 hrs. – 1500 hrs. local time).
TUGS: 1×6 ton bollard pull. Larger tugs can be ordered if necessary.
BERTHING: Traffic/Cargo Quay: Length 250 m., depth alongside 7.0 m.
Fishing Port: 4 quays, length 65 m. – 105 m. Depth alongside 5.5 m. – 6.5 m.
STEVEDORES: Vadso Skipsekspedisjon A/S, 9800 Vadso. Tel: 085-51395 or 085-51137, Telex: 64222, Fax: 085-51314. Stevedores arranged by vessel's Agent.
TANKERS: There is a discharge berth for tankers. Max. size 2,500 g.r.t. Length of jetty 125 m. Depth of water 18 ft.
FRESH WATER: Fresh water is available at the Traffic Quay, rate 100 t.p.h. Water is also available at the fishing port (Quay No. 1) at a rate of 30 t.p.h. at the fuel berth. No water barge available.
FUEL: Fuel oil, gas oil and diesel oil available direct from oil-installation of Norske Shell A/S at Vadsoya. Tel: 085-51869.
CONSULS: Finnish Vice-Consul in Vadso. Tel: 085-51225.
REPAIRS: Minor deck and engine repairs possible. No dry docks or slipways available.
GANGWAY/DECK WATCHMEN: Watchmen not necessary. If required, the Master may use ship's crew as gangway and deck watchmen.
CUSTOMS ALLOWANCES: Allowance for 10 days: 200 cigarettes or 200 gm. tobacco and 0.25 litres of spirits per crew member.
AIRPORT: Vadso Airport is 4 km. from the Traffic Quay and Vadso town centre. There are 4 flights a day to Oslo.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police, Tel: 085-51271 or 085-51593. Ambulance, Tel: 085-51691 or 085-51693 or 085-51692; Mobile Telephone, Tel: 090-16145 or 090-97200. Fire, Tel: 085-51122.
SERVICES: Ship chandlers are available for supply of provisions and arranging laundry. If service required for vessels instruments, this can be arranged by contacting Varanger Skipselektronikk A/S, Tel: 085-52299.
AUTHORITY: Vadso Havnevesen, P.O.Box 43, 9801 Vadso, Norway. *Tel:* 085-51235. *Telex:* 085-6422. *FAX:* 085-51314. *Contact:* Kare Roald Nilsen, Port Director (Private Tel. 085-56904).

NOTES

Please also advise Shipping Guides Ltd.

Sultanate of Oman

GENERAL:

ANCHORING:
Notice to Mariners No. 1/84:

All vessels anchoring South of Latitude 24° parallel and within the territorial waters of Sultanate of Oman (12 miles), for the purpose of waiting for orders or in order to carry out engine repairs, should anchor within Lat. 23° 40′ N., and Long. 58° 10′ E. and Long. 58° 27′ E.

No vessel shall anchor in any other part of Mina Al Fahal except when actually loading/discharging on SBM buoys. All cargo ships should call at Mina Qaboos when handling cargo or at anchorage West of Fahal.

Signed: Superintendent General Maritime and Ports Affairs.

Notice: Received from ship's Agent.

Vessels can anchor within Lat. 23° 53′ N. and the coastline of Oman and between the meridians of Long. 58° 10′ E. and Long. 58° 28.5′ E., which is West of Fahal Island. On arrival contact Mina Qaboos Port Control on VHF Channel 16 or 14 for reporting arrival and request anchoring position giving vessel's particulars. Vessel not permitted to lower life-boat or unauthorised boats to lie alongside. Agent requires 5 copies Crew List, 1 Stores List, 1 Crew Declaration List and 1 Vaccination List. Distance to anchorage being such we have to commute by tugboat hired at O.R. 55/– per hour or part thereof. Launch service possible only during daylight hours and weather permitting. Following particulars of vessel should be furnished in advance:

1. Flag/port of registry.
2. D.w.t./g.r.t./n.r.t./call sign.
3. Ports of call including last port and next port.
4. Nationality of Master and Crew.
5. Whether any dangerous/hazardous cargo on board.

Vessels on arrival should be cleared through Immigration, Customs and Health by an Agent.

MINA-AL-FAHAL: 23.39 N. 58.32 E. (See Plan)

DOCUMENTS: Required on arrival (provided by vessel):
6 copies Crew List (2 copies required by Pilot).
2 copies of Vaccination List.
2 copies Stores List.
1 copy Bonded Stores List.
1 copy Personal Effects List.

All other necessary papers will be supplied on arrival by the Berthing Master.

P.D.O. employ the "Early Departure Procedure" for completion of cargo documentation.

PILOTAGE: The Berthing Master will board incoming tankers off Fahal Fairway Buoy, as directed by VHF. Tanker should arrive at this position, make a good lee, and take way off.

Harbour steaming is deemed to start at this point. The port side derrick should be rigged and crew standing by at the derrick ready to lift the mooring equipment from the launch when the Berthing Master comes on board.

The pilot access should be in good condition, clean and ready on the lee side. Tankers of 70,000 tons Summer deadweight and above in ballast or partly loaded condition should have either a pilot hoist or a combination of accommodation ladder and pilot ladder rigged.

The Berthing Master's Assistant, acting as shore representative, stays on board vessels at the SBMs. Vessels are requested to provide him with proper accommodation and meals. As Oman is a Muslim country the appropriate type of food, i.e. no pork or pork products, should be supplied. Any failure to comply with this request may result in delays to the vessel and complications with the local authorities.

Also see "Ship Supply Service".

ANCHORAGES: *Tankers:* Before anchoring tankers should contact Fahal Control on VHF Channel 12 for a designated anchoring position.

In all cases tankers are required to anchor at least 2 miles West of Fahal Island and at least 2 miles clear of the Omani coastline.

Ships proceeding to an anchorage within the Port Area should pass North of Fahal Island and under no circumstances enter the prohibited area unless instructed to or accompanied by a Mina al Fahal Berthing Master.

RESTRICTIONS: Open sea approaches.

All tankers calling at Mina-al-Fahal must be equipped with inert gas system in good working order and arrive with all cargo tanks fully inerted.

MAX. SIZE: No length limitation. Draft up to 96 ft. Tankers up to 600,000 tonnes loaded displacement can be accommodated.

RADIO/VHF: Initial ETA should be sent 72 hours before arrival and confirmed 48 hours and 24 hours before arrival. ETA messages should be sent to "Petromar Muscat" via Muscat Radio (call sign A4M). If no contact can be established with Muscat Radio, the message should be sent through an alternative coast station such as Bahrain Radio.

The message should contain the following information.

(*a*) ETA in local time and date in plain language to avoid multilation.
(*b*) Whether there is any sickness on board.
(*c*) Whether any crew require medical treatment and very briefly the nature of the complaint.
(*d*) Last port of call.
(*e*) Quantity of cargo required.
(*f*) Quantity of bunkers required.
(*g*) Time required for deballasting prior to loading.
(*h*) Maximum loading rate.
(*i*) Maximum draft on arrival.
(*j*) Maximum draft on departure.
(*k*) Type, number and SWL of bow stoppers for securing SBM mooring chains.

VHF communications should be established as soon as possible calling Fahal Control on Channel 12. The range is about 80 miles to the Northward but only 20 miles to Eastwards because of screening by mountains. Working Channel is Channel 12 and is manned 24 hours a day by either Fahal Control or Fahal Pilots. The station may call vessels on Channel 16, although a permanent watch on Channel 16 will *not* be maintained. The mooring launches are also equipped with Channels 16 and 12 but mooring operations are carried out using UHF radio sets.

HEALTH: When advising ETA, include in message whether any sickness on board.

Port Health Officer, Immigration and Customs board with Agent; Port Officer will carry out any necessary vaccinations. 'Q' flag to be flown until Pratique granted.

TUGS: None available and not required.

BERTH DESCRIPTION: 3 single buoy moorings with floating hose strings. SBM lights are Iso.W.

SBM No. I: Crude export/residue export.

This buoy is served by 2×30 in. submarine crude lines each 10,300 ft. long.

The floating crude hoses are 2 × 870 ft. long × 20 in. reduced to 16 in. for manifold connection. Same hoses are used for fuel oil imports, these lines having a displacement connection ashore for emptying the crude content.

Max. sailing draft allowed at this SBM is 64 ft. (19.5 m.).

SBM No. II: For crude and bunker export and is served by 1×40 in. submarine crude line and 2×10 in. submarine fuel oil lines each 13,980 ft. long. The floating crude hoses are approx. 2×990 ft. long×20 in. reduced to 16 in. at manifold connection. Bunkering is by a single 12 in. floating hose. Maximum size ship 600,000 tonnes loaded displacement and max. draft of 96 ft. (29.26 m.).

SBM No. III: Products imports only (Gas Oil, Mogas, Jet-A1) served by 2×10 in. submarine hoses, length 8,003 ft. Floating hoses are 660 ft. in length with 8 in. manifold connections. Max. size of ship is 125,000 tonnes loaded displacement and max. sailing draft allowed at this SBM is 46 ft. (14.0 m.).

Loading/Discharge Rates:

Crude oil export by gravity only; maximum rate 6,500 t.p.h.

Long residue export by gravity only; maximum rate 2,500 t.p.h. (SBM 1).

Bunker fuel export by pump; maximum rate 500 t.p.h.

Fuel oil import (SBM 1); max. rate 3,000 t.p.h. (Max. B.P. 10 kg./sq. cm.)

White product import (SBM 3); maximum rate 500 t.p.h.

White product export (SBM 3); maximum rate 350 t.p.h.

Coastal Tanker Mooring:

There are also 2 inshore berths for coastal tankers.

The maximum draft permissible is 4.5 m. Vessels moor using both anchors forward and ropes to a buoy on each quarter. The hose is usually connected to the vessel's stern discharge line.

Approximate density of water: 1026.

Coastal tankers should appraoch the berths from Westward of Fahal Island.

BERTHING: Vessels berth head to buoy. Tankers berthing at SBM must be fitted with "Tongue Type" bow stoppers for mooring to 3 in. chain. Connection at SBM-III is to two 12 in. plaited nylon lines 150 ft. long; at SBM-I and SBM-II to two 15 in. plaited nylon lines 150 ft. long. A suitable messenger rope should be provided by ship. An Assistant Berthing/Loading Master will advise in all mooring and hose connection operations which are carried out by ship's staff.

HOSE CONNECTIONS: Hose connections will be made on the port side amidships. Crude loading ships should fit 2 × 16 in. reducers. The derrick be rigged with equipment in good condition and have a minimum SWL of:

5 tonnes for vessels up to 65,000 Tonnes Loaded Displacement.

7 tonnes for vessels 65,000 to 230,000 Tonnes Loaded Displacement.

10 tonnes for vessels over 230,000 Tonnes Loaded Displacement.

Hose connection and disconnection is carried out by the ship's crew with advice from the Berthing Master's Assistant.

LOADING: Every 2 hours ship-shore check has to be made via the Loading Master.

BALLAST: No facilities for reception of dirty ballast.

Tankers should arrive with clean ballast, lines and pumps and no oil should be released into the sea.

MEDICAL: Medical and dental treatment can be arranged via local agent. Radio advise with details 24 hours before arrival. Patients are taken ashore through Mina Qaboos.

DENSITY: Approximately 1026.

FRESH WATER/FUEL: Fresh water and gas oil available by barge "Nizwa", arranged via vessel's agent. 24 hours notice required. Barge capacity, fresh water 280 tonnes, minimum quantity 100 tonnes. Gas oil 270 tonnes.

A wide range of marine lubricants is available and is supplied in drums. At least 24 hours' notice is required for supplying lubricants.

Also see "Shipmaster's Report".

REPATRIATION: Crew changes are possible at Mina-al-Fahal provided the Agent receives at least 7 days' notice giving full particulars of embarking/disembarking crew, such as full name, nationality, place and date of birth, Passport/Seaman's Book number with date and place of issue and expiry date, and also destination for repatriation of disembarking crew members, to enable Agents to obtain necessary permits (visas) and arrange air passages.

Notice for crew change to be given as soon as possible as the issue of N.O.C's. (Non Objection Certificates) can take up to 7 days.

N.B. If the information required as above is received on a Thursday or a day preceding a holiday, the time mentioned of 72 hours will not be sufficient as no permits can be obtained from the Authorities during holidays.

REPAIRS: It is not permitted to immobilise main engines whilst moored to the SBMs; under no circumstances should the propeller be turned in the ahead direction.

TIME: GMT plus 4 hours all year round.
SERVICES: There are 24-hour laundry facilities. Stores (fresh, frozen and bonded) are available, but at least 24 hours notice is required.
SHORE LEAVE: Not possible.
SHIP SUPPLY SERVICE: The Port of Mina al Fahal is operated by Petroleum Development Oman, and they have 3 launches, 2 of which are on 24 hours' duty every day. These launches would assist in a marine emergency, but are normally used for ships loading at Mina al Fahal. Mina al Fahal Pilots keep watch on VHF Channel 12.
NOTICES: *Circular No. 9/85:* Prohibited Area Off Mina Al Fahal.

All vessels leaving or entering Mina Qaboos should stay well clear of the prohibited area off Mina Al Fahal.

Masters are required to pass at least 1 nautical mile to the Eastward of the Mina Al Fahal Fairway Buoy on arrival and departure.

Charts affected: B.A. 3522, 2851, 2869.

Signed: Acting Superintendent General, Maritime and Ports Affairs.
GENERAL: *Liquor.* Trading in liquor strictly prohibited and no alcoholic drink should be offered to Arab nationals.

SHIPMASTER'S REPORT: October 1987.
Fresh Water: Available by waterboat at a cost of Rial 2/ton. Minimum quantity 50 tons, maximum 250 tons, to be ordered 24 hours beforehand if possible. No transportation cost charged. Delivery possible 7 days a week. The quality of the water is very good.
Fuel: Gas oil is available by barge. Minimum order, 50 tons.

AUTHORITY: Petroleum Development Oman L.L.C., P.O.Box 81, Muscat, Sultanate of Oman. *Tel:* 677230, 677231, 677232. *Telex:* 5212 On Muscat. *Cables:* Petro Muscat. *Contact:* Captain P. Branton, Port Captain, or Duty Berthing Master.

AGENT: See "Port Qaboos" (Mutrah).

PORT QABOOS (Mutrah): 23.37 N. 58.34 E. (See Plan)

Muscat has ceased to be a commercial port and instead vessels now call at Port Qaboos.
PORT LIMITS: From the level of HWS at a point near Ras Kab at Long. 58° 33′ 12″ East on a line due North to Lat. 23° 41′ North;
Thence due East to Long. 58° 35′ 36″ East;
Thence due South to Jazirat Muscat;
Thence in a generally Southerly direction by the line of HW on the Western side of Jazirat Muscat to Pinnacle Rock;
Thence S.W. to the Easternmost point of Siraz al Gharbiyah;
Thence by the line of HWS to the point of commencement.
DOCUMENTS:
Required on Arrival:
Clearance from Last Port.
4 copies Crew List.
1 copy Maritime Health Declaration form with ports of call from commencement of voyage.
3 copies of Crew Personal Declaration List.
3 copies of Ship's Bonded Stores List.
2 copies Vaccination List.
6 copies Passenger List.
3 copies In-Transit Passenger List.
To be Airmailed in Advance:
3 copies Hatch List, and other details of vessel (Flag, Draft, LOA, Last Port, Next Port, G.R.T., etc.).
3 Hazardous Cargo Lists.
3 Heavy Lift Lists.
5 copies Cargo Stowage Plans.
9 copies Cargo Manifest.
1 copy Freight Manifest.
2 copies Bills of Lading.
Customs and Immigration Requirements for Vessels Entering and Leaving Ports: 24 hours' advance notice, Cargo Manifest and Passenger List, Crew Personal Declaration. Cargo vessel is allowed to enter and complete Immigration formalities alongside except if ordered otherwise.
PILOTAGE: Compulsory for vessels other than exempted vessels as defined in Port Rules and Regulations and Port Tariff.

Arrival notice requirements: ETA, LOA, draft 72 hours, 48 hours, 24 hours before arrival. Berthing and unberthing – 24 hours a day.
ANCHORAGES: Vessels should anchor Northwest of the breakwater within the area enclosed by the following perimeters:
1. A line extending 060° (T) from Port Qaboos Breakwater.
2. The Westernmost extremity of Port Qaboos.
3. A line extending 325° (T) from Muscat Forward Leading Light after crossing perimeter (1).

All areas described above are clearly defined in the current edition Admiralty Chart No. 2869.
Prohibited Anchorage Area: The area enclosed by the following perimeters is a Prohibited Anchorage Area:

North Boundary:	The parallel of Lat. 23° 41′ 00″ N.
East Boundary:	The meridian of Long. 58° 36′ 00″ E.
South Boundary:	Sultanate of Oman coastline.
West Boundary:	Muscat Forward Leading Light bearing 145° (T) from seaward and Port Qaboos Breakwater Light bearing 240° (T) from seaward.

Severe penalties are imposed for vessels infringing the above prohibited area.

MAX. SIZE: Depth of entrance channel 34 ft. at LAT. Also see "Berthing".
Circular: Issued by the Harbour Master.

As you are aware in the past the Port has limited the length of vessels to 750 ft. in order to maintain its high standard of safety.

Recently we have been approached by some Shipping Agents requesting us to admit ships considerably over 750 ft. with a draft of 30 ft.

The port is keen to attract more ships, if possible, with greater lengths and drafts than currently permitted. Upgrading of facilities is underway although will take some time to complete.

Meanwhile, on an experimental basis, ships up to 785 ft., after suitability clearance from Harbour Master's Department, will be permitted to use the Port. Agents must apply for initial suitability clearance for every vessel over 750 ft. and up to 785 ft. (240 m.) in length, under their Agency.

For your guidance only, vessels with good engines and extra manoeuvrability powers of bow thrust and stern thrust will be given clearance.
HEALTH: International Health Regulations apply. Pratique may be granted by the Port Health on receipt of following information:
1. All Cholera vaccinations valid.
2. Valid Derat Certificate.
3. No sickness on board.
4. No sickness at last Port.
5. Country of origin and date of departure.

Port Health normally board alongside and issue Health Form. They require:
1 Crew List.
1 Vaccination List.
Valid Derat Certificate.
Last Port Clearance.
APPROACH: Port Qaboos has a very open approach with a deep water anchorage. The hilly coast is radar conspicuous. Lights on Fahal Is., Jazirat Muscat and the Breakwater make night navigation fairly simple. There is no appreciable current once inside the bay.

Shipmasters calling at Mina Qaboos are advised that vessels navigating under their charge and approaching Mina Qaboos whether from East or West must first pass 5 cables Eastwards of Mina Al-Fahal Fairway Buoy before making final approach to Mina Qaboos Anchorage or Breakwater Head for picking up Pilot.

In no case should they keep close-in to Khawr Muscat Entrance or remain waiting in the Prohibited Anchorage Area.
RADIO: Port Control can be contacted on VHF Channel 16 or 14. 24 hour operation, including Fridays and holidays.
Notice of Arrival: Vessels should advise their Agents of their ETA, LOA and draft. The Agents will in turn inform Port Services Corporation Ltd. ETA from Masters of vessels should also be cabled direct to Harbour Master, Port Services Corporation Ltd. (Telex No. 5233 ON) 72, 48 and 24 hours in advance of arrival.

Three hours prior to arrival off the port, vessels should contact Mina Qaboos Signal Station on VHF Channel 16 and working Channel 14 and request berthing instructions, etc.
VHF: Muscat Radio on Channels 1, 3, 4, 16, 26 and 27.
Also see "Radio".
TUGS: Six tugs available. Two new Voith Schneider propulsion tugs of 3,000 h.p. each and four twin screw tugs, 1,400 h.p., 1,600 h.p., 1,900 h.p. and 2,400 h.p. Tugs normally join vessel 1 mile N.N.W. off breakwater light.
BERTHING: There are 9 deep water berths, 3 coaster berths and 1 berth for launches. The berths vary in length from 76 m. to 228 m. and are sheltered by a breakwater on one side and cliffs on the other.

Supporting the berths are 9 modern transit sheds facing broad uncluttered aprons, providing both covered and open storage space. Two berths front directly on to large open areas ideally suited for rapid discharge of containers and oversized units requiring direct delivery.

Berth No.	Length (ft.)	(m.)	Depth at LAT (ft.)	(m.)	Max. draft (ft.)
1	600	183	41	12.5	34
2	600	183	41	12.5	34
3	750	228	32	9.8	31.5
4	600	183	30	9.1	30
5	600	183	30	9.1	30
6	650	198	30	9.1	30
7	600	183	30	9.1	29.5
8	600	183	30	9.1	28
9	450	137	13	4.0	13
10	500	152	13	4.0	13
11	600	183	30	9.1	30
12	250	76	10	3.1	10
13	500	152	7	2.2	7

Berths No. 1 and 2, 4, and 5, 7 and 8 are "in line", therefore larger vessels can occupy part of a second berth when necessary.
Transit Sheds and Cold Storage Facilities: 9 transit sheds and 1 cold store adjacent to the port, capacity of cold store 3,000 tonnes plus cool rooms, blasting facility and ice making plant. Facilities for electrical connection of refrigerated containers with Kheops and Wilco Plugs.
SPECIAL HANDLING FACILITIES: Grain Silos: Capacity 120,000 tons supplied by quayside underground conveyor from the berth. In conjunction, 2 km. from the port, a highly automated mill produces various flour and animal feed products for local consumption and export.

The port has modern container and Ro-Ro handling equipment, including a Mafi-type roll trailer system, backed up by 8×35 ton forklifts, and 2×25 ton Ro-Ro forklifts.

The container terminal is equipped with 2 highly sophisticated 35 ton gantry cranes supported by 5 heavy duty forklifts. The terminal has a large storage yard to accommodate about 2,200 TEUs.

Containers are also accepted from self-sufficient vessels. Containers are transported by trailers and handled in stacking area by mobile crane or forklift truck. Reliance Mercury Tractors of 160 b.h.p. with Mafi-type trailers are available for Ro/Ro vessels. LASH and BACAT service.

CRANES: 2 gantry cranes (IHI) – 35 tons under spreader at Berths No. 4 and 5. 12 mobile cranes 3 tons – 25 tons (rated) and 1 mobile crane 70 tons and 1 mobile crane 150 tons, 57 fork lift trucks 3,000 lb. – 10,000 lb., 8 fork lifts 35 tons and 2 fork lift trucks 25 tons, 7 tractors and 36 trailers available. Available mid-1990: 1×15 ton crane, 1×35 ton container handling forklift and 1 empty container handler.

There are no fixed quay cranes.

STEVEDORES: The labour position is fair, except in the date-picking season (June to August).

Landing rates: Bagged cargo 500/700 tons (3 gangs, 16 hours); general cargo 400/600 tons (3 gangs, 16 hours); timber 700/1,000 tons (3 gangs, 16 hours) during fair weather provided no congestion on jetty and if cargo stowed in more than 3 hatches.

Working Hours – Conventional:

1st Shift Saturday-Wednesday:	0700 – 1500 hrs. (with half-hour break, which will be adjusted amongst the gangs).
Thursday:	0700 – 1400 hrs. (without any break).
	1400 – 1900 hrs. (overtime if requested).
2nd Shift Saturday-Wednesday:	1500 – 2300 hrs. (with half-hour break, which will be adjusted amongst the gangs).
	2300 – 0300 hrs. (overtime if required).
Thursday:	No 2nd shift.
Fridays/Public Holidays:	Overtime (subject to availability of labour).

Container Terminal:

Day Shift Saturday-Wednesday:	0700 – 1500 hrs. (with half-hour break, which will be adjusted amongst the gangs).
	1500 – 1900 hrs. (overtime if required).
Thursday:	0700 – 1400 hrs. (without any break).
	1400 – 1900 hrs. (overtime if required).
Night Shift Saturday-Thursday:	2000 – 0600 hrs. (with half-hour break, which will be adjusted amongst the gangs).
Fridays/Public Holidays:	Overtime (subject to the confirmed arrival of container vessels).

Deliveries of Cargo – Conventional:

Saturday-Wednesday:	0700 – 1500 hrs. 1st Shift.
	1500 – 2300 hrs. 2nd Shift.
Thursday:	0700 – 1400 hrs. 1st Shift.

Container Terminal:

Saturday-Thursday:	0700 – 1900 hrs.

Note: Direct delivery of cargo will be as usual.

MEDICAL: Port Clinic and Government hospitals available.

FRESH WATER: Available at all berths and at the anchorage, 72 hours' notice required for barge supply.

FUEL: Gas oil available at Berths No. 4, 5, 6 and 8 and at the anchorage by bunker barge owned by the port, 72 hours' notice required. Other fuels can be supplied by arrangement with Owner's Agent. Marine lubricating oils available.

CONSULS: Republic of China, Denmark, Egypt, France, Germany F.R., India, Iran, Iraq, Japan, Jordan, Korea, Kuwait, Norway, Pakistan, Qatar, Somali Democratic Republic, Sudan, U.A.E., U.K., U.S.A.

GANGWAY/DECK WATCHMEN: To be provided by vessel.

REPATRIATION: Is now possible if Masters give full particulars of the seamen to be repatriated by telegram at least 72 hours earlier. This also applies to embarking crew members. The 72 hours' notice is not enough in the case of a Friday, or any other holiday which falls in between.

Also see "Laying-Up".

CUSTOMS ALLOWANCES: Vessels will no longer be permitted to have free use of their stores (Tobacco goods, Alcohol, etc.) whilst in the confines of the port.

On arrival in port, an allowance will be given by the Customs Boarding Officer and the surplus stores will then be placed under Customs Seal.

The allowance will be:

200 cigarettes or 50 cigars or 250 gm. tobacco.
One bottle (1 litre) alcoholic spirit.
One bottle (1 litre) wine.
24 cans beer.
Various used personal effects such as radios, cameras, etc.

Should a vessel remain in port for more than 4 days, an issue of stores will be given upon request being made to the Customs Authorities.

These Regulations also apply to ships at the Anchorage.

SERVICES: Fresh and dry provisions from chandler. Limited availability of ship and engine room stores. Radio, radar and electrical repairs possible.

SHORE LEAVE: Crews are only allowed ashore between the hours of 0700 – 1900.

GENERAL:

Ships Arriving at Port Qaboos:

Ships may approach Port Qaboos without a Pilot as far as the perimeter of the limits of the port. No ship shall proceed through the entrance to or from the port without the permission of the President or the Harbour Master.

All ships, other than expected ships, shall be under the pilotage of a Pilot appointed by the Port Authority when underway within the limits of the port. The ship shall have rigged and ready for use a pilot ladder of modern pattern, in good repair and provided with reliable manropes. Such pilot ladder shall be well illuminated between dusk and daybreak.

No ship shall enter or leave Port Qaboos unless her draft marks are correctly shown and clearly visible.

Every ship shall at all times when entering, navigating in or leaving the port have both anchors ready for immediate use.

Ships proceeding to berth at the port premises shall have no list and shall be trimmed upright.

Before entering Port Qaboos every ship shall hoist the following flags The ship's signal letters. The "Q" flag, International Code, unless the Port Health Officer has previously given Pratique. The "H" flag International Code, denoting that a Pilot is on board. The "I" flag International Code, if the ship is carrying passengers.

Until Pratique has been granted communication between ship and shore shall be made by: Flag hoist, using the International Code o Signals, Morse Code, by signal light, or radio-telephone on approved frequencies, which will be promulgated for use for such purpose.

Conduct: The Master or Owner of every ship shall be held directl responsible for the proper conduct and behaviour of the crew of suc ship while in the port and for strict observance of the laws of the Sultanate of Oman, particularly those laws concerning the sale, transference o consumption of any narcotic or alcoholic or intoxicating drink of any kind

Flags: Every merchant ship within Port Qaboos between the hours o sunrise and sunset shall fly her national flag and the national flag of the Sultanate of Oman.

Repairs: The Master of any ship wishing to carry out major engine repair or adjustments, which will affect the mobility of the ship whilst in the por shall make written application to the Harbour Master to do so. Th Harbour Master shall give his permission or otherwise in writing.

Safety of Ships and Persons: The Master of every ship anchored o moored in the port or berthed at the port premises shall, unless th Harbour Master concede some relaxation in this port rule, at all time retain on board sufficient crew to work or move the ship.

Ships Berthed or Anchored Within Port Limits: No person shall swim from any ship berthed at the port premises.

No person shall make fast or anchor any country craft or boat of an kind at any quay, wharf, pier or landing place or at any steps provide thereat in the port premises except with the prior permission of th Harbour Master.

Pollution: It shall be unlawful for any person, or corporation to deposi place, or discharge into the waterways of Port Qaboos, either directl or through private or public sewers, any sanitary sewage, butcher's offa garbage, dead animals, gaseous liquid or solid matter, oil, gasoline residium of gas, calcium chloride, trade waste, tar or refuse or any othe matter, which is capable of producing floating matter or scum on th surface of the water, sediment in the bottom of the waterways, or th odours and gases of putrefaction.

Vessels discharging ballast, oil from bilges or tanks or solid matte into the waters of Port Qaboos will be reported to the Pollution Contro Officer and be subject to a fine of R.O. 500.00 for each offence, impose by and payable to Port Qaboos. Such fine shall be in addition to an other fines, which may be levied for the same offence by the Sultanat of Oman.

Hygiene: The port provides garbage bins at various points for use b vessels. The use of these bins is compulsory and a charge for this facilit will be made whilst the vessel is alongside.

Rat Guards: The use of rat guards on all mooring ropes and wires i compulsory whilst vessels are alongside. Vessels without their own ra guards will be required to hire from the Corporation.

Ships Leaving Port Qaboos: Port Rules applying to ships arriving a Port Qaboos apply equally, in so far as they are relevant, to ships leavin the port.

Merchant ships shall fly the "P" flag International Code, for 24 hour before sailing from the port.

The Port Authority may refuse to give the Master of any ship Outwar Clearance, unless and until all charges due in respect of the ship an any penalties, to which the ship or her Master are due, have been pai or secured to the satisfaction of the Port Authority.

Transhipment: Due to the advantageous geographical location of Min Qaboos outside the War Zone it provides very appropriate transhipmen base for most shipping companies. Many international shipping lines ar using Mina Qaboos as a base for their transhipment operation to th Arabian Gulf, Karachi and the Indian sub-continent.

Working of Cargo at Port Qaboos: Ships may be permitted to discharg or load cargo in the anchorage if a berth is not available at the por premises or if in the opinion of the Port Authority the ship's cargo i more suitable for handling to or from barges or lighters.

The Master or Owner of any ship shall be held responsible for an loss or damage arising from careless or improper slinging of carg onboard such ship.

Any cargo, cargo-handling equipment or ship's gear, which may b dropped overboard shall at once be reported by the Master or appointe Officer to the Port Authority and shall be immediately recovered by th ship's personnel if it is reasonably possible so to do. Failing this, it ma be recovered by the Port Authority at the ship's expense. The Por Authority shall not be responsible for any damage to or loss of cargo equipment or gear so recovered.

The Master of every ship discharging or loading cargo in the por whether at anchor or berthed alongside shall provide drinking water fo all cargo handling labour and all other persons appointed and directe to be on board such ship in connection with the discharge or loading o cargo.

If the labour or transport allocated or engaged for the purpose o landing, loading or transhipping cargo from or to any ship is not full continuously employed by reason of a fault or action attributable to suc ship, the expenses incurred thereby shall be paid by such ship.

In the event of any accumulation of cargo or goods upon the quay o jetty or in a lighter for any cause that may appear reasonable to them the Port Authority may require the ship discharging such cargo or good to suspend or reduce the rate of discharge of such cargo or goods.

The Port Authority may refuse to permit cargo to be landed from an ship until suitable shed or open storage space or other accommodation is or becomes available for such cargo.

Delivery of cargo or goods shall not be deemed to have been made to the Port Authority until such cargo or goods have been brought into the port premises and until the Port Authority accepted delivery of such cargo or goods and have issued an official receipt therefor to the Master of the ship discharging such cargo or goods or to the ship's Agent or to any other person duly authorised so to do, conveying such cargo or goods to the port premises.

LAYING-UP: Vessels can anchor within the limit Lat. 23° 53′ N. and the coastline of Oman and between the parallels of Long. 58° 10′ E. and 58° 28.5′ E.

Port dues of 3 Baisa per g.r.t. per period of 7 days or part thereof is payable for lay-up anchorage at West of Fahal. Vessels on arrival should be cleared through Immigration, Customs and Health by an appointed Agent. Distance being such that Agents have to commute by hired tugboat (minimum 4 hours required for a trip and back). Launch service permitted only during daylight hours and weather permitting.

No vessel shall temporarily lay-up in the "Waiting Anchorage" for more than 3 months without the permission of the Harbour Master, Mina Qaboos.

No vessel shall temporarily lay-up without its full complement of crew and sufficient power to handle any emergency.

Crew Change: While anchored within Omani Territorial Waters crew changes can be effected through Mina Qaboos only and not from any other neighbouring country. Vessels are also not permitted to lower lifeboat or allow unauthorised boats to lie alongside.

For purpose of effecting crew changes Passport or Seaman Book particulars should be furnished in advance for obtaining Visas for crew to join/leave vessel. Issuance of Visas will take minimum 7-10 days. Particulars required are as follows:

Full Name.
Nationality.
Passport or Seaman Book Number.
Date of Issue.
Date of Expiry.

And only after obtaining confirmation that Visas are obtained can crew be sent to Muscat failing which they will not be permitted to land and will be deported at Owner's expense.

Mail/spare parts/provisions, etc. can be delivered to vessels at anchorage. Invoices should be attached along with spare parts arriving by air and consigned to: Master (vessel's name), c/o Agent, "Ship's Spares in Transit".

SHIPMASTER'S REPORT: January 1986.

Vessel awaiting orders: Authorities require vessel to drift or anchor at least 12 miles from coast. Good anchorage 12.5 miles to N.W. of the port using 7 shackles.

SHIPMASTER'S REPORT: December 1988.

Pilotage: Inward pilot boards from a tug. The pilot ladder must be 2.0 m. from the water. According to local Regulations, the vessel's freeboard should not be greater than 8.0 m. if pilot ladder only is to be utilised. If the freeboard is greater than 8.0 m., the gangway should be rigged in conjunction with the pilot ladder.

Shore Leave: If ship's crew are granted permission to leave the port area (this permission is not automatically given) in order to visit the town or city, this permission is restricted to the hours between 0700 hrs. – 1900 hrs. These times are strictly enforced.

Each individual officer and rating must present himself, with passport, at the Immigration/Police desk in the Port Quarantine Office, for written approval to issue a pass. This initial authority can cover more than one person.

The Authority for Approval is then taken to a Marine Police Station at the main gate, where the Authority of Approval and passports are handed over and the crew member is given a Royal Oman Police Coast Guard Pass to complete. This pass is retained by the crew member until the day of departure and must be stamped and signed at the main gate, each day before leaving the port. All passports are retained by the police until such time as an individual makes his final return to the vessel from ashore, at which time the pass is exchanged for the passport.

If individuals are unable to leave the vessel to exchange their passports for the Gate Passes the agent will usually do this on their behalf.

The wearing of shorts of any description (i.e. showing bare legs) is not permitted outside the port enclosure.

Smoking is not permitted in any area where cargo is worked either ashore or aboard vessels.

Crew members are not permitted to wear "Seaman's Knives" whilst on deck.

Stevedores: The official cargo working hours are 0700 hrs. – 1500 hrs., with a 1 hour break for a meal, not always taken, and 1500 hrs. – 2300 hrs.

Telephones: Not placed on board.

Departure Pilotage: The Pilot requires 2 hours Notice of Departure via the vessel's agent. Vessel is to call pilot 30 minutes prior to departure on VHF Channel 16/14. At this time the pilot will wish to know the vessel's Outward Customs Clearance Number.

AUTHORITY: Port Services Corporation S.A.O.G., P.O.Box 133, Muscat, Sultanate of Oman. *Tel:* 714001-7. *Telex:* 5203 Opsco On, 5233 Mqaboos On. *FAX:* 714007. *Contact:* Awad Bin Salim Al Shanfari, The President. Captain Ahmed Said Al Busaidy, Harbour Master. Saud Bin Ahmed Al Nahary, Operations Manager

AGENT: Gulf Agency Co. (Oman) L.L.C., P.O.Box 3740, Ruwi, Sultanate of Oman. Tel: Mutrah (968) 707000 (5 lines). After Hours 535802. Telex: 3664. ("Gacship ON"). Fax: 703609. Cables: "Confidence", Muscat. VHF Channel 16. Call sign "Confidence Muscat".

PORT RAYSUT (Salalah): 16.56 N. 54.01 E. (See Plan)

PORT LIMITS: Going on the level of HW, the water limits of the port are bounded by:

1. Crossing of coastline with Long. 54° 04′ E.
2. Then in the True South direction to Lat. 16° 55′ N.
3. And to the West the limits, follows the coastline interception with Lat. 16° 55′ N., and along the coast to the starting point.

DOCUMENTS:

5 copies of Crew Lists and Passenger List (if any).
2 copies of List of Personal Effects of crew and passengers.
2 copies of Ship's Stores List.
Valid Vaccination Certificate.
Valid Derat Certificate.
Last Port of Clearance.
Customs Documents.
5 copies of Manifest.
Ship's Papers and Ship's Certificates.
2 copies of Stowage Plans.
2 copies of Hatch List.
2 copies of List of Dangerous/Hazardous Cargo for Discharge.
2 copies of List of Dangerous/Hazardous Cargo in Transit.
2 copies of List of Heavy Cargo which requires special equipment.
2 copies of list of any Wine, Spirits and Narcotics or cargo of such nature on the vessel and its location or, in the absence of which, a nil return.
A Declaration of Type of Reefer Cargo.
An Application for Discharge Permit.

PILOTAGE: Compulsory for vessels of more than 150 n.r.t., except Port Authority craft and naval ships of Oman. Pilots wait near the East Breakwater, vessels are to proceed to the entrance of the harbour on request either from Pilot or Harbour Control. Pilot boat has a green hull with white superstructure and an Oman National Flag on the mast. Boats keep VHF radio watch on Channel 12. The entrance of the harbour is marked with a Buoy-Flashing Green light for a duration of 1 second in every 5 seconds.

ANCHORAGES: The Roads of Raysut offer an open sea anchorage with a sandy bottom. The depth at the Entrance Buoy is 13 m. and North-Eastward it increases, however anchorage position at present is given to all vessels upon reporting by VHF radio. Anchorage positions are set with 0.5 miles between each ship in a minimum of 10 m. of water for large vessels, less depth of water as required for coasters.

Anchorage Area:

1. Lat. 16° 57′ N., Long. 54° 04′ E.
2. Lat. 16° 55′ N., Long. 54° 04′ E.
3. Lat. 16° 55′ N., Long. 54° 02′ E.
4. Lat. 16° 57′ N., Long. 54° 02′ E.

RESTRICTIONS: Berthing and unberthing throughout 24 hours.

Prohibited Area: Within 2 square miles in front of the Royal Palace towards the sea is a prohibited area either for entry or for anchorage.

MAX. SIZE: Max. draft for cargo vessels is 9.5 m. and tankers about 12 m. Vessels will be brought to the berths regardless of the tide conditions since the port operates as a year round all weather port.

HEALTH: Quarantine procedures are followed and all ships upon arriving must fly flag "Q" until completion of quarantine procedures. Public Health requires certificates of vaccination for cholera and yellow fever. Derat Certificate also required.

RADIO: Muscat Radio or Bahrain Radio.

VHF: For advance ETA data the Harbour Control listens on 2182 kHz and works on 2023.5 kHz. VHF watch is kept on Channel 16 and other Channels available are 12, 10 and 6. The service is available around the clock. Area weather available on request.

Radio Muscat on Channels 16, 26 and 27.

RADAR: None available at present.

TUGS: Join vessels with the Pilots. 2 powerful tug boats (1,700 h.p. and 2,250 h.p.) of harbour/ocean going type, fitted with fire fighting facility, also 2 small mooring tugs equipped with 2 engines: 120 h.p and 220 h.p. respectively.

BERTHING: The harbour provides a quay of 522 m. with a depth of water 10 m. Also available: 200 m. length with 8 m. depth and 460 m. length with 4 m. depth. An oil terminal, dolphin type, 130 m. length with 12 m. depth. 1 ramp for small landing craft.

Berth No.	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)
1	173	10.0	9.5
2	173	10.0	9.5
3	173	10.0	9.5
4	200	8.0	7.5

Facilities: 1×2,000 ton bitumen tank on Berth No. 1.

CRANES:

2×15 ton capacity fixed quay-side cranes.

2×6 ton capacity fixed quay-side cranes. (Operated on Berths No. 1, 2 and 3).

1×35 ton capacity gantry crane for containers – operated on Berths No. 1 and 2.

1×150 ton rated mobile crane.

9 mobile cranes, rated capacities 12 tons – 58 tons.

1 forklift truck (container handling), capacity 35 tons.

23 forklift trucks, capacities 3 tons – 10 tons.

BARGES: 350 d.w.t. barge is available.

SPECIALISED FACILITIES: Ro/Ro services are carried out in the port. Such vessels must meet the standard requirements for entry to the berth. There are no bulk handling facilities.

BRIDGES: None.

STEVEDORES: Arrangements must be made through the Agent for maximum notification of arrival to arrange gangs. Minimum notification 24 hours. Normal working hours from Saturday to Thursday 0700 – 1500 hrs., 1500 – 2300 hrs., 2300 – 0700 hrs. Friday 0700 – 1200 hrs., 1400 – 1900 hrs. (work could be extended up to 2300 hrs. subject to prior notice).

Notes:

1. The above hours are subject to change during the month of Ramadan.
2. Overtime is applicable after 1500 hrs.
3. Friday and Public Holiday working shall be at special overtime rate.
4. Port Authority reserve the right both to allocate the gangs to vessels at their discretion and decide the extent of overtime to be worked.

MEDICAL: Agents handle all medical matters. A hospital is available in the town of Salalah (17 miles away). Also see "Health".

TANKERS: Tankers up to 35,000 d.w.t. are accommodated at the Oil Pier which is 130 m. in length and about 12 m. in depth. 2×6 in. Chicksan arms available.

FRESH WATER: For vessels at berths, fresh water is available ex-pipeline.

FUEL: Available to ships at the berth by tank truck, must be arranged by the Agent.

FIRE PRECAUTIONS: Fire hydrants available alongside berths.

CONSULS: None available.

REPAIRS: No facilities.

DRY DOCKS: None available.

SURVEYORS: Lloyd's representative is Oman United Agencies in Salalah.

GANGWAY/DECK WATCHMEN: Not required except as deemed necessary by the Master of the vessel and then he must supply his own.

HATCHES: Opening and closing hatches is normally done by the crew but arrangements may be made with the port for provision of this service. Agents can advise.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 250 gm. of tobacco. 1 bottle (1 litre) alcoholic spirit. 1 bottle (1 litre) wine. 24 cans of beer and various used personal effects such as radios, cameras, etc.

CERTIFICATES:

Construction Certificate.
Registration Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Load Line Certificate.
Cargo Gear Book.
Israel Boycott Declaration.

CARGO GEAR: Normally handled by shore equipment and shore gear. Any special lifting equipment required must be provided by the vessel. Ships in the anchorage are normally expected to supply all gear required. The port has rental gear for those vessels requiring same.

REPATRIATION: Permitted, arrangements may be made by the Agent for this service. Crew changes may be effected at this port.

AIRPORT: Salalah International Airport. Distance 25 km.

TIME: Time local is GMT plus 4 hours.

HOLIDAYS: All Muslim holidays are observed. Working hours are reduced during the period of Ramadan. Special National days celebration is held on 18th November each year. Working of overtime may be arranged during most of the holiday periods, Agents can advise.

POLICE/AMBULANCE/FIRE: The port has Police available at the port at all times. Ambulance service is also available at the port. The port has the only telephone service and the Police located within the port also maintain telephone service. Required numbers are familiar to all persons in these two areas.

A complete fire fighting system is installed in the Port with 20 fire hydrants (4 in.) distributed through the jetty capable of handling all kinds of fire. The new tug boats are fitted with fire fighting facilities.

TELEPHONES: For any long distance calls G.T.O. maintains office in Salalah where calls may be placed and paid for. For local calls the port will permit the use of Port phone on a limited basis.

SERVICES: None available.

SHORE LEAVE: Master, First Officer and Chief Engineer are permitted restricted shore leave but all other members of the crew are restricted to the ship or port area.

IDENTIFICATION CARDS: Seaman's Book or Passport are sufficient for those persons going ashore.

REGULATIONS: No vessel shall enter the port area unless authorised by the Harbour Master. The Harbour Master may at his discretion refuse to allow vessels, with the exception of vessels in distress, to enter the port, and may order from the port any vessel with the exception of vessels unfit for sea, which does not have business within the port, or is in breach of these Regulations.

No vessel shall anchor, or weigh anchor or move within the port area except when and where required by the Harbour Master.

No unclean water ballast which is not free from oil or other harmful contaminants, shall be discharged into the waters of the port area. In case of the pumping of bilges or pollution by oil or harmful contaminants into the waters of the port area, the vessel will be responsible for any fines imposed by the Port Authority and any compensation or other damages according to Port Rules and Regulations.

Should fire break out aboard any vessel the Master should make an immediate signal either by a continuous sounding of long or short blasts on the ship's whistle or siren or by ringing of a fire bell.

In cases of adverse weather it is the sole responsibility of the Harbour Master to decide whether the sea conditions are suitable for handling cargo with barges in the Anchorage or whether the day will be declared a "Weather non-working day".

Masters shall be responsible for the adequate provisions of safety equipment and lights on board whilst cargo is being handled.

Conveyance of alcoholic liquor, other than manifested cargo under Customs supervision, from any vessel to the shore or from one vessel to another is prohibited.

No unauthorised person may enter the port area. Visitors to vessels are prohibited except by permission of the Harbour Master.

Ship's personnel and passengers are not permitted ashore except by permission of the Immigration Authorities and the Harbour Master.

Every merchant vessel in port shall fly her national flag, and the national flag of Sultanate of Oman, between sunrise and sunset.

DEVELOPMENTS: Feasibility study is taking place for more facilitie for transhipment cargo.

GENERAL: The port operates on a year round basis with the exceptio of vessels requiring barging. All barging is closed from mid-June to lat September depending on the sea state.

SHIPMASTER'S REPORT: 1978 (updated 1986).

Radio: Send ETA, draft, LOA, g.r.t., n.r.t., cargo to discharge, last por to: General Manager, Port Raysut, Salalah, Sultanate of Oman, givin 48 hours', 36 hours', 24 hours' notice.

Labour: A gang consists of 10 men.

Fresh Water: Available on all berths. NOT available at anchorage.

Provisions: Supplied by Agent.

Airport: Daily flight to Muscat.

Telex-Telephone-Cable-Posts: Available by "Cable & Wireless" offices

Hospital: Very good.

Workshop: Nil.

Fuel Oil: Not available.

REPORT: September 1985.

Approach Procedure: Vessels approaching Port Raysut should advis Agent of their ETA at least 96 hours in advance confirming sam 24 hours prior to arrival. The first ETA message should also includ LOA, draft, g.r.t., n.r.t. and details of cargo distribution.

No quarantine message need be sent if the vessel has a clean bill o health but if there is illness on board the Master should advise Agen Salalah in his ETA message.

Pilotage: Pilotage is compulsory. Vessels arriving at the anchorag should request an anchorage position from the Harbour Master prior t anchoring.

Quarantine: It is recommended that crew members should have vali certificates of innoculation against Cholera, which is sometime necessary, if there has been an outbreak in the area.

Extension of Derat/Exemption Certificates are not possible an vessels arriving with expired certificates are liable to a fine of RO 50,000

Gangways: Vessels at the anchorage should rig a safe and efficien accommodation ladder on the lee side. During rough weather a goo pilot ladder should be ready for use on the lee side. When berthed a safe and efficient accommodation ladder must be rigged at all times.

Readiness: Notice of Readiness to be handed to Agents Representative to be presented to Receivers in accordance with Charter Party term and conditions.

Priority: Vessels on liner voyages normally obtain discharge priority ove charter vessels.

Turn: Subject to 'priority' above vessels are worked on a "first come firs served" basis.

Customs: Bonded and other goods will be placed under Customs seal on arrival in port. Allowances for consumption during stay in port will be provided. See "Customs Circular".

Dangerous and Inflammable Cargo: Details of all dangerous cargo or board should be included in the vessels ETA message, as thi information has to be furnished to the Port Authority.

General Regulations: No liquor may be brought ashore or sold to shor staff. Ship's crews, except the Master, Chief Officer and Chief Enginee are not permitted ashore. Other normal port regulations apply.

Air Services: There are daily flights from Salalah to Seeb Airport, Musca where international flight connections can be arranged.

Ballast: Oily ballast must not be discharged within 50 miles of "Oman' coastline.

Banks: International banking facilities are available in Salalah. The loca currency is the Rial Omani which is subdivided into one thousand baizas

Bunkers and Lubricants: Limited supplies of gas oil and lubricants ca be obtained for vessels berthed alongside only. No IFO available an no facilities for supply at anchorage.

Buoys: There are no mooring buoys for vessels.

Cranes: Compulsory for cargo vessels to use 4 shore cranes.

Heavy Lifts: Heavy Lifts must be discharged with the vessel's own gea and should be taken delivery of direct from vessel. Lifts in excess o 30 tons should not be accepted without prior reference to Agent.

Hotels: There is one hotel of international standard and accommodatio is normally not difficult to obtain.

Labour: All labour is supplied to vessels by the Port Authority, and the vessel must provide drinking water and toilet facilities for the labour while discharging operations are in progress.

Launch Hire: Port Launch can be hired for visiting vessels at anchor.

Laundry Facilities: Laundry facilities can be arranged by Agent, bu minimum delivery time 48 hours.

Lighterage: Not available.

Passport and Visas: All persons entering Oman require a valid Passpor and Visa/Non Objection Certificate. Omani visas can be obtained from a Sultanate of Oman Embassy subject to receipt by that office of a Nor Objection Certificate from Sultanate of Oman. Non Objection Certificate can be obtained from Agent in Muscat, these usually take betweer 3 and 4 weeks to obtain.

Post and Telegraphs: Airmail letters usually take 5 to 7 days from Europe and 7/8 days from the USA. There are telephone, telegraph and telex links with all parts of the world via satellite.

Reefer Cargo: There are no special facilities for the landing of reefe cargo, but arrangements are usually made to discharge as late as possible in the evening, enabling delivery to consignees transport with least possible lapse of time from cargo leaving ship's cool room to reaching consignees freezers.

Refuse/Rat Guard: Vessels should not dump refuse at the anchorage. There are compulsory shore facilities for the landing of refuse for vessels which have berthed, at a charge of RO 2.250 per day. Rat guards are compulsory.

Roads: Road connections with outside territories are available but are usable by non-Arab nationals only with permission from the Royal Oman Police.

Ship Chandler: Available.

Spare Parts: Can be forwarded by air to Salalah. Agent should be advised in advanced of Airway Bill No. and flight details etc.
Stores and Provisions: Most provisions and fresh vegetables are available. Engine stores can be arranged if prior notice is given.
Surveyors: there are no classification surveyors at Salalah. Lloyd's Surveyors are available at Muscat, but costs for their services at Salalah, to be borne by the vessel
Transhipment: Transhipment of cargo is allowed.
Water: Fresh water is available to vessels which can berth. No facilities available for the supply of water at anchorage.
Notice: Royal Oman Police – Customs Department, Dhofar Customs Salalah to all Shipping Agents
Customs Control – Port Raysut: With effect from 1st May, 1980, under instructions from Director General of Customs, a new system of Customs Control will be instituted in Port Raysut.

On arrival in the Port, Ship's Master will be required to produce to the Customs boarding Officer the following documents:–

1. A copy of the cargo manifest.
2. A declaration made by members of the crew stating the dutiable goods in their possession.
3. A list, signed by the Captain, of the dutiable Ship's stores on Board.

Vessels will no longer be permitted to have free use of their stores (Tobacco goods, Alchohol etc) whilst in the confines of the Port.

On arrival in Port, an allowance will be given by the Customs Boarding Officer and the surplus stores will then be placed under Customs seal. The allowance will be:

1. 200 cigarettes or 50 cigars or 250 gms tobacco.
2. One bottle (1 litre) alcoholic spirit.
3. One bottle (1 litre) wine.
4. 24 cans beer, and
5. Various used personal effects such as radios, cameras etc.

Should a vessel remain in Port for more than 4 days, an issue of stores will be given upon request being made to the Customs Authorities. It is hoped that in the initial stages of these changes any inconvenience will be kept to a minimum and your co-operation is requested.

May I suggest that you acquaint any vessels you visit in the near future with details of the forthcoming changes.

Shipping Agents are reminded that their representatives should not board a vessel in advance of the Customs Boarding Officer.
Signed: Officer in Charge, Dhofar Customs.

Metric weights and measures to be used on Particulars of Cargo, Tonnage Certificates, Stevedoring Bills, Manifests and Bills of Lading.

Immigration:
(i) Masters should ensure that all crew are in possession of valid health documents.
(ii) All nationals, other than those holding British Passports, require visas for entry into Pakistan. Ship's crew can enter and leave Pakistan on Seaman's documents for purposes of joining vessel and/or on repatriation.
(iii) Seaman Books/Passports are required to be collected from Immigration authorities prior to sailing of vessel on surrender of the shore passes.
(iv) Taiwan and Israel nationals are not allowed shore leave facilities.

PILOTAGE: Pilotage is compulsory for vessels of 200 n.r.t. and upwards. Pilot boards at the Outer Anchorage.

Vessels are piloted day and night, subject to tides, length and draft, to berths lying on the East and West of the fairway, which is 4.27 miles long. Pilotage distance is about 5 to 6 miles.

ANCHORAGES: Outer Anchorage where ships await berth safe except during the S.W. monsoon from mid-May to September. During monsoon no anchorage is recommended. Vessels should anchor a safe distance outside the breakwater within Lighthouse bearings 045° and 025°. Depth of water at the anchorage is about 9 fathoms.

RESTRICTIONS: Datum depth is 30 ft. Dry cargo vessels with a draft in excess of 32 ft. are not permitted to enter Karachi due to dredged depths at berths.

Berthing can be done at any time during day/night, except vessels over 560 ft. in length having bridge aft, which are permitted in daylight only.

Berthing of tankers at Oil Berths is done during daylight only.

MAX. SIZE:	*Length*	*Draft*
Bulk carriers and general cargo (dry cargo)	945 ft.	32 ft.
Bulk oil tankers, white oil products	750 ft.	35 ft.
Bulk oil tankers, black oils	750 ft.	35 ft.
New Oil Pier No. 4, crude oil	850 ft.	39 ft.

HEALTH: The Port Health Authorities give automatic clearance on receipt of a "clean" standard quarantine message and this will be conveyed by the Pilot. However, ships from Yellow Fever areas must be cleared during daylight hours by the Port Health Officer on arrival alongside. On sailing to ports outside India and Pakistan, a medical inspection takes place on the day before sailing. It is, in theory, necessary for a member of the crew to be present at this inspection, although usually the inspection is only a formality. All vessels required obtain Immigration Clearance on arrival.

All vessels which have touched any port or ports between Port Sudan and Durban, on the East Coast of Africa, including these ports, are considered "suspected" vessels on account of Yellow Fever and Jigger and may not have communication with the shore till cleared at berth by the Port Health Officer, who attends only between sunrise and sunset, except in special circumstances. The incubation period for Yellow Fever under the rules is given as 9 days, but vessels arriving later than 9 days are still not free from quarantine because there is no incubation period for Jigger.

RADIO/VHF: Port Authorities equipped with VHF radio-telephone, calling Channel 16, working Channel 12. Control Station call sign "Manora Pilot Control".

Vessels should establish radio contact with control station as soon as they are within VHF range.

Use of Channel 12 is restricted to the following: Ships while entering harbour are to maintain watch on Channel 12 as soon as Pilot boards. Ships in harbour scheduled to sail are to keep a listening watch half an hour before sailing till their clearance from the port.

"Intercommunication with the ships, other than Pilot Control, at Oute Anchorage or ships in harbour on Channels 12 and 16 is strictl prohibited. The Manora Pilot Control Station is equipped with multi channel VHF Radio Telephone sets which are operating on Internationa Maritime Channels 8, 9, 11, 12 and 16 subject to above restrictions."

Vessel's Registration: All vessels calling at Karachi Port, upon arrival a anchorage are required to make immediate contact with Port Contro (Manora Station) by Aldis Lamp and notify arrival time, vessel's name flag, cargo, and position. Also vessel is to make contact on VHF repeating all of the above information, declaring readiness of vessel t berth, and the time noted by Port Control by light is taken as the time of arrival off the Port, both for berthing turn and also serving NOR (i case of Charter Vessel) to receivers/charterers.

TUGS: There are 8 diesel tugs owned by Port Trust. Four tugs hav bollard pull varying from 10 tons to 18 tons, 2 tugs have 27 tons bollar pull and 2 (Voith Schneider) tugs have 35 tons bollard pull.

Towage inside the harbour is rendered by Port Trust on signal fron Pilot. Towage is not provided outside the breakwater except in ver special circumstances at the discretion of the Deputy Conservato subject to weather permitting and availability of tugs on special term and conditions.

BERTHING: There are 17 berths at East Wharves, total quayag 8,622 ft. Berth Nos. 1 to 17 are on a concrete quay wall of the lates type. All berths are rail-served. Berth lengths vary from 470 ft. to 550 f Available depths vary from 28 ft. to 32 ft. There are 13 berths at Wes Wharf and their length varies from 550 ft. to 700 ft. Depths availabl vary from 30 ft. to 32 ft.

There are 4 Bulk Oil Piers having length of 425 ft., 644 ft., 750 ft. an 850 ft., which can accommodate tankers of overall length betwee 525 ft. and 850 ft. Also see "Tankers".

Moorings: Three moorings of 700 ft. each and one LASH mooring o 1,000 ft. have been laid and are commissioned for accommodating th vessels of sizes between 600 ft. and 850 ft. respectively.

Bulk Wheat: Discharged by bulk evacuators at Berth No. 17.

Passenger Vessels: Berth No. 24.

Fertiliser: Discharge at Berth No. 22. Bagging machines installed.

Vessels with LOA 900 ft. and over berth at Nos. 16 and 17.

CRANES: All berths except Nos. 5, 6, 7, 17, 25, 26, 27 and 28 ar equipped with electric cranes. Floating crane available up to 100 ton S.W.L.

STEVEDORES: Working Hours: Monday through Thursday an Saturday, day shift: 0730 – 1130 and 1230 – 1630 hrs. On Fridays da shift: 0730 – 1230 and 1400 – 1630 hrs. Mondays through Saturday night shift: 1900 – 2300 and 2330 – 0330 hrs. next day.

Overtime periods: 0330 – 0630, 1130 – 1230, 1630 – 1830 hrs.

TANKERS: Mineral oils discharged at the Bulk Oil Pier, 4 berths, an at West Wharf Berth No. 20. Heavy grades may be discharged at th steamer wharves but dangerous petroleum only at the Oil Piers.

Vegetable oils are handled at both the terminals mentioned above.

New Oil Pier No. 4: Max. LOA 850 ft., max. beam 130 ft., max. loade draft 39 ft., max. size 75,000 d.w.t. and 95,000 tons, max. gros displacement.

Slop Reception Facilities: Available at Oil Pier No. 4 only.

Also see "Berthing" and "Developments".

FRESH WATER: Available alongside by pipe-line at all shipping berths Also available alongside and at outer anchorage by private barges.

At times due to water shortage vessels are required to arrive wit sufficient water for duration of stay.

FUEL: In addition to coal, 3 grades of petroleum are available – furnac oil, light diesel oil and high speed diesel oil. Furnace oil can be supplie by pipe-line at all berths. Light diesel only at Berth Nos. 1 to 4. Larg quantities can be supplied by pipe-line at the Bulk Oil Pier only.

DRY DOCKS: The Karachi Shipyard and Engineering Works Ltd. hav 2 dry docks. One of 609 ft.×90 ft.×18 ft. above keel blocks which ca accommodate vessels up to 25,000 d.w.t. and the second dry doc measuring 560 ft.×80 ft.×16 ft. above keel blocks and can dock vessel up to 18,000 d.w.t. Prior booking of the dry dock is essential.

REPAIRS: Repairs can be carried out at the anchorage except in th monsoon season. 2 ship repair jetties are available in the port. I addition, Karachi Shipyard and Engineering Works Ltd. provide all kind of repair and ship-building facilities.

Immobilisation of Main Engine: Requests for immobilisation must b included by the Master of the vessel in their arrival messages so tha the permission of the Deputy Conservator, Karachi Port Trust may b obtained for the period required to carry out maintenance and necessar repairs. Oil tankers are not permitted to immobilise engines, particularl at oil pier berths.

CARGO GEAR: *Cargo Gear Certificate:* The Dock Labour Safety Office (Government Department) is very strict and requires all gear/ derricks winches and accessories to have valid certificates. In the event thei certificates are out of date, delays will be incurred before cargo discharg operations are allowed to commence.

AIRPORT: Karachi Airport, 7 miles from city. International connection to all parts of the world.

TIME: GMT plus 5 hours all year round.

HOLIDAYS: Eid-ul-Azha; Muharram; Republic Day (23rd March); Eid Miland un Nabi; Independence Day (14th August) Defence of Pakista Day (6th September); Jamat-ul-Wida; Eid-ul-Fitr; Anniversary of Deat of Quaid-e-Azam; Allama/Iqbal Day (9th November); Christmas Day an Birthday of Qaid-e-Azam (25th December).

SHORE LEAVE: Shore passes are granted by Immigration Authoritie when they first go on board and must be returned on departure of th vessel. These passes permit entry/exit to the docks until 2200 hrs.

Indian crew are not allowed ashore except in emergency. A Immigration Policeman will remain on board in port where Indian cre are carried. This policeman will ask for some sort of accommodation This need only be given if it does not cause inconvenience to the shi

SHIP SUPPLY SERVICE: There are privately operated services for transportation of personnel and some essential stores, etc., for ships lying at Outer Anchorage to inside the port. These services are of a small scale and carried out by small launches, only during good weather. In bad weather such as monsoon season these services are suspended.

GENERAL: The Karachi Port Authorities advise that in order to avoid delays to ships requiring abreast berths for working cargo, it has been decided not to berth more than 1 vessel for receiving supplies of fresh water and bunkers. Ships due to call at Karachi are therefore *recommended to arrive with sufficient fresh water and bunkers to last for 2 or 3 weeks from the date of arrival at the Outer Anchorage.*
